8. Creating an input Gnuplot file for plotting a data and saving the output for seeing on the screen. Saving it as an eps file and as a pdf file.
9. To find the roots of a quadratic equation.
10. Motion of a projectile using simulation and plot the output for visualization.
11. Numerical solution of equation of motion of simple harmonic oscillator and plot the outputs for visualization.
12. Motion of particle in a central force field and plot the output for visualization.

Suggested Readings:

- Introduction to Numerical Analysis, S.S. Sastry, 5th Edn., 2012, PHI Learning Pvt. Ltd.
- Computer Programming in Fortran 77". V. Rajaraman (Publisher: PHI).
- LaTeX–A Document Preparation System", Leslie Lamport (Second Edition, Addison-Wesley, 1994).
- Gnuplot in action: understanding data with graphs, Philip K Janert, (Manning 2010)
- Schaum's Outline of Theory and Problems of Programming with Fortran, S Lipsdutz and A Poe, 1986Mc-Graw Hill Book Co.
- Computational Physics: An Introduction, R. C. Verma, et al. New Age International Publishers, New Delhi.
- A first course in Numerical Methods, U.M. Ascher and C. Greif, 2012, PHI Learning
- Elementary Numerical Analysis, K.E. Atkinson, 3rd edn., 2007, Wiley India Edition.

SEC-2: Electrical Circuits and Network Skills **Credits 02**

SEC2T: Electrical Circuits and Network Skills

Course Contents:

Basic Electricity Principles:
Voltage, Current, Resistance, and Power. Ohm's law. Series, parallel, and series-parallel combinations. AC Electricity and DC Electricity. Familiarization with multimeter, voltmeter and ammeter.

Understanding Electrical Circuits:
Main electric circuit elements and their combination. Rules to analyze DC sourced electrical circuits. Current and voltage drop across the DC circuit elements. Single-phase and three-phase alternating current sources. Rules to analyze AC sourced electrical circuits. Real, imaginary and complex power components of AC source. Power factor. Saving energy and money.

Electrical Drawing and Symbols:

Downloaded from Vidyasagar University by 103.37.216.194 on 29 July 2023 11:16:35 (C) Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_pdf_Revised.pdf

Drawing symbols. Blueprints. Reading Schematics. Ladder diagrams. Electrical Schematics. Power circuits. Control circuits. Reading of circuit schematics. Tracking the connections of elements and identify current flow and voltage drop.

Generators and Transformers:
DC Power sources. AC/DC generators. Inductance, capacitance, and impedance. Operation of transformers.

Electric Motors:
Single-phase, three-phase & DC motors. Basic design. Interfacing DC or AC sources to control heaters & motors. Speed & power of ac motor.

Solid-State Devices:
Resistors, inductors and capacitors. Diode and rectifiers. Components in Series or in shunt. Response of inductors and capacitors with DC or AC sources

Electrical Protection:
Relays. Fuses and disconnect switches. Circuit breakers. Overload devices. Ground-fault protection. Grounding and isolating. Phase reversal. Surge protection. Interfacing DC or AC sources to control elements (relay protection device)

Electrical Wiring:
Different types of conductors and cables. Basics of wiring-Star and delta connection. Voltage drop and losses across cables and conductors. Instruments to measure current, voltage, power in DC and AC circuits. Insulation. Solid and stranded cable. Conduit. Cable trays. Splices: wire nuts, crimps, terminal blocks, split bolts, and solder. Preparation of extension board.

Suggested Readings:

- A text book in Electrical Technology - B L Theraja - S Chand & Co.
- A text book of Electrical Technology - A K Theraja
- Performance and design of AC machines - M G Say ELBS Edn.

Or

SEC-2: Basic Instrumentation Skills **Credits 02**

SEC2T: Basic Instrumentation Skills **Credit 01**

Course Contents:

Basic of Measurement: Instruments accuracy, precision, sensitivity, resolution range etc. Errors in measurements and loading effects.

Multimeter: Principles of measurement of dc voltage and dc current, ac voltage, ac current and resistance. Specifications of a multimeter and their significance.

Downloaded from Vidyasagar University by 103.37.216.194 on 09 Jun 2023 11:16:35 GMT. Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_Revised.pdf

Electronic Voltmeter: Advantage over conventional multimeter for voltage measurement with respect to input impedance and sensitivity. Principles of voltage, measurement (block diagram only). Specifications of an electronic Voltmeter/ Multimeter and their significance.

AC millivoltmeter: Type of AC millivoltmeters: Amplifier- rectifier, and rectifier-amplifier. Block diagram ac millivoltmeter**,** specifications and their significance.

Cathode Ray Oscilloscope: Block diagram of basic CRO. Construction of CRT, Electron gun, electrostatic focusing and acceleration (Explanation only– no mathematical treatment), brief discussion on screen phosphor, visual persistence & chemical composition. Time base operation, synchronization. Front panel controls. Specifications of a CRO and their significance. Use of CRO for the measurement of voltage (dc and ac frequency, time period. Special features of dual trace, introduction to digital oscilloscope, probes. Digital storage Oscilloscope: Block diagram and principle of working.

Signal Generators and Analysis Instruments: Block diagram, explanation and specifications of low frequency signal generators. pulse generator, and function generator. Brief idea for testing, specifications. Distortion factor meter, wave analysis.

Impedance Bridges & Q-Meters: Block diagram of bridge. working principles of basic (balancing type) RLC bridge. Specifications of RLC bridge. Block diagram & working principles of a Q- Meter. Digital LCR bridges.

Digital Instruments: Principle and working of digital meters. Comparison of analog & digital instruments. Characteristics of a digital meter. Working principles of digital voltmeter.

Digital Multimeter: Block diagram and working of a digital multimeter. Working principle of time interval, frequency and period measurement using universal counter/ frequency counter, time- base stability, accuracy and resolution.

SEC2P: Practical **Credit 01**

The test of lab skills will be of the following test items:

1. Use of an oscilloscope.
2. CRO as a versatile measuring device.
3. Circuit tracing of Laboratory electronic equipment,
4. Use of Digital multimeter/VTVM for measuring voltages
5. Circuit tracing of Laboratory electronic equipment,
6. Winding a coil / transformer.
7. Study the layout of receiver circuit.
8. Trouble shooting a circuit
9. Balancing of bridges

Laboratory Exercises:

1. To observe the loading effect of a multimeter while measuring voltage across a low resistance and high resistance.

Downloaded from Vidyasagar University by 103.79.216.194 on 09 Jun 2023 11:16:35 +05:30, Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_pdf_Revised.pdf

2. To observe the limitations of a multimeter for measuring high frequency voltage and currents.
3. To measure Q of a coil and its dependence on frequency, using a Q- meter.
4. Measurement of voltage, frequency, time period and phase angle using CRO.
5. Measurement of time period, frequency, average period using universal counter/ frequency counter.
6. Measurement of rise, fall and delay times using a CRO.
7. Measurement of distortion of a RF signal generator using distortion factor meter.
8. Measurement of R, L and C using a LCR bridge/ universal bridge.

Open Ended Experiments:

1. Using a Dual Trace Oscilloscope
2. Converting the range of a given measuring instrument (voltmeter, ammeter)

Suggested Readings:

- A text book in Electrical Technology - B L Theraja - S Chand and Co.
- Performance and design of AC machines - M G Say ELBS Edn.
- Digital Circuits and systems, Venugopal, 2011, Tata McGraw Hill.
- Logic circuit design, Shimon P. Vingron, 2012, Springer.
- Digital Electronics, Subrata Ghoshal, 2012, Cengage Learning.
- Electronic Devices and circuits, S. Salivahanan & N. S.Kumar, 3rd Ed., 2012, Tata Mc-Graw Hill
- Electronic circuits: Handbook of design and applications, U.Tietze, Ch.Schenk, 2008, Springer
- Electronic Devices, 7/e Thomas L. Floyd, 2008, Pearson India

SEC-3: Renewable Energy and Energy Harvesting **Credits 02**

SEC3T: Renewable Energy and Energy Harvesting **Credit 01**

Course Contents:

Fossil fuels and Alternate Sources of energy: Fossil fuels and Nuclear Energy, their limitation, need of renewable energy, non-conventional energy sources. An overview of developments in Offshore Wind Energy, Tidal Energy, Wave energy systems, Ocean Thermal Energy Conversion, solar energy, biomass, biochemical conversion, biogas generation, geothermal energy tidal energy, Hydroelectricity.

Solar energy: Solar energy, its importance, storage of solar energy, solar pond, non convective solar pond, applications of solar pond and solar energy, solar water heater, flat plate collector, solar distillation, solar cooker, solar green houses, solar cell, absorption air conditioning. Need and characteristics of photovoltaic (PV) systems, PV models and equivalent circuits, and sun tracking systems.

Wind Energy harvesting: Fundamentals of Wind energy, Wind Turbines and different electrical machines in wind turbines, Power electronic interfaces, and grid interconnection topologies.

Downloaded from Vidyasagar University by 103.37.216.194 on 09 Jun 2023 11:16:35 +05:30, Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_Revised.pdf

Ocean Energy: Ocean Energy Potential against Wind and Solar, Wave Characteristics and Statistics, Wave Energy Devices. Tide characteristics and Statistics, Tide Energy Technologies, Ocean Thermal Energy, Osmotic Power, Ocean Bio-mass.

Geothermal Energy: Geothermal Resources, Geothermal Technologies.

Hydro Energy: Hydropower resources, hydropower technologies, environmental impact of hydro power sources.

Piezoelectric Energy harvesting: Introduction, Physics and characteristics of piezoelectric effect, materials and mathematical description of piezoelectricity, Piezoelectric parameters and modelling piezoelectric generators, Piezoelectric energy harvesting applications, Human power

Electromagnetic Energy Harvesting: Linear generators, physics mathematical models, recent applications. Carbon captured technologies, cell, batteries, power consumption Environmental issues and Renewable sources of energy, sustainability.

SEC3P: Practical **Credit 01**

Demonstrations and Experiments

1. Demonstration of training modules on solar energy, wind energy, etc.
2. Conversion of vibration to voltage using piezoelectric materials
3. Conversion of thermal energy into voltage using thermoelectric modules.

Suggested Readings:

- Non-conventional energy sources - G.D Rai - Khanna Publishers, New Delhi
- Solar energy - M P Agarwal - S Chand and Co. Ltd.
- Solar energy - Suhas P Sukhative Tata McGraw - Hill Publishing Company Ltd.
- Godfrey Boyle, “Renewable Energy, Power for a sustainable future”, 2004, Oxford University Press, in association with The Open University.
- Dr. P Jayakumar, Solar Energy: Resource Assesment Handbook, 2009
- J.Balfour, M.Shaw and S. Jarosek, Photovoltaics, Lawrence J Goodrich (USA).
- http://en.wikipedia.org/wiki/Renewable_energy

SEC-4: Weather Forecasting **Credits 02**

SEC4T: Weather Forecasting **Credit 01**

Course Contents:

Introduction to atmosphere: Elementary idea of atmosphere: physical structure and composition; compositional layering of the atmosphere; variation of pressure and temperature with height; air temperature; requirements to measure air temperature;

Downloaded from Vidyasagar University by 103.37.216.194 on 09 Jun 2023 11:16:35 +05:30, Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_Revised.pdf

temperature sensors: types; atmospheric pressure: its measurement; cyclones and anticyclones: its characteristics.

Measuring the weather: Wind; forces acting to produce wind; wind speed direction: units, its direction; measuring wind speed and direction; humidity, clouds and rainfall, radiation: absorption, emission and scattering in atmosphere; radiation laws.

Weather systems: Global wind systems; air masses and fronts: classifications; jet streams; local thunderstorms; tropical cyclones: classification; tornadoes; hurricanes.

Climate and Climate Change: Climate: its classification; causes of climate change; global warming and its outcomes; air pollution; aerosols, ozone depletion, acid rain, environmental issues related to climate.

Basics of weather forecasting: Weather forecasting: analysis and its historical background; need of measuring weather; types of weather forecasting; weather forecasting methods; criteria of choosing weather station; basics of choosing site and exposure; satellites observations in weather forecasting; weather maps; uncertainty and predictability; probability forecasts.

SEC-4P: Practical **Credit 01**

Demonstrations and Experiments:

1. Study of synoptic charts & weather reports, working principle of weather station.
2. Processing and analysis of weather data:
    (a) To calculate the sunniest time of the year.
    (b) To study the variation of rainfall amount and intensity by wind direction.
    (c) To observe the sunniest/driest day of the week.
    (d) To examine the maximum and minimum temperature throughout the year.
    (e) To evaluate the relative humidity of the day.
    (f) To examine the rainfall amount month wise.
3. Exercises in chart reading: Plotting of constant pressure charts, surfaces charts, upper wind charts and its analysis.
4. Formats and elements in different types of weather forecasts/ warning (both aviation and non aviation)

Suggested Readings:

- Aviation Meteorology, I.C. Joshi, 3rd edition 2014, Himalayan Books
- The weather Observers Hand book, Stephen Burt, 2012, Cambridge University Press.
- Meteorology, S.R. Ghadekar, 2001, Agromet Publishers, Nagpur.
- Text Book of Agrometeorology, S.R. Ghadekar, 2005, Agromet Publishers, Nagpur.
- Why the weather, Charls Franklin Brooks, 1924, Chpraman & Hall, London.
- Atmosphere and Ocean, John G. Harvey, 1995, The Artemis Press.

Downloaded from Vidyasagar University by 103.37.216.194 on 29 Jun 2023 11:16:35 +05:30, Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_Revised.pdf

SEC-4: Radiation Safety **Credits 02**

SEC4T: Radiation Safety **Credit 01**

Course Contents:

Basics of Atomic and Nuclear Physics: Basic concept of atomic structure; X rays characteristic and production; concept of bremsstrahlung and auger electron, The composition of nucleus and its properties, mass number, isotopes of element, spin, binding energy, stable and unstable isotopes, law of radioactive decay, Mean life and half life, basic concept of alpha, beta and gamma decay, concept of cross section and kinematics of nuclear reactions, types of nuclear reaction, Fusion, fission.

Interaction of Radiation with matter:

Types of Radiation- Alpha, Beta, Gamma and Neutron and their sources, sealed and unsealed sources,

Interaction of Photons – Photoelectric effect, Compton Scattering, Pair Production, Linear and Mass Attenuation Coefficients,

Interaction of Charged Particles- Heavy charged particles - Beth-Bloch Formula, Scaling laws, Mass Stopping Power, Range, Straggling, Channeling and Cherenkov radiation. Beta Particles- Collision and Radiation loss (Bremsstrahlung),

Interaction of Neutrons - Collision, slowing down and Moderation.

Radiation detection and monitoring devices:

Radiation Quantities and Units: Basic idea of different units of activity, KERMA, exposure, absorbed dose, equivalent dose, effective dose, collective equivalent dose, Annual Limit of Intake (ALI) and derived Air Concentration (DAC).

Radiation detection: Basic concept and working principle of *gas detectors* (Ionization Chambers, Proportional Counter, Multi-Wire Proportional Counters (MWPC) and Gieger Muller Counter), *Scintillation Detectors* **(**Inorganic and Organic Scintillators), *Solid States Detectors* and *Neutron Detectors, Thermo luminescent Dosimetry.*

Radiation safety management:

Biological effects of ionizing radiation, Operational limits and basics of radiation hazards evaluation and control: radiation protection standards, International Commission on Radiological Protection (ICRP) principles, justification, optimization, limitation, introduction of safety and risk management of radiation. Nuclear waste and disposal management. Brief idea about Accelerator driven Sub-critical system (ADS) for waste management.

Application of nuclear techniques:

Application in medical science (e.g., MRI, PET, Projection Imaging Gamma Camera, radiation therapy), Archaeology, Art, Crime detection, Mining and oil. Industrial Uses: Tracing, Gauging, Material Modification, Sterization, Food preservation.

SEC-4P: Practical **Credit 01**

Experiments:

1. Study the background radiation levels using Radiation meter
   Characteristics of Geiger Muller (GM) Counter:

Downloaded from Vidyasagar University by 103.139.236.194 on 09 Jun 2023 11:15:37 | Copyright Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_Revised.pdf

2. Study of characteristics of GM tube and determination of operating voltage and plateau
3. length using background radiation as source (without commercial source).
4. Study of counting statistics using background radiation using GM counter.
5. Study of radiation in various materials (e.g. KSO4 etc.). Investigation of possible
6. radiation in different routine materials by operating GM at operating voltage.
7. Study of absorption of beta particles in Aluminum using GM counter.
8. Detection of α particles using reference source & determining its half life using spark counter
9. Gamma spectrum of Gas Light mantle (Source of Thorium)

Suggested Readings:

- W.E. Burcham and M. Jobes – Nuclear and Particle Physics – Longman (1995)
- G.F.Knoll, Radiation detection and measurements.
- Thermoluninescense Dosimetry, Mcknlay, A.F., Bristol, Adam Hilger (Medical Physics Handbook 5)
- W.J. Meredith and J.B. Massey, "Fundamental Physics of Radiology". John Wright and Sons, UK, 1989.
- Why J.R. Greening, "Fundamentals of Radiation Dosimetry", Medical Physics Hand Book Series, No.6, Adam Hilger Ltd., Bristol 1981
- Practical Applications of Radioactivity and Nuclear Radiations, G.C. Lowental and P.L. Airey, Cambridge University Press, U.K., 2001
- A. Martin and S.A. Harbisor, An Introduction to Radiation Protection, John Willey & Sons, Inc. New York, 1981.
- NCRP, ICRP, ICRU, IAEA, AERB Publications.
- W.R. Hendee, "Medical Radiation Physics", Year Book – Medical Publishers Inc. London, 1981

OR

SEC-4: Applied Optics **Credits 02**

SEC4T: Applied Optics **Credit 01**

Course Contents:

Theory includes only qualitative explanation. Minimum five experiments should be performed covering minimum three sections.

a. Sources and Detectors: Lasers, Spontaneous and stimulated emissions, Theory of laser action, Einstein's coefficients, Light amplification, Characterization of laser beam, He-Ne laser, Semiconductor lasers**.**
b. Fourier Optics: Concept of Spatial frequency filtering, Fourier transforming property of a thin lens.
c. Holography: Basic principle and theory: coherence, resolution, Types of holograms, white light reflection hologram, application of holography in microscopy, interferometry, and character recognition
d. Photonics: Fibre Optics: Optical fibres and their properties, Principal of light propagation through a fibre, The numerical aperture, Attenuation in optical fibre and attenuation limit, Single mode and multimode fibres, Fibre optic sensors: Fibre Bragg Grating

Downloaded from Vidyasagar University by 14.139.211.194 on 09 June 2021 : 15:37:55; Copyright : Vidyasagar University
Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:00:50; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General.pdf
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Physics_General_Revised.pdf

SEC4P: Applied Optics (Practical) **Credit 01**

Experiments:

Experiments on Lasers:

a. Determination of the grating radial spacing of the Compact Disc (CD) by reflection using He-Ne or solid state laser.

b. To find the width of the wire or width of the slit using diffraction pattern obtained by a He-Ne or solid state laser.

c. To find the polarization angle of laser light using polarizer and analyzer d. Thermal expansion of quartz using laser

Experiments on Semiconductor Sources and Detectors:

a. V-I characteristics of LED

b. Study the characteristics of solid state laser c. Study the characteristics of LDR

d. Photovoltaic Cell

e. Characteristics of IR sensor

Experiments on Fourier Optics:

a. Fourier optic and image processing

i. Optical image addition/subtraction

ii. Optical image differentiation

iii. Fourier optical filtering

iv. Construction of an optical 4f system

b. Fourier Transform Spectroscopy

Fourier Transform Spectroscopy (FTS) is a powerful method for measuring emission and absorption spectra, with wide application in atmospheric remote sensing, NMR spectrometry and forensic science.

d. Experiments on Holography and interferometry:

1. Recording and reconstructing holograms
2. Constructing a Michelson interferometer or a Fabry Perot interferometer
3. Measuring the refractive index of air
4. Constructing a Sagnac interferometer
5. Constructing a Mach-Zehnder interferometer
6. White light Hologram

e. Experiments on Photonics: Fibre Optics:

a. To measure the numerical aperture of an optical fibre

b. To study the variation of the bending loss in a multimode fibre

c. To determine the mode field diameter (MFD) of fundamental mode in a single- mode fibre by measurements of its far field Gaussian pattern

d. To measure the near field intensity profile of a fibre and study its refractive index profile

e. To determine the power loss at a splice between two multimode fibre

Suggested Readings:

- Fundamental of optics, F. A. Jenkins & H. E. White, 1981, Tata McGraw hill.
- LASERS: Fundamentals & applications, K.Thyagrajan & A.K.Ghatak, 2010, Tata McGraw Hill
- Fibre optics through experiments,M.R.Shenoy, S.K.Khijwania, et.al. 2009, Viva Books

List of Core Course (CC)

CC-1: Calculus, Geometry &Differential Equation
CC-2: Algebra
CC-3: Real Analysis
CC-4: Differential Equations & Vector Calculus
CC-5: Theory of Real Functions& Introduction to Metric Space
CC-6: Group Theory 1
CC-7: Numerical Methods
CC-8: Riemann Integration and Series of Functions
CC-9: Multivariate Calculus
CC-10: Ring Theory and Linear Algebra I
CC-11: Partial Differential Equations & Applications
CC-12: Group Theory II
CC-13: Metric Spaces and Complex Analysis
CC-14: Ring Theory and Linear Algebra II

Discipline Specific Electives (DSE)

DSE-1: Linear Programming
Or
DSE-1: Point Set Topology
Or
DSE-1: Theory of Equations

DSE-2: Probability & Statistics
Or
DSE-2: Boolean algebra and Automata Theory
Or
DSE-2: Portfolio Optimization

DSE-3: Mechanics
Or
DSE-3: Number Theory
Or
DSE-3: Industrial Mathematics

DSE-4: Mathematics Modeling
Or
DSE-4: Differential Geometry
Or
DSE-4: Bio Mathematics

Skill Enhancement Course (SEC)

SEC-1: Object Oriented Programming in C++
Or
SEC-1: Logic & Sets
SEC-2: Graph Theory
Or
SEC-2: Computer Graphics
Or
SEC-2: Operating System: Linux

Core Course

CC -1: Calculus, Geometry &Differential Equation **Credits 06**

C1T: Calculus, Geometry &Differential Equation

Unit 1

Hyperbolic functions, higher order derivatives, Leibnitz rule and its applications to problems of typee^{ax+b}sinx, e^{ax+b}cosx, $(ax+b)^n$sinx, $(ax+b)^n$cosx, concavity and inflection points, envelopes, asymptotes, curve tracing in cartesian coordinates, tracing in polar coordinates of standard curves, L'Hospital's rule, applications in business, economics and life sciences.

Unit 2

Reduction formulae, derivations and illustrations of reduction formulae of the type ∫sin nx dx, ∫cosnx dx, ∫tan nx dx, ∫sec nx dx, ∫$(\log x)^n$ dx, ∫$\sin^n x \sin^m x$ dx, parametric equations, parameterizing a curve, arc length of a curve, arc length of parametric curves, area under a curve, area and volume of surface of revolution, techniques of sketching conics.

Unit 3

Reflection properties of conics, rotation of axes and second degree equations, classification of conics using the discriminant, polar equations of conics.
Spheres. Cylindrical surfaces. Central conicoids, paraboloids, plane sections ofconicoids, generating lines, classification of quadrics, illustrations of graphingstandard quadric surfaces like cone, ellipsoid.

Unit 4

Differential equations and mathematical models. General, particular, explicit, implicit and singular solutions of a differential equation. Exact differential equations and integrating factors, separable equations and equations reducible to this form, linear equation and Bernoulli equations, special integrating factors and transformations.

Graphical Demonstration (Teaching Aid)

1. Plotting of graphs of functione^{ax+b}, log(ax + b), 1/(ax + b), sin(ax + b), cos(ax + b), |ax + b| and to illustrate the effect of a and b on the graph.
2. Plotting the graphs of polynomial of degree 4 and 5, the derivative graph, the second derivative graph and comparing them.
3. Sketching parametric curves (Eg. trochoid, cycloid, epicycloids, hypocycloid).
4. Obtaining surface of revolution of curves.
5. Tracing of conics in cartesian coordinates/ polar coordinates.
6. Sketching ellipsoid, hyperboloid of one and two sheets, elliptic cone, elliptic, paraboloid, and hyperbolic paraboloid using cartesian coordinates.

- S. Goldberg, Calculus and mathematical analysis.

CC-2: Algebra Credits 06

C2T: Algebra

Unit 1

Polar representation of complex numbers, nth roots of unity, De Moivre's theorem for rational indices and its applications.

Theory of equations: Relation between roots and coefficients, transformation ofequation, Descartes rule of signs, cubic and biquadratic equation.

Inequality: The inequality involving AM≥ GM≥ HM, Cauchy-Schwartz inequality.

Unit 2

Equivalence relations. Functions, composition of functions, Invertible functions, one to one correspondence and cardinality of a set. Well-ordering property of positive integers, division algorithm, divisibility and Euclidean algorithm. Congruence relation between integers. Principles of Mathematical induction, statement of Fundamental Theorem of Arithmetic.

Unit 3

Systems of linear equations, row reduction and echelon forms, vector equations, the matrix equation Ax=b, solution sets of linear systems, applications of linear systems, linear independence.

Unit 4

Introduction to linear transformations, matrix of a linear transformation, inverse of a matrix, characterizations of invertible matrices. Subspaces ofR^n, dimension of subspaces of R^n, rank of a matrix, Eigen values, eigen vectors and characteristic equation of a matrix.Cayley-Hamilton theorem and its use in finding the inverseof a matrix.

- K. Hoffman, R. Kunze, Linear algebra.
- W.S. Burnstine and A.W. Panton, Theory of equations.

CC-3 : Real Analysis Credits 06

C3T : Real Analysis

Unit 1

Review of algebraic and order properties of R, ε-neighborhood of a point in R. Idea of countable sets, uncountable sets and uncountability of R. Bounded above sets, bounded below sets, bounded sets, unbounded sets. Suprema and infima. Completeness property of R and its equivalent properties. The Archimedean property, density of rational (and Irrational) numbers in R, intervals. Limit points of a set, isolated points, open set, closed set, derived set,illustrations of Bolzano-Weierstrass theorem for sets, compact sets in R, Heine-Borel Theorem.

Unit 2

Sequences, bounded sequence, convergent sequence, limit of a sequence, liminf, lim sup. Limit theorems. Monotone sequences, monotone convergence theorem. Subsequences, divergence criteria. Monotone subsequence theorem (statement only), Bolzano Weierstrass theorem for sequences. Cauchy sequence, Cauchy's convergence criterion.

Unit 3

Infinite series, convergence and divergence of infinite series, Cauchy criterion, tests for convergence: comparison test, limit comparison test, ratio test, Cauchy's nth root test, integral test. Alternating series, Leibniz test. Absolute and conditional convergence.

Unit 4

Graphical Demonstration (Teaching aid)

1. Plotting of recursive sequences.
2. Study the convergence of sequences through plotting.
3. Verify Bolzano-Weierstrass theorem through plotting of sequences and hence identify convergent subsequences from the plot.
4. Study the convergence/divergence of in
5. finite series by plotting their sequences of partial sum.
6. Cauchy's root test by plotting nth roots.
7. Ratio test by plotting the ratio of nth and (n+1)th term.

- S. Goldberg, Calculus and mathematical analysis.

CC-4: Differential Equations & Vector Calculus Credits 06

C4T: Differential Equations & Vector Calculus

Unit 1

Lipschitz condition and Picard's Theorem (Statement only). General solution of homogeneous equation of second order, principle of super position for homogeneous equation, Wronskian: its properties and applications, Linear homogeneous and non-homogeneous equations of higher order with constant coefficients, Euler's equation, method of undetermined coefficients, method of variation of parameters.

Unit 2

Systems of linear differential equations, types of linear systems, differential operators, an operator method for linear systems with constant coefficients,
Basic Theory of linear systems in normal form, homogeneous linear systems with constant coefficients: Two Equations in two unknown functions.

Unit 3

Equilibrium points, Interpretation of the phase plane
Power series solution of a differential equation about an ordinary point, solutionabout a regular singular point.

Unit 4

Triple product, introduction to vector functions, operations with vector-valuedfunctions, limits and continuity of vector functions, differentiation and integration of vector functions.

Unit 5

Graphical demonstration (Teaching aid)

1. Plotting of family of curves which are solutions of second order differential equation.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

2. Plotting of family of curves which are solutions of third order differential equation.

- M.R. Speigel, Schaum's outline of Vector Analysis.

CC-5: Theory of Real Functions& Introduction to Metric Space

Credits 06

C5T: Theory of Real Functions& Introduction to Metric Space

Unit 1

Limits of functions (ε - δ approach), sequential criterion for limits, divergence criteria. Limit theorems, one sided limits. Infinite limits and limits at infinity. Continuous functions, sequential criterion for continuity and discontinuity. Algebra of continuous functions. Continuous functions on an interval, intermediate value theorem, location of roots theorem, preservation of intervals theorem. Uniform continuity, non-uniform continuity criteria, uniform continuity theorem.

Unit 2

Differentiability of a function at a point and in an interval, Caratheodory's theorem, algebra of differentiable functions. Relative extrema, interior extremum theorem. Rolle's theorem. Mean value theorem, intermediate value property of derivatives, Darboux's theorem. Applications of mean value theorem to inequalities and approximation of polynomials.

Unit 3

Cauchy's mean value theorem. Taylor's theorem with Lagrange's form of remainder, Taylor's theorem with Cauchy's form of remainder, application of Taylor's theorem to convex functions, relative extrema. Taylor's series and Maclaurin's series expansions of

exponential and trigonometric functions, ln (1 + x), 1/(ax + b) and$(x+1)^n$. Application of Taylor's theorem to inequalities.

Unit 4
Metric spaces: Definition and examples. open and closed balls, neighbourhood,open set, interior of a set. Limit point of a set, closed set, diameter of a set, subspaces, dense sets, separable spaces.

Reference Books

CC-6: Group Theory 1 Credits 06

C6T: Group Theory 1

Unit 1
Symmetries of a square, dihedral groups, definition andexamples of groups including permutation groups and quaternion groups (through matrices), elementary properties of groups.

Unit 2
Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups.

Unit 3
Properties of cyclic groups, classification of subgroups of cyclic groups. Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem.

Unit 4
External direct product of a finite number of groups, normal subgroups, factor groups, Cauchy's theorem for finite abelian groups.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Unit 5
Group homomorphisms, properties of homomorphisms, Cayley's theorem, properties of isomorphisms. First, Second and Third isomorphism theorems.

Reference Books

- John B. Fraleigh, A First Course in Abstract Algebra, 7th Ed., Pearson, 2002.

- D.S. Malik, John M. Mordeson and M.K. Sen, Fundamentals of abstract algebra.

CC-7: Numerical Methods — Credits 06

C7T: Numerical Methods — Credits 04

Unit 1
Algorithms. Convergence. Errors: relative, absolute. Round off. Truncation.

Unit 2
Transcendental and polynomial equations: Bisection method, Newton's method, secant method, Regula-falsi method, fixed point iteration, Newton-Raphson method. Rate of convergence of these methods.

Unit 3
System of linear algebraic equations: Gaussian elimination and Gauss Jordan methods. Gauss Jacobi method, Gauss Seidel method and their convergence analysis. LU decomposition

Unit 4
Interpolation: Lagrange and Newton's methods. Error bounds. Finite difference operators. Gregory forward and backward difference interpolation.
Numerical differentiation: Methods based on interpolations, methods based on finite differences.

Unit 5
Numerical Integration: Newton Cotes formula, Trapezoidal rule, Simpson's $1/3^{rd}$ rule, Simpsons 3/8th rule, Weddle's rule, Boole's Rule. midpoint rule, Composite trapezoidal rule, composite Simpson's $1/3^{rd}$ rule, Gauss quadrature formula.
The algebraic eigen value problem: Power method.
Approximation: Least square polynomial approximation.

Unit 6
Ordinary differential equations: The method of successive approximations, Euler's method, the modified Euler method, Runge-Kutta methods of orders two and four.

C7P: Numerical Methods Lab **Credits 02**

List of practical (using any software)

1. Calculate the sum 1/1 + 1/2 + 1/3 + 1/4 + ----------+ 1/ N.
2. Enter 100 integers into an array and sort them in an ascending order.
3. Solution of transcendental and algebraic equations by
   i) Bisection method
   ii) Newton Raphson method.
   iii) Secant method.
   iv) Regula Falsi method.
4. Solution of system of linear equations
   i) LU decomposition method
   ii) Gaussian elimination method
   iii) Gauss-Jacobi method
   iv) Gauss-Seidel method
5. Interpolation
   i) Lagrange Interpolation
   ii) Newton Interpolation
6. Numerical Integration
   i) Trapezoidal Rule
   ii) Simpson's one third rule
   iii) Weddle's Rule
   iv) Gauss Quadrature
7. Method of finding Eigenvalue by Power method
8. Fitting a Polynomial Function
9. Solution of ordinary differential equations
   i) Euler method
   ii) Modified Euler method
   iii) Runge Kutta method

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University

Note: For any of the CAS (Computer aided software) Data types-simple data types, floating data types, character data types, arithmetic operators and operator precedence, variables and constant declarations, expressions, input/output, relational operators, logical operators and logical expressions, control statements and loop statements, Arrays should be introduced to the students.

CC-8: Riemann Integration and Series of Functions **Credits 06**

C8T: Riemann Integration and Series of Functions

Unit 1

Riemann integration: inequalities of upper and lower sums, Darbaux integration, Darbaux theorem, Riemann conditions of integrability, Riemann sum and definition of Riemann integral through Riemann sums, equivalence of two definitions. Riemann integrability of monotone and continuous functions, properties of the Riemann integral; definition and integrability of piecewise continuous and monotone functions.

Intermediate Value theorem for Integrals; Fundamental theorem of Integral Calculus.

Unit 2

Improper integrals. Convergence of Beta and Gamma functions.

Unit 3

Pointwise and uniform convergence of sequence of functions. Theorems on continuity, derivability and integrability of the limit function of a sequence of functions. Series of functions;

Theorems on the continuity and derivability of the sum function of a series of functions; Cauchy criterion for uniform convergence and Weierstrass M-Test.

Unit 4

Fourier series: Definition of Fourier coefficients and series, Reimann Lebesgue lemma, Bessel's inequality, Parseval's identity, Dirichlet's condition. Examples of Fourier expansions and summation results for series.

Unit 5

Power series, radius of convergence, Cauchy Hadamard theorem. Differentiation and integration of power series; Abel’s theorem; Weierstrass approximation theorem.

- T. Apostol, Calculus I, II.

CC-9 Multivariate Calculus **Credits 06**

C9T: Multivariate Calculus

Unit 1

Functions of several variables, limit and continuity of functions of two or more variables Partial differentiation, total differentiability and differentiability, sufficient condition for differentiability. Chain rule for one and two independent parameters, directional derivatives, the gradient, maximal and normal property of the gradient, tangent planes, Extrema of functions of two variables, method of Lagrange multipliers, constrained optimization problems

Unit 2

Double integration over rectangular region, double integration over non-rectangular region, Double integrals in polar co-ordinates, Triple integrals, triple integral over a parallelepiped and solid regions. Volume by triple integrals, cylindrical and spherical co-ordinates.Change of variables in double integrals and triple integrals.

Unit 3

Definition of vector field, divergence and curl.
Line integrals, applications of line integrals: mass and work. Fundamental theorem for line integrals, conservative vector fields, independence of path.

Unit 4

Green's theorem, surface integrals, integrals over parametrically defined surfaces. Stoke's theorem, The Divergence theorem.

CC-10: Ring Theory and Linear Algebra I Credits 06

C10T: Ring Theory and Linear Algebra I

Unit 1
Definition and examples of rings, properties of rings, subrings, integral domains and fields, characteristic of a ring. Ideal, ideal generated by a subset of a ring, factor rings, operations on ideals, prime and maximal ideals.

Unit 2
Ring homomorphisms, properties of ring homomorphisms. Isomorphism theorems I, II and III, field of quotients.

Unit 3
Vector spaces, subspaces, algebra of subspaces, quotient spaces, linear combination of vectors, linear span, linear independence, basis and dimension, dimension of subspaces.

Unit 4
Linear transformations, null space, range, rank and nullity of a linear transformation, matrix representation of a linear transformation, algebra of linear transformations. Isomorphisms. Isomorphism theorems, invertibility and isomorphisms, change of coordinate matrix.

CC-11: Partial Differential Equations & Applications Credits 06

C11T: Partial Differential Equations & Applications

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Unit 1

Partial differential equations – Basic concepts and definitions. Mathematical problems. First- order equations: classification, construction and geometrical interpretation. Method of characteristics for obtaining general solution of quasi linear equations. Canonical forms of first-order linear equations. Method of separation of variables for solving first order partial differential equations.

Unit 2

Derivation of heat equation, wave equation and Laplace equation. Classification of second order linear equations as hyperbolic, parabolic or elliptic. Reduction of second order linear equations to canonical forms.

Unit 3

The Cauchy problem, Cauchy-Kowalewskaya theorem, Cauchy problem of an infinite string. Initial boundary value problems. Semi-infinite string with a fixed end, semi-infinite string with a free end. Equations with non-homogeneous boundary conditions. Non-homogeneous wave equation. Method of separation of variables, solving the vibrating string problem. Solving the heat conduction problem

Unit 4

Central force. Constrained motion, varying mass, tangent and normal components of acceleration, modelling ballistics and planetary motion, Kepler's second law.

Unit 5

Graphical Demonstration(Teaching aid)

1. Solution of Cauchy problem for first order PDE.
2. Finding the characteristics for the first order PDE.
3. Plot the integral surfaces of a given first order PDE with initial data.
4. Solution of wave equation $\frac{\partial^2 u}{\partial t^2} - c^2 \frac{\partial^2 u}{\partial x^2} = 0$ for the following associated conditions:
   (a) $u(x,0) = \phi(x),\ u_t(x,0) = \psi(x),\ x \in R,\ t > 0.$
   (b) $u(x,0) = \phi(x),\ u_t(x,0) = \psi(x), u(0,t) = 0\ \ x \in (0,\infty),\ t > 0$
5. Solution of wave equation $\frac{\partial^2 u}{\partial t^2} - c^2 \frac{\partial^2 u}{\partial x^2} = 0$ for the following associated conditions:
   (a) $u(x,0) = \phi(x),\ u\ \ (o,t) = a, u\ \ (l,t) = b,\ \ 0 < x < l, t > 0.$

$u(x,0) = \phi(x),\ x \in R,\ \ 0 < t < T.$

CC-12: Group Theory II Credits 06

C12T: Group Theory II

Unit 1
Automorphism, inner automorphism, automorphism groups, automorphism groups of finite and infinite cyclic groups, applications of factor groups to automorphism groups, Characteristic subgroups, Commutator subgroup and its properties.

Unit 2
Properties of external direct products, the group of units modulo n as an external direct product, internal direct products, Fundamental theorem of finite abelian groups.

Unit 3
Group actions, stabilizers and kernels, permutation representation associated with a given group action. Applications of group actions. Generalized Cayley's theorem. Index theorem.

Unit 4
Groups acting on themselves by conjugation, class equation and consequences, conjugacy in Sn, p-groups, Sylow's theorems and consequences, Cauchy's theorem, Simplicity of An for $n \geq 5$, non-simplicity tests.

Reference Books

- I.N. Herstein, Topics in Algebra, Wiley Eastern Limited, India, 1975.

CC-13: Metric Spaces and Complex Analysis Credits 06

C13T: Metric Spaces and Complex Analysis

Unit 1
Metric spaces: sequences in metric spaces, Cauchy sequences. Complete metric spaces, Cantor's theorem.
Unit 2

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Continuous mappings, sequential criterion and other characterizations of continuity. Uniform continuity. Connectedness, connected subsets of R.
Compactness: Sequential compactness, Heine-Borel property, totally bounded spaces, finite intersection property, and continuous functions on compact sets.
Homeomorphism. Contraction mappings. Banach fixed point theorem and its application to ordinary differential equation.

Unit 3
Limits, limits involving the point at infinity, continuity. Properties of complex numbers, regions in the complex plane, functions of complex variable, mappings.
Derivatives, differentiation formulas, Cauchy-Riemann equations, sufficient conditions for differentiability.

Unit 4
Analytic functions, examples of analytic functions, exponential function, logarithmic function, trigonometric function, derivatives of functions, and definite integrals of functions. Contours, Contour integrals and its examples, upper bounds for moduli of contour integrals. Cauchy- Goursat theorem, Cauchy integral formula.

Unit 5
Liouville's theorem and the fundamental theorem of algebra. Convergence of sequences and series, Taylor series and its examples.

Unit 6
Laurent series and its examples, absolute and uniform convergence of power series.

CC-14: Ring Theory and Linear Algebra II **Credits 06**

C14T: Ring Theory and Linear Algebra II

Unit 1
Polynomial rings over commutative rings, division algorithm and consequences, principal ideal domains, factorization of polynomials, reducibility tests, irreducibility tests,

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Eisenstein criterion, and unique factorization in Z [x]. Divisibility in integral domains, irreducible, primes, unique factorization domains, Euclidean domains.

Unit 2

Dual spaces, dual basis, double dual, transpose of a linear transformation and its matrix in the dual basis, annihilators. Eigen spaces of a linear operator, diagonalizability, invariant subspaces and Cayley-Hamilton theorem, the minimal polynomial for a linear operator, canonical forms.

Unit 3

Inner product spaces and norms, Gram-Schmidt orthogonalisation process, orthogonal complements, Bessel's inequality, the adjoint of a linear operator. Least squares approximation, minimal solutions to systems of linear equations. Normal and self-adjoint operators. Orthogonal projections and Spectral theorem.

Department Specific Electives (DSE)

DSE -1: Linear Programming **Credits 06**

DSE1T: Linear Programming

Unit 1

Introduction to linear programming problem. Theory of simplex method, graphical solution, convex sets, optimality and unboundedness, the simplex algorithm, simplex method in tableau format, introduction to artificial variables, two-phase method. Big-M method and their comparison.

Unit 2

Duality, formulation of the dual problem, primal-dual relationships, economic interpretation of the dual.

Transportation problem and its mathematical formulation, northwest-corner method, least cost method and Vogel approximation method for determination of starting basic solution, algorithm for solving transportation problem, assignment problem and its mathematical formulation, Hungarian method for solving assignment problem.

Unit 3

Game theory: formulation of two person zero sum games, solving two person zero sum games, games with mixed strategies, graphical solution procedure,linearprogramming solutionof games.

OR

DSE-1: Point Set Topology **Credits 06**

DSE1T: Point Set Topology

Unit 1

Countable and Uncountable Sets, Schroeder-Bernstein Theorem, Cantor's Theorem. Cardinal numbers and cardinal arithmetic. Continuum Hypothesis, Zorns Lemma, Axiom of Choice. Well-ordered sets, Hausdorff's maximalprinciple. Ordinal numbers.

Unit 2

Topological spaces, basis and Subbasis for a topology, subspace topology, interior points, limit points, derived set, boundary of a set, closed sets, closure and interior of a set.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Continuous functions, open maps, closed maps and homeomorphisms. Product topology, quotient topology, metric topology, Baire category theorem.

Unit 3

Connected and path connected spaces, connected sets in R, components and path components, local connectedness. Compact spaces, compact sets in R. Compactness in metric spaces. Totally bounded spaces, Ascoli-Arzela theorem, the Lebesgue number lemma. Local compactness.

OR

DSE-1: Theory of Equations **Credits 06**

DSE1T: Theory of Equations

Unit 1

General properties of polynomials, Graphical representation of a polynomial, maximum and minimum values of a polynomials, General properties of equations, Descarte's rule of signs positive and negative rule, Relation between the roots and the coefficients of equations.

Unit 2

Symmetric functions. Applications of symmetric function of the roots. Transformation of equations. Solutions of reciprocal and binomial equations. Algebraic solutions of the cubic and biquadratic. Properties of the derived functions.

Unit 3

Symmetric functions of the roots, Newton's theorem on the sums of powers of roots, homogeneous products, limits of the roots of equations.

Unit 4

Separation of the roots of equations, Strums theorem. Applications of Strum's theorem, conditions for reality of the roots of an equation. Solution of numerical equations.

Reference Books

- C. C. MacDuffee, Theory of Equations, John Wiley & Sons Inc., 1954.

DSE-2: Probability and Statistics **Credits 06**

DSE2T: Probability and Statistics

Unit 1

Sample space, probability axioms, real random variables (discrete and continuous), cumulative distribution function, probability mass/density functions, mathematical expectation, moments, moment generating function, characteristic function, discrete distributions: uniform, binomial, Poisson, geometric, negative binomial, continuous distributions: uniform, normal, exponential.

Unit 2

Joint cumulative distribution function and its properties, joint probability density functions, marginal and conditional distributions, expectation of function of two random variables, conditional expectations, independent random variables, bivariate normal distribution, correlation coefficient, joint moment generating function (jmgf) and calculation of covariance (from jmgf), linear regression for two variables.

Unit 3

Chebyshev's inequality, statement and interpretation of (weak) law of large numbers and strong law of large numbers. Central limit theorem for independent and identically distributed random variables with finite variance, Markov chains, Chapman-Kolmogorov equations, classification of states.

Unit 4

Random Samples, Sampling Diatributions, Estimation of parameters, Testing of hypothesis.

Reference Books

Or

DSE-2: Boolean Algebra and Automata Theory **Credits 06**

DSE2T: Boolean Algebra and Automata Theory

Unit 1

Definition, examples and basic properties of ordered sets, maps between ordered sets, duality principle, lattices as ordered sets, lattices as algebraic structures, sublattices, products and homomorphisms.

Unit 2

Definition, examples and properties of modular and distributive lattices, Boolean algebras, Boolean polynomials, minimal and maximal forms of Boolean polynomials, Quinn-McCluskey method, Karnaugh diagrams, Logic gates, switching circuits and applications of switching circuits.

Unit 3

Introduction: Alphabets, strings, and languages. Finite automata and regular languages: deterministic and non-deterministic finite automata, regular expressions, regular languages and their relationship with finite automata, pumping lemma and closure properties of regular languages.

Unit 4

Context free grammars and pushdown automata: Context free grammars (CFG), parse trees, ambiguities in grammars and languages, pushdown automaton (PDA) and the language accepted by PDA, deterministic PDA, Non- deterministic PDA, properties of context free languages; normal forms, pumping lemma, closure properties, decision properties.

Unit 5

Turing Machines: Turing machine as a model of computation, programming with a Turing machine, variants of Turing machine and their equivalence.

Unit 6

Undecidability: Recursively enumerable and recursive languages, undecidable problems about Turing machines: halting problem. Post correspondence problem, and undecidability problems about CFGs.

Or

DSE2: Portfolio Optimization **Credits 06**

DSE2T: Portfolio Optimization

Unit 1

Financial markets. Investment objectives. Measures of return and risk. Types of risks. Risk free assets. Mutual funds. Portfolio of assets. Expected risk and return of portfolio. Diversification.

Unit 2

Mean-variance portfolio optimization- the Markowitz model and the two-fund theorem, risk-free assets and one fund theorem, efficient frontier. Portfolios with short sales. Capital market theory.

Unit 3

Capital assets pricing model- the capital market line, beta of an asset, beta of a portfolio, security market line. Index tracking optimization models. Portfolio performance evaluation measures.

Reference Books

DSE -3: Mechanics Credits 06

DSE3T: Mechanics

Unit 1

Co-planar forces. Astatic equilibrium. Friction. Equilibrium of a particle on a rough curve. Virtual work.. Forces in three dimensions. General conditions of equilibrium. Centre of gravity for different bodies. Stable and unstable equilibrium.

Unit 2

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Equations of motion referred to a set of rotating axes. Motion of a projectile in a resisting medium. Stability of nearly circular orbits. Motion under the inverse square law.Slightly disturbed orbits. Motion of artificial satellites. Motion of a particle in three dimensions. Motion on a smooth sphere, cone, and on any surface of revolution.

Unit 3

Degrees of freedom. Moments and products of inertia. Momental Ellipsoid. Principal axes. D'Alembert's Principle. Motion about a fixed axis. Compound pendulum. Motion of a rigid body in two dimensions under finite and impulsive forces. Conservation of momentum and energy.

OR

DSE-3: Number Theory Credits 06

DSE3T: Number Theory

Unit 1

Linear diophantine equation, prime counting function, statement of prime number theorem, Goldbach conjecture, linearcongruences, complete set of residues. Chinese remainder theorem, Fermat’s little theorem, Wilson’s theorem.

Unit 2

Number theoretic functions, sum and number of divisors, totally multiplicative functions, definition and properties of the Dirichlet product, the Mobius Inversion formula, the greatest integer function, Euler’s phi-function, Euler’s theorem, reduced set of residues, some properties of Euler’s phi-function.

Unit 3

Order of an integer modulo n, primitive roots for primes, composite numbers having primitive roots, Euler’s criterion, the Legendre symbol and its properties, quadratic

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University

reciprocity, quadratic congruences with composite moduli. Public key encryption, RSA encryption and decryption, the equation x2 + y2= z2, Fermat's Last theorem.

Reference Books

- David M. Burton, Elementary Number Theory, 6th Ed., Tata McGraw-Hill, Indian reprint, 2007.
- Neville Robinns, Beginning Number Theory, 2nd Ed., Narosa Publishing House Pvt. Ltd., Delhi, 2007

OR

DSE-3: Industrial Mathematics Credits 06

DSE3T: Industrial Mathematics

Industry Mathematics

Unit 1

Medical Imaging and Inverse Problems. The content is based on Mathematics of X-ray and CT scan based on the knowledge of calculus, elementary differential equations, complex numbers and matrices.

Unit 2

Introduction to Inverse problems: Why should we teach Inverse Problems? Illustration of Inverse problems through problems taught in Pre-Calculus, Calculus, Matrices and differential equations. Geological anomalies in Earth's interior from measurements at its surface (Inverse problems for Natural disaster) and Tomography.

Unit 3

X-ray: Introduction, X-ray behavior and Beers Law (The fundamental question of image construction) Lines in the place.

Unit 4

Radon Transform: Definition and Examples, Linearity, Phantom (Shepp - Logan Phantom - Mathematical phantoms).

Unit 5

Back Projection: Definition, properties and examples.

Unit 6

CT Scan: Revision of properties of Fourier and inverse Fourier transforms and applications of their properties in image reconstruction. Algorithms of CT scan machine. Algebraic reconstruction techniques abbreviated as ART with application to CT scan.

Reference Books

- Timothy G. Feeman, The Mathematics of Medical Imaging, A Beginners Guide, Springer Under graduate Text in Mathematics and Technology, Springer, 2010.

- Andreas Kirsch, An Introduction to the Mathematical Theory of Inverse Problems, 2nd Ed., Springer, 2011

DSE-4: Mathematical Modelling **Credits 06**

DSE4T: Mathematical Modelling

Unit 1

Power series solution of Bessel's equation and Legendre's equation, Laplace transform and inverse transform, application to initial value problem up to second order.

Unit 2

Monte Carlo simulation modelling: simulating deterministic behavior (area under a curve, volume under a surface), generating random numbers: middle square method, linear congruence, queuing models: harbor system, morning rush hour, Overview of optimization modelling. Linear programming model: geometric solution algebraic solution, simplex method, sensitivity analysis

Reference Books

- TynMyint-U and Lokenath Debnath, Linear Partial Differential Equation for Scientists and Engineers, Springer, Indian reprint, 2006.
- Frank R. Giordano, Maurice D. Weir and William P. Fox, A First Course in Mathematical Modeling, Thomson Learning, London and New York, 2003.

Graphical demonstration as Teaching aid using any software

1. Plotting of Legendre polynomial for n = 1 to 5 in the interval [0,1]. Verifying graphically that all the roots of $P_n(x)$ lie in the interval [0,1].
2. Automatic computation of coefficients in the series solution near ordinary points.
3. Plotting of the Bessel's function of first kind of order 0 to 3.
4. Automating the Frobenius Series Method.
5. Random number generation and then use it for one of the following (a) Simulate area under a curve (b) Simulate volume under a surface.
6. Programming of either one of the queuing model (a) Single server queue (e.g. Harbor system) (b) Multiple server queue (e.g. Rush hour).
7. Programming of the Simplex method for 2/3 variables.

OR

DSE-4: Differential Geometry Credits 06

DSE4T: Differential Geometry

Unit 1

Theory of space curves: Space curves. Planer curves, curvature, torsion and Serret-Frenet formula. osculating circles, osculating circles and spheres. Existence of space curves. Evolutes and involutes of curves.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Unit 2

Theory of surfaces: Parametric curves on surfaces. Direction coefficients. First and second Fundamental forms. Principal and Gaussian curvatures. Lines of curvature, Euler's theorem.

Rodrigue's formula. Conjugate and asymptotic lines.

Unit 3

Developables: Developable associated with space curves and curves on surfaces. Minimal surfaces.

Geodesics: Canonical geodesic equations. Nature of geodesics on a surface of revolution.

Clairaut's theorem. Normal property of geodesics. Torsion of a geodesic. Geodesic curvature.

Gauss-Bonnet theorem.

OR

DSE-4: Bio Mathematics Credits 06

DSE4T: Bio Mathematics

Unit 1

Mathematical biology and the modeling process: an overview. Continuous models: Malthus model, logistic growth, Allee effect, Gompertz growth, Michaelis-Menten Kinetics, Holling type growth, bacterial growth in a chemostat, harvesting a single natural population, Prey predator systems and LotkaVolterra equations, populations in competitions, epidemic models (SI, SIR, SIRS, SIC)

Unit 2

Activator-inhibitor system, insect outbreak model: Spruce Budworm. Numerical solution of the models and its graphical representation. Qualitative analysis of continuous models: Steady state solutions, stability and linearization, multiple species communities and Routh-Hurwitz Criteria. Phase plane methods and qualitative solutions, bifurcations and limit cycles with examples in the context of biological scenario.

Spatial models: One species model with diffusion. Two species model with diffusion, conditions for diffusive instability, spreading colonies of microorganisms, Blood flow in circulatory system, travelling wave solutions, spread of genes in a population.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Unit 3

Discrete models: Overview of difference equations, steady state solution and linear stability analysis. Introduction to discrete models, linear models, growth models, decay models, drug delivery problem, discrete prey-predator models, density dependent growth models with harvesting, host-parasitoid systems (Nicholson-Bailey model), numerical solution of the models and its graphical representation. case studies. Optimal exploitation models, models in genetics, stage structure models, age structure models.

Reference Books

Graphical demonstration as Teaching aid using any software

1. Growth model (exponential case only).
2. Decay model (exponential case only).
3. Lake pollution model (with constant/seasonal flow and pollution concentration).
4. Case of single cold pill and a course of cold pills.
5. Limited growth of population (with and without harvesting).
6. Predatory-prey model (basic volterra model, with density dependence, effect of DDT, two prey one predator).
7. Epidemic model of infuenza (basic epidemic model, contagious for life,disease with carriers).
8. Battle model (basic battle model, jungle warfare, long range weapons).

Skill Enhancement Course (SEC)

SEC-1: Object Oriented Programming in C++ Credits 02

SEC1T: Object Oriented Programming in C++

Unit 1

Programming paradigms, characteristics of object oriented programming languages, brief history of C++, structure of C++ program, differences between C and C++, basic C++ operators, Comments, working with variables, enumeration, arrays and pointer.

Unit 2

Objects, classes, constructor and destructors, friend function, inline function, encapsulation, data abstraction, inheritance, polymorphism, dynamic binding, operator overloading, method overloading, overloading arithmetic operator and comparison operators.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Unit 3
Template class in C++, copy constructor, subscript and function call operator, concept of namespace and exception handling.

Reference Books

- A. R. Venugopal, Rajkumar, and T. Ravishanker, Mastering C++, TMH, 1997.

OR

SEC-1: Logic and Sets Credits 02

SEC1T: Logic and Sets

Unit 1
Introduction, propositions, truth table, negation, conjunction and disjunction. Implications, biconditional propositions, converse, contra positive and inverse propositions and precedence of logical operators. Propositional equivalence: Logical equivalences. Predicates and quantifiers: Introduction, quantifiers, binding variables and negations.

Unit 2
Sets, subsets, set operations and the laws of set theory and Venn diagrams. Examples of finite and infinite sets. Finite sets and counting principle. Empty set, properties of empty set. Standard set operations. classes of sets. Power set of a set.

Unit 3
Difference and Symmetric difference of two sets. Set identities, generalized union and intersections. Relation: Product set. Composition of relations, types of relations, partitions, equivalence Relations with example of congruence modulo relation. Partial ordering relations, n- ary relations.

SEC-2: Graph Theory Credits 02

SEC2T: Graph Theory

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Unit 1
Definition, examples and basic properties of graphs, pseudo graphs, complete graphs, bipartite graphs isomorphism of graphs.

Unit 2
Eulerian circuits, Eulerian graph, semi-Eulerian graph, theorems, Hamiltonian cycles,theorems Representation of a graph by matrix, the adjacency matrix, incidence matrix, weighted graph,

Unit 3
Travelling salesman's problem, shortest path, Tree and their properties, spanning tree, Dijkstra's algorithm, Warshall algorithm.

Reference Books

Or

SEC-2: Computer Graphics **Credits 02**

SEC2T: Computer Graphics

Unit 1
Development of computer Graphics: Raster Scan and Random Scan graphics storages, displays processors and character generators, colour display techniques, interactive input/output devices.

Unit 2
Points, lines and curves: Scan conversion, line-drawing algorithms, circle and ellipse generation, conic-section generation, polygon filling anti-aliasing.

Unit 3
Two-dimensional viewing: Coordinate systems, linear transformations, line and polygon clipping algorithms.

Reference Books

OR

SEC-2: Operating System: Linux **Credits 02**

SEC2T: Operating System: Linux

Unit 1

Linux – The operating system: Linux history, Linux features, Linux distributions, Linux's relationship to Unix, overview of Linux architecture, installation, start up scripts, system processes (an overview), Linux security.

Unit 2

The Ext2 and Ext3 file systems: General characteristics of the Ext3 file system, file permissions. User management: types of users, the powers of root, managing users (adding and deleting): using the command line and GUI tools.

Unit 3

Resource management in Linux: file and directory management, system calls for files process Management, signals, IPC: Pipes, FIFOs, System V IPC, message queues, system calls for processes, memory management, library and system calls for memory.

Generic Elective (GE)

[Interdisciplinary for other Department]

GE-1: Calculus, Geometry & Differential Equation **Credits 06**

GE1T: Calculus, Geometry & Differential Equation

Unit 1

Hyperbolic functions, higher order derivatives, Leibnitz rule and its applications to problems of type $e^{ax+b}\sin x$, $e^{ax+b}\cos x$, $(ax+b)^n\sin x$, $(ax+b)^n\cos x$, concavity and inflection points, envelopes, asymptotes, curve tracing in cartesian coordinates, tracing in polar coordinates of standard curves, L'Hospital's rule, applications in business, economics and life sciences.

Unit 2

Reduction formulae, derivations and illustrations of reduction formulae of the type $\int \sin nx\, dx$, $\int \cos nx\, dx$, $\int \tan nx\, dx$, $\int \sec nx\, dx$, $\int (\log x)^n\, dx$, $\int \sin^n x \sin^m x\, dx$, parametric equations, parameterizing a curve, arc length of a curve, arc length of parametric curves, area under a curve, area and volume of surface of revolution, techniques of sketching conics.

Unit 3

Reflection properties of conics, rotation of axes and second degree equations, classification of conics using the discriminant, polar equations of conics.
Spheres. Cylindrical surfaces. Central conicoids, paraboloids, plane sections of conicoids, generating lines, classification of quadrics, illustrations of graphing standard quadric surfaces like cone, ellipsoid.

Unit 4

Differential equations and mathematical models. General, particular, explicit, implicit and singular solutions of a differential equation. Exact differential equations and integrating factors, separable equations and equations reducible to this form, linear equation and Bernoulli equations, special integrating factors and transformations.

Graphical Demonstration (Teaching Aid)

1. Plotting of graphs of function e^{ax+b}, $\log(ax + b)$, $1/(ax + b)$, $\sin(ax + b)$, $\cos(ax + b)$, $|ax + b|$ and to illustrate the effect of a and b on the graph.
2. Plotting the graphs of polynomial of degree 4 and 5, the derivative graph, the second derivative graph and comparing them.
3. Sketching parametric curves (Eg. trochoid, cycloid, epicycloids, hypocycloid).
4. Obtaining surface of revolution of curves.
5. Tracing of conics in cartesian coordinates/ polar coordinates.
6. Sketching ellipsoid, hyperboloid of one and two sheets, elliptic cone, elliptic, paraboloid, and hyperbolic paraboloid using cartesian coordinates.

GE-2 : Algebra Credits 06

GE2T : Algebra

Unit 1

Polar representation of complex numbers, nth roots of unity, De Moivre's theorem for rational indices and its applications.

Theory of equations: Relation between roots and coefficients, transformation of equation, Descartes rule of signs, cubic and biquadratic equation.

Inequality: The inequality involving AM≥ GM≥ HM, Cauchy-Schwartz inequality.

Unit 2

Equivalence relations. Functions, composition of functions, Invertible functions, one to one correspondence and cardinality of a set. Well-ordering property of positive integers, division algorithm, divisibility and Euclidean algorithm. Congruence relation between integers. Principles of Mathematical induction, statement of Fundamental Theorem of Arithmetic.

Unit 3

Systems of linear equations, row reduction and echelon forms, vector equations, the matrix equation Ax=b, solution sets of linear systems, applications of linear systems, linear independence.

Unit 4

Introduction to linear transformations, matrix of a linear transformation, inverse of a matrix, characterizations of invertible matrices. Subspaces of R^n, dimension of subspaces of R^n, rank of a matrix, Eigen values, eigen vectors and characteristic equation of a matrix. Cayley-Hamilton theorem and its use in finding the inverse of a matrix.

GE-3: Differential Equations &Vector Calculus Credits 06

GE3T: Differential Equations &Vector Calculus

Differential Equations

Unit 1

Lipschitz condition and Picard's Theorem (Statement only). General solution of homogeneous equation of second order, principle of super position for homogeneous equation, Wronskian: its properties and applications, Linear homogeneous and non-homogeneous equations of higher order with constant coefficients, Euler's equation, method of undetermined coefficients, method of variation of parameters.

Unit 2

Systems of linear differential equations, types of linear systems, differential operators, an operator method for linear systems with constant coefficients,
Basic Theory of linear systems in normal form, homogeneous linear systems with constant coefficients: Two Equations in two unknown functions.

Unit 3

Equilibrium points, Interpretation of the phase plane
Power series solution of a differential equation about an ordinary point, solution about a regular singular point.

Unit 4

Triple product, introduction to vector functions, operations with vector-valued functions, limits and continuity of vector functions, differentiation and integration of vector functions.

Unit 5

Graphical demonstration (Teaching aid)

1. Plotting of family of curves which are solutions of second order differential equation.
2. Plotting of family of curves which are solutions of third order differential equation.

Or

GE-3: Group Theory 1 Credits 06

GE3T: Group Theory 1

Group Theory 1 **Credits 06**

Unit 1

Symmetries of a square, dihedral groups, definition and examples of groups including permutation groups and quaternion groups (through matrices), elementary properties of groups.

Unit 2

Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups.

Unit 3

Properties of cyclic groups, classification of subgroups of cyclic groups. Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem.

Unit 4

External direct product of a finite number of groups, normal subgroups, factor groups, Cauchy's theorem for finite abelian groups.

Unit 5

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

Group homomorphisms, properties of homomorphisms, Cayley's theorem, properties of isomorphisms. First, Second and Third isomorphism theorems.

Or

GE-3: Theory of Real Functions & Introduction to Metric Space

Credits 06

GE3T: Theory of Real Functions & Introduction to Metric Space

Theory of Real Functions & Introduction to Metric Space 6 Credits

Unit 1

Limits of functions (ε - δ approach), sequential criterion for limits, divergence criteria. Limit theorems, one sided limits. Infinite limits and limits at infinity. Continuous functions, sequential criterion for continuity and discontinuity. Algebra of continuous functions. Continuous functions on an interval, intermediate value theorem, location of roots theorem, preservation of intervals theorem. Uniform continuity, non-uniform continuity criteria, uniform continuity theorem.

Unit 2

Differentiability of a function at a point and in an interval, Caratheodory's theorem, algebra of differentiable functions. Relative extrema, interior extremum theorem. Rolle's theorem. Mean value theorem, intermediate value property of derivatives, Darboux's theorem. Applications of mean value theorem to inequalities and approximation of polynomials.

Unit 3

Cauchy's mean value theorem. Taylor's theorem with Lagrange's form of remainder, Taylor's theorem with Cauchy's form of remainder, application of Taylor's theorem to convex functions, relative extrema. Taylor's series and Maclaurin's series expansions of exponential and trigonometric functions, ln (1 + x), 1/(ax + b) and$(x+1)^n$. Application of Taylor's theorem to inequalities.

Unit 4

Metric spaces: Defiition and examples. open and closed balls, neighbourhood, open set, interior of a set. Limit point of a set, closed set, diameter of a set, subspaces, dense sets, separable spaces.

GE-4: Numerical Methods — Credits 06

GE4T: Numerical Methods — Credits 04

Unit 1

Algorithms. Convergence. Errors: relative, absolute. Round off. Truncation.

Unit 2

Transcendental and polynomial equations: Bisection method, Newton's method, secant method, Regula-falsi method, fixed point iteration, Newton-Raphson method. Rate of convergence of these methods.

Unit 3

System of linear algebraic equations: Gaussian elimination and Gauss Jordan methods. Gauss Jacobi method, Gauss Seidel method and their convergence analysis. LU decomposition

Unit 4

Interpolation: Lagrange and Newton's methods. Error bounds. Finite difference operators. Gregory forward and backward difference interpolation.
Numerical differentiation: Methods based on interpolations, methods based on finite differences.

Unit 5

Numerical Integration: Newton Cotes formula, Trapezoidal rule, Simpson's $1/3^{rd}$ rule, Simpsons 3/8th rule, Weddle's rule, Boole's Rule. midpoint rule, Composite trapezoidal rule, composite Simpson's $1/3^{rd}$ rule, Gauss quadrature formula.
The algebraic eigen value problem: Power method.
Approximation: Least square polynomial approximation.

GE4P: Numerical Methods Lab **Credits 02**

Numerical Methods Lab **02 Credits**

List of practical (using any software)

1. Calculate the sum 1/1 + 1/2 + 1/3 + 1/4 + ----------+ 1/ N.
2. Enter 100 integers into an array and sort them in an ascending order.
3. Solution of transcendental and algebraic equations by
   v) Bisection method
   vi) Newton Raphson method.
   vii) Secant method.
   viii) Regula Falsi method.
4. Solution of system of linear equations
   v) LU decomposition method
   vi) Gaussian elimination method
   vii) Gauss-Jacobi method
   viii) Gauss-Seidel method
5. Interpolation
   iii) Lagrange Interpolation
   iv) Newton Interpolation
6. Numerical Integration
   v) Trapezoidal Rule
   vi) Simpson's one third rule
   vii) Weddle's Rule
   viii) Gauss Quadrature
7. Method of finding Eigenvalue by Power method
8. Fitting a Polynomial Function

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

9. Solution of ordinary differential equations
   iv) Euler method
   v) Modified Euler method
   vi) Runge Kutta method

Note: For any of the CAS (Computer aided software) Data types-simple data types, floating data types, character data types, arithmetic operators and operator precedence, variables and constant declarations, expressions, input/output, relational operators, logical operators and logical expressions, control statements and loop statements, Arrays should be introduced to the students.

OR

GE-4: Partial Differential Equations & Applications Credits 06

[This course must be offered after completion the course **Differential equation & Vector Calculus**]

GE4T: Partial Differential Equations & Applications

Unit 1

Partial differential equations – Basic concepts and definitions. Mathematical problems. First- order equations: classification, construction and geometrical interpretation. Method of characteristics for obtaining general solution of quasi linear equations. Canonical forms of first-order linear equations. Method of separation of variables for solving first order partial differential equations.

Unit 2

Derivation of heat equation, wave equation and Laplace equation. Classification of second order linear equations as hyperbolic, parabolic or elliptic. Reduction of second order linear equations to canonical forms.

Unit 3

The Cauchy problem, Cauchy-Kowalewskaya theorem, Cauchy problem of an infinite string. Initial boundary value problems. Semi-infinite string with a fixed end, semi-infinite string with a free end. Equations with non-homogeneous boundary conditions. Non-homogeneous wave equation. Method of separation of variables, solving the vibrating string problem. Solving the heat conduction problem

Unit 4

Central force. Constrained motion, varying mass, tangent and normal components of acceleration, modelling ballistics and planetary motion, Kepler's second law.

Unit 5

Graphical Representation (Teaching aid)

1. Solution of Cauchy problem for first order PDE.
2. Finding the characteristics for the first order PDE.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:21:15; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Mathematics_Hons.pdf

3. Plot the integral surfaces of a given first order PDE with initial data.
4. Solution of wave equation $\frac{\partial^2 u}{\partial t^2} - c^2 \frac{\partial^2 u}{\partial x^2} = 0$ for the following associated conditions:
   (a) $u(x,0) = \phi(x),\ u_t(x,0) = \psi(x),\ x \in R,\ t > 0.$
   (b) $u(x,0) = \phi(x),\ u_t(x,0) = \psi(x), u(0,t) = 0\ x \in (0,\infty),\ t > 0$
5. Solution of wave equation $\frac{\partial^2 u}{\partial t^2} - c^2 \frac{\partial^2 u}{\partial x^2} = 0$ for the following associated conditions:
   (a) $u(x,0) = \phi(x),\ u\ (o,t) = a, u\ (l,t) = b,\ 0 < x < l, t > 0.$
   $u(x,0) = \phi(x),\ x \in R,\ 0 < t < T.$

OR

GE-4: Ring Theory and Linear Algebra I Credits 06

GE4T: Ring Theory and Linear Algebra I

Unit 1

Definition and examples of rings, properties of rings, subrings, integral domains and fields, characteristic of a ring. Ideal, ideal generated by a subset of a ring, factor rings, operations on ideals, prime and maximal ideals.

Unit 2

Ring homomorphisms, properties of ring homomorphisms. Isomorphism theorems I, II and III, field of quotients.

Unit 3

Vector spaces, subspaces, algebra of subspaces, quotient spaces, linear combination of vectors, linear span, linear independence, basis and dimension, dimension of subspaces.

Unit 4

Linear transformations, null space, range, rank and nullity of a linear transformation, matrix representation of a linear transformation, algebra of linear transformations. Isomorphisms. Isomorphism theorems, invertibility and isomorphisms, change of coordinate matrix.

OR

GE-4: Multivariate Calculus Credits 06

GE4T: Multivariate Calculus

Multivariate Calculus **6 Credits**

Unit 1

Functions of several variables, limit and continuity of functions of two or more variables Partial differentiation, total differentiability and differentiability, sufficient condition for differentiability. Chain rule for one and two independent parameters, directional derivatives, the gradient, maximal and normal property of the gradient, tangent planes, Extrema of functions of two variables, method of Lagrange multipliers, constrained optimization problems

Unit 2

Double integration over rectangular region, double integration over non-rectangular region, Double integrals in polar co-ordinates, Triple integrals, triple integral over a parallelepiped and solid regions. Volume by triple integrals, cylindrical and spherical co-ordinates.Change of variables in double integrals and triple integrals.

Unit 3

Definition of vector field, divergence and curl.
Line integrals, applications of line integrals: mass and work. Fundamental theorem for line integrals, conservative vector fields, independence of path.

Unit 4

Green's theorem, surface integrals, integrals over parametrically defined surfaces. Stoke's theorem, The Divergence theorem.

List of Core and Elective Courses

Core Courses (CC)

DSC-1A: Differential Calculus
DSC-1B: Differential Equations
DSC-1C: Real Analysis
DSC-1D: Algebra

Discipline Specific Electives (DSE)

DSE-1: Complex Analysis
Or
DSE-1: Matrices
Or
DSE-1: Linear Algebra
Or
DSE-1: Vector Calculus and Analytical Geometry

DSE-2: Mechanics
Or
DSE-2: Linear Programming
Or
DSE-2: Numerical Methods
Or
DSE-2: Integer Programming and Theory of Games

Skill Enhancement Course (SEC)

SEC-1: Theory of Equation
Or
SEC-1: Logic and Sets
Or
SEC-1: Boolean Algebra

SEC-2: Graph Theory
Or
SEC-2: Integral Calculus
Or
SEC-2: Mathematical Finance

SEC-2: Number Theory
Or
SEC-3: Bio-Mathematics
Or
SEC-3: Mathematical Modeling

SEC-4: Probability and Statistics
Or
SEC-4: Understanding Probability and Statistics through practical
Or
SEC-4: Forecasting
Or
SEC-4: Portfolio Optimization

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

Core Courses (CC)

DSC-1A(CC-1): Differential Calculus **Credit : 06**

DSC-1AT(CC-1): Differential Calculus

Course Contents:

Limit and Continuity (ε and δ definition), Types of discontinuities, Differentiability of functions, Successive differentiation, Leibnitz's theorem, Partial differentiation, Euler's theorem on homogeneous functions. Tangents and normals, Curvature, Asymptotes, Singular points, Tracing of curves. Parametric representation of curves and tracing of parametric curves, Polar coordinates and tracing of curves in polar coordinates. Rolle's theorem, Mean Value theorems, Lagrange and cauchy theorems. Taylor's theorem with Lagrange's and Cauchy's forms of remainder, Power series and its convergences. Taylor's series, Maclaurin's series of sin x, cos x, ex, log(l+x), (l+x)m, Maxima and Minima, Indeterminate forms.

Suggested Readings:

- H. Anton, I. Birens and S. Davis, *Calculus*, John Wiley and Sons, Inc., 2002.
- G.B. Thomas and R.L. Finney, *Calculus*, Pearson Education, 2007.

DSC-1B(CC-2): Differential Equations **Credit : 06**

DSC1BT(CC-2) : Differential Equations

Course Contents:

First order exact differential equations. Integrating factors, rules to find an integrating factor. First order higher degree equations solvable for x, y, p. Methods for solving higher-order differential equations. Basic theory of linear differential equations, Wronskian, and its properties. Solving a differential equation by reducing its order. Linear homogenous equations with constant coefficients, Linear non-homogenous equations, The method of variation of parameters, The Cauchy-Euler equation, Simultaneous differential equations, Total differential equations. Order and degree of partial differential equations, Concept of linear and non-linear partial differential equations, Formation of first order partial differential equations, Linear partial differential equation of first order, Lagrange's method, Charpit's method. Classification of second order partial differential equations into elliptic, parabolic and hyperbolic through illustrations only.

Suggested Readings:

- Shepley L. Ross, *Differential Equations*, 3rd Ed., John Wiley and Sons, 1984.
- Sneddon, *Elements of Partial Differential Equations*, McGraw-Hill, International Edition, 1967.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

DSC-1C(CC-3): Real Analysis **Credit : 06**

DSC1CT(CC-3): Real Analysis

Course Contents:

Finite and infinite sets, examples of countable and uncountable sets. Real line, bounded sets, suprema and infima, completeness property of R, Archimedean property of R, intervals. Concept of cluster points and statement of Bolzano-Weierstrass theorem.Real Sequence, Bounded sequence, Cauchy convergence criterion for sequences. Cauchy's theorem on limits, order preservation and squeeze theorem, monotone sequences and their convergence (monotone convergence theorem without proof). Infinite series. Cauchy convergence criterion for series, positive term series, geometric series, comparison test, convergence of p-series, Root test, Ratio test, alternating series, Leibnitz's test (Tests of Convergence without proof). Definition and examples of absolute and conditional Convergence Series. Sequences and series of functions, Pointwise and uniform convergence. μ-test, M-test, Statements of the results about uniform convergence and integrability and differentiability of functions, Power series and radius of convergence.

Suggested Readings:

- T.M. Apostol, *Calculus* (Vol. I), John Wiley and Sons (Asia) P. Ltd., 2002.
- R.G. Bartle and D. R Sherbert, *Introduction to Real Analysis*, John Wiley and Sons (Asia) P. Ltd., 2000.
- E. Fischer, *Intermediate Real Analysis*, Springer Verlag, 1983.
- K.A. Ross,(2003). *Elementary Analysis - The Theory of Calculus Series*- Undergraduate Texts in Mathematics, Springer Verlag.
- S.K.Mapa Introduction to real analysis, Sarat Book House.

DSC-1D (CC-4): Algebra **Credits 06**

DSC1DT(CC-4): Algebra

Course Contents:

Definition and examples of groups, examples of abelian and non-abelian groups, the group Zn of integers under addition modulo n and the group U(n) of units under multiplication modulo n. Cyclic groups from number systems, complex roots of unity, circle group, the general linear group GLn (R), groups of symmetries of (i) an isosceles triangle, (ii) an equilateral triangle, (iii) a rectangle, and (iv) a square, the permutation group Sym (n), Group of quaternions. Subgroups, cyclic subgroups, the concept of a subgroup generated by a subset and the commutator subgroup of group, examples of subgroups including the center of a group. Cosets, Index of subgroup, Lagrange's theorem, order of an element, Normal subgroups: their definition, examples, and characterizations, Quotient groups.Definition and examples of rings, examples of commutative and non-commutative rings: rings from number systems, Zn the ring of integers modulo n, ring of real quaternions, rings of matrices, polynomial rings, and rings of continuous functions. Subrings and ideals, Integral domains and fields, examples of fields: Zp, Q, R, and C. Field of rational functions.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

Suggested Readings:

- John B. Fraleigh, *A First Course in Abstract Algebra*, 7th Ed., Pearson, 2002**.**
- M. Artin, *Abstract Algebra*, 2nd Ed., Pearson, 2011.
- Joseph A Gallian, *Contemporary Abstract Algebra*, Narosa, 1999.
- George E Andrews, *Number Theory*, Hindustan Publishing Corporation, 1984.
- S.K.Mapa. Higher Algebra : Abstract and Linear, Sarat Book House, Calcutta.

Discipline Specific Electives (DSE)

DSE-1 : Complex Analysis **Credit : 06**

DSE1T : Complex Analysis

Course Contents:

Limits, Limits involving the point at infinity, continuity. Properties of complex numbers, regions in the complex plane, functions of complex variable, mappings. Derivatives, differentiation formulas, Cauchy-Riemann equations, sufficient conditions for differentiability. Analytic functions, examples of analytic functions, exponential function, Logarithmic function, trigonometric function, derivatives of functions, definite integrals of functions. Contours, Contour integrals and its examples, upper bounds for moduli of contour integrals. Cauchy - Goursat theorem, Cauchy integral formula. Liouville's theorem and the fundamental theorem of algebra. Convergence of sequences and series, Taylor series and its examples. Laurent series and its examples, absolute and uniform convergence of power series. Singular points of all kind, residue, Cauchy residue theorem and example.

Suggested Readings:

- James Ward Brown and Ruel V. Churchill, *Complex Variables and Applications*, 8th Ed., McGraw – Hill International Edition, 2009.
- Joseph Bak and Donald J. Newman, *Complex analysis*, 2nd Ed., Undergraduate Texts in Mathematics, Springer-Verlag New York, Inc., New York, 1997.

Or

DSE - 1: Matrices **Credit : 06**

DSE1T: Matrices

Course Contents:

R, R2, R3 as vector spaces over R. Standard basis for each of them. Concept of Linear Independence and examples of different bases. Subspaces of R2, R3. Translation, Dilation, Rotation, Reflection in a point, line and plane. Matrix form of basic geometric transformations. Interpretation of eigen values and eigenvectors for such transformations and eigen spaces as invariant subspaces. Matrices in diagonal form. Reduction to diagonal form upto matrices of order 3. Computation of matrix inverses using elementary row operations. Rank of matrix. Solutions of a system of linear equations using matrices.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

Illustrative examples of above concepts from Geometry, Physics, Chemistry, Combinatorics and Statistics.

Suggested Readings:

- A.I. Kostrikin, *Introduction to Algebra*, Springer Verlag, 1984.
- S. H. Friedberg, A. L. Insel and L.E. Spence, *Linear Algebra*, Prentice Hall of India Pvt. Ltd., New Delhi, 2004.
- Richard Bronson, Theory and Problems of Matrix Operations, Tata McGraw Hill, 1989.
- M. Pal (2013). Higher Algebra, PHI Learning Pvt. Ltd.

Or

DSE-1 : Linear Algebra **Credit : 06**

DSE1T: Linear Algebra

Course Contents:

Vector spaces, subspaces, algebra of subspaces, quotient spaces, linear combination of vectors, linear span, linear independence, basis and dimension, dimension of subspaces. Linear transformations, null space, range, rank and nullity of a linear transformation, matrix representation of a linear transformation, algebra of linear transformations. Isomorphisms, Isomorphism theorems, invertibility and isomorphisms, change of coordinate matrix.

Suggested Readings:

- Stephen H. Friedberg, Arnold J. Insel, Lawrence E. Spence, *Linear Algebra,* 4th Ed., Prentice- Hall of India Pvt. Ltd., New Delhi, 2004.
- David C. Lay, *Linear Algebra and its Applications,* 3rd Ed., Pearson Education Asia, Indian Reprint, 2007.
- S. Lang, *Introduction to Linear Algebra*, 2nd Ed., Springer, 2005.
- Gilbert Strang, *Linear Algebra and its Applications*, Thomson, 2007.
- M.Pal. Higher Algebra. PHI Pvt. Ltd. 2013.

Or

DSE - 1: Vector Calculus and Analytical Geometry **Credit : 06**

DSE1T: Vector Calculus and Analytical Geometry

Course Contents:

Algebra of vectors, Differentiation and partial differentiation of a vector function. Derivative of sum, dot product and cross product of two vectors. Gradient, divergence and curl. Techniques for sketching parabola, ellipse and hyperbola. Reflection properties of parabola, ellipse and hyperbola. Classification of quadratic equations representing lines, parabola, ellipse and hyperbola. Spheres, Cylindrical surfaces. Illustrations of graphing standard quadric surfaces like cone, ellipsoid.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

Suggested Readings:

- G.B. Thomas and R.L. Finney, *Calculus*, 9th Ed., Pearson Education, Delhi, 2005.
- H. Anton, I. Bivens and S. Davis, *Calculus*, John Wiley and Sons (Asia) P. Ltd. 2002.
- P.C. Matthew's, *Vector Calculus*, Springer Verlag London Limited, 1998.
- S.L. Loney, *The Elements of Coordinate Geometry*, McMillan and Company, London.
- R.Khan. Analytical Geometry and Vector Algebra, New Central Book Agency.
- R.J.T. Bill, *Elementary Treatise on Coordinate Geometry of Three Dimensions*, McMillan India Ltd., 1994.

DSE-2 : Mechanics **Credit : 6**

DSE2T: Mechanics

Course Contents:

Conditions of equilibrium of a particle and of coplanar forces acting on a rigid Body, Laws of friction, Problems of equilibrium under forces including friction, Centre of gravity, Work and potential energy. Velocity and acceleration of a particle along a curve: radial and transverse components (plane curve), tangential and normal components (space curve), Newton's Laws of motion, Simple harmonic motion, Simple Pendulum, Projectile Motion.

Suggested Readings:

- A.S. Ramsay, *Statics*, CBS Publishers and Distributors (Indian Reprint), 1998.
- A.P. Roberts, *Statics and Dynamics with Background in Mathematics*, Cambridge University Press, 2003.
- S.L.Loney. An elementary treaties on the dynamics of a particle and rigid body, New Age International Pvt. Ltd.

Or

DSE-2: Linear Programming **Credit: 06**

DSE2T: Linear Programming

Course Contents:

Linear Programming: Definition and formation Problems, Graphical Approach for solving some Linear Programming problems. Convex Sets, Supporting and Separating Hyperplanes. Theory of simplex method, optimality and unboundedness, the simplex algorithm, simplex method in tableau format, introduction to artificial variables, two-phase method, Big-M method and their comparison. Duality, formulation of the dual problem, primal- dual relationships, economic interpretation of the dual.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

Suggested Readings:

- Mokhtar S. Bazaraa, John J. Jarvis and Hanif D. Sherali, *Linear programming and Network Flows,* 2nd Ed., John Wiley and Sons, India, 2004.
- F.S. Hillier and G.J. Lieberman, *Introduction to Operations Research,* 8th Ed., Tata McGrawHill, Singapore, 2004.
- Hamdy A. Taha, *Operations Research, An Introduction,* 8th Ed., Prentice-Hall India, 2006.

Or

DSE-2 : Numerical Methods **Credit : 06**

DSE2T: Numerical Methods

Course Contents:

Algorithms, Convergence, Bisection method, False position method, fixed point iteration method, Newton's method, Secant method, LU decomposition, Gauss-Jacobi, Gauss-Siedel and SOR iterative methods. Lagrange and Newton interpolation: linear and higher order, finite difference operators. Numerical differentiation: forward difference, backward difference and central Difference. Integration: trapezoidal rule, Simpson's rule.
Solving ordinary differential equations : Euler's method. Runge – Kutta method of second and fourth order, Prediction – correlation methods.

Suggested Readings:

- B. Bradie, *A Friendly Introduction to Numerical Analysis*, Pearson Education, India, 2007.
- M.K. Jain, S.R.K. Iyengar and R.K. Jain, *Numerical Methods for Scientific and Engineering Computation*, 5th Ed., New age International Publisher, India, 2007.
- M. Pal. Numerical Analysis for Scientists and Engineers: Theory and C Programming, Narosa, 2007.

Or

DSE-2: Integer Programming and Theory of Games **Credit : 06**

DSE2T: Integer Programming and Theory of Games

Course Contents:

Integer Linear Programming. Modeling using pure and mixed integer programming, Branch and Bound Technique, Gomory's Cutting Plane Algorithm. Game theory: formulation of two person zero sum games, solving two person zero sum games, games with mixed strategies, graphical solution procedure, linear programming solution of games. Methods of dominance.

Suggested Readings:

- Mokhtar S. Bazaraa, John J. Jarvis and Hanif D. Sherali, *Linear Programming and Network Flows,* 2nd Ed., John Wiley and Sons, India, 2004.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

- F. S. Hillier and G. J. Lieberman, *Introduction to Operations Research*, 9th Ed., Tata McGraw Hill, Singapore, 2009.
- Hamdy A. Taha, *Operations Research, An Introduction*, 8th Ed., Prentice-Hall India, 2006.

Skill Enhancement Course (SEC)

SEC-1: Theory of Equations **Credit: 02**

SEC1T: Theory of Equations

Course Contents:

General properties of polynomials, Graphical representation of polynomials, maximum and minimum values of a polynomial, General properties of equations, Descarte's rule of signs positive and negative rule, Relation between the roots and the coefficients of equations. Symmetric functions, Applications of symmetric function of the roots, Transformation of equations. Solutions of reciprocal and binomial equations. Algebraic solutions of the cubic and biquadratic equations. Properties of the derived functions.

Suggested Readings:

- W.S. Burnside and A.W. Panton, *The Theory of Equations*, Dublin University Press, 1954.
- C. C. MacDuffee, *Theory of Equations*, John Wiley & Sons Inc., 1954.

Or

SEC-1: Logic and Sets **Credit: 02**

SEC1T: Logic and Sets

Course Contents:

Introduction, propositions, truth table, negation, conjunction and disjunction. Implications, biconditional propositions, converse, single words and inverse propositions and precedence of logical operators. Propositional equivalence: Logical equivalences. Predicates and quantifiers: Introduction, Quantifiers, Binding variables and Negations. Sets, subsets, Set operations, the laws of set theory and Venn diagrams. Examples of finite and infinite sets. Finite sets and counting principle. Empty set, properties of empty set. Cartesian product. Partition of sets. Power set of a set. Difference and Symmetric difference of two sets. Set identities, Generalized union and intersections. Relation: Product set, Composition of relations, Types of relations, Partitions, Equivalence Relations with example of congruence modulo relation.

Suggested Readings:

- R.P. Grimaldi, *Discrete Mathematics and Combinatorial Mathematics*, Pearson Education, 1998.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

- P.R. Halmos, *Naive Set Theory*, Springer, 1974.
- E. Kamke, *Theory of Sets*, Dover Publishers, 1950.

Or

SEC-1: Boolean algebra Credit: 02

SEC1T: Boolean algebra

Course Contents:

Definition, examples and basic properties of partially ordered sets, nasse – diagram, maps between ordered sets, duality principle, maximal and minimal elements, lattices as ordered sets, complete lattices, lattices as algebraic structures, sub lattices, products and homo morphisms. Definition, examples and properties of modular and distributive lattices, Boolean algebras, Boolean polynomials, minimal forms of Boolean polynomials, Quinn-McCluskey method, Karnaugh diagrams, switching circuits and applications of switching circuits.

Suggested Readings:

- B A. Davey and H. A. Priestley, *Introduction to Lattices and Order*, Cambridge University Press, Cambridge, 1990.
- Rudolf Lidl and Günter Pilz, *Applied Abstract Algebra*, 2nd Ed., Undergraduate Texts inMathematics, Springer (SIE), Indian reprint, 2004.

SEC-2: Graph Theory Credit: 02

SEC2T: Graph Theory

Course Contents:

Definition, examples and basic properties of graphs, pseudo graphs, complete graphs, bi-partite graphs, isomorphism of graphs, paths and circuits, connected graphs, Eulerian circuits, Hamiltonian cycles, the adjacency matrix, weighted graph, travelling salesman's problem, shortest path, Dijkstra's algorithm, Floyd-Warshall algorithm.

Suggested Readings:

- Edgar G. Goodaire and Michael M. Parmenter, *Discrete Mathematics with Graph Theory*2nd Ed., Pearson Education (Singapore) P. Ltd., Indian Reprint, 2003.
- Narsingh Deo, Graph Theory with applications to Engineering and computer Science, PHI.
- D.B.West. Introduction to graph theory, PHI,2001.

Or

SEC -2: Integral Calculus Credit: 02

SEC2T: Integral Calculus

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

Course Contents:

Integration by Partial fractions, integration of rational and irrational functions. Properties of definite integrals. Reduction formulae for integrals of rational, trigonometric, exponential and logarithmic functions and of their combinations. Evaluation of areas and lengths of curves in the plane, valuation of volumes and surfaces of solids of revolution. Double and Triple integrals.

Suggested Readings:

- G.B. Thomas and R.L. Finney, *Calculus*, 9th Ed., Pearson Education, Delhi, 2005.
- H. Anton, I. Bivens and S. Davis, *Calculus*, John Wiley and Sons (Asia) P. Ltd. 2002.

Or

SEC-2 : Mathematical Finance **Credit : 02**

SEC2T : Mathematical Finance

Course Contents:

Basic principles: Comparison, arbitrage and risk aversion, Interest (simple and compound, discrete and continuous), time value of money, inflation, net present value, internal rate of return (calculation by bisection and Newton-Raphson methods), comparison of NPV and IRR. Bonds, bond prices and yields. floating-rate bonds, immunization. Asset return, short selling, portfolio return, (brief introduction to expectation, variance, covariance and correlation), random returns, portfolio mean return and variance, diversification, portfolio diagram, feasible set, Markowitz model (review of Lagrange multipliers for 1 and 2 constraints).

Suggested Readings:

- David G. Luenberger, *Investment Science*, Oxford University Press, Delhi, 1998.
- John C. Hull, Options, *Futures and Other Derivatives*, 6th Ed., Prentice-Hall India, Indian reprint, 2006.
- Sheldon Ross, *An Elementary Introduction to Mathematical Finance*, 2nd Ed., Cambridge University Press, USA, 2003.

SEC-3: Number Theory **Credit :02**

SEC3T: Number Theory

Course Contents:

Division algorithm, Lame's theorem, linear Diophantine equation, fundamental theorem of arithmetic, prime counting function, statement of prime number theorem. Goldbach conjecture, binary and decimal representation of integers, linear congruences, complete set of residues. Number theoretic functions, sum and number of divisors, totally multiplicative

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

functions, definition and properties of the Dirichlet product, the Möbius inversion formula, the greatest integer function, Euler's phi-function.

Suggested Readings:

- David M. Burton, *Elementary Number Theory*, 6th Ed., Tata McGraw-Hill Edition, Indian reprint, 2007.
- Richard E. Klima, Neil Sigmon, Ernest Stitzinger, *Applications of Abstract Algebra with Maple*, CRC Press, Boca Raton, 2000.
- Neville Robinns, *Beginning Number Theory*, 2nd Ed., Narosa Publishing House Pvt. Limited, Delhi, 2007.

Or

SEC-3: Bio-Mathematics **Credit: 02**

SEC3T: Bio-Mathematics

Course Contents:

Mathematical Biology and the modeling process: an overview. Continuous models: Malthus model, logistic growth, Allee effect, Gompertz growth, Michaelis-Menten Kinetics, Holling type growth, Bacterial growth in a Chemostat, Harvesting a single natural population, Prey predator systems and Lotka-Volterra equations, Populations in competitions, Epidemic Models (SI, SIR, SIRS, SIC), Activator-Inhibitor system, Insect Outbreak Model: Spruce Budworm, Numerical solution of the models and its graphical representation. Qualitative analysis of continuous models: Steady state solutions, stability and linearization, multiple species communities and Routh-Hurwitz Criteria. Spatial Models: One species model with diffusion. Discrete Models: Overview of difference equations, steady state solution and linear stability analysis, Introduction to Discrete Models, Linear Models, Growth models, Decay models. Case Studies: Optimal Exploitation models, Models in Genetics.

Suggested Readings:

- L.E. Keshet, *Mathematical Models in Biology*, SIAM, 1988.
- J.D. Murray, *Mathematical Biology*, Springer, 1993.
- Y.C. Fung, *Biomechanics*, Springer-Verlag, 1990.

Or

SEC-3: Mathematical Modeling **Credits 02**

SEC3T: Mathematical Modeling

Course Contents:

Applications of differential equations: the vibrations of a mass on a spring, mixture problem, free damped motion, forced motion, resonance phenomena, electric circuit

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

problem, mechanics of simultaneous differential equations. Applications to Traffic Flow. Vibrating string, vibrating membrane, conduction of heat in solids, gravitational potential, conservation laws.

Suggested Readings:

- Shepley L. Ross, *Differential Equations*, 3rd Ed., John Wiley and Sons, 1984.
- I. Sneddon, *Elements of Partial Differential Equations*, McGraw-Hill, International Edition,1967.16

SEC-4: Probability and Statistics **Credit : 02**

SEC4T: Probability and Statistics

Course Contents:

Sample space, probability axioms, real random variables (discrete and continuous), cumulative distribution function, probability mass/density functions, mathematical expectation, moments, moment generating function, characteristic function, discrete distributions: uniform, binomial, Poisson, continuous distributions: uniform, normal, exponential. Joint cumulative distribution function and its properties, joint probability density functions, marginal and conditional distributions, expectation of function of two random variables, conditional expectations, independent random variables.

Suggested Readings:

- Robert V. Hogg, Joseph W. McKean and Allen T. Craig, *Introduction to Mathematical Statistics*, Pearson Education, Asia, 2007.
- Irwin Miller and Marylees Miller, John E. Freund, *Mathematical Statistics with Application*,7th Ed., Pearson Education, Asia, 2006.
- Sheldon Ross, *Introduction to Probability Model*, 9th Ed., Academic Press, Indian Reprint,2007.

Or

SEC-4: Understanding Probability and Statistics through Practical **Credit : 02**

SEC4T: Understanding Probability and Statistics through Practical

Course Contents:

Practical/ Lab work to be performed on a computer using Excel.

Practicals should broadly cover the following areas:

a) Fitting of Binomial, Poisson, Negative Binomial, Normal Distributions.
b) Applications of Chi-square, t and F Distributions.
c) Calculation of correlation coefficient, Rank Correlation, etc.
d) Fitting of polynomials and regression curves.
e) Methods of estimation (MLE and method of Moments)

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:22:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Mathematics_General.pdf

f) Selecting a simple random sample using random number tables.

Suggested Readings:

- Robert V. Hogg, Joseph W. McKean and Allen T. Craig, *Introduction to Mathematical Statistics*, Pearson Education, Asia, 2007.
- Irwin Miller and Marylees Miller, John E. Freunds, *Mathematical Statistics with Applications*, 7th Ed., Pearson Education, Asia, 2006.
- Sheldon Ross, *Introduction to Probability Models*, 9th Ed., Academic Press, Indian Reprint, 2007.

Or

SEC-4: Forecasting **Credits 02**

SEC4T: Forecasting

Course Contents:

Introduction to forecasting, Types of forecast, Basic forecasting tools. Time Series and its Components. Linear and Nonlinear Trend, seasonal Variations and Irregular Variations and their Measurements. Moving Averages. Single and Double exponential smoothing.

Suggested Readings:

- John E. Hanke, Dean Wichern and Arthur G. Reitch, *Business Forecasting*, 7th Ed., Pearson, 2008.
- J. Holton, Wilson and Barry Keating, *Business Forecasting Wforecast*, 6th Ed., Tata McGraw Hill, 2009.
- S.C. Gupta and V.K. Kapoor, *Fundamentals of Applied Statistics*, Sultan Chand and Sons, 2009.
- G. Hadley, T.M. Whitin, *Analysis of Inventory Systems*, D.B. Taraporevala and Sons, Published by arrangement with Prentice Hall Inc., 1979.

Or

SEC-4: Portfolio Optimization **Credit: 02**

SEC4T: Portfolio Optimization

Course Contents:

Financial markets. Investment objectives. Measures of return and risk. Types of risks. Portfolio of assets. Expected risk and return of portfolio. Diversification. Mean-variance portfolio optimization- the Markowitz model and the two-fund theorem, risk-free assets and one fund theorem, efficient frontier. Portfolio performance evaluation measures.

Suggested Readings:

- F.K. Reilly, Keith C. Brown, *Investment Analysis and Portfolio Management*, 10th Ed., South-Western Publishers, 2011.
- H.M. Markowitz, *Mean-Variance Analysis in Portfolio Choice and Capital Markets*, Blackwell, New York, 1987.
- D.G. Luenberger, *Investment Science*, 2nd Ed., Oxford University Press, 2013.

List of Core and Electives

Core Courses (CC)

DSC-1A: **Problem Solving using Computers**
DSC-1B: **Database Management Systems**
DSC-1C: **Operating Systems**
DSC-1D: **Computer System Architecture**

Discipline Specific Elective (DSE)

DSE-1: **Programming in Java**
Or
DSE-1: **Discrete Structures**
Or
DSE 1: **Analysis of Algorithm and Data Structures**
Or
DSE 1: **Software Engineering**
Or
DSE 1: **Computer Networks**
Or
DSE 1: **Internet Technologies**

DSE 2: **Data Mining**
Or
DSE 2: **Mobile Applications**
Or
DSE 2: **E-Commerce Technologies**
Or
DSE 2: **Cloud Computing**
Or
DSE 2: **Project Work**

Skill Enhancement Course (SEC)

SEC-1: **MySQL (SQL/PL-SQL)**
Or
SEC-1: **HTML Programming**
SEC-2: **Multimedia Applications**
Or
SEC-2: **PHP Programming**
Or
SEC-2: **Programming with VB/GAMBAS**

SEC-3: **Programming with Matlab**
Or
SEC-3: **Concepts of Software Testing**

SEC-4: **R-Programming**
Or
SEC-4: **Android Programming**
Or
SEC-4: **XML Programming**

Core Courses (CC)

DSC-1A (CC-1): Problem Solving using Computers **Credits 06**

DSC1AT: Problem Solving using Computers **Credits 04**

Course Contents:

Computer Fundamentals: Introduction to Computers: Characteristics of Computers, Uses of computers, Types and generations of Computers. Basic Computer Organization - Units of a computer, CPU, ALU, memory hierarchy, registers, I/O devices.

Planning the Computer Program: Concept of problem solving, Problem definition, Program design, Debugging, Types of errors in programming, Documentation.

Techniques of Problem Solving: Flowcharting, decision table, algorithms, Structured programming concepts, Programming methodologies viz. top-down and bottom-up programming.

Overview of Programming: Structure of a Python Program, Elements of Python .

Introduction to Python: Python Interpreter, Using Python as calculator, Python shell, Indentation. Atoms, Identifiers and keywords, Literals, Strings, Operators (Arithmetic operator, Relational operator, Logical or Boolean operator, Assignment, Operator, Ternary operator, Bit wise operator, Increment or Decrement operator).

Creating Python Programs: Input and Output Statements, Control statements (Looping- while Loop, for Loop , Loop Control, Conditional Statement- if...else, Difference between break, continue and pass).

Structures: Numbers, Strings, Lists, Tuples, Dictionary, Date & Time, Modules, Defining Functions, Exit function, default arguments.

Introduction to Advanced Python: Objects and Classes, Inheritance, Regular Expressions, Event Driven Programming, GUI Programming.

Suggested Readings:

1. P. K. Sinha & Priti Sinha , “Computer Fundamentals”, BPB Publications.
2. Dr. Anita Goel, Computer Fundamentals, Pearson Education.
3. T. Budd, Exploring Python, TMH, 1st Ed,.
4. Python Tutorial/Documentation www.python.or 2010
5. Allen Downey, Jeffrey Elkner, Chris Meyers , How to think like a computer scientist : learning with Python , Freely available online.
6. http://docs.python.org/3/tutorial/index.html
7. http://interactivepython.org/courselib/static/pythonds

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

8. http://www.ibiblio.org/g2swap/byteofpython/read/

DSC1AP: Software Lab using Python(Lab) **Credits 02**

Practical

Section: A (Simple programs)

1. Write a menu driven program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice.
2. WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of the three subjects are to be input by the user. Assign grades according to the following criteria :

Grade A: Percentage >=80
Grade B: Percentage>=70 and <80
Grade C: Percentage>=60 and <70
Grade D: Percentage>=40 and <60
Grade E: Percentage<40

3. Write a menu-driven program, using user-defined functions to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.
4. WAP to display the first n terms of Fibonacci series.
5. WAP to find factorial of the given number.
6. WAP to find sum of the following series for n terms: 1 – 2/2! + 3/3! - - - - - n/n!
7. WAP to calculate the sum and product of two compatible matrices.

Section: B (Visual Python):

All the programs should be written using user defined functions, wherever possible.

1. Write a menu-driven program to create mathematical 3D objects
   I. curve
   II. sphere
   III. cone
   IV. arrow
   V. ring
   VI. Cylinder.

2. WAP to read n integers and display them as a histogram.
3. WAP to display sine, cosine, polynomial and exponential curves.
4. WAP to plot a graph of people with pulse rate p vs. height h. The values of p and h are to be entered by the user.
5. WAP to calculate the mass m in a chemical reaction. The mass m (in gms) disintegrates according to the formula m = 60/(t+2), where t is the time in hours. Sketch a graph for t vs. m, where t>=0.

6. A population of 1000 bacteria is introduced into a nutrient medium. The population p grows as follows:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

P(t) = (15000(1+t))/(15+ *e)* where the time t is measured in hours. WAP to determine the size of the population at given time t and plot a graph for P vs t for the specified time interval.

7. Input initial velocity and acceleration, and plot the following graphs depicting equations of motion:

I. velocity wrt time (v=u+at)
II. distance wrt time (s=u*t+0.5*a*t*t)
III. distance wrt velocity (s=(v*v-u*u)/2*a)

DSC-1B (CC-2): Database Management Systems **Credits 06**

DSC1BT: Database Management Systems **Credits 04**

Course Contents:

Introduction to Database Management Systems: Characteristics of database approach, data models, DBMS architecture and data independence.

Entity Relationship and Enhanced ER Modeling: Entity types, relationships, SQL- 99:Schema Definition , constraints, and object modeling.

Relational Data Model : Basic concepts, relational constraints, relational algebra, SQL queries.

Database design: ER and EER to relational mapping, functional dependencies, normal forms up to third normal form.

Suggested Readings :

1. R. Elmasri, S.B. Navathe, Fundamentals of Database Systems 6th Edition, Pearson Education, 2010.
2. R. Ramakrishanan, J. Gehrke, Database Management Systems 3rd Edition, McGraw-Hill, 2002.
3. A. Silberschatz, H.F. Korth, S. Sudarshan, Database System Concepts 6th Edition, McGraw Hill, 2010.
4. R. Elmasri, S.B. Navathe Database Systems Models, Languages, Design and application Programming, 6th Edition, Pearson Education,2013.

DSC1BP: Software Lab based on Database Management Systems (Lab) **Credits 02**

Practical

Note: MyAccess/MySQL may be used.

The following concepts must be introduced to the students:

DDL Commands

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

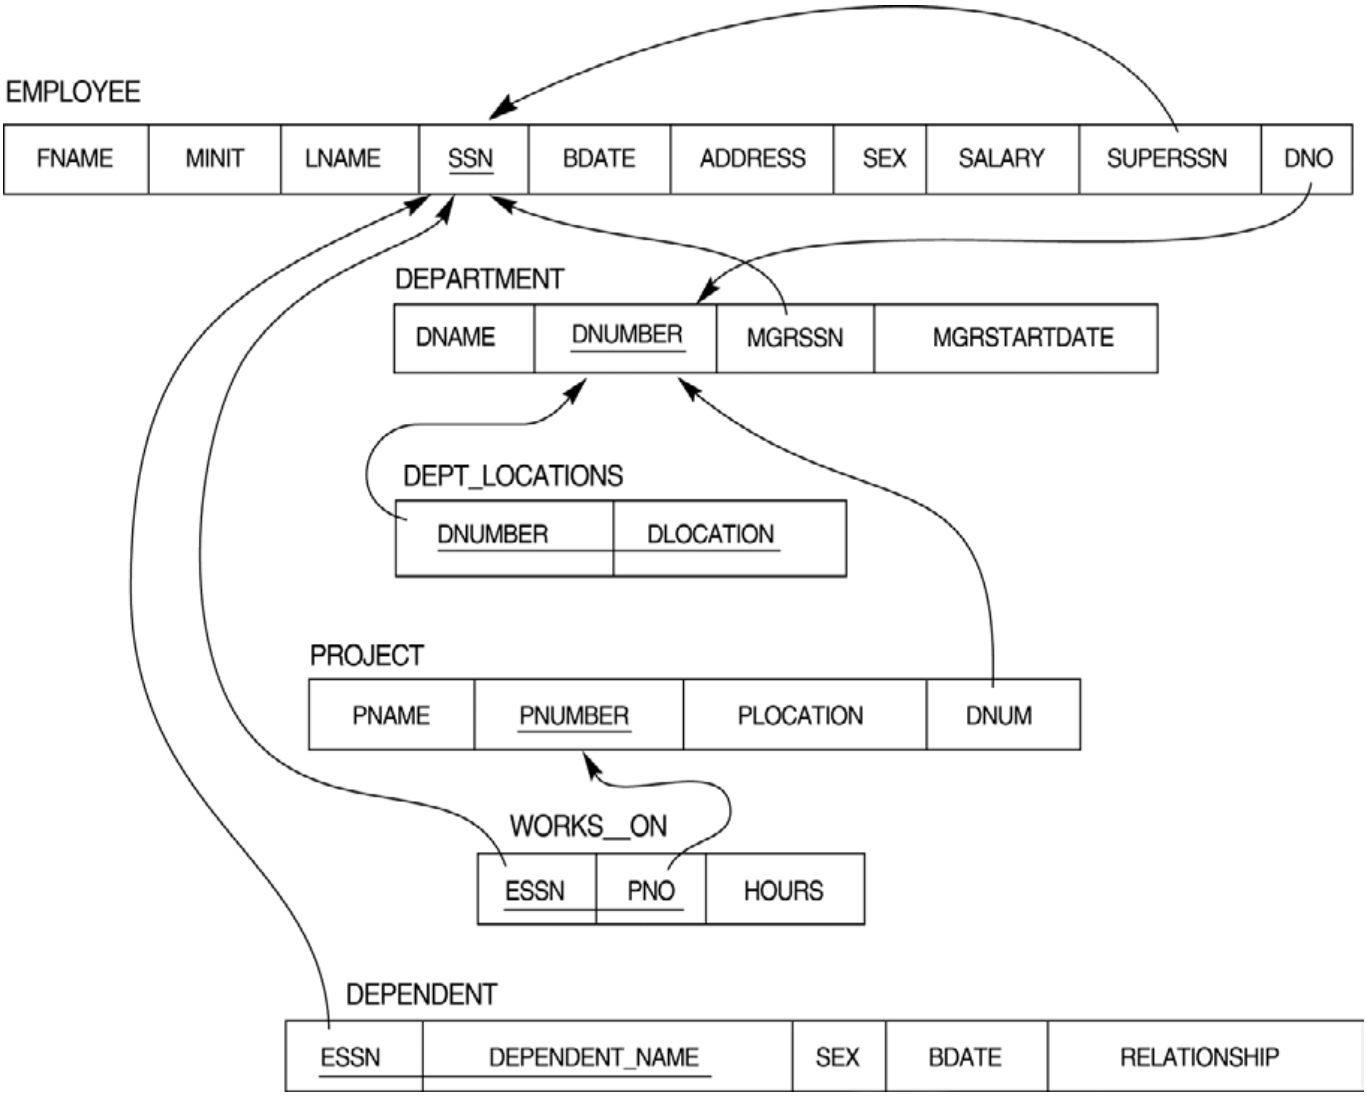
• Create table, alter table, drop table

DML Commands

- Select , update, delete, insert statements
- Condition specification using Boolean and comparison operators (and, or, not,=,<>,>,<,>=,<=)
- Arithmetic operators and aggregate functions(Count, sum, avg, Min, Max)
- Multiple table queries (join on different and same tables)
- Nested select statements
- Set manipulation using (any, in, contains, all, not in, not contains, exists, not exists, union, intersect, minus, etc.)
- Categorization using group by……..having
- Arranging using order by

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Relational Database Schema – COMPANY



Questions to be performed on above schema

1. Create tables with relevant foreign key constraints
2. Populate the tables with data
3. **Perform the following queries on the database** :

1. Display all the details of all employees working in the company.
2. Display ssn, lname, fname, address of employees who work in department no 7.
3. Retrieve the birthdate and address of the employee whose name is 'Franklin T. Wong'
4. Retrieve the name and salary of every employee
5. Retrieve all distinct salary values
6. Retrieve all employee names whose address is in ‘Bellaire’

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

7. Retrieve all employees who were born during the 1950s
8. Retrieve all employees in department 5 whose salary is between 50,000 and 60,000(inclusive)
9. Retrieve the names of all employees who do not have supervisors
10. Retrieve SSN and department name for all employees
11. Retrieve the name and address of all employees who work for the 'Research' department
12. For every project located in 'Stafford', list the project number, the controlling department number, and the department manager's last name, address, and birthdate.
13. For each employee, retrieve the employee's name, and the name of his or her immediate supervisor.
14. Retrieve all combinations of Employee Name and Department Name
15. Make a list of all project numbers for projects that involve an employee whose last name is 'Narayan' either as a worker or as a manager of the department that controls the project.
16. Increase the salary of all employees working on the 'ProductX' project by 15%. Retrieve employee name and increased salary of these employees.
17. Retrieve a list of employees and the project name each works in, ordered by the employee's department, and within each department ordered alphabetically by employee first name.
18. Select the names of employees whose salary does not match with salary of any employee in department 10.
19. Retrieve the name of each employee who has a dependent with the same first name and same sex as the employee.
20. Retrieve the employee numbers of all employees who work on project located in Bellaire, Houston, or Stafford.
21. Find the sum of the salaries of all employees, the maximum salary, the minimum salary, and the average salary. Display with proper headings.
22. Find the sum of the salaries and number of employees of all employees of the 'Marketing' department, as well as the maximum salary, the minimum salary, and the average salary in this department.
23. Select the names of employees whose salary is greater than the average salary of all employees in department 10.
24. For each department, retrieve the department number, the number of employees in the department, and their average salary.
25. For each project, retrieve the project number, the project name, and the number of employees who work on that project.
26. Change the location and controlling department number for all projects having more than 5 employees to 'Bellaire' and 6 respectively.
27. For each department having more than 10 employees, retrieve the department no, no of employees drawing more than 40,000 as salary.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

28. Insert a record in Project table which violates referential integrity constraint with respect to Department number. Now remove the violation by making necessary insertion in the Department table.
29. Delete all dependents of employee whose ssn is '123456789'.
30. Delete an employee from Employee table with ssn = '12345'(make sure that this employee has some dependents, is working on some project, is a manager of some department and is supervising some employees). Check and display the cascading effect on Dependent and Works on table. In Department table MGRSSN should be set to default value and in Employee table SUPERSSN should be set to NULL
31. Perform a query using alter command to drop/add field and a constraint in Employee table.

DSC-1C (CC-3): Operating Systems **Credits 06**

DSC1CT: Operating Systems **Credits 04**

Course Contents:

Introduction: System Software, Resource Abstraction, OS strategies.

Types of operating systems - Multiprogramming, Batch, Time Sharing, Single user and Multiuser, Process Control & Real Time Systems.

Operating System Organization: Factors in operating system design, basic OS functions, implementation consideration; process modes, methods of requesting system services – system calls and system programs.

Process Management : System view of the process and resources, initiating the OS, process address space, process abstraction, resource abstraction, process hierarchy, Thread model

Scheduling: Scheduling Mechanisms, Strategy selection, non-pre-emptive and pre-emptive strategies.

Memory Management: Mapping address space to memory space, memory allocation strategies, fixed partition, variable partition, paging, virtual memory

Shell introduction and Shell Scripting

- What is shell and various type of shell, Various editors present in linux
- Different modes of operation in vi editor
- What is shell script, Writing and executing the shell script
- Shell variable (user defined and system variables)
- System calls, Using system calls

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

- Pipes and Filters
- Decision making in Shell Scripts (If else, switch), Loops in shell
- Functions
- Utility programs (cut, paste, join, tr , uniq utilities)
- Pattern matching utility (grep)

Suggested Readings:

1. A Silberschatz, P.B. Galvin, G. Gagne, Operating Systems Concepts, 8th Edition, John Wiley Publications .
2. A.S. Tanenbaum, Modern Operating Systems, 3rd Edition, Pearson Education .
3. G. Nutt, Operating Systems: A Modern Perspective, 2nd Edition Pearson Education .
4. W. Stallings, Operating Systems, Internals & Design Principles , 5th Edition, Prentice Hall of India.
5. M. Milenkovic, Operating Systems- Concepts and design, Tata McGraw Hill.

DSC1CP: Software Lab based on Operating Systems (Lab) Credits 02

Practical

Note: Following exercises can be performed using Linux or Unix

1. Usage of following commands: ls, pwd, tty, cat, who, who am I, rm, mkdir, rmdir, touch, cd.
2. Usage of following commands: cal, cat(append), cat(concatenate), mv, cp, man, date.
3. Usage of following commands: chmod, grep, tput (clear, highlight), bc.
4. Write a shell script to check if the number entered at the command line is prime or not.
5. Write a shell script to modify “cal” command to display calendars of the specified months.
6. Write a shell script to modify “cal” command to display calendars of the specified range of months.
7. Write a shell script to accept a login name. If not a valid login name display message – “Entered login name is invalid”.
8. Write a shell script to display date in the mm/dd/yy format.
9. Write a shell script to display on the screen sorted output of “who” command along with the total number of users .
10. Write a shell script to display the multiplication table any number,
11. Write a shell script to compare two files and if found equal asks the user to delete the duplicate file.
12. Write a shell script to find the sum of digits of a given number.
13. Write a shell script to merge the contents of three files, sort the contents and then display them page by page.
14. Write a shell script to find the LCD (least common divisor) of two numbers.
15. Write a shell script to perform the tasks of basic calculator.
16. Write a shell script to find the power of a given number.
17. Write a shell script to find the factorial of a given number.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

18. Write a shell script to check whether the number is Armstrong or not.
19. Write a shell script to check whether the file have all the permissions or not.
20. Program to show the pyramid of special character "*".

DSC-1D (CC-4): Computer System Architecture Credits 06

DSC1DT: Computer System Architecture Credits 04

Course Contents:

Introduction: Logic gates, boolean algebra, combinational circuits, circuit simplification, flip-flops and sequential circuits, decoders, multiplexors, registers, counters and memory units.

Data Representation and basic Computer Arithmetic: Number systems, complements, fixed and floating point representation, character representation, addition, subtraction, magnitude comparison.

Basic Computer Organization and Design: Computer registers, bus system, instruction set, timing and control, instruction cycle, memory reference, input-output and interrupt.

Central Processing Unit: Register organization, arithmetic and logical micro-operations, stack organization, micro programmed control.

Programming the Basic Computer: Instruction formats, addressing modes, instruction codes, machine language, assembly language, input output programming.

Input-output Organization: Peripheral devices, I/O interface, Modes of data transfer, direct memory access.

Suggested Readings:

1. M. Mano, Computer System Architecture, Pearson Education 1992.
2. J. Dos Reis, Assembly Language and Computer Architecture using C++ and JAVA, Course Technology, 2004
3. W. Stallings, Computer Organization and Architecture Designing for Performance, 8th Edition, Prentice Hall of India ,2009
4. Digital Design, M.M. Mano, Pearson Education Asia, 1979.

DSC1DP: Computer System Architecture Lab Credits 02

Practical: 60 Lab Periods

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Memory 4096 words 16 bits per word	Instruction format 0 3 4 15 Opcode | Address

Basic Company Instructions

Memory Reference	Register Reference	Input-Output

1. Create a machine based on the following architecture:

IR	DR	AC	AR	PC	FGI	FGO	S	I	E
0 15	0 15	0 15	011	011	1 Bit	1 Bit	1 Bit	1 Bit	1 Bit

Symbol	Hex		Symbol	Hex	Symbol	Hex
AND	0xxx		CLA	E800	INP	F80 0
ADD	2xxx		CLE	E400	OUT	F40 0
ISZ	Cxxx		INC	E020		
AND_ I	1xxx	Indirect Addressing	SPA	E010		
ADD_I	3xxx		SNA	E008		
LDA _I	5xxx		SZA	E004		
STA _I	7xxx		SZE	E002		
BUN_I	9xxx		HLT	E001		
BSA _I	Bxxx					
ISZ _I	Dxxx					

Refer to Chapter-5 of Morris Mano for description of instructions.

ii) Create the micro operations and associate with instructions as given in the chapter (except interrupts). Design the register set, memory and the instruction set. Use this machine for the assignments of this section.

iii) Create a Fetch routine of the instruction cycle.

iv) Simulate the machine to determine the contents of AC, E, PC, AR and IR registers in hexadecimal after the execution of each of following register reference instructions:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

a. CLA	e. CIR	i. SNA
b. CLE	f. CIL	j. SZA
c. CMA	g. INC	k. SZE
d. CME	h. SPA	l. HLT

Initialize the contents of AC to $(A937)_{16}$, that of PC to $(022)_{16}$ and E to 1.

5. Simulate the machine for the following memory-reference instructions with I= 0 and address part = 082. The instruction to be stored at address 022 in RAM. Initialize the memory word at address 082 with the operand B8F2 and AC with A937. Determine the contents of AC, DR, PC, AR and IR in hexadecimal after the execution.

   a. ADD
   b. AND
   c. LDA
   d. STA
   e. BUN
   f. BSA
   g. ISZ

6. Simulate the machine for the memory-reference instructions referred in above question with I= 1 and address part = 082. The instruction to be stored at address 026 in RAM. Initialize the memory word at address 082 with the value 298. Initialize the memory word at address 298 with operand B8F2 and AC with A937. Determine the contents of AC, DR, PC, AR and IR in hexadecimal after the execution.

1. Modify the machine created in Practical 1 according to the following instruction format:

Instruction formate

   a. The instruction format contains a 3-bit opcode, a 1-bit addressing mode and a 12-bit address. There are only two addressing modes, I = 0 (direct addressing) and I = 1 (indirect addressing).

b. Create a new register I of 1 bit.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

c. Create two new microinstructions as follows :

i. Check the opcode of instruction to determine type of instruction (Memory Reference/Register Reference/Input-Output) and then jump accordingly.

ii. Check the I bit to determine the addressing mode and then jump accordingly.

Discipline Specific Elective (DSE)

DSE-1: Programming in Java **Credits 06**

DSE1T: Programming in Java **Credits 04**

Course Contents:

Introduction to Java: Features of Java, JDK Environment

Object Oriented Programming Concept Overview of Programming, Paradigm, Classes, Abstraction, Encapsulation, Inheritance, Polymorphism, Difference between C++ and JAVA

Java Programming Fundamental : Structure of java program, Data types, Variables, Operators, Keywords, Naming Convention, Decision Making (if, switch),Looping(for, while) ,Type Casting

Classes and Objects: Creating Classes and objects, Memory allocation for objects, Constructor, Implementation of Inheritance, Implementation of Polymorphism, Method Overloading, Method Overriding, Nested and Inner classes

Arrays and Strings: Arrays, Creating an array, Types of Arrays, String class Methods, String Buffer methods.

Abstract Class, Interface and Packages: Modifiers and Access Control, Abstract classes and methods, Interfaces, Packages Concept, Creating user defined packages.

Exception Handling: Exception types, Using try catch and multiple catch, Nested try, throw, throws and finally, Creating User defined Exceptions.

File Handling: Byte Stream, Character Stream, File IO Basics, File Operations, Creating file, Reading file, Writing File

Applet Programming: Introduction, Types Applet, Applet Life cycle, Creating Applet, Applet tag

Suggested Readings:

1. Ivan Bayross, Web Enabled Commercial Application Development Using Html, Dhtml, javascript, Perl Cgi , BPB Publications, 2009.
2. Cay Horstmann, BIG Java, Wiley Publication , 3rd Edition., 2009
3. Herbert Schildt , Java 7, The Complete Reference, , 8th Edition, 2009.
4. E Balagurusamy , Programming with JAVA, TMH, 2007

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

DSE1P: Software Lab based on Java (Lab) **Credits 02**

Practical

1. WAP to find the largest of n natural numbers.
2. WAP to find whether a given number is prime or not.
3. Write a menu driven program for following:
    a. Display a Fibonacci series
    b. Compute Factorial of a number
    c. WAP to check whether a given number is odd or even.
    d. WAP to check whether a given string is palindrome or not.
4. WAP to print the sum and product of digits of an Integer and reverse the Integer.
5. Write a program to create an array of 10 integers. Accept values from the user in that array. Input another number from the user and find out how many numbers are equal to the number passed, how many are greater and how many are less than the number passed.
6. Write a program that will prompt the user for a list of 5 prices. Compute the average of the prices and find out all the prices that are higher than the calculated average.
7. Write a program in java to input N numbers in an array and print out the Armstrong numbers from the set.
8. Write java program for the following matrix operations:
    a. Addition of two matrices
    b. Summation of two matrices
    c. Transpose of a matrix
    d. Input the elements of matrices from user.
9. Write a java program that computes the area of a circle, rectangle and a Cylinder using function overloading.
10. Write a Java for the implementation of Multiple inheritance using interfaces to calculate the area of a rectangle and triangle.
11. Write a java program to create a frame window in an Applet. Display your name, address and qualification in the frame window.
12. Write a java program to draw a line between two coordinates in a window.
13. Write a java program to display the following graphics in an applet window.
    a. Rectangles
    b. Circles
    c. Ellipses
    d. Arcs
    e. Polygons
14. Write a program that reads two integer numbers for the variables a and b. If any other character except number (0-9) is entered then the error is caught by NumberFormatException object. After that ex.getMessage() prints the information about the error occurring causes.
15. Write a program for the following string operations:
    a. Compare two strings
    b. Concatenate two strings
    c. Compute length of a string
16. Create a class called Fraction that can be used to represent the ratio of two integers. Include appropriate constructors and methods. If the denominator becomes zero, throw and handle an exception.

Or

DSE-1: Discrete Structures **Credits 06**

DSE1T: Discrete Structures

Course Contents:

Introduction: Introduction to Sets, Finite and Infinite Sets, Unaccountably Infinite Sets. Introduction to Functions and relations, Properties of Binary relations, Closure, Partial Ordering Relations.

Unit-II: Pigeonhole Principle, Permutation and Combinations, Mathematical Induction, Principle of Inclusion and Exclusion.

Unit-III : Asymptotic Notations

Recurrence Relations: Introduction, Generating Functions, Linear Recurrence Relations with constant coefficients and their solution.

Graphs Theory: Basic Terminology of Graphs, Models and Types, Multigraphs, Weighted Graphs, Graph Representation. Graph Isomorphism Graph Connectivity, Euler and Hamiltonian Paths and Circuits, Planar Graphs, Graph Coloring, Basic Terminology of Trees, Properties of Trees, Spanning Trees.

Inference Theory: Introduction, Logical Connectives, Well Formed Forjmulas, Tautologies, Equivalence .

Suggested Readings:

1. C. L. Liu and D.P. Mohapatra, Elements of Discrete Mathematics, Third Edition, Tata McGraw Hill , 2008.
2. K. Rosen, Discrete Mathematics and Its Applications, Sixth Edition, Tata McGraw Hill,2007.
3. T.H. Cormen, C.E. Leiserson, R.L. Rivest, Introduction to Algorithms, Third Edition,Prentice Hall of India,2010.
4. J.P. Trembley, R. Manohar, Discrete Mathematical Structures with Application to Computer Science, First Edition, Tata McGraw Hill, 2001.
5. David Gries, Fred B. Schneider, A Logical Approach to Discrete Math, Springer; , 2010.

Online Reading/Supporting Material:

1. http://ocw.mit.edu/courses/electrical-engineering-and-computer-science/6-042j-mathematics-for-computer- science-fall-2005/

Or

DSE-1: Analysis of Algorithm and Data Structures **Credits 06**

DSE1T: Analysis of Algorithm and Data Structures **Credits 04**

Course Contents:

Introduction: Basic Design and Analysis techniques of Algorithms, Correctness of Algorithm

Algorithm Design Techniques: Iterative techniques, Divide and Conquer, Dynamic Programming, Greedy Algorithms.

Sorting Techniques: Elementary sorting techniques-Bubble Sort, Insertion Sort, Merge Sort, Advanced Sorting techniques-Heap Sort, Quick Sort, Sorting in Linear Time-Bucket Sort, Radix Sort and Count Sort

Searching Techniques: Linear and Binary search.

C**omplexity Analysis**: Medians & Order Statistics.

Data Structures:

1. Arrays
   Single and Multi-dimensional Arrays, Sparse Matrices
2. Stacks
   Implementing stack using array and linked list, Prefix, Infix and Postfix expressions, Utility and conversion of these expressions from one to another;
3. Queues
   Array and Linked representation of Queue, De-queue, Priority Queues
4. Linked Lists
   Singly, Doubly and Circular Lists, representation of Stack and Queue as Linked Lists.
5. Recursion
   Developing Recursive Definition of Simple Problems and their implementation; Advantages and Limitations of Recursion;
6. Trees
   Introduction to Tree as a data structure; Binary Trees, Binary Search Tree, (Creation, and Traversals of Binary Search Trees)

Suggested Readings:

1. T.H. Cormen, Charles E. Leiserson, Ronald L. Rivest, Clifford Stein-Introduction to Algorithms, PHI, 3rd Edition 2009.
2. Sarabasse & A.V. Gelder Computer Algorithm –Introduction to Design and Analysis,Publisher– Pearson 3rd Edition 1999.
3. Adam Drozdek, "Data Structures and algorithm in C++", Third Edition, Cengage Learning, 2012.
4. SartajSahni, Data Structures, "Algorithms and applications in C++", Second Edition, Universities Press, 2011.
5. Aaron M. Tenenbaum, Moshe J. Augenstein, YedidyahLangsam, "Data Structures Using C and C++:, Second edition, PHI, 2009.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University

6. Robert L. Kruse, "Data Structures and Program Design in C++", Pearson.
7. D.S Malik, Data Structure using C++,Second edition, Cengage Learning, 2010.

DSE1P: Software Lab based on Analysis of Algorithms (Lab) **Credits 02**

Practical:

1. Implement Insertion Sort (The program should report the number of comparisons)
2. Implement Merge Sort(The program should report the number of comparisons)
3. Implement Heap Sort (The program should report the number of comparisons)
4. Implement Randomized Quick sort (The program should report the number of comparisons)
5. Implement Radix Sort.
6. Implement Searching Techniques
7. Implementation of Recursive function.
8. Array and Linked list implementation of Stack and Queue.
9. Implementation of Single, Double and circular Linked List
10. Creation and traversal of Binary Search Tree.

Or

DSE-1: Software Engineering **Credits 06**

DSE1T: Software Engineering **Credits 04**

Course Contents:

Software Process: Introduction ,S/W Engineering Paradigm , life cycle models (water fall, incremental, spiral, evolutionary, prototyping, object oriented) , System engineering, computer based system, verification, validation, life cycle process, development process, system engineering hierarchy.

Software requirements: Functional and non-functional , user, system, requirement engineering process, feasibility studies, requirements, elicitation, validation and management, software prototyping, prototyping in the software process, rapid prototyping techniques, user interface prototyping, S/W document. Analysis and modeling, data, functional and behavioral models, structured analysis and data dictionary.

Design Concepts and Principles: Design process and concepts, modular design, design heuristic, design model and document, Architectural design, software architecture, data design, architectural design, transform and transaction mapping, user interface design, user interface design principles. Real time systems, Real time software design, system design, real time executives, data acquisition system, monitoring and control system.

Software Configuration Management: The SCM process, Version control, Change control, Configuration audit, SCM standards.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Software Project Management: Measures and measurements, S/W complexity and science measure, size measure, data and logic structure measure, information flow measure. Estimations for Software Projects, Empirical Estimation Models, Project Scheduling.

Testing: Taxonomy of software testing, levels, test activities, types of s/w test, black box testing testing boundary conditions, structural testing, test coverage criteria based on data flow, mechanisms, regression testing, testing in the large. S/W testing strategies, strategic approach and issues, unit testing, integration testing, validation testing, system testing and debugging.

Trends in Software Engineering: Reverse Engineering and Re-engineering – wrappers – Case Study of CASE tools.

Suggested Readings:

1. Roger S.Pressman, Software engineering- A practitioner's Approach, McGraw-Hill
2. Ian Sommerville, Software engineering, Pearson education Asia, 6th edition, 2000.
3. Pankaj Jalote- An Integrated Approach to Software Engineering, Springer Verlag, 1997.
4. James F Peters and Witold Pedryez, "Software Engineering – An Engineering Approach", John Wiley and Sons, New Delhi, 2000.
5. Ali Behforooz and Frederick J Hudson, "Software Engineering Fundamentals", Oxfor University Press, New Delhi, 1996.
6. Pfleeger, "Software Engineering", Pearson Education India, New Delhi, 1999. Carlo Ghezzi, Mehdi Jazayari and Dino Mandrioli, "Fundamentals of Software Engineering", Prentice Hall of India, New Delhi, 1991.

DSE1P: Software Engineering (Lab) **Credits 02**

Practical

1. Practical Title
   - Problem Statement,
   - Process Model

2. Requirement Analysis
   - Creating a Data Flow
   - Data Dictionary,
   - Use Cases

3. Project Management
   - Computing FP
   - Effort
   - Schedule, Risk Table, Timeline chart

4. Design Engineering
   - Architectural Design
   - Data Design, Component Level Design

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

5. Testing
- Basis Path Testing

Sample Projects

- DTC Route Information: Online information about the bus routes and their frequency and fares
- Car Pooling: To maintain a web based intranet application that enables the corporate employees within an organization to avail the facility of carpooling effectively.
- Patient Appointment and Prescription Management System
- Organized Retail Shopping Management Software
- Parking Allocation System
- Wholesale Management System

Or

DSE-1: Computer Networks **Credits 06**

DSE1T: Computer Networks **Credits 04**

Course Contents:

Basic concepts : Components of data communication, standards and organizations, Network Classification, Network Topologies ; network protocol; layered network architecture; overview of OSI reference model; overview of TCP/IP protocol suite.

Physical Layer : Cabling, Network Interface Card, Transmission Media Devices- Repeater, Hub, Bridge, Switch, Router, Gateway.
Data Link Layer : Framing techniques; Error Control; Flow Control Protocols; Shared media protocols - CSMA/CD and CSMA/CA.

Network Layer : Virtual Circuits and Datagram approach, IP addressing methods – Subnetting; Routing Algorithms (adaptive and non-adaptive)

Transport Layer: Transport services, Transport Layer protocol of TCP and UDP.

Application Layer : Application layer protocols and services – Domain name system, HTTP, WWW, telnet, FTP, SMTP.

Network Security : Common Terms, Firewalls, Virtual Private Networks.

Suggested Readings:

1. B.A. Forouzan: Data Communication and Networking, 4th Edition, Tata McGraw Hill, 2007.

2. D.E. Comer, Internetworking with TCP/IP, Vol. I, Prentice Hall of India, 1998.

3. W. Stalling, Data & Computer Communication, 8th edition, Prentice Hall of India, 2006.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

4. D. Bertsekas, R. Gallager, Data Networks, 2nd edition, Prentice Hall of India, 1992.

DSE1P: Computer Networks **Credits 02**

Software Lab based on Computer Networks:

Implement the concepts of Computer Networks such as:
1. Simulate Checksum Algorithm.
2. Simulate CRC Algorithm
3. Simulate Stop & Wait Protocol.
4. Simulate Go-Back-N Protocol.
5. Simulate Selective Repeat Protocol.
and so on….

Or

DSE-1: Internet Technologies **Credits 06**

DSE1T: Internet Technologies **Credits 04**

Course Contents:

Introduction to Web Design: Introduction to hypertext markup language (html) document type definition, creating web pages, graphical elements, lists, hyperlinks, tables, web forms, inserting images, frames.

Customized Features: Cascading style sheets, (css) for text formatting and other manipulations.

JavaScript: Data types, operators, functions, control structures, events and event handling.

Java: Use of Objects, Array and Array List class, Designing classes, Inheritance, Input/Output, Exception Handling.

JDBC: JDBC Fundamentals, Establishing Connectivity and working with connection interface,Working with statements, Creating and Executing SQL Statements, Working with Result Set Objects.

JSP: Introduction to JavaServer Pages, HTTP and Servlet Basics, The Problem with Servlets, The Anatomy of a JSP Page, JSP Processing, JSP Application Design with MVC, Setting Up the JSP Environment, Implicit JSP Objects, Conditional Processing, Displaying Values.

Using an expression to Set an Attribute, Declaring Variables and Methods, Error Handling and Debugging, Sharing Data Between JSP Pages, Requests, and Users, Database Access.

Suggested Readings:

1. Web Enabled Commercial Application Development Using Html, Dhtml, javascript, Perl Cgi By Ivan Bayross, BPB Publications.

2. BIG Java Cay Horstmann, Wiley Publication , 3rd Edition..

3. Java 7 ,The Complete Reference, Herbert Schildt, 8th Edition.

4. The Complete Reference J2EE, TMH, Jim Keogh.

5. Java Server Pages, Hans Bergsten, Third Edition, O'Reilly Media December.

DSE1P: Internet Technologies (lab) **Credits 02**

Software Lab based on Internet Technologies

JAVA Script

1. Create a student registration form. Create functions to perform the following checks:
    a. Roll number is a 7-digit numeric value
    b. Name should be an alphabetical value(String)
    c. Non-empty fields like DOB

2. Implement a static password protection.
3. Write a java script
    a. To change the colour of text using SetTimeOut()
    b. To move an image across screen using SetInterval()

JAVA Programs

1. WAP to find the largest of n natural numbers.
2. WAP to find whether a given number is prime or not.
3. WAP to print the sum and product of digits of an Integer and reverse the Integer.
4. Write a program to create an array of 10 integers. Accept values from the user in that array. Input another number from the user and find out how many numbers are equal to the number passed, how many are greater and how many are less than the number passed.
5. Write java program for the following matrix operations:
    a. Addition of two matrices
    b. Summation of two matrices
    c. Transpose of a matrix
    Input the elements of matrices from user
6. Write a java program that computes the area of a circle, rectangle and a Cylinder using function overloading.

JDBC

1. Create a table 'Student' and ‘Teacher’ in 'College' database and insert two rows in this newly created table using JDBC API and do the following:

    a. Update an already created table 'Teacher' in 'College' database by updating a teacher's name, with "Dr." appended before the name, whose name is "Rita".

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

b. Repeat the same thing for all the teachers using Prepared Statement.

c. Delete the student with ID=3 from 'Student' database.

d. Insert two students to the Result Set returned by the query which selects all students with First Name="Ayush". The database must also get updated along with Result Set.

2. Create a procedure in MySQL to count the number of Rows in table 'Student'. Use Callable Statement to call this method from Java code.

JSP Practical list

1.Display the pattern:

1
1 2
1 2 3

Take ‘n’ in a textbox from user. Display this pattern using

- Scriptlets
- <c:forEach> loop

2. Make two files as follows:

a. main.html: shows 2 text boxes and 3 radio buttons with values "addition", "subtraction" and "multiplication"

b. operate.jsp: depending on what the user selects perform the corresponding function (Give two implementations: using request. get Parameter() and using expression language)

3. Validate User input entered in a form. The input must include Name, DOB, Email ID, Lucky Number, Favorite food etc.

4. Display Good Morning <uname>, Good Afternoon <uname> or Good Evening <uname> based on the current time of the day.

5. Create your custom library which contains two tags: <hello>, <choco>.
Usage of the tags:

- <hello name=”Ajay”>: Output should be Hello Ajay. It contains a mandatory attribute ‘name’ which can accept Dynamic value.
- <choco texture=”Chewy”>: Output should be FiveStar, BarOne.

<choco texture=”Crunchy”>: Output should be Munch. KitKat.

That means the mandatory attribute must accept a value, and based on the attributes value, it should give output. You must use a bean ChocoBean for this purpose.

DSE-2: Data Mining **Credits 06**

DSE2T: Data Mining **Credits 04**

Course Contents:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Data Warehousing: Introduction- Definition and description, need for data ware housing, need for strategic information, failures of past decision support systems, OLTP vs DWH-DWH requirements-trends in DWH-Application of DWH.

Data Warehousing Architecture: Reference architecture- Components of reference architecture - Data warehouse building blocks, implementation, physical design process and DWH deployment process. A Multidimensional Data, Model Data Warehouse Architecture.

Data Mining: Data mining tasks-Data mining vs KDD- Issues in data mining, Data Mining metrics, Data mining architecture - Data cleaning- Data transformation- Data reduction - Data mining primitives.

Association Rule Mining: Introduction - Mining single dimensional Boolean association rules from transactional databases - Mining multi-dimensional association rules.

Classification and Prediction: Classification Techniques - Issues regarding classification and prediction - decision tree - Bayesian classification –Classifier accuracy – Clustering – Clustering Methods - Outlier analysis.

Applications and Other Data Mining Methods: Distributed and parallel Data Mining Algorithms, Text mining- Web mining.

Suggested Readings:

1. Jiawei Han and Micheline Kamber, ” Data Mining Concepts and Techniques”, Morgan Kaufmann Publishers, USA, 2006.
2. Berson,”DataWarehousing, Data Mining and OLAP”, Tata McGraw Hill Ltd, New Delhi, 2004.
3. Pang-Ning Tan, Michael Steinbach, Vipin Kumar, Introduction to Data Mining, , Pearson Education.
4. Arun K Pujari,”Data mining techniques”, Oxford University Press, London, 2003.
5. Dunham M H,”Data mining: Introductory and Advanced Topics”. Pearson Education, New Delhi, 2003.
6. Mehmed Kantardzic,” Data Mining Concepts, Methods and Algorithms”, John Wiley and Sons, USA, 2003.
7. Soman K. P., DiwakarShyam, Ajay V., Insight into Data mining: Theory and Practice, PHI 2006

DSE2P: Data Mining (Lab) **Credits 02**

Software Lab based on Data Mining:

Practical List:

Practical are to be done using Weka, and a report prepared as per the format*. The operations are to be performed on built-in dummy data sets of weka and/or the downloadable datasets mentioned in references below. Also wherever applicable, the parameter values are to be varied (upto 3 distinct values). The 'Visualize' tab is to be explored with each operation.

1. Preprocessing : Apply the following filters –

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

a. weka>filter>supervised>attributed>
AddClassification , AttributeSelection, Discretize , NominalToBinary

b. weka>filter>supervised>instance:
StratifiedRemoveFolds, Resample

c. weka>filter>unsupervised>attribute>
Add, AddExpression, AddNoise , Center , Discretize , MathExpression , MergeTwoValues , NominalToBinary , NominalToString, Normalize NumericToBinary , NumericToNominal , NumericTransform , PrincipalComponent , RandomSubset , Remove , RemoveType , ReplaceMissingValues , Standardize

d. weka>filter>unsupervised>instance>
Normalize , Randomize , Standardize, RemoveFrequentValues, RemoveWithValues , Resample , SubsetByExpression

2. **Explore the 'select attribute' as follows**
weka>attributeSelection> , FilteredSubsetEval , WrapperSubsetEval

3. **Association mining**
weka>associations> , Apriori, FPGrowth

4**. Classification****
weka>classifiers>bayes> , NaïveBayes , weka>classifiers>lazy> : IB1 , IBk
weka>classifiers>trees , SimpleCart , RandomTree , ID3

5. **Clustering****
weka>clusters> , SimpleKMeans , FarthestFirst algorithm, DBSCAN, hierarchicalClusterer

Or

DSE-2: Mobile Applications **Credits 06**

DSE2T: Mobile Applications **Credits 04**

Course Contents:

Event Driven Programming: UI event loop, Threading for background tasks, Outlets / actions, delegation, notification, Model View Controller (MVC) design pattern.

Mobile application issues: limited resources (memory, display, network, file system), input / output (multi-touch and gestures), sensors (camera, compass, accelerometer, GPS)

Development tools: Apple iOS toolchain: Objective-C, Xcode IDE, Interface Builder, Device simulator.

Frameworks: Objective-C and Foundation Frameworks, Cocoa Touch, UIKit, Others: Core Graphics, Core Animation, Core Location and Maps, Basic Interaction.

Common UI's for mobile devices: Navigation Controllers, Tab Bars, Table Views, Modal views, UI Layout.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Data Persistence: Maintaining state between application invocations, File system, Property Lists, SQLite, Core Data.

Remote Data-Storage and Communication: "Back End" / server side of application, RESTful programming, HTTP get, post, put, delete, database design, server side JavaScript / JSON.

Code signing: security, Keychain, Developers and App Store License Agreement.

Suggested Readings:

1. Rajiv Ramnath, Roger Crawfis, and Paolo Sivilotti, Android SDK 3 for Dummies, Wiley, 2011.
2. Valentino Lee, Heather Schneider, and Robbie Schell, Mobile Applications: Architecture, Design, and Development, Prentice Hall, 2004.
3. Brian Fling, Mobile Design and Development, O'Reilly Media, 2009. Maximiliano
4. Firtman, Programming the Mobile Web, O'Reilly Media, 2010.
5. Christian Crumlish and Erin Malone, Designing Social Interfaces, O'Reilly Media, 2009.

DSE2P: Mobile Applications (Lab) **Credits 02**

Software Lab based on Mobile Applications:

1. Installing Android Environment
2. Create Hello World Application
3. Sample Application about Android Resources
4. Sample Application about Layouts
5. Sample Application about Intents
6. Sample Application I about user interfaces
7. Sample Application about Animations
8. Make a Project based on above labs
9. Sample Application about Android Data
10. Sample Application about SQLite I
11. Sample Application about SQLite II
12. Project Presentation

Or

DSE-2: E-Commerce Technologies **Credits 06**

DSE2P: E-Commerce Technologies **Credits 04**

Course Contents:

An introduction to Electronic commerce: What is E-Commerce (Introduction And Definition), Main activities E-Commerce, Goals of E-Commerce, Technical Components of E-Commerce, Functions of E-Commerce, Advantages and disadvantages of E-Commerce, Scope of E-Commerce, Electronic Commerce Applications, 9 Electronic Commerce and Electronic Business(C2C)(C2G,G2G, B2G, B2P, B2A, P2P, B2A, C2A, B2B, B2C) .

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

The Internet and WWW: Evolution of Internet, Domain Names and Internet Organization (.edu, .com, .mil, .gov, .net etc.) , Types of Network, Internet Service Provider, World Wide Web, Internet & Extranet, Role of Internet in B2B Application, building own website, Cost, Time, Reach, Registering a Domain Name, Web promotion, Target email, Baner, Exchange, Shopping Bots .

Internet Security: Secure Transaction, Computer Monitoring, Privacy on Internet, Corporate Email privacy, Computer Crime(Laws , Types of Crimes), Threats, Attack on Computer System, Software Packages for privacy, Hacking, Computer Virus(How it spreads, Virus problem, virus protection, Encryption and Decryption, Secret key Cryptography, DES, Public Key Encryption, RSA, Authorisation and Authentication, Firewall, Digital Signature(How it Works) .

Electronic Data Exchange: Introduction, Concepts of EDI and Limitation, Applications of EDI, Disadvantages of EDI, EDI model, Electronic Payment System: Introduction, Types of Electronic Payment System, Payment Types, Value Exchange System, Credit Card System, Electronic Fund Transfer, Paperless bill, Modern Payment Cash, Electronic Cash .

Planning for Electronic Commerce: Planning Electronic Commerce initiates, Linking objectives to business strategies, Measuring cost objectives, Comparing benefits to Costs, Strategies for developing electronic commerce web sites .

Internet Marketing: The PROS and CONS of online shopping, The cons of online shopping, Justify an Internet business, Internet marketing techniques, The E-cycle of Internet marketing, Personalization e-commerce.

Suggested Readings:

1. G.S.V.Murthy, E-Commerce Concepts, Models, Strategies- :- Himalaya Publishing House, 2011.
2. Kamlesh K Bajaj and Debjani Nag , E- Commerce , 2005.
3. Gray P. Schneider , Electronic commerce, International Student Edition, 2011,
4. Henry Chan, Raymond Lee, Tharam Dillon, Elizabeth Chang, E-Commerce, Fundamentals and Applications, Wiely Student Edition, 2011

DSE2P: E-Commerce Technologies (Lab) **Credits 02**

Software Lab based on E-Commerce Technologies

E-commerce concepts are to be implemented in developing a website using a combination of following technologies:

1. HyperText Markup Language (HTML)
2. Cascading Style Sheets (CSS)
3. JavaScript
4. ASP
5. PHP

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University

6. XML

7. Joomla

Or

DSE-2: Cloud Computing **Credits 06**

DSE2T: Cloud Computing **Credits 04**

Course Contents:

Cloud Introduction: Cloud Computing Fundamentals: Cloud Computing definition, Types of cloud, Cloud services: Benefits and challenges of cloud computing, Evolution of Cloud Computing , usage scenarios and Applications , Business models around Cloud – Major Players in Cloud Computing - Issues in Cloud - Eucalyptus - Nimbus - Open Nebula, CloudSim.

Cloud Services And File System: Types of Cloud services: Software as a Service - Platform as a Service – Infrastructure as a Service - Database as a Service - Monitoring as a Service – Communication as services. Service providers- Google App Engine, Amazon EC2, Microsoft Azure, Sales force. Introduction to MapReduce, GFS, HDFS, Hadoop Framework.)

Collaborating With Cloud:Collaborating on Calendars, Schedules and Task Management – Collaborating on Event Management, Contact Management, Project Management – Collaborating on Word Processing , Databases – Storing and Sharing Files- Collaborating via Web-Based Communication Tools – Evaluating Web Mail Services – Collaborating via Social Networks – Collaborating via Blogs and Wikis. 185 CS-Engg&Tech-SRM-2013.

Virtualization For Cloud :Need for Virtualization – Pros and cons of Virtualization – Types of Virtualization – System Vm, Process VM, Virtual Machine monitor – Virtual machine properties - Interpretation and binary translation, HLL VM - Hypervisors – Xen, KVM , VMWare, Virtual Box, Hyper-V.

Security, Standards, And Applications
Security in Clouds: Cloud security challenges – Software as a Service Security, Common Standards: The Open Cloud Consortium – The Distributed management Task Force – Standards for application Developers – Standards for Messaging – Standards for Security, End user access to cloud computing, Mobile Internet devices and the cloud.

Suggested Readings:

1. Bloor R., Kanfman M., Halper F. Judith Hurwitz “Cloud Computing ” Wiley India Edition,2010
2. John Rittinghouse & James Ransome, “Cloud Computing Implementation Management and Strategy”, CRC Press, 2010
3. Antohy T Velte ,Cloud Computing : “A Practical Approach”, McGraw Hill,2009

DSE2P: Cloud Computing (Lab) **Credits 02**

Software Lab based on Cloud Computing:

1. Create virtual machines that access different programs on same platform.
2. Create virtual machines that access different programs on different platforms.
3. Exploring Google cloud for the following
    a) Storage
    b) Sharing of data
    c) Manage your calendar, to-do lists,
    d) A document editing tool
4. Exploring Microsoft cloud
5. Exploring Amazon cloud

Or

DSE-2: Project Work **Credits 06 (2+4)**

The students will be allowed to work on any project based on the concepts studied in core/elective or skill based elective courses. Theory classes will cover project management techniques.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Skill Enhancement Courses (SEC)

SEC-1: MySQL (SQL/PL-SQL) **Credits 02**

SEC1T: MySQL (SQL/PL-SQL) **Credits 01**

Course Contents:

SQL Vs. SQL * Plus:

SQL Commands and Data types, Operators and Expressions, Introduction to SQL * Plus.

Managing Tables and Data:

- Creating and Altering Tables (Including constraints)
- Data Manipulation Command like Insert, update, delete
- SELECT statement with WHERE, GROUP BY and HAVING, ORDER BY, DISTINCT, Special operator like IN, ANY, ALL BETWEEN, EXISTS, LIKE
- Join, Built in functions

Other Database Objects

- View
- Synonyms, Index

Transaction Control Statements

- Commit, Rollback, Savepoint

Introduction to PL/SQL

- SQL v/s PL/SQL
- PL/SQL Block Structure
- Language construct of PL/SQL (Variables, Basic and Composite Data type, Conditions looping etc.)
- % TYPE and % ROWTYPE
- Using Cursor (Implicit, Explicit)

Suggested Readings:

1. Baron Schwartz , High Performance MySQL, O'Reilly, 2012.
2. Vikram Vaswani , The Complete Reference MySQL , McGraw Hill Educations, 2004.

SEC1P: MySQL (SQL/PL-SQL) (Lab) **Credits 01**

Software Lab Based on MySQL (SQL/PL-SQL):

[SQL COMMANDS]

1) SQL* formatting commands

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

2) To create a table, alter and drop table.
3) To perform select, update, insert and delete operation in a table.
4) To make use of different clauses viz where, group by, having, order by, union and intersection,
5) To study different constraints.

[SQL FUNCTION]

6) To use oracle function viz aggregate, numeric, conversion, string function.
7) To understand use and working with joins.
8) To make use of transaction control statement viz rollback, commit and save point.
9) To make views of a table.
10) To make indexes of a table.

[PL/SQL]
11) To understand working with PL/SQL
12) To implement Cursor on a table.
13) To implement trigger on a table

Or

SEC-1: HTML Programming **Credits 02**

SEC1T: HTML Programming **Credits 01**

Course Contents:

Unit-I: Introduction
Unit-II: The Basics

- The Head, the Body
- Colors, Attributes
- Lists, ordered and unordered

Unit-III: Links

- Introduction
- Relative Links, Absolute Links
- Link Attributes
- Using the ID Attribute to Link Within a Document

Unit-IV: Images
- Putting an Image on a Page
- Using Images as Links

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

- Putting an Image in the Background

Unit V: Tables
- Creating a Table
- Table Headers
- Captions
- Spanning Multiple Columns
- Styling Table

Unit VI: Forms
- Basic Input and Attributes
- Other Kinds of Inputs
- Styling forms with CSS
- Where To Go From Here

Suggested Readings:

1. Virginia DeBolt , Integrated HTML and CSS A Smarter, Faster Way to Learn Wiley / Sybex , 2006
2. Cassidy Williams, Camryn Williams Introduction to HTML and CSS, O'Reilly, 2015

SEC1P: Software Lab Based on HTML **Credits 01**

Q.1 Create an HTML document with the following formatting options:

1. Bold
2. Italics
3. Underline
4. Headings (Using H1 to H6 heading styles)
5. Font (Type, Size and Color)
6. Background (Colored background/Image in background)
7. Paragraph
8. Line Break
9. Horizontal Rule
10. Pre tag

Q.2 Create an HTML document which consists of:

I. Ordered List
II. Unordered List
III. Nested List
IV. Image

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University

XYZ Ltd's Update

1. Introduction
2. Company Financial Update
   - First Quarter
   - Second Quarter
   - Third Quarter
   - Fourth Quarter
3. Advertising Update
   - Result of Newspaper Campaign
   - Additions to staff
   - New Thoughts on Television
4. Human Resources Update

A. Saftey Considerations
   1. Body substance isolation
   2. Sense safty
   3. Initial size-up
B. Intitial Patient Assessment
   1. General Impression
   2. Unresponsiveness
      i. Alert to person, place and time
      ii. Verbal response to audible stimuli
      iii. Pain evokes verbal or physical response
      iv. Unresponsive to all stimuli
C. Patient Critical Needs
   1. Airway
   2. Breathing
      i. Use oxygen if indicated
      ii. Consider use of assisting with bag value mask
   3. Circulation
   4. Bleeding

Q.3 Create an HTML document which implements Internal linking as well as External linking.

Q.4 Create a table using HTML which consists of columns for Roll No., Student's name and grade.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Result		
Roll No.	Name	Grade

Q.5 Create a Table with the following view:

			Please an image here		

Q.6 Create a form using HTML which has the following types of controls :

I. Text Box
II. Option/radio buttons
III. Check boxes
IV. Reset and Submit buttons

Subscribe to XYZ News Magazine and Emails

Interested in receiving daily small updates of all latest News? Well, now you can. And best of all, it is free! Just fill out this form and submit it by clicking the "send it In" button. We will put you on our mailing list and you will receive your first email in 3-5 days.

Please fill the following boxes to help us send the emails and our news letter:
First Name:
Last Name:
Business:
We must have a correct e-mail address to send you the news letter:
Email:
How did you hear about XYZ News Magazine and Emails?
◉ Here on the Web ○ In a magazine ○ Television ○ Other
Would you like to be on our regular mailing list?
☑ Yes, we love junk emails

Reset Send it in!

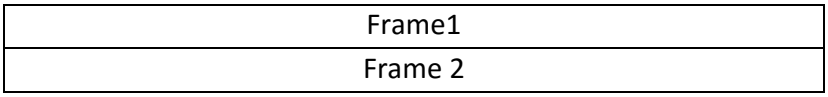
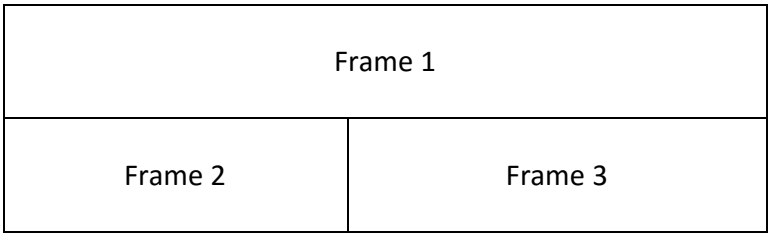
Q.7 Create HTML documents (having multiple frames) in the following three formats:





SEC-2: Multimedia Applications **Credits 02**

SEC2T: Multimedia Applications **Credits 01**

Course Contents:

Multimedia: Introduction to multimedia, Components, Uses of multimedia.

Making Multimedia: Stages of a multimedia project, Requirements to make good multimedia, Multimedia Hardware - Macintosh and Windows production Platforms, Hardware peripherals - Connections, Memory and storage devices, Multimedia software and Authoring tools.

Text: Fonts & Faces, Using Text in Multimedia, Font Editing & Design Tools, Hypermedia &Hypertext.

Images: Still Images – Bitmaps, Vector Drawing, 3D Drawing & rendering, Natural Light & Colors, Computerized Colors, Color Palletes, Image File Formats.

Sound: Digital Audio, MIDI Audio, MIDI vs Digital Audio, Audio File Formats.

Video: How Video Works, Analog Video, Digital Video, Video File Formats, Video Shooting and Editing.

Animation: Principle of Animations. Animation Techniques, Animation File Formats.

Suggested Readings:

1. Tay Vaughan, “Multimedia: Making it work”, TMH, Eighth edition. 2006
2. Ralf Steinmetz and Klara Naharstedt, “Multimedia: Computing, Communications Applications”, Pearson,1995.
3. Keyes, “Multimedia Handbook”, TMH. 2000.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

4. K. Andleigh and K. Thakkar, “Multimedia System Design”, PHI,2000

SEC2P: Multimedia Applications (Lab) **Credits 01**

Software Lab Based on Multimedia (FLASH as a multimedia S/W):

Practical exercises based on concepts listed in theory using Flash.
FLASH: Concept of Frame, Key frames, Frame rate, Timeline, Tween, Layers, Symbols, Embedding audio/video and embedding on the web page

1. Draw an animation to show a bouncing ball.
2. Draw an animation to show a moving stick man.
3. Draw an animation to show a fainting banana.
4. Draw an animation to show sunrise and sunset.
5. Draw an animation to show a disappearing house.
6. Draw an animation to show two boats sailing in river
7. Draw an animation to show a scene of cricket match.
8. Draw an animation to help teach a poem or a song
9. Draw an animation to show cartoon with a message
10. Make a movie showing Shape Tweening.
11. Make a movie showing Motion Tweening.
12. Add sound and button to the movie.

Or

SEC-2: PHP Programming **Credits 02**

SEC2T: PHP Programming **Credits 01**

Course Contents:

Introduction to PHP:

- PHP introduction, inventions and versions, important tools and software requirements (like Web Server, Database, Editors etc.)
- PHP with other technologies, scope of PHP
- Basic Syntax, PHP variables and constants
- Types of data in PHP , Expressions, scopes of a variable (local, global)
- PHP Operators : Arithmetic, Assignment, Relational , Logical operators, Bitwise , ternary and MOD operator.
- PHP operator Precedence and associativity

Handling HTML form with PHP:

- Capturing Form Data

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

- GET and POST form methods
- Dealing with multi value fields
- Redirecting a form after submission

PHP conditional events and Loops:

- PHP IF Else conditional statements (Nested IF and Else)
- Switch case, while ,For and Do While Loop
- Goto , Break ,Continue and exit

PHP Functions:

- Function, Need of Function , declaration and calling of a function
- PHP Function with arguments, Default Arguments in Function
- Function argument with call by value, call by reference
- Scope of Function Global and Local

String Manipulation and Regular Expression:

- Creating and accessing String , Searching & Replacing String
- Formatting, joining and splitting String , String Related Library functions
- Use and advantage of regular expression over inbuilt function
- Use of preg_match(), preg_replace(), preg_split() functions in regular expression

Array:

- Anatomy of an Array ,Creating index based and Associative array ,Accessing array
- Looping with Index based array, with associative array using each() and foreach()
- Some useful Library function

SEC2P: PHP Programming (Lab) **Credits 01**

Software Lab Based on PHP:

1. Create a PHP page using functions for comparing three integers and print the largest number.
2. Write a function to calculate the factorial of a number (non-negative integer). The function accept the number as an argument.
3. WAP to check whether the given number is prime or not.
4. Create a PHP page which accepts string from user. After submission that page displays the reverse of provided string.
5. Write a PHP function that checks if a string is all lower case.
6. Write a PHP script that checks whether a passed string is palindrome or not? (A palindrome is word, phrase, or sequence that reads the same backward as forward, e.g., madam or nurses run)
7. WAP to sort an array.
8. Write a PHP script that removes the whitespaces from a string.
   Sample string : 'The quick " " brown fox'
   Expected Output : Thequick""brownfox

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

9. Write a PHP script that finds out the sum of first n odd numbers.
10. Create a login page having user name and password. On clicking submit, a welcome message should be displayed if the user is already registered (i.e.name is present in the database) otherwise error message should be displayed.
11. Write a PHP script that checks if a string contains another string.
12. Create a simple 'birthday countdown' script, the script will count the number of days between current day and birth day.

13. Create a script to construct the following pattern, using nested for loop.

```
*
* *
* * *
* * * *
* * * * *
```

14. Write a simple PHP program to check that emails are valid.
15. WAP to print first n even numbers.
16. $color = array('white', 'green', 'red")

Write a PHP script which will display the colors in the following way :
Output :
white, green, red,

- green
- red
- white

17. Using switch case and dropdown list display a “Hello” message depending on the language selected in drop down list.
18. Write a PHP program to print Fibonacci series using recursion.
19. Write a PHP script to replace the first 'the' of the following string with 'That'.

Sample : 'the quick brown fox jumps over the lazy dog.'
Expected Result : That quick brown fox jumps over the lazy dog.

Or

SEC-2: Programming with VB/GAMBAS **Credits 02**

SEC2T: Programming with VB/GAMBAS **Credits 01**

`Course Contents:

GUI Environment: Introduction to graphical user interface (GUI), programming language (procedural, object oriented, event driven), the GUI environment, compiling, debugging, and running the programs.

Controls : Introduction to controls textboxes, frames, check boxes, option buttons, images, setting borders and styles, the shape control, the line control, working with multiple controls and their

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

properties, designing the user interface, keyboard access, tab controls, default & cancel property, coding for controls.

Operations: Data types, constants, named & intrinsic, declaring variables, scope of variables, val function, arithmetic operations, formatting data.

Decision Making : If statement, comparing strings, compound conditions (and, or, not), nested if statements, case structure, using if statements with option buttons & check boxes, displaying message in message box, testing whether input is valid or not**.**

Forms Handling : Multiple forms creating, adding, removing forms in project, hide, show method, load, unload statement, me keyword, referring to objects on a different forms.

Iteration Handling: Do/loops, for/next loops, using msgbox function, using string function.

Suggested Readings:

a. Programming in Visual Basic 6.0 by Julia Case Bradley, Anita C. Millispangh (Tata Mcgraw Hill Edition 2000 (Fourteenth Reprint 2004)

SEC2P: Programming with VB/GAMBAS (Lab) **Credits 01**

Software Lab Based on Visual Basic:

Practical exercises based on concepts listed in theory using VB.

1. Write a VB application to compute the sum of two variables.
2. Write a VB application to compute the factorial of a number n.
3. Write a VB application to compute the Fibonacci series of a number n.
4. Write a VB application to compute the series of prime numbers till number n.
5. Write a VB application to compute the maximum of three numbers.
6. Write a VB application to compute the sum of odd numbers and even numbers in an array of n integers.
7. Write a VB application to compare the strings.
8. Write a VB application to make a calculator.
9. Write a VB application to choose your hobbies from a list.
10. Write a VB application to illustrate the use of color radio button.
11. Write a VB application to illustrate the use of color scroll bar form.
12. Write a VB application to illustrate the use of color scroll bar label text.
13. Write a VB application to illustrate the use of color text box.
14. Write a VB application to show a timer.

SEC-3: Programming with Matlab **Credits 02**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

SEC3T: Programming with Matlab

Course Contents:

MATLAB Basics

The MATLAB environment - Basic computer programming - Variables and constants, operators and simple calculations - Formulas and functions - MATLAB toolboxes

Matrices and vectors

Matrix and linear algebra review - Vectors and matrices in MATLAB - Matrix operations and functions in MATLAB

Computer programming

Algorithms and structures - MATLAB scripts and functions (m-files) - Simple sequential algorithms - Control structures

MATLAB programming and Numerical Simulations

Matlab Programming. Reading and writing data, file handling - Personalized functions - Toolbox structure - MATLAB graphic functions. Numerical simulations. Numerical methods and simulations - Random number generation – Monte carlo methods

Suggested Readings:

1. Hanselman Mastering Matlab, Pearson
2. Rudrapratap Matlab, Oxford
3. Bansal , Matlab, Pearson
4. Navas Lab Primer through Matlab, PHI

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Or

SEC-3: Concepts of Software Testing **Credits 02**

SEC3T: Concepts of Software Testing **Credits 01**

Course Contents:

Introduction
Strategic Approach to Software Testing, Test Strategies for Conventional Software, Validation Testing, System Testing, Basic Terminologies, V Shaped Software Lifecycle Model

Functional Testing\ Black-box Testing
Boundary Value Analysis, Equivalence Class Testing, Decision Table Based Testing

Structural Testing\ White-box Testing
Basis Path Testing: Program Graph, DD Path graph, Cyclomatic Complexity, Graph Matrices, Control Flow Testing: Statement Coverage, Branch Coverage, Condition Coverage, Path Coverage

Suggested Readings:

1. Roger S. Pressman, Software Engineering: A Practitioner's Approach, Seventh Edition, Mc Graw Hill Education.2009.
2. Yogesh Singh, Software Testing, Cambridge University Press,2011.

SEC3P: Concepts of Software Testing (Lab) **Credits 01**

Computer Lab Based on Software Testing:

1. Write a program that takes three inputs (a, b &c) that represent the sides of a triangle, and the output is one of the below four:
    a. Not a triangle
    b. Scalene triangle
    c. Isosceles triangle
    d. Equilateral triangle

1.1 Generate test cases using Boundary Value Analysis, Equivalence Class Partitioning and Decision Table Testing.
1.2 Generate test cases using Basis path testing.
1.3 Run code coverage tool.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

2. Write a program that determines the nature of roots of a quadratic equation. Output should be one of the following:-

   • Not a quadratic equation.

   • Complex roots

   • Real roots

   • Single roots

   I. Generate test cases using Boundary Value Analysis, Equivalence Class Partitioning and Decision Table Testing.

   II. Generate test cases using Basis path testing.

   III. Run code coverage tool

3. Write a program that checks whether the number is even or odd. Run code coverage tool and find the amount of code being covered.

4. Write a program that dynamically allocates memory to10 integers using malloc() or calloc() and

   • donot free memory leading to memory leaks. Verify the same usingValgrind.

   • Now, free memory using free () at the end of the program to avoid memory leaks. Verify the same using Valgrind.

5. Use Load UI load testing tool to test the web application performance.

SEC-4: R-Programming **Credits 02**

SEC4T: R-Programming **Credits 01**

Course Contents:

Introduction: Overview and History of R, Getting Help, Data Types, Subsetting, Vectorized Operations, Reading and Writing Data.

Control Structures, Functions, lapply, tapply, split, mapply, apply, Coding Standards.

Scoping Rules, Debugging Tools, Simulation, R Profiler.

Suggested Readings:

W. N. Venables, D. M. Smith, An Introduction to R, R-core team,2015

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

SEC4P: R-Programming (Lab) `Credits 01

Software Lab Based on R Programming:

1. Write a program that prints 'Hello World' to the screen.
2. Write a program that asks the user for a number n and prints the sum of the numbers 1 to n
3. Write a program that prints a multiplication table for numbers up to 12.
4. Write a function that returns the largest element in a list.
5. Write a function that computes the running total of a list.
6. Write a function that tests whether a string is a palindrome.
7. Implement the following sorting algorithms: Selection sort, Insertion sort, Bubble Sort
8. Implement linear search.
9. Implement binary search.
10. Implement matrices addition , subtraction and Multiplication

Or

SEC-4: Android Programming Credits 02

SEC4T: Android Programming Credits 01

Course Contents:

Introduction: History of Android, Introduction to Android Operating Systems, Android Development Tools, Android Architecture.

Overview of object oriented programming using Java: OOPs Concepts: Inheritance, Polymorphism, Interfaces, Abstract class, Threads, Overloading and Overriding, Java Virtual Machine.

Development Tools: Installing and using Eclipse with ADT plug-in, Installing Virtual machine for Android sandwich/Jelly bean (Emulator), configuring the installed tools, creating a android project – Hello Word, run on emulator, Deploy it on USB-connected Android device.

User Interface Architecture: Application context, intents, Activity life cycle, multiple screen sizes.

User Interface Design: Form widgets, Text Fields, Layouts, Button control, toggle buttons, Spinners (Combo boxes), Images, Menu, and Dialog.

Database: Understanding of SQLite database, connecting with the database.

Suggested Readings:

1. Android application development for java programmers. By James C. Sheusi. Publisher: Cengage Learning, 2013.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Online Reading / Supporting Material:

1. http://www.developer.android.com
2. http://developer.android.com/about/versions/index.html
3. http://developer.android.com/training/basics/firstapp/index.html
4. http://docs.oracle.com/javase/tutorial/index.htm (Available in the form of free downloadable ebooks also).
5. http://developer.android.com/guide/components/activities.html
6. http://developer.android.com/guide/components/fundamentals.html
7. http://developer.android.com/guide/components/intents-filters.html.
8. http://developer.android.com/training/multiscreen/screensizes.html
9. http://developer.android.com/guide/topics/ui/controls.html
10. http://developer.android.com/guide/topics/ui/declaring-layout.html
11. http://developer.android.com/training/basics/data-storage/databases.html

SEC4P: Android Programming (Lab) **Credits 01**

Software Lab Based on Android Programming:

1. Create “Hello World” application. That will display “Hello World” in the middle of the screen in the emulator. Also display “Hello World” in the middle of the screen in the Android Phone.

2. Create an application with login module. (Check username and password).

3. Create spinner with strings taken from resource folder (res >> value folder) and on changing the spinner value, Image will change.

4. Create a menu with 5 options and selected option should appear in text box.

5. Create a list of all courses in your college and on selecting a particular course teacher-in-charge of that course should appear at the bottom of the screen.

6. Create an application with three option buttons, on selecting a button colour of the screen will change.

7. Create and Login application as above. On successful login, pop up the message.

8. Create an application to Create, Insert, update, Delete and retrieve operation on the database.

Or

SEC-4: XML Programming **Credits 02**

SEC4T: XML Programming **Credits 01**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

Course Contents:

Introduction:
Understanding Mark-up Languages, Introduction to XML and its Goals.

XML Basics:
XML Structure and Syntax, Document classes and Rules.

Other XML Concepts:
Scripting XML, XML as Data, Linking with XML.

XML with Style:
XSL –Style Sheet Basics, XSL basics, XSL style sheets.

Suggested Readings:

1. XML in action web technology by William J. Pardi

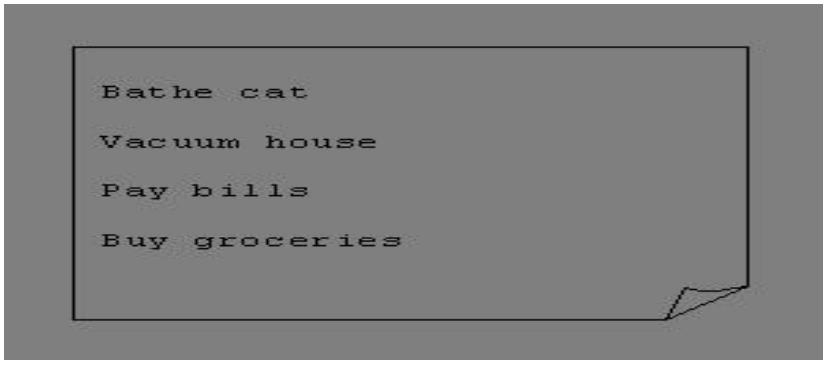
2. Step by Step XML by Michael J. Young

SEC4P: Software Lab Based on XML **Credits 02**

Exercise #1 – Information Structure
In this exercise, student will practice identifying the structure of an information object. For the sample document provided below:

Label the information structures you see, including containing structures.

1. Draw a tree representation of the structure.



Exercise 2# Deconstructing an XML Document

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

In this exercise, student will practice identifying the explicit structure within an XML document. In a sense, this is the reverse of what you did in Exercise #1. For the sample XML markup below, create a document-like representation (or a simple drawing) for the content contained within the XML tags:

<book>
<coverInfo>
<title>The XML Handbook</title>
<author>Charles F. Goldfarb</author>
<author>Paul Prescod</author>
<edition>Second</edition

<description>The definitive XML resource: applications, products, and technologies. Revised and expanded—over 600 new pages.

</description>
</coverInfo>
</book>

Exercise #3 – Creating XML Markup

In this exercise, create some XML markup based on the tree representation from Exercise #1 above, and the content from the original sample document.

Exercise #4 – Well-Formedness

This exercise checks your understanding of the constraints for well-formedness. Are the following document instances well-formed? Explain any NO answers.

<list><title>The first list</title><item>An item</list>
<item>An item</item><item>Another item</item>
<para>Bathing a cat is a <emph>relatively</emph> easy task as long as the cat is willing.</para>
<bibl><title>How to Bathe a Cat<author></title>Merlin Bauer<author></bibl>

Exercise #5-Well Formedness

This exercise is a bit more challenging than the previous example. Here is a fragment of an XML document instance. Identify all the places where it fails to match the constraints for well-formedness.

<PROCEDURE><TITLEHow to Bathe a Cat</TITLE>
<OVERVIEW>

This procedure tells you how to bathe a cat. <WARNING></OVERVIEW>Cats don't like to take baths. You could get hurt doing this. Be sure to obtain all the required protective gear before you start. </WARNING><EQUIPEMENT><ITEM>Hockey Mask <ITEM>Padded Full-body Kevlar Armor</ITEM><ITEM>Tub full of warm water</ITEM><ITEM>Towels </ITEM><ITEM>First Aid kit</ITEM><ITEM>Cat Shampoo</ITEM> <EQUIPMENT><INSTRUCTIONS> <STEP> Locate the cat, who by now is hiding under the bed.</STEP><STEP>Place the cat in the tub of water.</STEP> <ITEM>Using the First Aid kit, repair the damage to your head and arms.</STEP> <STEP>Place the cat

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Computer_Science_General.pdf

back in the tub and hold it down.</STEP> <STEP>Wash it really fast, then make an effort to dry it with the towels.</STEP> <STEP>Decide not to do this again. </STEP> </INSTRUCTIONS>

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:58:59; Copyright : Vidyasagar University

Semester -1

Core Courses-1

CC-1: Non-Chordates I — Credits 06

C1T1 –Non-Chordates I — Credits 04

Non-Chordates I		
	4 Credits	**Class**
Unit 1: Basics of Animal Classification		4
Definitions: Classification, Systematics and Taxonomy; Taxonomic Hierarchy, Taxonomic types Codes of Zoological Nomenclature; Principle of priority; Synonymy and Homonymy; Six kingdom concept of classification (Card woese)		
Unit 2: Protista and Metazoa		15
Protozoa General characteristics and Classification up to phylum (according to Levine et. al., 1981) Locomotion in *Euglena*, *Paramoecium* and *Amoeba*; Conjugation in *Paramoecium*. Life cycle and pathogenicity of *Plasmodium vivax* and *Entamoeba histolytica* **Metazoa** Evolution of symmetry and segmentation of Metazoa		

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Unit 3: Porifera	6
General characteristics and Classification up to classes; Canal system and spicules in sponges	
Unit 4: Cnidaria	10
General characteristics and Classification up to classes Metagenesis in *Obelia* & *Aurelia* Metagenesis in *Obelia* Polymorphism in Cnidaria Corals and coral reef diversity, function & conservation	
Unit 5: Ctenophora	2
General characteristics	
Unit 6: Platyhelminthes	6
General characteristics and Classification up to classes Life cycle and pathogenicity and control measures of *Fasciola hepatica* and *Taenia solium*	
Unit 7: Nematoda	7
General characteristics and Classification up to classes Life cycle, and pathogenicity and control measures of *Ascaris lumbricoides* and *Wuchereria bancrofti* Parasitic adaptations in helminthes	
Reference Books

- Invertebrates by Brusca & Brusca. Second edition, 2002.

Classification for metazoans to be followed from: Rupert and Barnes, 1994, 6th Edition.

C1 P1 –Non-Chordates I Lab — Credits 02

List of Practical

1. Study of whole mount of *Euglena*, *Amoeba* and *Paramoecium*
2. Identification of *Amoeba*, *Euglena*, *Entamoeba*, *Opalina*, *Paramecium*, *Plasmodium vivax* and *Plasmodium falciparum* (from the prepared slides)
3. Identification of *Sycon*, Neptune's Cup, *Obelia*, *Physalia*, *Millepora*, *Aurelia*, *Tubipora*, *Corallium*, *Alcyonium*, *Gorgonia*, *Metridium*, *Pennatula*, *Fungia*, *Meandrina*, *Madrepora*
4. Identification and significance of adult *Fasciola hepatica*, *Taenia solium* and *Ascaris lumbricoides*
5. Staining/mounting of any protozoa/helminth from gut of cockroach

Core -2

CC-2: Ecology — Credits 06

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

C2 T2 –Ecology Credits 04

Ecology		
	4 Credits	**Class**
Unit 1: Introduction to Ecology		4
History of ecology, Autecology and synecology, Levels of organization, Laws of limiting factors,Study of Physical factors, The Biosphere.		
Unit 2: Population		20
Unitary and Modular populations Unique and group attributes of population: Demographic factors, life tables, fecundity tables, survivorship curves, dispersal and dispersion. Geometric, exponential and logistic growth, equation and patterns, r and K strategies Population regulation - density-dependent and independent factors Population Interactions, Gause's Principle with laboratory and field examples, Lotka-Volterra equation for competition.		
Unit 3: Community		11
Community characteristics: species diversity, abundance, , dominance, richness, Vertical stratification, Ecotone and edge effect. Ecological succession with one example		
Unit 4: Ecosystem		10
Types of ecosystem with an example in detail, Food chain: Detritus and grazing food chains,		

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Linear and Y-shaped food chains, Food web, Energy flow through the ecosystem, Ecological pyramids and Ecological efficiencies Nutrient and biogeochemical cycle with an example of Nitrogen cycle Human modified ecosystem	
Unit 5: Applied Ecology	5
Wildlife Conservation (in-situ and ex-situ conservation). Management strategies for tiger conservation; Wild life protection act (1972)	

Reference Books

C2 P2 –Ecology Lab Credits 02

List of Practical

1. Study of life tables and plotting of survivorship curves of different types from the hypothetical/real data provided

2. Determination of population density in a natural/hypothetical community by quadrate method and calculation of Shannon-Weiner diversity index for the same community

3. Study of an aquatic ecosystem: Phytoplankton and zooplankton, Measurement of area, temperature,

   turbidity/penetration of light, determination of pH, and Dissolved Oxygen content (Winkler's method), Chemical Oxygen Demand and free CO_2

4. Report on a visit to National Park/Biodiversity Park/Wild life sanctuary

Note: In field report costal area to be included.

Generic Elective Syllabus

GE-1 [Interdisciplinary for other department]

GE-1 -Animal Cell Biotechnology Credits 06

GE-1 T1 -Animal Cell Biotechnology Credits 04

Animal Cell Biotechnology		
	4 Credits	**Class**
Unit 1: Introduction		2
Concept and Scope of Biotechnology		
Unit 2: Techniques in Gene manipulation		15
Recombinant DNA technology, Isolation of genes, Concept of restriction and modification: Restriction endonucleases, DNA modifying enzymes Cloning Vectors: Plasmids, Phage vectors, Cosmids, Phagemids, BAC, YAC, and HAC. Shuttle and Expression Vectors. Construction of Genomic libraries and cDNA libraries Transformation techniques: microbial, plants and animals: Cloning in mammalian cells, Integration of DNA into mammalian genome- Electroporation and Calcium Phosphate Precipitation method.		
Unit 3: Animal cell Culture		9
Basic techniques in animal cell culture and organ culture, Primary Culture and Cell lines,		

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Culture

media- Natural and Synthetic, Stem cells, Cryopreservation of cultures.

Agarose and Polyacrylamide Gel Electrophoresis, Southern, Northern and Western blotting, DNA

sequencing: Sanger method, Polymerase chain reaction, DNA Fingerprinting and DNA microarrays.

Unit 4: Fermentation 8

Different types of Fermentation: Submerged & Solid state; batch, Fed batch & Continuous; Stirred

tank, Air Lift, Fixed Bed and Fluidized.

Downstream Processing: Filtration, centrifugation, extraction, chromatography, spray drying and

lyophilization.

Unit 5: Transgenic Animal Technology 6

Production of transgenic animals: nuclear transplantation, Retroviral method, DNA microinjection

method, Dolly and Polly.

Unit 6: Application in Health 6

Development of recombinant Vaccines, Hybridoma technology, Gene Therapy. Production of

recombinant Proteins: Insulin and growth hormones.

Unit 7: Bio safety Physical and Biological containment 4

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University

GE-1 P1 –Animal Cell Biotechnology Lab Credits 02

List of Practical

1. Packing and sterilization of glass and plastic wares for cell culture.
2. Preparation of culture media.
3. Preparation of genomic DNA from E. coli/animals/ human.
4. Plasmid DNA isolation (p UC 18/19) and DNA quantitation using agarose gel electrophoresis (by using lambda DNA as standard).
5. Restriction digestion of lambda (λ) DNA using EcoR1 and Hind III.
6. Preparation of competent cells and Transformation of E. coli with plasmid DNA using CaCl2, Selection of transformants on X-gal and IPTG (Optional).
7. Techniques: Western Blot, Southern Hybridization, DNA Fingerprinting, PCR, DNA Microarrays

Note: Classification to be followed from Rupert and Barnes, 1994, 6th Edition.

C3 P – Non-Chordates II Credits 02

List of Practical

1. Study of following specimens:
    a. Annelids - *Aphrodite, Nereis, Heteronereis, Sabella, Serpula, Chaetopterus, Pheretima, Hirudinaria*
    b. Arthropods - *Limulus, Palamnaeus, Palaemon, Daphnia, Balanus, Sacculina, Cancer, Eupagurus, Scolopendra, Julus, Bombyx, Periplaneta*, termites and honey bees *Onychophora - Peripatus*
    c. Molluscs - *Chiton, Dentalium, Pila, Doris, Helix, Unio, Ostrea, Pinctada, Sepia, Octopus, Nautilus*
    d. Echinodermates - *Pentaceros/Asterias, Ophiura, Clypeaster, Echinus, Cucumaria* and
    e. Antedon
2. Study of digestive system, septal nephridia and pharyngeal nephridia of earthworm
3. T.S. through pharynx, gizzard, and typhlosolar intestine of earthworm
4. Mount of mouth parts and dissection of digestive system and nervous system of *Periplaneta**
5. To submit a Project Report on any related topic to larval forms (crustacean, mollusc and echinoderm)

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University

Core-4

CC-4 : Cell Biology — Credits 06

C4 T: Cell Biology — Credits 04

C4 T - Cell Biology

4 Credits — **Class**

Unit 1: Overview of Cells — 2

Basic structure of Prokaryotic and Eukaryotic cells, Viruses, Viroid, Prion and Mycoplasma

Unit 2: Plasma Membrane — 6

Ultra structure and composition of Plasma membrane: Fluid mosaic model

Transport across membrane: Active and Passive transport, Facilitated transport

Cell junctions: Tight junctions, Gap junctions, Desmosomes

Unit 3: Cytoplasmic organelles I — 5

Structure and Functions: Endoplasmic Reticulum, Golgi Apparatus, Lysosomes

Protein sorting and mechanisms of vesicular transport

Unit 4: Cytoplasmic organelles II — 6

Mitochondria: Structure, Semi-autonomous nature, Endosymbiotic hypothesis
Mitochondrial Respiratory Chain, Chemi-osmotic hypothesis
Peroxisomes: Structure and Functions

Centrosome: Structure and Functions

Unit 5: Cytoskeleton — 5

Type, structure and functions of cytoskeleton

Accessory proteins of microfilament & microtubule

A brief idea about molecular motors

Unit 6: Nucleus — 8

Structure of Nucleus: Nuclear envelope, Nuclear pore complex, Nucleolus

Chromatin: Euchromatin and Hetrochromatin and packaging (nucleosome)

Unit 7: Cell Division — 10

Cell cycle and its regulation, Cancer (Concept of oncogenes and tumor suppressor genes with special reference to p53, Retinoblastoma and Ras and APC. Mitosis and Meiosis: Basic process and their significance

Unit 8: Cell Signaling — 8

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Cell signalling transduction pathways; Types of signaling molecules and receptors
GPCR and Role of second messenger (cAMP)
Extracellular matrix-Cell interactions
Apoptosis and Necrosis

C4P–Cell Biology (Lab) Credits 02

Cell Biology

List of Practical

1. Preparation of temporary stained squash of onion root tip to study various stages of mitosis
2. Study of various stages of meiosis.
3. Preparation of permanent slide to show the presence of Barr body in human female blood cells/cheek cells.
4. Preparation of permanent slide to demonstrate:

    a. DNA by Feulgen reaction
    b. Cell viability study by Trypan Blue staining
    c. Mitochondria identification through vital staining

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University

Generic Elective Syllabus

GE-2 [Interdisciplinary for other department]

GE-2 :Animal Diversity — Credits 06

GE2 T:Animal Diversity — Credits 04

GE2 T-Animal Diversity

	4 Credits	Class
Unit 1: Protista		**3**
Protozoa : General characters of Protozoa; Life cycle of *Plasmodium*		
Unit 2: Porifera		3
General characters and canal system in Porifera		
Unit 3: Radiata		3
General characters of Cnidarians and polymorphism		
Unit 4: Aceolomates		2
General characters of Helminthes		
Unit 5: Pseudocoelomates		3
General characters of Nematoda Parasitic adaptations		
Unit 6: Annelida		3
General characters of Annelida Metamerism		
Unit 7: Arthropoda		4
General characters. Social life in insects.		
Unit 8: Mollusca		4
General characters of mollusk. Pearl Formation		
Unit 9: Echynodermata		4
General characters of Echinodermata. Water Vascular system in Starfish.		

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Unit 10: Protochordata 2

Salient features

Unit 11: Pisces 3

General Characters.
Osmoregulation, Migration of Fish

Unit 12: Amphibia 4

General characters, Adaptations for terrestrial life, Parental care

Unit 13: Reptilia 4

General Characters.
Amniotes; Origin of reptiles. Terrestrial adaptations in reptiles.

Unit 14: Aves 4

General Characters.
The origin of birds; Flight adaptations

Unit 15: Mammalia 4

General Characters.
Early evolution of mammals; Primates; Dentition in mammals.

GE2 P –Animal Diversity Lab Credits 02

List of Practical

1. Study of following specimens:

    a. Non Chordates: *Euglena*, *Noctiluca*, *Paramecium*, *Sycon*, , *Physalia*, *Tubipora*, *Metridium*, *Taenia*, *Ascaris*, *Nereis*, *Aphrodite*, Leech, *Peripatus*, *Limulus*, Hermitcrab, *Daphnia*, Millipede, Centipede, Beetle, *Chiton*, *Dentalium*, *Octopus*, *Asterias*, and *Antedon*.

    b. Chordates: *Balanoglossus*, *Amphioxus*, *Petromyzon*, *Pristis*, *Hippocampus*, *Labeo*, *Icthyophis*/*Uraeotyphlus*, Salamander, *Rhacophorus*, *Draco*, *Uromastix*, *Naja*, *Viper*, model of Archaeopteryx, any three common birds-(Crow, duck, Owl), Squirrel and Bat.

2. Study of following Permanent Slides:

    Cross section of *Sycon*, Sea anemone and *Ascaris* (male and female). T. S. of Earthworm passing through pharynx, gizzard, and typhlosolar intestine. Bipinnaria and Pluteus larva.

3. Temporary mounts of:

    a. Septal & pharyngeal nephridia of earthworm.

    b. Unstained mounts of Placoid, cycloid and ctenoid scales.

4. Dissections of:

    a. Digestive and nervous system of Cockroach

    b. Urinogenital system of Rat

Vidyasagar University

Curriculum for B.Sc (Honours) in Zoology
[Choice Based Credit System]

Semester-III

Course	Course Code	Name of the Subjects	Course Type/ Nature	Teaching Scheme in hour per week			Credit	Marks
				L	T	P		
CC-5		**C5T:**Chordates	Core Course - 5	4	0	0	6	75
		C5P: Chordates Lab		0	0	4		
CC-6		**C6T:**Animal Physiology: Controlling & Coordinating Systems	Core Course - 6	4	0	0	6	75
		C6P: Animal Physiology: Controlling & Coordinating Systems Lab		0	0	4		
CC-7		**C7T:**Fundamentals of Biochemistry	Core Course - 7	4	0	0	6	75
		C7P: Fundamentals of Biochemistry Lab		0	0	4		
GE-3	TBD		Generic Elective -3				4/5	75
							2/1	
SEC-1		**SEC-1:**Apiculture Or **SEC-1:**Aquarium Fish Keeping	Skill Enhancement Course-1	1	1	0	2	50
Semester Total							**26**	**350**

L=Lecture, **T=** Tutorial, **P=**Practical, **CC =** Core Course, **GE**= Generic Elective, **SEC** = Skill Enhancement Course, **TBD =** to be decided

Generic Elective (GE) (Interdisciplinary) from other Department [**Four papers are to be taken and each paper will be of 6 credits**]:

Papers are to be taken from any of the following discipline:

Chemistry /Botany/Physiology/Computer Sc./Microbiology /Bio Technology/ Geology /Nutrition /Aquaculture Management.

Modalities of selection of Generic Electives (GE): A student shall have to choose **04** Generic Elective (GE1 to GE4) strictly from **02** subjects / disciplines of choice taking exactly **02** courses from each subjects of disciplines. Such a student shall have to study the curriculum of Generic Elective (GE) of a subject or discipline specified for the relevant semester.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University

Semester- III
Core Course (CC)

CC-5: Chordates **Credits 06**

C5T: Chordates **Credits 04**

Unit 1: Introduction to Chordates
General characteristics and outline classification of Phylum Chordata

Unit 2: Protochordata
General characteristics and classification of sub-phylum Urochordata and Cephalochordata up to Classes. Retrogressive metamorphosis in *Ascidia*. Chordate Features and Feeding in *Branchiostoma*

Unit 3: Origin of Chordata
Dipleurula concept and the Echinoderm theory of origin of chordates
Advanced features of vertebrates over Protochordata

Unit 4: Agnatha
General characteristics and classification of cyclostomes up to order

Unit 5: Pisces
General characteristics and classification of Chondrichthyes and Osteichthyes up to Subclasses
Accessory respiratory organ, migration and parental care in fishes
Swim bladder in fishes. Classification up to Sub-Classes

Unit 6: Amphibia
General characteristics and classification up to living Orders.
Metamorphosis and parental care in Amphibia

Unit 7: Reptilia
General characteristics and classification up to living Orders.
Poison apparatus and Biting mechanism in Snake

Unit 8: Aves
General characteristics and classification up to Sub-Classes
Exoskeleton and migration in Birds
Principles and aerodynamics of flight

Unit 9: Mammals
General characters and classification up to living orders
Affinities of Prototheria
Exoskeleton derivatives of mammals
Adaptive radiation in mammals with reference to locomotory appendages
Echolocation in Micro chiropterans and Cetaceans

Unit 10: Zoogeography

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Zoogeographical realms, Plate tectonic and Continental drift theory, distribution of birds and mammals in different realms

Suggested Readings :

1. Young, J. Z. (2004). The Life of Vertebrates. III Edition. Oxford university press.
2. Pough H. Vertebrate life, VIII Edition, Pearson International.
3. Darlington P.J. The Geographical Distribution of Animals, R.E. Krieger Pub Co.
4. Hall B.K. and Hallgrimsson B. (2008). Strickberger's Evolution. IV Edition. Jones and Bartlett Publishers Inc.
5. Parker, T. J. &Haswell, W. (1972). Text Book of Zoology, Volume II: Marshall and Willam (Eds.) 7th Ed. Macmillan Press, London.
6. Kardong, K. V. (2002). Vertebrates: Comparative anatomy, function evolution. Tata McGraw Hill.
7. Kent, G. C. & Carr, R. K. (2001). Comparative anatomy of the Vertebrates. 9th Ed. McGraw Hill.
8. Nelson, J.S., (2006) : Fishes of the World, 4th Edn., Wiley.
9. Romer, A. S. & Parsons, T. S. (1986). The vertebrate body. 6th Ed. Saunders College Publishing.
10. Jordan, E.L. &Verma, P.S. (2003). Chordate Zoology. S. Chand & Company Ltd. New Delhi.
11. Sinha, K. S., Adhikari, S., Ganguly, B. B. & Bharati Goswami, B. D. (2001). Biology of Animals. Vol. II. New Central Book Agency (p) Ltd.
12. Futuyama, D. (1997). Evolutionary Biology. 3rd Ed. Sinauer Associates, INC.

Note: Classifications for Protochordata, Agnatha, Reptilia, Aves and Mammalia to be followed from Young (1981), for Pisces to be followed from Romer (1959), for Amphibia to be followed from Duellman and Trueb (1986).

CP5: Chordates Lab **Credits 02**

List of Practical

1. Protochordata
   Balanoglossus, Herdmania, Branchiostoma
2. Agnatha
   Petromyzon, Myxine
3. Fishes
   Scoliodon, Sphyrna, Pristis, Torpedo, Chimaera, Mystus, Heteropneustes, Labeo, Exocoetus, Echeneis, Anguilla, Hippocampus, Tetrodon/ Diodon, Anabas, Flat fish
4. Amphibia
   Necturus, Bufo, Hyla, Alytes, Axolotl, Tylototriton
5. Reptilia
   Chelone, Trionyx, Hemidactylus, Varanus, Uromastix, Chamaeleon, Ophiosaurus, Draco, Bungarus, Vipera, Naja, Hydrophis, Zamenis, Crocodylus. Key for Identification of poisonous and non-poisonous snakes
6. Mammalia: Bat (Insectivorous and Frugivorous), *Funambulus*
7. Pecten from Fowl head
8. Dissection of brain and pituitary of Tilapia

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

9. Power point presentation on study of any two animals from two different classes by students (may be included if dissections not given permission)

CC-6: Animal Physiology: Controlling & Coordinating Systems Credits 06

C6T: Animal Physiology: Controlling & Coordinating Systems Credits 04

Unit 1: Tissues
Structure, location, classification and functions of epithelial tissue, connective tissue, muscular tissue and nervous tissue and, fixation and staining of tissues.

Unit 2: Bone and Cartilage
Structure and types of bones and cartilages, Ossification

Unit 3: Nervous System
Structure of neuron, resting membrane potential, Origin of action potential and its propagation across the myelinated and unmyelinated nerve fibers; Types of synapse, Synaptic transmission and Neuromuscular junction; Reflex action and its types

Unit 4: Muscular system
Histology of different types of muscle; Ultra structure of skeletal muscle; Molecular and chemical basis of muscle contraction; Characteristics of muscle fibre

Unit 5: Reproductive System
Histology of testis and ovary
Physiology of Reproduction

Unit 6: Endocrine System
Histology and function of pituitary, thyroid, pancreas and adrenal
Classification of hormones; Mechanism of Hormone action
Signal transduction pathways for Steroidal and Non steroidal hormones
Hypothalamus (neuroendocrine gland) - principal nuclei involved in neuroendocrine control of anterior pituitary and endocrine system
Placental hormones

Suggested Readings :

1. Histology: A Text and Atlas. Sixth Edition. Ross & Pawlina. Lippincott Williams & Wilkins.
2. Eckert Animal Physiology by David Randall and Warren Burggren. 4th edition. W. H. Freeman.

C6P: Animal Physiology: Controlling & Coordinating Systems Lab Credits 02

List of Practical

1. Recording of simple muscle twitch with electrical stimulation (or Virtual)

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

2. Demonstration of the unconditioned reflex action (Deep tendon reflex such as knee jerk reflex)
3. Preparation of temporary mounts: Squamous epithelium, Striated muscle fibres and nerve cells
4. Study of permanent slides of Mammalian skin, Cartilage, Bone, Spinal cord, Nerve cell, Pituitary, Pancreas, Testis, Ovary, Adrenal, Thyroid and Parathyroid
5. Microtomy: Preparation of permanent slide of any five mammalian (Goat/white rat) tissues

CC-7: Fundamentals of Biochemistry **Credits 06**

C7T: Fundamentals of Biochemistry **Credits 04**

Unit 1: Carbohydrates
Structure and Biological importance: Monosaccharides, Disaccharides, Polysaccharides; Derivatives of Monosachharides

Carbohydrate metabolism: Glycolysis, Citric acid cycle, Pentose phosphate pathway, Gluconeogenesis

Unit 2: Lipids
Structure and Significance: Physiologically important saturated and unsaturated fatty acids, Tri-acylglycerols, Phospholipids, Sphingolipid, Glycolipids, Steroids, Eicosanoids and terpinoids.

Lipid metabolism: β-oxidation of fatty acids; Fatty acid biosynthesis

Unit 3: Proteins
Amino acids
Structure, Classification, General and Electro chemical properties of α-amino acids; Physiological importance of essential and non-essential amino acids
Proteins
Bonds stabilizing protein structure; Levels of organization
Protein metabolism: Transamination, Deamination, Urea cycle, Fate of C-skeleton of Glucogenic and Ketogenic amino acids

Unit 4: Nucleic Acids
Structure: Purines and pyrimidines, Nucleosides, Nucleotides, Nucleic acids
Types of DNA and RNA, Complementarity of DNA, Hpyo- Hyperchromaticity of DNA
Basic concept of nucleotide metabolism

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Unit 5: Enzymes
Nomenclature and classification; Cofactors; Specificity of enzyme action; Isozymes; Mechanism of enzyme action; Enzyme kinetics; Derivation of Michaelis-Menten equation, Lineweaver-Burk plot;
Factors affecting rate of enzyme-catalyzed reactions; Enzyme inhibition; Allosteric enzymes and their kinetics; Strategy of enzyme action- Catalytic and Regulatory (Basic concept with one example each)

Unit 5: Oxidative Phosphorylation
Redox systems; Review of mitochondrial respiratory chain, Inhibitors and un-couplers of Electron Transport System

C7P: Fundamentals of Biochemistry Lab **Credits 02**

List of Practical

1. Qualitative tests of functional groups in carbohydrates, proteins and lipids.
2. Paper chromatography of amino acids.
3. Quantitative estimation of Lowry Methods.
4. Demonstration of proteins separation by SDS-PAGE.
5. To study the enzymatic activity of Trypsin and Lipase.
6. To perform the Acid and Alkaline phosphatase assay from serum/ tissue.

Suggested Readings:

1. Cox, M.M and Nelson, D.L. (2008). Lehninger's Principles of Biochemistry, V Edition, W.H. Freeman and Co., New York.
2. Berg, J.M., Tymoczko, J.L. and Stryer, L. (2007). Biochemistry, VI Edition, W.H. Freeman and Co., New York.
3. Murray, R.K., Bender, D.A., Botham, K.M., Kennelly, P.J., Rodwell, V.W. and Well, P.A.(2009). Harper's Illustrated Biochemistry, XXVIII Edition, International Edition, The McGraw- Hill Companies Inc.
4. Hames, B.D. and Hooper, N.M. (2000). Instant Notes in Biochemistry, II Edition, BIOS Scientific Publishers Ltd., U.K.
5. Watson, J.D., Baker, T.A., Bell, S.P., Gann, A., Levine, M. and Losick, R. (2008). Molecular Biology of the Gene, VI Edition, Cold Spring Harbor Lab. Press, Pearson Pub.

Skill Enhancement Course (SEC)

SEC1: Apiculture **Credits 02**

SEC1T: Apiculture

Unit 1: Biology of Bees
History, Classification and Biology of Honey Bees
Social Organization of Bee Colony

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Unit 2: Rearing of Bees
Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth
Bee Pasturage
Selection of Bee Species for Apiculture
Bee Keeping Equipment
Methods of Extraction of Honey (Indigenous and Modern)

Unit 3: Diseases and Enemies
Bee Diseases and Enemies
Control and Preventive measures

Unit 4: Bee Economy
Products of Apiculture Industry and its Uses (Honey, Bees Wax, Propolis), Pollen etc

Unit 5: Entrepreneurship in Apiculture
Bee Keeping Industry – Recent Efforts, Modern Methods in employing artificial Beehives for cross pollination in horticultural gardens

Suggested Readings :

1. Prost, P. J. (1962). Apiculture. Oxford and IBH, New Delhi.
2. Bisht D.S., Apiculture, ICAR Publication.
3. Singh S., Beekeeping in India, Indian council of Agricultural Research, New Delhi.

Or

SEC1: Aquarium Fish Keeping **Credits 02**

SEC1T: Aquarium Fish Keeping

Aquarium Fish Keeping

Unit 1: Introduction to Aquarium Fish Keeping
The potential scope of Aquarium Fish Industry as a Cottage Industry, Exotic and Endemic species of Aquarium Fishes

Unit 2: Biology of Aquarium Fishes
Common characters and sexual dimorphism of Fresh water and Marine Aquarium fishes such as Guppy, Molly, Sword tail, Gold fish, Angel fish, Blue morph, Anemone fish and Butterfly fish

Unit 3: Food and feeding of Aquarium fishes
Use of live fish feed organisms. Preparation and composition of formulated fish feeds, Aquarium fish as larval predator

Unit 4: Fish Transportation
Live fish transport - Fish handling, packing and forwarding techniques.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

Unit 5: Maintenance of Aquarium
General Aquarium maintenance – budget for setting up an Aquarium Fish Farm as a Cottage Industry

Generic Elective
GE-3 [Interdisciplinary for other department]

GE-3: Aquatic Biology **Credits 06**

GE3T: Aquatic Biology **Credits 04**

Unit 1: Aquatic Biomes
Brief introduction to the aquatic biomes: Freshwater ecosystem (lakes, wetlands, streams and rivers), estuaries, intertidal zones, oceanic pelagic zone, marine benthic zone and coral reefs.

Unit 2: Freshwater Biology
Lakes: Origin and classification, Lake as an Ecosystem, Lake morphometry, Physico–chemical Characteristics: Light, Temperature, Thermal stratification, Dissolved Solids, Carbonate, Bicarbonates, Phosphates and Nitrates, Turbidity, dissolved gases (Oxygen, Carbon dioxide). Nutrient Cycles in Lakes (Nitrogen, Sulphur and Phosphorous).

Streams: Different stages of stream development, Physico-chemical environment, Adaptation of hill- stream fishes.

Unit 3: Marine Biology
Salinity and density of Sea water, Continental shelf, Adaptations of deep sea organisms, Coral reefs, Sea weeds.

Unit 4: Management of Aquatic Resources
Causes of pollution: Agricultural, Industrial, Sewage, Thermal and Oil spills, Eutrophication, Management and conservation (legislations), Sewage treatment Water quality assessment- BOD and COD

GE3 P: Aquatic Biology Lab **Credits 02**

List of Practical

1. Determine the area of a lake using graphimetric and gravimetric method.
2. Identify the important macrophytes, phytoplanktons and zooplanktons present in a lake ecosystem.
3. Determine the amount of Turbidity/transparency, Dissolved Oxygen, and Free Carbon dioxide, Alkalinity (carbonates & bicarbonates) in water collected from a nearby lake / water body.
4. Instruments used in limnology (Secchi disc, Van Dorn Bottle, Conductivity meter, Turbidity meter, PONAR grab sampler) and their significance.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons.pdf

5. A Project Report on a visit to a Sewage treatment plant/Marine bio- reserve/Fisheries Institute.

Suggested Readings :

1. Anathakrishnan : Bioresources Ecology 3rd Edition
2. Goldman : Limnology, 2nd Edition
3. Odum and Barrett : Fundamentals of Ecology, 5th Edition
4. Pawlowski: Physicochemical Methods for Water and Wastewater Treatment, 1st Edition
5. Wetzel : Limnology, 3rd edition
6. Trivedi and Goyal : Chemical and biological methods for water pollution studies
7. Welch : Limnology Vols. I-II

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 12:00:02; Copyright : Vidyasagar University

Semester-IV

Core Course (CC)

CC-8: Comparative Anatomy of Vertebrates **Credits 06**

C8T: Comparative Anatomy of Vertebrates **Credits 04**

Course Contents:

Unit 1: Integumentary System

Structure, function and derivatives of integument in amphibian, birds and mammals

Unit 2: Skeletal System

Overview of axial and appendicular skeleton; Jaw suspension; Visceral arches.

Unit 3: Digestive System

Comparative anatomy of stomach; dentition in mammals

Unit 4: Respiratory System

Respiratory organs in fish, amphibian, birds and mammals

Unit 5: Circulatory System

General plan of circulation, Comparative account of heart and aortic arches

Unit 6: Urinogenital System

Succession of kidney, Evolution of urinogenital ducts, Types of mammalian uteri

Unit 7: Nervous System

Comparative account of brain, Cranial nerves in mammals

Unit 8: Sense Organs

Classification of receptors, Brief account of olfactory and auditory receptors in vertebrate

Suggested Readings:

- Kardong, K.V. (2005) Vertebrates' Comparative Anatomy, Function and Evolution. IV Edition. McGraw-Hill Higher Education
- Kent, G.C. and Carr R.K. (2000). Comparative Anatomy of the Vertebrates. IX Edition. The McGraw-Hill Companies
- Hilderbrand, M and Gaslow G.E. Analysis of Vertebrate Structure, John Wiley and Sons Saxena, R.K. &Saxena, S.C.(2008) : Comparative Anatomy of Vertebrates, Viva Books Pvt. Ltd.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons4.pdf

C8P: Comparative Anatomy of Vertebrates **Credits 02**

List of Practical

1. Study of placoid, cycloid and ctenoid scales through permanent slides/photographs.
2. Study of disarticulated skeleton of Toad, Pigeon and Guineapig.
3. Demonstration of Carapace and plastron of turtle.
4. Identification of mammalian skulls: One herbivorous (Guineapig) and one carnivorous (Dog) animal.
5. Dissection of Tilapia: Circulatory system, Brain, pituitary, urinogenital system.

CC-9: Animal Physiology: Life Sustaining Systems **Credits 06**

C9T: Animal Physiology: Life Sustaining Systems **Credits 04**

Course Contents:

Unit 1: Physiology of Digestion

Structural organisation and functions of Gastrointestinal tract and Associated glands; Mechanical and chemical digestion of food, absorption of Carbohydrates, Lipids, Proteins and Nucleic Acids; Digestive enzymes

Unit 2: Physiology of Respiration

Mechanism of Respiration, Respiratory volumes and capacities, transport of Oxygen and Carbon dioxide in blood, Dissociation curves and the factors influencing it, respiratory pigments; Carbon monoxide poisoning

Unit 3: Physiology of Circulation

Components of Blood and their functions; Structure and functions of haemoglobin Haemostasis; Blood clotting system, Fibrinolytic system Haemopoiesis; Basic steps and its regulation Blood groups; ABO and Rh factor

Unit 4: Physiology of Heart

Structure of mammalian heart, Coronary Circulation, Structure and working of conducting myocardial fibres, Origin and conduction of cardiac impulses Cardiac Cycle and cardiac output Blood pressure and its regulation

Unit 5: Thermoregulation & Osmoregulation

Physiological classification based on thermal biology.

Thermal biology of endotherms

Osmoregulation in aquatic vertebrates

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons4.pdf

Extrarenal osmoregulatory organs in vertebrates

Unit 6: Renal Physiology

Structure of Kidney and its functional unit, Mechanism of urine formation, Regulation of acid-base balance

Suggested Readings:

- Guyton, A.C. & Hall, J.E. (2006). Textbook of Medical Physiology. XI Edition. Hercourt
- Asia PTE Ltd. W.B. Saunders Company.
- Tortora, G.J. & Grabowski, S. (2006). Principles of Anatomy & Physiology. XI Edition John Wiley & sons,
- Eckert Animal Physiology: Mechanisms and adaptations Randall, Burggren and FrenchVander A, Sherman J. and Luciano D. (2014). Vander's Human Physiology: The Mechanism of Body Function. XIII Edition, McGraw Hills
- Victor P. Eroschenko. (2008). diFiore's Atlas of Histology with Functional correlations. XII Edition. Lippincott W. & Wilkins.
- Vander A, Sherman J. and Luciano D. (2014). Vander's Human Physiology: The Mechanism of Body Function. XIII Edition, McGraw Hills

C9P: Animal Physiology: Life Sustaining Systems Lab **Credits 02**

List of Practical

1. Determination of ABO Blood group
2. Enumeration of red blood cells and white blood cells using haemocytometer
3. Estimation of haemoglobin using Sahli's haemoglobinometer
4. Preparation of haemin and haemochromogen crystals
5. Recording of blood pressure using a sphygmomanometer

CC-10: Immunology **Credits 06**

C10T: Immunology **Credits 04**

Course Contents:

Unit 1: Overview of Immune System

Basic concepts of health and diseases, Historical perspective of Immunology, Cells and organs of the Immune system

Unit 2: Innate and Adaptive Immunity

Anatomical barriers, Inflammation, Cell and molecules involved in innate immunity, Adaptive immunity (Cell mediated and humoral).

Unit 3: Antigens

Antigenicity and immunogenicity, Immunogens, Adjuvants and haptens, Factors influencing immunogenicity, B and T-Cell epitopes

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons4.pdf

Unit 4: Immunoglobulins

Structure and functions of different classes of immunoglobulins, Antigen- antibody interactions,

Immunoassays (ELISA and RIA), Hybridoma technology, Monoclonal antibody production

Unit 5: Major Histocompatibility Complex

Structure and functions of MHC molecules.

Structure of T cell Receptor and its signalling, T cell development & selection

Unit 6: Cytokines

Types, properties and functions of cytokines.

Unit 7: Complement System

Components and pathways of complement activation.

Unit 8: Hypersensitivity

Gell and Coombs' classification and brief description of various types of hypersensitivities.

Unit 9: Immunology of diseases

Malaria, Filariasis, Dengue and Tuberculosis

Unit 10: Vaccines

Various types of vaccines. Active & passive immunization (Artificial and natural).

Suggested Readings:

- Kindt, T. J., Goldsby, R.A., Osborne, B. A. and Kuby, J (2006). Immunology, VI Edition. W.H. Freeman and Company.
- Abbas, K. Abul and Lechtman H. Andrew (2003.) Cellular and Molecular Immunology. V Edition. Saunders Publication.

C10P: Immunology Lab **Credits 02**

List of Practical

1. Demonstration of lymphoid organs.
2. Histological study of spleen, thymus and lymph nodes through slides/ photographs
3. Preparation of stained blood film to study various types of blood cells.
4. ABO blood group determination.
5. Demonstration of ELISA

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons4.pdf

Skill Enhancement Courses (SEC)

SEC-2: Medical Diagnostic Techniques **Credits 02**

SEC2T: Medical Diagnostic Techniques

Course Contents:

Unit 1: Introduction to Medical Diagnostics and its Importance

Unit 2: Diagnostics Methods Used for Analysis of Blood

Blood composition, Preparation of blood smear and Differential Leucocyte Count (D.L.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentary Rate (E.S.R), Packed Cell Volume (P.C.V.)

Unit 3: Diagnostic Methods Used for Urine Analysis

Urine Analysis: Physical characteristics; Abnormal constituents

Unit 4: Non-infectious Diseases

Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type I and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/Kit

Unit 5: Infectious Diseases

Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis, Malarial parasite (Microscope based and ELISA based)

Unit 6: Clinical Biochemistry

LFT, Lipid profiling

Unit 7: Clinical Microbiology

Antibiotic Sensitivity Test

Unit 8: Tumours

Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bone fracture, PET, MRI and CT Scan (using photographs).

Unit 9: Visit to Pathological Laboratory and Submission of Project

Suggested Readings:

- Park, K. (2007), *Preventive and Social Medicine*, B.B. Publishers
- Godkar P.B. and Godkar D.P. *Textbook of Medical Laboratory Technology*, II Edition, Bhalani Publishing House
- Cheesbrough M., *A Laboratory Manual for Rural Tropical Hospitals, A Basis for Training Courses*
- Guyton A.C. and Hall J.E. T*extbook of Medical Physiology*, Saunders Robbins and Cortan, *Pathologic Basis of Disease*, VIII Edition, Saunders
- Prakash, G. (2012), *Lab Manual on Blood Analysis and Medical Diagnostics*, S. Chand and Co. Ltd.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University

Or

SEC-2: Sericulture **Credits 02**

SEC2T: Sericulture

Course Contents:

Unit 1: Introduction

Sericulture: Definition, history and present status; Silk route

Types of silkworms, Distribution and Races

Exotic and indigenous races

Mulberry and non-mulberry Sericulture

Unit 2: Biology of Silkworm

Life cycle of *Bombyx mori*

Structure of silk gland and secretion of silk

Unit 3: Rearing of Silkworms

Selection of mulberry variety and establishment of mulberry garden

Rearing house and rearing appliances.

Disinfectants: Formalin, bleaching powder, RKO

Silkworm rearing technology: Early age and Late age rearing

Types of mountages

Spinning, harvesting and storage of cocoons

Unit 4: Pests and Diseases

Pests of silkworm: Uzi fly, dermestid beetles and vertebrates

Pathogenesis of silkworm diseases: Protozoan, viral, fungal and bacterial

Control and prevention of pests and diseases

Unit 5: Entrepreneurship in Sericulture

Prospectus of Sericulture in India: Sericulture industry in different states, employment, potential in mulberry and non-mulberry sericulture Visit to various sericulture centres.

Suggested Readings:

- Non-conventional energy sources - G.D Rai - Khanna Publishers, New Delhi
- Solar energy - M P Agarwal - S Chand and Co. Ltd.

Generic Elective Syllabus
GE-4 [Interdisciplinary for other department]

GE-4: Insect Vectors and Diseases **Credits 06**

GE4T: Insect Vectors and Diseases **Credits 04**

Course Contents:

Unit 1: Introduction to Insects

General Features of Insects, Morphological features, Head – Eyes, Types of antennae, Mouth Parts

Unit 2: Concept of Vectors

Brief introduction to Vectors (mechanical and biological vectors),Reservoirs, Host-vector relationship, Adaptations as vectors, Host specificity

Unit 3: Insects as Vectors

Detailed features of orders with insects as vectors – Diptera, Siphonaptera, Siphunculata, Hemiptera

Unit 4: Dipteran as Disease Vectors

Dipterans as important insect vectors – Mosquitoes, Sand fly, Houseflies

Study of mosquito-borne diseases – Malaria, Dengue, Chikungunya, Viral encephalitis, Filariasis Control of mosquitoes

Study of sand fly-borne diseases –Leishmaniasis,; Control of Sand fly

Study of house fly as important mechanical vector, Myiasis, Control of house fly

Unit 5: Siphonaptera as Disease Vectors

Fleas as important insect vectors; Host-specificity, Study of Flea-borne diseases – Plague, Typhus fever; Control of fleas

Unit 6: Siphunculata as Disease Vectors

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons4.pdf

Human louse (Head, Body and Pubic louse) as important insect vectors; Control of human louse

Unit 7: Hempitera as Disease Vectors

Bugs as insect vectors; Blood-sucking bugs; Chagas disease, Bed bugs as mechanical vectors, Control and prevention measures

Suggested Readings:

- Imms, A.D. (1977). A General Text Book of Entomology. Chapman & Hall, UK
- Chapman, R.F. (1998). The Insects: Structure and Function. IV Edition, Cambridge University Press, UK
- Pedigo L.P. (2002). Entomology and Pest Management. Prentice Hall Publication
- Mathews, G. (2011). Integrated Vector Management: Controlling Vectors of Malaria and Other Insect Vector Borne Diseases. Wiley-Blackwell
- Mosquito (2000) Chandra G, Sribhumi Publication Co. Kolkata
- Medical Entomology, Hati A. K Allied Book Agency, Kolkata

GE4P: Insect Vectors and Diseases Lab **Credits 02**

List of Practical

1. Study of different kinds of mouth parts of insects
2. Study of following insect vectors through permanent slides/ photographs: *Aedes*, *Culex*, *Anopheles*, *Pediculus humanus capitis*, *Pediculus humanus corporis*, *Phithirus pubis*, *Xenopsylla cheopis*, *Cimex lectularius*, *Phlebotomus argentipes*, *Musca domestica* through permanent slides/ photographs
3. Study of different diseases transmitted by above insect vectors

Submission of a project report on any one of the insect vectors and disease transmitted

Or

GE-4: Environment and Public Health **Credits 06**

GE4T: Environment and Public Health **Credits 04**

Course Contents:

Unit 1: Introduction

Sources of Environmental hazards, Hazard identification and accounting, Fate of toxic and persistent substances in the environment, Dose response evaluation, Exposure assessment.

Unit 2: Climate Change

Greenhouse gases and global warming, Acid rain, Ozone layer destruction, Effect of climate change on public health

Unit 3: Pollution

Air, water, noise pollution sources and effects, Pollution control.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons4.pdf

Unit 4: Waste Management Technologies

Sources of waste, types and characteristics, Sewage disposal and its management, Solid waste disposal, Biomedical waste handling and disposal, Nuclear waste handling and disposal, Waste from thermal power plants.

Unit 5: Diseases

Causes, symptoms and control of tuberculosis, Asthma, Cholera, Minamata disease, typhoid, filariasis

Suggested Readings:

- Cutter, S.L., Environmental Risk and Hazards, Prentice-Hall of India Pvt. Ltd., New Delhi, 1999.
- Kolluru Rao, Bartell Steven, Pitblado R and Stricoff "Risk Assessment and Management Handbook", McGraw Hill Inc., New York, 1996.
- Kofi Asante Duah "Risk Assessment in Environmental management", John Wiley and sons, Singapore, 1998.
- Kasperson, J.X. and Kasperson, R.E. and Kasperson, R.E., Global Environmental Risks, V. N. University Press, New York, 2003.
- Joseph F Louvar and B Diane Louver Health and Environmental Risk Analysis
- fundamentals with applications, Prentice Hall, New Jersey 1997.

GE4P: Environment and Public Health Lab **Credits 02**

List of Practical

To determine pH, Cl, SO_4, NO_3 in soil and water samples from different locations.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:58:47; Copyright : Vidyasagar University

Semester-V

Core Courses (CC)

CC-11: Molecular Biology **Credits 06**

C11T: Molecular Biology **Credits 04**

Course Contents:

Unit 1: Nucleic Acids

Salient features of DNA and RNA. Watson and Crick Model of DNA

Unit 2: DNA Replication

Mechanism of DNA Replication in Prokaryotes, Semi-conservative, bidirectional and discontinuous Replication, RNA priming, Replication of telomeres

Unit 3: Transcription

Mechanism of Transcription in prokaryotes and eukaryotes, Transcription factors, Difference between prokaryotic and eukaryotic transcription.

Unit 4: Translation

Mechanism of protein synthesis in prokaryotes, Ribosome structure and assembly in prokaryotes, fidelity of protein synthesis, aminoacyl tRNA synthetases and charging of tRNA; Proteins involved in initiation, elongation and termination of polypeptide chain; Genetic code, Degeneracy of the genetic code and Wobble Hypothesis; Inhibitors of protein synthesis; Difference between prokaryotic and eukaryotic translation

Unit 5: Post Transcriptional Modifications and Processing of Eukaryotic RNA

Capping and Poly A tail formation in mRNA; Split genes: concept of introns and exons, splicing mechanism, alternative splicing, exon shuffling, and RNA editing, Processing of tRNA

Unit 6: Gene Regulation

Regulation of Transcription in prokaryotes: *lac* operon and *trp* operon;
Regulation of Transcription in eukaryotes: Activators, enhancers, silencer, repressors, miRNA mediated gene silencing, Genetic imprinting

Unit 7: DNA Repair Mechanisms

Types of DNA repair mechanisms, RecBCD model in prokaryotes, nucleotide and base excision repair, SOS repair

Unit 8: Molecular Techniques

PCR, Western and Southern blot, Northern Blot, Sanger DNA sequencing

Suggested Readings:

1. Molecular Cell Biology by Harvey Lodish. 7th Edition. W.H. Freeman.
2. Molecular Biology of the Gene by Watson. 7th Edition. Pearson.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

3. iGenetics: A Molecular Approach by Peter. J. Russell. 3rd edition. Pearson Benjamin Cummings.

C11P: Molecular Biology (Lab) **Credits 02**

List of Practical

1. Demonstration of polytene and lampbrush chromosome from photograph
2. Isolation and quantification of genomic DNA using spectrophotometer (A260 measurement)
3. Agarose gel electrophoresis for DNA

CC-12: Genetics **Credits 06**

C12T: Genetics **Credits 04**

Course Contents:

Unit 1: Mendelian Genetics and its Extension
Principles of inheritance, Incomplete dominance and co-dominance, Epistasis Multiple alleles, Lethal alleles, Pleiotropy, Sex-linked, sex- influenced and sex-limited inheritance, Polygenic Inheritance.

Unit 2: Linkage, Crossing Over and Chromosomal Mapping
Linkage and Crossing Over, molecular basis of crossing over, Measuring Recombination frequency and linkage intensity using three factor crosses, Interference and coincidence

Unit 3: Mutations
Types of gene mutations (Classification), Types of chromosomal aberrations (Classification with one suitable example of each), Non-disjunction and variation in chromosome number; Molecular basis of mutations in relation to UV light and chemical mutagens

Unit 4: Sex Determination
Mechanisms of sex determination in *Drosophila*
Sex determination in mammals
Dosage compensation in *Drosophila* & Human

Unit 5: Extra-chromosomal Inheritance
Criteria for extra chromosomal inheritance, Antibiotic resistance in *Chlamyadomonas,* Kappa particle in *Paramoecium* Shell spiralling in snail

Unit 6: Recombination in Bacteria and Viruses
Conjugation, Transformation, Transduction, Complementation test in Bacteriophage

Unit 7: Transposable Genetic Elements
Transposons in bacteria, Ac-Ds elements in maize and P elements in *Drosophila,* LINE, SINE, Alu elements in humans

Suggested Readings:

1. Developmental biology by Scott. F. Gilbert, 9th edition.
2. Snustad, D.P., Simmons, M.J. (2009). Principles of Genetics. V Edition. John Wiley and Sons Inc

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

3. Klug, W.S., Cummings, M.R., Spencer, C.A. (2012). Concepts of Genetics. X Edition. Benjamin Cummings
4. Russell, P. J. (2009). Genetics- A Molecular Approach.III Edition. Benjamin Cummings Griffiths, A.J.F., Wessler, S.R., Lewontin, R.C. and Carroll, S.B.

C12P: Genetics (Lab) **Credits 02**

List of Practical

1. Chi-square analyses
2. Linkage maps based on conjugation
3. Identification of chromosomal aberration in Drosophila and man from photograph
4. Pedigree analysis of some human inherited traits

Discipline Specific Electives (DSE)

DSE-1 : Animal Behaviour and Chronobiology **Credits 06**

DSE1T : Animal Behaviour and Chronobiology **Credits 04**

Course Contents:

Unit 1: Introduction to Animal Behaviour

Origin and history of Ethology, Brief profiles of Karl Von Frish, Ivan Pavlov, Konrad Lorenz, Niko Tinbergen Proximate and ultimate causes of behaviour, Methods and recording of a behaviour

Unit 2: Patterns of Behaviour

Stereotyped Behaviours (Orientation, Reflexes); Individual Behavioural patterns; Instinct vs. Learnt Behaviour; Associative learning, classical and operant conditioning, Habituation, Imprinting.

Unit 3: Social and Sexual Behaviour

Social Behaviour: Concept of Society; Communication and the senses

Altruism; Insects' society with Honey bee as example; Foraging in honey bee and advantages of the waggle dance.

Sexual Behaviour: Asymmetry of sex, Sexual dimorphism, Mate choice, Intra-sexual selection (male rivalry), Inter-sexual selection (female choice), Sexual conflict in parental care.

Unit 4: Introduction to Chronobiology

Historical developments in chronobiology; Biological oscillation: the concept of Average, amplitude, phase and period.

Adaptive significance of biological clocks

Unit 5: Biological Rhythm

Types and characteristics of biological rhythms: Short- and Long- term rhythms; Circadian rhythms; Tidal rhythms and Lunar rhythms; Concept of synchronization and masking; Photic and non-photic zeitgebers; Circannual rhythms; Photoperiod and regulation of seasonal reproduction of vertebrates; Role of melatonin.

Suggested Readings:

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

1. Animal Behaviour by Drickamar.
2. John Alcock, Animal Behaviour, Sinauer Associate Inc., USA.
3. Paul W. Sherman and John Alcock, Exploring Animal Behaviour, Sinauer Associate Inc., Massachusetts, USA.
4. Chronobiology Biological Timekeeping: Jay. C. Dunlap, Jennifer. J. Loros Patricia J. De Coursey (ed). 2004, Sinauer Associates, Inc. Publishers, Sunderland, MA, USA
5. Insect Clocks D.S. Saunders, C.G.H. Steel, X., Afopoulou (ed.) R.D. Lewis. (3rdEd) 2002 Barens and Noble Inc. New York, USA
6. Biological Rhythms: Vinod Kumar (2002) Narosa Publishing House, Delhi/ Springer-Verlag, Germany.

DSE1P: Animal Behaviour and Chronobiology (Lab) **Credits 02**

List of Practical

1. To study nests and nesting habits of the birds and social insects.
2. To study the behavioural responses of wood lice to dry and humid conditions.
3. To study geotaxis behaviour in earthworm.
4. To study the phototaxis behaviour in insect larvae.
5. Visit to Forest/ Wild life Sanctuary/Biodiversity Park/Zoological Park to study behavioural activities of animals and prepare a short report.
6. Study and actogram construction of locomotor activity of suitable animal models.
7. Study of circadian functions in humans (daily eating, sleep and temperature patterns).

Or

DSE-1: Fish and Fisheries **Credits 06**

DSE1T: Fish and Fisheries **Credits 04**

Course Contents:

Unit 1: Introduction and Classification
General description of fish
Feeding habit, habitat and manner of reproduction
Classification of fish (up to Subclasses)

Unit 2: Morphology and Physiology
Types of fins and their modifications; Locomotion in fish; Hydrodynamics; Types of Scales, Use of scales in Classification and determination of age of fish; Gills and gas exchange; Swim Bladder: Types and role in Respiration, buoyancy; Osmoregulation in Elasmobranchs; Reproductive strategies (special reference to Indian fish); Electric organ, Bioluminescence

Unit 3: Fisheries
Inland Fisheries; Marine Fisheries; Environmental factors influencing the seasonal variations in fish catches in the Arabian Sea and the Bay of Bengal; Fishing crafts and Gears; Depletion of fisheries resources; Application of remote sensing and GIS in fisheries; Fisheries law and regulations

Unit 4: Aquaculture

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

Sustainable Aquaculture; Extensive, semi-intensive and intensive culture of fish; Pen and cage culture; Polyculture; Composite fish culture; Brood stock management; Induced breeding of fish; Management of finfish hatcheries; Preparation and maintenance of fish aquarium; Preparation of compound diets for fish; Role of water quality in aquaculture; Fish diseases: Bacterial, viral and parasitic; Preservation and processing of harvested fish, Fishery by-products

Unit 5: Fish in research
Transgenic fish
Zebrafish as a model organism in research

Suggested Readings:

1. Q Bone and R Moore, Biology of Fishes, Talyor and Francis Group, CRC Press, U.K.
2. D. H. Evans and J. D. Claiborne, The Physiology of Fishes, Taylor and Francis Group, CRC Press, UK von der Emde, R.J. Mogdans and B.G. Kapoor.The Senses of Fish: Adaptations for the Reception of Natural Stimuli Springer, Netherlands
3. C.B.L. Srivastava, Fish Biology, Narendra Publishing House J.R. Norman, A history of Fishes, Hill and Wang Publishers
4. Khanna and H.R. Singh, A text book of Fish Biology and Fisheries, Narendra Publishing House.

Note: Classification to be followed from: Romar A. S. (1959)

DSE1P: Fish and Fisheries (Lab) **Credits 02**

List of Practical

1. Morphometric and meristic characters of fishes
2. Study of *Petromyzon*, *Myxine*, *Pristis*, *Chimaera*, *Exocoetus*, *Hippocampus*, *Gambusia*, *Labeo*, *Heteropneustes*, *Anabas*
3. Study of different types of scales (through permanent slides/ photographs).
4. Study of crafts and gears used in Fisheries
5. Water quality criteria for Aquaculture: Assessment of pH, conductivity, Total solids, Total dissolved solids
6. Study of air breathing organs in *Channa*, *Heteropneustes*, *Anabas* and *Clarias*
7. Project Report on a visit to any fish farm/ pisciculture unit/Zebrafish rearing Lab.

Or

DSE-1: Reproductive Biology **Credits 06**

DSE1T: Reproductive Biology **Credits 04**

Course Contents:

Unit 1: Reproductive Endocrinology
Mechanism of action of steroids and glycoprotein hormones. hypothalamo – hypophyseal – gonadal axis, regulation of gonadotrophin secretion in human (male and female) Reproductive system:
Development and differentiation of gonads, genital ducts and external genitalia

Unit 2: Functional anatomy of male reproduction

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

Histoarchitechture of testis in human; Spermatogenesis; Kinetics and hormonal regulation; Androgen synthesis and metabolism; Accessory glands functions

Unit 3: Functional anatomy of female reproduction
Histoarchitechture of ovary in human; Oogenesis; Kinetics and hormonal regulation; Steroidogenesis and secretion of ovarian hormones; Reproductive cycles (human) and their regulation, fertilization; Hormonal control of implantation; Hormonal regulation of gestation, pregnancy diagnosis, foeto – maternal relationship; Mechanism of parturition and its hormonal regulation; Lactation and its Regulation

Unit 4: Reproductive Health
Infertility in male and female: causes, diagnosis and management Assisted Reproductive Technology: sex selection, sperm banks, frozen embryos, in vitro fertilization Modern contraceptive technologies

Suggested Readings:

1. Ross & Pawlina. Histology: A text and Atlas. 6th edition.
2. Guyton & Hall. Medical Physiology. 11th edition.
3. Knobil, E. et al. (eds). The Physiology of Reproduction. Raven Press Ltd.
4. Hatcher, R.A. et al. The Essentials of Contraceptive Technology. Population Information Programme.

DSE1P: Reproductive Biology (Lab) **Credits 02**

List of Practicals:

1. Study of animal house: set up and maintenance of animal house, breeding techniques, care of normal and experimental animals.
2. Examination of vaginal smear rats from live animals.
3. Tissue fixation, embedding in paraffin, microtomy and slide preparation of any endocrine gland
4. Examination of histological sections from photomicrographs/ permanent slides of rat/human: testis, epididymis and accessory glands of male reproductive systems; Sections of ovary, fallopian tube, uterus (proliferative and secretory stages), cervix and vagina.
5. Sperm count and sperm motility in rat

DSE-2: Animal Biotechnology **Credits 06**

DSE2T: Animal Biotechnology **Credits 04**

Course Contents:

Unit 1: Introduction
Organization of prokaryotic and eukaryotic genome, Concept of genomics

Unit 2: Molecular Techniques in Gene manipulation
Cloning vectors: Plasmids, Cosmids, Phagemids, Lambda Bacteriophage, M13, BAC, YAC, MAC and Expression vectors (characteristics).Restriction enzymes: Nomenclature, detailed

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

study of Type II. Transformation techniques: Calcium chloride method and electroporation. Construction of genomic and cDNA libraries and screening by colony and plaque hybridization Southern, Northern and Western blotting
DNA sequencing: Sanger method
Polymerase Chain Reaction, DNA Finger Printing and DNA micro array

Unit 3: Genetically Modified Organisms
Production of cloned and transgenic animals: Nuclear Transplantation, Retroviral Method, DNA microinjection. Applications of transgenic animals: Production of pharmaceuticals, production of donor organs, knock out mice

Unit 4: Culture Techniques and Applications
Animal cell culture, expressing cloned genes in mammalian cells, Molecular diagnosis of genetic diseases (Cystic fibrosis, Sickle cell anemia)

Suggested Readings:

1. Brown, T.A. (1998). Molecular Biology Labfax II: Gene Cloning and DNA Analysis. II Edition, Academic Press, California, USA.
2. Glick, B.R. and Pasternak, J.J. (2009). Molecular Biotechnology - Principles and Applications of Recombinant DNA. IV Edition, ASM press, Washington, USA.
3. Weaver. Molecular Biology of Gene. 5th edition.
4. Primrose & Twyman. Principles of Gene Manipulation and Genomics. 7th edition.

DSE2P: Animal Biotechnology (Lab) **Credits 02**

List of Practical

1. Genomic DNA isolation from E. coli
2. Plasmid DNA isolation (pUC 18/19) from E. coli
3. Restriction digestion of plasmid DNA.
4. Construction of circular and linear restriction map from the data provided.
5. Calculation of transformation efficiency from the data provided.
6. To study following techniques through photographs
    a. Southern Blotting
    b. Northern Blotting
    c. Western Blotting
    d. DNA Sequencing (Sanger's Method)
    e. PCR
    f. DNA fingerprinting
7. Project report on animal cell culture

Or

DSE-2: Microbiology **Credits 06**

DSE2T: Microbiology **Credits 04**

Course Contents:

Unit 1: Introduction to Microbiology

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:57:55; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons5.pdf

Historical perspective of Microbiology, Prokaryotic pathogens, Eukaryotic pathogens

Unit 2: Bacterial taxonomy
Principles and modern approaches of bacterial taxonomy. Basic idea about Hackel and Whittaker's kingdom concept and domain concept of Carl Woose

Unit 3: Morphology of Bacteria and Virus
Cell wall (Structure of peptidoglycan), Cell envelope (Cell membrane, Differences between ram- positive and gram-negative species, External capsule and glycocalyx, Plasmids and episomes. Nuclear material, Bacterial Chromosome (Fundamental differences with eukaryotic chromosome). Reserve materials (carbon and phosphate reserve, cyanophycin), Cytoplasmic inclusions (Chlorosome, magnetosome, carboxysome, gas vesicles, ribosome). Structural organization of viruses, Prions and viroids

Unit 4: Normal flora
Distribution of normal flora in the body: Skin, eye, mouth, intestinal tract, urino-genital tract, Beneficial functions of normal flora. Harmful effects of normal flora

Unit 5: Pathogenicity of Microorganisms
Bacterial pathogenesis: Entry to the host, Adherence to host cells, Invasiveness, Bacterial toxins Exotoxins, Endotoxins, Antigenic switching.Viral Pathogenesis:Cellular level (Cell death, Transformation, Cell fusion, Cytopathic effect).Initial infections: Routes of entry and dissemination to secondary sites, Typical secondary sites of localization, Virus shedding and mode of transmission; Factors involved in termination of acute infection

Unit 6: Infection of pathogens to human populations
Communicable, Non-communicable, Endemic, Epidemic, Pandemic and Sporadic

Unit 7: Diagnostic Microbiology and Bacteria culture
Koch's postulates, Sensitivity and specificity of test results, Principles and applications: Simple staining, Gram-staining, Acid-fast staining, Collection of specimens, Growth requirements and Growth factors, Oxygen requirement. Culture Media: Simple media, Complex media, Selective media and Enriched media

Unit 8: Genetic recombination in bacteria
Transformation, Conjugation- F+, F-, Hfr & F' strain, Transduction, Generalised & specialized types.

Unit 9: Microbial Diseases
Name of pathogen, symptoms, pathogenesis, mode of action & preventive measures of following diseases: Bacterial (Polio, Typhoid, Staphylococcal Food Poisoning) , Viral (Dengue, AIDS)

Suggested Readings:

1. Alexander, M. (1977). Introduction to Soil Microbiology. John Wiley and Sons, New York.
2. Atlas, R. M. and Bartha, R. (1997). Microbial Ecology: Fundamentals and Applications, 4th ed.
3. Benjamin/ Cummings. Black, J. G. (2011). Microbiology: Principles and Explorations. 8th ed. John Wiley and Sons, New York.
4. Campbell, R. (1983). Microbial Ecology. 2nd ed. Oxford, Blackwell.

5. Pinehuk, G. (2003). Schaum's outline Series: Theory and Problems of Immunology.
6. McGrawHill.
7. Presscott, L. M., Harley, J. P. and Klein, D. A. (2011). Microbiology, 8th ed. McGrawHill, New York.
8. Schlegel, H. G. (1993). General Microbiology. 7th ed. Cambridge University Press.
9. Slonczeweski, J.L. and Foster, J.W. (2009). Microbiology- An Evolving Science. Norton.
10. Stanier, R. Y., Adelberg, E. A. and Ingraham, J. L. (1986). General Microbiology. 5th ed. Macmillan.
11. Talaro, K. and Talaro, A. (1999). Foundations in Microbiology. 3rd ed. Dubuque, McGraw Hill.
12. Tortora, G. J., Funke, B. R., and Case. C. L. (2008). Microbiology. An Introduction. 9th ed. Benjamin/Cummings Publishing. Menlo Park Calif.
13. Voyleys, B. A. (2002). The biology of viruses, 2nd ed. McGraw-Hill.

DSE2P: Microbiology (Lab) **Credits 02**

List of Practical:

1. Simple staining and Gram's staining of bacteria.
2. Preparation of liquid media (broth) and solid media for routine cultivation of bacteria.
3. Preparation of slant and stab.
4. Pure culture techniques: Spread plate, Pour plate and Streak plate
5. Biochemical test for characterization:
   Catalase, Nitrate-reduction, Indole production, Methyl Red and Voges-Proskauer Test.
6. Microbiological examination of milk (Methylene blue reductase test).
7. Sugar fermentation test.

Semester-VI

Core Courses (CC)

CC-13: Developmental Biology — Credits 06

C13T: Developmental Biology — Credits 04

Course Contents:

Unit 1: Introduction
Basic concepts: Phases of Development, Cell cell interaction, Differentiation and growth, Differential gene expression.

Unit 2: Early Embryonic Development
Gametogenesis, Spermatogenesis, Oogenesis; Types of eggs, Egg membranes; Fertilization (External and Internal): Changes in gametes, Blocks to polyspermy; Planes and patterns of cleavage; Types of Blastula; Fate maps (including Techniques); Early development of frog and chick up to gastrulation; Embryonic induction and organizers.

Unit 3: Late Embryonic Development
Fate of Germ Layers; Extra-embryonic membranes in birds; Implantation of embryo in humans, Placenta (Structure, types and functions of placenta).

Unit 4: Post Embryonic Development
Development of brain and Eye in Vertebrate. Regeneration: Modes of regeneration, epimorphosis, morphallaxis and compensatory regeneration (with one example each).

Unit 5: Implications of Developmental Biology 8 Class
Teratogenesis: Teratogenic agents and their effects on embryonic development; In vitro fertilization, Stem cell (ESC), Amniocentesis.

Suggested Readings:

1. Gilbert, S. F. (2010). Developmental Biology, IX Edition, Sinauer Associates, Publishers, Sunderland, Massachusetts, USA
2. Slack JMW , Essential Developmental Biology Inc.,

C13P: Developmental Biology Lab — Credits 02

List of Practical

1. Study of whole mounts of developmental stages of chick through permanent slides: Primitive streak (13 and 18 hours), 21, 24, 28, 33, 36, 48, 72, and 96 hours of incubation (Hamilton and Hamburger stages).
2. Study of the developmental stages and life cycle of Drosophila from stock culture.
3. Study of different sections of placenta (photomicropgraph/ slides).
4. Project report on Drosophila culture/chick embryo development.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

CC-14: Evolutionary Biology Credits 06

C14T: Evolutionary Biology Credits 04

Course Contents:

Evolutionary Biology

Unit-1: Life's Beginnings: Chemogeny, RNA world, Biogeny, Origin of photosynthesis, volution of eukaryotes.

Unit-2: Historical review of Evolutionary concepts, Lamarkism, Darwinism and Neo Darwinism.

Unit-3: Geological time scale, Fossil records of Hominids (from *Australopithacus* to *Homo sapiens*), evolution of horse. Neutral theory of molecular evolution, Molecular clock.

Unit-4: Sources of variations: Heritable variations and their role in evolution.

Unit-5: Population genetics: Hardy-Weinberg Law (statement and derivation of equation, application Of law to biallelic Population); Evolutionary forces upsetting H-W equilibrium; Natural selection (concept of fitness, types of selection, selection coefficient, mode of selection heterozygous superiority).Genetic Drift mechanism (founder's effect, bottleneck phenomenon)**.** Role of Migration and Mutation in changing allele frequencies.

Unit-6: Species concept, Isolating mechanisms, modes of speciation. Adaptive radiation /macroevolution (exemplified by Galapagos finches).

Unit-7: Extinctions, Back ground and mass extinctions (causes and effects), detailed example of K-T extinction.

Unit-8: Origin and Evolution of Man, Unique Hominin characteristics contrasted with primate characteristic Molecular analysis of human origin.

Unit-9: Phylogenetic trees, Construction & interpretation of Phylogenetic tree using parsimony, Convergent & Divergent evolution.

Suggested Readings:

1. Campbell, N.A. and Reece J.B (2011). Biology. IX Edition. Pearson, Benjamin, Cummings.
2. Douglas, J. Futuyma (1997). Evolutionary Biology. Sinauer Associates.
3. Geneics: A Molecular Approach. 3rd edition. Peter. J. Russell.

C14P: Evolutionary Biology Lab Credits 02

List of Practical

1. Study of fossils from models/ pictures
2. Study of homology and analogy from suitable specimens
3. Study and verification of Hardy-Weinberg Law by chi square analysis
4. Graphical representation and interpretation of data of height/ weight of a sample of 100 humans in relation to their age and sex.

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

Discipline Specific Electives (DSE)

DSE-3: Parasitology — Credits 06

DSE3T: Parasitology — Credits 04

Course Contents:

Unit-1: Introduction to Parasitology

Brief introduction of Parasitism, Parasite, Parasitoid and Vectors (mechanical and biological vector Host parasite relationship

Unit-2: Parasitic Protists

Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of *Giardia intestinalis, Trypanosoma gambiense, Leishmania donovani.*

Unit-3: Parasitic Platyhelminthes

Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of *Schistosoma haematobium*, *Taenia sajinata*

Unit-4: Parasitic Nematodes

Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of *Ascaris lumbricoides, Ancylostoma duodenale, Wuchereria bancrofti* and *Trichinella spiralis, Brugia malayi*; Nematode plant interaction; Gall formation.

Unit-5: Parasitic Arthropods

Biology, importance and control of ticks (Soft tick *Ornithodoros,* Hard tick *Ixodes*), mites (*Sarcoptes*), Lice (*Pediculus*), Flea (*Xenopsylla*) and Bug (*Cimex*).

Unit-6: Parasite Vertebrates

Brief account of Cookicutter Shark, Hood Mocking bird, Vampire bat.

Suggested Readings:

1. Arora, D. R and Arora, B. (2001) Medical Parasitology. II Edition. CBS Publications and Distributors

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

2. E.R. Noble and G.A. Noble (1982) Parasitology: The biology of animal parasites. V Edition, Lea & Febiger
3. Ahmed, N., Dawson, M., Smith, C. and Wood, Ed. (2007) Biology of Disease.
4. Taylor and Francis Group
5. Parija, S. C. Textbook of medical parasitology, protozoology & helminthology (Text and colour Atlas), II Edition, All India Publishers & Distributers, Medical Books Publishers, Chennai, Delhi
6. Rattan Lal Ichhpujani and Rajesh Bhatia. Medical Parasitology, III Edition, Jaypee Brothers Medical Publishers (P) Ltd., New Delhi.
7. Page66Meyer, Olsen & Schmidt's Essentials of Parasitology, Murray, D. Dailey, W.C. Brown Publishers.
8. K. D. Chatterjee (2009). Parasitology: Protozoology and Helminthology. XIII Edition, CBS Publishers & Distributors (P) Ltd.

DSE3P: Parasitology Lab **Credits 02**

List of Practical:

1. Study of life stages of *Giardia intestinalis*, *Trypanosoma gambiense*, *Leishmania donovani* through permanent slides/micro photographs.
2. Study of adult and life stages of *Schistosoma haematobium, Taenia sajinata* through permanent slides/micro photographs.
3. Study of adult and life stages of *Ancylostoma duodenale*, *Brugia malayi* and *Trichinella spiralis* through permanent slides/micro photographs.
4. Study of plant parasitic root knot nematode, Meloidogyne from the soil sample.
5. Study of *Pediculus humanus, Xenopsylla cheopis* and *Cimex lectularius* through permanent slides/ photographs.
6. Study of monogenea from the gills of fresh/marine fish [Gills can be procured from fish market as by product of the industry].
7. Study of nematode/cestode parasites from the intestines of Poultry bird [Intestine can be procured from poultry/market as a by-product.

Submission of a brief report on parasitic vertebrates.

Or

DSE-3: Endocrinology **Credits 06**

DSE3T: Endocrinology **Credits 04**

Course Contents:

Unit-1: Introduction to Endocrinology

General idea of Endocrine systems, Classification, Characteristic and Transport of Hormones, Neurosecretions and Neurohormones

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

Unit-2: Epiphysis, Hypothalamo-hypophysial Axis

Structure of pineal gland, Secretions and their functions in biological rhythms and reproduction. Structure and functions of hypothalamus and Hypothalamic nuclei, Regulation of neuroendocrine glands, Feedback mechanisms Structure of pituitary gland, Hormones and their functions, Hypothalamo-hypophysial portal system, Disorders of pituitary gland.

Unit-3: Peripheral Endocrine Glands

Structure, Hormones, Functions and Regulation of Thyroid gland, Parathyroid, Thymus, Adrenal, Pancreas, Ovary and Testis. Hormones in homeostasis, Disorders of endocrine glands

Unit-4: Regulation of Hormone Action

Mechanism of action of steroidal, non-steroidal hormones with receptors. Bioassays of hormones using RIA & ELISA. Estrous cycle in rat and menstrual cycle in human. Multifaceted role of Vasopressin & Oxytocin. Hormonal regulation of parturition.

Suggested Readings:

1. Guyton and Hall. Textbook of Medical Physiology. 13th Edition
2. Histology: A Text and Atlas. Sixth Edition. Ross & Pawlina. Lippincott Williams & Wilkins.
3. Vertebrate Endocrinology by David O. Norris,

DSE3P: Endocrinology Lab — Credits 02

List of Practical

1. Dissect and display of Endocrine glands in laboratory bred rat.
2. Study of the permanent slides of all the endocrine glands
3. Tissue fixation, embedding in paraffin, microtomy and slide preparation of any endocrine gland
4. Estimation of plasma level of any hormone using ELISA.
5. Designing of primers of any hormone.

DSE-4: Biology of Insects — Credits 06

DSE4T: Biology of Insects — Credits 04

Course Contents:

Unit-1: Introduction

General Features of Insects. Distribution and Success of Insects on the Earth.

Unit-2: Insect Taxonomy

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

Basis of insect classification; Classification of insects up to orders (according to Brusca and Brusca, 2016).

Unit-3: General Morphology of Insects
External Features; Head – Eyes, Types of antennae, Mouth parts w.r.t. feeding habits. Thorax: Wings and wing articulation, Types of Legs adapted to diverse habitat Abdominal appendages and genitalia.

Unit-4: Physiology of Insects
Structure and physiology of Insect body systems - Integumentary, digestive, excretory, circulatory, respiratory, endocrine, reproductive, and nervous system. Photoreceptors: Types, Structure and Function Metamorphosis: Types and Neuroendocrine control of metamorphosis.

Unit-5: Insect Society
Social insects with special reference to termites. Trophallaxis in social insects such as ants, termites and bees.

Unit-6: Insect Plant Interaction
Theory of co-evolution, role of allelochemicals in host plant mediation Host-plant selection by phytophagous insects, Major insect pests in paddy.

Unit-7: Insects as Vectors
Insects as mechanical and biological vectors, Brief discussion on houseflies and mosquitoes as important vectors.

Suggested Readings:

1. A general text book of entomology, Imms , A. D., Chapman & Hall, UK
2. The Insects: Structure and function, Chapman, R. F., Cambridge University Press, UK
3. Principles of Insect Morphology, Snodgrass, R. E., Cornell Univ. Press, USA
4. Introduction to the study of insects, Borror, D. J., Triplehorn, C. A., and Johnson, N. F.,M , Saunders College Publication, USA
5. The Insect Societies, Wilson, E. O., Harward Univ. Press, UK
6. Host Selection by Phytophagous insects, Bernays, E. A., and Chapman, R. F., Chapman and Hall, New York, USA
7. Physiological system in Insects, Klowden, M. J., Academic Press, USA
8. The Insects, An outline of Entomology, Gullan, P. J. , and Cranston, P. S., Wiley Blackwell, UK
9. Insect Physiology and Biochemistry, Nation, J. L., CRC Press, USA
10. Mosquito, Chandra G (2000), Sribhumi Pub. Co.
11. Medical Entomology, Hati A. K., Allied Book Agency, 2010

[Note: Classification to be followed from IMMS A. D. (1938)]

DSE4P: Biology of Insects Lab Credits 02

List of Practical

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

1. Study of life cycle of Mosquito
2. Study of different kinds of antennae, legs and mouth parts of insects
3. Mounting of insect wings, spiracles and genitalia of any insects
4. Methodology of collection, preservation and identification of insects.
5. Morphological studies of various castes of *Apis*, *Camponotus Odontotermes*
6. Study of major insect pests of paddy and their damages
7. Study of Mulberry silk moth as beneficial insect

Or

DSE-4: Wild Life Conservation and Management Credits 06

DSE4T: Wild Life Conservation and Management Credits 04

Course Contents:

Unit-1: Introduction to Wild Life
Values of wild life - positive and negative; Conservation ethics; Importance of conservation; Causes of depletion; World conservation strategies.

Unit-2: Evaluation and management of wild life

Habitat analysis, Physical parameters: Topography, Geology, Soil and water
Biological Parameters: food, cover, forage, browse and cover estimation.
Standard evaluation procedures: remote sensing and GIS.

Unit-3: Management of habitats

Setting back succession; Grazing logging; Mechanical treatment; Advancing the successional process; Cover construction; Preservation of general genetic diversity Restoration of degraded habitats.

Unit-4: Population estimation

Population density, Natality, Birth rate, Mortality, fertility schedules and sex ratio computation; Faecal analysis of ungulates and carnivores; Pug marks and census method.

Unit-5: Aims and objectives of wildlife conservation

Wildlife conservation in India – through ages; different approaches of wildlife conservation; modes of conservation; in-situ conservation and ex-situ conservation: necessity for wildlife conservation.

Unit-6: Management planning of wild life in protected areas

Downloaded from Vidyasagar University by 223.176.41.112 on 26 November 2020 : 11:56:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Zoology_hons6.pdf

Estimation of carrying capacity; Eco tourism / wild life tourism in forests; Concept of climax persistence; Ecology of perturbence.

Unit-7: Man and Wildlife

Causes and consequences of human-wildlife conflicts; mitigation of conflict – an overview; Management of excess population.

Unit-8: Protected areas

National parks & sanctuaries, Community reserve; Important features of protected areas in India; Tiger conservation - Tiger reserves in India; Management challenges in Tiger reserve.

Suggested Readings:

1. Caughley, G., and Sinclair, A.R.E. (1994). Wildlife Ecology and Management. Blackwell Science.
2. Woodroffe R., Thirgood, S. and Rabinowitz, A. (2005). People and Wildlife, Conflict or Co-existence? Cambridge University.
3. Bookhout, T.A. (1996). Research and Management Techniques for Wildlife and Habitats, 5 th edition. The Wildlife Society, Allen Press.
4. Sutherland, W.J. (2000). The Conservation Handbook: Research, Management and Policy. Blackwell Sciences
5. Hunter M.L., Gibbs, J.B. and Sterling, E.J. (2008). Problem-Solving in Conservation Biology and Wildlife Management: Exercises for Class, Field, and Laboratory. Blackwell Publishing.

DSE4P: Wild Life Conservation and Management Lab Credits 02

List of Practical

1. Identification of flora, mammalian fauna, avian fauna, herpeto-fauna.
2. Demonstration of basic equipment needed in wildlife studies use, care and maintenance (Compass, Binoculars, Spotting scope, Range Finders, Global Positioning System, Various types of Cameras and lenses).
3. Familiarization and study of animal evidences in the field; Identification of animals through pug marks, hoof marks, scats, pellet groups, nest, antlers, etc.
4. Demonstration of different field techniques for flora and fauna.
5. PCQ, ten tree method, Circular, Square & rectangular plots, Parker's 2 Step and other methods for ground cover assessment, Tree canopy cover assessment, Shrub cover assessment.
6. Trail / transect monitoring for abundance and diversity estimation of mammals and bird (direct and indirect evidences).

List of the Core and Elective Courses

Core Courses

DSC-1A (CC-1): Animal diversity **Credits: 06**

DSC1AT: Animal diversity **Credits: 04**

Course Contents:

Unit 1: Kingdom Protista
General characters and classification up to classes; Locomotory Organelles and locomotion in Protozoa

Unit 2: Phylum Porifera
General characters and classification up to classes; Canal System in *Sycon*

Unit 3: Phylum Cnidaria
General characters and classification up to classes; Polymorphism in Hydrozoa

Unit 4: Phylum Platyhelminthes
General characters and classification up to classes; Life history of *Taenia solium*

Unit 5: Phylum Nemathelminthes
General characters and classification up to classes; Life history of *Ascaris lumbricoides* and its parasitic adaptations

Unit 6: Phylum Annelida
General characters and classification up to classes; Metamerism in Annelida

Unit 7: Phylum Arthropoda
General characters and classification up to classes; Vision in Arthropoda, Metamorphosis in Insects

Unit 8: Phylum Mollusca
General characters and classification up to classes; Torsion in gastropods

Unit 9: Phylum Echinodermata
General characters and classification up to classes; Water-vascular system in Asteroidea

Unit 10: Protochordates
General features and Phylogeny of Protochordata

Unit 11: Agnatha
General features of Agnatha and classification of cyclostomes up to classes

Unit 12: Pisces
General features and Classification up to orders; Osmoregulation in Fishes

Unit 13: Amphibia

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

General features and Classification up to orders; Parental care

Unit 14: Reptiles
General features and Classification up to orders; Poisonous and non-poisonous snakes, Biting mechanism in snakes

Unit 15: Aves
General features and Classification up to orders; Flight adaptations in birds

Unit 17: Mammals
Classification up to orders; Origin of mammals

Note: Classification of Unit 1-9 to be followed from "Barnes, R.D. (1982). *Invertebrate Zoology*, V Edition"

DSC1AP: Animal diversity (Practical) **Credits: 02**

1. Study of the following specimens:
Amoeba, *Euglena*, *Plasmodium*, *Paramecium*, *Sycon*, *Hyalonema*, and *Euplectella*, *Obelia*, *Physalia*, *Aurelia*, *Tubipora*, *Metridium*, *Taenia solium*, Male and female *Ascaris lumbricoides*, *Aphrodite*, *Nereis*, *Pheretima*, *Hirudinaria*, *Palaemon*, *Cancer*, *Limulus*, *Palamnaeus*, *Scolopendra*, *Julus*, *Periplaneta*, *Apis*, *Chiton*, *Dentalium*, *Pila*, *Unio*, *Loligo*, *Sepia*, *Octopus*, *Pentaceros*, *Ophiura*, *Echinus*, *Cucumaria* and *Antedon*, *Balanoglossus*, *Herdmania*, *Branchiostoma*, *Petromyzon*, *Sphyrna*, *Pristis*, *Torpedo*, *Labeo*, *Exocoetus*, *Anguilla*, *Ichthyophis/Ureotyphlus*, *Salamandra*, *Bufo*, *Hyla*, *Chelone*, *Hemidactylus*, *Chamaeleon*, *Draco*, *Vipera*, *Naja*, *Crocodylus*, *Gavialis*, Any six common birds from different orders, *Sorex*, Bat, *Funambulus*, *Loris*

2. Study of the following permanent slides:
1. T.S. and L.S. of *Sycon*,
2. Study of life history stages of *Taenia*,
3. T.S. of male and female *Ascaris*

3. Key for identification of poisonous and non-poisonous snakes
An "animal album" containing photographs, cut outs, with appropriate write up about the above mentioned taxa. Different taxa/ topics may be given to different sets of students for this purpose.

Suggested Readings:

- Ruppert and Barnes, R.D. (2006). *Invertebrate Zoology*, VIII Edition. Holt Saunders International Edition.
- Barnes, R.S.K., Calow, P., Olive, P.J.W., Golding, D.W. and Spicer, J.I. (2002). *The Invertebrates: A New Synthesis*, III Edition, Blackwell Science
- Young, J. Z. (2004). *The Life of Vertebrates*. III Edition. Oxford university press.
- Pough H. *Vertebrate life*, VIII Edition, Pearson International.
- Hall B.K. and Hallgrimsson B. (2008). *Strickberger's Evolution*. IV Edition. Jones and Bartlett Publishers Inc.

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University

DSC-1B (CC-2): Comparative Anatomy and Developmental Biology of Vertebrates
Credits: 06

DSC1BT: Comparative Anatomy and Developmental Biology of Vertebrates
Credits: 04

Course Contents:

Unit 1: Integumentary System
Derivatives of integument w.r.t. glands and digital tips

Unit 2: Skeletal System
Evolution of visceral arches

Unit 3: Digestive System
Brief account of alimentary canal and digestive glands

Unit 4: Respiratory System
Brief account of gills, lungs, air sacs and swim bladder

Unit 5: Circulatory System
Evolution of heart and aortic arches

Unit 6: Urinogenital System
Succession of kidney, Evolution of urinogenital ducts

Unit 7: Nervous System
Comparative account of brain

Unit 8: Sense Organs
Receptors and its types.

Unit 9: Early Embryonic Development
Gametogenesis: Spermatogenesis and oogenesis w.r.t. mammals, vitellogenesis in birds; Fertilization: external (amphibians), internal (mammals), blocks to polyspermy; Early development of frog and humans (structure of mature egg and its membranes, patterns of cleavage, fate map, up to formation of gastrula);types of morphogenetic movements; Fate of germ layers; Neurulation in frog embryo.

Unit 10: Late Embryonic Development
Implantation of embryo in humans, Formation of human placenta and functions, other types of placenta on the basis of histology; Metamorphic events in frog life cycle and its hormonal regulation.

Unit 11: Control of Development
Fundamental processes in development (brief idea) – Gene activation, determination, induction, Differentiation, morphogenesis, intercellular communication, cell movements and cell death

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

DSC1BP: Comparative Anatomy and Developmental Biology of Vertebrates (Practical) Credits: 02

1. Osteology:
    a) Disarticulated skeleton of fowl and rabbit
    b) Carapace and plastron of turtle /tortoise
    c) Mammalian skulls: One herbivorous and one carnivorous animal.
2. Frog - Study of developmental stages - whole mounts and sections through permanent slides – cleavage stages, blastula, gastrula neurula, tail bud stage, tadpole external and internal gill stages.
3. Study of the different types of placenta- histological sections through permanent slides or photomicrographs.
4. Study of placental development in humans by ultrasound scans.
5. Examination of gametes - frog/rat - sperm and ova through permanent slides or photomicrographs.

Suggested Readings:

- Kardong, K.V. (2005) *Vertebrates' Comparative Anatomy, Function and Evolution*. IV Edition. McGraw-Hill Higher Education.
- Kent, G.C. and Carr R.K. (2000). *Comparative Anatomy of the Vertebrates*. IX Edition. The McGraw-Hill Companies.
- Hilderbrand, M and Gaslow G.E. *Analysis of Vertebrate Structure*, John Wiley and Sons.
- Walter, H.E. and Sayles, L.P; *Biology of Vertebrates*, Khosla Publishing House.
- Gilbert, S. F. (2006). Developmental Biology, VIII Edition, Sinauer Associates, Inc., Publishers, Sunderland, Massachusetts, USA.
- Balinsky, B.I. (2008). An introduction to Embryology, International Thomson Computer Press.
- Carlson, Bruce M (1996). Patten's Foundations of Embryology, McGraw Hill, Inc.

DSC-1C (CC-3): Physiology and Biochemistry Credits: 06

DSC1CT: Physiology and Biochemistry Credits: 04

Course Contents:

Unit 1: Nerve and muscle
Structure of a neuron, Resting membrane potential, Graded potential, Origin of Action potential and its propagation in myelinated and non-myelinated nerve fibres, Ultra-structure of skeletal muscle, Molecular and chemical basis of muscle contraction

Unit 2: Digestion
Physiology of digestion in the alimentary canal; Absorption of carbohydrates, proteins, lipids

Unit 3: Respiration
Pulmonary ventilation, Respiratory volumes and capacities, Transport of oxygen and carbon dioxide in blood.

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Unit 4: Excretion
Structure of nephron, Mechanism of Urine formation, Counter-current Mechanism

Unit 5: Cardiovascular system
Composition of blood, Hemostasis, Structure of Heart, Origin and conduction of the cardiac impulse,Cardiac cycle

Unit 6: Reproduction and Endocrine Glands
Physiology of male reproduction: Hormonal control of spermatogenesis; Physiology of female reproduction: hormonal control of menstrual cycle Structure and function of pituitary, thyroid, parathyroid, pancreas and adrenal

Unit 7: Carbohydrate Metabolism
Glycolysis, Krebs Cycle, Pentose phosphate pathway, Gluconeogenesis, Glycogen metabolism, Review of electron transport chain

Unit 8: Lipid Metabolism
Biosynthesis and β oxidation of palmitic acid

Unit 9: Protein metabolism
Transamination, Deamination and Urea cycle

Unit 10: Enzymes
Introduction, Mechanism of action, Enzyme kinetics, inhibition and regulation

DSC1CP: Physiology and Biochemistry (Practical): Credits: 02

1. Preparation of hemin and hemochromogen crystals.
2. Study of permanent histological sections of mammalian pituitary, thyroid, pancreas, adrenal gland.
3. Study of permanent slides of spinal cord, duodenum, liver, lung, kidney, bone, cartilage.
4. Qualitative tests to identify functional groups of carbohydrates in given solutions (Glucose, Fructose, Sucrose, Lactose).
5. Estimation of total protein in given solutions by Lowry's method.
6. Study of activity of salivary amylase under optimum conditions

Suggested Readings:

- Tortora, G.J. and Derrickson, B.H. (2009). *Principles of Anatomy and Physiology*, XII Edition, John Wiley & Sons, Inc.
- Widmaier, E.P., Raff, H. and Strang, K.T. (2008) *Vander's Human Physiology*, XI Edition., McGraw Hill
- Guyton, A.C. and Hall, J.E. (2011). T*extbook of Medical Physiology*, XII Edition, Harcourt Asia Pvt. Ltd/ W.B. Saunders Company
- Berg, J. M., Tymoczko, J. L. and Stryer, L. (2006). *Biochemistry*. VI Edition. W.H Freeman and Co.

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

- Nelson, D. L., Cox, M. M. and Lehninger, A.L. (2009). *Principles of Biochemistry*. IV Edition. W.H. Freeman and Co.
- Murray, R.K., Granner, D.K., Mayes, P.A. and Rodwell, V.W. (2009). *Harper's Illustrated Biochemistry*. XXVIII Edition. Lange Medical Books/Mc Graw3Hill.

DSC-1D (CC-4): Genetics and Evolutionary Biology **Credits: 06**

DSC1DT: Genetics and Evolutionary Biology **Credits: 04**

Course Contents:

Unit 1: Introduction to Genetics
Mendel's work on transmission of traits, Genetic Variation, Molecular basis of genetic information

Unit 2: Mendelian Genetics and its Extension
Principles of Inheritance, Chromosome theory of inheritance, Incomplete dominance and codominance, Multiple alleles, Lethal alleles, Epistasis, Pleiotropy, sex linked inheritance, extra-chromosomal inheritance

Unit 3: Linkage, Crossing Over and Chromosomal Mapping
Linkage and crossing over, Recombination frequency as a measure of linkage intensity, two factor and three factor crosses, Interference and coincidence, Somatic cell genetics – an alternative approach to gene mapping

Unit 4: Mutations
Chromosomal Mutations: Deletion; Duplication; Inversion; Translocation; Aneuploidy and Polyploidy; Gene mutations: Induced versus Spontaneous mutations, Back versus Suppressor mutations,

Unit 5: Sex Determination
Chromosomal mechanisms, dosage compensation

Unit 6: History of Life
Major Events in History of Life

Unit 7: Introduction to Evolutionary Theories
Lamarckism, Darwinism, Neo-Darwinism

Unit 8: Direct Evidences of Evolution
Types of fossils, Incompleteness of fossil record, Dating of fossils, Phylogeny of horse

Unit 9: Processes of Evolutionary Change
Organic variations; Isolating Mechanisms; Natural selection (Example: Industrial melanism); Types of natural selection (Directional, Stabilizing, Disruptive), Artificial selection

Unit 10: Species Concept

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Biological species concept (Advantages and Limitations); Modes of speciation (Allopatric, Sympatric)

Unit 11: Macro-evolution
Macro-evolutionary Principles (example: Darwin's Finches)

Unit 12: Extinction
Mass extinction (Causes, Names of five major extinctions, K-T extinction in detail), Role of extinction in evolution

DSC1DP: Genetics and Evolutionary Biology (Practical) Credits: 02

1. Study of Mendelian inheritance and gene interactions (Non- Mendelian inheritance) using suitable examples. Verify the results using Chi-square test.
2. Study of Linkage, recombination, gene mapping using the data.
3. Study of Human Karyotypes (normal and abnormal).
4. Study of fossil evidences from plaster cast models and pictures
5. Study of homology and analogy from suitable specimens/ pictures
6. Charts:
    a. Phylogeny of horse with diagrams/ cut outs of limbs and teeth of horse ancestors
    b. Darwin's Finches with diagrams/ cut outs of beaks of different species
7. Visit to Natural History Museum and submission of report

Suggested Readings:

- Gardner, E.J., Simmons, M.J., Snustad, D.P. (2008). *Principles of Genetics*. VIII Edition. Wiley India.
- Snustad, D.P., Simmons, M.J. (2009). *Principles of Genetics*. V Edition. John Wiley and Sons Inc.
- Klug, W.S., Cummings, M.R., Spencer, C.A. (2012). *Concepts of Genetics*. X Edition. Benjamin Cummings.
- Russell, P. J. (2009). *Genetics- A Molecular Approach.* III Edition. Benjamin Cummings.
- Griffiths, A.J.F., Wessler, S.R., Lewontin, R.C. and Carroll, S.B. *Introduction to Genetic Analysis*. IX Edition. W. H. Freeman and Co.
- Ridley, M. (2004). *Evolution*. III Edition. Blackwell Publishing
- Barton, N. H., Briggs, D. E. G., Eisen, J. A., Goldstein, D. B. and Patel, N. H. (2007). *Evolution*. Cold Spring, Harbour Laboratory Press.
- Hall, B. K. and Hallgrimsson, B. (2008). *Evolution*. IV Edition. Jones and Bartlett Publishers
- Campbell, N. A. and Reece J. B. (2011). *Biology*. IX Edition, Pearson, Benjamin, Cummings.
- Douglas, J. Futuyma (1997). *Evolutionary Biology*. Sinauer Associates.

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Discipline Specific Elective (DSE)

DSE - 1: Applied Zoology **Credits: 06**

DSE1T: Applied Zoology **Credits: 04**

Course Contents:

Unit 1: Introduction to Host-parasite Relationship
Host, Definitive host, Intermediate host, Parasitism, Symbiosis, Commensalism, Reservoir, Zoonosis

Unit 2: Epidemiology of Diseases
Transmission, Prevention and control of diseases: Tuberculosis, typhoid

Unit 3: Rickettsiae and Spirochaetes
Brief account of *Rickettsia prowazekii*, *Borrelia recurrentis* and *Treponema pallidum*

Unit 4: Parasitic Protozoa
Life history and pathogenicity of *Entamoeba histolytica*, *Plasmodium vivax* and *Trypanosoma gambiense*

Unit 5: Parasitic Helminthes
Life history and pathogenicity of *Ancylostoma duodenale* and *Wuchereria bancrofti*

Unit 6: Insects of Economic Importance
Biology, Control and damage caused by *Helicoverpa armigera*, *Pyrilla perpusilla* and *Papilio demoleus*, *Callosobruchus chinensis*, *Sitophilus oryzae* and *Tribolium castaneum*

Unit 7: Insects of Medical Importance
Medical importance and control of *Pediculus humanus corporis*, *Anopheles*, *Culex*, *Aedes*, *Xenopsylla cheopis*

Unit 8: Animal Husbandry
Preservation and artificial insemination in cattle; Induction of early puberty and synchronization of estrus in cattle

Unit 9: Poultry Farming
Principles of poultry breeding, Management of breeding stock and broilers, Processing and preservation of eggs

Unit 10: Fish Technology
Genetic improvements in aquaculture industry; Induced- breeding and transportation of fish seed

DSE1P: Applied Zoology (Practical) **Credits: 02**

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

1. Study of *Plasmodium vivax*, *Entamoeba histolytica*, *Trypanosoma gambiense*, *Ancylostoma duodenale* and *Wuchereria bancrofti* and their life stages through permanent slides/photomicrographs or specimens.
2. Study of arthropod vectors associated with human diseases: *Pediculus*, *Culex*, *Anopheles*, *Aedes* and *Xenopsylla.*
3. Study of insect damage to different plant parts/stored grains through damaged products/photographs.
4. Identifying feature and economic importance of *Helicoverpa* (*Heliothis*) *armigera*, *Papilio demoleus*, *Pyrilla perpusilla*, *Callosobruchus chinensis*, *Sitophilus oryzae* and *Tribolium castaneum*
5. Visit to poultry farm or animal breeding centre. Submission of visit report
6. Maintenance of freshwater aquarium

Suggested Readings:

- Park, K. *Preventive and Social Medicine*. XVI Edition. B.B Publishers.
- Arora, D. R and Arora, B. (2001). *Medical Parasitology*. II Edition. CBS Publications and Distributors.
- Kumar and Cotran. *Pathological Basis of Diseases*.
- Atwal, A.S. (1986). *Agricultural Pests of India and South East Asia*, Kalyani Publishers.
- Dennis, H. (2009). *Agricultural Entomology*. Timber Press.
- Hafez, E. S. E. (1962). *Reproduction in Farm Animals*. Lea & Fabiger Publisher
- Dunham R.A. (2004). *Aquaculture and Fisheries Biotechnology Genetic Approache*s. CABI publications, U.K.
- Pedigo, L.P. (2002). *Entomology and Pest Management*, Prentice Hall.

Or

DSE- 1: Aquatic biology **Credits: 06**

DSE1T: Aquatic biology **Credits: 04**

Course Contents:

UNIT 1: Aquatic Biomes

Brief introduction of the aquatic biomes: Freshwater ecosystem (lakes, wetlands, streams and rivers), estuaries, intertidal zones, oceanic pelagic zone, marine benthic zone and coral reefs.

UNIT 2: Freshwater Biology

Lakes: Origin and classification, Lake as an Ecosystem, Lake morphometry, Physico–chemical Characteristics: Light, Temperature, Thermal stratification, Dissolved Solids, Carbonate, Bicarbonates, Phosphates and Nitrates, Turbidity; Dissolved gases (oxygen, carbon dioxide). Nutrient Cycles in Lakes-Nitrogen, Sulphur and Phosphorous.

Streams: Different stages of stream development, Physico-chemical environment, Adaptation of hill-stream fishes.

UNIT 3: Marine Biology

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Salinity and density of Sea water, Continental shelf, Adaptations of deep sea organisms, Coral reefs, Sea weeds.

UNIT 4: Management of Aquatic Resources
Causes of pollution: Agricultural, Industrial, Sewage, Thermal and Oil spills, Eutrophication, Management and conservation (legislations), Sewage treatment Water quality assessment- BOD and COD.

DSE1P: Aquatic Biology (Practical) **Credits: 02**

1. Determine the area of a lake using graphimetric and gravimetric method.
2. Identify the important macrophytes, phytoplanktons and zooplanktons present in a lake ecosystem.
3. Determine the amount of Turbidity/transparency, Dissolved oxygen, carbon dioxide, alkalinity (carbonates & bicarbonates) in water collected from a nearby lake/ water body.
4. Instruments used in limnology (Secchi disc, Van Dorn Bottle, Conductivity meter, Turbidity meter, PONAR grab sampler) and their significance.
5. A Project Report on a visit to a Sewage treatment plant/Marine bioreserve/ Fisheries Institutes.

Suggested Readings:

- Anathakrishnan : Bioresources Ecology 3rd Edition
- Goldman : Limnology, 2nd Edition
- Odum and Barrett : Fundamentals of Ecology, 5th Edition
- Pawlowski : Physicochemical Methods for Water and Wastewater Treatment, 1st Edition
- Wetzel : Limnology, 3rd edition
- Trivedi and Goyal : Chemical and biological methods for water pollution studies
- Welch : Limnology Vols. I-II

Or

DSE- 1: Immunology **Credits: 06**

DSE1T: Immunology **Credits: 04**

Course Contents:

Unit 1: **Overview of the Immune System**
Introduction to basic concepts in immunology, components of immune system, principles of innate and adaptive immune system

Unit 2: **Cells and Organs of the Immune System**
Haematopoeisis, Cells of immune system and organs (primary and secondary lymphoid organs) of the immune system

Unit 3: Antigens
Basic properties of antigens, B and T cell epitopes, haptens and adjuvants

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Unit 4: **Antibodies**
Structure, classes and function of antibodies, monoclonal antibodies, antigen antibody interactions as tools for research and diagnosis

Unit 5: **Working of the immune system**
Structure and functions of MHC, exogenous and endogenous pathways of antigen presentation and processing, Basic properties and functions of cytokines, Complement system: Components and pathways.
Unit 6: **Immune system in health and disease**
Gell and Coombs' classification and brief description of various types of hypersensitivities, Introduction to concepts of autoimmunity and immunodeficiency,

Unit 7: Vaccines
General introduction to vaccines, Various types of vaccines

DSE1P: Immunology (Practical) **Credits: 02**

1. Demonstration of lymphoid organs
2. Histological study of spleen, thymus and lymph nodes through slides/ photographs
3. Preparation of stained blood film to study various types of blood cells.
4. Ouchterlony's double immuno-diffusion method.
5. ABO blood group determination.
6. Cell counting and viability test from splenocytes of farm bred animals/cell lines.
7. Demonstration of
    a. ELISA
    b. Immunoelectrophoresis

(*Subject to UGC guidelines)

Suggested Readings:

- Kindt, T. J., Goldsby, R.A., Osborne, B. A. and Kuby, J (2006). *Immunology*, VI Edition. W.H. Freeman and Company.
- David, M., Jonathan, B., David, R. B. and Ivan R. (2006). *Immunology*, VII Edition, Mosby, Elsevier Publication.
- Abbas, K. Abul and Lechtman H. Andrew (2003.) *Cellular and Molecular Immunology*. V Edition. Saunders Publication.

DSE - 2: Animal Biotechnology **Credits: 06**

DSE2T: Animal Biotechnology **Credits: 04**

Course Contents:

Unit 1: Introduction
Concept and scope of biotechnology

Unit 2: Molecular Techniques in Gene manipulation

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Cloning vectors: Plasmids, Cosmids, Phagemids, Lambda Bacteriophage, M13, BAC, YAC, MAC and Expression vectors (characteristics) Restriction enzymes: nomenclature, detailed study of Type II. Transformation techniques: Calcium chloride method and electroporation. Construction of genomic and cDNA libraries and screening by colony and plaque hybridization Southern, Northern and Western blotting; DNA sequencing: Sanger method; Polymerase Chain Reaction, DNA Finger Printing and DNA micro array

Unit 3: Genetically Modified Organisms

Production of cloned and transgenic animals: Nuclear Transplantation, Retroviral Method, DNA microinjection, Applications of transgenic animals: Production of pharmaceuticals, production of donor organs, knockout mice. Production of transgenic plants: *Agrobacterium* mediated transformation. Applications of transgenic plants: insect and herbicide resistant plants.

Unit 4: Culture Techniques and Applications

Animal cell culture, Expressing cloned genes in mammalian cells, Molecular diagnosis of genetic diseases (Cystic fibrosis, Sickle cell anemia); Recombinant DNA in medicines: Recombinant insulin and human growth hormone, Gene therapy

DSE2P: Animal Biotechnology (Practical): Credits: 02

1. Genomic DNA isolation from *E. coli*
2. Plasmid DNA isolation (pUC 18/19) from *E. coli*
3. Restriction digestion of plasmid DNA.
4. Construction of circular and linear restriction map from the data provided.
5. Calculation of transformation efficiency from the data provided.
6. To study following techniques through photographs
    a. Southern Blotting
    b. Northern Blotting
    c. Western Blotting
    d. DNA Sequencing (Sanger's Method)
    e. PCR
    f. DNA fingerprinting
7. Project report on animal cell culture

Suggested Readings:

- Brown, T.A. (1998). *Molecular Biology Labfax II: Gene Cloning and DNA Analysis*. II Edition, Academic Press, California, USA.
- Glick, B.R. and Pasternak, J.J. (2009). *Molecular Biotechnology - Principles and Applications of Recombinant DNA*. IV Edition, ASM press, Washington, USA.
- Griffiths, A.J.F., J.H. Miller, Suzuki, D.T., Lewontin, R.C. and Gelbart, W.M. (2009). *An Introduction to Genetic Analysis*. IX Edition. Freeman and Co., N.Y., USA.
- Snustad, D.P. and Simmons, M.J. (2009). *Principles of Genetics*. V Edition, John Wiley and Sons Inc.
- Watson, J.D., Myers, R.M., Caudy, A. and Witkowski, J.K. (2007). *Recombinant DNAGenes and Genomes- A Short Course*. III Edition, Freeman and Co., N.Y., USA.

DSE- 2: Reproductive Biology **Credits: 06**

DSE2T: Reproductive Biology **Credits: 04**

Course Contents:

Unit 1: Reproductive Endocrinology
Gonadal hormones and mechanism of hormone action, steroids, glycoprotein hormones, and prostaglandins, hypothalamo – hypophyseal – gonadal axis, regulation of gonadotrophin secretion in male and female; Reproductive System: Development and differentiation of gonads, genital ducts, external genitalia, mechanism of sex differentiation.

Unit 2: Functional anatomy of male reproduction
Outline and histological structure of male reproductive system in rat and human; Testis: Cellular functions, germ cell, system cell renewal; Spermatogenesis: kinetics and hormonal regulation; Androgen synthesis and metabolism; Epididymal function and sperm maturation;
Accessory glands functions; Sperm transportation in male tract

Unit 3: Functional anatomy of female reproduction
Outline and histological structure of female reproductive system in rat and human; Ovary: folliculogenesis, ovulation, corpus luteum formation and regression; Steroidogenesis and secretion of ovarian hormones; Reproductive cycles (rat and human) and their regulation, changes in the female tract; Ovum transport in the fallopian tubes; Sperm transport in the female tract, fertilization; Hormonal control of implantation; Hormonal regulation of gestation, pregnancy diagnosis, foeto – maternal relationship; Mechanism of parturition and its hormonal regulation; Lactation and its regulation

Unit 4: Reproductive Health
Infertility in male and female: causes, diagnosis and management; Assisted Reproductive Technology: sex selection, sperm banks, frozen embryos, in vitro fertilization, ET, EFT, IUT, ZIFT, GIFT, ICSI, PROST; Modern contraceptive technologies; Demographic terminology used in family planning

DSE2P: Reproductive Biology (Practical) **Credits: 02**

1. Study of animal house: set up and maintenance of animal house, breeding techniques, care of normal and experimental animals.
2. Examination of vaginal smear rats from live animals.
3. Surgical techniques: principles of surgery in endocrinology. Ovarectomy, hysterectomy, castration and vasectomy in rat.
4. Examination of histological sections from photomicrographs/ permanent slides of rat/human: testis, epididymis and accessory glands of male reproductive systems;

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Sections of ovary, fallopian tube, uterus (proliferative and secretory stages), cervix and vagina.

5. Human vaginal exfoliate cytology.
6. Sperm count and sperm motility in rat
7. Study of modern contraceptive devices

Suggested Readings:

- Austin, C.R. and Short, R.V. reproduction in Mammals. Cambridge University Press.
- Degroot, L.J. and Jameson, J.L. (eds). Endocrinology. W.B. Saunders and Company.
- Knobil, E. et al. (eds). The Physiology of Reproduction. Raven Press Ltd.
- Hatcher, R.A. et al. The Essentials of Contraceptive Technology. Population Information Programme.

Or

DSE- 2: Insect, Vector and Diseases **Credits: 06**

DSE2T: Insect, Vector and Diseases **Credits: 04**

Course Contents:

Unit I: Introduction to Insects

General Features of Insects, Morphological features, Head – Eyes, Types of antennae, Mouth parts w.r.t. feeding habits

Unit II: Concept of Vectors

Brief introduction of Carrier and Vectors (mechanical and biological vector), Reservoirs, Host-vector relationship, Vectorial capacity, Adaptations as vectors, Host Specificity

Unit III: Insects as Vectors

Classification of insects up to orders, detailed features of orders with insects as vectors – Diptera, Siphonaptera, Siphunculata, Hemiptera

Unit IV: Dipteran as Disease Vectors

Dipterans as important insect vectors – Mosquitoes, Sand fly, Houseflies; Study of mosquito-borne diseases – Malaria, Dengue, Chikungunya, Viral encephalitis, Filariasis; Control of mosquitoes Study of sand fly-borne diseases – Visceral Leishmaniasis, Cutaneous Leishmaniasis, Phlebotomus fever; Control of Sand fly Study of house fly as important mechanical vector, Myiasis, Control of house fly

Unit IV: Siphonaptera as Disease Vectors

Fleas as important insect vectors; Host-specificity, Study of Flea-borne diseases – Plague, Typhus fever; Control of fleas

Unit V: Siphunculata as Disease Vectors

Human louse (Head, Body and Pubic louse) as important insect vectors; Study of louse-borne diseases –Typhus fever, Relapsing fever, Trench fever, Vagabond's disease, Phthiriasis; Control of human louse

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Unit VI: Hempitera as Disease Vectors
Bugs as insect vectors; Blood-sucking bugs; Chagas disease, Bed bugs as mechanical vectors, Control and prevention measures

DSE2P: Insect Vector and Diseases (Practical) **Credits: 02**

1. Study of different kinds of mouth parts of insects
2. Study of following insect vectors through permanent slides/ photographs: *Aedes, Culex, Anopheles*, *Pediculus humanus capitis, Pediculus humanus corporis, Phithirus pubis, Xenopsylla cheopis, Cimex lectularius, Phlebotomus argentipes, Musca domestica,* through permanent slides/ photographs
3. Study of different diseases transmitted by above insect vectors
4. Submission of a project report on any one of the insect vectors and disease transmitted

Suggested Readings:

- Imms, A.D. (1977). *A General Text Book of Entomology*. Chapman & Hall, UK
- Chapman, R.F. (1998). *The Insects: Structure and Function.* IV Edition, Cambridge University Press, UK
- Pedigo L.P. (2002). *Entomology and Pest Management.* Prentice Hall Publication
- Mathews, G. (2011). *Integrated Vector Management: Controlling Vectors of Malaria and Other Insect Vector Borne Diseases*. Wiley-Blackwell

Or

DSE- 2: Project Work **Credits: 06**

Skill Enhancement Courses (SEC)

SEC - 1: Apiculture **Credits: 02**

SECT: Apiculture

Course Contents:

Unit 1: Biology of Bees
History, Classification and Biology of Honey Bees. Social Organization of Bee Colony

Unit 2: Rearing of Bees
Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth. Bee Pasturage. Selection of Bee Species for Apiculture. Bee Keeping Equipment. Methods of Extraction of Honey (Indigenous and Modern)

Unit 3: Diseases and Enemies
Bee Diseases and Enemies. Control and Preventive measures.

Unit 4: Bee Economy
Products of Apiculture Industry and its Uses (Honey, Bees Wax, Propolis), Pollen etc

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Unit 5: Entrepreneurship in Apiculture
Bee Keeping Industry – Recent Efforts, Modern Methods in employing artificial. Beehives for cross pollination in horticultural gardens

Suggested Readings:

- Prost, P. J. (1962). *Apiculture*. Oxford and IBH, New Delhi.
- Bisht D.S., *Apiculture*, ICAR Publication.
- Singh S., *Beekeeping in India*, Indian council of Agricultural Research, NewDelhi.

SEC - 2: Aquarium Fish Keeping **Credits: 02**

SEC2T: Aquarium Fish Keeping

Course Contents:

Unit1: Introduction to Aquarium Fish Keeping
The potential scope of Aquarium Fish Industry as a Cottage Industry, Exotic and Endemic species of Aquarium Fishes

Unit 2: Biology of Aquarium Fishes
Common characters and sexual dimorphism of Fresh water and Marine Aquarium fishes such as Guppy, Molly, Sword tail, Gold fish, Angel fish, Blue morph, Anemone fish and Butterfly fish

Unit 3: Food and feeding of Aquarium fishes
Use of live fish feed organisms. Preparation and composition of formulated fish feeds

Unit 4: Fish Transportation
Live fish transport - Fish handling, packing and forwarding techniques.

Unit 5: Maintenance of Aquarium
General Aquarium maintenance – budget for setting up an Aquarium Fish Farm as a Cottage Industry

SEC-3: Medical Diagnostics **Credits: 02**

SEC3T: Medical Diagnostics

Course Contents:

Unit 1: Introduction to Medical Diagnostics and its Importance

Unit 2: Diagnostics Methods Used for Analysis of Blood
Blood composition, Preparation of blood smear and Differential Count (D.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentary Rate (E.S.R), Packed Cell Volume (P.C.V.)

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Unit 3: Diagnostic Methods Used for Urine Analysis
Urine Analysis: Physical characteristics; Abnormal constituents

Unit 4:Non-infectious Diseases
Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type I and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/Kit

Unit 5: Infectious Diseases
Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis

Unit 6: Tumours
Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bone fracture, PET, MRI and CT Scan (using photographs).

Suggested Readings:

- Park, K. (2007), *Preventive and Social Medicine*, B.B. Publishers
- Godkar P.B. and Godkar D.P. *Textbook of Medical Laboratory Technology*, II Edition, Bhalani Publishing House
- Cheesbrough M., *A Laboratory Manual for Rural Tropical Hospitals, A Basis for Training Courses*
- Guyton A.C. and Hall J.E. T*extbook of Medical Physiology*, Saunders
- Robbins and Cortan, *Pathologic Basis of Disease,* VIIIEdition, Saunders
- Prakash, G. (2012), *Lab Manual on Blood Analysis and Medical Diagnostics*, S. Chand and Co. Ltd.

Or

SEC- 3: Research Methodology **Credits: 02**

SEC3T: Research Methodology

Course Contents:

Unit 1: Foundations of Research
Meaning, Objectives, Motivation: Research Methods *vs* Methodology, Types of Research: Analytical *vs* Descriptive, Quantitative *vs* Qualitative, Basic *vs* Applied

Unit 2: Research Design
Need for research design: Features of good design, Important concepts related to good design- Observation and Facts, Prediction and Explanation, Development of Models. Developing a research plan: Problem identification, Experimentation,
Determining experimental and sample designs

Unit 3: Data Collection, Analysis and Report Writing
Observation and Collection of Data-Methods of data collection- Sampling Methods, Data Processing and Analysis Strategies, Technical Reports and Thesis writing, Preparation of Tables and Bibliography. Data Presentation using digital technology

Unit 4: Ethical Issues

Downloaded from Vidyasagar University by 66.249.82.215 on 15 February 2019 : 19:20:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Zoology_General.pdf

Intellectual property Rights, Commercialization, Copy Right, Royalty, Patent law, Plagiarism, Citation, Acknowledgement

Suggested Readings:

- Anthony, M, Graziano, A.M. and Raulin, M.L. 2009. Research Methods: A Process of Inquiry, Allyn and Bacon.
- Walliman, N. 2011.Research Methods- The Basics. Taylor and Francis, London, New York.
- Wadhera, B.L.: Law Relating to Patents, Trade Marks, Copyright Designs and Geographical Indications, 2002, Universal Law publishing
- C.R.Kothari: Research Methodology, New Age International, 2009
- Coley, S.M. and Scheinberg, C.A. 1990, "Proposal writing". Stage Publications.

SEC - 4: Sericulture **Credits: 02**

SEC4T: Sericulture

Course Contents:

Unit 1: Introduction
Sericulture: Definition, history and present status; Silk route, Types of silkworms, Distribution and Races, Exotic and indigenous races, Mulberry and non-mulberry Sericulture

Unit 2: Biology of Silkworm
Life cycle of *Bombyx mori*, Structure of silk gland and secretion of silk

Unit 3: Rearing of Silkworms
Selection of mulberry variety and establishment of mulberry garden, Rearing house and rearing appliances, Disinfectants: Formalin, bleaching powder, RKO, Silkworm rearing technology: Early age and Late age rearing, Types of mountages, Spinning, harvesting and storage of cocoons

Unit 4: Pests and Diseases
Pests of silkworm: Uzi fly, dermestid beetles and vertebrates, Pathogenesis of silkworm diseases: Protozoan, viral, fungal and bacterial. Control and prevention of pests and diseases

Unit 5: Entrepreneurship in Sericulture
Prospectus of Sericulture in India: Sericulture industry in different states, employment, potential in mulberry and non-mulberry sericulture. Visit to various, sericulture centres.

Suggested Readings:

- Handbook of Practical Sericulture: S.R. Ullal and M.N. Narasimhanna CSB, Bangalore
- Appropriate Sericultural Techniques; Ed. M. S. Jolly, Director, CSR & TI, Mysore.
- Handbook of Silkworm Rearing: Agriculture and Technical Manual-1, Fuzi Pub. Co. Ltd., Tokyo, Japan.
- Manual of Silkworm Egg Production; M. N. Narasimhanna, CSB, Bangalore.

List of Core Course (CC)

CC-1: Phycology and Microbiology
CC-2: Bio-molecules and Cell Biology
CC-3: Mycology and Phytopathology
CC-4: Archegoniate
CC-5: Anatomy of Angiosperms
CC-6: Economic Botany
CC-7: Genetics
CC-8: Molecular Biology
CC-9: Plant Ecology and Phytogeography
CC-10: Plant Systematics
CC-11: Reproductive Biology of Angiosperms
CC-12: Plant Physiology
CC-13: Plant Metabolism
CC-14: Plant Biotechnology

Discipline Specific Electives (DSE)

DSE-1: Natural Resource Management
Or
DSE-1: Biostatistics
DSE-2: Plant Breeding
Or
DSE-2: Stress Biology
DSE-3: Industrial and Environmental Microbiology
Or
DSE-3: Bioinformatics
DSE-4: Analytical Techniques in Plant Sciences
Or
DSE- 4: Research Methodology

Skill Enhancement Course (SEC)

SEC-1: Biofertilizers
Or
SEC- 1: Floriculture

SEC-2: Medicinal Botany
Or
SEC-2: Mushroom Culture Technology

Generic Electives (GE)

GE-1: Biodiversity (Microbes, Algae, Fungi and Archegoniate)
GE-2 : Plant Ecology and Taxonomy
GE-3: Economic Botany and Plant Biotechnology
GE-4: Plant Anatomy and Embryology
Or
GE-4: Plant Physiology and Metabolism

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University

Core Courses(CC)

CC-1: Phycology and Microbiology **Credits 06**

C1T: Phycology and Microbiology **Credits 04**

Course Contents:

Unit 1: Introduction to microbial world
Microbial nutrition, growth and metabolism. Economic importance of viruses with reference to vaccine production, role in research, medicine and diagnostics, as causal organisms of plant diseases. Economic importance of bacteria with reference to their role in agriculture and industry (fermentation and medicine).

Unit 2: Viruses
Discovery, physiochemical and biological characteristics; classification (Baltimore), general structure with special reference to viroids and prions; replication (general account), DNA virus (T-phage), lytic and lysogenic cycle; RNA virus (TMV).

Unit 3: Bacteria
Discovery, general characteristics; Types-archaebacteria, eubacteria, wall-less forms (mycoplasma and spheroplasts); Cell structure; Nutritional types; Reproduction-vegetative, asexual and recombination (conjugation, transformation and transduction).

Unit 4: Algae
General characteristics; Ecology and distribution; range of thallus organization; Cell structure and components; cell wall, pigment system, reserve food (of only groups represented in the syllabus), flagella; methods of reproduction; Classification; criteria, system of Fritsch, and evolutionary classification of Lee (only upto groups) and Van – den Hoek et.al(1982); Significant contributions of important phycologists (F.E. Fritsch, G.M. Smith, R.N. Singh, T.V. Desikachary, H.D. Kumar, M.O.P. Iyengar). Role of algae in the environment, agriculture, biotechnology and industry.

Unit 5: Cyanophyta and Xanthophyta
Ecology and occurrence; Range of thallus organization; Cell structure; Reproduction, Morphology and life-cycle of *Nostoc* and *Vaucheria.*

Unit 6: Chlorophyta and Charophyta
General characteristics; Occurrence; Range of thallus organization; Cell structure; Reproduction. Morphology and life-cycles of *Chlamydomonas, Volvox, Oedogonium, Coleochaete, Chara.*
Evolutionary significance of *Prochloron.*

Unit 7: Phaeophyta and Rhodophyta
Characteristics; Occurrence; Range of thallus organization; Cell structure; Reproduction. Morphology and life-cycles of *Ectocarpus, Fucus* and *Polysiphonia.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

C1P: Phycology and Microbiology (Practical) **Credits 02**

(Practical)

Microbiology

1. Electron micrographs/Models of viruses – T-Phage and TMV, Line drawings/ Photographs of Lytic and Lysogenic Cycle.
2. Types of Bacteria to be observed from temporary/permanent slides/photographs. Electron micrographs of bacteria, binary fission, endospore, conjugation, root Nodule.
3. Gram staining.
4. Endospore staining with malachite green using the (endospores taken from soil bacteria).
5. Study of bacteria from root nodules/Curd sample.

Phycology

Study of vegetative and reproductive structures of *Nostoc, Chlamydomonas* (electron micrographs), Volvox, *Oedogonium,Coleochaete, Chara, Vaucheria, Ectocarpus, Fucus and Polysiphonia, Procholoron* through electron micrographs, temporary preparations and permanent slides.

Suggested Readings:

- Lee, R.E. (2008). Phycology, Cambridge University Press, Cambridge. 4th edition.
- Wiley JM, Sherwood LM and Woolverton CJ. (2013) Prescott's Microbiology. 9th Edition. McGraw
- Hill International.
- Kumar, H.D. (1999). Introductory Phycology. Affiliated East-West Press, Delhi.
- 4.Sahoo, D. (2000). Farming the ocean: seaweeds cultivation and utilization. Aravali International,New Delhi.
- Campbell, N.A., Reece J.B., Urry L.A., Cain M.L., Wasserman S.A. Minorsky P.V., Jackson
- R.B. (2008). Biology, Pearson Benjamin Cummings, USA. 8th edition.
- Pelczar, M.J. (2001) Microbiology, 5th edition, Tata McGraw-Hill Co, New Delhi.

CC-2 : Bio-molecules and Cell Biology **Credits 06**

C2T : Bio-molecules and Cell Biology **Credits 04**

Course Contents:

Unit-1: Biomolecules

Types and significance of chemical bonds; Structure and properties of water; pH and buffers.

Carbohydrates: Nomenclature and classification; Monosaccharides ; Disaccharides; Oligosaccharides and polysaccharides.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Lipids: Definition and major classes of storage and structural lipids; Fatty acids structure and functions; Essential fatty acids; Triacyl glycerols structure, functions and properties; Phosphoglycerides.
Proteins: Structure of amino acids; Levels of protein structure-primary, secondary, tertiary and quarternary; Protein denaturation and biological roles of proteins.

Nucleic acids: Structure of nitrogenous bases; Structure and function of nucleotides; Types of nucleic acids; Structure of A, B, Z types of DNA; Types of RNA; Structure of tRNA.

Unit- 2: Bioenergenetics
Laws of thermodynamics, concept of free energy, endergonic and exergonic reactions, coupled reactions, redox reactions. ATP: structure, its role as a energy currency molecule.

Unit- 3: Enzymes
Structure of enzyme: holoenzyme, apoenzyme, cofactors, coenzymes and prosthetic group; Classification of enzymes; Features of active site, substrate specificity, mechanism of action (activation energy, lock and key hypothesis, induced - fit theroy), Michaelis – Menten equation, enzyme inhibition and factors affecting enzyme activity.

Unit-4: The cell
Cell as a unit of structure and function; Characteristics of prokaryotic and eukaryotic cells; Origin ofeukaryotic cell (Endosymbiotic theory).

Unit- 5: Cell wall and plasma membrane
Chemistry, structure and function of Plant cell wall. Overview of membrane function; fluid mosaic model; Chemical composition of membranes; Membrane transport – Passive, active and facilitated transport, endocytosis and exocytosis.

Unit- 6: Cell organelles
Nucleus: Structure-nuclear envelope, nuclear pore complex, nuclear lamina, molecular organization of chromatin; nucleolus. **Cytoskeleton:** Role and structure of microtubules, microfilaments and intermediary filament. **Chloroplast, mitochondria and peroxisomes:** Structural organization; Function; Semiautonomous nature of mitochondria and chloroplast. **Endomembrane system:** Endoplasmic Reticulum – Structure, targeting and insertion of proteins in the ER, protein folding, processing; Smooth ER and lipid synthesis, export of proteins and lipids; Golgi Apparatus – organization, protein glycosylation, protein sorting and export from Golgi Apparatus; Lysosomes

Unit -7: Cell division
Phases of eukaryotic cell cycle, mitosis and meiosis; Regulation of cell cycle- checkpoints, role of protein kinases.

C2P : Bio-molecules and Cell Biology **Credits 02**

(Practical)

1. Qualitative tests for carbohydrates, reducing sugars, non-reducing sugars, lipids and proteins.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

2. Study of plant cell structure with the help of epidermal peel mount of Onion/*Rhoeo/Crinum*.
3. Demonstration of the phenomenon of protoplasmic streaming in *Hydrilla* leaf.
4. Measurement of cell size by the technique of micrometry.
5. Counting the cells per unit volume with the help of haemocytometer. (Yeast / pollen grains).
6. Study of cell and its organelles with the help of electron micrographs.
7. Cytochemical staining of : DNA- Feulgen Acto carmin and Aceto Orcrin stain and cell wall in the epidermal peel of onion using Periodic Schiff's (PAS) staining technique.
8. Study the phenomenon of plasmolysis and deplasmolysis.
9. Study the effect of organic solvent and temperature on membrane permeability.
10. Study different stages of mitosis and meiosis.

CC-3 : Mycology and Phytopathology **Credits 06**

C3 T : Mycology and Phytopathology **Credits 04**

Course Contents:

Unit- 1: Introduction to true fungi

General characteristics; Affinities with plants and animals; Thallus organization; Cell wall composition; Nutrition; Classification.

Unit- 2: Chytridiomycota and Zygomycota

Characteristic features; Ecology and significance; Thallus organisation; Reproduction; Life cycle with reference to *Synchytrium, Rhizopus* .

Unit-3: Ascomycota

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

General characteristics (asexual and sexual fruiting bodies); Ecology; Life cycle, Heterokaryosis and parasexuality; Life cycle and classification with reference to *Saccharomyces, Aspergillus, Penicillium, Alternaria, Neurospora* and *Peziza.*

Unit- 4: Basidiomycota
General characteristics; Ecology; Life cycle and Classification with reference to black stem rust on wheat *Puccinia* (Physiological Specialization), loose and covered smut (symptoms only), *Agaricus*; Bioluminescence, Fairy Rings and Mushroom Cultivation with special reference to Oyster Mashroom..

Unit- 5: Allied Fungi
General characteristics; Status of Slime molds, Classification; Occurrence; Types of plasmodia; Types of fruiting bodies.

Unit- 6: Oomycota
General characteristics; Ecology; Life cycle and classification with reference to *Phytophthora, Albugo.*

Unit -7: Symbiotic associations
Lichen – Occurrence; General characteristics; Growth forms and range of thallus organization; Nature of associations of algal and fungal partners; Reproduction; Mycorrhiza-Ectomycorrhiza, Endomycorrhiza and their significance.

Unit- 8: Applied Mycology
Role of fungi in biotechnology; Application of fungi in food industry (Flavour & texture, Fermentation, Baking, Organic acids, Enzymes, Mycoproteins); Secondary metabolites (Pharmaceutical preparations); Agriculture (Biofertilizers); Mycotoxins; Biological control (Mycofungicides, Mycoherbicides, Mycoinsecticides, Myconematicides); Medical mycology.

Unit- 9: Phytopathology
Terms and concepts; General symptoms; Geographical distribution of diseases; Etiology; Symptomology; Host-Pathogen relationships; Disease cycle and environmental relation; prevention and control of plant diseases, and role of quarantine.
Bacterial diseases – Citrus canker and angular leaf spot of cotton. Viral diseases – Tobacco Mosaic viruses, vein clearing. Fungal diseases – Early blight of potato, Black stem rust of wheat, White rust of crucifers.

C3P: Mycology and Phytopathology **Credits 02**

Practical
1. Introduction to the world of fungi (Unicellular, coenocytic/septate mycelium, ascocarps & basidiocarps).
2. *Rhizopus*: study of asexual stage from temporary mounts and sexual structures through permanent slides.
3. *Aspergillus* and *Penicillium*: study of asexual stage from temporary mounts. Study of Sexual stage from permanent slides/photographs.
4. *Peziza*: Ascobulus sectioning through ascocarp.
5. *Alternaria:* Specimens/photographs and temporary mounts.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

6. *Puccinia*: Herbarium specimens of Black Stem Rust of Wheat and infected Barberry leaves; sections/ mounts of spores on wheat and permanent slides of both the hosts.
7. *Agaricus*: Specimens of button stage and full grown mushroom; sectioning of gills of *Agaricus*, fairy rings and bioluminescent mushrooms to be shown.
8. Study of phaneroplasmodium from actual specimens and /or photograph. Study of *Stemonitis* sporangia.
9. *Albugo:* Study of symptoms of plants infected with *Albugo*; asexual phase study through section/ temporary mounts and sexual structures through permanent slides.
10. Lichens: Study of growth forms of lichens (crustose, foliose and fruticose) on different substrates. Study of thallus and reproductive structures (soredia and apothecium) through permanent slides. Mycorrhizae: ectomycorrhiza and endomycorrhiza (Photographs)
11. Phytopathology : Herbarium specimens of bacterial diseases; Citrus Canker; Angular leaf spot of cotton, Viral diseases: TMV, Vein clearing, Fungal diseases: Early blight of potato, Black stem rust of wheat and White rust of crucifers.

Suggested Readings:

- Agrios, G.N. (1997) Plant Pathology, 4th edition, Academic Press, U.K.
- Alexopoulos, C.J., Mims, C.W., Blackwell, M. (1996). Introductory Mycology, John Wiley & Sons (Asia) Singapore. 4th edition.
- Webster, J. and Weber, R. (2007). Introduction to Fungi, Cambridge University Press, Cambridge. 3rd edition.
- Sethi, I.K. and Walia, S.K. (2011). Text book of Fungi and Their Allies, Macmillan Publishers India Ltd.
- Sharma, P.D. (2011). Plant Pathology, Rastogi Publication, Meerut, India.

CC-4: Archegoniate **Credits 06**

C4T: Archegoniate **Credits 04**

Course Contents:

Unit 1: Introduction

Unifying features of archegoniates; Transition to land habit; Alternation of generations.

Unit 2: Bryophytes

General characteristics; Adaptations to land habit; Classification; Range of thallus organization.

Unit 3: Type Studies- Bryophytes

Classification (up to family), morphology, anatomy and reproduction of *Riccia, Marchantia, Pellia, Porella, Anthoceros, Sphagnum and Funaria*; Pogonatum,Reproduction and evolutionary trends in *Riccia, Marchantia, Plagichasma Anthoceros* and *Funaria* (developmental stages not included). Ecological and economic importance of bryophytes with special reference to *Sphagnum*.

Unit 4: Pteridophytes

General characteristics; Classification; Early land plants (*Cooksonia* and *Rhynia*).

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 5: Type Studies- Pteridophytes
Classification (up to family), morphology, anatomy and reproduction of *Psilotum*, *Selaginella*, *Equisetum* and *Pteris* (Developmental details not to be included).Apogamy, and apospory, heterospory andseed habit, telome theory, stelar evolution; Ecological and economic importance.

Unit 6: Gymnosperms
General characteristics, classification (up to family), morphology, anatomy and reproduction of *Cycas*, *Pinus* and *Gnetum* (Developmental details not to be included); Ecological and economic importance.

C4P : Archegoniate **Credits 02**

Practical

1. ***Riccia*** – Morphology of thallus.

2. ***Marchantia***- Morphology of thallus, whole mount of rhizoids & Scales, vertical sectionof thallus through Gemma cup, whole mount of Gemmae (all temporary slides), vertical section of Antheridiophore, Archegoniophore, longitudinal section of Sporophyte (all permanent slides).

3. ***Anthoceros***- Morphology of thallus, dissection of sporophyte (to show stomata, spores, pseudoelaters, columella) (temporary slide), vertical section of thallus (permanent slide).

4. ***Pellia, Porella***- Permanent slides.

5. ***Sphagnum***- Morphology of plant, whole mounts of leaf (permanent slide only).

6. ***Funaria***- Pogonatum/ Polytrichum Morphology, whole mount of leaf, rhizoids, operculum, peristome, annulus, spores (temporary slides); permanent slides showing antheridial and archegonial heads, longitudinal section of capsule and protonema.

7. ***Psilotum***- Study of specimen, transverse section of synangium (permanent slide).

8. ***Selaginella***- Morphology, whole mount of leaf with ligule, transverse section of stem, whole mount of strobilus, whole mount of microsporophyll and megasporophyll (temporary slides), longitudinal section of strobilus (permanent slide).

9. ***Equisetum***- Morphology, transverse section of internode, longitudinal section of strobilus, transverse section of strobilus, whole mount of sporangiophore, whole mount of spores (wet and dry) (temporary slide), transverse section of rhizome (permanent slide).

10. ***Pteris***- Morphology, transverse section of rachis, vertical section of sporophyll, wholemount of sporangium, whole mount of spores (temporary slides), transverse section of rhizome, whole mount of prothallus with sex organs and young sporophyte (permanent slide).

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

11. ***Cycas***- Morphology (coralloid roots, bulbil, leaf), whole mount of microsporophyll, transverse section of coralloid root, transverse section of rachis, vertical section of leaflet, vertical section of microsporophyll, whole mount of spores (temporary slides), longitudinal section of ovule, transverse section of root (permanent slide).

12. ***Pinus***- Morphology (long and dwarf shoots, whole mount of dwarf shoot, male and female cones), transverse section of Needle, transverse section of stem, longitudinal section of / transverse section of male cone, whole mount of microsporophyll, whole mount of Microspores (temporary slides), longitudinal section of female cone, tangential longitudinal section &radial longitudinal sections stem (permanent slide).

13. ***Gnetum***- Morphology (stem, male & female cones), transverse section of stem, vertical section of ovule (permanent slide)

14. **Botanical excursion.**

Suggested Readings:

- Vashistha, P.C., Sinha, A.K., Kumar, A. (2010). Pteridophyta. S. Chand. Delhi, India.
- Bhatnagar, S.P. & Moitra, A. (1996). Gymnosperms. New Age International (P) Ltd Publishers, New Delhi, India.
- Parihar, N.S. (1991). An introduction to Embryophyta: Vol. I. Bryophyta. Central Book Depot. Allahabad.
- Raven, P.H., Johnson, G.B., Losos, J.B., Singer, S.R. (2005). Biology. Tata McGraw Hill, Delhi.
- Vanderpoorten, A. & Goffinet, B. (2009) Introduction to Bryophytes. Cambridge University Press.

CC-5: Anatomy of Angiosperms **Credits 06**

C5T: Anatomy of Angiosperms **Credits 04**

Course Contents:

Unit 1: Introduction and scope of Plant Anatomy: Applications in systematics, forensics and pharmacognosy**.**

Unit 2: Structure and Development of Plant Body

Internal organization of plant body: The three tissue systems, types of cells and tissues. Development of plant body: polarity, cytodifferentiation and organogenesis during embryogenic development, Root-stem transition, Nodal anatomy – Basic concept.

Unit 2: Tissues

Classification of tissues; Simple and complex tissues (no phylogeny); cytodifferentiation of tracheary elements and sieve elements; Pits and plasmodesmata; Wall ingrowths and transfer cells, adcrustation and incrustation, Ergastic substances. Hydathodes, cavities, lithocysts and laticifers.

Unit 3: Apical meristems

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Evolution of concept of organization of shoot apex (Apical cell theory, Histogen theory, Tunica Corpus theory, continuing meristematic residue, cytohistological zonation); Types of vascular bundles; Structure of dicot and monocot stem. Origin, development, arrangement and diversity in size and shape of leaves; Structure of dicot and monocot leaf, Kranz anatomy. Organization of root apex (Apical cell theory, Histogen theory, Korper-Kappe theory); Quiescent centre; Root cap; Structure of dicot and monocot root; Endodermis, exodermises and origin of lateral root.

Unit 4: Vascular Cambium and Wood

Structure, function and seasonal activity of cambium; Secondary growth in root and stem. Anomalous secondary growth in Bignonia, Boerhaavia , *Aristolochia* and Dracaena. Axially and radially oriented elements; Types of rays and axial parenchyma; Cyclic aspects and reaction wood; Sapwood and heartwood; Ring and diffuse porous wood; Early and late wood, tyloses; Dendrochronology. Development and composition of periderm, rhytidome and lenticels.

Unit 5: Adaptive and Protective Systems

Epidermal tissue system, cuticle, epicuticular waxes, trichomes(uni-and multicellular, glandular and nonglandular, two examples of each), stomata (classification); Adcrustation and incrustation; Anatomical adaptations of xerophytes and hydrophytes. Mechanical tissue – distribution and significance.

C5P: Anatomy of Angiosperms **Credits 02**

Practical

1. Study of anatomical details through permanent slides/temporary stain mounts/ macerations/museum specimens with the help of suitable examples.
2. Apical meristem of root, shoot and vascular cambium.
3. Distribution and types of parenchyma, collenchyma and sclerenchyma.
4. Xylem: Tracheary elements-tracheids, vessel elements; thickenings; perforation plates; xylem fibres.
5. Wood: ring porous; diffuse porous; tyloses; heart- and sapwood.
6. Phloem: Sieve tubes-sieve plates; companion cells; phloem fibres.
7. Epidermal system: cell types, stomata types; trichomes: non-glandular and glandular.
8. Root: monocot, dicot, secondary growth.
9. Stem: monocot, dicot - primary and secondary growth; periderm; lenticels.
10. Leaf: isobilateral, dorsiventral, C4 leaves (Kranz anatomy).
11. Adaptive Anatomy: xerophytes, hydrophytes.
12. Secretory tissues: cavities, lithocysts and laticifers.

Suggested Readings:

- Dickison, W.C. (2000). Integrative Plant Anatomy. Harcourt Academic Press, USA.
- Fahn, A. (1974). Plant Anatomy. Pergmon Press, USA.
- Mauseth, J.D. (1988). Plant Anatomy. The Benjammin/Cummings Publisher, USA.
- Evert, R.F. (2006) Esau's Plant Anatomy: Meristems, Cells, and Tissues of the Plant Body: Their Structure, Function and Development. John Wiley and Sons, Inc.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

CC-6: Economic Botany **Credits 06**

C6T: Economic Botany **Credits 04**

Course Contents:

Unit 1: Origin of Cultivated Plants
Concept of Centres of Origin, their importance with reference to Vavilov's work. Examples of major plant introductions; Crop domestication and loss of genetic diversity; evolution of new crops/varieties, importance of germplasm diversity.

Unit 2: Cereals
Wheat and Rice (origin, morphology, cultivation, management processing & uses); Brief account of millets.

Unit 3: Legumes
Origin, morphology cultivation, management and uses of Chick pea, Pigeon pea and fodder legumes. Importance to man and ecosystem.

Unit 4: Sources of sugars and starches

Morphology cultivation, management and processing of sugarcane, products and by-products of sugarcane industry. Potato – morphology, propagation & uses.

Unit 5: Spices
Listing of important spices, their family and part used. Economic importance with special reference to fennel, saffron, clove and black pepper

Unit 6: Beverages
Tea, Coffee (morphology, processing & uses)

Unit 7: Sources of oils and fats
General description, classification, extraction, their uses and health implications groundnut, coconut, linseed, soybean, mustard and coconut (Botanical name, family & uses). Essential Oils: General account, extraction methods, comparison with fatty oils & their uses.

Unit 8: Natural Rubber
Para-rubber: tapping, processing and uses.

Unit 9: Drug-yielding plants
Therapeutic and habit-forming drugs with special reference to C*inchona, Digitalis, Papaver* and *Cannabis*; Tobacco (Morphology, processing, uses and health hazards).

Unit 10: Timber plants
General account with special reference to teak and pine.

Unit 11: Fibers

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Classification based on the origin of fibers; Cotton, Coir and Jute (morphology, extraction and uses).

C6P: Economic Botany **Credits 02**

Practical

1. **Cereals**: Wheat (habit sketch, L. S/T.S. grain, starch grains, micro-chemical tests) Rice (habit sketch, study of paddy and grain, starch grains, micro-chemical tests).
2. **Legumes**: Soybean, Groundnut, (habit, fruit, seed structure, micro-chemical tests).
3. **Sources of sugars and starches**: Sugarcane (habit sketch; cane juice- micro-chemical tests), Potato (habit sketch, tuber morphology, T.S. tuber to show localization of starch grains, w.m. starch grains, micro-chemical tests).
4. **Spices:** Black pepper, Fennel and Clove (habit and sections).
5. **Beverages**: Tea (plant specimen, tea leaves), Coffee (plant specimen, beans).
6. **Sources of oils and fats**: Coconut- T.S. nut, Mustard–plant specimen, seeds; tests for fats in crushed seeds.
7. **Essential oil-yielding plants**: Habit sketch of *Rosa*, *Vetiveria*, *Santalum* and *Eucalyptus* (specimens/photographs).
8. **Rubber**: specimen, photograph/model of tapping, samples of rubber products.
9. **Drug-yielding plants**: Specimens of *Digitalis*, *Papaver* and *Cannabis.*
10. **Tobacco**: specimen and products of Tobacco.
11. **Woods:** *Tectona*, *Pinus*: Specimen, Section of young stem.
12. **Fiber-yielding plants**: Cotton (specimen, whole mount of seed to show lint and fuzz; whole mount of fiber and test for cellulose), Jute (specimen, transverse section of stem, test for lignin on transverse section of stem and fiber).

Suggested Readings:

- Kochhar, S.L. (2012). Economic Botany in Tropics, MacMillan & Co. New Delhi, India.
- Wickens, G.E. (2001). Economic Botany: Principles & Practices. Kluwer Academic Publishers, The Netherlands.
- Chrispeels, M.J. and Sadava, D.E. 1994 Plants, Genes and Agriculture. Jones & Bartlett_Publishers.

CC-7: Genetics **Credits 06**

C7T: Genetics **Credits 04**

Course Contents:

Unit 1: Mendelian genetics and its extension

Mendelism: History; Principles of inheritance; Chromosome theory of inheritance; Autosomes and sex chromosomes; Probability and pedigree analysis; Incomplete dominance and codominance; Multiple alleles, Lethal alleles, Epistasis, Pleiotropy, Recessive and Dominant traits, Penetrance and Expressivity, Numericals; Polygenic inheritance.

Unit 2: Extra-chromosomal Inheritance

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Chloroplast mutation: Variegation in Four o'clock plant; Mitochondrial mutations in yeast; Maternal effects-shell coiling in snail; Infective heredity- Kappa particles in *Paramecium.*

Unit 3: Linkage, crossing over and chromosome mapping
Linkage and crossing over-Cytological and molecular basis of crossing over; Recombination frequency, two factor and three factor crosses; Interference and coincidence; Numericals based on gene mapping; Sex Linkage.

Unit 4: Variation in chromosome number and structure
Deletion, Duplication, Inversion, Translocation, Position effect, Euploidy and Aneuploidy

Unit 5: Gene mutations
Types of mutations; Molecular basis of Mutations; Mutagens – physical and chemical (Base analogs, deaminating, alkylating and intercalating agents); Detection of mutations: ClB method. Role of Transposons in mutation.DNA repair mechanisms.

Unit 6: Fine structure of gene
Classical vs molecular concepts of gene; Cis-Trans complementation test for functional allelism; Structure of Phage T4, rII Locus.

Unit 6. Population and Evolutionary Genetics
Allele frequencies, Genotype frequencies, Hardy-Weinberg Law, role of natural selection, mutation, genetic drift. Genetic variation and Speciation.

C7P: Genetics **Credits 02**

Practical

1. Demonstration on pretreatment, fixation, staining and squash and smear preparation.
2. Study of Mitosis from Onion / Garlic / Lentil root.
3. Study of Meiosis with pollen mother cell (PMC) of Onion / Solanum / Datura by smear preparation.
4. Mendel's laws through seed ratios. Laboratory exercises in probability and chi-square.
5. Chromosome mapping using point test cross data.
6. Pedigree analysis for dominant and recessive autosomal and sex linked traits.
7. Incomplete dominance and gene interaction through seed ratios (9:7, 9:6:1, 13:3, 15:1, 12:3:1, 9:3:4).
8. Blood Typing: groups & Rh factor.
9. Study of aneuploidy: Down's, Klinefelter's and Turner's syndromes.
10. Photographs/Permanent Slides showing Translocation Ring, Laggards and Inversion Bridge.
11. Study of human genetic traits: Sickle cell anemia, Xeroderma Pigmentosum, Albinism, red-green Colour blindness, Widow's peak, Rolling of tongue, Hitchhiker's thumb and Attached ear lobe.

Suggested Readings:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University

- Snustad, D.P. and Simmons, M.J. (2010). Principles of Genetics, John Wiley & Sons Inc., India.5th edition.
- Klug, W.S., Cummings, M.R., Spencer, C.A. (2009). Concepts of Genetics. Benjamin Cummings, U.S.A. 9th edition.
- Griffiths, A.J.F., Wessler, S.R., Carroll, S.B., Doebley, J. (2010). Introduction to Genetic Analysis. W. H. Freeman and Co., U.S.A. 10th edition.

CC-8: Molecular Biology **Credits 06**

C8T: Molecular Biology **Credits 04**

Course Contents:

Unit- 1: Nucleic acids: Carriers of genetic information
Historical perspective; DNA as the carrier of genetic information (Griffith's, Hershey & Chase, Avery, McLeod & McCarty, Fraenkel-Conrat's experiment.

Unit -2. The Structures of DNA and RNA / Genetic Material
DNA Structure: Miescher to Watson and Crick- historic perspective, DNA structure, Salient features of double helix, Types of DNA, Types of genetic material, denaturation and renaturation, cot curves; Organization of DNA-Prokaryotes, Viruses, Eukaryotes.RNA Structure-Organelle DNA -- mitochondria and chloroplast DNA.The Nucleosome-Chromatin structure- Euchromatin, Heterochromatin- Constitutive and Facultative heterochromatin.

Unit- 2:The replication of DNA
Chemistry of DNA synthesis (Kornberg's discovery); General principles – bidirectional, semiconservative and semi discontinuous replication, RNA priming; Various models of DNA replication, including rolling circle, θ (theta) mode of replication, replication of linear ds-DNA, replication of the 5'end of linear chromosome; Enzymes involved in DNA replication.

Unit- 3: Central dogma and genetic code
Key experiments establishing-The Central Dogma (Adaptor hypothesis and discovery of mRNA template), Genetic code (deciphering & salient features**)**

Unit 4: Transcription
Transcription in prokaryotes and eukaryotes. Principles of transcriptional regulation;
Prokaryotes: Regulation of lactose metabolism and tryptophan synthesis in *E.coli.* Eukaryotes:transcription factors, heat shock proteins, steroids and peptide hormones; Gene silencing.

Unit 5: Processing and modification of RNA
Split genes-concept of introns and exons, removal of introns, spliceosome machinery, splicing pathways, group I and group II intron splicing, alternative splicing eukaryotic mRNA processing(5' cap, 3' polyA tail); Ribozymes; RNA editing and mRNA transport.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 6: Translation

Ribosome structure and assembly, mRNA; Charging of tRNA, aminoacyl tRNA synthetases; Various steps in protein synthesis, proteins involved in initiation, elongation and termination of polypeptides; Fidelity of translation; Inhibitors of protein synthesis; Post-translational modifications of proteins.

C8P: Molecular Biology **Credits 02**

Practical

1. Preparation of LB medium and raising *E.Coli.*
2. Isolation of genomic DNA from *E.Coli.*
3. DNA isolation from cauliflower head.
4. DNA estimation by diphenylamine reagent/UV Spectrophotometry.
5. Study of DNA replication mechanisms through photographs (Rolling circle, Theta replication and semi-discontinuous replication).
6. Study of structures of prokaryotic RNA polymerase and eukaryotic RNA polymerase II through photographs.
7. Photographs establishing nucleic acid as genetic material (Messelson and Stahl's, Avery et al,Griffith's, Hershey & Chase's and Fraenkel & Conrat's experiments)
8. Study of the following through photographs: Assembly of Spliceosome machinery; Splicing mechanism in group I & group II introns; Ribozyme and Alternative splicing.

Suggested Readings

CC-9: Plant Ecology and Phytogeography **Credits 06**

C9T: Plant Ecology and Phytogeography **Credits 04**

Course Contents:

Unit 1: Introduction

Basic concepts; Levels of organization. Inter-relationships between the living world and the environment, the components and dynamism, homeostasis.

Unit 2: Soil

Importance; Origin; Formation; Composition; Physical; Chemical and Biological components; Soil profile; Role of climate in soil development.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 3: Water
Importance: States of water in the environment; Atmospheric moisture; Precipitation types (rain, fog, snow, hail, dew); Hydrological Cycle; Water in soil; Water table.

Unit 4: Light, temperature, wind and fire
Variations; adaptations of plants to their variation.

Unit 5: Ecosystems
Structure; Processes; Trophic organisation; Food chains and Food webs; Ecological pyramids.

Unit 6: Population ecology
Characteristics and Dynamics .Ecological Speciation

Unit 7: Plant communities
Concept of ecological amplitude; Habitat and niche; Characters: analytical and synthetic; Ecotone and edge effect; Dynamics: succession – processes, types; climax concepts.

Unit 8: Biotic interactions
Trophic organization, basic source of energy, autotrophy, heterotrophy; symbiosis, commensalism, parasitism; food chains and webs; ecological pyramids; biomass, standing crop.

Unit 9: Functional aspects of ecosystem
Principles and models of energy flow; Production and productivity; Ecological efficiencies; Biogeochemical cycles; Cycling of Carbon, Nitrogen and Phosphorus.

Unit 10: Phytogeography
Principles; Continental drift; Theory of tolerance; Endemism; Brief description of major terrestrial biomes (one each from tropical, temperate & tundra); Phytogeographical division of India; Local Vegetation.

C9P: Plant Ecology and Phytogeography **Credits 02**

Practical

1. Study of instruments used to measure microclimatic variables: Soil thermometer, maximum and minimum thermometer, anemometer, psychrometer/hygrometer, rain gauge and lux meter.

2. Determination of pH of various soil and water samples (pH meter, universal indicator/Lovibond comparator and pH paper)
3. Analysis for carbonates, chlorides, nitrates, sulphates, organic matter and base deficiency from
4. two soil samples by rapid field tests.
5. Determination of organic matter of different soil samples by Walkley & Black rapid titration
6. method.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

7. Comparison of bulk density, porosity and rate of infiltration of water in soils of three habitats.
8. Determination of dissolved oxygen of water samples from polluted and unpolluted sources.
9. (a). Study of morphological adaptations of hydrophytes and xerophytes (four each).
   (b). Study of biotic interactions of the following: Stem parasite (*Cuscuta*), Root parasite (*Orobanche*) Epiphytes, Predation (Insectivorous plants).
10. Determination of minimal quadrat size for the study of herbaceous vegetation in the college campus, by species area curve method (species to be listed).
11. Quantitative analysis of herbaceous vegetation in the college campus for frequency and comparison with Raunkiaer's frequency distribution law.
12. Quantitative analysis of herbaceous vegetation for density and abundance in the college campus.
13. Field visit to familiarise students with ecology of different sites.

CC-10: Plant Systematics **Credits 06**

C10T: Plant Systematics **Credits 04**

Course Contents:

Unit 1: Significance of Plant systematics

Introduction to systematics; Plant identification, Classification, Nomenclature. Evidences from palynology, cytology, phytochemistry and molecular data. Field inventory; Functions of Herbarium; Important herbaria and botanical gardens of the world and India; Virtual herbarium; E-flora; Documentation: Flora, Monographs, Journals; Keys:Single access and Multi-access.

Unit 2: Taxonomic hierarchy

Concept of taxa (family, genus, species); Categories and taxonomic hierarchy; Species concept (taxonomic, biological, evolutionary).

Unit 3: Botanical nomenclature

Principles and rules (ICN); Ranks and names; Typification, author citation, valid publication, rejection of names, principle of priority and its limitations; Names of hybrids.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 4: Systems of classification
Major contributions of Theophrastus, Bauhin, Tournefort, Linnaeus, Adanson, de Candolle, Bessey, Hutchinson, Takhtajan and Cronquist; Classification systems of Bentham and Hooker (upto series) and Engler and Prantl (upto series); Brief reference of Angiosperm Phylogeny Group (APG III) classification.

Unit 5: Biometrics, numerical taxonomy and cladistics
Characters; Variations; OTUs, character weighting and coding; Cluster analysis; Phenograms, cladograms (definitions and differences).

Unit 6: Phylogeny of Angiosperms
Terms and concepts (primitive and advanced, homology and analogy, parallelism and convergence, monophyly, Paraphyly, polyphyly and clades). Origin and evolution of angiosperms; Co-evolution of angiosperms and animals; Methods of illustrating evolutionary relationship (phylogenetic tree, cladogram).

C10P: Plant Systematics **Credits 02**

Practical
1. Study of vegetative and floral characters of the following families (Description, V.S. flower, section of ovary, floral diagram/s, floral formula/e and systematic position according to Bentham & Hooker's system of classification):
   1. Ranunculaceae - *Ranunculus, Delphinium.*
   2. Brassicaceae - *Brassica, Alyssum / Iberis.*
   3. Malvaceae – *Sida Sp. Urena lobota.*
   4. Myrtaceae - *Eucalyptus, Callistemon*
   5. Umbelliferae - *Coriandrum /Anethum / Foeniculum.*
   6. Asteraceae - *Sonchus/Launaea, Vernonia/Ageratum, Eclipta/Tridax.*
   7. Solanaceae - *Solanum nigrum/Withania, Nicotina, Plumbaginefolia.*
   8. Lamiaceae - *Salvia/Ocimum.*
   9. Euphorbiaceae - *Euphorbia hirta/E.milii, Jatropha.*
   10. Fasaceae – *Tephrosia Sp.,Crotalaria Sp.,*
   11. Caesalpineaeceae – *Cassia* Sp.,
   12. Asclepiadaeceae- *Pesgularia Gygnema,*
   13. Apocynaceae – *Hollorhen, Catharanthus.*
   14. Rubiaceae – *Oldenladeae, Spermoeoceae,*
   15. Liliaceae - *Asphodelus/Lilium/Allium.*
   16. Poaceae - *Triticum/Hordeum/Avena.*

2. Field visit (local) – Subject to grant of funds from the university.

3. Mounting of a properly dried and pressed specimen of any wild plant with herbarium label (to be submitted in the record book).

Suggested Readings:

CC-11: Reproductive Biology of Angiosperms **Credits 06**

C11T: Reproductive Biology of Angiosperms **Credits 04**

Course Contents:

Unit 1: Introduction
History (contributions of G.B. Amici, W. Hofmeister, E. Strasburger, S.G. Nawaschin, P. Maheshwari, B.M. Johri, W.A. Jensen, J. Heslop-Harrison) and scope.

Unit 2: Reproductive development
Induction of flowering; flower as a modified determinate shoot. Flower development: genetic and molecular aspects.

Unit 3: Anther and pollen biology
Anther wall: Structure and functions, microsporogenesis, callose deposition and its significance. Microgametogenesis; Pollen wall structure, MGU (Male Germ Unit) structure, NPC system; Palynology and scope (a brief account); Pollen wall proteins; Pollen viability, storage and germination; Abnormal features: Pseudomonads, polyads, massulae, pollinia.

Unit 4: Ovule
Structure; Types; Special structures–endothelium, obturator, aril, caruncle and hypostase; Female Gametophyte – megasporogenesis (monosporic, bisporic and tetrasporic) and megagametogenesis (details of *Polygonum* type); Organization and ultrastructure of mature embryo sac.

Unit 4: Pollination and fertilization
Pollination types and significance; adaptations; structure of stigma and style; path of pollen tube in pistil; double fertilization.

Unit 5: Self incompatibility
Basic concepts (interspecific, intraspecific, homomorphic, heteromorphic, GSI and SSI); Methods to overcome self- incompatibility: mixed pollination, bud pollination, stub pollination; Intra-ovarian and *in vitro* pollination; Modification of stigma surface, parasexual hybridization; Cybrids, *in vitro* fertilization.

Unit 6: Embryo, Endosperm and Seed
Structure and types; General pattern of development of dicot and monocot embryo and endosperm; Suspensor: structure and functions; Embryo-endosperm relationship; Nutrition

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

of embryo; Unusual features; Embryo development in *Paeonia*. Seed structure, importance and dispersal mechanisms

Units 7: Polyembryony and apomixis
Introduction; Classification; Causes and applications.

C11P: Reproductive Biology of Angiosperms **Credits 02**

Practical

1. Anther: Wall and its ontogeny; Tapetum (amoeboid and glandular); MMC, spore tetrads, uninucleate, bicelled and dehisced anther stages through slides/micrographs, male germ unit (MGU) through photographs and schematic representation.

2. Pollen grains: Fresh and acetolyzed showing ornamentation and aperture, psuedomonads, polyads, pollinia (slides/photographs,fresh material), ultrastructure of pollen wall(micrograph); Pollen viability: Tetrazolium test.germination: Calculation of percentage germination in different media using hanging drop method.

3. Ovule: Types-anatropous, orthotropous, amphitropous/campylotropous, circinotropous, unitegmic, bitegmic; Tenuinucellate and crassinucellate; Special structures: Endothelium, obturator, hypostase, caruncle and aril (permanent slides/specimens/photographs).

4. Female gametophyte through permanent slides/ photographs: Types, ultrastructure of mature egg apparatus.

5. Intra-ovarian pollination; Test tube pollination through photographs.

6. Endosperm: Dissections of developing seeds for endosperm with free-nuclear haustoria.

7. Embryogenesis: Study of development of dicot embryo through permanent slides; dissection of developing seeds for embryos at various developmental stages; Study of suspensor through electron micrographs.

Suggested Readings:

- Shivanna, K.R. (2003). Pollen Biology and Biotechnology. Oxford and IBH Publishing Co. Pvt. Ltd. Delhi.
- Raghavan, V. (2000). Developmental Biology of Flowering plants, Springer, Netherlands.
- Johri, B.M. l (1984). Embryology of Angiosperms, Springer-Verlag, Netherlands.

CC-12: Plant Physiology **Credits 06**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

C12T: Plant Physiology **Credits 04**

Course Contents:

Unit 1: Plant-water relations
Water Potential and its components, water absorption by roots, aquaporins, pathway of water movement, symplast, apoplast, transmembrane pathways, root pressure, guttation. Ascent of sap – cohesion-tension theory.Transpiration and factors affecting transpiration, antitranspirants, mechanism of stomatal movement.

Unit 2: Mineral nutrition
Essential and beneficial elements, macro and micronutrients, methods of study and use of nutrient solutions, criteria for essentiality, mineral deficiency symptoms, roles of essential elements, chelating agents.

Unit 3: Nutrient Uptake
Soil as a nutrient reservoir, transport of ions across cell membrane, passive absorption, electrochemical gradient, facilitated diffusion, active absorption, role of ATP, carrier systems, proton ATPase pump and ion flux, uniport, co-transport, symport, antiport.

Unit 4: Translocation in the phloem
Experimental evidence in support of phloem as the site of sugar translocation. Pressure–Flow Model; Phloem loading and unloading; Source–sink relationship.

Unit 5: Plant growth regulators
Discovery, chemical nature (basic structure), bioassay and physiological roles of Auxin, Gibberellins, Cytokinin, Abscisic acid, Ethylene, Brassinosteroids and Jasmonic acid.

Unit 6: Physiology of flowering
Photoperiodism, flowering stimulus, florigen concept, vernalization, seed dormancy.

Unit 7: Phytochrome , crytochromes and phototropins
Discovery, chemical nature, role in photomorphogenesis, low energy responses (LER) and high irradiance responses (HIR), mode of action.

C12P: Plant Physiology **Credits 02**

Practical

1. Determination of osmotic potential of plant cell sap by plasmolytic method.
2. Determination of water potential of given tissue (potato tuber) by weight method.
3. Study of the effect of wind velocity and light on the rate of transpiration in excised twig/leaf.
4. Calculation of stomatal index and stomatal frequency from the two surfaces of leaves of a mesophyte and xerophyte.
5. To calculate the area of an open stoma and percentage of leaf area open through stomata in a mesophyte and xerophyte (both surfaces).
6. To study the phenomenon of seed germination (effect of light).
7. To study the effect of different concentrations of IAA on *Avena* coleoptile elongation (IAA Bioassay).

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

8. To study the induction of amylase activity in germinating barley grains.

Demonstration experiments

1. To demonstrate suction due to transpiration.
2. Fruit ripening/Rooting from cuttings (Demonstration).
3. Bolting experiment/*Avena* coleptile bioassay (demonstration).

Suggested Readings:

- Hopkins, W.G. and Huner, A. (2008). Introduction to Plant Physiology. John Wiley and Sons. U.S.A. 4th edition.
- Taiz, L., Zeiger, E., MØller, I.M. and Murphy, A (2015). Plant Physiology and Development. Sinauer Associates Inc. USA. 6th edition.
- Bajracharya D. (1999). Experiments in Plant Physiology-A Laboratory Manual. Narosa Publishing House, New Delhi.

CC-13: Plant Metabolism **Credits 06**

C13T: Plant Metabolism **Credits 04**

Course Contents:

Unit 1: Concept of metabolism

Introduction, anabolic and catabolic pathways, regulation of metabolism, role of regulatory enzymes (allosteric ,covalent modulation and Isozymes).

Unit 2: Carbon assimilation

Historical background, photosynthetic pigments, role of photosynthetic pigments (chlorophylls and accessory pigments), antenna molecules and reaction centres, photochemical reactions, photosynthetic electron transport, PSI, PSII, Q cycle, CO2 reduction, photorespiration, C4 pathways; Crassulacean acid metabolism; Factors affecting CO2 reduction.

Unit 3: Carbohydrate metabolism

Synthesis and catabolism of sucrose and starch.

Unit 4: Carbon Oxidation

Glycolysis, fate of pyruvate, regulation of glycolysis, oxidative pentose phosphate pathway, oxidative decarboxylation of pyruvate, regulation of PDH, NADH shuttle; TCA cycle,amphibolic role, anaplerotic reactions, regulation of the cycle, mitochondrial electron transport, oxidative phosphorylation, cyanide-resistant respiration, factors affecting respiration.

Unit 5: ATP-Synthesis

Mechanism of ATP synthesis, substrate level phosphorylation, chemiosmotic mechanism (oxidative and photophosphorylation), ATP synthase, Boyers conformational model, Racker's experiment, Jagendorf's experiment; role of uncouplers.

Unit 6: Lipid metabolism

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Synthesis and breakdown of triglycerides, β-oxidation, glyoxylate cycle, gluconeogenesis and its role in mobilisation of lipids during seed germination, α oxidation.

Unit 7: Nitrogen metabolism
Nitrate assimilation, biological nitrogen fixation (examples of legumes and non-legumes); Physiology and biochemistry of nitrogen fixation; Ammonia assimilation and transamination.

Unit 8: Mechanisms of signal transduction
Receptor-ligand interactions; Second messenger concept, Calcium calmodulin, MAP kinase cascade.

C13P: Plant Metabolism **Credits 02**

Practical

1. Chemical separation of photosynthetic pigments.
2. Experimental demonstration of Hill's reaction.
3. To study the effect of light intensity on the rate of photosynthesis.
4. Effect of carbon dioxide on the rate of photosynthesis.
5. To compare the rate of respiration in different parts of a plant.
6. To demonstrate activity of Nitrate reductase in germinating leaves of different plant sources.
7. To study the activity of lipases in germinating oilseeds and demonstrate mobilization of lipids
1. during germination.
8. Demonstration of fluorescence by isolated chlorophyll pigments.
9. Demonstration of absorption spectrum of photosynthetic pigments.

Suggested Readings

- Hopkins, W.G. and Huner, A. (2008). Introduction to Plant Physiology. John Wiley and Sons. U.S.A. 4th edition.
- Taiz, L., Zeiger, E., MØller, I.M. and Murphy, A (2015). Plant Physiology and Development. Sinauer Associates Inc. USA. 6th edition.
- Harborne, J.B. (1973). Phytochemical Methods. John Wiley & Sons. New York.

CC-14: Plant Biotechnology **Credits 06**

C14T: Plant Biotechnology **Credits 04**

Course Contents:

Unit -1: Plant Tissue Culture
Historical perspective; Composition of media; Nutrient and hormone requirements (role of vitamins and hormones); Totipotency; Organogenesis; Embryogenesis (somatic and zygotic); Protoplast isolation, culture and fusion; Tissue culture applications (micropropagation, androgenesis, virus elimination, secondary metabolite production, haploids, triploids and hybrids; Cryopreservation; Germplasm Conservation).

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit- 2: Recombinant DNA technology

Restriction Endonucleases (History, Types I-IV, biological role and application); Restriction

Mapping (Linear and Circular); Cloning Vectors: Prokaryotic (pUC 18 and pUC19, pBR322, Ti plasmid, BAC); Lambda phage, M13 phagemid, Cosmid, Shuttle vector; Eukaryotic Vectors (YAC).

Unit- 3:Gene Cloning

Recombinant DNA, Bacterial Transformation and selection of recombinant clones, PCRmediated gene cloning; Gene Construct; construction of genomic and cDNA libraries, screening DNA libraries to obtain gene of interest by genetic selection; complementation, colony hybridization; PCR

Unit- 4: Methods of gene transfer

Agrobacterium-mediated, Direct gene transfer by Electroporation, Microinjection, Microprojectile bombardment; Selection of transgenics– selectable marker and reporter genes (Luciferase, GUS, GFP).

Unit - 5: Applications of Biotechnology

Pest resistant (Bt-cotton); herbicide resistant plants (RoundUp Ready soybean); Transgenic crops with improved quality traits (Flavr Savr tomato, Golden rice); Improved horticultural varieties (Moondust carnations); Role of transgenics in bioremediation (Superbug); edible vaccines; Industrial enzymes (Aspergillase, Protease, Lipase); Gentically Engineered Products–Human Growth Hormone; Humulin; Biosafety concerns.

C14P: Plant Biotechnology **Credits 02**

Practical

1. (a) Preparation of MS medium.
   (b) Demonstration of *in vitro* sterilization and inoculation methods using leaf and nodal explants of tobacco, *Datura*, *Brassica* etc.
2. Study of anther, embryo and endosperm culture, micropropagation, somatic embryogenesis & artificial seeds through photographs.
3. Isolation of protoplasts.
4. Construction of restriction map of circular and linear DNA from the data provided.
5. Study of methods of gene transfer through photographs: *Agrobacterium*-mediated, direct gene
6. transfer by electroporation, microinjection, microprojectile bombardment.
7. Study of steps of genetic engineering for production of Bt cotton, Golden rice, Flavr Savr tomato through photographs.
8. Isolation of plasmid DNA.
9. Restriction digestion and gel electrophoresis of plasmid DNA.

Suggested Readings:

Discipline Specific Electives (DSE)

DSE-1: Natural Resource Management **Credits 06**

DSE1T: Natural Resource Management **Credits 04**

Course Contents:

Unit- 1: Natural resources : Definition and types.

Unit- 2: Sustainable utilization : Concept, approaches (economic, ecological and socio-cultural).

Unit- 3: Land : Utilization (agricultural, pastoral, horticultural, silvicultural); Soil degradation and management.

Unit- 4: Water
Fresh water (rivers, lakes, groundwater, aquifers, watershed); Marine; Estuarine; Wetlands; Threats and management strategies.

Unit- 5: Biological Resources
Biodiversity-definition and types; Significance; Threats; Management strategies; Bio-prospecting; IPR; CBD; National Biodiversity Action Plan).

Unit - 6: Forests
Definition, Cover and its significance (with special reference to India); Major and minor Forest products; Depletion; Management.

Unit- 7: Energy : Renewable and non-renewable sources of energy

Unit- 8: Contemporary practices in resource management
EIA, GIS, Participatory Resource Appraisal, Ecological Footprint with emphasis on carbon footprint, Resource Accounting; Waste management.

Unit- 9: National and international efforts in resource management and conservation

DSE-1P: Natural Resource Management **Credits 02**

Practical

1. Estimation of solid waste generated by a domestic system (biodegradable and nonbiodegradable) and its impact on land degradation.
2. Collection of data on forest cover of specific area.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

3. Measurement of dominance of woody species by DBH (diameter at breast height) method.
4. Calculation and analysis of ecological footprint.
5. Ecological modeling.

Suggested Readings:

- Vasudevan, N. (2006). Essentials of Environmental Science. Narosa Publishing House, New Delhi.
- Singh, J. S., Singh, S.P. and Gupta, S. (2006). Ecology, Environment and Resource Conservation. Anamaya Publications, New Delhi.
- Rogers, P.P., Jalal, K.F. and Boyd, J.A. (2008). An Introduction to Sustainable Development. Prentice Hall of India Private Limited, New Delhi.

Or

DSE-1: Biostatistics **Credits 06**

DSE1T: Biostatistics **Credits 04**

Course Contents:

Unit 1: Biostatistics

Definition - statistical methods - basic principles. Variables - measurements, functions, limitations and uses of statistics.

Unit 2: Collection of data primary and secondary

Types and methods of data collection procedures - merits and demerits. Classification - tabulation and presentation of data - sampling methods.

Unit 3:Measures of central tendency

Mean, median, mode, geometric mean - merits & demerits. Measures of dispersion - range, standard deviation, mean deviation, quartile deviation - merits and demerits; Co-efficient of variations.

Unit 4: Correlation

Types and methods of correlation, regression, simple regression equation, fitting prediction, similarities and dissimilarities of correlation and regression

Unit 5: Statistical inference

Hypothesis - simple hypothesis - student 't' test - chi square test.

DSE1P: Biostatistics **Credits 02**

Practical

1. Calculation of mean, standard deviation and standard error
2. Calculation of correlation coefficient values and finding out the probability
3. Calculation of ‘F’ value and finding out the probability value for the F value.

Suggested Readings

- Biostatistic, Danniel, W.W., 1987.New York, John Wiley Sons.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University

DSE-2: Plant Breeding **Credits 06**

DSE2T: Plant Breeding **Credits 04**

Course Contents:

Unit -1: Plant Breeding

Introduction and objectives. Breeding systems: modes of reproduction in crop plants. Important achievements and undesirable consequences of plant breeding.

Unit -2: Methods of Crop improvement

Introduction: Centres of origin and domestication of crop plants, plant genetic resources; Acclimatization; Selection methods: For self pollinated, cross pollinated and vegetatively propagated plants; Hybridization: For self, cross and vegetatively propagated plants – Procedure, advantages and limitations.

Unit -3: Quantitative inheritance

Concept, mechanism, examples of inheritance of Kernel colour in wheat, Skin colour in human beings. Monogenic vs polygenic Inheritance.

Unit - 4: Inbreeding depression and heterosis

History, genetic basis of inbreeding depression and heterosis : Applications.

Unit - 5: Crop improvement and breeding

Role of mutations; Polyploidy; Distant hybridization and role of biotechnology in crop improvement.

DSE2P: Plant Breeding (Practical) **Credits 02**

Practical

1. Identification of offspring's having parental genotypes and recombinant genotypes, based on combination of morphological attributes in a dihybrid cross.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

2. Processes of emaculation –

a) By applying higher temperature,
b) By amputing anthers.

3. Determination of genetic inheritance of characters in monohybrid and dihybrid crosses by Chi-square test (including Mendelian ratios and the ratios of gene interactions e.g. Dominant Epistasis, Supplementary gene action, Polymeric Gene action, Complementary Gene action, Inhibitory Gene action and Duplicating Gene action.

4. Identification of fertile and sterile pollens with carmine stain and TTC test.

Suggested Readings:

2. Chaudhari, H.K. (1984). Elementary Principles of Plant Breeding. Oxford-IBH. 2nd edition.
3. Acquaah, G. (2007). Principles of Plant Genetics & Breeding. Blackwell Publishing.

Or

DSE-2: Stress Biology **Credits 06**

DSE2T: Stress Biology **Credits 04**

Course Contents:

Unit 1: Defining plant stress: Acclimation and adaptation.

Unit 2: Environmental factors: Water stress; Salinity stress, High light stress; Temperature stress; Hypersensitive reaction; Pathogenesis– related (PR) proteins; Systemic acquired resistance; Mediation of insect and disease resistance by jasmonates.

Unit 3: Stress sensing mechanisms in plants: Calcium modulation, Phospholipid signaling

Unit 4: Developmental and physiological mechanisms that protect plants against environmental stress: Adaptation in plants; Changes in root: shoot ratio; Aerenchyna development; Osmotic adjustment; Compatible solute production.

Unit 5: Reactive oxygen species–Production and scavenging mechanisms.

DSE2P: Stress Biology **Credits 02**

Practical

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

1. Quantitative estimation of peroxidase activity in the seedlings in the absence and presence of salt stress.
2. Superoxide activity in seedlings in the absence and presence of salt stress.
3. Zymographic analysis of peroxidase.
4. Zymographic analysis of superoxide dismutase activity.
5. Quantitative estimation and zymographic analysis of catalase.
6. Quantitative estimation and zymographic analysis of glutathione reductase.
7. Estimation of superoxide anions.

Suggested Readings:

- Hopkins, W.G. and Huner, A. (2008). Introduction to Plant Physiology. John Wiley and Sons. U.S.A. 4th edition.
- Taiz, L., Zeiger, E., MØller, I.M. and Murphy, A (2015). Plant Physiology and Development. Sinauer Associates Inc. USA. 6th edition.

DSE-3: Industrial and Environmental Microbiology **Credits 06**

DSE-3T: Industrial and Environmental Microbiology **Credits 04**

Course Contents:

Unit 1: Scope of microbes in industry and environment

Unit 2: Bioreactors / Fermenters and fermentation processes
Solid-state and liquid-state (stationary and submerged) fermentations; Batch and continuous fermentations. Components of a typical bioreactor, Types of bioreactors-laboratory, pilotscale and production fermenters; Constantly stirred tank fermenter, tower fermenter, fixed bed and fluidized bed bioreactors and air-lift fermenter.

A visit to any educational institute/ industry to see an industrial fermenter, and other downstream processing operations.

Unit 3: Microbial production of industrial products

Microorganisms involved, media, fermentation conditions, downstream processing and uses; Filtration, centrifugation, cell disruption, solvent extraction, precipitation and ultrafiltration, lyophilization, spray drying; Hands on microbial fermentations for the production and estimation (qualitative and quantitative) of Enzyme: amylase or lipase activity, Organic acid (citric acid or glutamic acid), alcohol (Ethanol) and antibiotic (Penicillin)

Unit 4: Microbial enzymes of industrial interest and enzyme immobilization

Microorganisms for industrial applications_and hands on screening microorganisms for casein hydrolysis; starch hydrolysis; cellulose hydrolysis. Methods of immobilization, advantages and applications of immobilization, large scale applications of immobilized enzymes (glucose isomerase and penicillin acylase**).**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 5: Microbes and quality of environment.
Distribution of microbes in air; Isolation of microorganisms from soil, air and water.

Unit 6: Microbial flora of water.

Water pollution, role of microbes in sewage and domestic waste water treatment systems. Determination of BOD, COD, TDS and TOC of water samples; Microorganisms as indicators of water quality, check coliform and fecal coliform in water samples.

Unit 7: Microbes in agriculture and remediation of contaminated soils.

Biological fixation; Mycorrhizae; Bioremediation of contaminated soils. Isolation of root nodulating bacteria, arbuscular mycorrhizal colonization in plant roots.

DSE-3P: Industrial and Environmental Microbiology Credits 02

Practical

1. Principles and functioning of instruments in microbiology laboratory
2. Hands on sterilization techniques and preparation of culture media.

Suggested Readings:

- Pelzar, M.J. Jr., Chen E.C. S., Krieg, N.R. (2010). Microbiology: An application based approach. Tata McGraw Hill Education Pvt. Ltd., Delhi.
- Tortora, G.J., Funke, B.R., Case. C.L. (2007). Microbiology. Pearson Benjamin Cummings, San Francisco, U.S.A. 9th edition.

OR

DSE-3: Bioinformatics Credits 06

DSE3T: Bioinformatics Credits 04

Course Contents:

Unit 1. Introduction to Bioinformatics
Introduction, Branches of Bioinformatics, Aim, Scope and Research areas of Bioinformatics.

Unit 2. Databases in Bioinformatics
Introduction, Biological Databases, Classification format of Biological Databases, Biological Database Retrieval System.

Unit 3. Biological Sequence Databases
National Center for Biotechnology Information (NCBI): Tools and Databases of NCBI, Database Retrieval Tool, Sequence Submission to NCBI, Basic local alignment search tool (BLAST), Nucleotide Database, Protein Database, Gene Expression Database. EMBL Nucleotide Sequence Database (EMBL-Bank): Introduction, Sequence Retrieval, Sequence Submission to EMBL, Sequence analysis tools. DNA Data Bank of Japan (DDBJ): Introduction, Resources at DDBJ, Data Submission at DDBJ. Protein

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Information Resource (PIR): About PIR, Resources of PIR, Databases of PIR, Data Retrieval in PIR. Swiss-Prot: Introduction and Salient Features.

Unit 4. Sequence Alignments
Introduction, Concept of Alignment, Multiple Sequence Alignment (MSA), MSA by CLUSTALW, Scoring Matrices, Percent Accepted Mutation (PAM), Blocks of Amino Acid Substitution Matrix (BLOSUM).

Unit 5. Molecular Phylogeny

Methods of Phylogeny, Software for Phylogenetic Analyses, Consistency of Molecular Phylogenetic Prediction.

Unit 6. Applications of Bioinformatics
Structural Bioinformatics in Drug Discovery, Quantitative structure-activity relationship (QSAR) techniques in Drug Design, Microbial genome applications, Crop improvement

DSE3P: Bioinformatics **Credits 02**

Practical
1. Nucleic acid and protein databases.
2. Sequence retrieval from databases.
3. Sequence alignment.
4. Sequence homology and Gene annotation.
5. Construction of phylogenetic tree.

Suggested Readings:

- Ghosh Z. and Bibekanand M. (2008) Bioinformatics: Principles and Applications. Oxford University Press.
- Pevsner J. (2009) Bioinformatics and Functional Genomics. II Edition. Wiley-Blackwell.
- Campbell A. M., Heyer L. J. (2006) Discovering Genomics, Proteomics and Bioinformatics. II Edition. Benjamin Cummings.

DSE-4: Analytical Techniques in Plant Sciences **Credits 06**

DSE4T: Analytical Techniques in Plant Sciences **Credits 04**

Course Contents:

Unit- 1: Imaging and related techniques
Principles of microscopy; Light microscopy; Fluorescence microscopy; Confocal microscopy; Use of fluorochromes: (a) Flow cytometry (FACS); (b) Applications of fluorescence microscopy: Chromosome banding, FISH, chromosome painting; Transmission and Scanning electron microscopy – sample preparation for electron microscopy, cryofixation, negative staining, shadow casting, freeze fracture, freeze etching.

Unit- 2: Cell fractionation

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Centrifugation: Differential and density gradient centrifugation, sucrose density gradient, CsCl2gradient, analytical centrifugation, ultracentrifugation, marker enzymes.

Unit- 3: Radioisotopes
Use in biological research, auto-radiography, pulse chase experiment.

Unit- 4: Spectrophotometry
Principle and its application in biological research.

Unit- 5: Chromatography
Principle; Paper chromatography; Column chromatography, TLC, GLC, HPLC, Ion-exchange chromatography; Molecular sieve chromatography; Affinity chromatography.

Unit- 6: Characterization of proteins and nucleic acids
Mass spectrometry; X-ray diffraction; X-ray crystallography; Characterization of proteins and nucleic acids; Electrophoresis: AGE, PAGE, SDS-PAGE

Unit- 7: Biostatistics
Statistics, data, population, samples, parameters; Representation of Data: Tabular, Graphical; Measures of central tendency: Arithmetic mean, mode, median; Measures of dispersion: Range, mean deviation, variation, standard deviation; Chi-square test for goodness of fit.

DSE4P: Analytical Techniques in Plant Sciences **Credits 02**

Practical

1. Study of Blotting techniques: Southern, Northern and Western, DNA fingerprinting, DNA sequencing, PCR through photographs.
2. Demonstration of ELISA.
3. To separate nitrogenous bases by paper chromatography.
4. To separate sugars by thin layer chromatography.
5. Isolation of chloroplasts by differential centrifugation.
6. To separate chloroplast pigments by column chromatography.
7. To estimate protein concentration through Lowry's methods.
8. To separate proteins using PAGE.
9. To separation DNA (marker) using AGE.
10. Study of different microscopic techniques using photographs/micrographs (freeze fracture, freeze etching, negative staining, positive staining, fluorescence and FISH).
11. Preparation of permanent slides (double staining).

Suggested Readings:

- Plummer, D.T. (1996). An Introduction to Practical Biochemistry. Tata McGraw-Hill Publishing Co. Ltd. New Delhi. 3rd edition.
- Ruzin, S.E. (1999). Plant Microtechnique and Microscopy, Oxford University Press, New York. U.S.A.

OR

DSE-4: Research Methodology **Credits 06**

DSE4T: Research Methodology **Credits 04**

Course Contents:

Unit 1: Basic concepts of research

Research-definition and types of research (Descriptive vs analytical; applied vs fundamental; quantitative vs qualitative; conceptual vs emperical).Research methods vs methodology. Literature-review and its consolidation; Library research; field research; laboratory research.

Unit 2: General laboratory practices
Common calculations in botany laboratories. Understanding the details on the label of reagent bottles. Molarity and normality of common acids and bases.Preparation of solutions. Dilutions. Percentage solutions. Molar, molal and normal solutions.Technique of handling micropipettes; Knowledge about common toxic chemicals and safety measures in their handling.

Unit 3: Data collection and documentation of observations
Maintaining a laboratory record; Tabulation and generation of graphs. Imaging of Tissue specimens and application of scale bars. The art of field photography.

Unit 4: Overview of Biological Problems
History; Key biology research areas, Model organisms in biology (A Brief overview): Genetics, Physiology, Biochemistry, Molecular Biology, Cell Biology, Genomics, Proteomics Transcriptional regulatory network.

Unit 5: **Methods to study plant cell/tissue structure**
Whole mounts, peel mounts, squash preparations, clearing, maceration and sectioning; Tissue preparation: living vs fixed, physical vs chemical fixation, coagulating fixatives, non-coagulant fixatives; tissue dehydration using graded solvent series; Paraffin and plastic infiltration; Preparation of thin and ultrathin sections.

Unit 6: Plant microtechniques
Staining procedures, classification and chemistry of stains. Staining equipment. Reactive dyes and fluorochromes (including genetically engineered protein labeling with GFP and other tags). Cytogenetic techniques with squashed plant materials.

Unit 7: The art of scientific writing and its presentation
Numbers, units, abbreviations and nomenclature used in scientific writing. Writing references. Powerpoint presentation. Poster presentation. Scientific writing and ethics, Introduction to copyright-academic misconduct/plagiarism.

DSE4P: Research Methodology **Credits 02**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Practical

1. Experiments based on chemical calculations.
2. Plant microtechnique experiments.
3. The art of imaging of samples through microphotography and field photography.
4. Poster presentation on defined topics.
5. Technical writing on topics assigned.

Suggested Readings:

- Dawson, C. (2002). Practical research methods. UBS Publishers, New Delhi.
- Stapleton, P., Yondeowei, A., Mukanyange, J., Houten, H. (1995). Scientific writing for agricultural research scientists – a training reference manual. West Africa Rice Development Association, Hong Kong.
- Ruzin, S.E. (1999). Plant microtechnique and microscopy. Oxford University Press, New York, U.S.A.

Skill Enhancement Course (SEC)

SEC-1: Biofertilizers **Credits 02**

SEC1T: Biofertilizers **Credits 02**

Course Contents:

Unit- 1: General account about the microbes used as biofertilizer – Rhizobium – isolation, identification, mass multiplication, carrier based inoculants, Actinorrhizal symbiosis.

Unit- 2: *Azospirillum:* isolation and mass multiplication – carrier based inoculant, associative effect of different microorganisms.*Azotobacter*: classification, characteristics – crop response to *Azotobacter* inoculum, maintenance and mass multiplication.

Unit- 3: Cyanobacteria (blue green algae), *Azolla* and *Anabaena azollae* association, nitrogen fixation, factors affecting growth, blue green algae and *Azolla* in rice cultivation.

Unit- 4: Mycorrhizal association, types of mycorrhizal association, taxonomy, occurrence and distribution, phosphorus nutrition, growth and yield – colonization of VAM – isolation and inoculum production of VAM, and its influence on growth and yield of crop plants.

Unit-5: Organic farming – Green manuring and organic fertilizers, Recycling of biodegradable municipal, agricultural and Industrial wastes – biocompost making methods, types and method of vermicomposting – field Application.

Suggested Readings:

- Dubey, R.C., 2005 A Text book of Biotechnology S.Chand & Co, New Delhi.
- Kumaresan, V. 2005, Biotechnology, Saras Publications, New Delhi.
- John Jothi Prakash, E. 2004. Outlines of Plant Biotechnology. Emkay _Publication, New Delhi.

OR

SEC- 1: Floriculture **Credits 02**

SEC1T: Floriculture

Course Contents:

Unit 1: Introduction: History of gardening; Importance and scope of floriculture and landscape gardening.

Unit 2: Nursery Management and Routine Garden Operations: Sexual and vegetative methods of propagation; Soil sterilization; Seed sowing; Pricking; Planting and transplanting; Shading; Stopping or pinching; Defoliation; Wintering; Mulching; Topiary; Role of plant growth regulators.

Unit 3: Ornamental Plants: Flowering annuals; Herbaceous perennials; Divine vines; Shade and ornamental trees; Ornamental bulbous and foliage plants; Cacti and succulents; Palms and Cycads; Ferns and Selaginellas; Cultivation of plants in pots; Indoor gardening; Bonsai.

Unit 4: Principles of Garden Designs: English, Italian, French, Persian, Mughal and Japanese gardens; Features of a garden (Garden wall, Fencing, Steps, Hedge, Edging, Lawn, Flower beds, Shrubbery, Borders, Water garden. Some Famous gardens of India.

Unit 5: Landscaping Places of Public Importance: Landscaping highways and Educational institutions.

Unit 6: Commercial Floriculture: Factors affecting flower production; Production and packaging of cut flowers; Flower arrangements; Methods to prolong vase life; Cultivation of Important cut flowers (Carnation, Aster, Chrysanthemum, Dahlia, Gerbera, Gladiolous, Marigold,Rose, Lilium, Orchids).

Unit 7: Diseases and Pests of Ornamental Plants.

Suggested Readings:

- Randhawa, G.S. and Mukhopadhyay, A. 1986. Floriculture in India. Allied Publishers.

SEC-2: Medicinal Botany **Credits 02**

SEC-2T: Medicinal Botany

Course Contents:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 1:
History, Scope and Importance of Medicinal Plants. Indigenous Medicinal Sciences; Definition and Scope - **Ayurveda**: History, origin, panchamahabhutas, saptadhatu and tridosha concepts, Rasayana, plants used in ayurvedic treatments, **Siddha:** Origin of Siddha medicinal systems, Basis of Siddha system, plants used in Siddha medicine. **Unani**: History, concept: Umoor-e- tabiya, tumors treatments/ therapy, polyherbal formulations.

Unit 2:
Conservation of endangered and endemic medicinal plants. Definition: endemic and endangered medicinal plants, Red list criteria; In situ conservation: Biosphere reserves, sacred groves, National Parks; Ex situ conservation: Botanic Gardens, Ethnomedicinal plant Gardens. Propagation of Medicinal Plants: Objectives of the nursery, its classification, important components of a nursery, sowing, pricking, use of green house for nursery production, propagation through cuttings, layering, grafting and budding.

Unit 3:
Ethnobotany and Folk medicines. Definition; Ethnobotany in India: Methods to study ethnobotany; Applications of Ethnobotany: National interacts, Palaeo-ethnobotany. Folk medicines of ethnobotany, ethnomedicine, ethnoecology, ethnic communities of India. Application of natural products to certain diseases- Jaundice, cardiac, infertility, diabetics, Blood pressure and skin diseases.

Suggested Readings:

- Trivedi P C, 2006. Medicinal Plants: Ethnobotanical Approach, Agrobios, India.
- Purohit and Vyas, 2008. Medicinal Plant Cultivation: A Scientific Approach, 2nd edn. Agrobios, India.

Or

SEC-2: Mushroom Culture Technology **Credits 02**

SEC-2T: Mushroom Culture Technology

Course Contents:

Unit 1:
Introduction, history. Nutritional and medicinal value of edible mushrooms; Poisonous mushrooms.Types of edible mushrooms available in India - *Volvariella volvacea, Pleurotus citrinopileatus, Agaricus bisporus.*

Unit 2:
Cultivation Technology : Infrastructure: substrates (locally available) Polythene bag, vessels, Inoculation hook, inoculation loop, low cost stove, sieves, culture rack, mushroom unit (Thatched house) water sprayer, tray, small polythene bag. Pure culture: Medium, sterilization, preparation of spawn, multiplication. Mushroom bed preparation - paddy straw, sugarcane trash, maize straw, banana leaves. Factors affecting the mushroom bed preparation - Low cost technology, Composting technology in mushroom production.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 3:
Storage and nutrition: Short-term storage (Refrigeration - upto 24 hours) Long term Storage (canning, pickels, papads), drying, storage in saltsolutions. Nutrition - Proteins - amino acids, mineral elements nutrition - Carbohydrates, Crude fibre content - Vitamins.

Unit 4:
Food Preparation:Types of foods prepared from mushroom.Research Centres - National level and Regional level.Cost benefit ratio - Marketing in India and abroad, Export Value.

Suggested Readings:

- Marimuthu, T. Krishnamoorthy, A.S. Sivaprakasam, K. and Jayarajan. R (1991) Oyster Mushrooms, Department of Plant Pathology, Tamil Nadu Agricultural University, Coimbatore.
- Swaminathan, M. (1990) Food and Nutrition. Bappco, The Bangalore Printing and Publishing Co. Ltd., No. 88, Mysore Road, Bangalore - 560018.
- Tewari, Pankaj Kapoor, S.C., (1988). Mushroom cultivation, Mittal Publications, Delhi.
- Nita Bahl (1984-1988) Hand book of Mushrooms, II Edition, Vol. I & Vol. II.

Generic Elective (GE)
[Interdisciplinary for other department]

GE-1: Biodiversity (Microbes, Algae, Fungi and Archegoniate) Credits 06

GE1T: Biodiversity (Microbes, Algae, Fungi and Archegoniate) Credits 04

Course Contents:

Unit 1: Microbes
Viruses – Discovery, general structure, replication (general account), DNA virus (T-phage); Lytic and lysogenic cycle, RNA virus (TMV); Economic importance; Bacteria – Discovery, General characteristics and cell structure; Reproduction – vegetative, asexual and recombination (conjugation, transformation and transduction); Economic importance.

Unit 2: Algae
General characteristics; Ecology and distribution; Range of thallus organization and reproduction; Classification of algae; Morphology and life-cycles of the following: *Nostoc*, *Chlamydomonas*, *Oedogonium*, *Vaucheria*, *Fucus*, *Polysiphonia*. Economic importance of algae.

Unit 3: Fungi
Introduction- General characteristics, ecology and significance, range of thallus organization,cell wall composition, nutrition, reproduction and classification; True Fungi-General characteristics, ecology and significance, life cycle of *Rhizopus* (Zygomycota) *Penicillium*,*Alternaria* (Ascomycota), *Puccinia, Agaricus* (Basidiomycota); Symbiotic

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Associations-Lichens:General account, reproduction and significance; Mycorrhiza: ectomycorrhiza and endomycorrhiza and their significance.

Unit 4: Introduction to Archegoniate
Unifying features of archegoniates, Transition to land habit, Alternation of generations.

Unit 5: Bryophytes
General characteristics, adaptations to land habit, Classification, Range of thallus organization.Classification (up to family), morphology, anatomy and reproduction of *Marchantia* and *Funaria*.(Developmental details not to be included).Ecology and economic importance of bryophytes with special mention of *Sphagnum*.

Unit 6: Pteridophytes
General characteristics, classification, Early land plants (*Cooksonia* and *Rhynia*). Classification (up to family), morphology, anatomy and reproduction of *Selaginella, Equisetum* and *Pteris*.(Developmental details not to be included).Heterospory and seed habit, stellar evolution. Ecological and economical importance of Pteridophytes.

Unit 4: Gymnosperms
General characteristics; Classification (up to family), morphology, anatomy and reproduction of *Cycas* and *Pinus* (Developmental details not to be included). Ecological and economical importance.

GE1P: Biodiversity (Microbes, Algae, Fungi and Archegoniate) (Practical) Credits 02

Practical:

1. EMs/Models of viruses – T-Phage and TMV, Line drawing/Photograph of Lytic and Lysogenic Cycle.

1. Types of Bacteria from temporary/permanent slides/photographs; EM bacterium; Binary Fission; Conjugation; Structure of root nodule.

2. Gram staining.

3. Study of vegetative and reproductive structures of *Nostoc, Chlamydomonas* (electron micrographs), *Oedogonium, Vaucheria, Fucus* and Polysiphonia* through temporary preparations and permanent slides. (* *Fucus* - Specimen and permanent slides).

4. *Rhizopus and Penicillium*: Asexual stage from temporary mounts and sexual Structures through permanent slides.

5. *Alternaria:* Specimens/photographs and tease mounts.

6. *Puccinia*: Herbarium specimens of Black Stem Rust of Wheat and infected Barberryleaves; section/tease mounts of spores on Wheat and permanent slides of both the hosts.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

7. *Agaricus*: Specimens of button stage and full grown mushroom; Sectioning of gills of *Agaricus*.
8. Lichens: Study of growth forms of lichens (crustose, foliose and fruticose)

9. Mycorrhiza: ecto mycorrhiza and endo mycorrhiza (Photographs)

10. *Marchantia*- morphology of thallus, w.m. rhizoids and scales, v.s. thallus through gemmacup, w.m. gemmae (all temporary slides), v.s. antheridiophore, archegoniophore, l.s. sporophyte (all permanent slides).

11. *Funaria*- morphology, w.m. leaf, rhizoids, operculum, peristome, annulus, spores (temporary slides); permanent slides showing antheridial and archegonial heads, l.s. capsule and protonema.
12. *Selaginella*- morphology, w.m. leaf with ligule, t.s. stem, w.m. strobilus, w.m.microsporophyll and megasporophyll (temporary slides), l.s. strobilus (permanent slide).
14. *Equisetum*- morphology, t.s. internode, l.s. strobilus, t.s. strobilus, w.m. sporangiophore,w.m. spores (wet and dry)(temporary slides); t.s rhizome (permanent slide).
13. Pteris- morphology, t.s. rachis, v.s. sporophyll, w.m. sporangium, w.m. spores (temporary slides), t.s. rhizome, w.m. prothallus with sex organs and young sporophyte (permanent slide).
14. *Cycas*- morphology (coralloid roots, bulbil, leaf), t.s. coralloid root, t.s. rachis, v.s. leaflet,v.s. micro sporophyll, w.m. spores (temporary slides), l.s. ovule, t.s. root (permanent slide).

15. *Pinus*- morphology (long and dwarf shoots, w.m. dwarf shoot, male and female), w.m.dwarf shoot, t.s. needle, t.s. stem, l.s./t.s. male cone, w.m. microsporophyll, w.m. microspores (temporary slides), l.s. female cone, t.l.s. &r.l.s. stem (permanent slide).

GE-2: Plant Ecology and Taxonomy **Credits 06**

GE2T: Plant Ecology and Taxonomy **Credits 04**

Course Contents:

Unit- 1: Introduction

Unit- 2: Ecological factors

Soil: Origin, formation, composition, soil profile. Water: States of water in the environment, precipitation types. Light and temperature: Variation Optimal and limiting factors; Shelford law of tolerance. Adaptation of hydrophytes and xerophytes

Unit -3: Plant communities

Characters; Ecotone and edge effect; Succession; Processes and types

Unit- 4: Ecosystem

Structure; energy flow trophic organisation; Food chains and food webs, Ecological pyramids production and productivity; Bio-geochemical cycling; Cycling of carbon, nitrogen and Phosphorous

Unit- 5: Phytogeography

Principle of Biogeographical zone; Endemism.

Unit- 6: Introduction to plant taxonomy

Identification, Classification, Nomenclature.

Unit- 7 : Identification

Functions of Herbarium, important herbaria and botanical gardens of the world and India; Documentation: Flora, Keys: single access and multi-access

Unit 8 : Taxonomic evidences from palynology, cytology, phytochemistry and molecular data.

Unit 9 : Taxonomic hierarchy
Ranks, categories and taxonomic groups

Unit 10: Botanical nomenclature
Principles and rules (ICN); ranks and names; binominal system, typification, author citation, valid publication, rejection of names, principle of priority and its limitations.

Unit 11: Classification

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University

Types of classification-artificial, natural and phylogenetic. Bentham and Hooker (upto series), Engler and Prantl (upto series).

Unit 12: Biometrics, numerical taxonomy and cladistics
Characters; variations; OTUs, character weighting and coding; cluster analysis; phenograms, cladograms (definitions and differences).

GE2P: Practical **Credit 02**

Practical:

1. Study of instruments used to measure microclimatic variables: Soil thermometer, maximum and minimum thermometer, anemometer, psychrometer/hygrometer, rain gauge and lux meter.
2. Determination of pH, and analysis of two soil samples for carbonates, chlorides, nitrates, sulphates, organic matter and base deficiency by rapid field test.
3. Comparison of bulk density, porosity and rate of infiltration of water in soil of three habitats.
4. (a) Study of morphological adaptations of hydrophytes and xerophytes (four each). (b) Study of biotic interactions of the following: Stem parasite (*Cuscuta),* Root parasite (*Orobanche*), Epiphytes, Predation (Insectivorous plants).
5. Determination of minimal quadrat size for the study of herbaceous vegetation in the college campus by species area curve method. (species to be listed)
6. Quantitative analysis of herbaceous vegetation in the college campus for frequency and comparison with Raunkiaer's frequency distribution law
7. Study of vegetative and floral characters of the following families (Description, V.S. flower, section of ovary, floral diagram/s, floral formula/e and systematic position according to Bentham & Hooker's system of classification):Brassicaceae - *Brassica,Alyssum / Iberis;* Asteraceae -*Sonchus/Launaea, Vernonia/Ageratum, Eclipta/Tridax;* Solanaceae -*Solanum nigrum, Withania;* Lamiaceae -*Salvia, Ocimum*; Liliaceae - *Asphodelus / Lilium / Allium.*
8. Mounting of a properly dried and pressed specimen of any wild plant with herbarium label (to be submitted in the record book).

Suggested Readings:

1. Kormondy, E.J. (1996). Concepts of Ecology. Prentice Hall, U.S.A. 4th edition.
2. Sharma, P.D. (2010) Ecology and Environment. Rastogi Publications, Meerut, India. 8th edition.
3. Simpson, M.G. (2006). *Plant Systematics.* Elsevier Academic Press, San Diego, CA, U.S.A.
4. Singh, G. (2012). *Plant Systematics:* Theory and Practice. Oxford & IBH Pvt. Ltd., New Delhi. 3rd edition

GE-3: Economic Botany and Plant Biotechnology **Credits 06**

GE3T: Economic Botany and Plant Biotechnology **Credits 04**

Course Contents:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

Unit 1: Origin of Cultivated Plants
Concept of centres of origin, their importance with reference to Vavilov's work.

Unit 2: Cereals

Wheat - Origin, morphology, uses

Unit 3: Legumes

General account with special reference to Gram and soybean

U nit 4: Spices

General account with special reference to clove and black pepper (Botanical name, family, part used morphology and uses)

U nit 5: Beverages

Tea (morphology, processing, uses)

Unit 6: Oils and Fats

General description with special reference to groundnut

Unit 7: Fibre Yielding Plants

General description with special reference to Cotton (Botanical name, family, part used, morphology and uses)

Unit 8: Introduction to biotechnology

Unit 9: Plant tissue culture

Micropropagation ; haploid production through androgenesis and gynogenesis; brief account of embryo and endosperm culture with their applications

Unit 10: Recombinant DNA Techniques

Blotting techniques: Northern, Southern and Western Blotting, DNA Fingerprinting; Molecular DNA markers i.e. RAPD, RFLP, SNPs; DNA sequencing, PCR and Reverse Transcriptase-PCR. Hybridoma and monoclonal antibodies, ELISA and Immuno detection. Molecular diagnosis of human disease, Human gene Therapy.

GE3P: Economic Botany and Plant Biotechnology **Credits 04**

Practical:

1. Study of economically important plants : Wheat, Gram, Soybean, Black pepper, Clove Tea, Cotton, Groundnut through specimens, sections and micro chemical tests

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

2. Familiarization with basic equipments in tissue culture.
3. Study through photographs: Anther culture, somatic embryogenesis, endosperm and embryo culture; micropropagation.
4. Study of molecular techniques: PCR, Blotting techniques, AGE and PAGE.

Suggested Readings:

- Kochhar, S.L. (2011). Economic Botany in the Tropics, MacMillan Publishers India Ltd., New Delhi. 4th edition.
- Bhojwani, S.S. and Razdan, M.K., (1996). Plant Tissue Culture: Theory and Practice. Elsevier Science Amsterdam. The Netherlands.
- Glick, B.R., Pasternak, J.J. (2003). Molecular Biotechnology- Principles and Applications of recombinant DNA. ASM Press, Washington.

GE-4: Plant Anatomy and Embryology **Credits 06**

GE4T: Plant Anatomy and Embryology **Credits 04**

Course Contents:

Unit 1: Meristematic and permanent tissues
Root and shoot apical meristems; Simple and complex tissues

U nit 2: Organs
Structure of dicot and monocot root stem and leaf.

Unit 3: Secondary Growth
Vascular cambium – structure and function, seasonal activity. Secondary growth in root and stem, Wood (heartwood and sapwood)

Unit 4: Adaptive and protective systems
Epidermis, cuticle, stomata; General account of adaptations in xerophytes and hydrophytes.

Unit 5: Structural organization of flower
Structure of anther and pollen; Structure and types of ovules; Types of embryo sacs, organization and ultrastructure of mature embryo sac.

Unit 6: Pollination and fertilization
Pollination mechanisms and adaptations; Double fertilization; Seed-structure appendages and dispersal mechanisms.

Unit 7: Embryo and endosperm
Endosperm types, structure and functions; Dicot and monocot embryo; Embryo endosperm relationship

Unit 8: Apomixis and polyembryony
Definition, types and Practical applications

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

GE4P: Plant Anatomy and Embryology **Credits 02**

Practical:

1. Study of meristems through permanent slides and photographs.
2. Tissues (parenchyma, collenchyma and sclerenchyma); Macerated xylary elements, Phloem (Permanent slides, photographs)
3. Stem: Monocot: *Zea mays;* Dicot: *Helianthus*; Secondary: *Helianthus* (only Permanent slides).
4. Root: Monocot: *Zea mays*; Dicot: *Helianthus*; Secondary: *Helianthus* (only Permanent slides).
5. Leaf: Dicot and Monocot leaf (only Permanent slides).
6. Adaptive anatomy: Xerophyte (*Nerium* leaf); Hydrophyte (*Hydrilla* stem).
7. Structure of anther (young and mature), tapetum (amoeboid and secretory) (Permanent slides).
8. Types of ovules: anatropous, orthotropous, circinotropous, amphitropous/ campylotropous.
9. Female gametophyte: *Polygonum* (monosporic) type of Embryo sac Development (Permanent slides/photographs).
10. Ultrastructure of mature egg apparatus cells through electron micrographs.
11. Pollination types and seed dispersal mechanisms (including appendages, aril, caruncle) (Photographs and specimens).
12. Dissection of embryo/endosperm from developing seeds.
13. Calculation of percentage of germinated pollen in a given medium.

Suggested Readings:

1. Bhojwani, S.S. & Bhatnagar, S.P. (2011). Embryology of Angiosperms. Vikas Publication House Pvt. Ltd. New Delhi. 5th edition.
2. Mauseth, J.D. (1988). Plant Anatomy. The Benjamin/Cummings Publisher, USA.

OR

GE-4: Plant Physiology and Metabolism **Credits 06**

GE4T: Plant Physiology and Metabolism **Credits 04**

Course Contents:

Unit 1: Plant-water relations
Importance of water, water potential and its components; Transpiration and its significance; Factors affecting transpiration; Root pressure and guttation.

U nit 2: Mineral nutrition
Essential elements, macro and micronutrients; Criteria of essentiality of elements; Role of essential elements; Transport of ions across cell membrane, active and passive transport, carriers, channels and pumps.

Unit 3: Translocation in phloem.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 11:59:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Botany_Hons.pdf

C omposition of phloem sap, girdling experiment; Pressure flow model; Phloem loading and unloading

Unit 4: Photosynthesis
Photosynthetic Pigments (Chl a, b, xanthophylls, carotene); Photosystem I and II, reaction center, antenna molecules; Electron transport and mechanism of ATP synthesis; C3, C4 and CAM pathways of carbon fixation; Photorespiration.

U nit 5: Respiration
Glycolysis, anaerobic respiration, TCA cycle; Oxidative phosphorylation, Glyoxylate, Oxidative Pentose Phosphate Pathway.

U nit 6: Enzymes
Structure and properties; Mechanism of enzyme catalysis and enzyme inhibition.

U nit 7: Nitrogen metabolism
Biological nitrogen fixation; Nitrate and ammonia assimilation.

Unit 8: Plant growth regulators
Discovery and physiological roles of auxins, gibberellins, cytokinins, ABA, ethylene.

Unit 9: Plant response to light and temperature
Photoperiodism (SDP, LDP, Day neutral plants); Phytochrome (discovery and structure), red and far red light responses on photomorphogenesis; Vernalization.

GE4P: Plant Physiology and Metabolism **Credits 02**

Practical

1. Determination of osmotic potential of plant cell sap by plasmolytic method.
2. To study the effect of two environmental factors (light and wind) on transpiration by excised twig.
3. Calculation of stomatal index and stomatal frequency of a mesophyte and a xerophyte.
4. Demonstration of Hill reaction.
5. Demonstrate the activity of catalase and study the effect of pH and enzyme concentration.
6. To study the effect of light intensity and bicarbonate concentration on O2 evolution in photosynthesis.
7. Comparison of the rate of respiration in any two parts of a plant.
8. Separation of amino acids by paper chromatography.

Demonstration experiments (any four)

1. Bolting.
2. Effect of auxins on rooting.
3. Suction due to transpiration.
4. R.Q.
5. Respiration in roots.

List of Core Courses and Electives

Core Course (CC)

DSC-1A: Biodiversity (Microbes, Algae, Fungi and Archegoniate)
DSC-1B: Plant Ecology and Taxonomy
DSC-1C: Plant Anatomy and Embryology
DSC-1D: Plant Physiology and Metabolism

Discipline Specific Electives (DSE)

DSE-1: Cell and Molecular Biology
Or
DSE-1: Economic Botany and Biotechnology
Or
DSE-1: Bioinformatics

DSE-2: Genetics and Plant Breeding
Or
DSE-2: Analytical Techniques in Plant Sciences
Or
DSE-2: Research Methodology

Skill Enhancement Course (SEC)

SEC-1: Bio-fertilizers
Or
SEC-1: Nursery and Gardening

SEC-2: Herbal Technology
Or
SEC-2: Mushroom Culture Technology

SEC-3: Floriculture
Or
SEC-3: Ethnobotany

SEC-4: Medicinal Botany
Or
SEC-4: Plant Diversity and Human Welfare
Or
SEC-4: Intellectual Property Rights

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Core Course (CC)

DSC-1A(CC-1) : Biodiversity (Microbes, Algae, Fungi and Archegoniate)

Credits 06

DSC1AT(C1T) : Biodiversity (Microbes, Algae, Fungi and Archegoniate)

Credits 04

Unit 1: Microbes

Viruses – Discovery, general structure, replication (general account), DNA virus (T-phage); Lytic and lysogenic cycle, RNA virus (TMV); Economic importance; Bacteria – Discovery, General characteristics and cell structure; Reproduction – vegetative, asexual and recombination (conjugation, transformation and transduction); Economic importance.

Unit 2: Algae

General characteristics; Ecology and distribution; Range of thallus organization and reproduction; Classification of algae; Morphology and life-cycles of the following: *Nostoc*, *Chlamydomonas, Oedogonium, Vaucheria*, *Fucus*, *Polysiphonia*. Economic importance of algae

Unit 3: Fungi

Introduction - General characteristics, ecology and significance, range of thallus organization, cell wall composition , nutrition, reproduction and classification; True Fungi- General characteristics, ecology and significance, life cycle of *Rhizopus* (Zygomycota) *Penicillium, Alternaria* (Ascomycota), *Puccinia, Agaricus* (Basidiomycota); Symbiotic Associations-Lichens: General account, reproduction and significance; Mycorrhiza: ectomycorrhiza and endomycorrhiza and their significance

Unit 4: Introduction to Archegoniate

Unifying features of archegoniates, Transition to land habit, Alternation of generations.

U nit 5: Bryophytes

General characteristics, adaptations to land habit, Classification, Range of thallus organization. Classification (up to family), morphology, anatomy and reproduction of *Marchantia* and *Funaria*. (Developmental details not to be included). Ecology and economic importance of bryophytes with special mention of *Sphagnum*.

Unit 6: Pteridophytes

General characteristics, classification, Early land plants (*Cooksonia* and *Rhynia*). Classification (up to family), morphology, anatomy and reproduction of *Selaginella*, *Equisetum* and *Pteris*. (Developmental details not to be included). Heterospory and seed habit, stelar evolution. Ecological and economical importance of Pteridophytes.

U nit 4: Gymnosperms

General characteristics, classification. Classification (up to family), morphology, anatomy and reproduction of *Cycas* and *Pinus*. (Developmental details not to be included). Ecological and economical importance.

DSC1P(C1P) : Biodiversity (Microbes, Algae, Fungi and Archegoniate(Practical))

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

List of Practical **Credits : 02**

1. EMs/Models of viruses – T-Phage and TMV, Line drawing/Photograph of Lytic and Lysogenic Cycle.
2. Types of Bacteria from temporary/permanent slides/photographs; EM bacterium; Binary Fission; Conjugation; Structure of root nodule.Gram staining
3. Study of vegetative and reproductive structures of *Nostoc, Chlamydomonas* (electron micrographs), *Oedogonium, Vaucheria, Fucus* and Polysiphonia* through temporary preparations and permanent slides. (* *Fucus* - Specimen and permanent slides)
4. *Rhizopus and Penicillium*: Asexual stage from temporary mounts and sexual structures through permanent slides.
5. *Alternaria:* Specimens/photographs and tease mounts.
6. *Puccinia*: Herbarium specimens of Black Stem Rust of Wheat and infected Barberry leaves; section/tease mounts of spores on Wheat and permanent slides of both the hosts.
7. *Agaricus*: Specimens of button stage and full grown mushroom; Sectioning of gills of *Agaricus*.
8. Lichens: Study of growth forms of lichens (crustose, foliose and fruticose)
9. Mycorrhiza: ecto mycorrhiza and endo mycorrhiza (Photographs)
10. *Marchantia*- morphology of thallus, w.m. rhizoids and scales, v.s. thallus through gemma cup, w.m. gemmae (all temporary slides), v.s. antheridiophore, archegoniophore, l.s. sporophyte (all permanent slides).
11. *Funaria*- morphology, w.m. leaf, rhizoids, operculum, peristome, annulus, spores (temporary slides); permanent slides showing antheridial and archegonial heads, l.s. capsule and protonema.
12. *Selaginella* - morphology, w.m. leaf with ligule, t.s. stem, w.m. strobilus, w.m. microsporophyll and megasporophyll (temporary slides), l.s. strobilus (permanent slide).
13. *Equisetum* - morphology, t.s. internode, l.s. strobilus, t.s. strobilus, w.m. sporangiophore, w.m. spores (wet and dry)(temporary slides); t.s rhizome (permanent slide).
14. *Pteris* - morphology, t.s. rachis, v.s. sporophyll, w.m. sporangium, w.m. spores (temporary slides), t.s. rhizome, w.m. prothallus with sex organs and young sporophyte (permanent slide).
15. *Cycas* - morphology (coralloid roots, bulbil, leaf), t.s. coralloid root, t.s. rachis, v.s. leaflet, v.s. microsporophyll, w.m. spores (temporary slides), l.s. ovule, t.s. root (permanent slide).
16. *Pinus* - morphology (long and dwarf shoots, w.m. dwarf shoot, male and female), w.m. dwarf shoot, t.s. needle, t.s. stem, , l.s./t.s. male cone, w.m. microsporophyll, w.m. microspores (temporary slides), l.s. female cone, t.l.s. & r.l.s. stem (permanent slide).

DSC-1B(CC-2): Plant Ecology and Taxonomy **Credits 06**

DSC1B(C2T): Plant Ecology and Taxonomy **Credits 04**

Unit 1: Introduction

Unit 2: Ecological factors
Soil: Origin, formation, composition, soil profile. Water: States of water in the environment, precipitation types. Light and temperature: Variation Optimal and limiting factors; Shelford law of tolerance. Adaptation of hydrophytes and xerophytes.

U nit 3: Plant communities
Characters; Ecotone and edge effect; Succession; Processes and types.

Unit 4: Ecosystem
Structure; energy flow trophic organisation; Food chains and food webs, Ecological pyramids production and productivity; Biogeochemical cycling; Cycling of carbon, nitrogen and Phosphorous

Unit 5: Phytogeography
Principle biogeographical zones; Endemism

U nit 6 Introduction to plant taxonomy
Identification, Classification, Nomenclature.

Unit 7: Identification
Functions of Herbarium, important herbaria and botanical gardens of the world and India; Documentation: Flora, Keys: single access and multi-access

Unit 8:Taxonomic evidences from palynology, cytology, phytochemistry and molecular data.

Unit 9: Taxonomic hierarchy
Ranks, categories and taxonomic groups

Unit 10: Botanical nomenclature
Principles and rules (ICN); ranks and names; binominal system, typification, author citation, valid publication, rejection of names, principle of priority and its limitations.

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University

U nit 11: Classification

Types of classification-artificial, natural and phylogenetic. Bentham and Hooker (upto series), Engler and Prantl (upto series).

Unit 12: Biometrics, numerical taxonomy and cladistics

Characters; variations; OTUs, character weighting and coding; cluster analysis; phenograms, cladograms (definitions and differences).

DSC1BP(C2P): Plant Ecology and Taxonomy(Practical) Credits 02

Practical:

1. Study of instruments used to measure microclimatic variables: Soil thermometer, maximum and minimum thermometer, anemometer, psychrometer/hygrometer, rain gauge and lux meter.
2. Determination of pH, and analysis of two soil samples for carbonates, chlorides, nitrates, sulphates, organic matter and base deficiency by rapid field test.
3. Comparison of bulk density, porosity and rate of infiltration of water in soil of three habitats.
    a. Study of morphological adaptations of hydrophytes and xerophytes (four each).
    b. Study of biotic interactions of the following: Stem parasite (*Cuscuta),* Root parasite (Orobanche), Epiphytes, Predation (Insectivorous plants)
4. Determination of minimal quadrat size for the study of herbaceous vegetation in the college campus by species area curve method. (species to be listed)
5. Quantitative analysis of herbaceous vegetation in the college campus for frequency and comparison with Raunkiaer's frequency distribution law
6. Study of vegetative and floral characters of the following families (Description, V.S. flower, section of ovary, floral diagram/s, floral formula/e and systematic position according to Bentham & Hooker's system of classification):Brassicaceae - *Brassica, Alyssum / Iberis;* Asteraceae -*Sonchus/Launaea, Vernonia/Ageratum, Eclipta/Tridax;* Solanaceae -*Solanum nigrum, Withania;* Lamiaceae -*Salvia, Ocimum*; Liliaceae - *Asphodelus / Lilium / Allium.*
7. Mounting of a properly dried and pressed specimen of any wild plant with herbarium label (to be submitted in the record book).

Suggested Readings:

- Kormondy, E.J. (1996). Concepts of Ecology. Prentice Hall, U.S.A. 4th edition.
- Sharma, P.D. (2010) Ecology and Environment. Rastogi Publications, Meerut, India. 8th edition.
- Simpson, M.G. (2006). *Plant Systematics.* Elsevier Academic Press, San Diego, CA, U.S.A.
- Singh, G. (2012). *Plant Systematics:* Theory and Practice. Oxford & IBH Pvt. Ltd., New Delhi. 3rd edition.

DSC-1C(CC-3) : Plant Anatomy and Embryology Credits 06

DSC 1CT(C3T) : Plant Anatomy and Embryology Credits 04

Unit 1: Meristematic and permanent tissues

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Root and shoot apical meristems; Simple and complex tissues.

U nit 2: Organs
Structure of dicot and monocot root stem and leaf.

Unit 3: Secondary Growth
Vascular cambium – structure and function, seasonal activity. Secondary growth in root and stem, Wood (heartwood and sapwood).

U nit 4: Adaptive and protective systems
Epidermis, cuticle, stomata; General account of adaptations in xerophytes and hydrophytes.

Unit 5: Structural organization of flower
Structure of anther and pollen; Structure and types of ovules; Types of embryo sacs, organization and ultrastructure of mature embryo sac.

Unit 6: Pollination and fertilization
Pollination mechanisms and adaptations; Double fertilization; Seed-structure appendages and dispersal mechanisms.

Unit 7: Embryo and endosperm
Endosperm types, structure and functions; Dicot and monocot embryo; Embryo endosperm relationship.

Unit 8: Apomixis and polyembryony
Definition, types and practical applications.

DSC1CP(C3P) : Plant Anatomy and Embryology(Practical) Credits 02

Practical

1. Study of meristems through permanent slides and photographs.
2. Tissues (parenchyma, collenchyma and sclerenchyma); Macerated xylary elements, Phloem (Permanent slides, photographs)
3. Stem: Monocot: *Zea mays;* Dicot: *Helianthus*; Secondary: *Helianthus* (only Permanent slides).
4. Root: Monocot: *Zea mays*; Dicot: *Helianthus*; Secondary: *Helianthus* (only Permanent slides).
5. Leaf: Dicot and Monocot leaf (only Permanent slides).
6. Adaptive anatomy: Xerophyte (*Nerium* leaf); Hydrophyte (*Hydrilla* stem).
7. Structure of anther (young and mature), tapetum (amoeboid and secretory) (Permanent slides).
8. Types of ovules: anatropous, orthotropous, circinotropous, amphitropous/ campylotropous.
9. Female gametophyte: *Polygonum* (monosporic) type of Embryo sac Development (Permanent slides/photographs).
10. Ultrastructure of mature egg apparatus cells through electron micrographs.
11. Pollination types and seed dispersal mechanisms (including appendages, aril, caruncle) (Photographs and specimens).
12. Dissection of embryo/endosperm from developing seeds.

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

13. Calculation of percentage of germinated pollen in a given medium.

Suggested Readings:

- Bhojwani, S.S. & Bhatnagar, S.P. (2011). Embryology of Angiosperms. Vikas Publication House Pvt. Ltd. New Delhi. 5th edition.
- Mauseth, J.D. (1988). Plant Anatomy. The Benjamin/Cummings Publisher, USA.

DSC-1D(CC-4): Plant Physiology and Metabolism **Credits 06**

DSC1DT(C4T): Plant Physiology and Metabolism **Credits 04**

Unit 1: Plant-water relations

Importance of water, water potential and its components; Transpiration and its significance; Factors affecting transpiration; Root pressure and guttation.

U nit 2: Mineral nutrition

Essential elements, macro and micronutrients; Criteria of essentiality of elements; Role of essential elements; Transport of ions across cell membrane, active and passive transport, carriers, channels and pumps.

Unit 3: Translocation in phloem

Composition of phloem sap, girdling experiment; Pressure flow model; Phloem loading and unloading.

Unit 4: Photosynthesis

Photosynthetic Pigments (Chl a, b, xanthophylls, carotene); Photosystem I and II, reaction center, antenna molecules; Electron transport and mechanism of ATP synthesis; C3, C4 and CAM pathways of carbon fixation; Photorespiration.

Unit 5: Respiration

Glycolysis, anaerobic respiration, TCA cycle; Oxidative phosphorylation, Glyoxylate, Oxidative Pentose Phosphate Pathway.

Unit 6: Enzymes

Structure and properties; Mechanism of enzyme catalysis and enzyme inhibition.

Unit 7: Nitrogen metabolism

Biological nitrogen fixation; Nitrate and ammonia assimilation.

Unit 8: Plant growth regulators

Discovery and physiological roles of auxins, gibberellins, cytokinins, ABA, ethylene.

Unit 9: Plant response to light and temperature

Photoperiodism (SDP, LDP, Day neutral plants); Phytochrome (discovery and structure), red and far red light responses on photomorphogenesis; Vernalization.

DSC1DP(C4P): Plant Physiology and Metabolism (Practical) **Credits 02**

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Practical

1. Determination of osmotic potential of plant cell sap by plasmolytic method.
2. To study the effect of two environmental factors (light and wind) on transpiration by excised twig.
3. Calculation of stomatal index and stomatal frequency of a mesophyte and a xerophyte.
4. Demonstration of Hill reaction.
5. Demonstrate the activity of catalase and study the effect of pH and enzyme concentration.
6. To study the effect of light intensity and bicarbonate concentration on O2 evolution in photosynthesis.
7. Comparison of the rate of respiration in any two parts of a plant.
8. Separation of amino acids by paper chromatography.

Demonstration experiments (any four)

1. Bolting.
2. Effect of auxins on rooting.
3. Suction due to transpiration.
4. R.Q.
5. Respiration in roots.

Suggested Readings:

- Taiz, L., Zeiger, E., (2010). Plant Physiology. Sinauer Associates Inc., U.S.A. 5thEdition.
- Hopkins, W.G., Huner, N.P., (2009). Introduction to Plant Physiology. John Wiley & Sons, U.S.A. 4th Edition.
- Bajracharya, D., (1999). Experiments in Plant Physiology- A Laboratory Manual. Narosa Publishing House, New Delhi.

Discipline Specific Electives (DSE)

DSE-1: Cell and Molecular Biology **Credits 06**

DSE1T: Cell and Molecular Biology **Credits 04**

Unit 1: Techniques in Biology

Principles of microscopy; Light Microscopy; Phase contrast microscopy; Fluorescence microscopy; Confocal microscopy; Sample Preparation for light microscopy;
Electron microscopy (EM) - Scanning EM and Scanning Transmission EM (STEM); Sample preparation for electron microscopy; X-ray diffraction analysis.

Unit 2: Cell as a unit of Life

The Cell Theory; Prokaryotic and eukaryotic cells; Cell size and shape; Eukaryotic Cell components.

Unit 3: Cell Organelles

Mitochondria : Structure, marker enzymes, composition; Semiautonomous nature; Symbiont hypothesis; Proteins synthesized within mitochondria; mitochondrial DNA. Chloroplast Structure, marker enzymes, composition; semiautonomous nature, chloroplast

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

DNA. ER, Golgi body & Lysosomes : Structures and roles. Peroxisomes and Glyoxisomes :Structures, composition, functions in animals and plants and biogenesis. Nucleus :Nuclear Envelope- structure of nuclear pore complex; chromatin; molecular organization, DNA packaging in eukaryotes, euchromatin and heterochromatin, nucleolus and ribosome structure (brief).

Unit 4: Cell Membrane and Cell Wall

The functions of membranes; Models of membrane structure; The fluidity of membranes; Membrane proteins and their functions; Carbohydrates in the membrane; Faces of the membranes; Selective permeability of the membranes; Cell wall.

Unit 5: Cell Cycle

Overview of Cell cycle, Mitosis and Meiosis; Molecular controls.

Unit 6: Genetic material

DNA : Miescher to Watson and Crick- historic perspective, Griffith's and Avery's transformation experiments, Hershey-Chase bacteriophage experiment, DNA structure, types of DNA, types of genetic material.

DNA replication (Prokaryotes and eukaryotes): bidirectional replication, semi–conservative, semi discontinuous RNA priming, Ø (theta) mode of replication, replication of linear, ds-DNA, replicating the 5´end of linear chromosome including replication enzymes.

Unit 7: Transcription (Prokaryotes and Eukaryotes)

Types of structures of RNA (mRNA, tRNA, rRNA), RNA polymerase - various types; Translation (Prokaryotes and eukaryotes), genetic code.

Unit 8: Regulation of gene expression

Prokaryotes:Lac operon and Tryptophan operon ; and in Eukaryotes.

DSE1P: Cell and Molecular Biology (Practical) Credits 02

Practical

1. To study prokaryotic cells (bacteria), viruses, eukaryotic cells with the help of light and electron micrographs.
2. Study of the photomicrographs of cell organelles
3. To study the structure of plant cell through temporary mounts.
4. To study the structure of animal cells by temporary mounts-squamous epithelial cell and nerve cell.
5. Preparation of temporary mounts of striated muscle fiber
6. To prepare temporary stained preparation of mitochondria from striated muscle cells /cheek epithelial cells using vital stain Janus green.
7. Study of mitosis and meiosis (temporary mounts and permanent slides).
8. Study the effect of temperature, organic solvent on semi permeable membrane.
9. Demonstration of dialysis of starch and simple sugar.
10. Study of plasmolysis and deplasmolysis on *Rhoeo* leaf.
11. Measure the cell size (either length or breadth/diameter) by micrometry.
12. Study the structure of nuclear pore complex by photograph (from Gerald Karp)

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

13. Study of special chromosomes (polytene & lampbrush) either by slides or photographs.
14. Study DNA packaging by micrographs.
15. Preparation of the karyotype and ideogram from given photograph of somatic metaphase chromosome.

Suggested Readings :

- Karp, G. 2010. Cell and Molecular Biology: Concepts and Experiments. 6th Edition. John Wiley & Sons. Inc.
- De Robertis, E.D.P. and De Robertis, E.M.F. 2006. Cell and Molecular Biology. 8th edition. Lippincott Williams and Wilkins, Philadelphia.
- Cooper, G.M. and Hausman, R.E. 2009. The Cell: A Molecular Approach. 5th edition. ASM Press & Sunderland, Washington, D.C.; Sinauer Associates, MA.
- Becker, W.M., Kleinsmith, L.J., Hardin. J. and Bertoni, G. P. 2009. The World of the Cell. 7th edition. Pearson Benjamin Cummings Publishing, San Francisco.

Or

DSE-1 : Economic Botany and Biotechnology **Credits 06**

DSE1T : Economic Botany and Biotechnology **Credits 04**

Unit 1: Origin of Cultivated Plants
Concept of centres of origin, their importance with reference to Vavilov's work

Unit 2: Cereals
Wheat -Origin, morphology, uses

U nit 3: Legumes
General account with special reference to Gram and soybean

U nit 4: Spices
General account with special reference to clove and black pepper (Botanical name, family, part used, morphology and uses)

U nit 5: Beverages
Tea (morphology, processing, uses)

U nit 6: Oils and Fats
General description with special reference to groundnut

Unit 7: Fibre Yielding Plants
General description with special reference to Cotton (Botanical name, family, part used, morphology and uses)

Unit 8: Introduction to biotechnology

U nit 9: Plant tissue culture
Micropropagation ; haploid production through androgenesis and gynogenesis; brief account of embryo & endosperm culture with their applications

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Unit 10: Recombinant DNA Techniques
Blotting techniques: Northern, Southern and Western Blotting, DNA Fingerprinting; Molecular DNA markers i.e. RAPD, RFLP, SNPs; DNA sequencing, PCR and Reverse Transcriptase-PCR. Hybridoma and monoclonal antibodies, ELISA and Immunodetection. Molecular diagnosis of human disease, Human gene Therapy.

DSE1P : Economic Botany and Biotechnology(Practical) Credits 02

Practical

1. Study of economically important plants : Wheat, Gram, Soybean, Black pepper, Clove Tea, Cotton, Groundnut through specimens, sections and microchemical tests
2. Familiarization with basic equipments in tissue culture.
3. Study through photographs: Anther culture, somatic embryogenesis, endosperm and embryo culture; micropropagation.
4. Study of molecular techniques: PCR, Blotting techniques, AGE and PAGE.

Suggested Readings

- Kochhar, S.L. (2011). Economic Botany in the Tropics, MacMillan Publishers India Ltd., New Delhi. 4th edition.
- Bhojwani, S.S. and Razdan, M.K., (1996). Plant Tissue Culture: Theory and Practice. Elsevier Science Amsterdam. The Netherlands.

Or

DSE-1: Bioinformatics Credits 06

DSE1T: Bioinformatics Credits 04

Unit 1: Introduction to Bioinformatics
Introduction, Branches of Bioinformatics, Aim, Scope and Research areas of Bioinformatics.

Unit 2: Databases in Bioinformatics
Introduction, Biological Databases, Classification format of Biological Databases, Biological Database Retrieval System.

Unit 3 : Biological Sequence Databases
National Center for Biotechnology Information (NCBI): Tools and Databases of NCBI, Database Retrieval Tool, Sequence Submission to NCBI, Basic local alignment search tool (BLAST), Nucleotide Database, Protein Database, Gene Expression Database.
EMBL Nucleotide Sequence Database (EMBL-Bank): Introduction, Sequence Retrieval, Sequence Submission to EMBL, Sequence analysis tools. DNA Data Bank of Japan (DDBJ): Introduction, Resources at DDBJ, Data Submission at
DDBJ. Protein Information Resource (PIR): About PIR, Resources of PIR, Databases of PIR, Data Retrieval in PIR. Swiss-Prot: Introduction and Salient Features.

Unit 4: Sequence Alignments

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Introduction, Concept of Alignment, Multiple Sequence Alignment (MSA), MSA by CLUSTALW, Scoring Matrices, Percent Accepted Mutation (PAM), Blocks of Amino Acid Substitution Matrix (BLOSUM).

Unit 5: Molecular Phylogeny
Methods of Phylogeny, Software for Phylogenetic Analyses, Consistency of Molecular Phylogenetic Prediction.

Unit 6: Applications of Bioinformatics
Structural Bioinformatics in Drug Discovery, Quantitative structure-activity relationship (QSAR) techniques in Drug Design, Microbial genome applications, Crop improvement.

DSE1P: Bioinformatics (Practical) Credits 02

Practical

1. Nucleic acid and protein databases.
2. Sequence retrieval from databases.
3. Sequence alignment.
4. Sequence homology and Gene annotation.
5. Construction of phylogenetic tree.

Suggested Readings:

- Ghosh Z. and Bibekanand M. (2008) Bioinformatics: Principles and Applications. Oxford University Press.
- Pevsner J. (2009) Bioinformatics and Functional Genomics. II Edition. Wiley-Blackwell.
- Campbell A. M., Heyer L. J. (2006) Discovering Genomics, Proteomics and Bioinformatics. _II Edition. Benjamin Cummings.

DSE-2: Genetics and Plant Breeding Credits 06

DSE2T: Genetics and Plant Breeding Credits 04

Unit 1: Heredity

1. Brief life history of Mendel
2. Terminologies
3. Laws of Inheritance
4. Modified Mandelian Ratios: 2:1- lethal Genes; 1:2:1- Co - dominance, incomplete dominance;- 9:7; 9:4:3; 13:3; 12:3:1.
5. Chi Square
6. Pedigree Analysis
7. Cytoplasmic Inheritance: Shell Coiling in Snail, Kappa particles in Paramecium, leaf variegation in Mirabilis jalapa, Male sterility.
8. Multiple allelism
9. Pleiotropism
10. Chromosome theory of Inheritance.

Unit 2: Sex-determination and Sex-linked Inheritance

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Unit 3: **Linkage and Crossing over**
Linkage: concept & history, complete & incomplete linkage, bridges experiment, coupling & repulsion, recombination frequency, linkage maps based on two and three factor crosses. Crossing over: concept and significance, cytological proof of crossing over.

Unit 4: Mutations and Chromosomal Aberrations
Types of mutations, effects of physical & chemical mutagens. Numerical chromosomal changes: Euploidy, Polyploidy and Aneuploidy ; Structural chromosomal changes: Deletions, Duplications, Inversions & Translocations.

Unit 5: Plant Breeding
Introduction and objectives. Breeding systems: modes of reproduction in crop plants. Important achievements and undesirable consequences of plant breeding.

Unit 6: Methods of crop improvement
Introduction: Centres of origin and domestication of crop plants, plant genetic resources; Acclimatization; Selection methods: For self pollinated, cross pollinated and vegetatively propagated plants; Hybridization: For self, cross and vegetatively propagated plants – Procedure, advantages and limitations.

Unit 7: Quantitative inheritance
Concept, mechanism, examples. Monogenic vs polygenic Inheritance.

Unit 8: Inbreeding depression and heterosis
History, genetic basis of inbreeding depression and heterosis; Applications.

Unit 9: Crop improvement and breeding
Role of mutations; Polyploidy; Distant hybridization and role of biotechnology in crop improvement.

DSE2P: Genetics and Plant Breeding(Practical) Credits 02

Practical

1. Mendel's laws through seed ratios. Laboratory exercises in probability and chisquare.
2. Chromosome mapping using point test cross data.
3. Pedigree analysis for dominant and recessive autosomal and sex linked traits.
4. Incomplete dominance and gene interaction through seed ratios (9:7, 9:6:1, 13:3, 15:1, 12:3:1, 9:3:4).
5. Study of aneuploidy: Down's, Klinefelter's and Turner's syndromes through photographs.
6. Photographs/Permanent Slides showing Translocation Ring, Laggards and Inversion Bridge.
7. Hybridization techniques - Emasculation, Bagging (For demonstration only).
8. Induction of polyploidy conditions in plants (For demonstration only).

Suggested Readings:

Or

DSE-2: Analytical Techniques in Plant Sciences **Credits 06**

DSE2T: Analytical Techniques in Plant Sciences **Credits 04**

Unit 1: Imaging and related techniques
Principles of microscopy; Light microscopy; Fluorescence microscopy; Confocal microscopy; Use of fluorochromes: (a) Flow cytometry (FACS); (b) Applications of fluorescence microscopy: Chromosome banding, FISH, chromosome painting; Transmission and Scanning electron microscopy – sample preparation for electron microscopy, cryofixation, negative staining, shadow casting, freeze fracture, freeze etching.

Unit 2: Cell fractionation
Centrifugation: Differential and density gradient centrifugation, sucrose density gradient, CsCl2 gradient, analytical centrifugation, ultracentrifugation, marker enzymes.

Unit 3: Radioisotopes
Use in biological research, auto-radiography, pulse chase experiment.

Unit 4: Spectrophotometry
Principle and its application in biological research.

Unit 5: Chromatography
Principle; Paper chromatography; Column chromatography, TLC, GLC, HPLC, Ionexchange chromatography; Molecular sieve chromatography; Affinity chromatography.

Unit 6: Characterization of proteins and nucleic acids
Mass spectrometry; X-ray diffraction; X-ray crystallography; Characterization of proteins and nucleic acids; Electrophoresis: AGE, PAGE, SDS-PAGE

Unit 7: Biostatistics

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Statistics, data, population, samples, parameters; Representation of Data: Tabular, Graphical; Measures of central tendency: Arithmetic mean, mode, median; Measures of dispersion: Range, mean deviation, variation, standard deviation; Chi-square test for goodness of fit.

DSE2P: Analytical Techniques in Plant Sciences **Credits 02**

Practical

1. Study of Blotting techniques: Southern, Northern and Western, DNA fingerprinting, DNA sequencing, PCR through photographs.
2. Demonstration of ELISA.
3. To separate nitrogenous bases by paper chromatography.
4. To separate sugars by thin layer chromatography.
5. Isolation of chloroplasts by differential centrifugation.
6. To separate chloroplast pigments by column chromatography.
7. To estimate protein concentration through Lowry's methods.
8. To separate proteins using PAGE.
9. To separate DNA (marker) using AGE.
10. Study of different microscopic techniques using photographs/micrographs (freeze fracture, freeze etching, negative staining, positive staining, fluorescence and FISH).
11. Preparation of permanent slides (double staining).

Suggested Readings:

- Plummer, D.T. (1996). An Introduction to Practical Biochemistry. Tata McGraw-Hill Publishing Co. Ltd. New Delhi. 3rd edition.
- Ruzin, S.E. (1999). Plant Microtechnique and Microscopy, Oxford University Press, New York. U.S.A.

Or

DSE-2: Research Methodology **Credits 06**

DSE2T: Research Methodology **Credits 04**

Unit 1: Basic concepts of research

Research-definition and types of research (Descriptive vs analytical; applied vs fundamental; quantitative vs qualitative; conceptual vs emperical). Research methods vs methodology. Literature-review and its consolidation; Library research; field research; laboratory research.

Unit 2: General laboratory practices

Common calculations in botany laboratories. Understanding the details on the label of reagent bottles. Molarity and normality of common acids and bases. Preparation of solutions. Dilutions. Percentage solutions. Molar, molal and normal solutions. Technique

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

of handling micropipettes; Knowledge about common toxic chemicals and safety measures in their handling.

Unit 3: Data collection and documentation of observations
Maintaining a laboratory record; Tabulation and generation of graphs. Imaging of tissue specimens and application of scale bars. The art of field photography.

Unit 4: Overview of Biological Problems
History; Key biology research areas, Model organisms in biology (A Brief overview): Genetics, Physiology, Biochemistry, Molecular Biology, Cell Biology, Genomics, Proteomics-Transcriptional regulatory network.

Unit 5: **Methods to study plant cell/tissue structure**
Whole mounts, peel mounts, squash preparations, clearing, maceration and sectioning; Tissue preparation: living vs fixed, physical vs chemical fixation, coagulating fixatives, noncoagulant fixatives; tissue dehydration using graded solvent series; Paraffin and plastic infiltration; Preparation of thin and ultrathin sections.

Unit 6: Plant microtechniques
Staining procedures, classification and chemistry of stains. Staining equipment. Reactive dyes and fluorochromes (including genetically engineered protein labeling with GFP and other tags). Cytogenetic techniques with squashed plant materials.

Unit 7: The art of scientific writing and its presentation
Numbers, units, abbreviations and nomenclature used in scientific writing. Writing references. Powerpoint presentation. Poster presentation. Scientific writing and ethics, Introduction to copyright-academic misconduct/plagiarism.

DSE2P: Research Methodology **Credits 02**

Practical

1. Experiments based on chemical calculations.
2. Plant microtechnique experiments.
3. The art of imaging of samples through microphotography and field photography.
4. Poster presentation on defined topics.
5. Technical writing on topics assigned.

Suggested Readings:

1. Dawson, C. (2002). Practical research methods. UBS Publishers, New Delhi.
2. Stapleton, P., Yondeowei, A., Mukanyange, J., Houten, H. (1995). Scientific writing for agricultural research scientists – a training reference manual. West Africa Rice
3. Development Association, Hong Kong.
4. Ruzin, S.E. (1999). Plant microtechnique and microscopy. Oxford University Press, New York, U.S.A.

Skill Enhancement Course(SEC)

SEC-1: Bio-fertilizers **Credits 02**

SEC1T: Bio-fertilizers

Unit 1: General account about the microbes used as biofertilizer – Rhizobium – isolation, identification, mass multiplication, carrier based inoculants, Actinorrhizal symbiosis.

Unit 2:*Azospirillum:* isolation and mass multiplication – carrier based inoculant, associative effect of different microorganisms. *Azotobacter*: classification, characteristics – crop response to *Azotobacter* inoculum, maintenance and mass multiplication.

Unit 3: Cyanobacteria (blue green algae), *Azolla* and *Anabaena azollae* association, nitrogen fixation, factors affecting growth, blue green algae and *Azolla* in rice cultivation.

Unit 4: Mycorrhizal association, types of mycorrhizal association, taxonomy, occurrence and distribution, phosphorus nutrition, growth and yield – colonization of VAM – isolation and inoculum production of VAM, and its influence on growth and yield of crop plants.

Unit 5: Organic farming – Green manuring and organic fertilizers, Recycling of biodegradable municipal, agricultural and Industrial wastes – biocompost making methods, types and method of vermicomposting – field Application.

Suggested Readings:

SEC-1: Nursery and Gardening **Credits 02**

SEC1T: Nursery and Gardening

Unit-1: Nursery: definition, objectives and scope and building up of infrastructure fornursery, planning and seasonal activities - Planting - direct seeding and transplants.

Unit-2:Seed: Structure and types - Seed dormancy; causes and methods of breaking dormancy - Seed storage: Seed banks, factors affecting seed viability, genetic erosion – Seed production technology - seed testing and certification.

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Unit-3: Vegetative propagation: air-layering, cutting, selection of cutting, collecting season, treatment of cutting, rooting medium and planting of cuttings - Hardening of plants – green house - mist chamber, shed root, shade house and glass house.

Unit-4: Gardening: definition, objectives and scope - different types of gardening - landscape and home gardening - parks and its components - plant materials and design - computer applications in landscaping - Gardening operations: soil laying, manuring, watering, management of pests and diseases and harvesting.

Unit-5: Sowing/raising of seeds and seedlings - Transplanting of seedlings - Study of cultivation of different vegetables: cabbage, brinjal, lady's finger, onion, garlic, tomatoes, and carrots - Storage and marketing procedures.

Suggested Readings:

- Bose T.K. & Mukherjee, D., 1972, Gardening in India, Oxford & IBH PublishingCo., New Delhi.
- Sandhu, M.K., 1989, Plant Propagation, Wile Eastern Ltd., Bangalore, Madras.
- Kumar, N., 1997, Introduction to Horticulture, Rajalakshmi Publications, Nagercoil.
- Edmond Musser & Andres, Fundamentals of Horticulture, McGraw Hill Book Co.,New Delhi.
- Agrawal, P.K. 1993, Hand Book of Seed Technology, Dept. of Agriculture andCooperation, National _Seed Corporation Ltd., NewDelhi.
- Janick Jules. 1979. Horticultural Science. (3rd Ed.), W.H. Freeman and Co., SanFrancisco, USA.

SEC-2: Herbal Technology **Credits 02**

SEC2T: Herbal Technology

Unit-1: Herbal medicines: history and scope - definition of medical terms - role of medicinal plants in Siddha systems of medicine; cultivation - harvesting - processing - storage - marketing and utilization of medicinal plants.

Unit-2: Pharmacognosy - systematic position m edicinal uses of the following herbs in curing various ailments; Tulsi, Ginger, Fenugreek, Indian Goose berry and Ashoka.

Unit-3: Phytochemistry - active principles and methods of their testing - identification andutilization of the medicinal herbs; *Catharanthus roseus* (cardiotonic), *Withania somnifera* (drugs acting on nervous system), *Clerodendron phlomoides* (anti-rheumatic) and *Centella asiatica* (memory booster).

Unit-4: Analytical pharmacognosy: Drug adulteration - types, methods of drug evaluation -Biological testing of herbal drugs - Phytochemical screening tests for secondary metabolites (alkaloids, flavonoids, steroids, triterpenoids, phenolic compounds)

Unit-5: Medicinal plant banks micro propagation of important species (*Withania somnifera*, neem and tulsi- Herbal foods-future of pharmacognosy)

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Suggested Readings:

- Glossary of Indian medicinal plants, R.N.Chopra, S.L.Nayar and I.C.Chopra, 1956. C.S.I.R, New Delhi.
- The indigenous drugs of India, Kanny, Lall, Dey and Raj Bahadur, 1984. International Book _Distributors.
- Herbal plants and Drugs Agnes Arber, 1999. Mangal Deep Publications.
- Ayurvedic drugs and their plant source. V.V. Sivarajan and Balachandran Indra 1994. Oxford IBH _publishing Co.
- Ayurveda and Aromatherapy. Miller, Light and Miller, Bryan, 1998. Banarsidass, Delhi.
- Principles of Ayurveda, Anne Green, 2000. Thomsons, London.
- Pharmacognosy, Dr.C.K.Kokate et al. 1999. Nirali Prakashan.

Or

SEC-2: Mushroom Culture Technology **Credits 02**

SEC2T: Mushroom Culture Technology

Unit-1: Introduction, history. Nutritional and medicinal value of edible mushrooms;Poisonous mushrooms. Types of edible mushrooms available in India - *Volvariella volvacea, Pleurotus citrinopileatus, Agaricus bisporus.*

Unit-2: Cultivation Technology : Infrastructure: substrates (locally available) Polythene bag, vessels, Inoculation hook, inoculation loop, low cost stove, sieves, culture rack, mushroom unit (Thatched house) water sprayer, tray, small polythene bag. Pure culture: Medium, sterilization, preparation of spawn, multiplication. Mushroom bed preparation - paddy straw, sugarcane trash, maize straw, banana leaves. Factors affecting the mushroom bed preparation - Low cost technology, Composting technology in mushroom production.

Unit-3: Storage and nutrition : Short-term storage (Refrigeration - upto 24 hours) Long term Storage (canning, pickels, papads), drying, storage in saltsolutions. Nutrition - Proteins - amino acids, mineral elements nutrition - Carbohydrates, Crude fibre content - Vitamins.

Unit-4: Food Preparation_: Types of foods prepared from mushroom. Research Centres - National level and Regional level._Cost benefit ratio - Marketing in India and abroad, Export Value.

Suggested Readings:

- Marimuthu, T. Krishnamoorthy, A.S. Sivaprakasam, K. and Jayarajan. R (1991) Oyster Mushrooms, Department of Plant Pathology, Tamil Nadu Agricultural University, Coimbatore.
- Swaminathan, M. (1990) Food and Nutrition. Bappco, The Bangalore Printing and Publishing Co. Ltd., No. 88, Mysore Road, Bangalore - 560018.
- Tewari, Pankaj Kapoor, S.C., (1988). Mushroom cultivation, Mittal Publications, Delhi.
- Nita Bahl (1984-1988) Hand book of Mushrooms, II Edition, Vol. I & Vol. II.

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University

SEC-3: Floriculture **Credits 02**

SEC3T Floriculture

Unit-1: Introduction: History of gardening; Importance and scope of floriculture andl andscape gardening.

Unit-2: Nursery Management and Routine Garden Operations: Sexual and vegetative methods of propagation; Soil sterilization; Seed sowing; Pricking; Planting and transplanting; Shading; Stopping or pinching; Defoliation; Wintering; Mulching; Topiary; Role of plant growth regulators.

Unit-3: Ornamental Plants: Flowering annuals; Herbaceous perennials; Divine vines; Shade and ornamental trees; Ornamental bulbous and foliage plants; Cacti and succulents; Palms and Cycads; Ferns and Selaginellas; Cultivation of plants in pots; Indoor gardening; Bonsai.

Unit-4: Principles of Garden Designs: English, Italian, French, Persian, Mughal and Japanese gardens; Features of a garden (Garden wall, Fencing, Steps, Hedge, Edging, Lawn, Flower beds, Shrubbery, Borders, Water garden. Some Famous gardens of India.
Unit-5: Landscaping Places of Public Importance: Landscaping highways and Educational institutions.

Unit-6: Commercial Floriculture: Factors affecting flower production; Production and packaging of cut flowers; Flower arrangements; Methods to prolong vase life; Cultivation of Important cut flowers (Carnation, Aster, Chrysanthemum, Dahlia, Gerbera, Gladiolous, Marigold,Rose, Lilium, Orchids).

Unit-7: **Diseases and Pests of Ornamental Plants**.

Suggested Readings:

- Randhawa, G.S. and Mukhopadhyay, A. 1986. Floriculture in India. Allied Publishers.

Or

SEC-3: Ethnobotany **Credits 02**

SEC3T: Ethnobotany
Unit-1: Ethnobotany
Introduction, concept, scope and objectives; Ethnobotany as an interdisciplinary science. The relevance of ethnobotany in the present context; Major and minor ethnic groups or Tribals of India, and their life styles. Plants used by the tribals: a) Food plants b) intoxicants and beverages c) Resins and oils and miscellaneous uses.

Unit-2: Methodology of Ethnobotanical studies
a) Field work b) Herbarium c) Ancient Literature d) Archaeological findings e) temples and sacred places.

Unit-3: Role of ethnobotany in modern Medicine

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Medico-ethnobotanical sources in India;Significance of the following plants in ethno botanical practices (along with their habitat and morphology) a) *Azadiractha indica* b) *Ocimum sanctum* c) *Vitex negundo*. d) *Gloriosa superba* e) *Tribulus terrestris* f) *Pongamia pinnata* g) *Cassia auriculata* h) *Indigofera tinctoria*. Role of ethnobotany in modern medicine with special example *Rauvolfia sepentina, Trichopus zeylanicus, Artemisia,Withania*.
Role of ethnic groups in conservation of plant genetic resources. Endangered taxa and forest management (participatory forest management).

Unit-4: Ethnobotany and legal aspects
Ethnobotany as a tool to protect interests of ethnic groups. Sharing of wealth concept with few examples from India. Biopiracy, Intellectual Property Rights and Traditional Knowledge.

Suggested Readings:

- S.K. Jain, Manual of Ethnobotany, Scientific Publishers, Jodhpur, 1995.
- S.K. Jain (ed.) Glimpses of Indian. Ethnobotny, Oxford and I B H, New Delhi – 1981
- S.K. Jain (ed.) 1989. Methods and approaches in ethnobotany. Society of ethnobotanists, Lucknow, India.
- S.K. Jain, 1990. Contributions of Indian ethnobotny. Scientific publishers, Jodhpur.
- Colton C.M. 1997. Ethnobotany – Principles and applications. John Wiley and sons – Chichester
- Rama Ro, N and A.N. Henry (1996). The Ethnobotany of Eastern Ghats in Andhra Pradesh, India. Botanical Survey of India. Howrah._8) Rajiv K. Sinha – Ethnobotany The Renaissance of Traditional Herbal Medicine – INA –SHREE Publishers, Jaipur-1996_9)

SEC-4: Medicinal Botany **Credits 02**

SEC4T: Medicinal Botany

Unit-1: History, Scope and Importance of Medicinal Plants. Indigenous Medicinal Sciences; Definition and Scope-Ayurveda: History, origin, panchamahabhutas, saptadhatu and tridoshaconcepts, Rasayana, plants used in ayurvedic treatments, Siddha: Origin of Siddha medicinal systems, Basis of Siddha system, plants used in Siddha medicine. Unani: History, concept: Umoor-e- tabiya, tumors treatments/ therapy, polyherbal formulations.

Unit-2: Conservation of endangered and endemic medicinal plants. Definition: endemic and endangered medicinal plants, Red list criteria; In situ conservation: Biosphere reserves, sacred groves, National Parks; Ex situ conservation: Botanic Gardens, Ethnomedicinal plant Gardens. Propagation of Medicinal Plants: Objectives of the nursery, its classification, important components of a nursery, sowing, pricking, use of green house for nursery production, propagation through cuttings, layering, grafting and budding.
Unit- 3: Ethnobotany and Folk medicines. Definition; Ethnobotany in India: Methods to study ethnobotany; Applications of Ethnobotany: National interacts, Palaeo-ethnobotany. folk medicines of ethnobotany, ethnomedicine, ethnoecology, ethnic communities of

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

India. Application of natural products to certain diseases- Jaundice, cardiac, infertility, diabetics, Blood pressure and skin diseases.

Suggested Readings

- Trivedi P C, 2006. Medicinal Plants: Ethnobotanical Approach, Agrobios, India.
- Purohit and Vyas, 2008. Medicinal Plant Cultivation: A Scientific Approach, 2nd edn. Agrobios, India.

Or

SEC-4: Plant Diversity and Human Welfare **Credits 02**

SEC4T: Plant Diversity and Human Welfare

Unit-1: Plant diversity and its scope - Genetic diversity, Species diversity, Plant diversity at the ecosystem level, Agro biodiversity and cultivated plant taxa, wild taxa. Values and uses of Biodiversity: Ethical and aesthetic values, Precautionary principle, Methodologies for valuation, Uses of plants, Uses of microbes.

Unit-2: Loss of Biodiversity: Loss of genetic diversity, Loss of species diversity, Loss of ecosystem diversity, Loss of agro-biodiversity, Projected scenario for biodiversity loss,

Management of Plant Biodiversity: Organizations associated with biodiversity management-Methodology for execution-IUCN, UNEP, UNESCO, WWF, NBPGR; Biodiversity legislation and conservations, Biodiversity information management and communication.

Unit-3: Conservation of Biodiversity: Conservation of genetic diversity, species diversity and ecosystem diversity, *In situ* and *ex situ* conservation, Social approaches to conservation, Biodiversity awareness programmes, Sustainable development.

Unit-4: Role of plants in relation to Human Welfare a) Importance of forestry their utilization and commercial aspects b) Avenue trees, c) Ornamental plants of India. d) Alcoholic beverages through ages. Fruits and nuts: Important fruit crops their commercial importance. Wood and its uses.

Suggested Readings:

- Krishnamurthy, K.V. (2004). An Advanced Text Book of Biodiversity – Principles and Practices. Oxford and IBH Publications Co. Pvt. Ltd. New Delhi

Or

SEC-4: Intellectual Property Rights **Credits 02**

SEC4T: Intellectual Property Rights

Unit-1: Introduction to Intellectual Property Right (IPR)
Concept and kinds. Economic importance. IPR in India and world: Genesis and scope, some important examples.IPR and WTO (TRIPS, WIPO).

Downloaded from Vidyasagar University by 152.58.139.123 on 17 April 2023 : 20:55:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Botany_General.pdf

Unit-2 : Patents
Objectives, Rights, Patent Act 1970 and its amendments. Procedure of obtaining patents, Working of patents. Infringement.

Unit-3: Copyrights
Introduction, Works protected under copyright law, Rights, Transfer of Copyright, Infringement.

Unit-4: Trademarks
Objectives, Types, Rights, Protection of goodwill, Infringement, Passing off, Defences, Domain name.

Unit-5: Geographical Indications
Objectives, Justification, International Position, Multilateral Treaties, National Level, Indian Position.

Unit-6: Protection of Traditional Knowledge
Objective, Concept of Traditional Knowledge, Holders, Issues concerning, Bio-Prospecting and Bio-Piracy, Alternative ways, Protectability, needfor a Sui-Generis regime, Traditional Knowledge on the International Arena, at WTO, at National level, Traditional Knowledge Digital Library.

Unit-7: Industrial Designs
Objectives, Rights, Assignments, Infringements, Defences of Design Infringement

Unit-8: Protection of Plant Varieties
Plant Varieties Protection-Objectives, Justification, International Position, Plant varieties protection in India. Rights of farmers, Breeders and Researchers.National gene bank, Benefit sharing.Protection of Plant Varieties and Farmers' Rights Act, 2001.

Unit-9:Information Technology Related Intellectual Property Rights
Computer Software and Intellectual Property, Database and Data Protection, Protection of Semi-conductor chips, Domain Name Protection

Unit-10: Biotechnology and Intellectual Property Rights.
Patenting Biotech Inventions: Objective, Applications, Concept of Novelty, Concept of inventive step, Microorganisms, Moral Issues in Patenting Biotechnological inventions.

Suggested Readings:

- N.K. Acharya: Textbook on intellectual property rights, Asia Law House (2001).
- Manjula Guru & M.B. Rao, Understanding Trips: Managing Knowledge in Developing Countries, Sage Publications (2003).
- P. Ganguli, Intellectual Property Rights: Unleashing the Knowledge Economy, TataMcGraw-Hill (2001).
- Arthur Raphael Miller, Micheal H.Davis; Intellectual Property: Patents, Trademarks and Copyright in a Nutshell, West Group Publishers (2000).
- Jayashree Watal, Intellectual property rights in the WTO and developing countries, Oxford University Press, Oxford.

SYLLABUS

Semester- I (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER - GEO 101: EARTH'S SURFACE PROCESSES

Full Marks: 50 Credit: 4

GEO 101.1: GEOTECTONICS

Course Outcome: The focus of this course is to give an in-depth concept on the fundamental physical laws towards understanding the initial phases of the early universe with special reference to the Earth and the Moon. It also focuses on the basic understanding of the genesis of the Earth's magnetic field and palaeomagnetism that will enhance the understanding about the Earth's geological history and theories about the continental drift and sea floor spreading. The course is also designed to have some advanced level of understanding of the absolute dating techniques to find the ages of geological formation. It also includes the processes and mechanisms of mountain building. All these concepts and techniques will surely enhance the ability of the students for critical analysis and thereby synthesis of the Earth's system process. The completion of this course will give impetus to the research insights for the students who would like to pursue their future carrier in geosciences.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Origin and evolution of solar system with special reference to the Earth/Moon.

2. Relative and absolute dating: principles and techniques.

3. Origin of earth's magnetic field, paleomagnetism, geomagnetic polarity reversal and paleomagnetic timescale, paleomagnetic polar wandering curves and reconstruction of plate motions.

4. Mechanism of plate dynamics. Application of plate tectonic theory in explaining orogenesis, volcanism, earthquake.

5. Neo-tectonics and its worldwide evidences.

GEO 101.2: GEOMORPHOLOGY

Course Outcome: This course aims to inform the learners about the principles and physical settings on which geomorphic processes work to develop characteristic landforms. Role of humans in shaping and reshaping the landscapes are given proper importance. Scope of application of geomorphic knowledge is explored. Students will learn about the mechanism and working principle of processes that lead to shape present earth-surface. Field demonstration on process-form relationship help in concretizing ideas. This understanding may help in formulating hydrological, geologic and economic planning. Learners may take part in hazard management too.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Key Concepts in geomorphology: historical and functional approaches, geomorphic threshold, ideas of feedback, equilibrium, and boundary conditions.

2. Weathering: Stresses, processes and landforms. Mass wasting and slope forms and processes.

3. Fluvial processes and forms: hydraulics and stream power, threshold energy for entrainment and transport, channel form and patterns, flood plains, alluvial fan, terraces and delta.

4. Anthropo-geomorphology: Geomorphic impacts of land use conversion, mining, River engineering, alteration of coastal process-form, destabilizing slope.

5. Applied geomorphology in planning, hydrology and economic geology. Geomorphology in hazard Management (flood, landslide and subsidence) and EIA.

PAPER - GEO 102: HYDROSPHERIC SCIENCES

Full Marks: 50 Credits: 4

GEO 102.1: OCEAN SCIENCE

Course Outcome: The students will be able to understand the marine environment and oceanographic processes that leads to earth system processes. They can extend their ideas in understanding environmental and climatic processes too. An aptitude on the distribution of marine resources as well as their utilization and possible impact are also developed among the students.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

1. The Origin of Ocean Basins: Sea Floor Spreading; The opening and closing of ocean basins; Bathymetry of the Continental Shelf

2. Physical and Chemical Properties of Sea waters: Effects of Pressure, Temperature, and Dissolved salts on sea water density; Salinity; TS Diagram

3. Ocean Sediments: Types of shelf Sediments; Sediment Transport, Deposition and Accumulation

4. Ocean-Atmosphere Interactions: Land-ocean-atmosphere interactions; Ocean Climate Zones

5. Ocean Ecosystems: Coral Reefs; Rocky intertidal communities; Biology of coastal upwelling zones; Algal Blooms; Waste Disposal; National and International Law applied to the Oceans

GEO 102.2: HYDROLOGY

Course Outcome: This course seeks to make the learners informed about the principles of hydrological systems operating at watershed level which leads to water availability and water budget. Learners will be appraised on how different hydrological parameters interact as an interacting whole. Magnitude frequency of hydrological extreme events and their trends under the context of global climate change are included. Students will learn about the working principle of earth system processes that lead to water availability and necessity for water management in the context of global climatic change. This understanding may help in water budgeting and formulating plan for water use and water management. Learners may take leading role in awareness generation among community for rain water harvesting and judicial water use.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Hydrological systems, estimating water potential, and water budgeting at the watershed level. Hydrologic frequency analysis (Gumbel's equation and log probability law).

2. Precipitation estimates: point rainfall analysis, area-depth curve, Theissen network, and isohyetal method for estimating rainfall volumes. Time series analysis of precipitation; Mann-Kendall trend test, Sen's slope, change point analysis.

3. Infiltration and evapotranspiration: soil-vegetation complex and infiltration estimates. Methods of estimating evapotranspiration. Water use efficiency for the crops and measure of aridity.

4. Runoff estimates using curve number, and stream discharge estimates by the area-velocity method. Groundwater: storage structure, flow, recharge, and discharge.

5. Hydrographs and Rating curve: Time dimensions of hydrographs: the concept of unit hydrograph and rating curves and their significance. flood& drought as hydrological hazards.

PAPER – GEO 103: CLIMATE SCIENCE AND REGIONAL GEOMORPHOLOGY

Full Marks: 50 Credits: 4

GEO 103.1: CLIMATE SCIENCE

Course Outcome: This course is designed to build a fundamental understanding of climate and the science of climate change with some focus on atmospheric thermodynamic processes. It also addresses the influence of sea surface temperature on the Indian monsoon system.

Learning outcome: Upon completion, students can

a). Synthesise the meteorological phenomena at different space-time scale
b). analyze the rising levels of CO2 and global temperature rise and its effect on precipitation.
c). analyze the Indian summer monsoon rainfall variation due to IOD and ENSO event.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. The nature and scope of meteorology and climatology in Geographic study. Meteorological and climatological systems operate in different space-time scales: thunderstorms, tropical cyclones, jet streams, and planetary wind systems.

2. Understanding atmospheric pressure; gas laws, geopotential, hydrostatic equilibrium, partial pressure, relative humidity, and specific humidity. Pressure-volume relationship; adiabatic process. Atmospheric instability, the process of cloud development; the role of aerosols in cloud and precipitation process.

3. Basics of climate modeling, a one-dimensional climate model, role of greenhouse gas and aerosols in climate. The rising pattern of global CO2 and surface temperature. Climatology of temperature and precipitation, and their anomalies at a global and regional scale. Concepts of short-range and long-range weather forecasting.

4. The mechanism of Indian summer monsoon: implication of elevated heat pumps (EHP) theory in monsoon precipitation, MONEX; Sea surface temperature and its climate significance: Walker circulation and Indian ocean dipole, and their effect on Indian summer monsoon.

5. Climate change throughout geological periods – evidence and possible causes, consequences of global climate change as estimated by IPCC.

GEO 103.2: REGIONAL GEOMORPHOLOGY OF INDIA

Course Outcome: Students will be able to learn about the regional boundaries of geomorphological regions in India and also understand the physiographic diversity of India and West Bengal, their unique characteristics and regional importance.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Geomorphology of Darjeeling Himalaya and Terai Region.

2. Tectonics, drainage and geomorphology of Western Ghats with special reference to Deccan Trap.

3. Geomorphology and soil-landform assemblages of Chhotanagpur Plateau and its adjacent areas of West Bengal.

4. Form, process and evolution of Ganga and Subarnarekha delta.

5. Tectonics and Geomorphology of the Andaman and Nicobar Islands

PAPER – GEO 104: ENVIRONMENTAL GEOGRAPHY AND ECOLOGICAL PLANNING

Full Marks: 50 Credit: 4

GEO 104.1: FOUNDATIONS IN BIOGEOGRAPHY AND ENVIRONMENT

Course Outcome: The living things interact with each other in various ways and with the non-living components that make up the environment in which we live. These non-living components include rocks, soils and water, as well as the atmosphere. All these interactions produce a complicated set of interrelationships and these interrelationships can take many forms. Thus, this paper on basics of environment and ecology prepares students for careers as leaders in understanding and addressing complex environmental issues from a problem-oriented, interdisciplinary perspective. Ecology is a scientific way of thinking about the world. This means that it involves a certain way of investigating, studying and writing about the systems. Student can learn the core concepts and methods from ecological and environmental perspectives and their application in environmental problem solving.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Content and Scope in Biogeography; Environmental factors: Atmosphere, Hydrosphere, Lithosphere and Biosphere and their relationships. Holistic Concept, Environment Complex, tolerances, amplitude, limiting and inhibiting effects

2. Biosphere as an ecosystem; Eco-physiological adaptations in plants and animals for stressed environments, anthropogenic impact on life support systems including flora, fauna, soil, terrestrial and aquatic ecosystems

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

3. Population dynamics; factors leading to rarity, vulnerability and extinction of species, migration of species, patterns of survival, K and R selected species

4. Role of water, nutrient and energy in determining ecosystem process; concept of inter specific and intraspecific interaction, competition, niche and Keystone species, Flagship species

5. Biogeographic zones of India, Status of Biodiversity, Protected area Network, National Parks and Sanctuaries

GEO 104.2: LANDSCAPE ECOLOGY AND PLANNING

Course Outcome: Landscape ecology is the study of the pattern and interaction between ecosystems within a region of interest, and the way the interactions affect ecological processes, especially the unique effects of spatial heterogeneity on these interactions. This paper provides students with an introduction to the discipline of landscape ecology. Thus, this paper focuses on the characteristic scale of spatial pattern; defining the elements of pattern; connectedness, fractal geometry, how these aspects of pattern are interconnected in landscapes, and how they vary. It may help students detecting, analyzing, or simulating landscape change; and modeling populations or communities in landscape mosaics and educate students for professional life.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Landscape: Definition, concept, nature and role, ecological description of landscape.

2. Structure of Landscape: Patches (shape, size, nature and boundary), corridors (type, network, matrix) and mosaics, habitat arrangement measuring metrices (Shannon Diversity Index and Simpson Diversity Index).

3. Landscape Dynamics: Energy flow, species movement, nutrient movement.

4. Anthropogenic Modification: Impacts on Agricultural ecosystem and Forest ecosystem: Landscape assessment methods.

5. Landscape management and planning: Role of keystone species, conservation of fragmented habitats, sustainable landscape, and role of Traditional Ecological Knowledge (TEK) in conserving landscape. Role of GIS in landscape planning

PRACTICAL COURSES (100 Marks)

SEMESTER-I

PAPER – GEO 195: HYDROLOGICAL TECHNIQUES AND GEOLOGICAL & TOPOGRAPHICAL MAPS

Full Marks: 50 Credits: 4

GEO 195.1: HYDROLOGICAL TECHNIQUES

Course Outcome: Students will develop skills in application of theoretical knowledge of hydrology. They will learn on field as well as laboratory techniques for estimating different hydrological attributes as for example rainfall, run off, infiltration etc. in order to construct water budget. Students are enabled to analyse magnitude frequency of different hydrological hazards like fold and droughts and their social and economic applications. This knowledge will help them in formulating various hydrological projects and their successful management.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5 marks** will be allotted for Laboratory Note Book and Viva-voce.*

1. Point rainfall analysis, area-depth curves, Thiessen network and Isohyetal methods to determine rainfall volumes. Time series analysis of precipitation; Mann-kendall test, sen's slope and change point analysis.

2. Estimating infiltration using infiltrometre and other field techniques. Drawing infiltration curve.

3. Evaporation estimation: Use of evaporation pan and empirical equations using climatic data. Estimation of aridity index using climate data.

4. Runoff and discharge estimation: Curve Number methods for estimating runoff: area-velocity method for discharge estimate.

5. Construction of hydrograph, unit-hydrograph and rating curves.

GEO 195.2: GEOLOGICAL AND TOPOGRAPHICAL MAPS

Course Outcome: The course aims to demonstrate how the rock beds under different structures are oriented in section as well as on plans of exposure. Learners will get practical knowledge on how landforms and drainage systems are developed on various geological structures. Topographical maps will offer fundamental understanding on spatial arrangement and spatial organization of relief (landforms), drainage, forest cover, settlements, population areas, transportation routes and social amenities. Students will achieve concrete idea of landform and drainage evolution in connection to different geological structures and also the workings of different earth-surface processes under fixed boundary conditions (lithology and structure). Knowledge on the topographical map help them to take part in courtry and urban planning

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

Full Marks- 25

*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Identification of geological structures, series and unconformity

2.Drawing section of the given Geological Map (Unconformity, fold, fault, intrusion)

3. Identification of Rocks and Minerals with Megascopic and Microscopic study and Geomorphological Mapping techniques from the SOI Toposheet

4. Numbering schemes of topographical maps. Interpretation of physical and cultural landscapes: a) Relief, b) Drainage, c) Vegetation, d) Settlement and e) Transport

5. Basin Morphometry: Amplitude of relief, Average Slope, Ruggedness Index, Hypsometric analysis, Stream Order, Drainage Density, Braiding index, Sinuosity index, Radius of curvature.

PAPER – GEO 196: CLIMATE CHANGE TECHNIQUES AND ENVIRONMENTAL MAPPING

Full Marks: 50 Credit: 4

GEO 196.1: CLIMATE CHANGE ASSESSMENT TECHNIQUES

Course Outcome: This course will help students to visualize and answer the question, of whether climate change is real or not. This course will make capable students connect regional climate change with global climatic conditions. This course will support students to understand climate variabilities through data analysis, graphing, and plotting using Excel.

Full Marks- 25

*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Global temperature: correlate CO2 data with global temperature to find out the relationship: Data sources, download, process and presentation.

2. Regional temperature: correlate CO2 data with global temperature to find out the relationship across India: Data sources, access, process and presentation.

3. Climatological anomalies: Temperature and precipitation anomalies in annual, seasonal and monthly scale.

4. Interpretation: Understanding the climate change based on the interpretation of derived data

5. Graphing and plotting: learn basic shortcuts, graphing and plotting in Excel with climate data, publication quality presentation.

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

GEO 196.2: ECOLOGICAL CENSUS TECHNIQUES

Course Outcome: Students will develop cartographic skills for constructing various thematic maps and foster their abilities in showing the spatial distribution of various environmental elements and their proper interpretation. This ability will help them to formulate environmental plans and to manage and conserve vegetation, soil, water etc.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5 marks** will be allotted for Laboratory Note Book and Viva-voce.*

1. Estimating Plant species types, number, frequency, species richness, dominance of species.

2. Ecological Sampling: Quadrate Method; nested quadrates, Distance sampling; line transacts, Gradesacts, DBH, Branching height, Canopy and Ground Coverage.

3. Analyzing micro level forest quality: DAFOR Index, Biodiversity Indices, Habitat Suitability Index, Habitat Capability and effective Index.

4. Estimation of Soil Texture, Colour, soil moisture, Soil PH, NPK, Organic Carbon, Nitrate and Ammonical Nitrogen.

5. Ecological Micro-zonation, Mapping of fragmented forest area.

Semester- II (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER- GEO 201: GEOGRAPHICAL THOUGHT AND POPULATION GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 201.1: GEOGRAPHICAL THOUGHT

Course Outcome: This course aims to make the students understand the changing nature of geography as a distinct discourse and its development as a science of synthesis. Students will learn about the philosophical background that guides the approaches and ways of thinking to design teaching-learning and research under different discourses of Geography. It aims to achieve a clear insight into theoretical foundation of the subject that is articulated among different courses and guides to design objectives and methodological framework of geographical enquiry. This understanding helps the learners to locate themselves in the wide and dynamic philosophical domain of the discipline and help them to concentrate towards developing geography as a science of holistic synthesis.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Geography as a science of synthesis. Changing nature of Geography: paradigm shift

2. Development in 20th Century: Pragmatism, Positivism and Quantitative revolution in geography

3. Development of critical social theories: Humanistic geography, Behaviouralism, Radicalism, Welfare geography, Feminist geography

4. Structuralism and Post-structuralism, Modernism and Postmodernism.

5. Spatial and Temporal dimensions: absolute, relative, material and social space, concept of 3rd space in geography, temporal geography, time-space prism. Applied Geography. Scope and opportunities under modern technology

GEO 201.2: POPULATION GEOGRAPHY

Course Outcome: Through this module students will learn the various aspects of population growth process, its impact on economy, society and politics. Various policy regarding the control and development of human resources, their necessity, and outcome will be understood. This understanding will help them to take part in various govt. schemes and programmes relating to population issues.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Population growth: logistic and exponential growth, carrying capacity; Population composition and structure: Types, spatial and temporal variation and determinants of age, sex, literacy and rural-urban ratio.

2. Theories and approaches of population growth and regulation: Malthus, Marx and Neo-Malthusianism. Theories of migration (Ravenstein, Lee and Zelinsky)

3. Human development and gender issues: MDGs, SDGs, HDI, GDI, GEM-concept, measures and criticism.

4. Population projection: Concept, types and methods.

5. Population equilibrium, Contemporary Population related policies and issues; population ageing, child and maternal health

PAPER- GEO 202: SOCIAL, CULTURAL & RURAL GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 202.1: SOCIAL & CULTURAL GEOGRAPHY

Course Outcome: The paper is based on the nature, scope and content of social and cultural Geography. The paper will examine the role of social divisions such as class, 'race'/ethnicity, gender and sexuality in shaping the social geographies of regions. Emphasis is given on cross- disciplinary, critical engagement with current events. On completion of the course, students are able to understand the nature, scope, and concept, relationship between culture and social environment, and right of information act, the cultural complex and traits of culture and its concepts, evolution to civilization and cultural system according to religion, language and geography, and global cultural changes.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Nature, scope and content of social Geography; Ethnicity, tribe, dialect, language, caste and religion.

2. Social structure and processes, social exclusion, geographies of social well-being with special reference to India.

3. Cultural Geography: Definition, scope and nature. Race, religion, language as cultural attributes with special reference to India, North-South, social -cultural divide.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

4. World cultural Realms, Morphology of cultural landscape (Carl O Sauer) and cultural diversity. Cities as melting pot of culture. Traditional folk culture- crisis and transformation.

5. Cultural processes: Diffusion, acculturation, assimilation and cultural pluralism.

GEO 202.2: RURAL GEOGRAPHY

Course Outcome: The focus of the course is to develop an idea about the approach to understanding the rural development. It includes the status report of the rural development in India on various accounts, i.e. agriculture, health, education, rural employment, infrastructure and rural electrification. The role of micro finance is also included to give students an understanding of the rural economic development. The students get an inclusive understanding of the rural development and its dynamics upon completion of this course.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Rural Geography, Rural development, Indicators of Development & Rural Development and their measurements.

2. Rural Economics: Agriculture Development and Land Reforms in India.

3. Rural Micro-finance, self-help group and women empowerment.

4. Rural Industries and entrepreneurship: Definition and meaning of rural industries. Relevance of rural industries in solving socio-economic problems with special reference to Food Processing and Tourism.

5. Rural Development Programmes: poverty alleviation schemes- National Rural Employment Guarantee Act, JawaharRozgarYojana, Sampoorna Grameen RozgarYojana, Provisions of Urban Amenities in Rural Area (PURA); Infrastructural development programmes- Indira Avas Yojana; Transport Development: Pradhan Mantri Gram SadakYojana

PAPER- GEO 203: GEOPOLITICS AND ENVIRONMENTAL ETHICS

Full Marks: 50 Credit: 4

GEO 203.1: GLOBAL ECONOMIC CRISIS AND GEOPOLITICS

Course Outcome: Students will develop their understanding on politics of space and spatial patterns of political and economic power distribution. This course will enable the of Government in India based on the principle of regional disparities in India. They will also know about the nature of conflict at national and global level centered on water and power resources. They will develop their interest in analyzing

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

factors and local as well as global implications of economic and political agglomerations in the form of economic and political blocs.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Transformed Geography: Concept of Liberalization, Privatization and Globalization (LPG),beginning of the globalization, globalization to glocalilisation.

2. Globalization and Economic Geography: Impact of globalization on agriculture, industry and trade.

3. Globalization and cultural changes: Globalization and cultural transformations.

4. World economic order: Economic booms and crisis, future of globalization.

5. Globalisation and Geopolitics: Understanding relevance of Heartland and Rimland theory and the present-day geopolitics in the globalized world.

GEO 203.2: ENVIRONMENTAL ETHICS

Course Outcome: Environmental Ethics examines the ways we supposed to value the environment and the non-human inhabitants of the earth. It examines the moral relationship between human beings and non-human beings (including the environment itself). This paper will consider the implications of this examination for an ethical life. It demonstrates the ethical conduct in all scientific activities. The paper includes both philosophical bases(moral obligations, the nature of value) and policy measures to be adopted for the betterment of the environment and earth. The students will be able to explain and apply principles of environmental ethics and apply philosophical concepts used in environmental ethical decision-making. They may apply theories and concepts to particular cases, and ability to provide critical assessment of arguments.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Environmental ethics and education; Concept, development of environmental philosophy, Ecocentrism and Anthropocentrism, the land ethic (Aldo Leopold), Gaia concept, Ecofeminism. Formal and non-formal environmental education, Tbilisi conference, environmental awareness.

2. Approaches to conservation of environment: Landscape ecology and ethno-ecology, environmental stewardship.

3. Environmental Impact Assessment (EIA), Environmental Management Planning (EMP), Environmental Performance Assessment (EPA), Environmental Audit

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

4. Global Environmental Issues and Conferences, Achievements and Failures: Thrust areas, Citizen movement, Inter- Governmental Panel for Climate Change (IPCC).

5. Environmental Laws in India: Wild life Act, Forest Acts, Environmental Protection Act, National Environmental Tribunal Act.

ELECTIVE PAPERS (CBCS)

PAPER- C-GEO 204: RESOURCE MANAGEMENT AND EARTH SYSTEM SCIENCE

Full Marks: 50 Credit: 4

C-GEO 204.1: RESOURCE AND ITS MANAGEMENT

Course Outcome: The course is designed for basic understanding for the students from different discipline other than Geography. It includes the fundamental concepts of natural and human resources and their management and planning strategies. On completion of this course, the students get a founding knowledge of the natural resources in environment.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Geography as a science of synthesis; social relevance of geography
2. Resource assessments, management and mapping
3. Human resource development in backward region.
4. Indicators of livelihood security.
5. Micro level resource planning in watershed scale.

C-GEO 204.2: EARTH SYSTEM SCIENCE

Course Outcome: The course is designed with an interdisciplinary approach for the students from outside Geography. It includes the fundamental ideas of Geotectonics, atmospheric composition and processes, the surface geomorphology and sea bathymetry. On completion of this course, these fundamental concepts will help the students from other branches to have a basic idea of geosciences.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Earth surface processes and Geo-tectonics.
2. Composition of atmosphere and atmospheric processes.
3. Bottom relief of major oceans; temperature and salinity distribution.
4. Principles of mapping and applications.
5. Regional geomorphology of West Bengal.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

PRACTICAL COURSES (100 Marks)

SEMESTER-II

PAPER – GEO 295: THEMATIC MAPPING AND STATISTICS

Full Marks: 50 Credit: 4

GEO 295.1: SOCIAL THEMATIC MAPPING

Course Outcome: Students will develop cartographic skills for constructing various thematic maps and foster their abilities in showing the spatial distribution of various physical as well as social elements and their proper interpretation. Skill of understanding spatial integration among physical and social elements will be developed to foster the abilities of holistic abilities.

Full Marks- 25
Pattern of Setting Questions: Three compulsory questions bearing marks 7, 7 and 6 respectively, will be set covering the whole unit. 5 marks will be allotted for Laboratory Note Book and Viva-voce.

1. Mapping of farming practices: Crop-combination, diversification and cropping intensity.

2. Mapping of social vulnerability and social disparities, ethnic mapping.

3. Estimation and Mapping of Social Well-being, HDI, GDI, GEM.

4. Estimation of Human Poverty Index – (HPI-I and II) for developed and developing countries

GEO 295.2: BASIC STATISTICS

Course Outcome: The course, split into two units, corresponds to the basic and advance statistics, is a starting point of escalating the statistical analytical skills. It includes the founding concepts of probability distribution including the advanced linear modelling with matrix solution to the multivariate linear and non-linear model. These concepts are essential for augmenting the analytical skills of any beginner in Geography that includes both physical and social aspects of academic discipline. Upon completion of this course, the students get the benefit of having a strong mathematical and statistical analytical skills.

Full Marks- 25
Pattern of Setting Questions: Three compulsory questions bearing marks 7, 7 and 6 respectively, will be set covering the whole unit. 5 marks will be allotted for Laboratory Note Book and Viva-voce.

1. Measurement in Geography: Nominal, ordinal, interval and ratio measurement.

2. Concept of covariance, correlation and regression: Bi-variate analysis - linear, exponential, Product moment correlation, Spearman's Rank correlation, correlation matrix, partial correlation, residuals - mapping of residuals.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

3. Probability distribution: addition and Law of multiplication, concept of probability distributions (binomial distributions, normal probability distribution), properties of normal curve.

4. Hypothesis testing: Formulation, Rejection rule, one and two tailed tests, significance level, degrees of freedom type I and type II errors, Standard Error. Different types of significance test for various purposes. Chi- square test, student's t- test.

5. Sampling techniques for geographical analysis.

PAPER-GEO-296 SEDIMENTOLOGY AND REMOTE SENSING & AERIAL PHOTOGRAPHS

Full Marks: 50 Credit: 4

GEO 296.1: SEDIMENTOLOGY

Course Outcome: This course seeks to make the learners capable in dealing practical hydrological problems like calculating rain input over an area especially a basin, rate if infiltration and that of evapotranspiration in a way to prepare hydrological budget. They will learn how to construct hydrograph, unit-hydrograph and rating curves. Students will develop aptitude and abilities on different methods of sediment sampling from field. They will also be trained thoroughly on laboratory method and field method of sediment analysis. This will help them to understand various types of environment and process domain under which sediments were deposited. Thus they can develop skills for reconstructing past.

Full Marks- 25
Pattern of Setting Questions: ***Three*** *compulsory questions bearing marks* ***7, 7 and 6*** *respectively, will be set covering the whole unit.* ***5 marks*** *will be allotted for Laboratory Note Book and Viva-voce.*

1. Texture analysis of sediment samples using standard techniques: Cumulative Frequency, Standard Deviation, Sorting, Skewness and Kurtosis

2. Form and shape analysis of pebble grade sediments.

3. Megascopic and microscopic examination of sediments.

4. Identification of sedimentary and bioturbation structures.

5. Sedimentary environmental facies analysis.

GEO 296.2: REMOTE SENSING AND AERIAL PHOTOGRAPHS

Course Outcome: The course content is focused on basic understanding of satellite remote sensing and aerial photography. Basic principles of satellite motion and sensor parameters including the principles of air photo help the students to formalize with the modern space based analytical techniques. Upon completion of this course, the students will get benefit from rigorous practice and comprehensive theories.

Full Marks- 25
Pattern of Setting Questions: Three compulsory questions bearing marks 7, 7 and 6 respectively, will be set covering the whole unit. 5 marks will be allotted for Laboratory Note Book and Viva-voce.

1. Physics of Remote Sensing: Electro Magnetic Radiation (EMR), Radiation laws (wavelength frequency-energy relationship of EMR numerical problems).

2. Satellite System: Keplers's Laws, Major-Semi-major axis, eccentricity, velocity (Numerical problems).

3. Satellite Sensors: Concept of IFOV, resolution and determination of pixel size, referencing scheme of satellite system (path/row calculation).

4. Basics of Aerial Photograph: Basics geometry of aerial photograph, determination of scale and height, Distortions, Image parallax, Relief displacement.

5. Stereoscopy and Aerial Photo Interpretation: Stereoscopy, Pseudoscopy, Mirror Stereoscope, mosaic, edge information, mapping of Physical and Cultural features with the Air photo interpretation keys: shape, size, pattern, tone, texture, shadow, site and associations, Concept of DRONE image processing

Semester- III (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER - GEO-301: ENVIRONMENTAL ENGINEERING, ENERGY, WATER, AND FOOD NEXUS

Full Marks: 50 Credit:4

GEO 301.1: ENVIRONMENTAL ENGINEERING

Course Outcome: This course will introduce the students to the domain and scope of environmental engineering. They will be trained on the mechanism of waste water treatment and solid waste management. They will learn the sources and impact of air and noise pollution along with management strategies. Learners will be skilled on the arsenic and fluoride pollution and mitigation strategies. This course aims to capacitate learners to participate in making of pollution free environment and environmental restoration drive. Students will learn about the necessity and mechanism of waste water treatment and understand the procedures to manage air and noise pollution and arsenic pollution. This fundamental understanding and knowledge help them to get engaged in various non-government and government initiatives working for the better environment.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Definition and domain of Environmental Engineering, Waste water treatment: Primary, Secondary and Tertiary treatment.

2. Solid (Municipal) waste management: Plastic Pollution; Sludge treatment; Hazardous waste management.

3. Air pollution: sampling and measurement, air pollution control technologies. Indoor pollution. Noise Pollution: Measurement of noise, Biophysical impacts, Mitigation technologies.

4. Arsenic and Fluoride Pollution: Spatial distribution, Impact and Mitigation.

5. Environment Restoration: Principles, Planning and Techniques

GEO 301.2: ENERGY, WATER, AND FOOD NEXUS

Course Outcome: The course outcome will help the students to understand the nexus approach to complex and dynamic interrelationships between water, energy, and food, so that we can use and manage

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University

our limited resources sustainably. It forces us to consider the consequences of a decision in one sector not only on that sector but also on others.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concept: Understanding water-energy-food nexus (WEF) Policies

2. Water infrastructures, conflict and cooperation: Building dams and barrages for energy and irrigation: Opportunities and challenges; WEF nexus behind conflict and cooperation in transboundary river basins

3. Energy production and consumption: Renewable and non-renewable energy resources: Emerging challenges and opportunities

4. Food production: Green revolution and farm mechanisation in the light of WEF nexus

5. Food security: Ensuring food security through managing WEF nexus

PAPER - GEO 302: REGIONAL PLANNING, SETTLEMENT & TRANSPORT GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 302.1: REGIONAL APPROACH IN GEOGRAPHYAND PLANNING

Course Outcome: The learners will be able to know the process of planning in India, its role and various strategy for the development of our country. The students will understand how they can participate in the planning and development of the nation. This knowledge is very effective for the government also for smooth conduction of the development planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concept and types of planning; planning regions in India: Purpose, types and methods of delineating planning region.

2. Basic principles and methodology of regional planning

3. Regional planning strategies: Centralized, decentralized and multilevel planning for rural and urban areas, people's participation in planning- Panchayati Raj Institution.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

4. Regional disparities: Concept, Types; Demographic, social and economic disparities in India.

5. Planning of problem regions: Tribal, coastal, drought prone area, flood prone area.

GEO 302.2: SETTLEMENT & TRANSPORT GEOGRAPHY

Course Outcome: Learners will be trained on the role of transport in overcoming the friction of distance. They will know how the transport cost is fixed, and comparative cost advantage of different modes. They will learn the advantage and role of public transport in addressing transport related global issues. They will concentrate on the role of communication technology in reducing the demand for transport. Students will learn about the role of transport in entire economic and social processes. This course aims to make students understand the locational advantage of different economic and social institutes based on transport principle. They are made aware of the role of public transport in addressing the problems of congestion and air pollution. This understanding may help them in formulating plan for regional development and economic regeneration by proper transport planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concept of shelter; Dwelling places as cultural expression, Census categories of settlements; Types, building materials and architectural design of houses- dependence on climate.

2. Site, situation and spacing of settlements- dependence on terrain characteristics and water availability, Concepts and components of rural and urban morphology, Socio-economic segregation of rural settlements, Cities as melting pot of culture.

3. Concept of distance, space-time relation through transportation. Principles of transport cost fixation, comparative cost advantage

4. Planning for public transport, desired characteristics, modes and optimal pricing, services, ownership and regulation.

5. Transport Policy: Problem oriented and objective-led approach; Communication Technology- roles in reducing transport demand.

PAPER – GEO 303: SPECIAL PAPERS

Full Marks: 50 Credit: 4

303A: ADVANCED GEOMORPHOLOGY

GEO 303A.1: PROCESS GEOMORPHOLOGY-1

Course Outcome: Students will learn about the mechanism and working principle of geomorphic processes in details that lead to shape present earth-surface. This understanding may help in formulating engineering plan for management of land, water and soil, three basic resources on earth surface. They will also have a clear insight into the process and forms on the surface of Moon and Mars.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Geomorphic Thresholds: Reynold Number, Froude Number, Critical shear Stress and Shield Diagram, Slope stability thresholds.

2. Weathering Process and Soils with special reference to laterisation; Development of badland topography.

3. Slope forms and Processes: Mass Movement, Slope Morphology and Evolution.

4. Fluvial Processes: Drainage network development; Channel Morphology in alluvial and bedrock channels, Open channel flow, Sediment Transport, Fluvial response to changing conditions with special reference to channel patterns. Development of fluvial landforms.

5. Planetary geomorphic processes and landforms: Moon and Mars.

GEO 303A.2: PROCESS GEOMORPHOLOGY-2

Course Outcome: Students will learn about the mechanism and working principle of geomorphic processes in details that are operating since historical time to shape present earth-surface. This course aims to build an understanding role of humans in shaping earth surface and regulating natural processes and their outcome on natural systems. Learners may take part in sustainable resource management.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Long term landform evolution with special reference to planation development

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

2. Quaternary Environmental Change and Landform Development with special reference to glaciations and sea level change.

3. Glacial and Periglacial processes and landforms.

4. Anthropogeomorphology: Man as active geomorphic agent. Land use change and its geomorphic implications.

5. Identification of Geomorphosites with special reference to India.

303B: COASTAL MANAGEMENT

GEO 303B.1: COASTAL PROCESSES

Course Outcome: The learners will understand the systematic interactions among terrestrial atmospheric and marine processes along the coast as a systematic whole. They will learn the dynamic and functional interrelationship between forms and processes in a coastal region and their dynamic equilibrium.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Definition of coastal zone, relevance of coastal study, classification of coast - Beach stage model.

2. Wave hydrodynamics; wave modification near coast with special reference to attenuation, breaker types, energy dissipation during breaking wave.

3. Tide; diurnal and semi-diurnal, rotating and progressive tide, concept of live storage, tidal environment with special reference to estuary.

4. Coastal current; intensity of long shore component and its implications, cell circulation.

5. Macro land forms with special reference to beaches and dunes; micro and biogenic forms.

GEO 303B.2: COASTAL ENVIRONMENTS: FOCUS ON INDIAN REGIONS

Course Outcome: Students will get knowledge about long term and short-term development of landforms by several processes in some of the coastal regions in India and form process relationships in different spatial and temporal scales. They will understand the problems of coastal erosion and other hazards in the context of global climatic change.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

division), will be set for answering any two. ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Tide dominated coastal environment: (Estuaries of India, estuary morphology, estuary hydrolodynamics); wave dominated coastal environments: (The shore face, beaches, barriers and human activity) - Indian experiences.

2. Morpho dynamic behavior of coastal systems (Modification of coastal features in temporal and spatial scales with feedback mechanisms).

3. Carbonate platforms and beach rocks (Andaman and Nicobar Islands).

4. Coastal erosion problems (West Bengal, Orissa coasts), land reclamations and associated problems (Sundarban coastal tract).

5. Techniques for assessing coastal hazards areas (Hazard zonation along the coasts).

303C: URBAN GEOGRAPHY AND REGIONAL PLANNING

GEO 303C.1: FOUNDATION OF URBAN GEOGRAPHY

Course Outcome: This paper will provide knowledge on spatial analysis of functions of urban areas. Social and economic characteristics of cities and suburbs will be discussed under this paper. Urban land use and its impact on environment and ecology will be addressed. This paper will introduce students to the basics of urban geography, such as definition of cities, central place theory, National urban systems, and traditional models of urban spatial structure. More importantly, students will be exposed to contemporary urban topics such as global cities, urban sprawling, urban green space, urban ecology and footprints etc. Emphasis will be placed on the urban experience of developing countries, especially India. The students will be able to assemble knowledge of urbanism and urbanization as historic, geographic, social, and cultural processes, historical development, contemporary condition, and environmental impact of cities and urban related issues growing from exposure to the disciplines of Geography and Planning

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Development of urban geography: Definition of Towns, cities and metropolitan area. Trends of Urbanisation in the World and India.

2. Concept and definitions of urban system: Urban, urbanization, urbanism and urban ecology, National urban system, National urbanisation policy.

3. Today's cities and suburbs: suburban sprawl, smart growth, exurbs, the new cities and gated communities, gentrification, green city, Urban Livability Index.

4. Origin and growth of urban living: bases and processes, Historical perspectives on world urbanization

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

5. Urban planning, policies and regeneration: Architectural vision, European, Anglo American tradition and planning the social city, the new towns movement, toward planning for sustainable urban development.

GEO 303C.2: CONTEMPORARY URBAN ISSUES

Course Outcome: Student will understand through this module various socio-economic and environmental problems with the growing urbanization in our country as well as various parts of the world. This knowledge will help them to surmise the necessity of urban planning and they will be able to evaluate the effectiveness of various govt. programmes for urban planning

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Changing spatial and temporal scenario of metropolitan development in India.

2. The economy of urban areas: structure of urban economy-basic and non-basic activities.

3. Social environment of the city: Social stratification, social class diversity, suburban social class, poverty, strangers, crowding, crime and homelessness.

4. Urban environment problems: Heat island, drainage, sewerage, sanitation, solid waste, transport, pollution and health, the city's ecological footprint.

5. Urban renewal and Urban redevelopment in India: Role of JNNURM, Smart city, AMRUT and Housing for All by 2022.

303D: REMOTE SENSING AND GEOGRAPHIC INFORMATION SYSTEM

GEO 303D.1: PHYSICAL BASIS OF REMOTE SENSING

Course Outcome: The course is designed to give fundamental and some advanced knowledge of space based remote sensing and aerial photography. From orbital parameters of satellite to complexity of aerial camera and film in association with the flight parameters, all of these will allow students to get an in-depth understanding of remote sensing and aerial photographic system.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

1. Physics of Remote Sensing: Source of Energy, Electro Magnetic Radiation (EMR),Radiation laws (wavelength-frequency-energy relationship of EMR), influence of atmosphere on Remote Sensing operation.

2. Fundamental of Thermal Remote Sensing: Radiant temperature, Kinetic temperature, Black body and real body radiation.

3. Satellite orbits and Trajectories: Principles of satellite movements, orbits and trajectory, orbiting satellites-basic principles, orbital parameters, types of satellites.

4. Satellite Platforms and Sensors: Types of platforms for civilian applications, advantages, disadvantages, and characteristics of various satellite platforms. Physical principles and characteristics of various satellites sensor, sensor selection parameters, and resolution, Remote Sensing Data: Data acquisition and reception, Data products, storage, and dissemination.

5. Active and passive remote sensing systems, multispectral remote sensing; DN to radiance and reflectance conversion, Principles atmospheric correction for estimating surface reflectance from the satellite images. Retrieval of land surface temperature from satellite images. The implication of land surface temperature in geospatial contexts.

GEO 303D.2: PHOTOGRAMMETRY, AERIAL PHOTO AND SATELLITE SYSTEM

Course Outcome: The course is designed to give fundamental and some advanced knowledge of space based remote sensing and aerial photography. From orbital parameters of satellite to complexity of aerial camera and film in association with the flight parameters, all of these will allow students to get an in-depth understanding of remote sensing and aerial photographic system.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Basics of Aerial Photograph: Types of aerial photographs, Geometry of single Aerial Photograph, Photographic overlap, flight planning, Scale, Lens Distortions, Relief distortions and Tilt distortions. Image displacement and parallax.

2. Aerial Photographic Film: Film density and Characteristics Curve, Colour Infrared Films, Film resolution, Filters.

3. Photogrammetry: Development of Photogrammetry, Classification, processes and Limitations of photogrammetry.

4. Stereo photogrammetry: Conditions for Stereo vision, stereoscopic measurements, Sterescopic 3D viewing, Image parallax, Rectification, Orthorectification; Concept of Drone

5. Satellite Systems: Whiskbroom system, Pushbroom system, Microwave system, coarse resolution, fine resolution and very fine resolution system.

303E: LANDSCAPE ECOLOGY WITH METRICS AND MODELS

GEO 303E.1: THEORIES IN LANDSCAPE ECOLOGY

Course Outcome: Landscape ecology is the study of the pattern and interaction between ecosystems within a region of interest, and the way the interactions affect ecological processes, especially the unique effects of spatial heterogeneity on these interactions. This paper provides students with an introduction to the discipline of landscape ecology. Thus, this paper focuses on the characteristic scale of spatial pattern; defining the elements of pattern; connectedness, fractal geometry, how these aspects of pattern are interconnected in landscapes, and how they vary. It may help students detecting, analyzing, or simulating landscape change; and modeling populations or communities in landscape mosaics and educate students for professional life.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Introduction to landscape ecology: Definition of Landscape; Concept of Landscape Ecology

2. Theory in landscape ecology: Hierarchy theory and the landscape, Equilibrium versus non-equilibrium landscapes, Scale- temporal and spatial

3. Landscape pattern: context and process, gradient concept of landscape structure, Applications of landscape ecology in Farmland, forest land and wildlife

4. Loss, degradation, fragmentation and isolation of habitats - nature, causes and impacts on individual species; Changes in behavior, species movement, maintenance of Keystone and endangered species

5. Landscape conservation: a new paradigm for the conservation of biodiversity

GEO 303E.2: METRICS AND MODELS IN LANDSCAPE ECOLOGY

Course Outcome: This course is designed for students to obtain knowledge of basic concepts, methods, and applications in landscape ecology, to examine and understand the ways in which spatial patterns and spatial processes operate in an ecological context, to learn and become familiar with the techniques used by landscape ecologists in their work, to understand the relevance of landscape ecology to human society, and to apply the concepts, models, and techniques in landscape ecology in natural resources management.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two*

1. Landscape Elements: Patch, Boundary, Edge mosaic, corridor, Ecotone, Ecotope and Fragmentation

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

2. Landscape composition and configuration, Heterogeneity

3. Landscape Metrics at Patch, Class and Landscape level; Area and Edge Metrics, Shape Metrics, Core Area Metrics, Contrast Metrics, Aggregation Metrics, Diversity Metrics.

4. Landscape Ecology and Models; Neutral Models in Landscape Ecology

5. Metrics and models for quantifying landscape structure and estimation of landscape ecological quality

303F: CLIMATE SYSTEM WITH STATISTICAL CLIMATOLOGY

GEO 303F.1: CLIMATE SYSTEM

Course Outcome: This curse is designed to produce a deeper understanding of fundamentals of climate system. The course is distributed in three specific manners; the first unit contains basic principles of climate system and climate modelling, including some focus on the physics of cloud and aerosols in the atmosphere. The second unit deals with statistical methods to analyse the climate parameter toward understanding their dynamics at the global and regional scales. The third and fourth units deal with air sampling and data analysis using satellite data.

Learning outcomes: Upon the completion of this course,

1. Students can answer to the question of changing global surface temperature
2. Have the capacity to analyze the cloud-earth-energy-radiation system
3. Can analyze the changing relation of precipitation and atmospheric aerosols
4.Can analyze the long distance teleconnection of ENSO and IOD with Indian summer monsoon precipitation
5. Students can analyze and predict the climatological variables at different space-time scale

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two*

1. Components of the climate system, Role of the land surface in climate forcing: moisture transport from the surface to atmosphere in causing variation in precipitation.

2. Distribution of insolation and global energy balance model, radiative transfer model for energy transmission in the surface-atmospheric system.

3. Cloud physics: radiation-cloud interaction, cloud microphysics and its alteration due to different atmospheric conditions.

4. Atmospheric aerosols: sources, distribution and chemistry of aerosols; effect on weather and climate; radiative forcing study, estimation of green house effect.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

5. Overview of global climate models and climate modelling; radiation and precipitation schemes; RCP scenarios and their implication as reported in IPCC AR6.

GEO 303F.2: STATISTICAL CLIMATOLOGY

Course Outcome: This curse is designed to produce a deeper understanding of fundamentals of climate system. The course is distributed in three specific manners; the first unit contains basic principles of climate system and climate modelling, including some focus on the physics of cloud and aerosols in the atmosphere. The second unit deals with statistical methods to analyse the climate parameter toward understanding their dynamics at the global and regional scales. The third and fourth units deal with air sampling and data analysis using satellite data.

Learning outcomes: Upon the completion of this course,

1. Students can answer to the question of changing global surface temperature
2. Have the capacity to analyze the cloud-earth-energy-radiation system
3. Can analyze the changing relation of precipitation and atmospheric aerosols
4.Can analyze the long distance teleconnection of ENSO and IOD with Indian summer monsoon precipitation
5. Students can analyze and predict the climatological variables at different space-time scale

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two*

1. Climatologies of precipitation, temperature and aerosols; Estimation of SOI based on SST of Nino regions in equatorial Pacific; IOD based on SST of the eastern and western Indian ocean.

2. ISMR anomalies and their connection with ENSO / IOD and global surface temperature rise; madden-julian-oscillation (MJO).

3.AR/MA and ARIMA for time series forecasting of climate variables; the implication of EOF in climate study

4. Downscaling of GCM using statistical approach.

5. Machine learning application in climate study; seasonal, interannual and decadal scale variation of basic climatic parameters.

ELECTIVE PAPER (CBCS)

PAPER - C-GEO 304: ENVIRONMENTAL ISSUES AND MANAGEMENT

Marks: 50 Credit: 4

C-GEO 304.1: EMERGING ISSUES AND POLICIES ON ENVIRONMENT

Course Outcome: Students will develop their interest in various aspects of environment and contemporary environmental issues. Students will develop their deep understanding in the nature of increasing intensity and magnitude of various hazards in connection to global pattern of economic disparity, social discrimination and climate change.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Global climate change, water scarcity and politics of water.
2. Environmental degradation and pollution.
3. Environment and development: Debate and Issues.
4. Social and Cultural Hazards.
5. Globalization and Environment.

C-GEO 304.2: ENVIRONMENTAL HAZARDS AND DISASTER MANAGEMENT

Course Outcome: Students will foster their skill in managing various types of natural hazards by analysing their risk and vulnerability. They will be trained in the procedures of hazard management through proactive approach by increasing the resilience of the community in tune with national policy of hazard management and international laws.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concepts and techniques for analysis of risk, hazard, disaster, vulnerabilities and resilience.

2. Cyclone and storm surges, thunderstorms and lighting, earthquake, tsunami wave and landslide hazards.

3. Natural hazard and disaster management in India, Agricultural drought hazard and the national experience.

4. International Disaster Response Laws Rules (IDRL).

5. National policy and appraisal of hazard.

PRACTICAL COURSES (100 Marks)

SEMESTER-III

PAPER – GEO 395: FIELD WORK IN GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 395.1: FIELD WORK AND COMMUNITY OUTREACH

Course Outcome: This course aims to present the essence of **geography as a field science**. Students will develop their aptitude in observation, data generation through field survey, data analysis with various software and advanced techniques. They will also know how to represent spatial data through various cartographic techniques and mapping. A hands on practical training is practiced through rigorous involvement in all the stages of pre-field, field and post field works.

GEO 395.2: FIELD REPORT (AS PER SPECIAL PAPER)

Course Outcome: This course aims to present the essence of geography as a field science. Students will write their field report as per the field work conducted under different special papers. All types of database management and data analysis with the application of software and aptitude gained in field work.

Generation of report (within about 100 A4 size pages including 30-40b maps/diagrams/field photographs) on the basis of field works carried out under Unit-47.

Presentation of research work-25 (Grand Viva-10 and/or Power Point presentation-15)

PAPER – GEO 396: ADVANCED QUANTITATIVE METHODS AND DIGITAL CARTOGRAPHY

Full Marks: 50 Credit: 4

GEO 396.1: ADVANCED QUANTITATIVE METHODS

Course Outcome: The course, split into two units, corresponds to the basic and advance statistics, is a starting point of escalating the statistical analytical skills. It includes the founding concepts of probability distribution including the advanced linear modelling with matrix solution to the multivariate linear and non-linear model. These concepts are essential for augmenting the analytical skills of any beginner in Geography that includes both physical and social aspects of academic discipline. Upon completion of this course, the students get the benefit of having a strong mathematical and statistical analytical skill.

Full Marks- 25
Pattern of Setting Questions: Three compulsory questions bearing marks 7, 7 and 6 respectively, will be set covering the whole unit. 5 marks will be allotted for Laboratory Note Book and Viva-voce.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

1. Analysis of Variance: Objectives; One-way and Two-way ANOVA

2. Fitting Second Degree Polynomial curves to bivariate geographical data and testing by ANOVA.

3. Multiple Regression: Linear multiple regression equation, Multiple and partial correlation coefficient.

4. Elementary multiple regression modeling techniques: Stepwise variable entry method, Path Analysis.

5. Statistical model building techniques

GEO 396.2: GIS, DIGITAL CARTOGRAPHY, AND GEODESY

Course Outcome: The course is designed for providing the fundamental ideas of Geodesy and map projection. It includes some advance projective transformation from 3D to 2D surface. The course also includes the fundamentals of GI science and its application. The students get an exposure to the theoretical and practical understanding upon completion of this course.

Full Marks- 25
Pattern of Setting Questions: Three compulsory questions bearing marks 7, 7 and 6 respectively, will be set covering the whole unit. 5 marks will be allotted for Laboratory Note Book and Viva-voce.

1. Principle, construction, properties and uses of following map projections: a) Conformal Projections- Mercator's Projection; Transverse Mercator Projection and Lambert's Conformal Conic (LCC) Projection.

2. Principle, construction, properties and uses of following map projections: Equal Area Projection- Mollweide's Projection; Conical Projection- Simple Conical Projection with Two Standard Parallels.

3. Geodesy and Coordinate Systems: Concept of Geoid, ellipsoid and datum, Cartesian, and geographic coordinate system, UTM Grid System.

4. Basics of GPS Surveying: Conceptual Framework, Space Segment, Ground Segment, Control Segment, Satellite Triangulation, Pseudo Random Code.

5. Fundamental principles DGPS, global navigation systems, Implication of locational and spatial attributes in GIS and remote sensing.

Semester- IV (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER – GEO 401: DISSERTATION REPORT AND VIVA-VOCE

Full Marks: 100 Credit: 8

GEO401.1: Problem Selection and Methods of Study

GEO401.2: Field Investigation and Database Generation

GEO401.3: Data analysis and Report Writing

GEO401.4: Presentation and Viva-Voce

PAPER – GEO 402: TOURISM AND GENDER GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 402.1: TOURISM GEOGRAPHY

Course Outcome: This course aims to present the essence of geography as it relates to tourism, geo-environmental and economic aspects. Students will develop their employability aptitude through guiding tourists in the sensitive environment and can also estimate the income generation from tourism and recreational activities. The students can also assess the impacts of tourism and recreational activities on the environmental components. The diversity of tourism activities in different landscapes will be learned by the course. Data analysis with various software and advanced techniques on tourism statistics can be generated by the course.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1.The supply of Recreation and Tourism: The supply of tourism industry and the destination life cycle; Geography of Tourism production; The role of the public and private sector in Tourism supply; spatial analytical approaches to the supply of tourism facilities

2.Impacts of Tourism and Recreation: Positive and Negative dimensions of the impacts of tourism on host communities; carrying capacity assessment for tourist destinations with methodology; The limits of acceptable change in wilderness areas of Island territory in India; The analysis of tourism's social impacts

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

3. Coastal and Mountain Recreation and Tourism: The historical analysis of recreation and tourism in the coastal zone; Environmental perspectives on coastal recreation and tourism, Perspectives of mountain tourism in India; Cultural tourism practised in the mountain Himalaya

4.Geo-diversity, Geo-restoration, Geo-tourism and Leisure Activities: Archaeological and historical value of Geo-diversity; Threats to Geo-heritage; Geo-restoration of wilderness and National parks; Wetland restoration and landscape design; Geo-tourism significances of landscapes for leisure activities; scenic assessment of tourism destination sites.

5. Tourism and Recreation Planning and Policy: Approaches to Tourism planning for leisure; Rural tourism development policy instruments; Tourism policy: Goa; Himachal Pradesh and Uttarakhand; Odisha; West Bengal

GEO 402.2: GENDER GEOGRAPHY AND ENVIRONMENT

Course Outcome: On the successful of completion of this course, students will be able to comprehend and analyse key texts within the field of gender and environment from the fields of, geography. Student will be able to understand the role of gender identities in use, ownership and management of land and other natural resources. This course will help them to conceptualize interdisciplinary nature of the subject with a gendered perspective and feminist epistemologies. Students will be able to comprehend contemporary social transformations throughout their lives with sensitivity, empathy and through the lens of gender justice.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Conceptualizing Gender Geography: Social construction of the feminine and masculine, Development of and theoretical approaches to the study of Gender in geography; Examining Gender in relation to space: Division of space in to private and public spaces, Gendered environments,

2. Spatial Patterns and modes of Gender discrimination and inequalities: Patriarchy, Matriarchy, Matriliny and Matrilocality, Social space and gender, creation of gendered space and reproduction of gendered space, gender stereotypes and representation; Gender disparities in education and health: The Indian situation

3. Women in Resource Management: Women-Nature-Development debate, Development and depletion of natural resources; Environmental degradation and pollution, Vulnerability of women in resource extraction

4. Women and Quality of life: Women and human development status: Human rights and legal space for women: Quality of life in urban and rural areas , Poverty of rural women , Food-Fuel-Water Crisis; occupational hazards , Glass Ceiling- Indian context, GEM and GDI, Crime against women

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

5. Role of Women in Environment Conservation: Chipko Movement, Women Environmentalists and their Contribution: Rachel Carson, Vandana Shiva, Padmashri Tulsi Gowda and Nobel laureate Wangari Muta Maathai.

PAPER – GEO 403: SPECIAL PAPERS

Full Marks: 50 Credit: 4

403A: ADVANCED GEOMORPHOLOGY

GEO 403A.1: ADVANCED GEOMORPHIC TECHNIQUES

Course Outcome: Students will learn about the empirical methods to estimate various geomorphic attributes by using field instruments or through models run by sophisticated software. This will offer them training on data generation, computation and analysis. This course aims to enable learners deal with real world problems using advanced technology recently available to the department from DST-FIST programme, Department of Science and Technology, Govt. of India.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Modeling concepts and approaches in geomorphology; Data sources and Freeware models; Dating procedures and uses.

2. Estimating flow velocities, discharge and stage.; Estimation of stream hydraulic parameters (Critical flow, Froude number, Reynolds number). Inundation estimates.

3. Manning equation: Required data, data measurements, and limitations; Tractive force and stream power estimation.

4. Sediment transport and sediment discharge estimates: Bed load and suspended load.

5. Watershed delineation, preparation of DEM; micro-landscape analysis (landscape unit map) using GIS (Case study on a badland area).

GEO 403A.2: APPLIED GEOMORPHOLOGY

Course Outcome: Students will learn how to apply theoretical knowledge of geomorphology in wide range of engineering and management problems ranging from drainage basin management to hazard management. They are trained to apply geomorphic understanding on water management, landuse planning, sewage and solid waste management. They are also trained on their contribution in EIA and EMP. This course aims in revival of the applied value of the discipline.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Applied Geomorphology in River Basin Management (Case study on Shilabati / Kangsabati/ Subarnarekha Basin)

2. Applied Geomorphology in Hazard Management: Flood, Coastal and River Bank Erosion, Soil Piping, Soil Erosion (Case study on Shilabati flood / Old Digha Erosion/ Bhagirathi erosion, Western Ghat)

3. Geomorphology in dam site selection and impact assessment: (Case Study on Farakka)

4. Geomorphology in urban management: Landuse planning, Sewage treatment, Storm-water management, Ground water recharge and discharge (Case study on Kolkata)

5. Geomorphology in EIA and EMP (Case study on Nayachar/ Singur /Salboni)

403B: COASTAL MANAGEMENT

GEO 403B.1: COASTAL ECOLOGY AND HAZARDS

Course Outcome: Students will understand the ecological importance of coast as an important habitat between terrestrial and marine system. They will also develop their deep insight into the significance and techniques of coastal study in the context of increasing hazards forced by global climatic change. They will be exposed to the information on the future scope of coastal studies in India.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Study and management of- Sea weeds; seaweed ecosystem, artificial seaweeds.

2. Dune vegetation: Dune initiating and dune building types, adaptation and reproduction, plant- animal interaction in sand dune. Mangroves: physical environment and ecology.

3. Coastal hazards and their management: Sea level change- long and short term changes, regional and global effects on shore; Coastal erosion- causes and effects; Storm hazard- role in sediment transfer, effects on open and estuarine coast, management of storm hazard.

4. Techniques of monitoring coastal processes and land forms.

5. Coastal studies in India: Monitoring and research.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

GEO 403B.2: COASTAL ISSUES AND MANAGEMENT

Course Outcome: Students will understand about the complexities of emerging coastal issues and their better management techniques. They will get employment opportunities as research scientist in the various institutes like INCOIS, MOEF, DST, NIO, NCSCM, Dept. of Earth Sciences and TOURISIM Department

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Coral bleaching: Impact of Global warming, coastal eutrophication and habitat conservation (Coastal lagoons, other coastal wetlands)

2. Coastal tourism and environment conflicts (Beaches and barrier coasts, mangrove dominated coasts, coral coasts, environmental regulations).

3. Application of remote sensing and GIS techniques in coastal management (Geomorphological mapping, coastal cell circulation systems, environmental zoning approach, identification and diversity of coastal habitats)

4. Managing coastal change: Assessment of coastal vulnerability, ecosystem valuation of coast, integrated coastal zone management, coastal regulations); Coastal engineering: Developments in hard structure designs, developments in soft structure designs, new dredging techniques and procedures.

5. Coastal urbanization and population pressures, Coastal resource management

403C: URBAN GEOGRAPHY AND REGIONAL PLANNING

GEO 403C.1: THEORETICAL BASES OF REGIONAL PLANNING

Course Outcome: This paper will provide knowledge on spatial analysis of functions of urban areas. Social and economic characteristics of cities and suburbs will be discussed under this paper. Urban land use and its impact on environment and ecology will be addressed. This paper will introduce students to the basics of urban geography, such as definition of cities, central place theory, National urban systems, and traditional models of urban spatial structure. More importantly, students will be exposed to contemporary urban topics such as global cities, urban sprawling, urban green space, urban ecology and footprints etc. Emphasis will be placed on the urban experience of developing countries, especially India. The students will be able to assemble knowledge of urbanism and urbanization as historic, geographic, social, and cultural processes, historical development, contemporary condition, and environmental impact of cities and urban related issues growing from exposure to the disciplines of Geography and Planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

division), will be set for answering any two. ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. History of regional planning in India, theories of regional planning. Concept of balanced and unbalanced growth

2. Regional development perspectives: Colonial period (Dependency theories- Friedman, Andre Gander Frank, David Slater)

3. Growth Pole theories and the developing world by Perroux, Myrdal, Hirschman, and Boudiville.

4. Agropolitan Development, Basic need approach (E.A.J Johnson, Dennis Rondinelli-USAID).

5. Regional Environmental issues in Purba and Paschim Medinipur Districts- Flood, Drought, coastal erosion, Salinization, Deprivation and related social conflicts, conflict in forest society interface.

GEO 403C.2: PLANNING FOR URBAN DEVELOPMENT

Course Outcome: Students will understand the urban planning process in various issues like sanitation, transport, housing, water supply etc and various policies of the govt. The knowledge about the remote sensing and GIS is also important for urban planning. The students will be able to participate in various works relating to urban planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concept of developed and underdeveloped economy, Intra- and Inter-regional planning. Policies of Urban planning and development.

2. Urban infrastructure planning: Sanitation and Water supply systems, Waste Water disposal systems, Solid waste collection and disposal.

3. Urban traffic and transportation planning.

4. Planning for Urban housing: concepts of land use and land valuation, Needs and types of housing; Housing Policy and programmes in India; Real estate development.

5. Application of Remote Sensing and GIS in urban planning and management.

403D: REMOTE SENSING AND GEOGRAPHIC INFORMATION SYSTEM

GEO 403D.1: ADVANCED REMOTE SENSING

Course Outcome: This core content of this course is focused on some advanced ideas of microwave and hyperspectral remote sensing including image-based statistics for digital image processing. The course is also focused on some of the advanced ideas of GIS including remote sensing and GIS integration. It

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

includes the application of GIS and remote sensing in various purposes. Upon completion of this course, students would be benefited from these advanced level of applications, and allow them to pursue their future career in GI Science.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Microwave Remote Sensing: Concept, advantages and disadvantages, spatial resolution, Real and Synthetic Aperture Radar, Passive Microwave Remote Sensing, Lidar.

2. Microwave Remote Sensing, Sensor: Landsat VS Sentinel data analysis, Radar interferometry, Differential interferometry, Polarimetry, and SRTM

3. Hyperspectral: concept, sensors, reflectance spectra, spectral library.

4. Digital image pre-processing: Geometric corrections, atmospheric corrections.

5. Digital image post-processing: image statistics, image enhancement and rectifications, signature separability index, image classifications, and transformation.

GEO 403D.2: ADVANCED GIS AND APPLICATIONS OF REMOTE SENSING

Course Outcome: This core content of this course is focused on some advanced ideas of microwave and hyperspectral remote sensing including image-based statistics for digital image processing. The course is also focused on some of the advanced ideas of GIS including remote sensing and GIS integration. It includes the application of GIS and remote sensing in various purposes. Upon completion of this course, students would be benefited from these advanced levels of applications allow them to pursue their future career in GI Science.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Spatial data models: raster and vector data models, data sources, attribute data and metadata concepts, components of GIS, mobile and web GIS technologies. SQL for data mining, mathematical and logical operations using raster and vector data in GIS/image processing software platforms.

2. Digital Elevation Model: DSM, DTM; Calculation of Slope and Aspect for watershed analysis.

3. Remote sensing of vegetation; satellite-based applications for mapping vegetation, including agricultural land, vegetation health, and leaf water content assessment.

4. Remote sensing of soil and water; soil moisture estimation, estimation of suspended sediment load in the river and coastal waters.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

5. Remote sensing of the atmosphere; retrieval of precipitation from satellite data, retrieval of cloud and aerosol optical depth from optical images.

GEO 403E: SPATIAL ANALYSIS IN LANDSCAPE ECOLOGICAL DYNAMICS

GEO 403E.1: LANDSCAPE ECOLOGY AND DYNAMICS

Course Outcome: This course will help the students to recognize the spatial patterns and heterogeneous environments are critical factors in understanding how systems work across a range of scales. It will provide concepts and theories which will help them in understanding the dynamics of complex systems. Finally this course will serve as foundations for decision-making and problem solving in applied fields such as conservation biology, land-use management, and urban planning and development.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concepts of Landscape dynamics: Landscape dynamics on multiple scales, landscape sensitivity, landscape ecology and global change

2. Landscape pattern formation: Physical and Biotic processes; Drivers of Landscape Patterns, characteristics of landscape with emphasis on Forest and Urban landscape.

3. Landscape dynamics and drivers: climatological, topographical, socio-economical, biophysical, landscape composition and configurations.

4. Patterns of landscape change in forest landscape; Landscape in species perspective- Landscape contour model; Pattern-based landscape models;

5. Patterns of landscape change in Urban areas: Urban sprawl, congestion, urban ecology; concept, pattern and directions, GIS techniques for measuring composition and configuration; Fractal Geometry of Landscapes in the urban areas.

GEO403E.2: SPATIAL ANALYSIS, LANDSCAPE MODELING AND SERVICES

Course Outcome: This course will help the students to synthesize the dominant themes of landscape ecology and Familiarize students with current research trends in the field and Explore applications from the landscape approach. The course is expected to be useful for the students understanding natural resources, ecology, conservation biology, landscape architecture, geography, land use planning, and other fields.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

1. Field works in Landscape Ecology; Bio-monitoring and Bio-indicator measuring using techniques Remote Sensing sensor and ecological data

2. Application of GIS techniques for landscape modeling: Arc GIS tools for connectivity and corridor modelling, habitat modelling and linkage design

3. Computation of landscape metrics using FRAGSTATS.

4. Introduction to Spatial Modelling Environment (SME), Unit model development in STELLA,; Landscape disturbance-succession models, simulation models ; Urban change detection and prediction using CA-Marcov model.

5.Basic services of urban and forest ecosystem: Forest covers depletion, Causes and impacts on ecosystem services; Native/natural forest cover loss and overall forest loss

GEO 403F: APPLIED CLIMATOLOGY

GEO 403F.1: APPLIED CLIMATOLOGY-1

Course Outcome: This curse is designed to produce a deeper understanding of fundamentals of climate system. The course is distributed in three specific manners; the first unit contains basic principles of climate system and climate modelling, including some focus on the physics of cloud and aerosols in the atmosphere. The second unit deals with statistical methods to analyse the climate parameter toward understanding their dynamics at the global and regional scales. The third and fourth units deal with air sampling and data analysis using satellite data.

Learning outcomes: Upon the completion of this course,

1. Students can answer to the question of changing global surface temperature
2. Have the capacity to analyze the cloud-earth-energy-radiation system
3. Can analyze the changing relation of precipitation and atmospheric aerosols
4. Can analyze the long distance teleconnection of ENSO and IOD with Indian summer monsoon precipitation
5. Students can analyze and predict the climatological variables at different space-time scale

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Air sampling and analysis process for studying inorganic chemistry of the atmosphere, Inorganic chemistry of rainwater with its source attribution: spectroscopic principle.

2. Analysis of the vertical profile of the atmosphere through cloudSat and Calipso sensor data

3. Estimation of PBLH through radiosonde data; other data sources of PBLH; the implication of PBLH in weather and climate studies.

4.Distort Atmospheric Radiative Transfer (DART) and Optical Properties of Aerosols and Cloud (OPAC) models for studying atmosphere and radiation interaction

5. Changing water cycle: global and regional constraints of water cycle, observed changes of water cycle based on multiple dataset.

GEO 403F.1: APPLIED CLIMATOLOGY-2

Course Outcome: This curse is designed to produce a deeper understanding of fundamentals of climate system. The course is distributed in three specific manners; the first unit contains basic principles of climate system and climate modelling, including some focus on the physics of cloud and aerosols in the atmosphere. The second unit deals with statistical methods to analyse the climate parameter toward understanding their dynamics at the global and regional scales. The third and fourth units deal with air sampling and data analysis using satellite data.

Learning outcomes: Upon the completion of this course,

1. Students can answer to the question of changing global surface temperature
2. Have the capacity to analyze the cloud-earth-energy-radiation system
3. Can analyze the changing relation of precipitation and atmospheric aerosols
4.Can analyze the long distance teleconnection of ENSO and IOD with Indian summer monsoon precipitation
5. Students can analyze and predict the climatological variables at different space-time scale

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Global and regional scale climatological data sources: ECMWF, CRU, NCAR, APHRODITE, IMD-gridded products.

2. Studying clouds using satellite imagery; cloud fraction, cloud height, cloud top pressure and temperature and cloud effective radii

3.Studying global and regional scale aerosol loading using satellite-derived products with the help of CDO, R, Python languages; aerosol-cloud-precipitation interaction: regression analysis

4. Extreme weather events: causes and measurements.

5. Fundamentals of HYSPLIT trajectory modelling, Data sources of air mass trajectory, Trajectory analysis: potential source contribution function (PSCF) and clustering.

PRACTICAL COURSES (100 Marks)

SEMESTER-IV

PAPER – GEO 495: ENVIRONMENTAL ASSESSMENT AND SPATIAL ANALYSIS IN GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 495.1: ENVIRONMENTAL MONITORING AND ASSESSMENT

Course Outcome: Students will develop practical skills for constructing various experiments and environmental maps and foster their abilities in showing the spatial distribution of various environmental elements and their proper interpretation. This ability will help them to formulate environmental plans and to manage and conserve vegetation, air, soil, water etc.

Full Marks- 25

*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1.Determination of Particle Size using respirable dust sampler, Determination of PM 2.5 and PM 10 using Fine Particle Sampler; Estimation of Dust retaining capacity of plants.

2. Estimation of Formaldehyde (HCHO) and Sulphur dioxide by Calorimetric method.

3. Measurement of Noise.

4. Estimation of Chlorophyll, total organic, inorganic carbon.

5. Site Visit to degraded landscape/habitat/Industrial site for related pollution monitoring and EIA.

GEO 495.2: SPATIAL ANALYSIS IN GEOGRAPHY

Course Outcome: The focus of this course is to give a comprehensive understanding of the spatial organization through mathematical and statistical analysis. Upon completion of this course, the students get an inclusive knowledge and skills to perform spatial analysis at different spatial scale.

Full Marks- 25

*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Transport network analysis: Centrality Indices, Shortest path analysis (Transport and allocation problems), Detour and spread.

2. Distance Matrix (Aggregate Travel Distance).

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:45:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

3. Point spatial distribution analysis: Uniformity, randomness and compactness.

4. Analysis of Directional Data; Rose diagram, Dominant Direction, Mean direction.

5. Analysis of Shape: Measures based on axial ratios, perimeters to areas, areas to axial length.

PAPER – GEO 496: RESEARCH ETHICS AND SPATIAL MODELING IN GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 496.1: PROPOSAL WRITING & RESEARCH ETHICS

Course Outcome: The learners will get the initial training on various steps involved in geographical research. They will develop the idea on fundamentals of research methodology including data collection, methodology and report writing. This course aims to develop fundamental research aptitude among all the students

Full Marks- 25

Pattern of Setting Questions: ***Three*** *compulsory questions bearing marks* ***7, 7 and 6*** *respectively, will be set covering the whole unit.* ***5*** *marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Research ethics and paradigm shift of research methodology in Geography.

2. Need for research, basic research types.

3. Identification of research problems, development of theoretical background- literature review, research gap and research question and specification of the objectives of study; hypothesis building, Framework of research writing.

4. Methods of data collection- primary and secondary; Preparation of questionnaire and survey schedule and their differences, research ethics.

5. Methods of writing notes, style of referencing, bibliography and appendices, abstract and synopsis writing.

GEO 496.2: SPATIAL MODELING

Course Outcome: This course will provide the students with a range of techniques for analysing and modelling spatial data to build upon the more general research training delivered via companion modules on data collection and data analysis, both of which have a spatial focus. It will also highlight a number of key social issues that have a spatial dimension, as well as explain the specific challenges faced when attempting to analyse spatial data. The course also introduces a range of analytical techniques and

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_Draft_CBCS_2223/Geography_2022_23.pdf

approaches suitable for the analysis of spatial data and enhances practical skills in using R software packages to implement a wide range of spatial analytical tools.

Full Marks- 25

*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Basic Concepts and components in GIS, Spatial data model, Geo-statistical, Spatial features, Overlay analysis in Arc GIS, and other open-source packages

2. Database creation, climate forcings, soil and LULC

3. Morphometric analysis in Arc GIS

4. SWAT hydrological model with Arc SWAT

5. Model calibration principal and validation with SWAT-CUP

DIVISION OF MARKS
Total marks: 1100 (Core) + 100 (Elective/CBCS)

For Internal Students				Elective/CBCS
Semesters	**Theoretical**	**Practical**	**Total**	**Total**
Semester- I	200	100	300	-
Semester- II	150	100	250	50
Semester- III	150	100	250	50
Semester- IV	200	100	300	-
Total	**700**	**400**	**1100**	**100**

STRUCTURE OF SYLLABUS

SEMESTER-I
(Duration: July – December)

Type	Paper	Unit	Marks				Credit	Total Class Hours
			End-term Exam.	Internal Exam.	Unit Total	Paper Total		
THEORETICAL	**GEO 101: Earth's Surface Process**	GEO 101.1: Geotectonics	20	5	25	50	4	60 hours
		GEO 101.2: Geomorphology	20	5	25			
	GEO 102: Hydrospheric Science	GEO 102.1: Oceanography	20	5	25	50	4	60 hours
		GEO 102.2: Hydrology	20	5	25			
	GEO 103: Climate, Soil and Agriculture	GEO 103.1: Climatology	20	5	25	50	4	60 hours
		GEO 103.2: Soil and Agriculture	20	5	25			
	GEO 104: Environmental Geography	GEO 104.1: Basics of Environment and Ecology	20	5	25	50	4	60 hours
		GEO 104.2: Landscape ecology and planning	20	5	25			
PRACTICAL	**GEO 195: Hydrological Techniques and Sedimentological Analysis**	GEO 195.1: Hydrological Techniques	25	-	25	50	4	60 hours
		GEO 195.2: Sedimentological Analysis	25	-	25			
	GEO 196: Thematic Mapping	GEO 196.1: Physical and Social Thematic Mapping	25	-	25	50	4	60 hours
		GEO 196.2: Environmental Mapping	25	-	25			

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University

Outcome of the academic programme on M.A. / M.Sc. in Geography

1. Fostering the ability of the students to encounter practical problems with theoretical knowledge in Geography and Environment.
2. Promotion of research aptitude and field work aptitude as well as laboratory based practical works for the students of Geography.
3. Capacity enhancement of the students in spatial mapping on digital platform for the Geographical research and studies.
4. Orientation of the students of Geography to develop competitive examinations aptitude among them including NET / SET/ and other professional jobs.
5. Preparing students for Higher Academic programmes for institutes of National and International repute.
6. On completion of the M.A./M.Sc in Geography, students are able to get absorbed in various Govt Departments (like planning and developmental commissions, forestry, environmental, and disaster management departments) travel agencies, manufacturing firms, etc. They can be cartographer (NATMO), surveyor (Survey of India), GIS and Remote Sensing experts, environmental planner, Environment Reporter, urban and regional planner, transportation manager, Teacher/Professor etc.

SYLLABUS

Semester- I (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER - GEO 101: EARTH'S SURFACE PROCESS

Full Marks: 50 Credit: 4

GEO 101.1: GEOTECTONICS

Course Outcome:

The focus of this course is to give an in-depth concept on the fundamental physical laws towards understanding the initial phases of the early universe with special reference to the Earth and the Moon. It also focuses on the basic understanding of the genesis of the Earth's magnetic field and palaeomagnetism that will enhance the understanding about the Earth's geological history and theories about the continental drift and sea floor spreading. The course is also designed to have some advanced level of understanding of the absolute dating techniques to find the ages of geological formation. It also includes the processes and mechanisms of mountain building. All these concepts and techniques will surely enhance the ability of the students for critical analysis and thereby synthesis of the Earth's system process. The completion of this course will give impetus to the research insights for the students who would like to pursue their future carrier in geosciences.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Origin and evolution of solar system with special reference to the Earth/Moon.
2. Relative and absolute dating: principles and techniques.
3. Origin of earth's magnetic field, paleomagnetism, geomagnetic polarity reversal and paleomagnetic timescale, paleomagnetic polar wandering curves and reconstruction of plate tectonic motions.
4. Mechanism of plate dynamics. Application of plate tectonic theory in explaining orogenesis, volcanism, earthquake.
5. Neo-tectonics and its worldwide evidences.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

GEO 101.2: GEOMORPHOLOGY

Course Outcome:

Students will learn about the mechanism and working principle of processes that lead to shape present earth-surface. Field demonstration on process-form relationship help in concretizing ideas. This understanding may help in formulating hydrological, geologic and economic planning. Learners may take part in hazard management too.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Concepts in geomorphology: historical and functional approaches, uniformitarianism and catastrophism, base level, grade and profile of equilibrium.
2. Weathering: factors, processes and landforms. Mass wasting: resultant landforms and safety factor.
3. Slope Evolution: process-form relationship on slope elements, theories of Wood, Davis, Penck, King, Young and Savigear. Dynamic metastability in slope evolution.
4. Fluvial processes and forms: threshold energy for entrainment and transport, channel form and patterns, flood plains, alluvial fan, terraces and delta.
5. Applied geomorphology in planning, hydrology and economic geology. Geomorphology in hazard Management (flood, landslide and subsidence).

PAPER - GEO 102: HYDROSPHERIC SCIENCES

Full Marks: 50 Credit: 4

GEO 102.1: OCEANOGRAPHY

Course Outcome:

The students will be able to understand the marine environment and oceanographic processes that leads to earth system processes. They can extend their ideas in understanding environmental and climatic processes too. An aptitude on the distribution of marine resources as well as their utilization and possible impact are also developed among the students.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Marine Environment and Processes: Major subdivisions of the marine environment, winds and ocean circulation, waves in the ocean, origin of the tides and tidal characteristics.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

2. Physical and chemical structure of oceans: Water masses and their properties. Sediment in the sea.
3. Coastal Habitats: Estuaries, lagoons, salt marshes, mangrove swamps, coral reefs- origin, circulation, sedimentation and ecology.
4. The Dynamic Shoreline: Coastal water movement, circulation in surf zone, beaches, beach profiles, sediment budgets, coastal dunes, barrier islands, tidal inlets, cliffed coasts, deltas, effects of storms. Human impacts on the coastline.
5. The Ocean's Resources: Law of the sea, law of the sea treaty, exclusive economic zones/coastal regulation zones, mineral resource- oil and natural gas, gas hydrates, sand and gravel, manganese nodules, cobalt-rich oceanic crusts, phosphate deposits, biotic resources.

GEO 102.2: HYDROLOGY

Course Outcome:

Students will learn about the working principle of earth system processes that lead to water availability and necessity for water management in the context of global climatic change. This understanding may help in water budgeting and formulating plan for water use and water management. Learners may take leading role in awareness generation among community for rain water harvesting and judicial water use.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Hydrological systems, estimating water potential, water budgeting at watershed level. Hydrologic frequency analysis (Gumbel's equation and log probability law).
2. Precipitation estimates: point rainfall analysis, area-depth curve, theissen network and isohyetal method for estimating rainfall volumes.
3. Infiltration and evapotranspiration: soil-vegetation complex and infiltration estimates. Methods of estimating evapotranspiration.
4. Runoff estimates using curve number, stream discharge estimates by area-velocity method. Ground water: storage structure, flow, recharge and discharge.
5. Hydrographs and Rating curve: Time dimensions of hydrographs: concept of unit hydrograph and rating curves and their significance. flood & drought as hydrological hazards.

PAPER – GEO 103: CLIMATE, SOIL & AGRICULTURE

Full Marks: 50 Credit: 4

GEO 103.1: CLIMATOLOGY

Course Outcome:

The course deals with the basic understanding of the climate system. The fundamental physics of surface pressure distribution, the general circulation model and sea surface temperature (SST) variation will allow students to get insights to the space-time scale variation of weather and climate. Students will understand the weather and climatic processes working on earth and this understanding will help them to assess and predict the weather phenomena and its related hazards. Through this understanding, they can take part in hazard and disaster management programmes.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Nature and Scope of Climatology and its relationship with Meteorology, climatological systems operating in different space and timescale: thunderstorm, tropical cyclone and associated hazards, jet Stream, planetary wind systems.
2. The General Circulation: GCM, Tropical circulation- mechanism of Indian monsoon, Walker circulation and ENSO phenomena, Temperate Circulation.
3. The Climatic Zones of the world with special reference to tropical climates: wet, wet and dry, savanna, desert and highland.
4. Sea surface temperature and it's climatic significance; Maritime influence on coastal weather: seasonal changes and storm events.
5. Climatic changes through geological periods- evidences and possible causes; Global Warming- Natural and anthropogenic causes and probable consequences.

GEO 103.2: SOIL AND AGRICULTURAL GEOGRAPHY

Course Outcome:

Learners will understand about functional integration of various process that results in formation and distribution of different types of soil and their implication of agricultural systems. They will be able to achieve integrated knowledge on soil and landscape. They will develop special aptitude on soil survey techniques to analyse patio-temporal distribution of agricultural systems.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Variation in physico-chemical properties of soil with climate and dominance of local factors: organic matter content, pH clay content, clay mineralogy, soil colour, calcium carbonate and soluble salt content.
2. Soil Geomorphology: soil landscape analysis in relation to geomorphic surfaces and surface morphometry, catena concept- catena and soil hydrology, slope description and catena, soil catena under different environment, soil morphology and chrono-sequence.
3. Approaches in agricultural geography: agricultural systems (ecological or near-ecological systems). Approaches to study agricultural geography, Jonnason's theory on agricultural landuse.
4. Determinants of agricultural pattern: physical and institutional, precision farming, use of modern technology.
5. Issues and policies in modern Agriculture: Impact of green revolution, GM Crops and agricultural hazards, food security, agricultural policies and their implication.

PAPER – GEO 104: ENVIRONMENTAL GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 104.1: BASICS OF ENVIRONMENT AND ECOLOGY

Course Outcome:

The living things interact with each other in various ways and with the non-living components that make up the environment in which we live. These non-living components include rocks, soils and water, as well as the atmosphere. All these interactions produce a complicated set of interrelationships and these interrelationships can take many forms. Thus, this paper on basics of environment and ecology prepares students for careers as leaders in understanding and addressing complex environmental issues from a problem-oriented, interdisciplinary perspective. Ecology is a scientific way of thinking about the world. This means that it involves a certain way of investigating, studying and writing about the systems. Student can learn the core concepts and methods from ecological and environmental perspectives and their application in environmental problem solving.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Concept of Environment, major elements of environment, functioning of environmental systems, role of biotic and abiotic elements.
2. Ecosystem: structure, function and processes, patterns of energy flow.
3. Biogeochemical cycles (Nitrogen, Carbon, Phosphorus), ecosystem metabolism, ecosystem process (photosynthesis and respiration), trophic levels (food web and chain) decomposition, ecosystem stability.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

4. Terrestrial ecosystems: Forest, Grassland, Desert and Agriculture.
5. Biodiversity: Genetic, species, community and ecosystem diversity; biodiversity uses, threats to biodiversity, biodiversity conservation.

GEO 104.2: LANDSCAPE ECOLOGY AND PLANNING

Course Outcome:

Landscape ecology is the study of the pattern and interaction between ecosystems within a region of interest, and the way the interactions affect ecological processes, especially the unique effects of spatial heterogeneity on these interactions. This paper provides students with an introduction to the discipline of landscape ecology. Thus, this paper focuses on the characteristic scale of spatial pattern; defining the elements of pattern; connectedness, fractal geometry, how these aspects of pattern are interconnected in landscapes, and how they vary. It may help students detecting, analyzing, or simulating landscape change; and modeling populations or communities in landscape mosaics and educate students for professional life.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Landscape: Definition, concept, nature and role, ecological description of landscape.
2. Structure of Landscape: Patches (shape, size, nature and boundary), corridors (type, network, matrix) and mosaics, habitat arrangement measuring metrices (Shanon Diversity Index and Simpson Diversity Index).
3. Landscape Dynamics: Energy flow, species movement, nutrient movement.
4. Anthropogenic Modification: Agricultural intensification, deforestation and development.
5. Landscape management and planning: Role of keystone species, conservation of fragmented habitats, sustainable landscape, and role of Traditional Ecological Knowledge (TEK) in conserving landscape. Role of GIS in landscape planning.

PRACTICAL COURSES

(100 Marks)

PAPER –

GEO 195: HYDROLOGICAL TECHNIQUES AND SEDIMENTOLOGICAL ANALYSIS

Full Marks: 50 Credit: 4

GEO 195.1: HYDROLOGICAL TECHNIQUES

Course Outcome:

Students will develop skills in application of theoretical knowledge of hydrology. They will learn on field as well as laboratory techniques for estimating different hydrological attributes as for example rainfall, run off, infiltration etc. in order to construct water budget. Students are enabled to analyse magnitude frequency of different hydrological hazards like fold and droughts and their social and economic applications. This knowledge will help them in formulating various hydrological projects and their successful management.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Point rainfall analysis, area-depth curves, Thiessen network and Isohyetal methods to determine rainfall volumes.
2. Estimating infiltration using infiltrometre and other field techniques. Drawing infiltration curve.
3. Evaporation estimation: Use of evaporation pan and empirical equations using climatic data.
4. Runoff and discharge estimation: Curve Number methods for estimating runoff: area-velocity method for discharge estimate.
5. Construction of hydrograph, unit-hydrograph and rating curves.

GEO 195.2: SEDIMENTOLOGICAL ANALYSIS

Course Outcome:

Students will develop aptitude and abilities on different methods of sediment sampling from field. They will also be trained thoroughly on laboratory method and field method of sediment analysis. This will help them to understand various types of environment and process domain under which sediments were deposited. Thus they can develop skills for reconstructing past.

*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Phi-scale of grain size distribution, texture analysis of sediment samples using standard techniques, statistical representation.
2. Form and shape analysis of pebble grade sediments.
3. Megascopic and microscopic examination of sediments.
4. Identification of sedimentary and bioturbation structures.
5. Sedimentary environmental facies analysis.

PAPER – GEO 196: THEMATIC MAPPING Full Marks: 50 Credit: 4

GEO 196.1: ENVIRONMENTAL MAPPING

Course Outcome:

Students will develop cartographic skills for constructing various thematic maps and foster their abilities in showing the spatial distribution of various environmental elements and their proper interpretation. This ability will help them to formulate environmental plans and to manage and conserve vegetation, soil, water etc.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Estimation and mapping of soil properties: texture, structure, moisture, colour, pH, organic matter, NPK, soil profile mapping.
2. Estimation of Water Properties: BOD, COD, Dissolved Oxygen, pH, suspended solid, turbidity and electric conductivity.
3. Ecological Micro- zonation Mapping.
4. Vegetation density mapping
5. Association between soil parameters, vegetation types and density.

GEO196.2: PHYSICAL AND SOCIAL THEMATIC MAPPING

Course Outcome:

Students will develop cartographic skills for constructing various thematic maps and foster their abilities in showing the spatial distribution of various physical as well as social elements and their proper interpretation. Skill of understanding spatial integration among physical and social elements will be developed to foster the abilities of holistic abilities.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Morphometry and Drainage Network Analysis of watershed.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

2. Mapping of farming practices: Crop-combination, diversification and cropping intensity.
3. Mapping of social vulnerability and social disparities, ethnic mapping.
4. Estimation and Mapping of Social Well-being, HDI, GDI, GEM.
5. Estimation of Human Poverty Index –(HPI-I and II) for developed and developing countries.

Semester- II (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER- GEO 201: ENVIRONMENTAL APPROACHES &APPLICATION

Full Marks: 50 Credit: 4

GEO 201.1: ENVIRONMENTAL ETHICS AND REGULATIONS

Course Outcome:

Environmental Ethics examines the ways we supposed to value the environment and the non-human inhabitants of the earth. It examines the moral relationship between human beings and non-human beings (including the environment itself). This paper will consider the implications of this examination for an ethical life. It demonstrates the ethical conduct in all scientific activities. The paper includes both philosophical bases(moral obligations, the nature of value) and policy measures to be adopted for the betterment of the environment and earth. The students will be able to explain and apply principles of environmental ethics and apply philosophical concepts used in environmental ethical decision-making. They may apply theories and concepts to particular cases, and ability to provide critical assessment of arguments.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Environmental ethics and education; Concept, development of environmental philosophy, Ecocentrism and Anthropocentrism, the land ethic (Aldo Leopold), Gaia concept, Eco-feminism. Formal and non-formal environmental education, Tbilisi conference, environmental awareness.
2. Approaches to conservation of environment: Landscape ecology and ethno-ecology, environmental stewardship.
3. Environmental Impact Assessment (EIA), Environmental Management Planning (EMP), Environmental Performance Assessment (EPA).
4. Global Environmental Issues: Stockholm Conference, the Earth Summits, Inter-Governmental Panel for Climate Change (IPCC).
5. Environmental Laws in India: Wild life Act, Forest Acts, Environmental Protection Act, National Environmental Tribunal Act.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

GEO 201.2: ENVIRONMENTAL ENGINEERING

Course Outcome:

Students will learn about the necessity and mechanism of waste water treatment and understand the procedures to manage air and noise pollution. This course aims to enable the learners to participate in making of pollution free environment. This fundamental understanding and knowledge help them to get engaged in various non-government and government initiatives in this regard.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Definition and domain of Environmental Engineering, Waste water treatment: Primary, Secondary and Tertiary treatment; Disposal.
2. Sludge treatment; Solid (Municipal) waste management, Hazardous waste management.
3. Air pollution; Indoor pollution, Air sampling and measurement, Air pollution control technologies.
4. Noise Pollution; Measurement of noise, Biophysical impacts, Mitigation technologies.
5. Arsenic and Fluoride Pollution; Spatial distribution, Impacts, Mitigation.

PAPER– GEO 202: POPULATION & DEVELOPMENT

Full Marks: 50 Credit: 4

GEO 202.1: POPULATION GEOGRAPHY

Course Outcome:

Through this module students will learn the various aspects of population growth process, its impact on economy, society and politics. Various policy regarding the control and development of human resources, their necessity, and outcome will be understood. This understanding will help them to take part in various govt schemes and programmes relating to population issues.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Scope, development and recent trends of population geography and its interdisciplinary nature.
2. Population composition and structure: Types, spatial and temporal variation and determinants of age, sex, literacy and rural-urban ratio.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

3. Demographic Transition: Facts, theories, different waves. Its social, political and economic impacts.
4. Population projection: Concept, types and methods.
5. Population- resource relationship: Critical analysis of over, under and optimum population, population resource regions, carrying capacity and change in carrying capacity over time. Population policy issues, population equilibrium.

GEO 202.2: POPULATION & DEVELOPMENT

Course Outcome:

The course is designed to give an account of the population and development debate including some of the measures of human development measurements. Students will also aware about the migration pattern of people from one place to other. They will be able to calculate the Human Development Index and other indices to assess the quality of human population. Any planning activities relating to economy and population need such knowledge to proper implementation and outcome.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. The fate of Millennium development goals, Human development and gender issues: HDI, GDI, GEM-concept, measures and criticism, disparities
2. Population growth: Link to economic development, resource scarcity, food security and sustainable development. Concept of logistic and exponential growth
3. Population and development integration with special reference to India
4. Theories and approaches of population growth and regulation: Malthus, Marx and Neo-Malthusiasm
5. Migration: Concept of social mobility, concept, types, patterns, theories (Ravenstein, Lee, Louis and Zelinsky), consequences.

PAPER– GEO 203: REGIONAL GEOMORPHOLOGY & RESOURCE MANAGEMENT
Full Marks: 50 Credit: 4

GEO 203.1: REGIONAL GEOMORPHOLOGY OF INDIA AND WEST BENGAL

Course Outcome:

Students will be able to learn about the regional boundaries of geomorphological regions in India and also understand the physiographic diversity of India and West Bengal, their unique characteristics and regional importance.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Geomorphology of Darjeeling Himalaya and Terai Region with special reference to landslides and alluvial fans.
2. Tectonics, drainage and geomorphology of Western Ghats with special reference to Deccan Trap.
3. Geomorphology and soil-landform assemblages of Chhotanagpur Plateau and its adjacent areas of West Bengal, Geomorphology of Rajasthan desert with special reference to Marusthali.
4. Form, process and evolution of Ganga, Subarnarekha and Godavari delta.
5. Tectonics and Geomorphology of the Islands of Bay of Andaman and Nicobar, Rameswaram and Laksha-Minikoi and Amindivi.

GEO 203.2: LAND, WATER AND FOREST: CONFLICT AND CONSERVATION

Course Outcome:

Students will acquire knowledge about primary resources, their conflicts in uses, availability and need for conservations. They will understand the environmental and economic services of land, water and forests. It will enhance their ability of being a resource planner.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Land class systems, land use capability classes.
2. Land degradation, land conservation and land improvement.
3. Water assessment: water quality, water availability and scarcity of water, saline ground water in coastal areas, functions of wetlands.
4. Characterization diversity of rainforests and mangrove forests
5. Degradation and management of forest, social forestry and agro-forestry.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University

ELECTIVE PAPERS (CBCS)

PAPER- C-GEO 204: Resource Management and Earth System science

Full Marks: 50 Credit: 4

C-GEO 204.1: RESOURCE AND ITS MANAGEMENT

Course Outcome:

The course is designed for basic understanding for the students from different discipline other than Geography. It includes the fundamental concepts of natural and human resources and their management and planning strategies. On completion of this course, the students get a founding knowledge of the natural resources in environment.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Geography as a science of synthesis; social relevance of geography
2. Resource assessments, management and mapping
3. Human resource development in backward region.
4. Indicators of livelihood security.
5. Microlevel resource planning in watershed scale.

C-GEO 204.2: EARTH SYSTEM SCIENCE

Course Outcome:

The course is designed with an interdisciplinary approach for the students from outside Geography. It includes the fundamental ideas of Geotectonics, atmospheric composition and processes, the surface geomorphology and sea bathymetry. On completion of this course, these fundamental concepts will help the students from other branches to have a basic idea of geosciences.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Earth surface processes and Geo-tectonics.
2. Composition of atmosphere and atmospheric processes.
3. Bottom relief of major oceans; temperature and salinity distribution.
4. Principles of mapping and applications.
5. Regional geomorphology of West Bengal.

PRACTICAL COURSES (100 Marks)

COURSE NO. – GEO 295: STATISTICAL TECHNIQUES

Full Marks: 50 Credit: 4

Course Outcome:

The course, split into two units, corresponds to the basic and advance statistics, is a starting point of escalating the statistical analytical skills. It includes the founding concepts of probability distribution including the advanced linear modelling with matrix solution to the multivariate linear and non-linear model. These concepts are essential for augmenting the analytical skills of any beginner in Geography that includes both physical and social aspects of academic discipline. Upon completion of this course, the students get the benefit of having a strong mathematical and statistical analytical skills.

GEO 295.1: BASIC STATISTICS IN GEOGRAPHY

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Measurement in Geography: Nominal, ordinal, interval and ratio measurement.
2. Concept of covariance, correlation and regression: Bi-variate analysis - linear, exponential, Product moment correlation, Spearman's Rank correlation, correlation matrix, partial correlation, residuals - mapping of residuals.
3. Probability distribution: addition and Law of multiplication, concept of probability distributions (binomial distributions, normal probability distribution), properties of normal curve.
4. Hypothesis testing: Formulation, Rejection rule, one and two tailed tests, significance level, degrees of freedom type I and type II errors, Standard Error. Different types of significance test for various purposes. Chi- square test, student's t- test.
5. Sampling techniques for geographical analysis.

GEO 295.2: ADVANCED QUANTITATIVE METHODS

Course Outcome:

The course, split into two units, corresponds to the basic and advance statistics, is a starting point of escalating the statistical analytical skills. It includes the founding concepts of probability distribution including the advanced linear modelling with matrix solution to the multivariate linear and non-linear model. These concepts are essential for augmenting the analytical skills of any beginner in Geography that includes both physical and social aspects of academic discipline. Upon completion of this course, the students get the benefit of having a strong mathematical and statistical analytical skills.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Analysis of Variance: Objectives; One-way and Two-way ANOVA.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

2. Fitting Second Degree Polynomial curves to bivariate geographical data and testing by ANOVA.
3. Multiple Regression: Linear multiple regression equation, Multiple and partial correlation coefficient.
4. Elementary multiple regression modeling techniques: Stepwise variable entry method, Path Analysis.
5. Model building techniques

PAPER- GEO 296: REMOTE SENSING AND COMPUTER APPLICATION

Full Marks: 50 Credit: 4

GEO 296.1: PRINCIPLES OF REMOTE SENSING AND AERIAL PHOTOGRAPHY

Course Outcome:

The course content is focused on basic understanding of satellite remote sensing and aerial photography. Basic principles of satellite motion and sensor parameters including the principles of air photo help the students to formalize with the modern space based analytical techniques. Upon completion of this course, the students will get benefit from rigorous practice and comprehensive theories.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Physics of Remote Sensing: Electro Magnetic Radiation (EMR), Radiation laws (wavelength-frequency-energy relationship of EMR numerical problems).
2. Satellite System: Keplers's Laws, Major-Semi-major axis, eccentricity, velocity (Numerical problems).
3. Satellite Sensors: Concept of IFOV, resolution and determination of pixel size, referencing scheme of satellite system (path/row calculation).
4. Basics of Aerial Photograph: Basics geometry of aerial photograph, determination of scale and height, Distortions, Image parallax, Relief displacement.
5. Stereoscopy and Aerial Photo Interpretation: Stereoscopy, Pseudoscopy, Mirror Stereoscope, mosaic, edge information, mapping of Physical and Cultural features with the Air photo interpretation keys: shape, size, pattern, tone, texture, shadow, site and associations.

GEO 296.2: COMPUTER BASICS AND APPLICATIONS

Course Outcome:

The course is designed to get a comprehensive knowledge of fundamentals of computer application. It also includes the exercise from Microsoft excel and SPSS regarding the basic statistical computation. The course, therefore, lay the foundation for software-based computing skills. Upon completion, the students get adequate level of skills to do statistical analysis.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Computer components: Hardware and software: CPU, Input and Output devices; Common computer languages, System Software, Application Software and Operating Systems.
2. Representation of data; Numbering Systems; Binary Arithmetic; Basic Logic Gates; Boolean Logic and Reduction Techniques.
3. Computation, Storing and Formatting Spreadsheets: Computation of Rank, Mean, Median, Mode, Standard Deviation, Moving Averages, Sample Variation; Derivation of Correlation, Covariance and regression; Selection of technique and interpretation using MS-Excel and SPSS Environment.
4. Regression, correlation, curve fitting, multivariate analysis.
5. Internet Surfing- generations of data and extraction of information for power-point presentation, Manipulation and editing of graphic files.

Semester- III (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER - GEO-301: APPROACHES TO REGIONAL DEVELOPMENT

Full Marks: 50 Credit: 4

GEO 301.1: REGIONAL APPROACH IN GEOGRAPHY

Course Outcome:

This course is focused on the fundamental concepts of regional geography including the classical approach to define an area as region. It includes the methods of regional delineation and classification of region based on their properties. On completion of this course, the pupils get a comprehensive understanding of the regional analysis. They will also learn about the concept of planning region and their delineation methods and this understanding may help them to assist in various planning process.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Regional concept in geography: concept, typology, hierarchy, methods of regional delineation and regional system.
2. Contribution of Ratzel, Hartshorne, Hettner and Vidal de la Blache to the development of regional concept. The character of regional geography, Space: the fundamental stuff of geography.
3. Formal regions: Natural, Agro-climatic, socio-cultural regions with special reference to India.
4. Functional region: City region, industrial region with special reference to India.
5. Planning regions in India: Conceptual framework, Purpose, types and methods of delineating planning region.

GEO 301.2: RURAL DEVELOPMENT

Course Outcome:

The focus of the course is to develop an idea about the approach to understanding the rural development. It includes the status report of the rural development in India on various accounts, i.e. agriculture, health, education, rural employment, infrastructure and rural electrification. The role of micro finance is also included to give students an understanding of the rural economic development. The students get an inclusive understanding of the rural development and its dynamics upon completion of this course.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4***

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University

marks *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concept and approach to rural development, Indicators of Development & Rural Development and their measurements.
2. Rural Economics: Agriculture Development and Land Reforms in India.
3. Rural Micro-finance, self-help group and women empowerment.
4. Rural Industries and entrepreneurship: Definition and meaning of rural industries. Relevance of rural industries in solving socio-economic problems with special reference to Food Processing and Tourism.
5. Rural Development Programmes: poverty alleviation schemes- National Rural Employment Guarantee Act, Jawahar Rozgar Yojana, Sampoorna Grameen Rozgar Yojana, Provisions of Urban Amenities in Rural Area (PURA); Infrastructural development programmes- Indira Avas Yojana; Transport Development: Pradhan Mantri Gram Sadak Yojana.

PAPER - GEO- 302: SETTLEMENT AND TRANSPORT GEOGRAPHY

Full Marks: 50 Credit: 4

GEO 302.1: SETTLEMENT GEOGRAPHY

Course Outcome:

The primary aim of studying settlement geography is to acquaint with the spatial and structural characteristics of human settlements under varied environmental conditions. The paper deals with multi disciplinary perspectives on the formation, evolution of human settlement. The paper will help the students to make an understanding on the reasons people settle in certain locations and the geographical features lead to the development of civilizations. The Nature and Scope of Settlement Geography, Characteristics of Rural and Urban Settlements according to Indian Census and nature, scope, evolution and several study methods. The settlement types, pattern and nature and process of urban settlement ,different cultural landscapes.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Concept of shelter; Dwelling places as cultural expression.
2. Census categories of settlements; Types, building materials and architectural design of houses- dependence on climate.
3. Site, situation and spacing of settlements- dependence on terrain characteristics and water availability.
4. Concepts and components of rural and urban morphology.
5. Socio-economic segregation of rural settlements. Cities as melting pot of culture.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

GEO 302.2: TRANSPORT GEOGRAPHY

Course Outcome:

Students will learn about the role of transport in entire economic and social processes. This course aims to make students understand the locational advantage of different economic and social institutes based on transport principle. They are made aware of the role of public transport in addressing the problems of congestion and air pollution. This understanding may help them in formulating plan for regional development and economic regeneration by proper transport planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Concept of distance, Transportation and space, space-time relation through transportation, Transport network analysis, Centrality, Accessibility, Connectivity and Rationality. Transport Models (Gravity Models, Allocation Model, Linear Programming Model, Traffic Congestion Model).
2. Transport cost, Principles of transport cost fixation, comparative cost advantage.
3. Planning for public transport, desired characteristics, modes and optimal pricing, services, ownership and regulation.
4. Transport Policy: Problem oriented planning, and objective-led approach; Infrastructure, Management, Information, Pricing and landuse components; National transport policy (national highways, railways and waterways).
5. Communication Technology- roles in reducing transport demand.

PAPER – GEO 303: SPECIAL PAPERS Full Marks: 50 Credit: 4

303A: ADVANCED GEOMORPHOLOGY

GEO 303A.1: PROCESS GEOMORPHOLOGY-1

Course Outcome:

Students will learn about the mechanism and working principle of geomorphic processes in details that lead to shape present earth-surface. This understanding may help in formulating engineering plan for management of land, water and soil, three basic resources on earth surface. They will also have a clear insight into the process and forms on the surface of Moon and Mars

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Geomorphic Thresholds: Reynold Number, Froude Number, Critical shear Stress and Shield Diagram, Slope stability thresholds.
2. Weathering Process and Soils with special reference to laterisation; Development of badland topography.
3. Slope forms and Processes: Mass Movement, Slope Morphology and Evolution.
4. Fluvial Processes: Drainage network development; Channel Morphology in alluvial and bedrock channels, Open channel flow, Sediment Transport, Fluvial response to changing conditions with special reference to channel patterns. Development of fluvial landforms.
5. Planetary geomorphic processes and landforms: Moon and Mars.

GEO 303A.2: PROCESS GEOMORPHOLOGY-2

Course Outcome:

Students will learn about the mechanism and working principle of geomorphic processes in details that are operating since historical time to shape present earth-surface. This course aims to build an understanding role of humans in shaping earth surface and regulating natural processes and their outcome on natural systems. Learners may take part in sustainable resource management.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Long term landform evolution with special reference to planation development
2. Quaternary Environmental Change and Landform Development with special reference to glaciations and sea level change.
3. Glacial and Periglacial processes and landforms.
4. Anthropogeomorphology: Man as active geomorphic agent. Landuse change and its geomorphic implications.
5. Identification of Geomorphosites with special reference to India.

303B: COASTAL MANAGEMENT

GEO 303B.1: COASTAL PROCESSES

Course Outcome:

The learners will understand the systematic interactions among terrestrial atmospheric and marine processes along the coast as a systematic whole. They will learn the dynamic and functional interrelationship between forms and processes in a coastal region and their dynamic equilibrium.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Definition of coastal zone, relevance of coastal study, classification of coast - Beach stage model.
2. Wave hydrodynamics; wave modification near coast with special reference to attenuation, breaker types, energy dissipation during breaking wave.
3. Tide; diurnal and semi-diurnal, rotating and progressive tide, concept of live storage, tidal environment with special reference to estuary.
4. Coastal current; intensity of long shore component and its implications, cell circulation.
5. Macro land forms with special reference to beaches and dunes; micro and biogenic forms.

GEO 303B.2: COASTAL ENVIRONMENTS: FOCUS ON INDIAN REGIONS

Course Outcome:

Students will get knowledge about long term and short-term development of landforms by several processes in some of the coastal regions in India and form process relationships in different spatial and temporal scales. They will understand the problems of coastal erosion and other hazards in the context of global climatic change.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Tide dominated coastal environment: (Estuaries of India, estuary morphology, estuary hydrolodynamics); wave dominated coastal environments: (The shore face, beaches, barriers and human activity)- Indian experiences.
2. Morphodynamic behavior of coastal systems (Modification of coastal features in temporal and spatial scales with feedback mechanisms).
3. Carbonate platforms and beach rocks (Andaman and Nicobar Islands).
4. Coastal erosion problems (West Bengal, Orissa coasts), land reclamations and associated problems (Sundarban coastal tract).
5. Techniques for assessing coastal hazards areas (Hazard zonation along the coasts).

303C: URBAN GEOGRAPHY AND REGIONAL PLANNING

GEO 303C.1: FOUNDATION OF URBAN GEOGRAPHY

Course Outcome:

This paper will provide knowledge on spatial analysis of functions of urban areas. Social and economic characteristics of cities and suburbs will be discussed under this paper. Urban land use and its impact on environment and ecology will be addressed. This paper will introduce students to the basics of urban geography, such as definition of cities, central place theory, National urban systems, and traditional models of urban spatial structure. More importantly, students will be exposed to contemporary urban topics such as global cities, urban sprawling, urban green space, urban ecology and footprints etc. Emphasis will be placed on the urban experience of developing countries, especially India. The students will be able to assemble knowledge of urbanism and urbanization as historic, geographic, social, and cultural processes, historical development, contemporary condition, and environmental impact of cities and urban related issues growing from exposure to the disciplines of Geography and Planning

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Development of urban geography: Definition of Towns, cities and metropolitan area. Trends of Urbanisation in the World and India.
2. Concept and definitions of urban system: Urban, urbanization, urbanism and urban ecology, National urban system, National urbanisation policy.
3. Today's cities and suburbs: suburban sprawl, smart growth, exurbs, the new cities and gated communities, gentrification, green city, Urban Livability Index.
4. Origin and growth of urban living: bases and processes, Historical perspectives on world urbanization
5. Urban planning, policies and regeneration: Architectural vision, European, Anglo American tradition and planning the social city, the new towns movement, toward planning for sustainable urban development.

GEO 303C.2: CONTEMPORARY URBAN ISSUES

Course Outcome:

Student will understand through this module various socio-economic and environmental problems with the growing urbanisation in our country as well as various parts of the world. This knowledge will help them to surmise the necessity of urban planning and they will be able to evaluate the effectiveness of various govt programmes for urban planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Changing spatial and temporal scenario of metropolitan development in India.
2. The economy of urban areas: structure of urban economy-basic and non-basic activities.
3. Social environment of the city: Social stratification, social class diversity, suburban social class, poverty, strangers, crowding, crime and homelessness.
4. Urban environment problems: Heat island, drainage, sewerage, sanitation, solid waste, transport, pollution and health, the city's ecological footprint.
5. Urban renewal and Urban redevelopment in India: Role of JNNURM, Smart city, AMRUT and Housing for All by 2022.

303D: REMOTE SENSING AND GEOGRAPHIC INFORMATION SYSTEM

GEO 303D.1: PHYSICAL BASIS OF REMOTE SENSING

Course Outcome:

The course is designed to give fundamental and some advanced knowledge of space based remote sensing and aerial photography. From orbital parameters of satellite to complexity of aerial camera and film in association with the flight parameters, all of these will allow students to get an in-depth understanding of remote sensing and aerial photographic system.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Physics of Remote Sensing: Source of Energy, Electro Magnetic Radiation (EMR), Radiation laws (wavelength-frequency-energy relationship of EMR), influence of atmosphere on Remote Sensing operation.
2. Fundamental of Thermal Remote Sensing: Radiant temperature, Kinetic temperature, Black body and real body radiation.
3. Satellite orbits and Trajectories: Principles of satellite movements, orbits and trajectory, orbiting satellites-basic principles, orbital parameters, types of satellites.
4. Satellite Platforms and Sensors: Types of platform for civilian applications, advantages, disadvantages and characteristics of various satellite platforms. Physical principles and characteristics of various satellites sensor, sensor selection parameters, resolution.
5. Remote Sensing Data: Data acquisition and reception, Data products, storage and Dissemination.

GEO 303D.2: PHOTOGRAMMETRY, AERIAL PHOTO AND SATELLITE SYSTEM

Course Outcome:

The course is designed to give fundamental and some advanced knowledge of space based remote sensing and aerial photography. From orbital parameters of satellite to complexity of aerial camera and film in association with the flight parameters, all of these will allow students to get an in-depth understanding of remote sensing and aerial photographic system.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Basics of Aerial Photograph: Types of aerial photographs, Geometry of single Aerial Photograph, Photographic overlap, flight planning, Scale, Lens Distortions, Relief distortions and Tilt distortions. Image displacement and parallax.
2. Aerial Photographic Film: Film density and Characteristics Curve, Colour Infrared Films, Film resolution, Filters.
3. Photogrammetry: Development of Photogrammetry, Classification, processes and Limitations of photogrammetry.
4. Stereo photogrammetry: Conditions for Stereo vision, stereoscopic measurements, Sterescopic 3D viewing, Image parallax, Rectification, Orthorectification.
5. Satellite Systems: Whiskbroom system, Pushbroom system, Microwave system, coarse resolution, fine resolution and very fine resolution system.

ELECTIVE PAPER

PAPER - C-GEO 304: Environmental Issues and Management

Full Marks: 50 Credit: 4

C-GEO 304.1: Emerging Issues and Policies on Environment

Course Outcome:

Students will develop their interest in various aspects of environment and contemporary environmental issues. Students will develop their deep understanding in the nature of increasing intensity and magnitude of various hazards in connection to global pattern of economic disparity, social discrimination and climate change.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Global climate change, water scarcity and politics of water.
2. Environmental degradation and pollution.
3. Environment and development: Debate and Issues.
4. Social and Cultural Hazards.
5. Globalization and Environment.

C-GEO 304.2: Environmental Hazards and Disaster Management

Course Outcome:

Students will foster their skill in managing various types of natural hazards by analysing their risk and vulnerability. They will be trained in the procedures of hazard management through proactive approach by increasing the resilience of the community in tune with national policy of hazard management and international laws.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Concepts and techniques for analysis of risk, hazard, disaster, vulnerabilities and resilience.
2. Cyclone and storm surges, thunderstorms and lighting, earthquake, tsunami wave and landslide hazards.
3. Natural hazard and disaster management in India, Agricultural drought hazard and the national experience.
4. International Disaster Response Laws Rules (IDRL).
5. National policy and appraisal of hazard

PRACTICAL COURSES (100 Marks)

PAPER – GEO 395: GIS APPLICATION IN RESEARCH

Full Marks: 50 Credit: 4

GEO 395. 1: APPLICATIONS OF REMOTE SENSING &GEOGRAPHIC INFORMATION SYSTEM

Course Outcome:

The course is designed for the general ideas of GIS and image-based information. Upon completion of this course, students get benefit from these baseline concepts to further increase their knowledge.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Geo-referencing of maps and satellite images.
2. Preparation of different types of FCC. Image enhancement, Band rationing, Density slicing..
3. Supervised and Unsupervised Classification Techniques, generation of signature statistics and signature reparability reports. Generation of NDVI.
4. GIS: RS, GIS and GNSS.
5. Map layers: Overlay analysis, buffering and map composition

GEO 395.2: RESEARCH METHODOLOGY

Course Outcome:

The learners will get the initial training on various steps involved in geographical research. They will develop the idea on fundamentals of research methodology including data collection, methodology and report writing. This course aims to develop fundamental research aptitude among all the students.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Research ethics and paradigm shift of research methodology in Geography.
2. Need for research, basic research types.
3. Identification of research problems, development of theoretical background- literature review, research gap and research question and specification of the objectives of study; hypothesis building, Framework of research writing.
4. Methods of data collection- primary and secondary; Preparation of questionnaire and survey schedule and their differences, research ethics.
5. Methods of writing notes, style of referencing, bibliography and appendices, abstract and synopsis writing.

PAPER – GEO 396: SPECIAL PAPER BASED FIELD WORK

Full Marks: 50 Credit: 4

Course Outcome:

This course aims to present the essence of geography as a field science. Students will develop their aptitude in observation, data generation through field survey, data analysis with various software and advanced techniques. They will also know how to represent spatial data through various cartographic techniques and mapping. A hands on practical training is practiced through rigorous involvement in all the stages of pre-field, field and post field works.

396A: Advanced Geomorphology

GEO 396A.1: FIELD WORK

Field works in Advanced Geomorphology

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

GEO 396A.2: FIELD REPORT
Presentation of research work-25 (Grand Viva-10 and/or Power Point presentation-15)

Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47.

396B: Coastal Management

GEO 396B.1: FIELD WORK

Field works in Deltaic/ Non-deltaic or Rocky Coastal Environments

1. Studies on the shore profile forms and channel cross sections using echo-sounder and current meter. Littoral environment observation with special reference hydrological parameters: Waves, tides, winds and currents.
2. Coastal sediment budget analysis.
3. Analysis of population pressure on the coastal zones.
4. Analysis of coastal ecosystem diversity using remote sensing.
5. Hazard mapping and community vulnerability mapping Mapping CRZ violation areas using GPS handset, Nearshore geomorphological mapping with conventional surveying equipments or with Total Station. Mapping of the forms of coastline changes

GEO 396B.2: FIELD REPORT
Presentation of research work-25 (Grand Viva-10 and/or Power Point presentation-15)

Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47.

396C: Urban Geography and Regional Planning

GEO 396C.1: FIELD WORKS

Evaluation will be done on Participation of the candidate in field work- 10; Report making- 15;

Field works on focused urban issue(s) in an urban area e.g. Small town/ Big city/ Few wards of a Big City

1. Wardwise landuse/land cover survey using high resolution Remote Sensing data. Wardwise distribution of population and its change over time.
2. Survey of spatial distribution of urban facilities (Bank, School, College, Offices, Hospitals etc.), urban transport: Nodes, Network and flow: Collection of database (Primary and Secondary), Water supply system: waste collection and disposal system.
3. Study of Urban sprawling, renewal, economics, environmental problems etc.: Collection of database (Primary and Secondary).

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

4. Income/Social grouping, Ethnic groups Education; Occupation; Age-sex Composition etc.
5. Enquiries on future prospects and planning strategies

GEO 396C.2: FIELD REPORT
Presentation of research work-25 (Grand Viva-10 and/or Power Point presentation-15)

Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47

396D: Remote Sensing and Geographic Information System

GEO 396D.1: Field Works
Evaluation will be done on Participation of the candidate in field work- 10; Report making- 15;
Field works for ground truth verification in a selected field area

1. Remote Sensing in Earth Sciences: Geomorphic Mapping; Visual interpretation of landforms; Basic Concepts, Recognition elements, interpretation of drainage pattern, erosion and deposition landforms.
2. Remote Sensing in Agricultural Applications: Soil Mapping, Crop Mapping/ Crop stress determination. Forest Management-Forest density mapping, Forest type mapping.
3. Remote Sensing in Land and Water Management: Landuse/ Land cover Planning, Land resource management; Water Resources: Surface water-ground water, water deciphering, quality inventory and monitoring, quality assessment; Watershed Management: Morphometric Analysis, Hydro-morphogeologic interpretation techniques for targeting ground water potential zones in alluvial, sedimentary and hard rock areas; flood assessment and watershed management.
4. Remote Sensing in Urban and Rural Development: Mapping of human habitation and type.
5. Remote Sensing in Coastal Management: Coastal Landuse, Spatial and temporal changes, SST, Phytoplankton assessment, Sediment assessment.

GEO 396D.2: FIELD REPORT
Presentation of research work-25 (Grand Viva-10 and/or Power Point presentation-15)

Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47.

Semester- IV (300 Marks)

THEORETICAL COURSES (200 Marks)

PAPER – GEO 401: GEOGRAPHICAL PHILOSOPHY

Full Marks: 50 Credit: 4

GEO 401.1: SCHOOLS IN GEOGRAPHICAL THOUGHT

Course Outcome:

The course incorporated the fundamental concepts of geographical thought. It includes the premier concepts of geography at the time of its emergence to the past century (20th century). Upon completion of this course, the students would have a comprehensive idea of the fundamental nature of Geography and how it evolves with time.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. The Field of Geography, Place of Geography in classification of knowledge and other disciplines, Geography as a social science, Physical and Human Geography. Linkages among the sub-disciplines of physical and human geography.
2. Development of Geography in 19th Century: Contribution of German, French, British and American schools of thought.
3. Conceptual and methodological development in 20th Century: changing paradigms, evolution of man-nature relation.
4. Typology of models and uses: structure component and characters.
5. Dualism and dichotomies in Geography: Determinism and Possibilism, Systematic and Regional, Aerial differentiation and Spatial organization.

GEO 401.2: CONTEMPORARY DISCOURSES IN GEOGRAPHY

Course Outcome:

Students will learn about the philosophical background that guides the approaches and ways of thinking to design teaching-learning and research under different discourses of Geography. It aims to achieve a clear insight into theoretical foundation of the subject that is articulated among different courses and guides to design objectives and methodological framework of geographical enquiry. This understanding helps the learners to locate themselves in the wide and dynamic philosophical domain of the discipline and help them to concentrate towards developing geography as a science of holistic synthesis.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4***

marks *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Pragmatism, Positivism and Quantitative revolution in geography
2. Development of critical social theories: Humanistic geography, Behaviouralism, Radicalism, Welfare geography, Feminist geography
3. Structuralism and Post-structuralism, Modernism and Postmodernism.
4. Concept of space: absolute, relative, material and social space, concept of 3rd space in geography, temporal geography, time-space prism
5. Recent trends in geography.

PAPER - GEO 402: POLITICAL GEOGRAPHY AND GLOBALIZATON

Full Marks: 50 Credit: 4

GEO 402.1: POLITICAL GEOGRAPHY

Course Outcome:

Students will develop their understanding on politics of space and spatial patterns of political and economic power distribution. This course will enable the of Government in India based on the principle of regional disparities in India. They will also know about the nature of conflict at national and global level centered on water and power resources. They will develop their interest in analyzing factors and local as well as global implications of economic and political agglomerations in the form of economic and political blocs.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
Pattern of setting questions: ***Group- A*** *(Long Answer Type): Two questions, each of* ***8 marks*** *(without division), will be set for answering any one.* ***Group- B*** *(Semi-long Answer Type): Four questions, each of* ***4 marks*** *(without division), will be set for answering any two.* ***Group- C*** *(Short Answer Type): Four questions, each of* ***2 marks*** *(without division), will be set for answering any two.*

1. Politics and Geography: Politics of Space, Scope of electoral geography, Global strategic views- Heartland and Rimland theories and their significance in present international politics.
2. Geopolitical significance of core-periphery theory; Nationalism and Regionalism.
3. Geography and federalism; Reorganization of Indian states since independence, Partition of India and its consequences
4. International and interstate water disputes in India.
5. Political and economic blocs; Geopolitics in the context of globalization, colonialism and post colonialism.

GEO 402.2: GEOGRAPHY OF GLOBALIZATION

Course Outcome:

Course objectives and expected outcome: This course is focused on the fundamental concepts of globalization and its overall impacts on agriculture, industry, trade and culture. It also focused on the issues and challenges of globalization faced by the

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

countries across the world. The students get a leading idea about the globalization and its consequences upon completion of this course.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Transformed Geography: Concept of Liberalization, Privatization and Globalization (LPG), beginning of the globalization, globalization to glocalilisation.
2. Globalization and Economic Geography: Impact of globalization on agriculture, industry and trade.
3. World economic order: Economic booms and crisis.
4. Globalization and cultural changes: Globalization and cultural transformations.
5. Future of globalization and global challenges: Issues and recent trends.

PAPER – GEO 403: SOCIETY AND REGIONAL PLANNING

Full Marks: 50 Credit: 4

GEO 403.1: SOCIAL AND CULTURAL GEOGRAPHY

Course Outcome:

The paper is based on the nature, scope and content of social and cultural Geography. The paper will examine the role of social divisions such as class, 'race'/ethnicity, gender and sexuality in shaping the social geographies of regions. Emphasis is given on cross-disciplinary, critical engagement with current events. On completion of the course, students are able to Understand the nature, scope, and concept, relationship between culture and social environment, and right of information act, the cultural complex and traits of culture and its concepts, evolution to civilization and cultural system according to religion, language and geography, and global cultural changes.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Nature, scope and content of social Geography; Ethnicity, tribe, dialect, language, caste and religion.
2. Social structure and processes, social exclusion, geographies of social well-being with special reference to India.
3. Cultural Geography: Definition, scope and nature. Race, religion, language as cultural attributes with special reference to India, North-South, social -cultural divide.
4. World cultural Realms, Morphology of cultural landscape (Carl O Sauer) and cultural diversity. Cities as melting pot of culture. Traditional folk culture- crisis and transformation

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

5. Cultural processes: Diffusion, acculturation, assimilation and cultural pluralism

GEO 403.2: REGIONAL PLANNING

Course Outcome:

The learners will be able to know the process of planning in India, its role and various strategy for the development of our country. The students will understand how they can participate in the planning and development of the nation. This knowledge is very effective for the government also for smooth conduction of the development planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Concept of planning: Levels of planning: Types of planning
2. Basic principles and methodology of regional planning
3. Regional planning strategies: Centralized, decentralized and multilevel planning for rural and urban areas, people's participation in planning- Panchayati Raj Institution.
4. Regional disparities: Concept, Types; Demographic, social and economic disparities in India.
5. Planning of problem regions: Tribal, coastal, drought prone area, flood prone area.

PAPER – GEO 404: SPECIAL PAPERS

Full Marks: 50 Credit: 4

404A: ADVANCED GEOMORPHOLOGY

GEO 404A.1: ADVANCED GEOMORPHIC TECHNIQUES

Course Outcome:

Students will learn about the empirical methods to estimate various geomorphic attributes by using field instruments or through models run by sophisticated software. This will offer them training on data generation, computation and analysis. This course aims to enable learners deal with real world problems using advanced technology recently available to the department from DST-FIST programme, Department of Science and Technology, Govt. of India.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Modeling concepts and approaches in geomorphology; Data sources and Freeware models; Dating procedures and uses.
2. Estimating flow velocities, discharge and stage.; Estimation of stream hydraulic parameters (Critical flow, Froude number, Reynolds number). Inundation estimates.
3. Manning equation: Required data, data measurements, and limitations; Tractive force and stream power estimation.
4. Sediment transport and sediment discharge estimates: Bed load and suspended load
5. Watershed delineation, preparation of DEM; micro-landscape analysis (landscape unit map) using GIS (Case study on a badland area)

GEO 404A.2: APPLIED GEOMORPHOLOGY

Course Outcome:

Students will learn how to apply theoretical knowledge of geomorphology in wide range of engineering and management problems ranging from drainage basin management to hazard management. They are trained to apply geomorphic understanding on water management, landuse planning, sewage and solid waste management. They are also trained on their contribution in EIA and EMP. This course aims in revival of the applied value of the discipline.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Applied Geomorphology in River Basin Management (Case study on Shilabati/ Kangsabati/ Subarnarekha Basin)
2. Applied Geomorphology in Hazard Management: Flood, Coastal and River Bank Erosion, Soil Piping, Soil Erosion (Case study on Shilaboti flood/ Old Digha Erosion/ Bhagirathi erosion, Western Ghat)
3. Geomorphology in dam site selection and impact assessment: (Case Study on Farakka)
4. Geomorphology in urban management: Landuse planning, Sewage treatment, Storm-water management, Ground water recharge and discharge (Case study on Kolkata)
5. Geomorphology in EIA and EMP (Case study on Nayachar/ Singur/Salboni)

404B: COASTAL MANAGEMENT

GEO 404B.1: COASTAL ECOLOGY AND HAZARDS

Course Outcome:

Students will understand the ecological importance of coast as an important habitat between terrestrial and marine system. They will also develop their deep insight into the significance and techniques of coastal study in the context of increasing hazards forced

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

by global climatic change. They will be exposed to the information on the future scope of coastal studies in India.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Study and management of- Sea weeds; seaweed ecosystem, artificial seaweeds.
2. Dune vegetation: Dune initiating and dune building types, adaptation and reproduction, plant-animal interaction in sand dune. Mangroves: physical environment and ecology.
3. Coastal hazards and their management: Sea level change- long and short term changes, regional and global effects on shore; Coastal erosion- causes and effects; Storm hazard- role in sediment transfer, effects on open and estuarine coast, management of storm hazard.
4. Techniques of monitoring coastal processes and land forms.
5. Coastal studies in India: Monitoring and research.

GEO 404B.2: COASTAL ISSUES AND MANAGEMENT

Course Outcome:

Students will understand about the complexities of emerging coastal issues and their better management techniques. They will get employment opportunities as research scientist in the various institutes like INCOIS, MOEF, DST, NIO, NCSCM, Dept. of Earth Sciences and TOURISIM Department etc.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Coral bleaching: Impact of Global warming, coastal eutrophication and habitat conservation (Coastal lagoons, other coastal wetlands)
2. Coastal tourism and environment conflicts (Beaches and barrier coasts, mangrove dominated coasts, coral coasts, environmental regulations).
3. Application of remote sensing and GIS techniques in coastal management (Geomorphological mapping, coastal cell circulation systems, environmental zoning approach, identification and diversity of coastal habitats)
4. Managing coastal change: Assessment of coastal vulnerability, ecosystem valuation of coast, integrated coastal zone management, coastal regulations); Coastal engineering: Developments in hard structure designs, developments in soft structure designs, new dredging techniques and procedures.
5. Coastal urbanization and population pressures, Coastal resource management.

404C: URBAN GEOGRAPHY AND REGIONAL PLANNING

GEO 404C.1: THEORETICAL BASES OF REGIONAL PLANNING

Course Outcome:

This paper will provide knowledge on spatial analysis of functions of urban areas. Social and economic characteristics of cities and suburbs will be discussed under this paper. Urban land use and its impact on environment and ecology will be addressed. This paper will introduce students to the basics of urban geography, such as definition of cities, central place theory, National urban systems, and traditional models of urban spatial structure. More importantly, students will be exposed to contemporary urban topics such as global cities, urban sprawling, urban green space, urban ecology and footprints etc. Emphasis will be placed on the urban experience of developing countries, especially India.The students will be able to assemble knowledge of urbanism and urbanization as historic, geographic, social, and cultural processes, historical development, contemporary condition, and environmental impact of cities and urban related issues growing from exposure to the disciplines of Geography and Planning

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. History of regional planning in India, theories of regional planning. Concept of balanced and unbalanced growth
2. Regional development perspectives: Colonial period (Dependency theories- Friedman, Andre Gander Frank, David Slater)
3. Growth Pole theories and the developing world by Perroux, Myrdal, Hirschman, and Boudiville.
4. Agropolitan Development, Basic need approach (E.A.J Johnson, Dennis Rondinelli-USAID)
5. Regional Environmental issues in Purba and Paschim Medinipur Districts- Flood, Drought, coastal erosion, Salinization, Deprivation and related social conflicts, conflict in forest society interface.

GEO 404C.2: PLANNING FOR URBAN DEVELOPMENT

Course Outcome:

Students will understand the urban planning process in various issues like sanitation, transport, housing, water supply etc and various policies of the govt. The knowledge about the remote sensing and GIS is also important for urban planning. The students will be able to participate in various works relating to urban planning.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

1. Concept of developed and underdeveloped economy, Intra- and Inter-regional planning. Policies of Urban planning and development.
2. Urban infrastructure planning: Sanitation and Water supply systems, Waste Water disposal systems, Solid waste collection and disposal.
3. Urban traffic and transportation planning.
4. Planning for Urban housing: concepts of land use and land valuation, Needs and types of housing; Housing Policy and programmes in India; Real estate development.
5. Application of Remote Sensing and GIS in urban planning and management.

404D: REMOTE SENSING AND GEOGRAPHIC INFORMATION SYSTEM

GEO 404D.1: ADVANCED REMOTE SENSING

Course Outcome:

This core content of this course is focused on some advanced ideas of microwave and hyperspectral remote sensing including image-based statistics for digital image processing. The course is also focused on some of the advanced ideas of GIS including remote sensing and GIS integration. It includes the application of GIS and remote sensing in various purposes. Upon completion of this course, students would be benefited from these advanced level of applications, and allow them to pursue their future career in GI Science.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Thermal Remote Sensing: Concept, Sensors and Utility.
2. Microwave Remote Sensing:Concept, Comparison with optical system, advantages and disadvantages, spatial resolution, Real and Synthetic Aperture Radar, Passive Microwave Remote Sensing, Lidar.
3. Hyperspectral Remote Sensing: Concept, Sensors and utility.
4. Visual Image Processing& Digital image interpretation: Elements of Visual image interpretation, generation of thematic maps, information extraction.
5. Digital Image Processing: Pre-processing, Image Registration, Image geometric operations, Enhancement, Spatial filtering, Transformation, classification, data compression, spectral pattern recognition, output generation.

GEO 404D.2: ADVANCED GIS AND APPLICATIONS OF REMOTE SENSING

Course Outcome:

This core content of this course is focused on some advanced ideas of microwave and hyperspectral remote sensing including image-based statistics for digital image processing. The course is also focused on some of the advanced ideas of GIS including remote sensing and GIS integration. It includes the application of GIS and remote sensing

in various purposes. Upon completion of this course, students would be benefited from these advanced levels of applications allow them to pursue their future career in GI Science.

Full Marks- 25 (End term Examination- 20 and Internal Assessment- 5)
*Pattern of setting questions: **Group- A** (Long Answer Type): Two questions, each of **8 marks** (without division), will be set for answering any one. **Group- B** (Semi-long Answer Type): Four questions, each of **4 marks** (without division), will be set for answering any two. **Group- C** (Short Answer Type): Four questions, each of **2 marks** (without division), will be set for answering any two.*

1. Advanced GIS: Spatial data model, Data entry, data analysis, Data models. Data sources, Data captures, attribute data management and Meta data concept.
2. Data Infrastructure: Spatial Data Infrastructure: NSDI.
3. Modern trend in GIS: Local to Global concept in GIS, Integration of GIS and Multimedia, 3D GIS and Web GIS, Real time GIS, Mobile GIS, Collaborative GIS, concept and application of GPS and GNSS.
4. Integration of Remote sensing and GIS: Concept and importance of Remote Sensing and GIS integration in Geographical studies.
5. Applications of Remote Sensing and GIS: Landuse/land covers mapping, soil and agricultural mapping, geomorphological mapping, watershed mapping.

PRACTICAL COURSES (100 Marks)

PAPER – GEO 495: GEODESY AND GIS

Full Marks: 50 Credit: 4

Course Outcome:

The course is designed for providing the fundamental ideas of Geodesy and map projection. It includes some advance projective transformation from 3D to 2D surface. The course also includes the fundamentals of GI science and its application. The students get an exposure to the theoretical and practical understanding upon completion of this course.

GEO 495.1: MAP TRANSFORMATION AND GEODESY

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Map transformation: Scale factor; distortion types; systems of map projections; principles of choosing map projection; importance of map projection in GIS.
2. Principle, construction, properties and uses of following map projections:

   a) Conformal Projections- Mercator's Projection; Transverse Mercator Projection and Lambert's Conformal Conic (LCC) Projection.
3. Principle, construction, properties and uses of following map projections

   b) Equal Area Projection- Mollweide's Projection.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

c) Conical Projection- Simple Conical Projection with Two Standard Parallels.

4. Geodesy: Scope and application; concept of Geoid, reference ellipsoid and spheroid- WGS 84, Everest Spheroid.
5. Coordinate Systems: Cartesian, Rectangular, Spherical, Curvilinear, Spherical, UTM Grid System.

GEO 495. 2: GEOGRAPHIC INFORMATION SYSTEM

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Basic Concepts and components in GIS: An overview of the development of the GIS fields, Data Sources; Data acquisition methods
2. Data structure: Vector and Raster data structures, data storage.
3. Modern trends in GIS: 3D GIS and Web GIS, Real time GIS, Mobile GIS and application of GIS
4. Basics of GPS Surveying: Conceptual Framework, Space Segment, Ground Segment, Control Segment, Satellite Triangulation, Pseudo Random Code. DGPS and GNSS
5. GPS-aided traversing; Manual and Computer plotting for preparation of maps.

PAPER - GEO 496: SPATIAL ANALYSIS AND PROTOTYPE RESEARCH

Full Marks: 50 Credit: 4

GEO 496. 1: SPATIAL ANALYSIS IN GEOGRAPHY

Course Outcome:

The focus of this course is to give a comprehensive understanding of the spatial organization through mathematical and statistical analysis. Upon completion of this course, the students get an inclusive knowledge and skills to perform spatial analysis at different spatial scale.

Full Marks- 25
*Pattern of Setting Questions: **Three** compulsory questions bearing marks **7, 7 and 6** respectively, will be set covering the whole unit. **5** marks will be allotted for Laboratory Note Book and Viva-voce.*

1. Transport network analysis: Centrality Indices, Shortest path analysis(Transport and allocation problems), Detour and spread.
2. Distance Matrix (Aggregate Travel Distance).
3. Point spatial distribution analysis: Uniformity, randomness and compactness.
4. Analysis of Directional Data; Rose diagram, Dominant Direction, Mean direction.
5. Analysis of Shape: Measures based on axial ratios, perimeters to areas, areas to axial length.

GEO 496. 2: RESEARCH EXERCISE IN GEOGRAPHY

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 16:36:42; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/PG_Syllabus_CBCS_1819/POCO/Geography_Syllabus_POCO_2018_19.pdf

Full Marks- 25 (Evaluation of written report-10 and Viva-voce based on Power point presentation- 15)

Field work on a specific environmental issue and generation of report (within about 50 A4 size pages including 15-20 maps/diagrams/field photographs).

List of Core Course (CC)

CC-1: Geotectonics and Geomorphology
CC-2: Cartographic Techniques
CC-3: Human Geography
CC-4: Cartograms and Thematic Mapping
CC-5: Climatology
CC-6: Statistical Methods in Geography
CC-7: Geography of India
CC-8: Regional Planning and Development
CC-9: Economic Geography
CC-10: Environmental Geography
CC-11: Field Work and Research Methodology
CC-12: Remote Sensing and GIS
CC-13: Evolution of Geographical Thought
CC-14: Disaster Management

Discipline Specific Electives (DSE)

DSE-1: Hydrology and Oceanography
Or
DSE-1: Geography of Health and Wellbeing
Or
DSE-1: Cultural and Settlement Geography
DSE-2: Resource Geography
Or
DSE-2: Fluvial Geomorphology
Or
DSE-2: Social Geography
DSE-3: Population Geography
Or
DSE-3: Political Geography
Or
DSE-3: Soil and Biogeography
DSE-4: Agricultural Geography
Or
DSE-4:Urban Geography
Or
DSE-4: Project Work

Skill Enhancement Course (SEC)

SEC-1: Coastal Management
Or
SEC-1: Computer Basics and Computer Application
SEC-2: Research Methods
Or
SEC-2: Advanced Spatial Statistical Techniques

Generic Electives (GE)

GE- 1: Disaster Management

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Geography_Hons.pdf

GE- 2: Geospatial Technology
GE-3: Geography of Tourism
Or
GE3: Rural Development
GE-4: Regional Development
Or
GE-4: Sustainable Development
Or
GE-4: Climate Change: Vulnerability and Adaptations

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University

Core Course

CC-T: Geotectonics and Geomorphology **Credits 06**

C1T: Geotectonics and Geomorphology

Unit I: Geotectonics **2 Credits**

1. Earth's tectonic and structural evolution with reference to geological time scale
2. Earth's interior with special reference to seismology. Isostasy: Models of Airy and Pratt
3. Plate Tectonics: Processes at constructive, conservative, destructive margins and hotspots; resulting landforms
4. Folds and Faults—origin and types

Unit II: Geomorphology **4 Credits**

1. Degradational processes: Weathering, mass wasting and resultant landforms
2. Processes of entrainment, transportation and deposition by different geomorphic agents. Role of humans in landform development.
3. Development of river network and landforms on uniclinal and folded structures
4. Landforms on igneous rocks with special reference to Granite and Basalt
5. Karst landforms: Surface and sub-surface. Coastal processes and landforms.
6. Glacial and fluvio-glacial processes and landforms; fluvio-glacial landforms
7. Aeolian and fluvio-aeolian processes and landforms; fluvio-aeolian processes
8. Models on landscape evolution: Views of Davis, Penck, King and Hack

Reference Books

CC-2: Cartographic Techniques **Credits 06**

C2T: Cartographic Techniques **Credits 04**

1. Maps: Classification and types. Components of a map.
2. Concept and application of scales: Plain, comparative, diagonal and vernier
3. Coordinate systems: Polar and rectangular. Concept of geoid and spheroid
4. Concept of generating globe. Grids: angular and linear systems of measurement
5. Bearing: Magnetic and true, whole-circle and reduced.
6. Map projections: Classification, properties and uses. Concept and significance of UTM projection.
7. Basic concepts of surveying and survey equipment: Prismatic compass, dumpy level, theodolite, Abney level, clinometer.
8. Survey of India topographical maps: Reference scheme of old and open series. Information on the margin of maps

Reference Books

C2P : Cartographic Techniques Lab **Credits 02**

A Project File, comprising one exercise each is to be submitted

1. Graphical construction of scales: Plain, comparative, diagonal and vernier
2. Construction of projections: Polar Zenithal Stereographic, Simple conic with two standard parallels, Bonne's, Cylindrical Equal Area, and Mercator's.
3. Delineation of drainage basin from Survey of India topographical map. Construction and interpretation of relief profiles (superimposed, projected and composite), relative relief map, slope map (Wentworth), and stream ordering (Strahler) on a drainage basin.
4. Correlation between physical and cultural features from Survey of India topographical maps. using transect chart

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Geography_Hons.pdf

CC-3: Human Geography **Credits 06**

C3T:Human Geography

Unit I: Nature and Principles **2 Credits**

1. Nature and scope and recent trends. Elements of Human Geography
2. Approaches to the study of Human Geography; Resource, Locational, Landscape, Environmental
3. Evolution of humans. Concept of race and ethnicity
4. Space, society and cultural regions (language and religion)

Unit :II: Society, Demography and Ekistics **4 Credits**

1. Evolution of human societies: Hunting and food gathering, pastoral nomadism, subsistence farming, industrial and urban societies
2. Human adaptation to environment: Eskimo, Masai, Jarwa, Gaddi, Santhals.
3. Population growth and distribution, population composition; demographic transition model
4. Population–Resource regions (Ackerman)
5. Human population and environment with special reference to development–environment conflict
6. Social morphology and rural house types in India
7. Types and patterns of rural settlements
8. Types and patterns of urban settlements

CC-4 : Cartograms and Thematic Mapping **Credits 06**

C4 T : Cartograms and Thematic Mapping **Credits 04**

1. Concepts of rounding, scientific notation, logarithm and anti-logarithm, natural and log scales
2. Diagrammatic representation of data: Line, Bar, and Circle
3. Representation of point data: Isopleths.
4. Representation of area data: Dots, proportional circles and choropleth
5. Preparation and interpretation of large scale thematic maps: Geomorphological maps
6. Preparation and interpretation of large scale thematic maps: Climatological maps
7. Preparation and interpretation of large scale thematic maps: Landuse landcover maps
8. Preparation and interpretation of large scale thematic maps: Socio-economic maps

C4 P: Cartography (Lab) **Credits 02**

Cartography

A Project File, comprising one exercise each is to be submitted

1. Traverse survey using Prismatic Compass
2. Levelling by Dumpy Level and Prismatic Compass
3. Thematic maps: Proportional squares, pie diagrams with proportional circles, dots and spheres
4. Thematic maps: Choropleth, isoline map, chorochromatic map

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University

CC -5: Climatology **Credits 06**

C5T: Climatology

Unit I: Elements of the Atmosphere **2 Credits**

1. Nature, composition and layering of the atmosphere,
2. Isolation: controlling factors. Heat budget of the atmosphere.
3. Temperature: horizontal and vertical distribution. Inversion of temperature: types, causes and consequences.
4. Greenhouse effect and importance of ozone layer**.**

Unit II: Atmospheric Phenomena and Climatic Classification **4 Credits**

1. Condensation: Process and forms. Mechanism of precipitation: Bergeron-Findeisen theory, collision and coalescence. Forms of precipitation.
2. Air mass: Typology, origin, characteristics and modification.
3. Fronts: warm and cold; frontogenesis and frontolysis.
4. Weather: stability and instability; barotropic and baroclinic conditions.
5. Circulation in the atmosphere: Planetary winds, jet stream, index cycle
6. Tropical and mid-latitude cyclones
7. Monsoon circulation and mechanism with reference to India
8. Climatic classification after Köppen, Thornthwaite and Oliver

Suggested Readings:

- Barry R. G. and Carleton A. M., 2001: Synoptic and Dynamic Climatology, Routledge, UK.
- Barry R. G. and Corley R. J., 1998: Atmosphere, Weather and Climate, Routledge, New York.
- Critchfield H. J., 1987: General Climatology, Prentice-Hall of India, New Delhi
- Lutgens F. K., Tarbuck E. J. and Tasa D., 2009: The Atmosphere: An Introduction to Meteorology, Prentice-Hall, Englewood Cliffs, New Jersey.
- Oliver J. E. and Hidore J. J., 2002: Climatology: An Atmospheric Science, Pearson Education, New Delhi.
- Trewartha G. T. and Horne L. H., 1980: An Introduction to Climate, McGraw-

CC-6: Statistical Methods in Geography **Credits 06**

C6T: Statistical Methods in Geography **Credits 04**

Unit I **2 Credits**

1. Importance and significance of Statistics in Geography. Discrete and continuous data, population and samples, scales of measurement (nominal, ordinal, interval and ratio), sources of data
2. Collection of data and formation of statistical tables
3. Sampling: Need, types, and significance and methods of random sampling
4. Theoretical distribution: frequency, cumulative frequency, normal and probability

Unit II **2 Credits**

1. Central tendency: Mean, median, mode, partition values

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Geography_Hons.pdf

2. Measures of dispersion range, mean deviation, standard deviation, coefficient of variation
3. Association and correlation: Rank correlation, product moment correlation
4. Regression (linear and non-linear) and time series analysis (moving average)

Suggested Readings:

- Berry B. J. L. and Marble D. F. (eds.): Spatial Analysis – A Reader in Geography.
- Ebdon D., 1977: Statistics in Geography: A Practical Approach.
- Hammond P. and McCullagh P. S., 1978: Quantitative Techniques in Geography: An Introduction,
- Oxford University Press.
- King L. S., 1969: Statistical Analysis in Geography, Prentice-Hall.
- Mahmood A., 1977: Statistical Methods in Geographical Studies, Concept.
- Pal S. K., 1998: Statistics for Geoscientists, Tata McGraw Hill, New Delhi.
- Sarkar, A. (2013) Quantitative geography: techniques and presentations. Orient Black Swan Private Ltd., New Delhi
- Silk J., 1979: Statistical Concepts in Geography, Allen and Unwin, London.
- Spiegel M. R.: Statistics, Schaum's Outline Series.
- Yeats M., 1974: An Introduction to Quantitative Analysis in Human Geography, McGraw Hill, New York.

C6 P – Statistical Methods in Geography **Credits 02**

A Project File, comprising one exercise each is to be submitted

1. Construction of data matrix with each row representing an aerial unit (districts / blocks / *mouzas* / towns) and corresponding columns of relevant attributes.
2. Based on the above, a frequency table, measures of central tendency and dispersion would be computed and interpreted.
3. Histograms and frequency curve would be prepared on the dataset.
4. From the data matrix a sample set (20%) would be drawn using, random, systematic and stratified methods of sampling and locate the samples on a map with a short note on methods used.
5. Based on of the sample set and using two relevant attributes, a scatter diagram and regression line would be plotted and residual from regression would be mapped with a short interpretation.

CC7: Geography of India **Credits 06**

C7T: Geography of India

Unit I: Geography of India **Credits 04**

1. Tectonic and stratigraphic provinces, physiographic divisions
2. Climate, soil and vegetation: Characteristics and classification
3. Population: Distribution, growth, structure and policy
4. Distribution of population by race, caste, religion, language, tribes and their correlates
5. Agricultural regions. Green revolution and its consequences
6. Mineral and power resources distribution and utilisation of iron ore, coal, petroleum, gas;
7. Industrial development: Automobile and information technology
8. Regionalisation of India: Physiographic (R. L. Singh), Socio-cultural (Sopher) and Economic (Sengupta)

Unit II: Geography of West Bengal **Credits 02**

1. Physical perspectives: Physiographic divisions, forest and water resources
2. Population: Growth, distribution and human development
3. Resources: Mining, agriculture and industries
4. Regional Problem: Darjeeling Hills, Jangalmahal and Sundarban

Suggested Readings:

- Deshpande C. D., 1992: India: A Regional Interpretation, ICSSR, New Delhi.
- Johnson, B. L. C., ed. 2001. Geographical Dictionary of India. Vision Books, New Delhi.
- Mandal R. B. (ed.), 1990: Patterns of Regional Geography – An Intenational Perspective. Vol. 3 – Indian Perspective.

CC-8: Regional Planning and Development **Credits 06**

C8T:Regional Planning and Development

Unit I: Regional Planning **2 Credits**

1. Concept of regions: Types of regions and their delineation.
2. Types of planning, principles and objectives of regional planning, multi- level planning in India
3. Tools and techniques of regional planning, need for regional planning in India
4. Metropolitan concept: metropolitan areas, and urban agglomerations

Unit I: Regional Development **4 Credits**

1. Development: Meaning, growth versus development
2. Concept and strategies of regional development with reference to India
3. Theories and models for regional development : Growth pole model of perroux; growth centre model in Indian context
4. Theories and models for regional development: Cumulative causation (Myrdal) and core periphery (Hirschman, Rostov and Friedman)
5. Changing concept of development, concept of underdevelopment; efficiency-equity debate
6. Indicators of development: Economic, social and environmental. Human development.
7. Regional development in India, regional inequality, disparity and diversity
8. Need and measures for balanced development in India

CC-9: Economic Geography **Credits 06**

C9T: Economic Geography

Unit I: Concepts **2 Credits**

1. Meaning and approaches to Economic Geography, new Economic Geography
2. Concepts in Economic Geography: Goods and services, production, exchange and consumption
3. Concept of economic man, theories of choices
4. Economic distance and transport costs

Unit II: Economic Activities **4 Credits**

1. Concept and classification of economic activities
2. Factors affecting location of economic activity with special reference to agriculture (Von Thunen), and industry (Weber).
3. Primary activities: Subsistence and commercial agriculture, forestry, fishing and mining
4. Secondary activities: Manufacturing (cotton textile, iron and steel), concept of manufacturing regions, special economic zones and technology parks
5. Tertiary activities: transport, trade and services
6. Agricultural systems: Case studies of tea plantation in India and mixed farming in Europe
7. Transnational sea-routes, railways and highways with reference to India
8. International agreements and trade blocs: GATT and OPEC

CC-10: Environmental Geography **Credits 06**

C10T: Environmental Geography **Credits 04**

1. Geographers' approach to environmental studies
2. Perception of environment in different stages of civilization
3. Concept of holistic environment and system approach
4. Ecosystem: Concept, structure and functions
5. Environmental pollution and degradation: Land, water and air
6. Space–time hierarchy of environmental problems: Local, regional and global
7. Urban environmental issues with special reference to waste management
8. Environmental programmes and policies – Global, national and local levels

C10 : Environment Geography Lab **Credits 02**

Environment Geography

A Project File, comprising one exercise each is to be submitted

1. Preparation of questionnaire for perception survey on environmental problems
2. Preparation of check-list for Environmental Impact Assessment of an urban / industrial project
3. Quality assessment of soil using field kit: pH and NPK
4. Interpretation of air quality using CPCB / WBPCB data

Reference Books

- Gilpin.A (1994) Environmental Impact Assessment: Cutting Edge for the 21st Century (Eia : Cutting Edge for the Twenty-First Century, Cambridge University Press,

CC-11: Field Work and Research Methodology **Credits 06**

C11T: Field Work and Research Methodology **Credits 04**

Research Methodology and Field Work

Unit I: Research Methodology **2 Credits**

1. Research in Geography: Meaning, types and significance
2. Literature review and formulation of research design
3. Defining research problem, objectives and hypothesis. Research materials and methods
4. Techniques of writing scientific reports: Preparing notes, references, bibliography, abstract and keywords

Unit II: Fieldwork **2 Credits**

1. Fieldwork in Geographical studies – Role and significance. Selection of study area and objectives. Pre-field preparations. Ethics of fieldwork
2. Field techniques and tools: Observation (participant, non participant), questionnaires (open, closed, structured, non-structured). Interview with special reverence to focused group discussions.
3. Field techniques and tools: Landscape survey using transects and quadrants, constructing a sketch, photo and video recording.
4. Positioning and collection of samples. Preparation of inventory from field data. Post-field tasks.

C11P: Research Methodology and Field Work Lab **Credits 02**

Practical Record

1. Each student will prepare an individual report based on primary data collected form field survey and secondary data collected from different sources for either a rural area (*mouza*) or an urban area (municipal ward) based on cadastral or municipal maps to study specific problems.
2. The duration of the field work shall not exceed 10 days
3. The report should be hand written in English on A4 size paper in candidate’s own words within 5,000 to 8,000 words excluding figures , tables , photographs , maps , references and appendices
4. A copy of the bound report, duly signed by the concerned teacher, should be submitted

CC-12: Remote Sensing and GIS **Credits 06**

C12T: Remote Sensing and GIS **Credits 04**

Remote Sensing and GIS

Unit I: Remote Sensing **2 Credits**

1. Principles of Remote Sensing (RS): Types of RS satellites and sensors
2. Sensor resolutions and their applications with reference to IRS and Landsat missions, image referencing schemes and data acquisition.
3. Preparation of False Colour Composites from IRS LISS-3 and Landsat TM and OLI data.
4. Principles of image interpretation. Preparation of inventories of landuse land cover (LULC) features from satellite images.

Unit II: Geographical Information Systems and Global Navigation Satellite System **2 Credits**

1. GIS data structures: types (spatial and non-spatial), raster and vector
2. Principles of preparing attribute tables, data manipulation and overlay analysis
3. Principles of GNSS positioning and waypoint collection
4. Transferring of waypoints to GIS. Area and length calculations from GNSS data.

C12 P: Remote Sensing and GIS Lab **Credits 02**

Remote Sensing and GIS

2 Credits

A Project File, comprising one exercise each is to be submitted

1. Georeferencing of maps and images
2. Image enhancement. Preparation of reflectance libraries of LULC features across different image bands of IRS L3 or Landsat OLI data
3. Image classification, post-classification analysis and class editing
4. Digitisation of features. Data attachment, overlay and preparation of thematic map

CC-13: Evolution of Geographical Thought **Credits 06**

C13T: Evolution of Geographical Thought

Unit I: Nature of Pre Modern Geography

1. Development of Geography and contributions of Greek, Chinese, and Indian geographers.
2. Impact of 'Dark Age' on Geography and Arab contributions
3. Geography during the Age of 'Discovery' and 'Exploration' (Contributions of Portuguese Voyages, Columbus, Vasco da Gama, Magellan, Thomas Cook)
4. Transition from Cosmography to Scientific Geography (Contributions of Bernard Varenius and Immanuel Kant); Dualism and Dichotomies (General vs. Particular, Physical vs. Human, Regional vs. Systematic, Determinism vs. Possibilism, Ideographic vs. Nomeothetic)

Unit II: Foundations of Modern Geography and Recent Trends

1. Evolution of Geographical thoughts in Germany, France, Britain and United States of America.
2. Contributions of Humboldt and Ritter
3. Contributions of Richthofen, Hettner and Ratzel
4. Schools of geographical thought: French, British and American;
5. Trends of Geography in the post World War-II period
6. Evolution of Geography in India: formative periods, establishments and emerging trends
7. Quantitative Revolution and its impact, behaviouralism, systems approach, radicalism, feminism
8. Towards Post Modernism: Changing concept of space in geography. Geography in the 21st Century

CC-14: Disaster Management **Credits 06**

C14T: Disaster Management **Credits 04**

Disaster Management

Unit I: Concepts

(2 Credits)

1. Classification of hazards and disasters.
2. Approaches to hazard study: Risk perception and vulnerability assessment. Hazard paradigms.
3. Responses to hazards: Preparedness, trauma and aftermath. Resilience and capacity building.
4. Hazards mapping: Data and techniques.

Unit II: Disaster Case Studies

(2 Credits)

1. Earthquake: Factors, vulnerability, consequences and management
2. Landslide: Factors, vulnerability, consequences and management
3. Cyclone: Factors, vulnerability, consequences and management
4. Fire: Factors, vulnerability, consequences and management

Reference Books

C14P: Disaster Management based Project Work **Credits 02**

Disaster Management based Project Work
2 Credits

An individual Project Report based on any one case study among the following disasters incorporating a preparedness plan in the vicinity of the candidate's institution or residence:

1. Thunderstorm
2. Landslide
3. Flood
4. Coastal / riverbank erosion
5. Fire
6. Industrial accident
7. Structural collapse

Department Specific Electives (DSE)

DSE-1: Hydrology and Oceanography **Credits 06**

DSE3T: Hydrology and Oceanography

Hydrology
(2 Credits)

1. Systems approach in hydrology. Global hydrological cycle: Its physical and biological role
2. Run off: controlling factors. Infiltration and evapotranspiration. Run off cycle
3. Drainage basin as a hydrological unit. Principles of water harvesting and watershed management
4. Groundwater: Occurrence and storage. Factors controlling recharge, discharge and movement.

Oceanography
(4 Credits)

1. Major relief features of the ocean floor: characteristics and origin according to plate tectonics.
2. Physical and chemical properties of ocean water
3. Water mass, T–S diagram
4. Air-Sea interactions, ocean circulation, wave and tide.
5. Ocean temperature and salinity : Distribution and determinants.
6. Coral reefs: Formation, classification and threats.
7. Marine resources: Classification and sustainable utilisation
8. Sea level change: Types and causes

DSE-1: Geography of Health and Wellbeing **Credits 06**

DSE1T: Geography of Health and Wellbeing

Geography of Health and Wellbeing

1. Definition, scope and trends of Geography of Health in relation to allied disciplines
2. Linkages of health with environment and development
3. Geographical perspective of health in developed and developing countries
4. Factors influencing health and wellbeing
5. Parameters of health and wellbeing
6. Health in relation to population dynamics and urbanization
7. Health in relation to inequality, malnutrition and poverty
8. Exposure and Health Risks: Air pollution; household wastes; water; housing; workplace.
9. Health and disease pattern in Environmental Context with special reference to India
10. Types of Diseases and their regional pattern (Communicable and Lifestyle related diseases).
11. Climate change and morbidity. Biological agents of disease
12. WHO programmes of health and wellbeing

DSE-1: Cultural and Settlement Geography **Credits 06**

DSE1T: Cultural and Settlement Geography

Unit I: Cultural Geography
(3 Credits)

1. Definition, scope and content of Cultural Geography
2. Development of cultural geography in relation to allied disciplines
3. Cultural Hearth and Realm; Cultural diffusion, diffusion of major world religions and languages
4. Cultural segregation and cultural diversity, Culture, technology and development.
5. Races and racial groups of the world
6. Cultural regions of India

Unit I: Settlement Geography
(3 Credits)

1. Rural Settlement: Definition, nature and characteristics of rural settlements
2. Morphology of rural settlements: site and situation, layout-internal and external
3. Rural house types with reference to India, Social segregation in rural areas; Census categories of rural settlements.
4. Urban Settlements :Census definition (Temporal) and categories in India
5. Urban morphology: Classical models-Burgess, Homer Hoyt, Harris and Ullman Metropolitan concept.
6. City-region and Conurbation , Functional classification of cities: Harris, Nelson and McKenzie

DSE-2: Resource Geography **Credits 06**
DSE2T: Resource Geography

Resource Geography
Unit I
(3 Credits)

1. Natural Resources: Concept and classification
2. Approaches to Resource Utilization: Utilitarian, Conservational, Community based adaptive
3. Significance of Resources: Backbone of Economic growth and development
4. Pressure on resources. Appraisal and Conservation of Natural Resources
5. Problems of resource depletion—global scenario (forest, water, fossil fuels).
6. Sustainable Resource Development

Unit II
(3 Credits)

1. Distribution, Utilisation, Problems and Management of Metallic Mineral Resources: Iron ore, Bauxite, copper
2. Distribution, Utilisation, Problems and Management of Non-Metallic Mineral Resources: Limestone, Mica, Gypsum
3. Distribution, Utilisation, Problems and Management of Energy Resources: Conventional and Non-Conventional
4. Contemporary Energy Crisis and Future Scenario
5. Politics of Power resources
6. Limits to Growth and Sustainable Use of Resources; Concept of Resource sharing

DSE-2: Fluvial Geomorphology **Credits 06**

DSE2T: Fluvial Geomorphology

1. Scope and components of Fluvial Geomorphology. Rivers as hydro systems. Geographers approach to study of the rivers
2. Run off: components and controlling factors. Run off cycle
3. Models of channel initiation and network development
4. Drainage basin and its significance as a hydrological unit
5. Linear, areal and altitudinal properties of drainage basin. Horton's stream laws. Hypsometric curve and integer.
6. Fundamentals of Rosgen stream classification system
7. Fluvial morphodynamics: Adjustment of channel forms to tectonic, climatic, sea level and land use changes
8. Large rivers of the tropics: Characteristics and significance
9. Fluvial landforms: Terraces, alluvial fans, badlands and accretion topography
10. Human intervention on fluvial systems : Types and consequences
11. Riverbank erosion and river degeneration: Processes, management and impact on land use
12. Integrated watershed management: Principles and significance

Or

DSE-2: Social Geography **Credits 06**

DSE2T: Social Geography

Unit I

1. Social Geography: Concept, Origin, Nature and Scope
2. Concept of Space, Social differentiation and stratification; social processes
3. Social Categories: Caste, Class, Religion, Race and Gender and their Spatial distribution
4. Basis of Social region formation; Evolution of social-cultural regions of India
5. Peopling Process of India: Technology and Occupational Change; Migration.
6. Social groups, social behaviour and contemporary social environmental issues with special reference to India

Unit II

1. Concept of Social Well-being, Quality of Life, Gender and Social Well-being
2. Measures of Social Well-being: Healthcare, Education, Housing, Gender Disparity
3. Social Geographies of Inclusion and Exclusion, Slums, Gated Communities, Communal Conflicts and Crime.
4. Social Planning during the Five Year Plans in India
5. Social Policies in India: Education and Health
6. Social Impact Assessment (SIA): Concept and importance

DSE-3: Population Geography **Credits 06**

DSE3T: Population Geography

Unit I
(2 Credits)

1. Development of Population Geography as a field of specialization. Relation between population geography and demography. Sources of population data, their level of reliability and problems of mapping.
2. Population distribution: density and growth. Classical and modern theories in population distribution and growth, Demographic transition model.
3. World patterns determinants of population distribution and growth. Concept of optimum population.
4. Population distribution, density and growth profile in India.

Unit II
(4 Credits)

1. Population Composition and Characteristics– Age-Sex Composition; Rural and Urban Composition; Literacy.
2. Measurements of fertility and mortality. Concept of cohort and life table
3. Population composition of India. Urbanisation, Occupational structure.
4. Migration: Causes and types
5. National and international patterns of migration with reference to India.
6. Population and development: population-resource regions. Concept of human development index and its components.
7. Population policies in developed and less development countries. India's population policies, population and environment, implication for the future.
8. Contemporary Issues – Ageing of Population; Declining Sex Ratio; Population and environment dichotomy, HIV/AIDS.

Or

DSE-3: Political Geography **Credits 06**

DSE3T: Political Geography

1. Nature and scope Political Geography
2. Concept State, Nation and Nation State
3. Attributes of State – Frontiers, Boundaries, Exclave and exclave, Shape, Size, Territory and Sovereignty,
4. Geopolitics and geopolitical theories: Heartland and Rimland
5. Electoral Geography – Geography of Voting, Geographic Influences on voting pattern,
6. Geography of Representation, Gerrymandering.
7. Political Geography of Conflicts of resource– Oil, water and emission of green house gases
8. Inter-state dispute on water resources of India.
9. The Indian context of conflicts over forest rights.
10. Geographical basis of Indian federalism; Emergence of new states
11. Politics of Displacement: Issues of relief, compensation and rehabilitation: with reference to Dams and Special Economic Zones of India
12. Territorial politics: Case studies of Jammu and Kashmir, Assam and GTA

DSE-3: Soil and Biogeography **Credits 06**

DSE3T: Soil and Biogeography

1. Factors or soil formation. Man as an active agent of soil transformation.
2. Soil profile. Origin and profile characteristics of Lateritic, Podzol and Chernozem soils
3. Definition and significance of soil properties: Texture, structure and moisture,
4. Definition and significance of soil properties: p^H, organic matter and NPK
5. Soil erosion and degradation: Factors, processes and mitigation measures
6. Principles of soil classification: Genetic and USDA. Concept of land capability and its classification.
7. Concepts of biosphere, ecosystem, biome, ecotone, community and ecology
8. Concepts of trophic structure, food chain and food web. Energy flow in ecosystems
9. Geographical extent and characteristic features of: Tropical rain forest, Taiga and Grassland biomes
10. Bio-geochemical cycles with special reference to carbon dioxide and nitrogen
11. Deforestation: Causes, consequences and management
12. Bio-diversity: Definition, types, threats and conservation measures

DSE-4: Agricultural Geography **Credits 06**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Geography_Hons.pdf

DSE4T: Agricultural Geography

Unit I
2 Credits

1. Progress of Agricultural Geography with reference to allied disciplines. Approaches to study of Agricultural Geography.
2. Origin and dispersal of agriculture; Role of agriculture on human society.
3. Factors affecting agriculture. Classification of world agricultural systems.
4. Location and characteristics of major agricultural types: Intensive subsistence, extensive commercial and plantation agriculture.

Unit II
4 Credits

1. Concept of cropping pattern, crop combination, gross and net cropped area, crop rotation.
2. A critical review and contemporary perspective of Von Thunen' model
3. Definition and factors affecting yield. Measures of agricultural productivity
4. Role of irrigation in Indian agriculture
5. Problems of agriculture with special reference to South Asian countries.
6. World patterns of agricultural production and food security
7. Land use survey and land classification (USDA)
8. Globalization and agriculture with special reference to India

DSE-4: Urban Geography **Credits 06**

DSE4T: Urban Geography

Unit I

3 Credits

1. Urban Geography: nature and scope, different approaches and recent trends in urban geography
2. Origin of urban places in Ancient, Medieval, Modern and Post-Modern periods-factors, stages, and characteristics.
3. Theories of Urban Evolution and Growth: Hydraulic Theory, Economic Theory
4. Aspects of urban places: Location, site and situation, Size and Spacing of Cities: The Rank Size Rule, The Law of the Primate City
5. Urban Hierarchies : Central Place Theory; August Loch's theory of Market Centres
6. Patterns of urbanisation in developed and developing countries

Unit II

3 Credits

1. Ecological processes of urban growth; Urban fringe; City- Region
2. Theories of city structure-concentric zone theory, sector theory, multiple nuclei theory
3. Urban Issues: problems of housing, slums, civic amenities (water and transport)
4. Patterns and trends of urbanization in India
5. Policies on urbanization. Urban change/landscape in post-liberalized period in India
6. Case studies of Delhi, Kolkata, and Chandigarh with reference to land use

Reference Books

DSE-4 : Project Work

Skill Enhancement Course(SEC)

SEC-1: Coastal Management **Credits 02**

SEC-1T: Coastal Management

Coastal Management

1. Components of a coastal zone. Coastal morphodynamic variables and their role in evolution of coastal forms.
2. Environmental impacts and management of mining, oil exploration, salt manufacturing, land reclamation and tourism.
3. Coastal hazards and their management using structural and non-structural measures: Erosion, flood, sand encroachment, dune degeneration, estuarine sedimentation and pollution
4. Principles of Coastal Zone Management. Exclusive Economic Zone and Coastal Regulation Zones with reference to India.

Suggested Readings:

- Carter, R.W.G (1988): Coastal Environments: An Introduction to the Physical, Ecological and Cultural Systems of Coastlines, Academic Press, London
- Dayer K.R. (1979): Estuary Hydrography, and Sedimentation, Cambridge Univ. Press, Cambridge.

1. Representation of data; Numbering Systems; Binary Arithmetic; Basic Logic Gates; Boolean Logic and Reduction Techniques.
2. Computation, Storing and Formatting Spreadsheets: Computation of Rank, Mean, Median, Mode, Standard Deviation, Moving Averages, Sample Variation; Derivation of Correlation, Covariance and regression; Selection of technique and interpretation.
3. Preparation of Annoted Diagrams: Scatter diagram and Histogram; selection of technique and interpretation of diagrams
4. Internet Surfing: generation and extraction of information. Cloud computing and drive sharing.

SEC-2: Research Methods **Credits 02**

SEC2T: Research Methods

1. Geographic Enquiry: Definition and Ethics; Literature Review; Framing Research Questions, Objectives and Hypothesis; Preparing Sample Questionnaires and inventories
2. Data Collection: Type and Sources of Data; Methods of data Collection; Data Input and Editing
3. Data Analysis: Qualitative and Quantitative Analysis; Techniques Data Representation
4. Structure of a Research Report: Preliminaries; Text; Citation, Notes, References, Bibliography and Abstract and Key words.

SEC-2: Advanced Spatial Statistical Techniques **Credits 02**

SEC2T: Advanced Spatial Statistical Techniques

1. Probability theory, probability density functions with respect to Normal, Binomial and Poisson distributions and their geographical applications.
2. Sampling: Sampling plans for spatial and non-spatial data, sampling distributions. Sampling estimates for large and small samples tests involving means and proportions.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University

3. Correlation and Regression Analysis: Rank order correlation and product moment correlation; linear regression, residuals from regression, and simple curvilinear regression. Introduction to multi-variate analysis.
4. Time Series Analysis: Time Series processes; Smoothing time series; Time series components.

Any statistical Software Package (e.g., SPSS, MS Excel, R, etc.) may be used for practice. A project file consisting of four exercises on the above themes is to be submitted

Generic Elective(GE)

[Interdisciplinary for other department]

GE-1: Disaster Management **Credits 06**

GE1T: Disaster Management

1. Definition and Concepts of Hazards and Disasters; Risk and Vulnerability; Classification of hazards
2. Causes and consequences of hazards: Physical, economic and cultural
3. Role of National and International organizations in disaster management.
4. Causes, Impact, Distribution and Mapping of: Earthquake and Tsunami, Landslides
5. Causes, Impact, Distribution and Mapping of: Flood and drought
6. Causes, Impact, Distribution and Mapping: Soil erosion, accidental release of toxic chemicals,
7. Response and Mitigation to Disasters: Institutional set up, NDMA and NIDM

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Geography_Hons.pdf

8. Indigenous Knowledge and Community-Based Disaster Management; Do's and Don'ts During and Post Disasters,
9. Emerging approaches to Disaster management: (a) Pre-disaster stage Preparedness-hazard zonation maps-predictability and forecasting warning, land use zoning, Information, Education & Communication (IEC) Disaster resistance house construction, Population reduction in vulnerable area and awareness. (b) Emergency Stage- Rescue training for search and operation at national and regional level, ground management plan preparation, immediate relief, Assessment surveys. (c) Post disaster stage rehabilitation – Political administrative aspects, social aspect, economic aspect, cultural aspect and environmental aspects.
10. Regional perspectives of hazards in India with reference to dimension, causes, consequences and remedial measures: (a) Hills/ coasts, (b) Terrorism
11. National and international policies for disaster management.
12. Role of geospatial technology (RS, GNSS and GIS) in disaster management

GE-2 : Geospatial Technology **Credits 06**

GE2 T : Geospatial Technology

Geospatial Technology

1. Components, scope and historical development of geospatial technology
2. Concepts of spheroid, ellipsoid and projection systems. Significance of WGS 84 and UTM
3. Data types and structures in spatial technology.
4. Principles of land-based surveying with reference to auto level and total station
5. Classification of Remote Sensing platforms, sensors and resolution. IRS (Resourcesat and Cartosat) and Landsat systems.
6. Principles of georeferencing of maps and images
7. Image enhancement, band combination and rationing. Vegetation indices.
8. Image classification and preparation of thematic maps. Raster to vector conversion.
9. Sources, preparation and manipulation of GIS data. Spatial modelling and overlay analysis.
10. GNSS: Principles of satellite positioning and navigation. Collection of waypoints and exporting to GIS
11. Principles of preparing DEMs from optical and RADAR sensors with reference to CartoDEM and SRTM data
12. Integration of different components of spatial technology. Development of web-based spatial platforms with reference to Bhuvan and Google Earth / Google Map

GE3: Geography of Tourism **Credits 06**

GE3T: Geography of Tourism

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:08:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_HONS/Geography_Hons.pdf

1. Scope and Nature: Concepts and Issues, Tourism, Recreation and Leisure Inter-Relations; Geographical Parameters of Tourism by Robinson.
2. Types of Tourism: Ecotourism, Cultural Tourism, Adventure Tourism, Medical Tourism, Pilgrimage, International, National
3. Factors influencing tourism: historical, natural, socio-cultural and economic; motivating factors for pilgrimages
4. Spatial pattern of tourism: Spatial affinity; areal and locational dimensions comprising physical, cultural, historical and economic; International travel destinations- cultural and historical
5. Impact of tourism: physical, economic and social and perceptive positive and negative impacts;
6. Environmental laws and tourism - current trends, spatial patterns and recent changes;
7. Role of foreign capital and impact of globalization on tourism
8. Recent Trends of Tourism: International and Regional; Domestic (India); Sustainable Tourism, Meeting Incentives Conventions and Exhibitions (MICE)
9. Tourism in India: Tourism Infrastructure; Regional dimensions of tourist attraction; Case Studies of Dal lake, Goa, Garhwal Himalaya, Desert and Coastal Areas
10. Promotion of Tourism - National Tourism Policy
11. Infrastructure and support system - accommodation and supplementary accommodation; other facilities and amenities
12. Tourism circuits-short and longer detraction - Agencies and intermediaries - Indian hotel industry.

GE-3: Rural Development **Credits 06**

GE3T: Rural Development

Rural Development

1. Defining Development: Inter-Dependence of Urban and Rural Sectors of the Economy
2. Paradigms of Rural Development: Lewis Model of Economic Development, 'Big Push' theory
   of Development, Myrdal's thesis of 'Spread and Backwash Effects'
3. Need for Rural Development, Gandhian Approach to Rural Development
4. Rural Economic Base: Agriculture and Allied Sectors, Seasonality and Need for expanding Non-Farm Activities,
5. Rural Co-operatives and agricultural marketing
6. Area Based Approach to Rural Development: Drought Prone Area Programmes, PMGSY
7. Target Group Approach to Rural Development: SJSY, MNREGA, Jan DhanYojana
8. Provision of Services – Physical and Socio-Economic Access to Elementary Education and Primary Health Care and Micro credit; Concept of PURA
9. Rural Governance: Panchayati Raj System
10. Rural Development Policies and Programmes in India
11. Rural Infrastructural Development programmes relating to: Rural Electrification, Transport, Housing, and Connectivity
12. Rural Development Programmes for Women and children: Janani SurakshaYojana , National Nutrition Mission, Drinking water and sanitation programmes, NRHM, Sarva Sikha Mission

GE-4: Regional Development **Credits 06**

GE4T: Regional Development

Regional Development

1. Definition of Region; Types and need of regional planning
2. Choice of a region for planning; Characteristics of an Ideal Planning Region; Delineation of Planning Region
3. Regionalization of India for Planning (Agro-ecological zones)
4. Strategies/Models for Regional Planning: Growth Pole Model of Perroux
5. Growth Centre Model in Indian Context; Concept of Village Cluster
6. Problem Regions and Regional Planning; Backward Regions and Regional Plans: Special Area Development Plans in India. DVC- The Success Story and its Failures.
7. Changing concept of development and underdevelopment; Efficiency-equity debate
8. Indicators of development: Economic, social and environmental. Concept of Human development
9. Regional development in India, regional inequality, disparity and diversity
10. Development and Regional Disparities in India since Independence: Disparities in Agricultural Development
11. Development and Regional Disparities in India since Independence: Disparities in Industrial Development
12. Development and Regional Disparities in India since Independence : Disparities in Human Resource Development in terms of education and health

GE-4: Climate Change: Vulnerability and Adaptations **Credits 06**

GE4T:Climate Change: Vulnerability and Adaptations

1. The Science of Climate Change: Origin, scope and trends.
2. Understanding Climate Change with reference to the Geological Time Scale
3. Evidences and factors of climate change: the nature- man dichotomy
4. Green House Gases and Global Warming
5. Electromagnetic spectrum, Atmospheric window, heat balance of the earth
6. Global climatic assessment: IPCC reports
7. Climate change and vulnerability: Physical; economic and social
8. Impact of Climate Change: Agriculture and Water; Flora and Fauna; Human Health and morbidity
9. Global initiatives to climate change mitigation: Kyoto Protocol, Carbon trading, Clean development mechanism, COP, Climate fund
10. Climate change vulnerability assessment and adaptive strategies with particular reference to South Asia
11. National Action Plan (of India) on Climate Change
12. Role of Urban Local Bodies, Panchayats and educational institutions on climate change mitigation: Awareness and action programmes.

List of Core Courses and Electives

Core Course (CC)

DSC-1A: Physical Geography
DSC-1B: Human Geography
DSC-1C: Maps and Diagrams
DSC-1D: Environmental Geography

Discipline Specific Electives (DSE)

DSE- 1: Geography of India
Or
DSE- 1: Disaster Management
Or
DSE- 1: Soil and Biogeography

DSE-2: Economic Geography
Or
DSE-2: Urban Geography
Or
DSE-2: Population Geography

Skill Enhancement Course (SEC)

SEC-1: Remote Sensing
Or
SEC-1: Geographic Information System

SEC-2: Regional Planning and Development
Or
SEC-2: Computer Basics

SEC-3: Remote Sensing and GPS based Project Report

SEC-4: Field Techniques and Survey based Project Report

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

Core Courses (CC)

DSC-1A (CC-1) : Physical Geography **Credits 06**

DSC1AT: Physical Geography

Course Contents:

1. Physical Geography – Definition and Scope, Components of Earth System.
2. Atmosphere – Heat Balance, Global Circulation Pattern, Tropical Cyclones, Monsoon, Climatic Classification (Koppen).
3. Lithosphere – Internal Structure of Earth based on Seismic Evidence, Plate Tectonics and its Associated Features.
4. Fluvial Cycle of Erosion – Davis and Penck.
5. Hydrosphere – Hydrological Cycle, Ocean Bottom Relief Features, Tides and Currents.

Suggested Readings:

- Conserva H. T., 2004: Illustrated Dictionary of Physical Geography, Author House, USA.
- Gabler R. E., Petersen J. F. and Trapasso, L. M., 2007: Essentials of Physical Geography (8th Edition), Thompson, Brooks/Cole, USA.
- Garrett N., 2000: Advanced Geography, Oxford University Press.
- Goudie, A., 1984: The Nature of the Environment: An Advanced Physical Geography, Basil Blackwell Publishers, Oxford.
- Hamblin, W. K., 1995: Earth's Dynamic System, Prentice Hall, N.J.
- Husain M., 2002: Fundamentals of Physical Geography, Rawat Publications, Jaipur.
- Monkhouse, F. J. 2009: Principles of Physical Geography, Platinum Publishers, Kolkata.
- Strahler A. N. and Strahler A. H., 2008: Modern Physical Geography, John Wiley & Sons, New York.

DSC-1B (CC-2): Human Geography **Credits 06**

DSC1BT: Human Geography

Course Contents:

1. Definition, Nature, Major Subfields, Contemporary Relevance.
2. Space and Society: Cultural Regions; Race; Religion and Language
3. Population: Population Growth and Demographic Transition Theory.
4. World Population Distribution and Composition (Age, Gender and Literacy).
5. Settlements: Types and Patterns of Rural Settlements; Classification of Urban Settlements; Trends and Patterns of World Urbanization

Suggested Readings:

- Chandna, R.C. (2010) Population Geography, Kalyani Publisher.
- Daniel, P.A. and Hopkinson, M.F. (1989) The Geography of Settlement, Oliver & Boyd, London.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

- Johnston R; Gregory D, Pratt G. et al. (2008) The Dictionary of Human Geography, Blackwell Publication.
- Jordan-Bychkov et al. (2006) The Human Mosaic: A Thematic Introduction to Cultural Geography. W. H. Freeman and Company, New York.
- Kaushik, S.D. (2010) Manav Bhugol, Rastogi Publication, Meerut.
- Maurya, S.D. (2012) Manav Bhugol, Sharda Pustak Bhawan. Allahabad.
- Ghosh, S. (2015) Introduction to settlement geography. Orient Black Swan Private Ltd., Kolkata
- Hussain, Majid (2012) Manav Bhugol. Rawat Publications, Jaipur

DSC-1C (CC- 3): Maps and Diagrams **Credits 06**

DSC1CT: Maps and Diagrams **Credits 04**

Course Contents:

Unit-1: Scale and Cartograms

1. Maps – Types, Elements and Uses
2. Map Scale – Types and Application, Reading Distances on a Map.
3. Construction of Linear and Comparative (Unit)
4. Cartograms: Circle, Square and Pie graph
5. Age-Sex Pyramid, Dependency Ratio
6. Population Maps and Diagrams: Population Density by Choropleth, Distribution by Dot and Sphere.
7. Representation of Data – Symbols, Dots, Choropleth, Isopleth and Flow Diagrams, Interpretation of Thematic Maps.

Unit-2: Map Projections

1. Map Projections: Nature and Classification
2. Principles, Theories, Criteria for Choice of Projections; Construction and Properties of select Map Projections: Conical projection with two standard parallel, Cylindrical Equal Area, Polar Zenithal Stereographic, Zenithal Gnomonic Polar Case, Mercator's Projection, Bonne's Projection

Unit-3: Surveying

1. Concepts and Principles: Angles, Bearing and Azimuths, Traversing, Radiation, Intersection
2. Prismatic Compass: Preparation of landuse maps by open and closed traverse; computations of compass traverse- Included Angle, Area of traverse
3. Levelling by Dumpy Level: Profile

Suggested Readings:

- Anson R. and Ormelling F. J., 1994: International Cartographic Association: Basic Cartographic Vol. Pregmen Press.
- Gupta K.K. and Tyagi, V. C., 1992: Working with Map, Survey of India, DST, New Delhi.
- Mishra R.P. and Ramesh, A., 1989: Fundamentals of Cartography, Concept, NewDelhi.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

- Monkhouse F. J. and Wilkinson H. R., 1973: Maps and Diagrams, Methuen, London.
- Rhind D. W. and Taylor D. R. F., (eds.), 1989: Cartography: Past, Present and Future, Elsevier, International Cartographic Association.
- Robinson A. H., 2009: Elements of Cartography, John Wiley and Sons, New York.
- Singh R. L. and Singh R. P. B., 1999: Elements of Practical Geography, Kalyani Publishers.
- Sarkar, A. (2015) Practical geography: A systematic approach. Orient Black Swan Private Ltd., New Delhi

DSC1DP: Cartographic Techniques (Lab) **Credits 02**

List of Practical

A Project File, comprising one exercise each is to be submitted

1. Graphical construction of scales: Plain, comparative
2. Construction of projections: Polar Zenithal Stereographic, Simple conic with one standard parallel and Cylindrical Equal Area
3. Preparation of land use maps by open and closed traverse; computations of compass traverse- Included Angle, Area of traverse
4. Leveling by Dumpy Level: Profile

B. Field Report

Report should be written with the following Tentative Chapter Schemes:
Preface & Acknowledgement
Introduction: Objective, Extent and Space Relations, Data sources and Methodology
Physical Environment: Lithology, Drainage, Slope, Climate, Soil, Vegetation etc.
Socio Economic Environment: Population Characteristics, Occupational Structure, Ethnic and Religions Composition, Per- Capita income, any other aspects.
Problems and Prospects, Bibliography if any
Appendix: Survey Questionnaire(s), Additional Tables, if any
Word Limit: 3000 (Excluding Tables and Appendix).
A copy of the bound report, duly signed by the concerned teacher, should be Submitted.

Suggested Readings:

- Dent B. D., 1999: *Cartography: Thematic Map Design*, (Vol. 1), McGraw Hill.
- Gupta K. K and Tyagi V. C., 1992: *Working with Maps*, Survey of India, DST, New Delhi.
- Mishra R. P. and Ramesh A., 1989: *Fundamentals of Cartography*, Concept Publishing.
- Robinson A., 1953: *Elements of Cartography*, John Wiley.
- Sharma J. P., 2010: *Prayogic Bhugol*, Rastogi Publishers.
- Singh R. L. and Singh R. P. B., 1999: *Elements of Practical Geography*, Kalyani Publishers
- Singh R. L., 1998: *Prayogic Bhoogol Rooprekha*, Kalyani Publications.
- Steers J. A., 1965: An Introduction to the Study of Map Projections, University of London.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

DSC-1D (CC-4): Environmental Geography **Credits 06**

DSC1DT: Environmental Geography

Course Contents:

1. Environmental Geography: Concepts and Approaches; Ecosystem – Concept and Structure; Ecosystem Functions.
2. Human-Environment Relationship in Equatorial, Desert, Mountain and Coastal Regions.
3. Environmental Problems and Management: Air Pollution; Biodiversity Loss; Solid and Liquid Waste.
4. Environmental Programmes and Policies: Developed Countries; Developing Countries.
5. New Environmental Policy of India; Government Initiatives.

Suggested Readings:

- Casper J.K. (2010) Changing Ecosystems: Effects of Global Warming. Infobase Pub. New York.
- Hudson, T. (2011) Living with Earth: An Introduction to Environmental Geology, PHI Learning Private Limited, New Delhi.
- Miller, G.T. (2007) Living in the Environment: Principles, Connections, and Solutions, Brooks/ Cole Cengage Learning, Belmont.
- Singh, R.B. (1993) Environmental Geography, Heritage Publishers, New Delhi.
- UNEP (2007) Global Environment Outlook: GEO4: Environment For Development, United Nations Environment Programme. University Press, Cambridge.
- Wright R. T. and Boorse, D. F. (2010) Toward a Sustainable Future, PHI Learning Pvt Ltd, New Delhi.
- Singh, R.B. and Hietala, R. (Eds.) (2014) Livelihood security in Northwestern Himalaya: Case studies from changing socio-economic environments in Himachal Pradesh, India. Advances in Geographical and Environmental Studies, Springer

Discipline Specific Elective (DSE)

DSE- 1: Geography of India **Credits 06**

DSE1T: Geography of India

Course Contents:

1. Physical Setting – Location, Structure and Relief, Drainage, Climate.
2. Population – Size and Growth since 1901, Population Distribution, Literacy, Sex Ratio.
3. Settlement System - Rural Settlement Types and Patterns, Urban Pattern.
4. Resource Base – Livestock (cattle and fisheries), Power (coal, and hydroelectricity), Minerals (iron ore and bauxite).
5. Economy – Agriculture (Rice, Wheat, Sugarcane, Groundnut, Cotton); Industries (Cotton Textile, Iron-Steel, Automobile), Transportation Modes (Road and Rail).

Suggested Readings:

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University

- Singh Gopal, 1976: *A* G*eography of India*, Atma Ram.
- Spate O. H. K. and Learmonth A. T. A., 1967: *India and Pakistan: A General and Regional Geography*, Methuen.
- Rana, Tejbir Singh, 2015, Diversity of India , R.K. Books, Delhi.

Or

DSE- 1: Disaster Management **Credits 06**

DSE1T: Disaster Management

Course Contents:

1. Hazards, Risk, Vulnerability and Disasters: Definition and Concepts.
2. Disasters in India: (a) Causes, Impact, Distribution and Mapping: Flood, Landslide, Drought.
3. Disasters in India: (b) Causes, Impact, Distribution and Mapping: Earthquake, Tsunami and Cyclone.
4. Human induced disasters: Causes, Impact, Distribution and Mapping.
5. Response and Mitigation to Disasters: Mitigation and Preparedness, NDMA and NIDM; Indigenous Knowledge and Community-Based Disaster Management; Do's and Don'ts During Disasters

Suggested Readings:

- Government of India. (1997) Vulnerability Atlas of India. New Delhi, Building Materials & Technology Promotion Council, Ministry of Urban Development, Government of India.
- Kapur, A. (2010) Vulnerable India: A Geographical Study of Disasters, Sage Publication, New Delhi.
- Modh, S. (2010) Managing Natural Disaster: Hydrological, Marine and Geological Disasters, Macmillan, Delhi.
- Singh, R.B. (2005) Risk Assessment and Vulnerability Analysis, IGNOU, New Delhi. Chapter 1, 2 and 3
- Singh, R. B. (ed.), (2006) Natural Hazards and Disaster Management: Vulnerability and Mitigation, Rawat Publications, New Delhi.
- Sinha, A. (2001). Disaster Management: Lessons Drawn and Strategies for Future, New United Press, New Delhi.
- Stoltman, J.P. et al. (2004) International Perspectives on Natural Disasters, Kluwer Academic Publications. Dordrecht.

- Singh Jagbir (2007) “Disaster Management Future Challenges and Oppurtunities”, 2007. Publisher- I.K. International Pvt. Ltd. S-25, Green Park Extension, Uphaar Cinema Market, New Delhi, India (www.ikbooks.com).

Or

DSE-1: Soil and Biogeography **Credits 06**

DSE1T: Soil and Biogeography

Course Contents:

Concepts in Theory

1. Factors or soil formation. Man as an active agent of soil transformation.
2. Soil profile. Origin and profile characteristics of Laterite andPodzol soils
3. Definition and significance of soil properties: Texture and structure
4. Definition and significance of soil properties: pH and organic matter
5. Soil erosion and degradation: Factors, processes and mitigation measures
6. Concepts of biosphere, ecosystem, biome, Eco tone, community and ecology
7. Concepts of trophic structure, food chain and food web. Energy flow in ecosystems
8. Geographical extent and characteristic features of: Tropical rain forest, Taiga and Grassland biomes
9. Bio-geochemical cycles with special reference to carbon dioxide and nitrogen
10. Deforestation: Causes, consequences and management

Suggested Readings:

- Biswas, T.D. and Mukherjee, S.K. 1997: Textbook of Soil Science, TataMcGraw Hill,
- Brady, N.C. and Weil, R.R. 1996. The Nature and Properties of Soil, 11th edition, Longman, London :
- Floth, H.D. 1990. Fundamentals of Soil science, 8th edition, John Wiley and Sons, New York.
- Morgan, R.P.C. 1995 Soil Erosion and Conservation, 2nd edition, Longman, London
- Schwab, G.O., Fangmer, D.D. and Elliot, W.J. 1996. Soil and Water Management
- Systems, 4th edition, John Eiley and sons Inc., New York
- Young, A. 2000. Land Resource: Now and Future, Cambridge University Press, Cambridge: 332p.
- Chapman J.L. and Rens, M.J. 1993. Ecology: Principle and Applications, Cambridge University Press, Cambridge:
- Chairas, D.D. Reganold, J.P. and Owen, O.S. 2002. National ResourceConservation and management for a Sustainable Future, 8th edition, Prentice Hall, Englewood Cliffs
- Dash, M.C., 2001. Fundamental of Ecology, 2nd edition, Tata McGrawHill, New Delhi
- Huggett, R. 1998. Fundamentals of Biogeography, Routledge, London.
- Kormondy, E.J. 1996. Concept of Ecology, 4th edition, Prentice- Hall, India, New Delhi

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University

- Myers, A. A. and Giller, P.S. (editors) 1988. Analytical Biogeography: an Integrated Approach to the Study of Animal and Plant Distribution. Chapman and Hall, London

DSE-2: Economic Geography **Credits 06**

DSE2T: Economic Geography

Course Contents:

1. Definition, Approaches and Fundamental Concepts of Economic Geography; Patterns of Development.
2. Locational Theories – Agriculture (Von Thunen) and Industrial (Weber).
3. Primary Activities – Intensive Subsistence Farming, Commercial Grain Farming, Plantation, Commercial Dairy Farming, Commercial Fishing, and Mining (iron ore, coal and petroleum).
4. Secondary Activities – Cotton Textile Industry, Petro-Chemical Industry, Major Manufacturing Regions.
5. Tertiary and Quaternary Activities – Modes of Transportation, Patterns of International Trade, and Information and Communication Technology Industry.

Suggested Readings:

- Alexander J. W., 1963: *Economic Geography*, Prentice-Hall Inc., Englewood Cliffs, New Jersey.
- Bagchi-Sen S. and Smith H. L., 2006: *Economic Geography: Past, Present and Future*, Taylor and Francis.
- Coe N. M., Kelly P. F. and Yeung H. W., 2007: *Economic Geography: A Contemporary Introduction*, Wiley-Blackwell.
- Combes P., Mayer T. and Thisse J. F., 2008: *Economic Geography: The Integration of Regions and Nations*, Princeton University Press.
- Durand L., 1961: *Economic Geography*, Crowell.
- Hodder B. W. and Lee R., 1974: *Economic Geography*, Taylor and Francis.
- Wheeler J. O., 1998: *Economic Geography*, Wiley.
- Willington D. E., 2008: *Economic Geography*, Husband Press.

Or

DSE- 2: Urban Geography **Credits 06**

DSE2T: Urban Geography

Course Contents:

Unit -1: Basic Concepts

1. Urban Geography: nature and scope, different approaches and recent trends in urban geography
2. Origin of urban places in Ancient, Medieval, Modern and Post-Modern periodsfactors, stages, and characteristics.
3. Aspects of urban places: Location, site and situation, Size and Spacing of Cities: The Rank Size Rule,

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

4. Urban Hierarchies : Central Place Theory;

Unit -2: Urban Processes

1. Ecological processes of urban growth; Urban fringe; City- Region
2. Theories of city structure-concentric zone theory, sector theory, multiple nuclei theory
3. Patterns and trends of urbanization in India
4. Patterns of urbanisation in developed and developing countries

Suggested Readings:

- Fyfe N. R. and Kenny J. T., 2005: The Urban Geography Reader, Routledge.
- Graham S. and Marvin S., 2001: Splintering Urbanism: Networked Infrastructures, Technological Mobility and the Urban Condition, Routledge.
- Hall T., 2006: Urban Geography, Taylor and Francis.
- Kaplan D. H., Wheeler J. O. and Holloway S. R., 2008: Urban Geography, John Wiley.
- Knox P. L. and McCarthy L., 2005: Urbanization: An Introduction to Urban Geography, Pearson Prentice Hall New York.
- Knox P. L. and Pinch S., 2006: Urban Social Geography: An Introduction, Prentice-Hall.
- Pacione M., 2009: Urban Geography: A Global Perspective, Taylor and Francis.
- Sassen S., 2001: The Global City: New York, London and Tokyo, Princeton University Press.
- Ramachandran R (1989): Urbanisation and Urban Systems of India, Oxford University Press, New Delhi
- Ramachandran, R., 1992: The Study of Urbanisation, Oxford University Press, Delhi
- Singh, R.B. (Eds.) (2001) Urban Sustainability in the Context of Global Change, Science Pub., Inc., Enfield (NH), USA and Oxford & IBH Pub., New Delhi.
- Singh, R.B. (Ed.) (2015) Urban development, challenges, risks and resilience in Asian megacities. Advances in Geographical and Environmental Studies, Springer

Or

DSE-2: Population Geography **Credits 06**

DSE2T: Population Geography

Course Contents:

Unit 1: Basic Concepts

1. Population distribution: density and growth.
2. Demographic transition model.
3. World patterns determinants of population distribution and growth. Concept of overpopulation, under population and optimum population.
4. Population distribution, density and growth profile in India.

Unit 2: Composition and Policies

1. Population Composition and Characteristics– Age-Sex Composition; Rural and Urban Composition; Literacy.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

2. Measurements of fertility and mortality.
3. Population composition of India. Urbanisation, Occupational structure.
4. Migration: Causes and types

Suggested Readings:

- Barrett H. R., 1995: Population Geography, Oliver and Boyd.
- Bhende A. and Kanitkar T., 2000: Principles of Population Studies, Himalaya Publishing House.
- Chandna R. C. and Sidhu M. S., 1980: An Introduction to Population Geography, Kalyani Publishers.
- Clarke J. I., 1965: Population Geography, Pergamon Press, Oxford.
- Jones, H. R., 2000: Population Geography, 3rd ed. Paul Chapman, London.
- Lutz W., Warren C. S. and Scherbov S., 2004: The End of the World Population Growth in the 21st Century, Earthscan
- Newbold K. B., 2009: Population Geography: Tools and Issues, Rowman and Littlefield Publishers.
- Pacione M., 1986: Population Geography: Progress and Prospect, Taylor andFrancis.
- Wilson M. G. A., 1968: Population Geography, Nelson.

Skill Enhancement Course (SEC)

SEC-1: Remote Sensing **Credits 02**

SEC1T: Remote Sensing

Course Contents:

Unit-1: Remote Sensing: Basic Concepts

1. Basic Concepts: Energy Sources, Interactions with Atmosphere, Sensing Systems, Data Products, Resolutions: Spatial, Spectral, Radiometric and Temporal
2. Principles of preparing Standard False Colour Composites
3. Principles of image interpretation and feature extraction. Preparation of inventories of land use land cover (LULC) features from satellite images.

Suggested Readings:

- Campbell J. B., 2007: Introduction to Remote Sensing, Guildford Press.
- Jensen J. R., 2004: Introductory Digital Image Processing: A Remote Sensing Perspective, Prentice Hall.
- Joseph, G. 2005: Fundamentals of Remote Sensing United Press India.
- Lillesand T. M., Kiefer R. W. and Chipman J. W., 2004: Remote Sensing and Image Interpretation, Wiley. (Wiley Student Edition).
- Nag P. and Kudra, M., 1998: Digital Remote Sensing, Concept, New Delhi.
- Rees W. G., 2001: Physical Principles of Remote Sensing, Cambridge University Press.
- Singh R. B. and Murai S., 1998: Space-informatics for Sustainable Development, Oxford and IBH Pub.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

- Wolf P. R. and Dewitt B. A., 2000: Elements of Photogrammetry: With Applications in GIS, McGraw- Hill.
- Sarkar, A. (2015) Practical geography: A systematic approach. Orient Black Swan Private Ltd., New Delhi

Or

SEC-1: Geographic Information System **Credits 02**

SEC1T: Geographic Information System

Course Contents:

1. G.I.S: Basic Concepts, Components,
2. GIS Data structure: Raster and vector.
3. Dereferencing, Digitization
4. Map Composition and Layout

Suggested Readings:

- Jatin Pandey and Darshana Pathak, 2013, Geographic Information System, TERI Publishing House.
- Chor Pang Lo, 2009, Concepts and Techniques of Geographic Information System, Prentice Hall.
- Michael N. Demers, 2012, Fundamentals of Geographic Information Systems, Willy.
- Chairsman, N. 1992. Exploring Geographical Information Systems, John Willey and Sons Inc., New York, 198p

SEC-2: Regional Planning and Development **Credits 02**

SEC2T: Regional Planning and Development

Course Contents:

1. Concept, Need and Types of regional Planning.
2. Characteristics and Delineation of Planning Region.
3. Regionalization of India for Planning (Agro Ecological Zones).
4. Models for Regional Planning: Growth Pole Theory; Core Periphery Model and Growth Foci Concept in Indian Context.
5. Backward Regions and Regional Plans- Special Area Development Plans in India; DVC-The Success Story and the Failures; NITI Aayog.

Suggested Readings:

Or

SEC-2: Computer Basics **Credits 02**

SEC2T: Computer Basics

Course Contents:

1. Knowing computer: What is Computer, Basic Applications of Computer Computer Memory, Concepts of Hardware and Software; Operating System; Running an Application, Viewing of File, Folders and Directories, Creating and Renaming of files and folders,
2. Understanding Word Processing
3. Using Spread Sheet: Basics of Spreadsheet; Manipulation of cells; Formulas and Functions; Editing of Spread Sheet, printing of Spread Sheet.
4. Concept of Internet; Applications of Internet; World Wide Web; Email;
5. Making Small Presentation: Microsoft Power point

Suggested Readings:

- Bartee, Thomas C. (1977): Digital Computer Fundamental; McGraw Hill.
- Chauhan, S.; Chauhan, A. and Gupta, K. (2006): Fundamental of Computer; Firewall Media.
- Malvino, A.P. and Leach, D.P. (1981): Digital Principles and Appications; Tata McGraw Hill.
- Rajaraman, V. (2003): Fundamentals of Computer, Prentice Hall Publisher
- Sarkar, A. and Gupta, S.K (2002) Elements of computer Science, S Chand and Company, New Delhi
- Blissmer (1996): Working with MS Word; Houghton Mifflin Co.
- Johnson, Steve (2007): Microsoft Power Point 2007; Pearson Paravia Bruno.
- Leon, A .and Leon,M.(1999): Introduction to Computer, USB Publishers' Distributors Ltd.
- Leon, A. and Leon, M.(1999): A beginners Guide to Computers, Vikas

SEC- 3: Remote Sensing and GPS based Project Report **Credits 02**

SEC3T: Remote Sensing and GPS based Project Report **Credit 01**

Course Contents:

1. Remote Sensing: Definition, Development, Platforms and Types.
2. Aerial Photography: Principles, Types and Geometry.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:01:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Geography_General.pdf

3. Satellite Remote Sensing: Principles, EMR Interaction with Atmosphere and Earth Surface; Satellites (Landsat and IRS) and Sensors.

SEC3P: Practical **Credit 01**

1. Interpretation and Application of Remote Sensing: Land use/ Land Cover.
2. Global Positioning System (GPS) – Principles and Uses

Note: A project file consisting of five exercises will be done from aerial photos, satellite images (scale, orientation and interpretation) and GPS field survey.

Suggested Readings:

- Campbell J. B., 2007: *Introduction to Remote Sensing*, Guildford Press.
- Jensen J. R., 2004: Introductory Digital Image Processing: A Remote Sensing Perspective, Prentice Hall.
- Joseph, G. 2005: *Fundamentals of Remote Sensing* United Press India.
- Lilles and T. M., Kiefer R. W. and Chapman J. W., 2004: *Remote Sensing and Image Interpretation*, Wiley. (Wiley Student Edition).
- Nag P. and Kudra, M., 1998: *Digital Remote Sensing*, Concept, New Delhi.
- Rees W. G., 2001: *Physical Principles of Remote Sensing*, Cambridge University Press.
- Singh R. B. and Murai S., 1998: *Space-informatics for Sustainable Development*, Oxford and IBH Pub.
- Wolf P. R. and Dewitt B. A., 2000: Elements of Photogrammetry: With Applications in GIS, McGraw-Hill.

SEC- 4: Field Techniques and Survey based Project Report **Credits 02**

SEC4T. Field Techniques and Survey based Project Report **Credit 01**

Course Contents:

1. Field Work in Geographical Studies – Role, Value and Ethics of Field-Work.
2. Defining the Field and Identifying the Case Study – Rural / Urban / Physical / Human / Environmental.
3. Field Techniques – Merits, Demerits and Selection of the Appropriate Technique; Observation (Participant / Non Participant).
4. Questionnaires (Open/ Closed / Structured / Non-Structured); Interview with Special Focus on Focused Group Discussions; Space Survey (Transects and Quadrants, Constructing a sketch).

SEC4P: Practical **Credit 01**

1. Designing the Field Report – Aims and Objectives, Methodology, Analysis, Interpretation and Writing the Report.
2. Each student will prepare an individual report based on primary and secondary data collected during field work.

SEMESTER-I
Core Course (CC)

CC-1: Principles of Automobiles — Credits 06

C1T: Principles of Automobiles — Credits 04

Principles of Automobiles:

Unit-I:
Basic concept of thermodynamics, 1st and 2nd laws, reversible, irreversible process and adiabatic, Isothermal Process. Thermodynamic Cycle: Carnot, Otto, Diesel, Dual cycles and their air standard efficiency, Numerical Problems.

Unit-II:
Classification of I.C Engines, S.I. and C.I Engines, 2 Stroke, 4-Stroke engines and their working Principle.

Unit-III:
Engine specifications-Bore, Stroke-length, MEP, I.H.P, B.H.P, S.F.C, mechanical and thermal efficiencies.

Unit-IV:
Valve timing diagram-2-stroke and 4 stroke engine.

Unit-V:
Fuel used in I.C Engines, Properties of Fuel, Petrol and Diesel, Fuel additives and- fuel rating (Octane and cetane numbers)

Unit-VI:
Combustion Process in I.C engines Auto ignition and chemical reaction, pre-ignition MAN and open combustion chambers, effect of knocking, calorific value of fuels, requirement of oxygen for complete combustion.

Unit-VII:
Stress, strain, their types, Numerical problems on principle of stresses,

C1P: Principles of Automobiles — **Credits 02**

Practical

Unit-I
Engineering drawing:
Scales, projections of solid, surface developments, Isomentric and oblique views, elevations, plans and end views off different objects and design.

Unit-II
2-stroke and 4 stroke (C.I &S.I engine):
Valve, Valve seat, Rocker arm, Push rod, Cam shaft, Crank shaft, Piston, piston ring, Connecting rod, Oil pump, fuel pump, Distributor, Oil filter, Fuel filter, Starter motor, alternator, Dynamo, Solex carburettor, inlet manifold, exhaust manifold, water pump, fly-wheel, vibration damper, spark plug, heater plug, injector, F.I.P pump. Adjustment:- C.B point, piston ring joined, piston ring groove, Cylinder bore, fan belt adjustment, valve tappet.

Unit-III
Cooling system: Radiator cleaning, thermostat valve, testing fan valve adjust, water pump service, pressure cap testing, over hauling viscous fan.

Unit-IV

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:25:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance(Major).pdf

Electrical safety precaution ,Electrical hand tools, Electrical measuring instrument practice(Volt Metre, Ammeter, Ohm metre, AVO Metre), Wire cutting and joint practice (Basic wire joints, soldering, Lug joint), Wire checking, use of terminal block, Magnetic effect of current, Practice using relay.

CC-2: Constructional details and working of I.C engines — Credits 06

C2T: Constructional details and working of I.C engines — Credits 04

Theory:

Constructional details and working of I.C engines:

Unit-I: **Layout of an automobile:** Main Components and assemblies.

Unit-II: Constructional features and functions of 2& 4 wheelers, Cylinder block, Crankcase, Cylinder head, Oil Pump, Gasket, Crank Shaft, Main Bearing, Vibration dampers, Exhaust system, Inlet and exhaust manifolds, fly-whell, Piston, Piston rings, Piston Pin, Connecting rod, Cams and Camshaft, Valve and Valve mechanism.

Unit-III:
S.I Engines: Combustion process, types of fuel feed system, various components of fuel system, fuel tank, fuel filters and screens, fuel losses, fuel gauges, fuel pumps, air cleaners, carburettor and its working its working, trouble shooting, servicing adjustments and M.P.F.I system.

Unit- IV:
C.I engines: Combustion and combustion chambers, fuel injection system, fuel tanks, fuel feed pumps, fuel injectors, nozzles and their types, details of nozzles and fuel injector unit, CRDI system.
Unit-V:
Cooling System: Importance, types, various components and accessories with troubles shooting.

Unit-VI:
Lubrication system: Importance, lubricants and their properties, their selections, lubrication system and their working, filters, lubrications in other parts of an automobiles, trouble shooting.

C2P: Constructional details and working of I.C engines — Credits 02

Practical

Unit-I
Fuel system (Petrol engine):
Over hauling fuel pump, carburettor, fuel fitter and air cleaner, practice in engine tune up in a vehicle.

Unit-II
Lubrication system:
Oil pump over-hauling and refitting, Replacing oil filter, Drawing engine oil, Repairs oil galleries.

Unit-III
Fuel system (Diesel engine):
Fuel feed pump over hauling, F.I.P pump single & multi cylinder over hauling, over hauling injector, testing the injector, Fuel bleeding, cleaning the injector.

Unit-IV
Basic idea and details of fitting shop, First aid, 5S concept, fire, Measuring instruments,
Gauge Measurement, Cutting tool's Operation, Heat Treatment, Drill and Grinding Machine Operation.

Job training or garage practice

SEMESTER-II
Core Course (CC)

CC-3: Theory of Machine — Credits 06

C3T: Theory of Machine — Credits 04

Course Contents:

Theory of Machine:

Unit-I: Friction: Introduction, types of friction, coefficient of friction, limiting friction, laws of solid friction and kinetic friction, screw jack.

Unit-II: Belt, Rope and Chain Drive: Introduction, Belt drive, types of belts, Materials used, Velocity ratio, Slip, Length of belt, Comparison, flat and v-belt, Rope drive & Chain Drive.

Unit-III: Gear and Gear Trains: Fundamental laws of gearing, spur, bevel and worm gears, gear train, Interference, epicyclic gear trains.

Unit-IV: Cam: Types, displacement diagrams.

Unit-V: Flywheels: Turning moment diagrams, fluctuations of energy and speed.

Unit-VI: Governors: Types, Principles, working, Characteristics and performance.

Unit-VII: Torsion and tensional effect, Shear force and bending moment diagram, bending stress.

C3P: Practical — Credits 02

Unit-I
Valve timing: C.I. & S.I. valve timing adjustment of 2-stroke & 4-stroke.

Unit-II
Firing order set (Multi cylinder S.I. & C.I. 4-stroke) petrol- tappet timing, gear timing, chain timing, ignition timing. Diesel- tappet timing, gear timing, fuel timing.

Unit-III
Electronics components checking (Resistor, Capacitor, Diode, Transistor, and I.C), Construction of D.C Generator, Starter motor, Wiper Motor, Alternator, Transformer.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:25:59; Copyright : Vidyasagar University

CC-4: Suspension system, Steering system, Ignition system and Auto Air conditioning

Credits 06

C4T: Suspension system, Steering system, Ignition system and Auto Air conditioning

Credits 04

Course Contents:

Unit-I : Suspension system:- Objectives, principles of working, types of suspension system, independent and rigid axle suspension system, shock absorber and damper, troubles in a suspension system.

Unit-II: Steering system:- Steering geometry, their effect, steering angle, steering mechanism, steering linkages, power steering , trouble shooting.

Unit-III: Ignition System: Battery, electrical, magneto and electronic ignition systems and their troubles.

Unit-IV: Auto Air conditioning: Introduction, Air conditioning system, components, effect of Air conditioning of fuel economy, car Air conditioning system, Truck Air conditioning, trouble shooting.

C4P: Practical **Credits 02**

Unit-I

Suspension system: Replacing shock absorber, servicing shackle, over hauling leaf spring, over hauling coil spring, over hauling front suspension system.

Unit-II

Spark plug cleaning and testing: Spark plug cleaning, spark plug gap setting and spark plug testing.

Unit-III

Use of general hand tools (Vice, Screw driver, Spanner, Pliers etc.), identify of various types (Bolts, Nuts, Washers, Keys, pins, Bearing, Pulley , Gear etc.), Limit, Fit and Tolerance, Transmission of power.

Unit-IV

Practice to Operate the lathe machine tools , Welding(Arc), sheet metal work and Forging.

Job training or Garage practice

SEMESTER-III

Core Course (CC)

CC-5: Transmission system Part -I **Credits 06**

C5T: Transmission system Part –I **Credits 04**

Course Contents:

Unit-I: General principle, objectives and types (Manual, Semi-automatic, Automatic, Hydraulic transmission)

Unit-II: Gear boxes, resistance to motion of a vehicle, power required for propulsion

Unit-III: acceleration and hill climbing, necessity of gear box, function and types of gears, synchromesh gear box, free wheel drive, gear lubrication, transmission troubles.

C5P: Practical **Credits 02**

1. Over hauling, sliding mesh, constant mesh and synchromesh gear box and other gear box.
2. Moulds – Describe of Mould materials, Types of sand, Sand moulding, Pit moulding, machine moulding.

3. Melting practice. Types of furnaces with specific application Cupola furnace, Electric arc furnace.

4. Special casting processes die casting, centrifugal casting, investment casting, Shell moulding

5. Casting defects & its remedies. Green sand mould making process

6. Patterns - Material used, types, Patterns allowances, Cores, Core allowances. Core Prints.

CC-6: Transmission System Part –II **Credits 06**

C6T: Transmission System Part -II **Credits 04**

Course Contents:

Unit-I Clutch System: Function, types, clutch linkage, clutch facing &friction material, common faults.

Unit-II: Propeller Shaft: Types, fluid drives, Hotchkiss drive, universal & slip joint, Torque convertors.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:28:38; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major__SEM3.pdf

Unit-III: Final drive and rear axle: Types of final drives, differential gears and its principles of operation, rear axle and its types.

Unit- IV: Front Axle: Types and their components, swivelling mechanism, front form of motor cycle.

C6P: Practical **Credits 02**

1. Clutch: Over hauling single plate, multi plate, diaphragm clutch and other clutch.
2. Steering System and power steering: Overhauling steering linkage, steering gear box adjustment, power steering overhauling.
3. Servicing tyre: Repairing tube and tyre puncture.

CC-7: Manufacturing process or Production Engineering - 1 **Credits 06**

C7T: Manufacturing process or Production Engineering - 1 **Credits 04**

Course Contents:

Unit-I:
Mechanical properties of metals, ferrous and non ferrous metals used in engineering practice, Influence of carbon on iron and steel. Heat treatment of metals-different process-heat treatment equipments and materials.

Unit-II:
Hand tools used in different shops, bench work and fitting shop, Hand tools used in fitting shops, chipping, filing, scraping, measuring tools and gauges, limit, fit, allowance and clearance, jug stand and fixtures.

Unit-III:
Definition and concept of different mechanical process like rolling, drawing, spinning, firging, casting, welding, brazing, and soldering.

Unit-IV: Machine shops- Elementary ideas about different machines like Lathe, Shaper, Grinder, Drill & Milling.

C7P: Practical **Credits 02**

1. Forgeable material and forgeability, forging temperature, Grain flow in forged parts**,** Types of Presses and hammers.
2. Forging Processes – Drop forging, Upset forging, Die forging or press forging. Hot working & Cold working.
3. Types of dies - Open Die, Closed Die (Single Impression and Multi impression) Closed Die forging operations - Fullering, Edging, Bending, Blocking, Finishing.
4. Types of rolling mills: 2 Hi, 3 Hi & 4 Hi mills. Different rolled sections.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:28:38; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major__SEM3.pdf

SEC-1: Assembling Simple Electronics Circuits **Credits 02**

SEC1T: Assembling Simple Electronics Circuits

Course Contents:

Unit- 1: Semiconductor and Diode

P-type and N-type semiconductor, Junction of P-type & N type i.e. PN junction, Barrier voltage , depletion region ,Junction Capacitance, Forward biased & reversed biased junction, Diode symbol ,circuit diagram for characteristics (forward & reversed),Characteristics of PN junction diode, Specifications:-Forward voltage drop , Reversed saturation current, maximum forward current , power dissipation, Package view of diodes of different power ratings (to be shown during practical hours) Zener diode: Construction, Symbol, Circuit diagram for characteristics of zener diode (Forward & Reverse),Zener & Avalanche Breakdown,
Zener diode specifications – zener voltage, power dissipation, break over current, dynamic resistance & maximum reverse current.

Unit- 2: Rectifiers, Filters and Power Supply

Need of rectifier , definition ,Types of rectifier – Half wave rectifier, Full wave rectifier,(Bridge & centre tapped) Circuit operation Input/output waveforms for voltage & current, Average (dc) value of current & voltage (no derivation), Ripple , ripple factor , ripple frequency , PIV of diode used , efficiency of rectifier.(no derivation only definition), Comparison of three types of rectifier, Need of filters, Types of filters- A] shunt capacitor, B] Series inductor, C] LC filter , D] - filter --- only circuit operation (no mathematical derivation),limitations & advantages 2.5 Voltage regulator- Simple voltage regulator circuit using zener, familirisation with IC regulator circuit (like 78XX , 79XX series etc.), IC 723 adjustable power supply, concept of Switch mode power supply (SMPS) block diagram only.

Unit-3: Transistors, Switching and Optoelectronics Devices

Bipolar Junction Transistor (BJT): Symbol of NPN & PNP types, Construction, Different types of package, Operation of NPN and PNP transistor – current flow, relation between different currents ,Transistor configurations – CB, CE, CC circuit diagram for input & output characteristics of each configuration, Input & output characteristics, Comparison between three configuration, Transistor parameters – input & output resistance and relation between them. Transistor specification – VCE Sat, IC Max, VCEO, ICEO, VCE Breakdown, Power dissipation. Field effect Transistor (FET): Symbol, Construction of JFET, Working principle and V-I characteristics of JFET, pinch- off voltage, drain résistance, trans conductance, amplification factor and their relationship, Enhancement and depletion type MOSFET. TRIAC, DIAC, Silicon control rectifier (SCR):-Symbol, working, application (elementary ideas only) Comparison

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:28:38; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major__SEM3.pdf

between Transistor and SCR. Elementary ideas of LED, LCD, photodiode, phototransistor and solar cell and their applications only.

Unit- 4: Transistor Biasing

Need of biasing, concept of DC load line and AC load line, selection of Q point and Stabilization, Types of biasing circuits (no mathematical derivation) – a) Fixed biased circuit, b) Collector-to-base biased circuit, c) Voltage divider bias circuit

Unit – 5: Small Signal Transistor Amplifiers

Concept of amplification----Small signal amplifier using BJT, Determination of current, voltage & power gain, Input & output resistance. Single stage CE amplifier with voltage divider bias. Its explanation. Frequency response of single stage CE Amplifier, Bel and Decibel unit. Bandwidth & its significance. Cascade Amplifiers (Multistage Amplifier), Need of Multistage Amplifiers, Gain of amplifier. Types of amplifier coupling – RC, transformer & direct coupling. Two stage amplifier circuit diagram, working (briefly), frequency response, merits & demerits & applications of each.

Unit- 6: Oscillator

Oscillator – Requirement of oscillator circuit, Barkhauson's criteria of oscillator, circuit diagram and its application only -.Phase shift oscillator, Hartley oscillator, Colpitts oscillator, Crystal oscillator

Unit – 7: Op-Amp

OP-Amp Block diagram and use of op amp as - Inverting, non inverting, summing amplifier, differentiator, integrator, buffer, comparator, Schmitt's trigger.

L=Lecture, **T**= Tutorial, **P**=Practical, **CC** = Core Course, **GE**= Generic Elective, **SEC** = Skill Enhancement Course, **TBD** = to be decided

Generic Elective (GE) (Interdisciplinary) from other Department [Paper will be of 6 credits]. Papers are to be taken from following discipline: **Physics/Electronics/Mathematics/Computer Science/Economics**

Modalities of selection of Generic Electives (GE): A student shall have to choose **04** Generic Elective (GE1 to GE4) strictly from **02** subjects / disciplines of choice taking exactly **02** courses from each subjects of disciplines. Such a student shall have to study the curriculum of Generic Elective

SEMESTER-IV

Core Course (CC)

CC-8: Chassis, Frame &Body, Brake & Braking System, Wheel &Tyres.

Credits 06

C8T: Chassis, Frame &Body, Brake & Braking System, Wheel &Tyres.

Credits 04

Course Contents:

Unit-I: Chassis, Frame and Body:

Chassis layout and its main components, design features, types of chassis and frames, materials and dimensions for auto body work, method of manufacturing and space requirements.

Unit-II: Brake and braking system:

Principles of brakes, braking mechanisms, classifications, bleeding in hydraulic system, brake troubles.

Unit-III: Wheels and tyres:

Types of tyres and their specification, tubeless tyres, radial tyres, friction due to pavement and earth in relation to wear, care and maintenance of tyres and tubes, repair and retreading of tyres.

C8P: Practical Credits 02

1: Wheel alignment and wheel balancing: toe-in, toe-out, caster angle, camber angle, king pin, inclination, adjustment and setting and wheel balance.

2: Brake system: Over hauling master cylinder, wheel cylinder, front and rear brake, air servo unit, unloaded valve, release valve, hand brake, vacuum 2uffer, single brake chamber,

3: Brake bleeding, Relining, brake shoes, servicing air tank, servicing brake valve and disc brake, demonstration of working of ABS system, sensors.

CC-9: Engine Servicing And Tuning, Garage & Service Station, Electrical System and Motor Vehicles Act.

Credits 06

C9T: Engine Servicing And Tuning, Garage & Service Station, Electrical System and Motor Vehicles Act. **Credits 04**

Course Contents:

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM4.pdf

Unit-I: **Engine servicing and tuning:**

Basic requirements of automobiles engine servicing types and procedures.

Unit-II: **Garage and service station:**

Location and layout, equipment required in a service station, types of service.

Unit-III: **Servicing of Motor vehicles:**

Signification of servicing and its types, engine tuning and various instruments used, decarbonizing of engine parts, servicing of batteries,

Unit-IV: Electrical systems, servicing of fuel injection and ignition system, lubrication system, cooling system, braking system and other accessories.

Unit-V : Inspection and Testing of motor vehicles, types of inspection , inspection card , inspection and repair accident inspection , diagnosis of faults , Laboratory road testing of motor vehicles.

Unit-VI: Concept of Motor vehicles Act, different rules of Motor vehicles Act, Motor vehicle Act with special reference to pollution control and measure required to safe drive, Effect of pollutant.

C9P: Practical Credits 02

1. Specifications of drilling machine. Types of drills and reamers
2. Basic parts and their functions – Pillar drilling machine & Radial drilling machine.
3. drilling, boring, reaming, Counter boring, countersinking, chamfering, Spot facing, Trepanning
4. Arc Welding – working Principle, component, working Applications
5. Principle & Application of Shielded metal arc welding, Submerged arc welding. TIG / MIG welding
6. Principle & Application of process Resistance welding.(Principle & Application) - Spot welding, Seam welding, Projection welding
7. Types of Brazing and soldering application process**,** Inspection of Welding defects.

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM4.pdf

CC-10: Manufacturing Process and Machine Tools-ll Credits 06

C10T: Manufacturing Process and Machine Tools-ll Credits 04

Course Contents:

Unit-I: Casting process, Permanent mould casting, semi permanent mould casting, die casting ,centrifugal casting , investment casting, continuous casting , defect in casting ,inspection of casting ,cleaning of casting.

Unit-II: Definition and concept of smithy and forging, sheet metal work, rivets and screws,

Unit-lll ; Machine Shops:- Elementary ideas about different machines like Slotting machine ,planning machine , boring machine , broaching machine , press machine.

Unit- lV: Elementary ideas about different non-traditional machine like Ultrasonic machining (USM) , Electro chemical machining (ECM) , Electrical discharge machining (EDM) , Laser beam machining (LBM)

Unit-V : Definition and concept of N.C Machine tools and C.N.C Machine tools.

C10P: Practical Credits 02

1. Transmission system: Over hauling universal joint, differential, remove and refitting propeller shaft over hauling slip joint.

2. Cutting tool nomenclature & tool signature of single point cutting tool.Orthogonal & oblique cutting, chip formation & type of chips
3. Types of lathes – Centre lathe, Capstan & Turret Lathe, CNC Lathe Specification of Centre lathe. Basic parts and their functions of centre lathe.

4. Operations and tools Centering, facing, Turning, parting off, undercutting, grooving, Knurling, boring, thread cutting

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:16; Copyright : Vidyasagar University

Skill Enhancement Course (SEC)

SEC-2: Electro Magnetism and Digital Electronics Credits 02

SEC2T: Electro Magnetism and Digital Electronics

Course Contents:

Unit-1: Steady electric current: Current density, equation of continuity, condition for the steady current, Kirchhoff's laws and analysis of multi loop circuits.
Unit-2: Magneto statics: Force on a moving charge, Lorentz force and definition of B, force on a straight current carrying conductor in a uniform magnetic field, torque on a current loop. Biot-Savart law, Ampere's circuital law, determination of magnetic fields (B) due to a straight current carrying conductor, a circular coil, a solenoid, magnetic field due to a small current loop, concept of magnetic dipole as a tiny current loop.

Unit-3: Magnetic fields in matter- magnetization (M), relation between B, H, and M, magnetic susceptibility and permeability, diamagnetic, paramagnetic and ferromagnetic materials, Curie's law, hysteresis in ferromagnetic material.

Unit-4: Electromagnetic induction and Maxwell's Equations: Faraday's law (both the integral and the differential forms), self and mutual inductances, transformers, energy stored in a coil of self inductance L, displacement current, Maxwell's equations.

Unit-5: Transients in DC: Growth and decay of current in LR circuit, charging and discharging of capacitor in CR circuit, time constants.

Unit-6: Alternating current: LR and CR circuits, complex number and their applications in AC circuits, impedance and reactance, series and parallel resonances, Q– factor, power dissipation in AC circuit, power factor.

Unit-7: Digital Electronics - binary number system, conversion from decimal to binary and vice versa. Logic gates- OR, AND, NOT gates, truth tables, de Morgan's theorem, NOR and NAND universal gates.
Combinational logic - Half adder, full adder, digital comparator, decoder, encoder (ROM), digital to analog conversion, analog to digital conversion, multiplexer.
Sequential logic - Flip - Flops - RS, D, JK, JKMS, edge triggering and locked operation, shift registers, ripple counter (binary and decade).

SEMESTER- V

List of Core Course (CC)

CC-11: Electrical System

CC-12: Estimating, Costing and Machine Design

Discipline Specific Electives (DSE)

DSE-1: Computer Integrated Manufacturing
Or
DSE-1: Alternate Fuels and Energy Systems

DSE-2: Motor Vehicle Act & Pollution Control
Or
DSE-2: Urban Transportation Requirement and Planning

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:43; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

Core Course (CC)

CC-11: Electrical System **Credits 06**

C11T : Electrical System **Credits 04**

Course Contents:

Unit-I : Generator, Alternator and Batteries, Maintenance

Various electrical Instruments in an automobile, Automobile batteries and its maintenance and function of generator, alternator, battery charging system, voltage and current regulator, self-starter and bendix drive, ignition system and its components, ignition timing, setting of contact breaker gap, spark plug, firing order, checking electrical system.

Unit – II: Lighting System

Concept of Wring system, wring diagram, colour coding with diagram.

Unit-III: Accessories and control

Horn and its type, wind screens, wiper, direction indicators and flashing units, signalling system, lamps and their types, starter switch, Speedo meter , Antitheft devices, fuel gauge, oil pressure gauge, Temperature gauge.

C11P: Electrical System (Practical) **Credits 02**

Practical

01. Disassemble the engine component:
Overhauling cylinder head rockenarm piston, connecting rod, crankshaft pulley, timing geals-chain, fly wheel, crank shaft, of multi-cylinder engine. Injector testing with bench tester Fresing and calibration of diesel engine

02. Electrical system
Battery, battery testing, ignition circuit , lighting circuit, battery charging circuit, dynamo circuit, alternator circuit, Overhauling starter motor, dynamo alternator, Wiper motors, horn operation

03. M.P.F.I system
Fuel pump overhauling, common rail service, injector testing and service, M.P.F.I Total Sensor System, Fuel line service. . Bleed air from the fuel lines

04. ECU
Carryout Identification of Electronic control Unit, Perform Set up for testing, Testing of Electronic Control Circuit. Perform Identification of various sensors installed in engine & it's

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:43; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

mounting. Check instruments & Gauges on dash board & replace defective gauges. Test Temperature sensor, Pressure senor, potentiometer, magnetic induction sensor, cam shaft sensor, crankshaft position sensor and all sensor

05. Turbocharger & super charger

Overhauling turbo charger & supercharger unit, impalas shaft inspect and impeller service.

06. Total light circuit

Trace the light circuit - test bulbs, align head lamps, aiming headlights. Changing a headlight bulb, checking of a head light switch and to replace if faulty Check the all wiring wire with MultiMate, service head light, fog light, indicator light, parking light, break light tell light , check ignition switch

CC- 12: Estimating, Costing and Machine Design — Credits 06

C12T: Estimating, Costing and Machine Design — Credits 06

Course Contents:

Unit-I: Estimating and Costing

Definition of estimating and costing, elements of costing, Determination of weight of various parts such as block, cylinder, nuts, bolts, rivets, Estimate of machining price of several parts.

Unit-II: Machine Design

Concept and definition of machine Design, Types of stress, strain such as tension, compression, shear, bearing pressure.

Unit-III: Design of simple machine parts

Design of Rivets joint such as single rivet lap joint, Double rivet lap joint, single rivet butt joint, Double rivet butt joint. Flange coupling, universal coupling, Gears.

Suggested Books/ Reading:

- Auto Electrical Technology-A.K.Babu, Tom Delton
- Industrial Management- Bhadra & Roy
- Machine Design- J.K Gupta, V.B Bhandari, R.B Gupta

Discipline Specific Electives (DSE)

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:43; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

DSE-1: Computer Integrated Manufacturing Credits 06

DSE1T: Computer Integrated Manufacturing Credits 04

Course Contents:

Unit-I: Concept of Computer Integrated Manufacturing (CIM)

Basic components of CIM, Distributed database system, distributed communication system, computer networks for manufacturing; future automated factory.

Unit-II: Computer Aided Design (CAD)

CAD hardware and software, product modeling, automatic drafting, engineering analysis, FEM design review and evaluation.

Unit-III: Computer Aided Manufacturing (CAM)

Computer assisted NC part programming; Computer assisted robot programming, computer aided process planning (CAPP), computer aided material requirements planning (MRP), computer aided production scheduling, computer aided inspection planning, computer aided inventory planning, flexible manufacturing system (FMS), concept of flexible manufacturing, Integrating
NC machines, robots, AGVs, and other NC equipment, Computer aided quality control, business functions, computer aided forecasting.

DSE-1P: Computer Integrated Manufacturing (practical) Credits 02

1. Designing practical using CAD software.
2. Practical on CAM - examples.
3. Project work

Suggested Books/ Readings

1. CAD, CAM, CIM by P.Radhakrishnan and S.Subramanyan, New Age International Publishers.
2. Computer Integrated Manufacturing by Paul G. Rankey, Prentice Hall.
3. Computer Integrated Manufacturing by Harrington J. Jr., Industrial Press, Inc., New York.
4. Computer Integrated Manufacturing by K.Rathmill and P.Macconal, IFS Publications.
5. Automation, Production Systems and Computer Integrated Manufacturing by M. P. Groover, Prentice Hall.

Or

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:43; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

DSE-1: Alternate Fuels and Energy Systems Credits 06

DSE1T: Alternate Fuels and Energy Systems Credits 04

Course Contents:

Unit-I: Introduction to alternate fuels and energy systems:

Estimation of petroleum reserve; Need for alternate fuel; Availability and properties of alternate fuels; general use of alcohols, LPG, Hydrogen, Ammonia, CNG, and LNG; Vegetable oils and Biogas; Merits and demerits of various alternate fuels.

Unit-II: Alcohols:

Properties as engine fuels; alchohols and gasoline blends; Combustion characteristics in engines; emission characteristics.

Unit-III: Natural Gas, LPG, Hydrogen and Biogas

Availability of CNG, properties modification required to use in engines-performance and emission characteristics of CNG using LPG in SI & CI engines. Performance and emission for LPG, Hydrogen; Storage and handling, performance and safety aspects; Vegetable Oils - Various vegetable oils for engines, esterification, performance and emission characteristics

Unit-IV: Electrical and Solar Powered Vehicles:

Layout of an electric vehicle, Advantage and limitations, Specifications-System component, Electronic control system-High energy and power density batteries, Hybrid vehicle, Solar powered vehicles

DSE-1P: Alternate Fuels and Energy Systems (practical) Credits 02

1. Physical demonstration of engines powered with alternative fuels/ energies
2. Perform Checking of petroleum and alternate fuel engine
3. Training on Solar/ Electrical powered vehicle.
4. Laboratory note book and Viva Voce: Students will be required to maintain records of all works done in connection with the topic taught in this paper.
5. Visit to industry / Project work

Suggested Books/ Readings

1. Maheswar Dayal, Energy today & tomorrow, I & B Horishr India,1982
2. Nagpal, Power Plant Engineering, Khanna Publishers,1991.
3. Alchohols and Motor fuels progress in technology, Series No.19,SAEPublicartion USA 1980.
4. SAE paper Nos.840367, 841156,841333,841334.
5. The properties and performance of modern alternate fuels SAE paper No 841210.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:43; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

6. Bechtold.R.L. Alternative Fuels Guide Book, SAE, 1997.

DSE- 2: Motor Vehicle Act & Pollution Control Credits 06

DSE2T: Motor Vehicle Act & Pollution Control Credits 04

Course Contents:

Unit I: Motor vehicle act
Various section of the motor vehicle act, Licensing of drivers of motor vehicles, Registration of motor vehicles, Control of transport vehicles, Control of traffic, Insurance of motor vehicles, Offence - Penalties and Procedure, Mandatory sings, Accident claims, Accident claims tribunals.

Unit II: Introduction
Vehicle population assessment in metropolitan cities and contribution to pollution, effects on human health and environment, global warming, types of emission, transient operational effects on pollution.

Unit III: Pollutant Formation in SI Engines
Pollutant formation in SI Engines, mechanism of HC and CO formation in four stroke and two stroke SI engines, NOx formation in SI engines, effects of design and operating variables on emission formation, control of evaporative emission. Two stroke engine pollution.

Unit IV: Pollutant Formation in CI Engines
Pollutant formation in CI engines, smoke and particulate emissions in CI engines, effects of design and operating variables on CI engine emissions, Nox formation and control. Noise pollution from automobiles, measurement and standards

Unit V: Measurement Techniques Emission Standards and Test Procedure
NDIR, FID, Chemiluminescent analyzers, Gas Chromatograph, smoke meters, emission standards, driving cycles - USA, Japan, Euro and India. Test procedures - ECE, FTP Tests. SHED Test - chassis dynamometers, dilution tunnels

DSE2P: Motor Vehicle Act & Pollution Control (Practical) Credits 02

List of Practical

1. Identification of Informatory, Warning and Mandatory Road Signs.
2. Knowing various traffic signals.
3. Familiarising with layout and identifying various items and parts of various emission controlling system e.g :-EGR system, Cat Con , PCV System and Fuel vapour Purge Control System.
4. Laboratory note book and Viva Voce.

Or

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

DSE-2: Urban Transportation Requirement & Planning Credits 06

DSE2T: Urban Transportation Requirement & Planning Credits 04

Course Contents:

Unit 1: Urban Transportation System Planning

- Role of transportation in urban development
- Transportation problems in urban areas
- Purpose of transportation planning
- Transportation planning process and factors affecting it
- Travel demand and actors affecting it
- Urban transport forecasting

Unit 2: Transportation Surveys

- Study area and zoning
- Survey Types: Home interview surveys, Commercial vehicle surveys, Taxi surveys, Road side interview surveys, Post card questionnaire surveys, Registration number surveys, Tag surveys, Public transport surveys, Telephone surveys.
- Inventory of existing transport Facilities

Unit 3: Trip Generation and Distribution

- Trip generation: Trip purpose, Problems of trip generation
- Factors governing trip generation and attraction rates
- Trip distribution
- Methods of trip distribution: Uniform factor, Average factor, Detroit, Fratar, Furness and Time factor method
- Problems based on trip distribution

Unit 4: Transportation Plan Preparation

- Definitions: corridor, corridor traffic forecasting, corridor traffic study, count, segment, point, segment capacity, screen line
- Corridor identification
- Mass transit system
- Urban mass rapid transit system
- Rail based transit – Metro, Light rail transit system (LRT), Mono rail, Sky rail
- Road based transit – Bus rapid transit system (BRTS), Electric trolley bus, commuter Bus / City

DSE2P: Urban Transportation Requirement & Planning (Practical) Credits 02

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:29:43; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM5.pdf

List of Practical:

- Identifying problems like parking, delay at intersection - students will make a brief report regarding problems.
- Make any two transport survey and prepare a report of outcome.
- Prepare write up on transportation planning process.
- Model project on Urban mass rapid transit system.

Suggested Books/ Readings

1. Kadiyali, L. R., Traffic Engineering and Transportation Planning, Khanna Publishers, New Delhi
2. Hutchison, B. G., Introduction to Transportation Engg and Planning, McGraw-Hill Book Co.
3. Morlok, Edward K., Introduction to Transportation Engg. and Planning. McGraw-Hill Book Co.
4. Vuchic, Vukan R, Urban Public Transit System and Technology, PHI Learning, New Delhi
5. The properties and performance of modern alternate fuels SAE paper No 841210.
6. Dickey, John W. Metropolitan Transportation Planning, McGraw-Hill Book Co.

Core Course (CC)

CC-13: Automotive Air Conditioning — Credits 06

C13T : Automotive Air Conditioning — Credits 04

Course Contents:

Unit-I : Air-conditioning Fundamentals

Basic air conditioning system - location of air conditioning components in a car, schematic layout of a refrigeration system, compressor components, condenser and high pressure service ports, thermostatic expansion valve, expansion valve calibration, controlling evaporator temperature, evaporator pressure regulator, evaporator temperature regulator.

Unit – II: Air Conditioner - Heating System

Automotive heaters, manually controlled air conditioner, heater system, automatically controlled air conditioner and heater systems, automatic temperature control, air conditioning protection, engine protection.

Refrigerant: Containers handling refrigerants, tapping into the refrigerant container, refrigeration system diagnosis, diagnostic procedure, ambient conditions affecting system pressures.

Unit-III: Air Routing and Temperature Control

Objectives, evaporator airflow through the recirculating unit, automatic temperature control, duct system, controlling flow, vacuum reserve, testing the air control and handling systems.

Unit-IV: Air Conditioning Service

Air conditioner maintenance and service, servicing heater system removing and replacing components, trouble shooting of air controlling system, compressor service.

C-13P: Automotive Air Conditioning (practical) — Credits 02

1. Layout of car AC system
2. Construction and operation of condenser and evaporator.
3. Construction and operation of heating system.
4. Case study of AC system.
5. Controlling system of AC.
6. Servicing of AC system.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:31:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM6.pdf

Suggested Books/ Reading:

1. William H. Crouse and Donald I. Anglin “Automotive Air conditioning” McGraw Hill
2. Mitchell information Services, Inc “Mitchell Automatic Heating and Air Conditioning Systems” - Prentice Hall.
3. Paul Weiser “Automotive Air Conditioning” Reston Publishing Co.
4. MacDonald, K. I. , “Automotive Air Conditioning”, Theodore Audel series
5. Goings L. F. “Automotive Air Conditioning” American Technical services
6. Boyce H. Dwiggins “Automotive Air Conditioning”, Delmar

CC- 14: Vehicle Performance and Testing — Credits 06

C14T: Vehicle Performance and Testing — Credits 04

Course Contents:

Unit-I: Vehicle Performance Parameters

Vehicle Performance parameters, Fuel economy, acceleration, deceleration, grad ability, top speed, handling, comfort, life durability, EGR systems, and Vehicular systems: Suspension steering, Brakes & carriage unit testing, test procedure. Test procedure for gear box noise and shifting force.

Unit-II: Vehicle Testing

Vehicle Testing - Road test, Free acceleration test, Coast down test, Passer by noise test, Wheel alignment and balancing test, Test tracks û proving ground testing, high speed track, pavement track, corrugated track, mud track, steering pad, gradient track, deep wading through shallow water, Laboratory testing û testing on chassis dynamometer transition testing- Euro III onwards, accelerated testing, Virtual testing, Evaporative emission testing, Oil consumption testing.

Unit-III: Collisions and Crash Testing

Crash testing: Human testing, Dummies, crashworthiness, pole crash testing, rear crash testing, vehicle to vehicle impact, side impact testing, crash test sensors, sensor mounting, crash test data acquisition, Braking distance test.

Unit-IV: Noise Vibration

Noise & vibration: Mechanism of noise generation, engine noise & vibration, causes and remedies, road shocks wind noise & measurement, vehicle measurement testing. Instrumentation for functional tests, Battery testing, endurance test.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:31:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM6.pdf

C-14P: Vehicle Performance and Testing (practical) **Credits 02**

1. Engine / vehicle performance, P.V. diagram, mechanical efficiency, volumetric efficiency and losses of fuel economy.
2. Construction and working principle of EGR and catalytic convertor. Testing procedure of suspension, brake and steering system.
3. Exhaust emission testing, oil consumption testing and road test.
4. Construction and operation of automatic clutch epicyclic transmission ad troque converter. Testing of clutch, gear box, final drive and differential
5. Safety of driver and occupants like seat belt, air bags, GPS, ESP, functions and operations.

Suggested Books/ Reading:

1. SAE Transaction Papers 831814/820346/820367/820371/820375
2. SAE handbook vol 2 & 3
3. Automobile Engineering by Ramlingam
4. Automobile engineering by Kripal Singh
5. Automotive Mechanics by Josepf Heitner
6. ARAI vehicle emission test manual
7. Automobile Engineering by Rangawala

Discipline Specific Electives (DSE)

DSE-3: Automotive Safety **Credits 06**

DSE3T: Automotive Safety **Credits 04**

Course Contents:

Unit-I: Safety Concepts

Active safety, driving safety, conditional safety, perceptibility safety, operating safety- passive safety: exterior safety, interior safety, deformation behaviour of vehicle body, and speed and acceleration characteristics of passenger compartment on impact.

Unit-II: Safety Equipments

Seat belt, regulations, automatic seat belt tightener system, collapsible steering column, tiltable steering wheel, air bags, electronic system for activating air bags, bumper design for safety.

Unit-III: Collision Warning and Avoidance

Collision warning system, causes of rear end collision, frontal object detection, rear vehicle

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:31:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM6.pdf

object detection system, object detection system with braking system interactions.

Unit-IV: Comfort and Convenience System

Steering and mirror adjustment, central locking system, Garage door opening system, tyre pressure control system, rain sensor system, environment information system.

DSE-3P: Automotive Safety (practical) **Credits 02**

1. Aerodynamic body shape advantages
2. Use of seat belt, automatic seat belt adjustment system
3. Collapsible steering column servicing, Adjustment of steering wheel
4. Operation of front and rear vehicle object detection system
5. Rear view mirror adjustment
6. Operation of central locking system tyre pressure control system, Dicky opening system and rain sensor system
7. Servicing of door hinged and door lock.

Suggested Books/ Readings

- Bosch - "Automotive Handbook" - 5th edition - SAE publication - 2000.
- J. Powloski - "Vehicle Body Engineering" - Business books limited, London
- Ronald. K. Jurgen - "Automotive Electronics Handbook" - Second edition- McGraw-Hill

Or

DSE-3: Two and Three Wheelers Credits 06

DSE3T: Two and Three Wheelers **Credits 04**

Course Contents:

Unit-I: Power system:

Two stroke SI engine, four stroke SI engine; merits and demerits, Symmetrical and unsymmetrical port timing diagrams, Types of scavenging processes, merits and demerits, scavenging pumps, Rotary valve engine; Fuel system, Lubrication system. Magneto coil and battery coil spark ignition system, electronic ignition system; Starting system, Kick starter system.

Unit-II: Chassis Systems:

Mainframe and its types. Chassis and shaft drive, Single, multiple plates and centrifugal clutches. Gear box and gear controls. Front and rear suspension systems; Shock absorbers; Panel meters and controls on handle bar.

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:31:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM6.pdf

Unit-III: Brakes, Wheels and Tyres

Drum brakes, disc brakes, front and rear brake links, layouts, Spoked wheel, cast wheel, disc Wheel, disc types; Tyres and tubes.

Unit-IV: Case studies:

Two Wheelers: Case study of major Indian models of motorcycles, scooters and mopeds, TVS mopeds and motorcycles, Hero Honda motorcycles, Bajaj scooters and motorcycles, Yamaha, Enfield motorcycles; Servicing and maintenance.
Three Wheelers: Case study of Indian models, Auto rickshaws, pickup van, delivery van and trailer, Maintenance: daily, weekly, monthly, Fault tracing.

DSE-3P: Two and Three Wheelers (practical) **Credits 02**

1. Construction and operation of 4stroke SI engine.
2. Construction and operation of 2stroke petrol.
3. Fuel supply circuit of 2 wheeler and 3 wheeler.
4. Operation of lubricating system.
5. Operation of Magneto coil and Magneto coil ignition.
6. Operation electronic ignition.
7. Starting system and operation.
8. Construction and working of clutching system.
9. Construction and operation of Transmission Gear box.
10. Construction and operation of suspension system.
11. Construction and operation of Braking system.
12. Fitment and operation of wheels, tyre and tube.
13. Case study of motor cycles and scooter.

Suggested Books/ Readings

- Irving. P. E. - Motor Cycle Engineering - Temple Press Book, London
- The Cycle Motor Manual - Temple Press Limited, London
- Encyclopedia of Motorcycling - 20 volume Marshall, Cavensih, UK
- Brayant R. V, Vespa - Maintenance and Repair Series - S. Chand & Co. , New Delhi
- Raymond Broad Lambretta - A Practical Guide to maintenance and repair - S. Chand & Co., New Delhi

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:31:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM6.pdf

DSE- 4: Industrial Managements Credits 06

DSE4T: Industrial Managements Credits 04

Course Contents:

Unit-I : Organisation Management

Concept of organisation, Structure, Types, function of organisation, Concept of stock.

Unit – II: Human Resource Management (HRM)

Introduction and Definition of human resource management (HRM), Scope and function of HRM, Planning of HRM, Selection process, Recruitment and selection, Training and Development.

Unit-III: Financial management

Object and function of financial of financial management, Capital generation and management, Type of taxes.

Unit-IV: Materials management

Importance of material managements, function of material managements, organisation structure of materials managements, function of store department.

Unit-V: Safety Managements

Types and causes of industrial accidents, Elements of safety program, Steps for preventing industrial accidents, Safety program, Safety committee.

DSE4P: Practical Credits 02

List of Practical

1. Two week training at Automotive/ ancillary industry for Management Practices
2. Case studies
3. PPT presentation on recent HR practices
4. Viva Voce

Suggested Books/ Readings

- Industrial Management, S.C. Sharma, Khanna Publishing House

Downloaded from Vidyasagar University by 103.77.136.110 on 26 July 2023 : 14:31:36; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/MAJOR/Automobile_Maintenance_Major_SEM6.pdf

Or

DSE-4: Industrial Training — Credits 06

DSE4P: Industrial Training — Credits 06

1. Industrial Training of 4 (four) weeks
2. Training may be done from industries/Skill knowledge providers (SKPs)/Sector Skill Councils (SSCs)/Training centers/Institutes dealing with automotive
3. Trainings are to be carried out during summer vacations or Semester break
4. Training Report submission
5. Viva - Voce.

Evaluation- Cumulative performance will be evaluated in Semester VI.

Semester-1

Core Course

CC-1 :ORGANIC CHEMISTRY-I Credits 06

(Credits: Theory-04, Practicals-02)

C1T1 : ORGANIC CHEMISTRY-I Credits 04

Theory: 60 Lectures

Basics of Organic Chemistry

Bonding and Physical Properties (25 Lectures)

Valence Bond Theory: concept of hybridisation, shapes of molecules, resonance (including hyperconjugation); calculation of formal charges and double bond equivalent (DBE); orbital pictures of bonding (sp^3, sp^2, sp: C-C, C-N & C-O systems and *s-cis* and *s-trans* geometry for suitable cases).

Electronic displacements: inductive effect, field effect, mesomeric effect, resonance energy; bond polarization and bond polarizability; electromeric effect; steric effect, steric inhibition of resonance.

MO theory: qualitative idea about molecular orbitals, bonding and antibonding interactions, idea about σ, σ^*, π, π^*, n – MOs; basic idea about Frontier MOs (FMO); concept of HOMO, LUMO and SOMO; interpretation of chemical reactivity in terms of FMO interactions; sketch and energy levels of π MOs of i) acyclic p orbital system (C=C, conjugated diene, triene, allyl and pentadienyl systems) ii) cyclic p orbital system (neutral systems: [4], [6]-annulenes; charged systems: 3-,4-,5-membered ring systems); Hückel's rules for aromaticity up to [10]-annulene (including mononuclear heterocyclic compounds up to 6-membered ring); concept of antiaromaticity and homoaromaticity; non-aromatic molecules; Frost diagram; elementary idea about α and β; measurement of delocalization energies in terms of β for buta-1,3-diene, cyclobutadiene, hexa-1,3,5-triene and benzene.

Physical properties: influence of hybridization on bond properties: bond dissociation energy (BDE) and bond energy; bond distances, bond angles; concept of bond angle strain (Baeyer's strain theory); melting point/boiling point and solubility of common organic compounds in terms of covalent & non-covalent intermolecular forces; polarity of molecules and dipole moments; relative stabilities of isomeric hydrocarbons in terms of heat of hydrogenation, heat of combustion and heat of formation.

General Treatment of Reaction Mechanism I (10 Lectures)

Mechanistic classification: ionic, radical and pericyclic (definition and example);

reaction type: addition, elimination and substitution reactions (definition and example); nature of bond cleavage and bond formation: homolytic and heterolytic bond fission, homogenic and

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

heterogenic bond formation; curly arrow rules in representation of mechanistic steps; reagent type: electrophiles and nucleophiles (elementary idea); electrophilicity and nucleophilicity in terms of FMO approach.

Reactive intermediates: carbocations (carbenium and carbonium ions), carbanions, carbon radicals, carbenes: generation and stability, structure using orbital picture and electrophilic/nucleophilic behavior of reactive intermediates (elementary idea).

Stereochemistry I **(25 Lectures)**

Bonding geometries of carbon compounds and representation of molecules: tetrahedral nature of carbon and concept of asymmetry; Fischer, sawhorse, flying-wedge and Newman projection formulae and their inter translations.

Concept of chirality and symmetry: symmetry elements and point groups ($C_{\infty v}$, C_{nh}, C_{nv}, C_n, $D_{\infty h}$, D_{nh}, D_{nd}, D_n, S_n (C_s, C_i); molecular chirality and centre of chirality; asymmetric and dissymmetric molecules; enantiomers and diastereomers; concept of epimers; concept of stereogenicity, chirotopicity and pseudoasymmetry; chiral centres and number of stereoisomerism: systems involving 1/2/3-chiral centre(s) (AA, AB, ABA and ABC types).

Relative and absolute configuration: D/L and *R/S* descriptors; *erythro/threo* and *meso* nomenclature of compounds; *syn/anti* nomenclatures for aldols; *E*/*Z* descriptors for C=C, conjugated diene, triene, C=N and N=N systems; combination of *R/S*- and *E/ Z*- isomerisms.

Optical activity of chiral compounds: optical rotation, specific rotation and molar rotation; racemic compounds, racemisation (through cationic, anionic, radical intermediates and through reversible formation of stable achiral intermediates); resolution of acids, bases and alcohols via diastereomeric salt formation; optical purity and enantiomeric excess; invertomerism of chiral trialkylamines.

CC1P1 - CHEMISTRY LAB- I Credits 02

(60 Lectures)

1. Separation, based upon solubility, by using common laboratory reagents like water (cold, hot), dil. HCl, dil. NaOH, dil. $NaHCO_3$, *etc*., of components of a binary solid mixture; purification of **any one** of the separated components by crystallization and determination of its melting point. The composition of the mixture may be of the following types: Benzoic acid/*p*-Toluidine; *p*-Nitrobenzoic acid/*p*-Aminobenzoic acid; *p*-Nitrotolune/*p*-Anisidine; *etc*.

2. **Determination of boiling point** of common organic liquid compounds e.g., ethanol, cyclohexane, chloroform, ethyl methyl ketone, cyclohexanone, acetylacetone, anisole, crotonaldehyde, mesityl oxide, *etc*. [Boiling point of the chosen organic compounds should preferably be less than 160 °C]

3. **Identification of a Pure Organic Compound**

Solid compounds: oxalic acid, tartaric acid, citric acid, succinic acid, resorcinol, urea, glucose, cane sugar, benzoic acid and salicylic acid

Liquid Compounds: formic acid, acetic acid, methyl alcohol, ethyl alcohol, acetone, aniline, dimethylaniline, benzaldehyde, chloroform and nitrobenzene

CC-2: PHYSICAL CHEMISTRY-I Credits 06

(Credits: Theory-04, Practicals-02)

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

C2 T2 : PHYSICAL CHEMISTRY-I Credits 04

(Theory: 60 Lectures)

Kinetic Theory and Gaseous state (20 Lectures)

Kinetic Theory of gases: Concept of pressure and temperature; Collision of gas molecules; Collision diameter; Collision number and mean free path; Frequency of binary collisions (similar and different molecules); Wall collision and rate of effusion

Maxwell's distribution of speed and energy: Nature of distribution of velocities, Maxwell's distribution of speeds in one, two and three dimensions; Kinetic energy distribution in one, two and three dimensions, calculations of average, root mean square and most probable values in each case; Calculation of number of molecules having energy ≥ ε, Principle of equipartition of energy and its application to calculate the classical limit of molar heat capacity of gases

Real gas and virial equation: Deviation of gases from ideal behavior; compressibility factor; Boyle temperature; Andrew's and Amagat's plots; van der Waals equation and its features; its derivation and application in explaining real gas behaviour, other equations of state (Berthelot, Dietrici); Existence of critical state, Critical constants in terms of van der Waals constants; Law of corresponding states; virial equation of state; van der Waals equation expressed in virial form and significance of second virial coefficient; Intermolecular forces (Debye, Keesom and London interactions; Lennard-Jones potential - elementary idea)

Chemical Thermodynamics (25 Lectures)

Zeroth and 1st law of Thermodynamics: Intensive and extensive variables; state and path functions; isolated, closed and open systems; zeroth law of thermodynamics; Concept of heat, work, internal energy and statement of first law; enthalpy, *H*; relation between heat capacities, calculations of *q*, *w*, *U* and *H* for reversible, irreversible and free expansion of gases (ideal and van der Waals) under isothermal and adiabatic conditions; Joule's experiment and its consequence.

Thermochemistry: Standard states; Heats of reaction; enthalpy of formation of molecules and ions and enthalpy of combustion and its applications; Laws of thermochemistry; bond energy, bond dissociation energy and resonance energy from thermochemical data, Kirchhoff's equations and effect of pressure on enthalpy of reactions; Adiabatic flame temperature; explosion temperature

Second Law: Need for a Second law; statement of the second law of thermodynamics; Concept of heat reservoirs and heat engines; Carnot cycle; Physical concept of Entropy; Carnot engine and refrigerator; Kelvin – Planck and Clausius statements and equivalence of the two statements with entropic formulation; Carnot's theorem; Values of §dQ/T and Clausius inequality; Entropy change of systems and surroundings for various processes and transformations; Entropy and unavailable work; Auxiliary state functions (G and A) and their variation with T, P and V. Criteria for spontaneity and equilibrium.

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

Thermodynamic relations: Maxwell's relations; Gibbs- Helmholtz equation, Joule-Thomson experiment and its consequences; inversion temperature; Joule-Thomson coefficient for a van der Waals gas; General heat capacity relations

c) Chemical kinetics (15 Lectures)

Rate law, order and molecularity: Introduction of rate law, Extent of reaction; rate constants, order; Forms of rates of First, second and nth order reactions; Pseudo first order reactions (example using acid catalyzed hydrolysis of methyl acetate); Determination of order of a reaction by half-life and differential method; Opposing reactions, consecutive reactions and parallel reactions (with explanation of kinetic and thermodynamic control of products; all steps first order)

Role of T and theories of reaction rate: Temperature dependence of rate constant; Arrhenius equation, energy of activation; Rate-determining step and steady-state approximation – explanation with suitable examples; Collision theory; Lindemann theory of unimolecular reaction; outline of Transition State theory (classical treatment)

Homogeneous catalysis: Homogeneous catalysis with reference to acid-base catalysis; Primary kinetic salt effect; Enzyme catalysis; Michaelis-Menten equation, Lineweaver-Burk plot, turn-over number

Autocatalysis; periodic reactions

Generic Elective Syllabus

GE-1 [Interdisciplinary for other department]

GE-1 : ATOMIC STRUCTURE, CHEMICAL PERIODICITY, ACIDS AND BASES, REDOX REACTIONS, GENERAL ORGANIC CHEMISTRY & ALIPHATIC HYDROCARBONS. Credits 06

GE1 T1 : ATOMIC STRUCTURE, CHEMICAL PERIODICITY, ACIDS AND BASES, REDOX REACTIONS, GENERAL ORGANIC CHEMISTRY & ALIPHATIC HYDROCARBONS. Credits 04
Theory: 60 Lectures

Section A: Inorganic Chemistry-I (30 Lectures)

Atomic Structure (10 Lectures)

Bohr's theory for hydrogen atom (simple mathematical treatment), atomic spectra of hydrogen and Bohr's model, Sommerfeld's model, quantum numbers and their significance, Pauli's exclusion principle, Hund's rule, electronic configuration of many-electron atoms, *Aufbau* principle and its limitations.

Chemical Periodicity (05 Lectures)
Classification of elements on the basis of electronic configuration: general characteristics of s-, p-, d- and f-block elements. Positions of hydrogen and noble gases. Atomic and ionic radii, ionization potential, electron affinity, and electronegativity; periodic and group-wise variation of above properties in respect of s- and p- block elements.

Acids and bases (10 Lectures)
Brönsted–Lowry concept, conjugate acids and bases, relative strengths of acids and bases, effects of substituent and solvent, differentiating and levelling solvents. Lewis acid-base concept, classification of Lewis acids and bases, Lux-Flood concept and solvent system concept. Hard and soft acids and bases (HSAB concept), applications of HSAB process.

Redox reactions (05 Lectures)
Balancing of equations by oxidation number and ion-electron method oxidimetry and reductimetry.

***Section B: Organic Chemistry-I* (30 Lectures)**

Fundamentals of Organic Chemistry (5 Lectures)
Electronic displacements: inductive effect, resonance and hyperconjugation; cleavage of bonds: homolytic and heterolytic; structure of organic molecules on the basis of VBT; nucleophiles electrophiles; reactive intermediates: carbocations, carbanions and free radicals.

Stereochemistry (8 Lectures)
Different types of isomerism; geometrical and optical isomerism; concept of chirality and optical activity (up to two carbon atoms); asymmetric carbon atom; elements of symmetry (plane and centre); interconversion of Fischer and Newman representations; enantiomerism and diastereomerism, *meso* compounds; *threo* and *erythro,* D and L, *cis* and *trans* nomenclature; CIP Rules: *R/S* (upto 2 chiral carbon atoms) and *E/Z* nomenclature.

Nucleophilic Substitution and Elimination Reactions (5 Lectures)

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

Nucleophilic substitutions: S_N1 and S_N2 reactions; eliminations: E1 and E2 reactions (elementary mechanistic aspects); Saytzeff and Hofmann eliminations; elimination *vs* substitution.

Aliphatic Hydrocarbons **(12 Lectures)**

Functional group approach for the following reactions (preparations & reactions) to be studied in context to their structures.

Alkanes: (up to 5 Carbons). *Preparation:* catalytic hydrogenation, Wurtz reaction, Kolbe's synthesis, from Grignard reagent. *Reactions:* mechanism for free radical substitution: halogenation.

Alkenes: (up to 5 Carbons). *Preparation:* elimination reactions: dehydration of alcohols and dehydrohalogenation of alkyl halides; *cis* alkenes (partial catalytic hydrogenation) and *trans* alkenes (Birch reduction). *Reactions: cis*-addition (alkaline $KMnO_4$) and *trans*-addition (bromine) with mechanism, addition of HX [Markownikoff's (with mechanism) and anti-Markownikoff's addition], hydration, ozonolysis, oxymercuration-demercuration and hydroboration-oxidation reaction.

Alkynes: (up to 5 Carbons). *Preparation:* acetylene from CaC_2 and conversion into higher alkynes; by dehalogenation of tetra halides and dehydrohalogenation of vicinal dihalides.

Reactions: formation of metal acetylides, addition of bromine and alkaline $KMnO_4$, ozonolysis and oxidation with hot alkaline $KMnO_4$.

GE1 P1: LAB: ATOMIC STRUCTURE, CHEMICAL PERIODICITY, ACIDS AND BASES, REDOX REACTIONS, GENERAL ORGANIC CHEMISTRY & ALIPHATIC HYDROCARBONS

Credits 02

60 Lectures

Section A: Inorganic Chemistry –LAB (30 Lectures)

1. Estimation of sodium carbonate and sodium hydrogen carbonate present in a mixture.
2. Estimation of oxalic acid by titrating it with $KMnO_4$.
3. Estimation of water of crystallization in Mohr's salt by titrating with $KMnO_4$.
4. Estimation of Fe (II) ions by titrating it with $K_2Cr_2O_7$ using internal indicator.
5. Estimation of Cu (II) ions iodometrically using $Na_2S_2O_3$.

Section B: Organic Chemistry- LAB (30 Lectures)

Qualitative Analysis of Single Solid Organic Compound(s)
Experiment A: Detection of special elements (N, Cl, and S) in organic compounds.

Experiment B: Solubility and Classification (solvents: H2O, dil. HCl, dil. NaOH)

Experiment C: Detection of functional groups: Aromatic-NO2, Aromatic -NH2, - COOH, carbonyl (no distinction of –CHO and >C=O needed), -OH (phenolic) in solid organic compounds.

Experiments A - C with unknown (at least 6) solid samples containing not more than two of the above type of functional groups should be done.

Semester-II
Core Course

Core-3

CC-3: INORGANIC CHEMISTRY-I **Credits 06**
(Credits: Theory-04, Practicals-02)

C3T: INORGANIC CHEMISTRY-I **Credits 04**
Theory: 60 Lectures

Extra nuclear Structure of atom (18 Lectures)

Bohr's theory, its limitations and atomic spectrum of hydrogen atom; Sommerfeld's Theory. Wave mechanics: de Broglie equation, Heisenberg's Uncertainty Principle and its significance, Schrödinger's wave equation, significance of ψ and ψ^2. Quantum numbers and their significance. Radial and angular wave functions for hydrogen atom. Radial and angular distribution curves. Shapes of *s*, *p*, *d* and *f* orbitals. Pauli's Exclusion Principle, Hund's rules and multiplicity, Exchange energy, Aufbau principle and its limitations, Ground state Term symbols of atoms and ions for atomic number upto 30.

Chemical periodicity (8 Lectures)

Modern IUPAC Periodic table, Effective nuclear charge, screening effects and penetration, Slater's rules, atomic radii, ionic radii (Pauling's univalent), covalent radii, lanthanide contraction. Ionization potential, electron affinity and electronegativity (Pauling's, Mulliken's and Allred-Rochow's scales) and factors influencing these properties, group electronegativities. Group trends and periodic trends in these properties in respect of s-, p- and d-block elements. Secondary periodicity, Relativistic Effect, Inert pair effect.

Acid-Base reactions (16 Lectures)

Acid-Base concept: Arrhenius concept, theory of solvent system (in H_2O, NH_3, SO_2 and HF), Bronsted-Lowry's concept, relative strength of acids, Pauling's rules. Lux-Flood concept, Lewis concept, group characteristics of Lewis acids, solvent levelling and differentiating effects. Thermodynamic acidity parameters, Drago-Wayland equation. Superacids, Gas phase acidity and proton affinity; HSAB principle. Acid-base equilibria in aqueous solution (Proton transfer equilibria in water), pH, buffer. Acid-base neutralisation curves; indicator, choice of indicators.

Redox Reactions and precipitation reactions (18 Lectures)

Ion-electron method of balancing equation of redox reaction. Elementary idea on standard redox potentials with sign conventions, Nernst equation (without derivation). Influence of complex formation, precipitation and change of pH on redox potentials; formal potential. Feasibility of a redox titration, redox potential at the equivalence point, redox indicators. Redox potential diagram (Latimer and Frost diagrams) of common elements and their applications. Disproportionation and comproportionation reactions (typical examples)

C3P: CHEMISTRY (LAB) Credits 02

60 Lectures

Acid and Base Titrations:

1. Estimation of carbonate and hydroxide present together in mixture
2. Estimation of carbonate and bicarbonate present together in a mixture.
3. Estimation of free alkali present in different soaps/detergents.

Oxidation-Reduction Titrimetric

1. Estimation of Fe(II) using standardized $KMnO_4$ solution
2. Estimation of oxalic acid and sodium oxalate in a given mixture
3. Estimation of Fe(II) and Fe(III) in a given mixture using $K_2Cr_2O_7$ solution.
4. Estimation of Fe(III) and Mn(II) in a mixture using standardized $KMnO_4$ solution
5. Estimation of Fe(III) and Cu(II) in a mixture using $K_2Cr_2O_7$.
6. Estimation of Fe(III) and Cr(III) in a mixture using $K_2Cr_2O_7$.

Core-4

CC-4: ORGANIC CHEMISTRY-II **Credits 06**

(Credits: Theory-04, Practicals-02)

C4T ORGANIC CHEMISTRY-II **Credits 02**
Theory: 60 Lectures

Stereochemistry II **(20 Lectures)**

Chirality arising out of stereoaxis: stereoisomerism of substituted cumulenes with even and odd number of double bonds; chiral axis in allenes, spiro compounds, alkylidenecycloalkanes and biphenyls; related configurational descriptors (R_a/S_a and *P/M*); atropisomerism; racemisation of chiral biphenyls; *buttressing* effect.

Concept of prostereoisomerism: prostereogenic centre; concept of (*pro*)^n-*chirality*: topicity of ligands and faces (elementary idea); *pro-R/pro-S*, *pro-E/pro-Z* and *Re/Si* descriptors; *pro-r* and *pro-s* descriptors of ligands on propseudoasymmetric centre.

Conformation: conformational nomenclature: eclipsed, staggered, *gauche*, *syn* and *anti*; dihedral angle, torsion angle; Klyne-Prelog terminology; *P/M* descriptors; energy barrier of rotation, concept of torsional and steric strains; relative stability of conformers on the basis of steric effect, dipole-dipole interaction and H-bonding; *butane gauche* interaction; conformational analysis of ethane, propane, *n*-butane, 2-methylbutane and 2,3-dimethylbutane; haloalkane, 1,2-dihaloalkanes and 1,2-diols (up to four carbons); 1,2-halohydrin; conformation of conjugated systems (*s-cis* and *s-trans*).

General Treatment of Reaction Mechanism II **(22 Lectures)**

Reaction thermodynamics: free energy and equilibrium, enthalpy and entropy factor, calculation of enthalpy change via BDE, intermolecular & intramolecular reactions.

Concept of organic acids and bases: effect of structure, substituent and solvent on acidity and basicity; proton sponge; gas-phase acidity and basicity; comparison between nucleophlicity and basicity; HSAB principle; application of thermodynamic principles in acid-base equilibria.

Tautomerism: prototropy (keto-enol, nitro - *aci*-nitro, nitroso-oximino, diazo-amino and enamine-imine systems); valence tautomerism and ring-chain tautomerism; composition of the equilibrium in different systems (simple carbonyl; 1,2- and 1,3-dicarbonyl systems, phenols and related systems), factors affecting keto-enol tautomerism; application of thermodynamic principles in tautomeric equilibria.

Reaction kinetics: rate constant and free energy of activation; concept of order and molecularity; free energy profiles for one-step, two-step and three-step reactions; catalyzed reactions: electrophilic and nucleophilic catalysis; kinetic control and thermodynamic control of reactions; isotope effect: primary and secondary kinetic isotopic effect (k_H /k_D); principle of microscopic reversibility; Hammond's postulate.

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

Substitution and Elimination Reactions **(18 Lectures)**

Free-radical substitution reaction: halogentaion of alkanes, mechanism (with evidence) and stereochemical features; reactivity-selectivity principle in the light of Hammond's postulate. *Nucleophilic substitution reactions:* substitution at sp^3 centre: mechanisms (with evidence), relative rates & stereochemical features: S_N1, S_N2, S_N2', S_N1' (allylic rearrangement) and S_Ni; effects of solvent, substrate structure, leaving group and nucleophiles (including ambident nucleophiles, cyanide & nitrite); substitutions involving NGP; role of crown ethers and phase transfer catalysts; [systems: alkyl halides, allyl halides, benzyl halides, alcohols, ethers, epoxides].

Elimination reactions: E1, E2, E1cB and Ei (pyrolytic *syn* eliminations); formation of alkenes and alkynes; mechanisms (with evidence), reactivity, regioselectivity (Saytzeff/Hofmann) and stereoselectivity; comparison between substitution and elimination; importance of Bredt's rule relating to the formation of C=C.

C4P: CHEMISTRY (LAB) **Credits 02**

(60 Lectures)

Organic Preparations

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

A. The following reactions are to be performed, noting the yield of the crude product:

1. Nitration of aromatic compounds
2. Condensation reactions
3. Hydrolysis of amides/imides/esters
4. Acetylation of phenols/aromatic amines
5. Benzoylation of phenols/aromatic amines
6. Side chain oxidation of aromatic compounds
7. Diazo coupling reactions of aromatic amines
8. Bromination of anilides using green approach (Bromate-Bromide method)
9. Redox reaction including solid-phase method
10. Green 'multi-component-coupling' reaction
11. Selective reduction of *m*-dinitrobenzene to *m*-nitroaniline

Students must also calculate percentage yield, based upon isolated yield (crude) and theoretical yield.

B. Purification of the crude product is to be made by crystallisation from water/alcohol, crystallization after charcoal treatment, or sublimation, whichever is applicable.

C. Melting point of the purified product is to be noted.

Generic Elective Syllabus

GE-2 [Interdisciplinary for other department]

GE-2 : STATES OF MATTER & CHEMICAL KINETICS, CHEMICAL BONDING & MOLECULAR STRUCTUR, p-BLOCK ELEMENTS **Credits 06**

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

(Credits: Theory-04, Practicals-02)

GE2 T : STATES OF MATTER & CHEMICAL KINETICS, CHEMICAL BONDING & MOLECULAR STRUCTUR, p-BLOCK ELEMENTS Credits 04
Theory: 60 Lectures

Section A: Physical Chemistry-I **(30 Lectures)**

Kinetic Theory of Gases and Real gases (10 Lectures)

Concept of pressure and temperature; Collision of gas molecules; Collision diameter; Collision number and mean free path; Frequency of binary collisions (similar and different molecules); Rate of effusion

Nature of distribution of velocities, Maxwell's distribution of speed and kinetic energy; Average velocity, root mean square velocity and most probable velocity; Principle of equipartition of energy and its application to calculate the classical limit of molar heat capacity of gases

Deviation of gases from ideal behavior; compressibility factor; Boyle temperature; Andrew's and Amagat's plots; van der Waals equation and its features; its derivation and application in explaining real gas behaviour; Existence of critical state, Critical constants in terms of van der Waals constants; Law of corresponding states

Viscosity of gases and effect of temperature and pressure on coefficient of viscosity (qualitative treatment only)

Liquids (06 Lectures)

Definition of Surface tension, its dimension and principle of its determination using stalagmometer; Viscosity of a liquid and principle of determination of coefficient of viscosity using Ostwald viscometer; Effect of temperature on surface tension and coefficient of viscosity of a liquid (qualitative treatment only)

Solids (06 Lectures)

Forms of solids, crystal systems, unit cells, Bravais lattice types, Symmetry elements; Laws of Crystallography - Law of constancy of interfacial angles, Law of rational indices; Miller indices of different planes and interplanar distance, Bragg's law; Structures of NaCl, KCl and CsCl (qualitative treatment only); Defects in crystals; Glasses and liquid crystals.

Chemical Kinetics (08 Lectures)

Introduction of rate law, Order and molecularity; Extent of reaction; rate constants; Rates of First, second and nth order reactions and their Differential and integrated forms (with derivation); Pseudo first order reactions; Determination of order of a reaction by half-life and differential method; Opposing reactions, consecutive reactions and parallel reactions Temperature dependence of rate constant; Arrhenius equation, energy of activation; Collision

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University

11. Pahari, S., Pahari, D., *Problems in Physical Chemistry* New Central Book Agency

Section B: Inorganic Chemistry-II **(30 Lectures)**

Chemical Bonding and Molecular Structure **(16 Lectures)**

Ionic Bonding: General characteristics of ionic bonding. Energy considerations in ionic bonding, lattice energy and solvation energy and their importance in the context of stability and solubility of ionic compounds. Statement of Born-Landé equation for calculation of lattice energy, Born-Haber cycle and its applications, polarizing power and polarizability. Fajan's rules, ionic character in covalent compounds, bond moment, dipole moment and percentage ionic character.

Covalent bonding: VB Approach: Shapes of some inorganic molecules and ions on the basis of VSEPR and hybridization with suitable examples of linear, trigonal planar, square planar, tetrahedral, trigonal bipyramidal and octahedral arrangements.

Concept of resonance and resonating structures in various inorganic and organic compounds. MO Approach: Rules for the LCAO method, bonding and antibonding MOs and their characteristics for *s-s*, *s-p* and *p-p* combinations of atomic orbitals, nonbonding combination of orbitals, MO treatment of homonuclear diatomic molecules of 1st and 2nd periods. (including idea of *s- p* mixing) and heteronuclear diatomic molecules such as CO, NO and NO+. Comparison of VB and MO approaches.

Comparative study of p-block elements: **(14 Lectures)**

Group trends in electronic configuration, modification of pure elements, common oxidation states, inert pair effect, and their important compounds in respect of the following groups of elements:

i) B-Al-Ga-In-Tl
ii) C-Si-Ge-Sn-Pb
iii) N-P-As-Sb-Bi
iv) O-S-Se-Te
v) F-Cl-Br-I

GE2 P-LAB: STATES OF MATTER & CHEMICAL KINETICS, CHEMICAL BONDING & MOLECULAR STRUCTUR, p-BLOCK ELEMENTS
(60 Lectures) Credits 02

Section A: Physical Chemistry-LAB **(15x2=30 Lectures)**

(Minimum **five** experiments to complete)
(I) Surface tension measurement (use of organic solvents excluded)
- a) Determination of the surface tension of a liquid or a dilute solution using a Stalagmometer
- b) Study of the variation of surface tension of a detergent solution with concentration

(II) Viscosity measurement (use of organic solvents excluded)
- a) Determination of the relative and absolute viscosity of a liquid or dilute solution using an Ostwald's viscometer
- b) Study of the variation of viscosity of an aqueous solution with concentration of solute

(III) Study the kinetics of the following reactions
- a) Initial rate method: Iodide-persulphate reaction
- b) Integrated rate method:
  - (i) Acid hydrolysis of methyl acetate with hydrochloric acid
  - (ii) Compare the strengths of HCl and H2SO4 by studying kinetics of hydrolysis of methyl acetate

Reference Books:

4. Dutta, S.K., *Physical Chemistry Experiments* Bharati Book Stall

Section B: Inorganic Chemistry-LAB **(30 Lectures)**

Qualitative semimicro analysis of mixtures containing three radicals. Emphasis should be given to the understanding of the chemistry of different reactions.
Acid Radicals: Cl-, Br-, I-, NO2-, NO3-, S2-, SO42-, PO43-, BO33-, H3BO3.
Basic Radicals: Na+, K+, Ca2+, Sr2+, Ba2+, Cr3+, Mn2+, Fe3+, Ni2+, Cu2+, NH4+.

Semester Total							**26**	**350**

L=Lecture, **T=** Tutorial, **P=**Practical, **CC =** Core Course, **GE**= Generic Elective, **SEC** = Skill Enhancement Course, **TBD =** to be decided

Generic Elective (GE) (Interdisciplinary) from other Department [**Four papers are to be taken and each paper will be of 6 credits**]:
Papers are to be taken from any of the following discipline: **Mathematics/Physics /Computer Sc/Statistics/Geology/Electronics/zoology/Botany /Microbiology /Physiology/Biotechnology/Nutrition**

Modalities of selection of Generic Electives (GE): A student shall have to choose **04** Generic Elective (GE1 to GE4) strictly from **02** subjects / disciplines of choice taking exactly

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

02 courses from each subjects of disciplines. Such a student shall have to study the curriculum of Generic Elective (GE) of a subject or discipline specified for the relevant semester.

Semester-III
Core Course (CC)

CC-5: Physical Chemistry-II — Credits 06

C5T: Physical Chemistry-II — **Credits 04**

Theory: 60 Lectures

a) Transport processes (15 Lectures)

Fick's law: Flux, force, phenomenological coefficients & their inter-relationship (general form), different examples of transport properties

Viscosity: General features of fluid flow (streamline flow and turbulent flow); Newton's equation, viscosity coefficient; Poiseuille's equation; principle of determination of viscosity coefficient of liquids by falling sphere method; Temperature variation of viscosity of liquids and comparison with that of gases

Conductance and transport number: Ion conductance; Conductance and measurement of conductance, cell constant, specific conductance and molar conductance; Variation of specific and equivalent conductance with dilution for strong and weak electrolytes; Kohlrausch's law of independent migration of ions; Equivalent and molar conductance at infinite dilution and their determination for strong and weak electrolytes; Debye –Huckel theory of Ion atmosphere (qualitative)-asymmetric effect, relaxation effect and electrophoretic effect; Ostwald's dilution law; Ionic mobility; Application of conductance measurement (determination of solubility product and ionic product of water); Conductometric titrations
Transport number, Principles of Hittorf's and Moving-boundary method; Wien effect, Debye-Falkenhagen effect, Walden's rule

b) Applications of Thermodynamics – I (25 Lectures)

Partial properties and Chemical potential: Chemical potential and activity, partial molar quantities, relation between Chemical potential and Gibb's free energy and other thermodynamic state functions; variation of Chemical potential (μ) with temperature and pressure; Gibbs-Duhem equation; fugacity and fugacity coefficient; Variation of thermodynamic functions for systems with variable composition; Equations of states for these systems, Change in G, S H and V during mixing for binary solutions

Chemical Equilibrium: Thermodynamic conditions for equilibrium, degree of advancement; van't Hoff's reaction isotherm (deduction from chemical potential); Variation of free energy with degree of advancement; Equilibrium constant and standard Gibbs free energy change; Definitions of K_P, K_C and K_X; van't Hoff's reaction isobar and isochore from different standard states; Shifting of equilibrium due to change in external parameters e.g. temperature

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

and pressure; variation of equilibrium constant with addition to inert gas; Le Chatelier's principle and its derivation

Nernst's distribution law; Application- (finding out K_{eq} using Nernst dist law for $KI+I_2 = KI_3$ and dimerization of benzene

Chemical potential and other properties of ideal substances- pure and mixtures: a) Pure ideal gas-its Chemical potential and other thermodynamic functions and their changes during a change of; Thermodynamic parameters of mixing; Chemical potential of an ideal gas in an ideal gas mixture; Concept of standard states and choice of standard states of ideal gases

b) Condensed Phase – Chemical potential of pure solid and pure liquids, Ideal solution – Definition, Raoult's law; Mixing properties of ideal solutions, chemical potential of a component in an ideal solution; Choice of standard states of solids and liquids

c) Foundation of Quantum Mechanics (20 Lectures)

Beginning of Quantum Mechanics: Wave-particle duality, light as particles: photoelectric and Compton effects; electrons as waves and the de Broglie hypothesis; Uncertainty relations (without proof)

Wave function: Schrodinger time-independent equation; nature of the equation, acceptability conditions imposed on the wave functions and probability interpretations of wave function

Concept of Operators: Elementary concepts of operators, eigenfunctions and eigenvalues; Linear operators; Commutation of operators, commutator and uncertainty relation; Expectation value; Hermitian operator; Postulates of Quantum Mechanics

Particle in a box: Setting up of Schrodinger equation for one-dimensional box and its solution; Comparison with free particle eigenfunctions and eigenvalues. Properties of PB wave functions (normalisation, orthogonality, probability distribution); Expectation values of x, x^2, p_x and p_x^2 and their significance in relation to the uncertainty principle; Extension of the problem to two and three dimensions and the concept of degenerate energy levels

Simple Harmonic Oscillator: setting up of the Schrodinger stationary equation, energy expression (without derivation), expression of wave function for n = 0 and n = 1 (without derivation) and their characteristic features

C5P: Physical Chemistry-II Lab **Credits 02**

LAB

(60 Lectures)

Experiment 1: Study of viscosity of unknown liquid (glycerol, sugar) with respect to water

Experiment 2: Determination of partition coefficient for the distribution of I_2 between water and CCl_4

Experiment 3: Determination of K_{eq} for $KI + I_2 = KI_3$, using partition coefficient between water and CCl_4

Experiment 4: Conductometric titration of an acid (strong, weak/ monobasic, dibasic) against base strong

Experiment 5: Study of saponification reaction conductometrically

Experiment 6: Verification of Ostwald's dilution law and determination of K_a of weak acid

Suggested Readings :

1. Viswanathan, B., Raghavan, P.S. *Practical Physical Chemistry* Viva Books (2009)
2. Mendham, J., A. I. Vogel's Quantitative Chemical Analysis 6th Ed., Pearson
3. Harris, D. C. *Quantitative Chemical Analysis*. 6th Ed., Freeman (2007)

CC-6: Inorganic Chemistry-II Credits 06

C6T: Inorganic Chemistry-II Credits 04

Theory: 60 Lectures

Chemical Bonding-I (24 Lectures)

(i) *Ionic bond:* General characteristics, types of ions, size effects, radius ratio rule and its application and limitations. Packing of ions in crystals. Born-Landé equation with derivation and importance of Kapustinskii expression for lattice energy. Madelung constant, Born-Haber cycle and its application, Solvation energy. Defects in solids (elementary idea). Solubility energetics of dissolution process.

(ii) *Covalent bond:* Polarizing power and polarizability, ionic potential, Fazan's rules. Lewis structures, formal charge. Valence Bond Theory. The hydrogen molecule (Heitler-London approach), directional character of covalent bonds, hybridizations, equivalent and non-equivalent hybrid orbitals, Bent's rule, Dipole moments, VSEPR theory, shapes of molecules and ions containing lone pairs and bond pairs (examples from main groups chemistry) and multiple bonding (σ and π bond approach).

Chemical Bonding-II (24 Lectures)

(i) Molecular orbital concept of bonding (The approximations of the theory, Linear combination of atomic orbitals (LCAO)) (elementary pictorial approach): sigma and pi-bonds and delta interaction, multiple bonding. Orbital designations: *gerade, ungerade,* HOMO, LUMO. Orbital mixing,. MO diagrams of H_2, Li_2, Be_2, B_2, C_2, N_2, O_2, F_2, and their ions wherever possible; Heteronuclear molecular orbitals: CO, NO, NO^+, CN^-, HF, BeH_2, CO_2 and H_2O. Bond properties: bond orders, bond lengths.

(ii) *Metallic Bond:* Qualitative idea of valence bond and band theories. Semiconductors and insulators, defects in solids.

(iii) *Weak Chemical Forces:* van der Waals forces, ion-dipole forces, dipole-dipole interactions, induced dipole interactions, Instantaneous dipole-induced dipole interactions. Repulsive forces, Intermolecular forces: Hydrogen bonding (theories of hydrogen bonding, valence bond treatment), receptor-guest interactions, Halogen bonds. Effects of chemical force, melting and boiling points.

Radioactivity (12 Lectures)

Nuclear stability and nuclear binding energy. Nuclear forces: meson exchange theory. Nuclear models (elementary idea): Concept of nuclear quantum number, magic numbers. Nuclear Reactions: Artificial radioactivity, transmutation of elements, fission, fusion and spallation. Nuclear energy and power generation. Separation and uses of isotopes. Radio chemical methods: principles of determination of age of rocks and minerals, radio carbon dating, hazards of radiation and safety measures.

C6P: Inorganic Chemistry-II -Lab **Credits 02**

Inorganic Chemistry-II (LAB) **(60 Lectures)**

Iodo-/ Iodimetric Titrations

1. Estimation of Cu(II)
2. Estimation of Vitamin C
3. Estimation of (i) arsenite and (ii) antimony in tartar-emetic iodimetrically
4. Estimation of available chlorine in bleaching powder.

Estimation of metal content in some selective samples

1. Estimation of Cu in brass.
2. Estimation of Cr and Mn in Steel.
3. Estimation of Fe in cement.

Suggested Readings :

1. Mendham, J., *A. I. Vogel's Quantitative Chemical Analysis* 6th Ed., Pearson, 2009.

CC-7: Organic Chemistry-III **Credits 06**

C7T: Organic Chemistry-III **Credits 04**

Theory: 60 Lectures

Chemistry of alkenes and alkynes **(15 Lectures)**

Addition to C=C: mechanism (with evidence wherever applicable), reactivity, regioselectivity (Markownikoff and anti-Markownikoff additions) and stereoselectivity; reactions: hydrogenation, halogenations, iodolactonisation, hydrohalogenation, hydration,

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

oxymercuration-demercuration, hydroboration-oxidation, epoxidation, *syn* and *anti*-hydroxylation, ozonolysis, addition of singlet and triplet carbenes; electrophilic addition to diene (conjugated dienes and allene); radical addition: HBr addition; mechanism of allylic and benzylic bromination in competition with brominations across C=C; use of NBS; Birch reduction of benzenoid aromatics; interconversion of *E* - and *Z* - alkenes; contra-thermodynamic isomerization of internal alkenes.

Addition to C≡C (in comparison to C=C): mechanism, reactivity, regioselectivity (Markownikoff and anti-Markownikoff addition) and stereoselectivity; reactions: hydrogenation, halogenations, hydrohalogenation, hydration, oxymercuration-demercuration, hydroboration-oxidation, dissolving metal reduction of alkynes (Birch); reactions of terminal alkynes by exploring its acidity; interconversion of terminal and non-terminal alkynes.

Aromatic Substitution (10 Lectures)

Electrophilic aromatic substitution: mechanisms and evidences in favour of it; orientation and reactivity; reactions: nitration, nitrosation, sulfonation, halogenation, Friedel-Crafts reaction; one-carbon electrophiles (reactions: chloromethylation, Gatterman-Koch, Gatterman, Houben-Hoesch, Vilsmeier-Haack, Reimer-Tiemann, Kolbe-Schmidt); *Ipso* substitituion.

Nucleophilic aromatic substitution: addition-elimination mechanism and evidences in favour of it; S_N1 mechanism; cine substitution (benzyne mechanism), structure of benzyne.

Carbonyl and Related Compounds (30 Lectures)

Addition to C=O: structure, reactivity and preparation of carbonyl compounds; mechanism (with evidence), reactivity, equilibrium and kinetic control; Burgi-Dunitz trajectory in nucleophilic additions; formation of hydrates, cyano hydrins and bisulphite adduct; nucleophilic addition-elimination reactions with alcohols, thiols and nitrogen- based nucleophiles; reactions: benzoin condensation, Cannizzaro and Tischenko reactions, reactions with ylides: Wittig and Corey-Chaykovsky reaction; Rupe rearrangement, oxidations and reductions: Clemmensen, Wolff-Kishner, $LiAlH_4$, $NaBH_4$, MPV, Oppenauer, Bouveault-Blanc, acyloin condensation; oxidation of alcohols with PDC and PCC; periodic acid and lead tetraacetate oxidation of 1,2-diols.

Exploitation of acidity of α-H of C=O: formation of enols and enolates; kinetic and thermodynamic enolates; reactions (mechanism with evidence): halogenation of carbonyl compounds under acidic and basic conditions, Hell-Volhard-Zelinsky (H. V. Z.) reaction, nitrosation, SeO_2 (Riley) oxidation; condensations (mechanism with evidence): Aldol, Tollens', Knoevenagel, Claisen-Schmidt, Claisen ester including Dieckmann, Stobbe; Mannich reaction, Perkin reaction, Favorskii rearrangement; alkylation of active methylene compounds; preparation and synthetic applications of diethyl malonate and ethyl acetoacetate; specific enol equivalents (lithium enolates, enamines, aza-enolates and silyl enol ethers) in connection with alkylation, acylation and aldol type reaction.

Elementary ideas of Green Chemistry: Twelve (12) principles of green chemistry; planning of green synthesis; common organic reactions and their counterparts: reactions: Aldol, Friedel-Crafts, Michael, Knoevenagel, Cannizzaro, benzoin condensation and Dieckmann condensation.

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

Nucleophilic addition to α,β-unsaturated carbonyl system: general principle and mechanism (with evidence); direct and conjugate addition, addition of enolates (Michael reaction), Stetter reaction, Robinson annulation.

Substitution at sp^2 carbon (C=O system): mechanism (with evidence): $B_{AC}2$, $A_{AC}2$, $A_{AC}1$, $A_{AL}1$ (in connection to acid and ester); acid derivatives: amides, anhydrides & acyl halides (formation and hydrolysis including comparison).

Organometallics **(5 Lectures)**

Grignard reagent; Organolithiums; Gilman cuprates: preparation and reactions (mechanism with evidence); addition of Grignard and organolithium to carbonyl compounds; substitution on -COX; directed ortho metalation of arenes using organolithiums, conjugate addition by Gilman cuprates; Corey-House synthesis; abnormal behavior of Grignard reagents; comparison of reactivity among Grignard, organolithiums and organocopper reagents; Reformatsky reaction; Blaise reaction; concept of *umpolung* and base-nucleophile dichotomy in case of organometallic reagents.

Suggested Readings:

13. Ahluwalia, V. K. *Strategies for Green Organic Synthesis*, ANE Books Pvt. Ltd.

C7P: Organic Chemistry-III –Lab **Credits 02**

LAB (60 Lectures)

Experiment -1: Qualitative Analysis of Single Solid Organic Compounds

a) Detection of special elements (N, S, Cl, Br) by Lassaigne's test
b) Solubility and classification (solvents: H_2O, 5% HCl, 5% NaOH and 5% $NaHCO_3$)

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

c) Detection of the following functional groups by systematic chemical tests: aromatic amino ($-NH_2$), aromatic nitro ($-NO_2$), amido ($-CONH_2$, including imide), phenolic –OH, carboxylic acid (-COOH), carbonyl (-CHO and >C=O); only one test for each functional group is to be reported.
d) Melting point of the given compound
e) Preparation, purification and melting point determination of a crystalline derivative of the given compound
f) Identification of the compound through literature survey.

Each student, during laboratory session, is required to carry out qualitative chemical tests for all the special elements and the functional groups with relevant derivatisation in known and unknown (**at least six)** organic compounds.

Suggested Readings:

Skill Enhancement Course (SEC)

SEC-1: Analytical Clinical Biochemistry Credits: 02

SEC1T: Analytical Clinical Biochemistry Credits: 01

THEORY: 30 Lectures

Basic understanding of the structures, properties and functions of carbohydrates, lipids and proteins:

Review of concepts studied in the core course:
Carbohydrates: Biological importance of carbohydrates, Metabolism, Cellular currency of energy (ATP), Glycolysis, Alcoholic and Lactic acid fermentations, Krebs cycle.
Isolation and characterization of polysachharides.
Proteins: Classification, biological importance; Primary and secondary and tertiary structures of proteins: α-helix and β- pleated sheets, Isolation, characterization, denaturation of proteins.
Enzymes: Nomenclature, Characteristics (mention of Ribozymes), Classification; Active site, Mechanism of enzyme action, Stereospecificity of enzymes, Coenzymes and cofactors, Enzyme inhibitors, Introduction to Biocatalysis: Importance in "Green Chemistry" and Chemical Industry.
Lipids: Classification. Biological importance of triglycerides and phosphoglycerides and cholesterol; Lipid membrane, Liposomes and their biological functions and underlying applications.Lipoproteins. Properties, functions and biochemical functions of steroid hormones.
Biochemistry of peptide hormones.
Structure of DNA (Watson-Crick model) and RNA, Genetic Code, Biological roles of DNA and RNA: Replication, Transcription and Translation, Introduction to Gene therapy.
Enzymes: Nomenclature, classification, effect of pH, temperature on enzyme activity, enzyme inhibition.

Biochemistry of disease: A diagnostic approach by blood/ urine analysis.
Blood: Composition and functions of blood, blood coagulation. Blood collection and preservation of samples. Anaemia, Regulation, estimation and interpretation of data for blood sugar, urea, creatinine, cholesterol and bilirubin.
Urine: Collection and preservation of samples. 6. Formation of urine. Composition and estimation of constituents of normal and pathological urine.

SEC1P: Analytical Clinical Biochemistry Credits: 01

Practicals:

Identification and estimation of the following:
1. Carbohydrates – qualitative and quantitative.
2. Lipids – qualitative.
3. Determination of the iodine number of oil.
4. Determination of the saponification number of oil.
5. Determination of cholesterol using Liebermann- Burchard reaction.
6. Proteins – qualitative.

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

7. Isolation of protein.
8. Determination of protein by the Biuret reaction.
9. Determination of nucleic acids

Or

SEC-1: Pharmaceutical Chemistry — Credits: 02

SEC1T: Pharmaceutical Chemistry — Credits: 01

Theory: 30 Lectures

Drugs & Pharmaceuticals
Drug discovery, design and development; Basic Retrosynthetic approach. Synthesis of the representative drugs of the following classes: analgesics agents, antipyretic agents, antiinflammatoryagents (Aspirin, paracetamol, lbuprofen); antibiotics (Chloramphenicol); antibacterial and antifungal agents (Sulphonamides; Sulphanethoxazol, Sulphacetamide, Trimethoprim); antiviral agents (Acyclovir), Central Nervous System agents (Phenobarbital, Diazepam),Cardiovascular (Glyceryl trinitrate), antilaprosy (Dapsone), HIV-AIDS related drugs (AZT- Zidovudine).

Fermentation
Aerobic and anaerobic fermentation. Production of (i) Ethyl alcohol and citric acid, (ii) Antibiotics; Penicillin, Cephalosporin, Chloromycetin and Streptomycin, (iii) Lysine, Glutamic acid, Vitamin B2, Vitamin B12 and Vitamin C.

SEC1P: Pharmaceutical Chemistry — Credits: 01

Practicals:
1. Preparation of Aspirin and its analysis.
2. Preparation of magnesium bisilicate (Antacid).

Generic Elective Syllabus

GE-3 [Interdisciplinary for other department]

GE3: Chemical Energetics, Equilibria, Organic Chemistry-II

Credits 06

GE3T: Chemical Energetics, Equilibria, Organic Chemistry-II **Credits 04**

Theory: 60 Lectures

Section A: Physical Chemistry-II (30 Lectures)

Chemical Energetics **(14 Lectures)**

Intensive and extensive variables; state and path functions; isolated, closed and open systems; zeroth law of thermodynamics; Concept of heat, work, internal energy and statement of first law; enthalpy, H; relation between heat capacities, calculations of q, w, U and H for reversible, irreversible and free expansion of gases Standard states; Heats of reaction; enthalpy of formation of molecules and ions and enthalpy of combustion and its applications; Laws of thermochemistry; bond energy, bond dissociation energy and resonance energy from thermochemical data, Kirchhoff's equations and effect of pressure on enthalpy of reactions; Adiabatic flame temperature; explosion temperature Statement of the second law of thermodynamics; Concept of heat reservoirs and heat engines; Carnot cycle; Physical concept of Entropy; Carnot engine, refrigerator and efficiency; Entropy change of systems and surroundings for various processes and transformations; Auxiliary state functions (G and A) and Criteria for spontaneity and equilibrium.

Chemical Equilibrium: **(08 Lectures)**

Thermodynamic conditions for equilibrium, degree of advancement; Variation of free energy with degree of advancement; Equilibrium constant and standard Gibbs free energy change; Definitions of KP, KC and KX and relation among them; van't Hoff's reaction isotherm, isobar and isochore from different standard states; Shifting of equilibrium due to change in external parameters e.g. temperature and pressure; variation of equilibrium constant with addition to inert gas; Le Chatelier's principle

Ionic Equilibria: **(08 Lectures)**

Strong, moderate and weak electrolytes, degree of ionization, factors affecting degree of ionization, ionization constant and ionic product of water; Ionization of weak acids and bases, pH scale, common ion effect; Salt hydrolysis-calculation of hydrolysis constant, degree of hydrolysis and pH for different salts; Buffer solutions; Solubility and solubility product of sparingly soluble salts – applications of solubility product principle

Suggested Readings :

1. Barrow, G.M. *Physical Chemistry* Tata McGraw Hill (2007).
2. Castellan, G.W. *Physical Chemistry* 4th Ed. Narosa (2004).
3. Kotz, J.C., Treichel, P.M. & Townsend, J.R. *General Chemistry* Cengage Learning India Pvt. Ltd., New Delhi (2009).
4. Mahan, B.H. *University Chemistry* 3rd Ed. Narosa (1998).
5. Ekambaram, S. *General Chemistry*, Pearson.
6. Petrucci, R.H. *General Chemistry* 5th Ed. Macmillan Publishing Co.: New York (1985).
7. Chugh, K.L., Agnish, S.L. *A Text Book of Physical Chemistry* Kalyani Publishers
8. Bahl, B.S., Bahl, A., Tuli, G.D., *Essentials of Physical Chemistry* S. Chand & Co. ltd.
9. Palit, S. R., *Elementary Physical Chemistry* Book Syndicate Pvt. Ltd.
10. Mandal, A. K. *Degree Physical and General Chemistry* Sarat Book House
11. Pahari, S., *Physical Chemistry* New Central Book Agency
12. Pahari, S., Pahari, D., *Problems in Physical Chemistry* New Central Book Agency

Section-B: Organic Chemistry-II **(30 Lectures)**

Functional group app roach for the following reactions (preparations & reactions) to be studied in context to their structures.

Aromatic Hydrocarbons **06 Lectures**

Benzene: Preparation: from phenol, by decarboxylation, from acetylene, from Benzene sulphonic acid. *Reactions*: electrophilic substitution (general mechanism); nitration (with mechanism), halogenations (chlorination and bromination), sulphonation and Friedel-Craft's reaction (alkylation and acylation) (up to 4 carbons on benzene); side chain oxidation of alkyl benzenes (up to 4 carbons on benzene).

Organometallic Compounds **(2 Lectures)**

Introduction; *Grignard reagents*: *Preparations* (from alkyl and aryl halide); concept of *umpolung;* Reformatsky reaction.

Aryl Halides **(3 Lectures)**

Preparation: (chloro-, bromo- and iodobenzene): from phenol, Sandmeyer reactions. *Reactions (Chlorobenzene):* nucleophilic aromatic substitution (replacement by –OH group) and effect of nitro substituent (activated nucleophilic substitution).

Alcohols, Phenols and Ethers **(11 Lectures)**

Alcohols: (up to 5 Carbons). *Preparation:* 1°-, 2°- and 3°- alcohols: using Grignard reagent, reduction of aldehydes, ketones, carboxylic acid and esters; *Reactions:* With sodium, HX (Lucas test), oxidation (alkaline KMnO4, acidic dichromate, concentrated HNO3); Oppenauer oxidation;

Diols: Preparation (with OsO4); pinacol- pinacolone rearrangement (with mechanism) (*with symmetrical diols* only).

Phenols: Preparation: cumene hydroperoxide method, from diazonium salts; acidic nature of phenols; *Reactions:* electrophilic substitution: nitration and halogenations;

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

Reimer -Tiemann reaction, Houben–Hoesch condensation, Schotten –Baumann reaction, Fries rearrangement and Claisen rearrangement.

Ethers: Preparation: Williamson's ether synthesis; *Reaction*: cleavage of ethers with HI.

Carbonyl Compounds (08 Lectures)

Aldehydes and Ketones (aliphatic and aromatic): (Formaldehye, acetaldehyde, acetone and benzaldehyde): *Preparation:* from acid chlorides, from nitriles and from Grignard reagents; general properties of aldehydes and ketones; *Reactions:* with HCN, ROH, NaHSO3, NH2-G derivatives and with Tollens' and Fehling's reagents; iodoform test; aldol condensation (with mechanism); Cannizzaro reaction (with mechanism),Wittig reaction, benzoin condensation; Clemmensen reduction, Wolff- Kishner reduction and Meerwein-Pondorff- Verley (MPV) reduction.

Suggested Readings:

1. Sethi, A. *Conceptual Organic Chemistry;* New Age International Publisher.
2. Parmar, V. S. *A Text Book of Organic Chemistry*, S. Chand & Sons.
3. Madan, R. L. *Organic Chemistry*, S. Chand & Sons.
4. Wade, L. G., Singh, M. S., *Organic Chemistry, Pearson*.
5. Finar, I. L. *Organic Chemistry* (*Volume 1*), Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
6. Morrison, R. T. & Boyd, R. N. *Organic Chemistry*, Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
7. Bahl, A. & Bahl, B.S. *Advanced Organic Chemistry*, S. Chand, 2010.

GE-3P: LAB: Practicals Credits 02
(60 Lectures)

Practicals:

Section A: Physical Chemistry-LAB (15x2=30 Lectures)

(Minimum **five** experiments to complete)

(I) Thermochemistry (Any **three**)

1. Determination of heat capacity of calorimeter for different volumes
2. Determination of enthalpy of neutralization of hydrochloric acid with sodium hydroxide
3. Determination of enthalpy of ionization of acetic acid
4. Determination of enthalpy of hydration of copper sulphate

(II) Ionic Equilibria (Any **two**)

a) Measurement of pH of different solutions like aerated drinks, fruit juices, shampoos and soaps (use dilute solutions of soaps and shampoos to prevent damage to the glass electrode) using pH-meter and compare it with the indicator method

b) Preparation of buffer solutions and find the pH of an unknown buffer solution by colour matching method (using following buffers)

(i) Sodium acetate-acetic acid

(ii) Ammonium chloride-ammonium hydroxide

c) Study of the solubility of benzoic acid in water

Downloaded from Vidyasagar University by 202.142.119.15 on 29 January 2019 : 13:25:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons.pdf

Suggested Readings:

1. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N., University of Calcutta, 2003.
2. Palit, S.R., *Practical Physical Chemistry* Science Book Agency
3. Mukherjee, N.G., *Selected Experiments in Physical Chemistry* J. N. Ghose & Sons
4. Dutta, S.K., *Physical Chemistry Experiments* Bharati Book Stall

Section B: Organic Chemistry-LAB

Identification of a pure organic compound

Solid compounds: oxalic acid, tartaric acid, succinic acid, resorcinol, urea, glucose, benzoic acid and salicylic acid.
Liquid Compounds: methyl alcohol, ethyl alcohol, acetone, aniline, dimethylaniline, benzaldehyde, chloroform and nitrobenzene

Suggested Readings:

1. Bhattacharyya, R. C, *A Manual of Practical Chemistry*.
2. Vogel, A.I., Tatchell, A.R., Furnis, B.S., Hannaford, A.J. & Smith, P.W.G., *Textbook of Practical Organic Chemistry*, Prentice-Hall, 5th edition, 1996.
3. Mann, F.G. & Saunders, B.C. *Practical Organic Chemistry* Orient-Longman, 1960.

Vidyasagar University

Curriculum for B.Sc (Honours) in Chemistry

[Choice Based Credit System]

Semester-IV

Course	Course Code	Name of the Subjects	Course Type/ Nature	Teaching Scheme in hour per week			Credit	Marks
				L	T	P		
CC-8		C8T:Physical Chemistry-III	Core Course - 8	4	0	0	6	75
		C8P:Lab		0	0	4		
CC-9		C9T: Inorganic Chemistry - III	Core Course - 9	4	0	0	6	75
		C9P: Lab		0	0	4		
CC-10		C10T: Organic Chemistry -IV	Core Course - 10	4	0	0	6	75
		C10P: Lab		0	0	4		
GE-4		TBD	Generic Elective-4				6	75
SEC-2		**SEC-2** : Basic analytical Chemistry **Or** Chemistry of Cosmetics and Perfumes **Or** Pesticides Chemistry **Or** Fuel Chemistry	Skill Enhancement Course-2	1-1-0/1-0-2			2	50
Semester Total							**26**	**350**

L=Lecture, **T=** Tutorial, **P=**Practical, **CC =** Core Course, **GE**= Generic Elective, **SEC** = Skill Enhancement Course, **TBD =** to be decided

Generic Elective (GE) (Interdisciplinary) from other Department : Papers are to be taken from any of the following discipline: **Mathematics/Physics /Computer Sc/Statistics/Geology/ Electronics/zoology/Botany /Microbiology/Physiology/Biotechnology/Nutrition**

Modalities of selection of Generic Electives (GE): A student shall have to choose **04** Generic Elective (GE1 to GE4) strictly from **02** subjects / disciplines of choice taking exactly **02** courses from each subjects of disciplines. Such a student shall have to study the curriculum of Generic Elective (GE) of a subject or discipline specified for the relevant semester.

Core Course (CC)

CC-8: PHYSICAL CHEMISTRY-III **Credits 06**

C8T: PHYSICAL CHEMISTRY-III **Credits 04**

Course Contents:

a) Application of Thermodynamics – II

Colligative properties: Vapour pressure of solution; Ideal solutions, ideally diluted solutions and colligative properties; Raoult's law; Thermodynamic derivation using chemical potential to derive relations between the four colligative properties [(i) relative lowering of vapour pressure, (ii) elevation of boiling point, (iii) Depression of freezing point, (iv) Osmotic pressure] and amount of solute. Applications in calculating molar masses of normal, dissociated and associated solutes in solution; Abnormal colligative properties

Phase rule: Definitions of phase, component and degrees of freedom; Phase rule and its derivations; Definition of phase diagram; Phase diagram for water, CO_2, Sulphur

First order phase transition and Clapeyron equation; Clausius-Clapeyron equation - derivation and use; Liquid vapour equilibrium for two component systems; Phenol-water system

Three component systems, water-chloroform-acetic acid system, triangular plots

Binary solutions: Ideal solution at fixed temperature and pressure; Principle of fractional distillation; Duhem-Margules equation; Henry's law; Konowaloff's rule; Positive and negative deviations from ideal behavior; Azeotropic solution; Liquid-liquid phase diagram using phenol-water system; Solid-liquid phase diagram; Eutectic mixture

b) Electrical Properties of molecules

Ionic equilibria: Chemical potential of an ion in solution; Activity and activity coefficients of ions in solution; Debye-Huckel limiting law-brief qualitative description of the postulates involved, qualitative idea of the model, the equation (without derivation) for ion-ion atmosphere interaction potential. Estimation of activity coefficient for electrolytes using Debye-Huckel limiting law; Derivation of mean ionic activity coefficient from the expression of ion-atmosphere interaction potential; Applications of the equation and its limitations

Electromotive Force: Quantitative aspects of Faraday’s laws of electrolysis, rules of oxidation/reduction of ions based on half-cell potentials, applications of electrolysis in metallurgy and industry; Chemical cells, reversible and irreversible cells with examples; Electromotive force of a cell and its measurement, Nernst equation; Standard electrode (reduction) potential and its application to different kinds of half-cells. Application of EMF measurements in determining (i) free energy, enthalpy and entropy of a cell reaction, (ii)

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

equilibrium constants, and (iii) pH values, using hydrogen, quinone-hydroquinone, glass and SbO/Sb_2O_3 electrodes

Concentration cells with and without transference, liquid junction potential; determination ofactivity coefficients and transference numbers; Qualitative discussion of potentiometric titrations (acid-base, redox, precipitation)

Dipole moment and polarizability: Polarizability of atoms and molecules, dielectric constant and polarisation, molar polarisation for polar and non-polar molecules; Clausius-Mosotti equation and Debye equation (both without derivation) and their application; Determination of dipole moments

C) Quantum Chemistry

Angular momentum: Commutation rules, quantization of square of total angular momentum and z-component; Rigid rotator model of rotation of diatomic molecule; Schrödinger equation, transformation to spherical polar coordinates; Separation of variables. Spherical harmonics; Discussion of solution

Qualitative treatment of hydrogen atom and hydrogen-like ions: Setting up of Schrödinger equation in spherical polar coordinates, radial part, quantization of energy (only final energy expression); Average and most probable distances of electron from nucleus; Setting up of Schrödinger equation for many-electron atoms (He, Li)

LCAO and HF-SCF: Covalent bonding, valence bond and molecular orbital approaches, LCAO-MO treatment of H_2^+; Bonding and antibonding orbitals; Qualitative extension to H_2; Comparison of LCAO-MO and VB treatments of H_2 and their limitations; Hartree-Fock method development, SCF and configuration interaction (only basics)
Atkins, P. W. & Paula, J. de Atkin's, Physical Chemistry, Oxford University Press

Suggested Readings:

1. Castellan, G. W. *Physical Chemistry*, Narosa
2. Atkins, P. W. & Paula, J. de *Atkins', Physical Chemistry*, Oxford University Press
3. McQuarrie, D. A. & Simons, J. D. *Physical Chemistry: A Molecular Approach*, Viva Press
4. Levine, I. N. *Physical Chemistry*, Tata McGraw-Hill
5. Moore, W. J. *Physical Chemistry*, Orient Longman
6. Mortimer, R. G. *Physical Chemistry*, Elsevier
7. Engel, T. & Reid, P. *Physical Chemistry*, Pearson
8. Levine, I. N. *Quantum Chemistry*, PHI
9. Atkins, P. W. *Molecular Quantum Mechanics*, Oxford
10. Engel, T. & Reid, P. *Physical Chemistry*, Pearson
11. Maron, S.H., Prutton, C. F., *Principles of Physical Chemistry*, McMillan
12. Klotz, I.M., Rosenberg, R. M. *Chemical Thermodynamics:Basic Concepts and Methods* Wiley

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

13. Rastogi, R. P. & Misra, R.R. An Introduction to Chemical Thermodynamics, Vikas
14. Glasstone, S. An Introduction to Electrochemistry, East-West Press

C8P : Lab **Credits 02**

Practical :

Experiment 1: Determination of solubility of sparingly soluble salt in water, in electrolyte with common ions and in neutral electrolyte (using common indicator)

Experiment 2: Potentiometric titration of Mohr's salt solution against standard $K_2Cr_2O_7$ solution

Experiment 3: Determination of K_{sp} for AgCl by potentiometric titration of $AgNO_3$ solution against standard KCl solution

Experiment 4: Effect of ionic strength on the rate of Persulphate – Iodide reaction

Experiment 5: Study of phenol-water phase diagram

Experiment 6: pH-metric titration of acid (mono- and di-basic) against strong base

Suggested Readings:

1. Viswanathan, B., Raghavan, P.S. *Practical Physical Chemistry* Viva Books (2009)
2. Mendham, J., A. I. Vogel's Quantitative Chemical Analysis 6th Ed., Pearson
3. Harris, D. C. *Quantitative Chemical Analysis*. 6th Ed., Freeman (2007)
4. Palit, S.R., De, S. K. *Practical Physical Chemistry* Science Book Agency
5. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N., University of Calcutta
6. Levitt, B. P. edited *Findlay's Practical Physical Chemistry* Longman Group Ltd.
7. Gurtu, J. N., Kapoor, R., *Advanced Experimental Chemistry* S. Chand & Co. Ltd.

CC-9: INORGANIC CHEMISTRY-III **Credit 06**

C9T: INORGANIC CHEMISTRY-III **Credit 04**

Course Contents:

General Principles of Metallurgy

Chief modes of occurrence of metals based on standard electrode potentials. Ellingham diagrams for reduction of metal oxides using carbon and carbon monoxide as reducing agent. Electrolytic Reduction, Hydrometallurgy. Methods of purification of metals: Electrolytic Kroll process, Parting process, van Arkel-de Boer process and Mond's process, Zone refining.

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

Chemistry of *s* and *p* Block Elements

Relative stability of different oxidation states, diagonal relationship and anomalous behaviour of first member of each group. Allotropy and catenation. Study of the following compounds with emphasis on structure, bonding, preparation, properties and uses. Beryllium hydrides and halides. Boric acid and borates, boron nitrides, borohydrides (diborane) and graphitic compounds, silanes, Oxides and oxoacids of nitrogen, phosphorus, sulphur and chlorine. Peroxo acids of sulphur, sulphur-nitrogen compounds, interhalogen compounds, polyhalide ions, pseudohalogens, fluorocarbons and basic properties of halogens.

Noble Gases:
Occurrence and uses, rationalization of inertness of noble gases, Clathrates; preparation and properties of XeF_2, XeF_4 and XeF_6; Nature of bonding in noble gas compounds (Valence bond treatment and MO treatment for XeF_2 and XeF_4). Xenon-oxygen compounds. Molecular shapes of noble gas compounds (VSEPR theory).

Inorganic Polymers:
Types of inorganic polymers, comparison with organic polymers, synthesis, structural aspects and applications of silicones and siloxanes. Borazines, silicates and phosphazenes.

Coordination Chemistry-I

Coordinate bonding: double and complex salts. Werner's theory of coordination complexes, Classification of ligands, Ambidentate ligands, chelates, Coordination numbers, IUPAC nomenclature of coordination complexes (up to two metal centers), Isomerism in coordination compounds, constitutional and stereo isomerism, Geometrical and optical isomerism in square planar and octahedral complexes.

Suggested Readings:

1. Huheey, J. E.; Keiter, E.A. & Keiter, R.L. *Inorganic Chemistry, Principles of Structure and Reactivity 4th Ed.*, Harper Collins 1993, Pearson,2006.
2. Greenwood, N.N. & Earnshaw A. *Chemistry of the Elements*, Butterworth-Heinemann, 1997.
3. Cotton, F.A., Wilkinson, G., Murrillo, C. A., Bochmann, M., *Advanced Inorganic Chemistry 6th Ed. 1999.*, Wiley.
4. Miessler, G. L. & Donald, A. Tarr. *Inorganic Chemistry* 4th Ed., Pearson, 2010.
5. Purecell, K.F. and Kotz, J.C., *An Introduction to Inorganic Chemistry*, Saunders: Philadelphia, 1980.
6. Mingos, D.M.P., *Essential trends in inorganic chemistry*. Oxford University Press (1998).

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

C9P: LAB **Credits 02**

Practical:

Complexometric titration

1. Zn(II)
2. Zn(II) in a Zn(II) and Cu(II) mixture.
3. Ca(II) and Mg(II) in a mixture.
4. Hardness of water.

Inorganic preparations

1. $[Cu(CH_3CN)_4]PF_6/ClO_4$
2. *Cis* and *trans* $K[Cr(C_2O_4)_2\ (H_2O)_2]$
3. Potassium diaquadioxalatochromate(III)
4. Tetraamminecarbonatocobalt (III) ion
5. Potassium tris(oxalato)ferrate(III)
6. Tris-(ethylenediamine) nickel(II) chloride.
7. $[Mn(acac)_3]$ and $Fe(acac)_3]$ (acac= acetylacetonate)

Suggested Readings:

1. Mendham, J., *A. I. Vogel's Quantitative Chemical Analysis* 6th Ed., Pearson, 2009.
2. *Inorganic Synthesis*, Vol. 1-10.

CC-10: ORGANIC CHEMISTRY-IV **Credits 06**

C10T: ORGANIC CHEMISTRY-IV **Credits 04**

Course Contents:

Nitrogen compounds

Amines: Aliphatic & Aromatic: preparation, separation (Hinsberg's method) and identification of primary, secondary and tertiary amines; reaction (with mechanism): Eschweiler–Clarke methylation, diazo coupling reaction, Mannich reaction; formation and reactions of phenylenediamines, diazomethane and diazoacetic ester.

Nitro compounds (aliphatic and aromatic): preparation and reaction (with mechanism): reduction under different conditions; Nef carbonyl synthesis, Henry reaction and conjugate addition of nitroalkane anion.

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

Alkylnitrile and isonitrile: preparation and reaction (with mechanism): Thorpe nitrile condensation, von Richter reaction.

Diazonium salts and their related compounds: reactions (with mechanism) involving replacement of diazo group; reactions: Gomberg, Meerwein, Japp-Klingermann.

Rearrangements

Mechanism with evidence and stereochemical features for the following
Rearrangement to electron-deficient carbon: Wagner-Meerwein rearrangement, pinacol rearrangement, dienone-phenol; Wolff rearrangement in Arndt-Eistert synthesis, benzil-benzilic acid rearrangement, Demjanov rearrangement, Tiffeneau–Demjanov rearrangement.

Rearrangement to electron-deficient nitrogen: rearrangements: Hofmann, Curtius, Lossen, Schmidt and Beckmann.

Rearrangement to electron-deficient oxygen: Baeyer-Villiger oxidation, cumene hydroperoxide-phenol rearrangement and Dakin reaction.

Aromatic rearrangements: Migration from oxygen to ring carbon: Fries rearrangement and Claisen rearrangement.
Migration from nitrogen to ring carbon: Hofmann-Martius rearrangement**,** Fischer-Hepp rearrangement, *N*-azo to *C*-azo rearrangement, Bamberger rearrangement, Orton rearrangement and benzidine rearrangement.

Rearrangement reactions by green approach: Fries rearrangement, Claisen rearrangement, Beckmann rearrangement, Baeyer-Villiger oxidation.

The Logic of Organic Synthesis

Retrosynthetic analysis: disconnections; synthons, donor and acceptor synthons; natural reactivity and *umpolung*; latent polarity in bifunctional compounds: consonant and dissonant polarity; illogical electrophiles and nucleophiles; synthetic equivalents; functional group interconversion and addition (FGI and FGA); C-C disconnections and synthesis: one-group and two-group (1,2- to 1,5-dioxygenated compounds), reconnection (1,6-dicarbonyl); protection-deprotection strategy (alcohol, amine, carbonyl, acid).

Strategy of ring synthesis: thermodynamic and kinetic factors; synthesis of large rings, application of high dilution technique.

Asymmetric synthesis: stereoselective and stereospecific reactions; diastereoselectivity and enantioselectivity (only definition); enantioselectivity: kinetically controlled MPV reduction; diastereoselectivity: addition of nucleophiles to C=O adjacent to a stereogenic centre: Felkin-Anh and Zimmermann-Traxler models.

Organic Spectroscopy

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

UV Spectroscopy: introduction; types of electronic transitions, end absorption; transition dipole moment and allowed/forbidden transitions; chromophores and auxochromes; Bathochromic and Hypsochromic shifts; intensity of absorptions (Hyper-/Hypochromic effects); application of Woodward's Rules for calculation of λ_{max} for the following systems: conjugated diene, *α,β*-unsaturated aldehydes and ketones (alicyclic, homoannular and heteroannular); extended conjugated systems (dienes, aldehydes and ketones); relative positions of λ_{max} considering conjugative effect, steric effect, solvent effect, effect of pH; effective chromophore concentration: keto-enol systems; benzenoid transitions.

IR Spectroscopy: introduction; modes of molecular vibrations (fundamental and non-fundamental); IR active molecules; application of Hooke's law, force constant; fingerprint region and its significance; effect of deuteration; overtone bands; vibrational coupling in IR; characteristic and diagnostic stretching frequencies of C-H, N-H, O-H, C-O, C-N, C-X, C=C (including skeletal vibrations of aromatic compounds), C=O, C=N, N=O, C≡C, C≡N; characteristic/diagnostic bending vibrations are included; factors affecting stretching frequencies: effect of conjugation, electronic effects, mass effect, bond multiplicity, ring-size, solvent effect, H-bonding on IR absorptions; application in functional group analysis.

NMR Spectroscopy: introduction; nuclear spin; NMR active molecules; basic principles of Proton Magnetic Resonance; equivalent and non-equivalent protons; chemical shift and factors influencing it; ring current effect; significance of the terms: up-/downfield, shielded and deshielded protons; spin coupling and coupling constant (1st order spectra); relative intensities of *first-order* multiplets: Pascal's triangle; chemical and magnetic equivalence in NMR ; elementary idea about *non-first-order* splitting; anisotropic effects in alkene, alkyne, aldehydes and aromatics; NMR peak area, integration; relative peak positions with coupling patterns of common organic compounds (both aliphatic and benzenoid-aromatic); rapid proton exchange; interpretation of NMR spectra of simple compounds.
Applications of IR, UV and NMR spectroscopy for identification of simple organic molecules.

Suggested Readings:

1. Finar, I. L. *Organic Chemistry (Volume 1)*, Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
2. Finar, I. L. *Organic Chemistry* (*Volume 2: Stereochemistry and the Chemistry of Natural Products*), Dorling Kindersley (India) Pvt. Ltd.(Pearson Education).
3. Norman, R.O. C., Coxon, J. M. *Principles of Organic Synthesis*, Third Edition, Nelson Thornes, 2003.
4. Clayden, J., Greeves, N., Warren, S., *Organic Chemistry*, Second edition, Oxford University Press 2012.
5. Silverstein, R. M., Bassler, G. C., Morrill, T. C. *Spectrometric Identification of Organic Compounds*, John Wiley and Sons, INC, Fifth edition.

C10P : LAB **Credits 02**

List of Practical

Quantitative Estimations:

Each student is required to perform all the experiments.

1. Estimation of glycine by Sörensen's formol method
2. Estimation of glucose by titration using Fehling's solution
3. Estimation of sucrose by titration using Fehling's solution
4. Estimation of vitamin-C (reduced)
5. Estimation of aromatic amine (aniline) by bromination (Bromate-Bromide) method
6. Estimation of phenol by bromination (Bromate-Bromide) method
7. Estimation of formaldehyde (Formalin)
8. Estimation of acetic acid in commercial vinegar
9. Estimation of urea (hypobromite method)
10. Estimation of saponification value of oil/fat/ester

Suggested Readings:

1. Arthur, I. V. *Quantitative Organic Analysis*, Pearson
2. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N., University of Calcutta

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

Skill Enhancement Course (SEC)

SEC-2: BASIC ANALYTICAL CHEMISTRY Credits 02

SEC2T: BASIC ANALYTICAL CHEMISTRY Credits 01

Course Contents:

Introduction: Introduction to Analytical Chemistry and its interdisciplinary nature. Concept of sampling. Importance of accuracy, precision and sources of error in analytical measurements. Presentation of experimental data and results, from the point of view of significant figures.

Analysis of soil: Composition of soil, Concept of pH and pH measurement, Complexometric titrations, Chelation, Chelating agents, use of indicators

Analysis of water: Definition of pure water, sources responsible for contaminating water, water sampling methods, water purification methods.

Analysis of food products: Nutritional value of foods, idea about food processing and food preservations and adulteration.

Chromatography: Definition, general introduction on principles of chromatography, paper chromatography, TLC etc.

Ion-exchange: Column, ion-exchange chromatography etc.

Analysis of cosmetics: Major and minor constituents and their function

SEC-2P: Practical Credits 01

A:

1. Determination of pH of soil samples.
2. Estimation of Calcium and Magnesium ions as Calcium carbonate by complexometric titration.
3. Determination of pH, acidity and alkalinity of a water sample.
4. Determination of dissolved oxygen (DO) of a water sample.
5. Identification of adulterants in some common food items like coffee powder, asafoetida, chilli powder, turmeric powder, coriander powder and pulses, etc.
6. Analysis of preservatives and colouring matter.
7. Paper chromatographic separation of mixture of metal ion (Fe^{3+} and Al^{3+}).
8. To compare paint samples by TLC method.
9. Determination of ion exchange capacity of anion / cation exchange resin (using batch procedure if use of column is not feasible).
10. Analysis of deodorants and antiperspirants, Al, Zn, boric acid, chloride, sulphate.

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

11. Determination of constituents of talcum powder: Magnesium oxide, Calcium oxide, Zinc oxide and Calcium carbonate by complexometric titration.

B:

Suggested Applications (Any one):

a. To study the use of phenolphthalein in traps cases.
b. To analyze arson accelerants.
c. To carry out analysis of gasoline.

C:

Suggested Instrumental demonstrations:

a. Estimation of macro nutrients: Potassium, Calcium, Magnesium in soil samples by flame photometry.
b. Spectrophotometric determination of Iron in Vitamin / Dietary Tablets.
c. Spectrophotometric Identification and Determination of Caffeine and Benzoic Acid in Soft Drink.

Suggested Readings:

1. Willard, H. H. *Instrumental Methods of Analysis*, CBS Publishers.
2. Skoog & Lerry. *Instrumental Methods of Analysis*, Saunders College Publications, New York.
3. Skoog, D.A.; West, D.M. & Holler, F.J. *Fundamentals of Analytical Chemistry 6th Ed.*, Saunders College Publishing, Fort Worth (1992).
4. Harris, D. C. *Quantitative Chemical Analysis*, W. H. Freeman.
5. Dean, J. A. *Analytical Chemistry Notebook*, McGraw Hill.
6. Day, R. A. & Underwood, A. L. *Quantitative Analysis*, Prentice Hall of India.
7. Freifelder, D. Physical Biochemistry *2nd Ed.*, W.H. Freeman and Co., N.Y. USA (1982).
8. Cooper, T.G. *The Tools of Biochemistry*, John Wiley and Sons, N.Y. USA. 16 (1977).
9. Vogel, A. I. *Vogel's Qualitative Inorganic Analysis 7th Ed.*, Prentice Hall.
10. Vogel, A. I. Vogel's *Quantitative Chemical Analysis 6th Ed.*, Prentice Hall.
11. Robinson, J.W. *Undergraduate Instrumental Analysis 5th Ed.*, Marcel Dekker, Inc., New York (1995).

A general study including preparation and uses of the following: Hair dye, hair spray, shampoo, suntan lotions, face powder, lipsticks, talcum powder, nail enamel, creams (cold, vanishing and shaving creams), antiperspirants and artificial flavours. Essential oils and their importance in cosmetic industries with reference to Eugenol, Geraniol, sandalwood oil, eucalyptus, rose oil, 2-phenyl ethyl alcohol, Jasmone, Civetone, Muscone.

SEC2P: Practicals **Credits 01**

1. Preparation of talcum powder.
2. Preparation of shampoo.
3. Preparation of enamels.
4. Preparation of hair remover.
5. Preparation of face cream.
6. Preparation of nail polish and nail polish remover.

Suggested Readings:

• E. Stocchi: *Industrial Chemistry*, Vol -I, Ellis Horwood Ltd. UK.
• P.C. Jain, M. Jain: *Engineering Chemistry*, Dhanpat Rai & Sons, Delhi.
• B.K. Sharma: *Industrial Chemistry*, Goel Publishing House, Meerut.

Or

SEC-2: PESTICIDE CHEMISTRY Credit 02

SEC2T: PESTICIDE CHEMISTRY **Credit 01**

Course Contents:

General introduction to pesticides (natural and synthetic), benefits and adverse effects, changing concepts of pesticides, structure activity relationship, synthesis and technical manufacture and uses of representative pesticides in the following classes: Organochlorines (DDT, Gammexene,); Organophosphates (Malathion, Parathion); Carbamates (Carbofuran and carbaryl); Quinones (Chloranil), Anilides (Alachlor and Butachlor).

SEC2P: Practicals **Credit 01**

1. To calculate acidity/alkalinity in given sample of pesticide formulations as per BIS specifications.
2. Preparation of simple organophosphates, phosphonates and thiophosphates

Suggested Readings:

• R. Cremlyn: *Pesticides*, John Wiley.

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University

Or

SEC-2: FUEL CHEMISTRY Credits 02

SEC2T: FUEL CHEMISTRY

Course Contents:

Review of energy sources (renewable and non-renewable). Classification of fuels and their calorific value. ***Coal:*** Uses of coal (fuel and nonfuel) in various industries, its composition, carbonization of coal.Coal gas, producer gas and water gas—composition and uses. Fractionation of coal tar, uses of coal tar bases chemicals, requisites of a good metallurgical coke, Coal gasification(Hydro gasification and Catalytic gasification), Coal liquefaction and Solvent Refining. ***Petroleum and Petrochemical Industry:*** Composition of crude petroleum, Refining and different types of petroleum products and their applications. Fractional Distillation (Principle and process), Cracking (Thermal and catalytic cracking), Reforming Petroleum and non-petroleum fuels (LPG, CNG, LNG, bio-gas, fuels derived from biomass), fuel from waste, synthetic fuels (gaseous and liquids), clean fuels. **Petrochemicals:** Vinyl acetate, Propylene oxide, Isoprene, Butadiene, Toluene and its derivatives Xylene. ***Lubricants:*** Classification of lubricants, lubricating oils (conducting and non-conducting) Solid and semisolid lubricants, synthetic lubricants. Properties of lubricants (viscosity index, cloud point, pore point) and their determination.

Suggested Readings:

• E. Stocchi: *Industrial Chemistry*, Vol -I, Ellis Horwood Ltd. UK.
• P.C. Jain, M. Jain: *Engineering Chemistry*, Dhanpat Rai & Sons, Delhi.
• B.K. Sharma: *Industrial Chemistry*, Goel Publishing House, Meerut.

Generic Elective (GE)
[Interdisciplinary for other department]

GE-4: Solutions, Phase Eequilibria, Conductance, Electrochemistry & Analytical and Enviornmetal Chemistry-I Credits 06

GE4T : Solutions, Phase Eequilibria, Conductance, Electrochemistry & Analytical and Enviornmetal Chemistry-I Credits 04

Course Contents:

Section A: Physical Chemistry-III

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

Solutions

Ideal solutions and Raoult's law, deviations from Raoult's law – non-ideal solutions; Vapour pressure-composition and temperature-composition curves of ideal and non-ideal solutions; Distillation of solutions; Lever rule; Azeotropes Critical solution temperature; effect of impurity on partial miscibility of liquids; Immiscibility of liquids- Principle of steam distillation; Nernst distribution law and its applications, solvent extraction

Phase Equilibria

Phases, components and degrees of freedom of a system, criteria of phase equilibrium; Gibbs Phase Rule and its thermodynamic derivation; Derivation of Clausius – Clapeyron equation and its importance in phase equilibria; Phase diagrams of one-component systems (water and sulphur) and two component systems involving eutectics, congruent and incongruent melting points (lead-silver, $FeCl_3$-H_2O and Na-K only)

Conductance

Conductance, cell constant, specific conductance and molar conductance; Variation of specific and equivalent conductance with dilution for strong and weak electrolytes; Kohlrausch's law of independent migration of ions; Equivalent and molar conductance at infinite dilution and their determination for strong and weak electrolytes; Ostwald's dilution law; Application of conductance measurement (determination of solubility product and ionic product of water); Conductometric titrations (acid-base) Transport Number and principles of Hittorf's and Moving-boundary method

Electromotive force

Faraday's laws of electrolysis, rules of oxidation/reduction of ions based on half-cell potentials, applications of electrolysis in metallurgy and industry; Chemical cells, reversible and irreversible cells with examples; Electromotive force of a cell and its measurement, Nernst equation; Standard electrode (reduction) potential; Electrochemical series; Thermodynamics of a reversible cell, calculation of thermodynamic properties: G, H and S from EMF data Concentration cells with and without transference, liquid junction potential; pH determination using hydrogen electrode and quinhydrone; Qualitative discussion of potentiometric titrations (acid-base, redox, precipitation)

Suggested Readings:

1. Barrow, G.M. *Physical Chemistry* Tata McGraw- Hill (2007).
2. Castellan, G.W. *Physical Chemistry* 4th Ed. Narosa (2004).
3. Kotz, J.C., Treichel, P.M. & Townsend, J.R. *General Chemistry* Cengage Learning India Pvt. Ltd., New Delhi (2009).
4. Mahan, B.H. *University Chemistry* 3rd Ed. Narosa (1998).
5. Petrucci, R.H. *General Chemistry* 5th Ed. Macmillan Publishing Co.: New York (1985).
6. Chugh, K.L., Agnish, S.L. *A Text Book of Physical Chemistry* Kalyani Publishers
7. Bahl, B.S., Bahl, A., Tuli, G.D., *Essentials of Physical Chemistry* S. Chand & Co. ltd.
8. Palit, S. R., *Elementary Physical Chemistry* Book Syndicate Pvt. Ltd.
9. Pahari, S., *Physical Chemistry* New Central Book Agency
10. Pahari, S., Pahari, D., *Problems in Physical Chemistry* New Central Book Agency

Section B: Analytical and Environmental Chemistry

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

Chemical Analysis

Gravimetric analysis: solubility product and common ion effect; requirements of gravimetry; gravimetric estimation of chloride, sulphate, lead, barium, nickel, copper and zinc.
Volumetric analysis: primary and secondary standard substances; principles of acidbase, oxidation – reduction and complexometric titrations; indicators: acid-base, redox and metal ion; principles of estimation of mixtures: $NaHCO_3$ and Na_2CO_3 (by acidimetry); iron, copper, manganese and chromium (by redox titration); zinc, aluminum, calcium and magnesium (by complexometric EDTA titration).
Chromatography: chromatographic methods of analysis: column chromatography and thin layer chromatography.

Environmental Chemistry

The Atmosphere: composition and structure of the atmosphere; troposphere, stratosphere, mesosphere and thermosphere; ozone layer and its role; major air pollutants: CO, SO_2, NO_x and particulate matters – their origin and harmful effects; problem of ozone layer depletion; green house effect; acid rain and photochemical smog; air pollution episodes: air quality standard; air pollution control measures: cyclone collector, electrostatic precipitator, catalytic converter.
The Hydrosphere: environmental role of water, natural water sources, water treatment for industrial, domestic and laboratory uses; water pollutants; action of soaps and detergents, phosphates, industrial effluents, agricultural runoff, domestic wastes; thermal pollution, radioactive pollution and their effects on animal and plant life; water pollution episodes: water pollution control measures : waste water treatment; chemical treatment and microbial treatment; water quality standards: DO, BOD, COD, TDS and hardness parameters; desalination of sea water : reverse osmosis, electrodialysis.
The Lithosphere: water and air in soil, waste matters and pollutants in soil, waste classification, treatment and disposal; soil pollution and control measures.

Suggested Readings:

1. Banerjee, S. P. *A Text Book of Analytical Chemistry*, The New Book Stall.
2. Gangopadhyay, P. K. *Application Oriented Chemistry*, Book Syndicate.
3. Mondal, A. K & Mondal, S. *Degree Applied Chemistry*, Sreedhar Publications.
4. Banerjee, S. P. *A Text Book of Analytical Chemistry*, The New Book Stall.

GE4T: Practical **Credits 02**

Section A: Physical Chemistry-LAB
(Minimum **six** experiments to complete)

(I) Distribution Law (Any one)
Study of the equilibrium of one of the following reactions by the Distribution method:

$I_2(aq) + I^-(aq) = I_3^-(aq)$ $Cu^{2+}(aq) + xNH_2(aq) = [Cu(NH_3)_x]^{2+}$

Downloaded from Vidyasagar University by 157.43.133.237 on 23 February 2021 : 17:17:19; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons4.pdf

(II) Phase equilibria (Any one)

a) Construction of the phase diagram of a binary system (simple eutectic) using cooling curves
b) Determination of the critical solution temperature and composition of the phenol water system and study of the effect of impurities on it

(III) Conductance

a) Determination of dissociation constant of a weak acid (cell constant, equivalent conductance are also determined)
b) Perform the following conductometric titrations: (Any one)
(i) Strong acid vs. strong base
(ii) Weak acid vs. strong base

(IV) Potentiometry

Perform the following potentiometric titrations:

(i) Weak acid vs. strong base
(ii) Potassium dichromate vs. Mohr's salt

Suggested Readings:

1. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N., University of Calcutta, 2003.
2. Palit, S.R., *Practical Physical Chemistry* Science Book Agency
3. Mukherjee, N.G., *Selected Experiments in Physical Chemistry* J. N. Ghose & Sons
4. Dutta, S.K., *Physical Chemistry Experiments* Bharati Book Stall

Section B: Analytic and Environmental Chemistry-LAB

1. To find the total hardness of water by EDTA titration.
2. To find the PH of an unknown solution by comparing color of a series of HCl solutions + 1 drop of methyl orange, and a similar series of NaOH solutions + 1 drop of phenolphthalein.
3. To determine the rate constant for the acid catalysed hydrolysis of an ester.
4. Determination of the strength of the H_2O_2 sample.
5. To determine the solubility of a sparingly soluble salt, e.g. KHTa (one bottle)

Suggested Readings:

1. Khosla, B. D.; Garg, V. C. & Gulati, A. *Senior Practical Physical Chemistry*, R. Chand & Co.: New Delhi (2011).
2. Ghosal, Mahapatra & Nad, *An Advanced Course in Practical Chemistry*, New Central Book Agency.
3. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N. University of Calcutta, 2003.
4. Das, S. C., Chakraborty, S. B., *Practical Chemistry*.

SEMESTER –V

Core Courses (CC)

CC-11: Inorganic Chemistry - IV **Credits 06**

C11T: Inorganic Chemistry - IV **Credits 04**

Course Contents:

Coordination Chemistry-II

VB description and its limitations. Elementary Crystal Field Theory: splitting of d^n configurations in octahedral, square planar and tetrahedral fields, crystal field stabilization energy (CFSE) in weak and strong fields; pairing energy. Spectrochemical series. Jahn- Teller distortion. Octahedral site stabilization energy (OSSE). Metal-ligand bonding (MO concept, elementary idea), sigma- and pi-bonding in octahedral complexes (qualitative pictorial approach) and their effects on the oxidation states of transitional metals (examples). Magnetism and Colour: Orbital and spin magnetic moments, spin only moments of d^n ions and their correlation with effective magnetic moments, including orbital contribution; quenching of magnetic moment: super exchange and antiferromagnetic interactions (elementary idea with examples only); d-d transitions; L-S coupling; qualitative Orgel diagrams for $3d^1$ to $3d^9$ ions. Racah parameter. Selection rules for electronic spectral transitions; spectrochemical series of ligands; charge transfer spectra (elementary idea).

Chemistry of d- and f- block elements

Transition Elements:

General comparison of 3d, 4d and 5d elements in term of electronic configuration, oxidation states, redox properties, coordination chemistry.

Lanthanoids and Actinoids:

General Comparison on Electronic configuration, oxidation states, colour, spectral and magnetic properties; lanthanide contraction, separation of lanthanides (ion-exchange method only).

Suggested Readings:

1. Huheey, J. E.; Keiter, E.A. & Keiter, R.L. *Inorganic Chemistry, Principles of Structure and Reactivity 4th Ed.*, Harper Collins 1993, Pearson,2006.
2. Greenwood, N.N. & Earnshaw A. *Chemistry of the Elements*, Butterworth-Heinemann. 1997.
3. Cotton, F.A., Wilkinson, G., Murrillo, C. A., Bochmann, M., *Advanced Inorganic Chemistry 6th Ed. 1999.*, Wiley.

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

4. Atkin, P. *Shriver & Atkins' Inorganic Chemistry* 5th Ed. Oxford University Press (2010).
5. Purecell, K.F. and Kotz, J.C., *An Introduction to Inorganic Chemistry*, Saunders: Philadelphia, 1980.
6. Sinha, S. P., Ed., Lanthanide and Actinide Research (Journal, Vol. 1, 1986).
7. Wulfsberg, G., Principles of Descriptive Inorganic Chemistry, Brooks/Cole: Monterey, CA, 1987.

C11P : LAB **Credits 02**

Practicals :

Chromatography of metal ions

Principles involved in chromatographic separations. Paper chromatographic separation of following metal ions:

1. Ni (II) and Co (II)
2. Fe (III) and Al (III)

Gravimetry

1. Estimation of Ni(II) using Dimethylglyoxime (DMG).
2. Estimation of copper as CuSCN.
3. Estimation of Al(III) by precipitating with oxine and weighing as $Al(oxine)_3$ (aluminium oxinate).
4. Estimation of chloride.

Spectrophotometry

1. Measurement of 10Dq by spectrophotometric method.
2. Determination of λ_{max} of $[Mn(acac)_3]$ and $[Fe(acac)_3]$ complexes.

Suggested Readings:

1. Mendham, J., *A. I. Vogel's Quantitative Chemical Analysis* 6th Ed., Pearson, 2009.

CC-12: Organic Chemistry - V **Credits 06**

C12T: Organic Chemistry - V **Credits 04**

Course Contents:

Carbocycles and Heterocycles

Polynuclear hydrocarbons and their derivatives: synthetic methods include Haworth, Bardhan-Sengupta, Bogert-Cook and other useful syntheses (with mechanistic details); fixation of double bonds and Fries rule; reactions (with mechanism) of naphthalene, anthracene, phenanthrene and their derivatives.

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

Heterocyclic compounds: 5- and 6-membered rings with one heteroatom; reactivity, orientation and important reactions (with mechanism) of furan, pyrrole, thiophene and pyridine; synthesis (including retrosynthetic approach and mechanistic details): pyrrole: Knorr synthesis, Paal-Knorr synthesis, Hantzsch; furan: Paal-Knorr synthesis, Feist-Benary synthesis and its variation; thiophenes: Paal-Knorr synthesis, Hinsberg synthesis; pyridine: Hantzsch synthesis; benzo-fused 5- and 6-membered rings with one heteroatom: reactivity, orientation and important reactions (with mechanistic details) of indole, quinoline and isoquinoline; synthesis (including retrosynthetic approach and mechanistic details): indole: Fischer, Madelung and Reissert; quinoline: Skraup, Doebner- Miller, Friedlander; isoquinoline: Bischler-Napieralski synthesis.

Cyclic Stereochemistry

Alicyclic compounds: concept of I-strain; conformational analysis: cyclohexane, mono and disubstituted cyclohexane; symmetry properties and optical activity; topomerisation; ring-size and ease of cyclisation; conformation & reactivity in cyclohexane system: consideration of steric and stereoelectronic requirements; elimination (E2, E1), nucleophilic substitution (S_N1, S_N2, S_Ni, NGP), merged substitution-elimination; rearrangements; oxidation of cyclohexanol, esterification, saponification, lactonisation, epoxidation, pyrolytic *syn* elimination and fragmentation reactions.

Pericyclic reactions

Mechanism, stereochemistry, regioselectivity in case of

Electrocyclic reactions: FMO approach involving 4π- and 6π-electrons (thermal and photochemical) and corresponding cycloreversion reactions.

Cycloaddition reactions: FMO approach, Diels-Alder reaction, photochemical [2+2] cycloadditions.

Sigmatropic reactions: FMO approach, sigmatropic shifts and their order; [1,3]- and [1,5]-H shifts and [3,3]-shifts with reference to Claisen and Cope rearrangements.

Carbohydrates

Monosaccharides: Aldoses up to 6 carbons; structure of D-glucose & D-fructose (configuration & conformation); ring structure of monosaccharides (furanose and pyranose forms): Haworth representations and non-planar conformations; anomeric effect (including stereoelectronic explanation); mutarotation; epimerization; reactions (mechanisms in relevant cases): Fischer glycosidation, osazone formation, bromine-water oxidation, HNO_3 oxidation, selective oxidation of terminal $–CH_2OH$ of aldoses, reduction to alditols, Lobry de Bruyn-van Ekenstein rearrangement; stepping–up (Kiliani-Fischer method) and stepping–down (Ruff's & Wohl's methods) of aldoses;

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

end-group-interchange of aldoses; acetonide (isopropylidene) and benzylidene protections; ring-size determination; Fischer's proof of configuration of (+)-glucose.

Disaccharides: Glycosidic linkages, concept of glycosidic bond formation by glycosyl donor-acceptor; structure of sucrose, inversion of cane sugar.

Polysaccharides: starch (structure and its use as an indicator in titrimetric analysis).

Bio-molecules

Amino acids: synthesis with mechanistic details: Strecker, Gabriel, acetamido malonic ester, azlactone, Bücherer hydantoin synthesis, synthesis involving diketopiperazine; isoelectric point, zwitterions; electrophoresis, reaction (with mechanism): ninhydrin reaction, Dakin-West reaction; resolution of racemic amino acids.

Peptides: peptide linkage and its geometry; syntheses (with mechanistic details) of peptides using *N*-protection & C-protection, solid-phase (Merrifield) synthesis; peptide sequence: *C*-terminal and *N*-terminal unit determination (Edman, Sanger & 'dansyl' methods); partial hydrolysis; specific cleavage of peptides: use of CNBr.

Nucleic acids: pyrimidine and purine bases (only structure & nomenclature); nucleosides and nucleotides corresponding to DNA and RNA; mechanism for acid catalysed hydrolysis of nucleosides (both pyrimidine and purine types); comparison of alkaline hydrolysis of DNA and RNA; elementary idea of double helical structure of DNA (Watson-Crick model); complimentary base–pairing in DNA.

Suggested Readings:

16. Gilchrist, T. L. *Heterocyclic Chemistry*, 3rd edition, Pearson.
17. Davies, D. T., *Heterocyclic Chemistry*, Oxford Chemistry Primer, Oxford University Press.
18. Organic Chemistry, Paula Bruice

C12P : LAB **Credits 06**

Practicals :

A. Chromatographic Separations

1. TLC separation of a mixture containing 2/3 amino acids
2. TLC separation of a mixture of dyes (fluorescein and methylene blue)
3. Column chromatographic separation of leaf pigments from spinach leaves
4. Column chromatographic separation of mixture of dyes
5. Paper chromatographic separation of a mixture containing 2/3 amino acids
6. Paper chromatographic separation of a mixture containing 2/3 sugars

B. **Spectroscopic Analysis of Organic Compounds**

1. Assignment of labelled peaks in the ^{1}H NMR spectra of the known organic compounds explaining the relative δ-values and splitting pattern.

2. Assignment of labelled peaks in the IR spectrum of the same compound explaining the relative frequencies of the absorptions (C-H, O-H, N-H, C-O, C-N, C-X, C=C, C=O, N=O, C≡C, C≡N stretching frequencies; characteristic bending vibrations are included).

3. The students must record full spectral analysis of **at least 15 (fifteen)** compounds from the following list:
(i) 4′-Bromoacetanilide (ii) 2-Bromo-4'-methylacetophenone (iii) Vanillin (iv) 2′-Methoxyacetophenone (v) 4-Aminobenzoic acid (vi) Salicylamide (vii) 2′-Hydroxyacetophenone (viii) 1,3-Dinitrobenzene (ix) *trans*-Cinnamic acid (x) *trans*-4-Nitrocinnamaldehyde (xi) Diethyl fumarate (xii) 4-Nitrobenzaldehyde (xiii) 4′-Methylacetanilide (xiv) Mesityl oxide (xv) 2-Hydroxybenzaldehyde (xvi) 4-Nitroaniline (xvii) 2-Hydroxy-3-nitrobenzaldehyde (xviii) 2,3-Dimethylbenzonitrile (xix) Pent-1-yn-3-ol (xx) 3-Nitrobenzaldehyde (xxi) 3-Ethoxy-4-hydroxybenzaldehyde (xxii) 2-Methoxybenzaldehyde (xxiii) Methyl 4-hydroxybenzoate (xxiv) Methyl 3-hydroxybenzoate (xxv) 3-Aminobenzoic acid (xxvi) Ethyl 3-aminobenzoate (xxvii) Ethyl 4-aminobenzoate (xxviii) 3-nitroanisole (xxix) 5-Methyl-2-nitroanisole (xxx) 3′-Methylacetanilide

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

Suggested Readings:

1. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N. University of Calcutta, 2003.
2. *Practical Workbook Chemistry (Honours), UGBS, Chemistry*, University of Calcutta, 2015
3. Furniss, B.S.; Hannaford, A.J.; Smith, P.W.G.; Tatchell, A.R. *Practical Organic Chemistry, 5th Ed.*, Pearson (2012).
4. Mann, F.G. & Saunders, B.C. *Practical Organic Chemistry*, Pearson Education.

Discipline Specific Electives (DSE)

DSE -1: Advanced Physical Chemistry **Credits 06**

DSE1T: Advanced Physical Chemistry **Credits 04**

Course Contents:

a) Crystal Structure

Bravais Lattice and Laws of Crystallography: Types of solid, Bragg's law of diffraction; Laws of crystallography (Haüy's law and Steno's law); Permissible symmetry axes in crystals; Lattice, space lattice, unit cell, crystal planes, Bravais lattice. Packing of uniform hard sphere, close packed arrangements (fcc and hcp); Tetrahedral and octahedral voids. Void space in p-type, F-type and I-type cubic systems

Crystal planes: Distance between consecutive planes [cubic, tetragonal and orthorhombic lattices]; Indexing of planes, Miller indices; calculation of d_{hkl}; Relation between molar mass and unit cell dimension for cubic system; Bragg's law (derivation)

Determination of crystal structure: Powder method; Structure of NaCl and KCl crystals

b) Statistical Thermodynamics

Configuration: Macrostates, microstates and configuration; calculation with harmonic oscillator; variation of W with E; equilibrium configuration

Boltzmann distribution: Thermodynamic probability, entropy and probability, Boltzmann distribution formula (with derivation); Applications to barometric distribution; Partition function, concept of ensemble - canonical ensemble and grand canonical ensembles

Partition function: molecular partition function and thermodynamic properties, Maxwell's speed distribution; Gibbs' paradox

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

c) Special selected topics

Specific heat of solid: Coefficient of thermal expansion, thermal compressibility of solids; Dulong –Petit's law; Perfect Crystal model, Einstein's theory – derivation from partition function, limitations; Debye's T^3 law – analysis at the two extremes

3rd law: Absolute entropy, Plank's law, Calculation of entropy, Nernst heat theorem

Adiabatic demagnetization: Approach to zero Kelvin, adiabatic cooling, demagnetization, adiabatic demagnetization – involved curves

Polymers: Classification of polymers, nomenclature, Molecular forces and chemical bonding in polymers, Texture of Polymers; Criteria for synthetic polymer formation; Relationships between functionality, extent of reaction and degree of polymerization; Mechanism and kinetics of step growth and copolymerization; Conducting polymers

Suggested Readings:

12. Odian, G. *Principles of Polymerization*, Wiley
13. Billmeyer, F. W. *Textbook of Polymer Science*, Wiley Interscience, 1971.

DSE1P: Advanced Physical Chemistry (Lab) Credits 02

Practicals :

Computer programs based on numerical methods for

Programming 1: Roots of equations: (e.g. volume of van der Waals gas and comparison with ideal gas, pH of a weak acid)

Programming 2: Numerical differentiation (e.g., change in pressure for small change in volume of a van der Waals gas, potentiometric titrations)

Programming 3: Numerical integration (e.g. entropy/ enthalpy change from heat capacity data), probability distributions (gas kinetic theory) and mean values

Programming 4: Matrix operations (Application of Gauss-Siedel method in colourimetry)

Programming 5: Simple exercises using molecular visualization software

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University

Suggested Readings:

1. Mc Quarrie, D. A. *Mathematics for Physical Chemistry* University Science Books (2008)
2. Mortimer, R. *Mathematics for Physical Chemistry*. 3rd Ed. Elsevier (2005)
3. Yates, P. *Chemical Calculations*. 2nd Ed. CRC Press (2007)
4. Harris, D. C. *Quantitative Chemical Analysis*. 6th Ed., Freeman (2007) Chapters 3-5
5. Noggle, J. H. *Physical Chemistry on a Microcomputer*. Little Brown & Co. (1985)

DSE-2: Analytical Methods in Chemistry **Credits 06**

DSE2T: Analytical Methods in Chemistry **Credits 04**

Course Contents:

Qualitative and quantitative aspects of analysis:

Sampling, evaluation of analytical data, errors, accuracy and precision, methods of their expression, normal law of distribution if indeterminate errors, statistical test of data; F, Q and t test, rejection of data, and confidence intervals.

Optical methods of analysis:

Origin of spectra, interaction of radiation with matter, fundamental laws of spectroscopy and selection rules, validity of Beer-Lambert's law.

UV-Visible Spectrometry: Basic principles of instrumentation (choice of source, monochromator and detector) for single and double beam instrument;
Basic principles of quantitative analysis: estimation of metal ions from aqueous solution, geometrical isomers, keto-enol tautomers. Determination of composition of metal complexes using Job's method of continuous variation and mole ratio method.
Infrared Spectrometry: Basic principles of instrumentation (choice of source, monochromator & detector) for single and double beam instrument; sampling techniques.

Structural illustration through interpretation of data, Effect and importance of isotope substitution.

Flame Atomic Absorption and Emission Spectrometry: Basic principles of instrumentation (choice of source, monochromator, detector, choice of flame and Burner designs. Techniques of atomization and sample introduction; Method of background correction, sources of chemical interferences and their method of removal. Techniques for the quantitative estimation of trace level of metal ions from water samples.

Thermal methods of analysis:

Theory of thermogravimetry (TG), basic principle of instrumentation.

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

Techniques for quantitative estimation of Ca and Mg from their mixture.

Electroanalytical methods:

Classification of electroanalytical methods, basic principle of pH metric, potentiometric and conductometric titrations. Techniques used for the determination of equivalence points. Techniques used for the determination of pKa values.

Separation techniques:

Solvent extraction: Classification, principle and efficiency of the technique.

Mechanism of extraction: extraction by solvation and chelation.

Technique of extraction: batch, continuous and counter current extractions.

Qualitative and quantitative aspects of solvent extraction: extraction of metal ions from aqueous solution, extraction of organic species from the aqueous and nonaqueous media.

Chromatography: Classification, principle and efficiency of the technique.

Mechanism of separation: adsorption, partition & ion exchange.

Development of chromatograms: frontal, elution and displacement methods.

Qualitative and quantitative aspects of chromatographic methods of analysis: IC, GLC, GPC, TLC and HPLC.

Stereoisomeric separation and analysis: Measurement of optical rotation, calculation of Enantiomeric excess (ee)/ diastereomeric excess (de) ratios and determination of enantiomeric composition using NMR, Chiral solvents and chiral shift reagents. Chiral chromatographic techniques using chiral columns (GC and HPLC).

Role of computers in instrumental methods of analysis.

7. Mikes, O. *Laboratory Hand Book of Chromatographic & Allied Methods*, Elles Harwood Series on Analytical Chemistry, John Wiley & Sons, 1979.
8. Ditts, R.V. Analytical Chemistry; Methods of separation, van Nostrand, 1974.

DSE2P: Analytical Methods in Chemistry (lab) **Credits 02**

Practical :

I. Separation Techniques

Chromatography:

(a) Separation of mixtures

Separation and identification of the monosaccharides present in the given mixture (glucose & fructose) by paper chromatography. Reporting the R_f values.

(b) Separate a mixture of Sudan yellow and Sudan Red by TLC technique and identify them on the basis of their Rf values.

(c) Chromatographic separation of the active ingredients of plants, flowers and juices by TLC

II. Solvent Extractions:

To separate a mixture of Ni^{2+} & Fe^{2+} by complexation with DMG and extracting the Ni^{2+}-DMG complex in chloroform, and determine its concentration by spectrophotometry.

Analysis of soil:

(i) Determination of pH of soil.
(ii) Estimation of calcium, magnesium, phosphate

Ion exchange:
Determination of exchange capacity of cation exchange resins and anion exchange resins.

III. Spectrophotometry

1. Determination of pKa values of indicator using spectrophotometry.
2. Determination of chemical oxygen demand (COD).
3. Determination of Biological oxygen demand (BOD).

Suggested Readings:

1. Mendham, J., *A. I. Vogel's Quantitative Chemical Analysis 6th Ed.*, Pearson, 2009.
2. Willard, H.H. *et al.*: *Instrumental Methods of Analysis*, 7th Ed. Wardsworth Publishing Company, Belmont, California, USA, 1988.

Or

DSE-2: Instrumental Methods of Chemical Analysis **Credits 06**

DSE2T: Instrumental Methods of Chemical Analysis **Credits 04**

Course Contents:

Introduction to spectroscopic methods of analysis:

Recap of the spectroscopic methods covered in detail in the core chemistry syllabus: Treatment of analytical data, including error analysis. Classification of analytical methods and the types of instrumental methods. Consideration of electromagnetic radiation.

Molecular spectroscopy:

Infrared spectroscopy:

Interactions with molecules: absorption and scattering. Means of excitation (light sources), separation of spectrum (wavelength dispersion, time resolution), detection of the signal (heat, differential detection), interpretation of spectrum (qualitative, mixtures, resolution), advantages of Fourier Transform (FTIR). Samples and results expected. Applications: Issues of quality assurance and quality control, Special problems for portable instrumentation and rapid detection.

UV-Visible/ Near IR – emission, absorption, fluorescence and photoaccoustic. Excitation sources (lasers, time resolution), wavelength dispersion (gratings, prisms, interference filters, laser, placement of sample relative to dispersion, resolution), Detection of signal (photocells, photomultipliers, diode arrays, sensitivity and S/N), Single and Double Beam instruments, Interpretation (quantification, mixtures, absorption vs. fluorescence and the use of time, photoaccoustic, fluorescent tags).

Separation techniques:

Chromatography: Gas chromatography, liquid chromatography, supercritical fluids, Importance of column technology (packing, capillaries), Separation based on increasing number of factors (volatility, solubility, interactions with stationary phase, size, electrical field), Detection: simple vs. specific (gas and liquid), Detection as a means of further analysis (use of tags and coupling to IR and MS), Electrophoresis (plates and capillary) and use with DNA analysis.

Elemental analysis:

Mass spectrometry (electrical discharges).

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

Atomic spectroscopy: Atomic absorption, Atomic emission, and Atomic fluorescence.

Excitation and getting sample into gas phase (flames, electrical discharges, plasmas), Wavelength separation and resolution (dependence on technique), Detection of radiation (simultaneous/scanning, signal noise), Interpretation (errors due to molecular and ionic species, matrix effects, other interferences).

NMR spectroscopy:
Principle, Instrumentation, Factors affecting chemical shift, Spin-coupling, Applications.

Electroanalytical Methods:

Potentiometry & Voltammetry

Radiochemical Methods:
Elementary idea

X-ray analysis and electron spectroscopy (surface analysis):
Elementary idea

Suggested Readings:

1. D.A. Skoog, F.J. Holler & S. Crouch (ISBN 0-495-01201-7) *Principles of Instrumental Analysis*, Cengage Learning India Edition, 2007.
2. Willard, Merritt, Dean, Settle, *Instrumental Methods of Analysis*, 7th ed, IBH Book House, New Delhi.
3. Atkins, P.W & Paula, J.D. *Physical Chemistry*, 10th Ed., Oxford University Press (2014).
4. Kakkar, R. *Atomic and Molecular Spectroscopy: Concepts and Applications.* Cambridge University Press, 2015.
5. Castellan, G. W. *Physical Chemistry 4th Ed.*, Narosa (2004).
6. Banwell, C. N. & McCash, E. M. *Fundamentals of Molecular Spectroscopy* 4th Ed.
7. Smith, B.C. *Infrared Spectral Interpretations: A Systematic Approach.* CRC Press, 1998.
8. Moore, W.J., *Physical Chemistry* Orient Blackswan, 1999.

DSE2P: Instrumental Methods of Chemical Analysis (Lab)

Credits 02

Practical :

1. Safety Practices in the Chemistry Laboratory
2. Determination of the isoelectric pH of a protein.
3. Titration curve of an amino acid.
4. Determination of the void volume of a gel filtration column.
5. Determination of a Mixture of Cobalt and Nickel (UV/Vis spec.)
6. Study of Electronic Transitions in Organic Molecules (i.e., acetone in water)
7. IR Absorption Spectra (Study of Aldehydes and Ketones)
8. Determination of Calcium, Iron, and Copper in Food by Atomic Absorption
9. Quantitative Analysis of Mixtures by Gas Chromatography (i.e., chloroform and carbon tetrachloride)

Downloaded from Vidyasagar University by 47.11.222.60 on 22 January 2020 : 18:35:04; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons5.pdf

10. Separation of Carbohydrates by HPLC
11. Determination of Caffeine in Beverages by HPLC
12. Potentiometric Titration of a Chloride-Iodide Mixture
13. Cyclic Voltammetry of the Ferrocyanide/ Ferricyanide Couple
14. Nuclear Magnetic Resonance
15. Use of fluorescence to do “presumptive tests” to identify blood or other body fluids.
16. Use of “presumptive tests” for anthrax or cocaine
17. Collection, preservation, and control of blood evidence being used for DNA testing
18. Use of capillary electrophoresis with laser fluorescence detection for nuclear DNA (Y chromosome only or multiple chromosome)
19. Use of sequencing for the analysis of mitochondrial DNA
20. Laboratory analysis to confirm anthrax or cocaine
21. Detection in the field and confirmation in the laboratory of flammable accelerants or explosives
22. Detection of illegal drugs or steroids in athletes
23. Detection of pollutants or illegal dumping
24. Fibre analysis

At least 10 experiments to be performed.

Suggested Readings:

1. Skoog, D.A. Holler F.J. & Nieman, T.A. *Principles of Instrumental Analysis*, Cengage Learning India Ed.
2. Willard, H.H., Merritt, L.L., Dean, J. & Settoe, F.A. *Instrumental Methods of Analysis*, 7th Ed. Wadsworth Publishing Company Ltd., Belmont, California, USA, 1988

SEMESTER –VI

Core Courses (CC)

CC-13: Inorganic Chemistry-V — Credits 06

C13T: Inorganic Chemistry-V — Credits 04

Course Contents:

Bioinorganic Chemistry

Elements of life: essential and beneficial elements, major, trace and ultratrace elements. Basic chemical reactions in the biological systems and the role of metal ions (specially Na^+, K^+, Mg^{2+}, Ca^{2+}, $Fe^{3+/2+}$, $Cu^{2+/+}$, and Zn^{2+}). Metal ion transport across biological membrane Na^+/ K^+-ion pump. Dioxygen molecule in life. Dioxygen management proteins: Haemoglobin, Myoglobin, Hemocyanine and Hemerythrin. Electron transfer proteins: Cytochromes and Ferredoxins. Hydrlytic enzymes: carbonate bicarbonate buffering system and carbonic anhydrase and carboxyanhydrase A. Biological nitrogen fixation, Photosynthesis: Photosystem-I and Photosystem-II. Toxic metal ions and their effects, chelation therapy (examples only), Pt and Au complexes as drugs (examples only), metal dependent diseases (examples only)

Organometallic Chemistry

Definition and classification of organometallic compounds on the basis of bond type. Concept of hapticity of organic ligands. 18-electron and 16-electron rules (pictorial MO approach). Applications of 18-electron rule to metal carbonyls, nitrosyls, cyanides. General methods of preparation of mono and binuclear carbonyls of 3d series. Structures of mononuclear and binuclear carbonyls. pi-acceptor behaviour of CO, synergic effect and use of IR data to explain extent of back bonding. Zeise's salt: Preparation, structure, evidences of synergic effect. Ferrocene: Preparation and reactions (acetylation, alkylation, metallation, Mannich Condensation). Reactions of organometallic complexes: substitution, oxidative addition, reductive elimination and insertion reactions.

Catalysis by Organometallic Compounds

Study of the following industrial processes

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

1. Alkene hydrogenation (Wilkinson's Catalyst)

2. Hydroformylation

3. Wacker Process

4. Synthetic gasoline (Fischer Tropsch reaction)

5. Ziegler-Natta catalysis for olefin polymerization.

Reaction Kinetics and Mechanism

Introduction to inorganic reaction mechanisms. Substitution reactions in square planar complexes, Trans- effect and its application in complex synthesis, theories of trans effect, Mechanism of nucleophilic substitution in square planar complexes, Thermodynamic and Kinetic stability, Kinetics of octahedral substitution, Ligand field effects and reaction rates, Mechanism of substitution in octahedral complexes.

Suggested Readings:

1. Lippard, S.J. & Berg, J.M. *Principles of Bioinorganic Chemistry* Panima Publishing Company 1994.
2. Huheey, J. E.; Keiter, E.A. & Keiter, R.L. *Inorganic Chemistry, Principles of Structure and Reactivity 4th Ed.*, Harper Collins 1993, Pearson,2006.
3. Greenwood, N.N. & Earnshaw A. *Chemistry of the Elements*, Butterworth-Heinemann, 1997.
4. Cotton, F.A., Wilkinson, G., Murrillo, C. A., Bochmann, M., *Advanced Inorganic Chemistry 6th Ed. 1999.*, Wiley.
5. Bertini, I., Gray, H. B., Lippard, S.J., Valentine, J. S., Viva, 2007.
6. Basolo, F, and Pearson, R.C. *Mechanisms of Inorganic Chemistry*, John Wiley & Sons, NY, 1967.
7. Purecell, K.F. and Kotz, J.C., *An Introduction to Inorganic Chemistry*, Saunders: Philadelphia, 1980.
8. Powell, P. *Principles of Organometallic Chemistry*, Chapman and Hall, 1988.
9. Collman, J. P. *et al. Principles and Applications of Organotransition Metal Chemistry*. Mill Valley, CA: University Science Books, 1987.
10. Crabtree, R. H. *The Organometallic Chemistry of the Transition Metals.* New York, NY: John Wiley, 2000.

C13P: LAB Credits 02

Practical:

Qualitative semimicro analysis of mixtures containing four radicals. Emphasis should be given to the understanding of the chemistry of different reactions and to assign the most probable composition.

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

Cation Radicals: Na^{+}, K^{+}, Ca^{2+}, Sr^{2+}, Ba^{2+}, Al^{3+}, Cr^{3+}, Mn^{2+}/Mn^{4+}, Fe^{3+}, Co^{2+}/Co^{3+}, Ni^{2+}, Cu^{2+}, Zn^{2+}, Pb^{2+}, Cd^{2+}, Bi^{3+}, Sn^{2+}/Sn^{4+}, As^{3+}/As^{5+}, $Sb^{3+/5+}$, NH_4^{+}, Mg^{2+}.

Anion Radicals: F^{-}, Cl^{-}, Br^{-}, BrO_3^{-}, I^{-}, IO_3^{-}, SCN^{-}, S^{2-}, SO_4^{2-}, NO_3^{-}, NO_2^{-}, PO_4^{3-}, AsO_4^{3--}, BO_3^{3-}, CrO_4^{2-} / $Cr_2O_7^{2-}$, $Fe(CN)_6^{4-}$, $Fe(CN)_6^{3-}$.

Insoluble Materials: Al_2O_3(ig), Fe_2O_3(ig), Cr_2O_3(ig), SnO_2, $SrSO_4$, $BaSO_4$, CaF_2, $PbSO_4$.

Suggested Readings:

1. Svehla, G., *Vogel's Qualitative Inorganic Analysis*, Pearson Education, 2012.

CC-14: Physical Chemistry-V — Credits 06

C14T: Physical Chemistry-V — Credits 04

Course Contents:

a) Molecular Spectroscopy

Interaction of electromagnetic radiation with molecules and various types of spectra; Born-Oppenheimer approximation

Rotation spectroscopy: Selection rules, intensities of spectral lines, determination of bond lengths of diatomic and linear triatomic molecules, isotopic substitution

Vibrational spectroscopy: Classical equation of vibration, computation of force constant, amplitude of diatomic molecular vibrations, anharmonicity, Morse potential, dissociation energies, fundamental frequencies, overtones, hot bands, degrees of freedom for polyatomic molecules, modes of vibration, concept of group frequencies; Diatomic vibrating rotator, P, Q, R branches

Raman spectroscopy: Qualitative treatment of Rotational Raman effect; Effect of nuclear spin, Vibrational Raman spectra, Stokes and anti-Stokes lines; their intensity difference, rule of mutual exclusion

Nuclear Magnetic Resonance (NMR) spectroscopy: Principles of NMR spectroscopy, Larmor precession, chemical shift and low resolution spectra, different scales, spin-spin coupling and high resolution spectra, interpretation of PMR spectra of organic molecules

Electron Spin Resonance (ESR) spectroscopy: Its principle, hyperfine structure, ESR of simple radicals

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

b) Photochemistry

Lambert-Beer's law: Characteristics of electromagnetic radiation, Lambert-Beer's law and its limitations, physical significance of absorption coefficients; Laws of photochemistry, Stark-Einstein law of photochemical equivalence quantum yield, actinometry, examples of low and high quantum yields

Photochemical Processes: Potential energy curves (diatomic molecules), Frank-Condon principle and vibrational structure of electronic spectra; Bond dissociation and principle of determination of dissociation energy (ground state); Decay of excited states by radiative and non-radiative paths; Pre-dissociation; Fluorescence and phosphorescence, Jablonskii diagram;

Rate of Photochemical processes: Photochemical equilibrium and the differential rate of photochemical reactions, Photostationary state; HI decomposition, H_2-Br_2 reaction, dimerisation of anthracene; photosensitised reactions, quenching; Role of photochemical reactions in biochemical processes, photostationary states, chemiluminescence

c) Surface phenomenon

Surface tension and energy: Surface tension, surface energy, excess pressure, capillary rise and surface tension; Work of cohesion and adhesion, spreading of liquid over other surface; Vapour pressure over curved surface; Temperature dependence of surface tension

Adsorption: Physical and chemical adsorption; Freundlich and Langmuir adsorption isotherms; multilayer adsorption and BET isotherm (no derivation required); Gibbs adsorption isotherm and surface excess; Heterogenous catalysis (single reactant); Zero order and fractional order reactions;

Colloids: Lyophobic and lyophilic sols, Origin of charge and stability of lyophobic colloids, Coagulation and Schultz-Hardy rule, Zeta potential and Stern double layer (qualitative idea), Tyndall effect; Electrokinetic phenomena (qualitative idea only); Determination of Avogadro number by Perrin's method; Stability of colloids and zeta potential; Micelle formation

Suggested Readings:

1. Castellan, G. W. Physical Chemistry, Narosa
2. Levine, I. N. Physical Chemistry, Tata McGraw-Hill
3. Atkins, P. W. & Paula, J. de Atkin's, Physical Chemistry, Oxford University Press
4. McQuarrie, D. A. & Simons, J. D. Physical Chemistry: A Molecular Approach, Viva Press
5. Mortimer, R. G. Physical Chemistry, Elsevier
6. Laidler, K. J. Chemical Kinetics, Pearson
7. Banwell, C. N. Fundamentals of Molecular Spectroscopy, Tata-McGraw-Hill
8. Barrow, G. M. Molecular Spectroscopy, McGraw-Hill
9. Hollas, J.M. Modern Spectroscopy, Wiley India
10. McHale, J. L. Molecular Spectroscopy, Pearson Education

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University

11. Wayne, C. E. & Wayne, R. P. Photochemistry, OUP
12. Brown, J. M. Molecular Spectroscopy, OUP
13. Levine, I. N. Quantum Chemistry, PHI
14. Atkins, P. W. Molecular Quantum Mechanics, Oxford

C14P : LAB Credits 02

Practical

Experiment 1: Determination of surface tension of a liquid using Stalagmometer

Experiment 2: Determination of CMC from surface tension measurements

Experiment 3: Verification of Beer and Lambert's Law for $KMnO_4$ and $K_2Cr_2O_7$ solution

Experiment 4: Study of kinetics of $K_2S_2O_8$ + KI reaction, spectrophotometrically

Experiment 5: Determination of pH of unknown buffer, spectrophotometrically

Experiment 6: Spectrophotometric determination of CMC

Suggested Readings:

1. Viswanathan, B., Raghavan, P.S. *Practical Physical Chemistry* Viva Books (2009)
2. Mendham, J., A. I. Vogel's Quantitative Chemical Analysis 6th Ed., Pearson
3. Harris, D. C. *Quantitative Chemical Analysis*. 6th Ed., Freeman (2007)
4. Palit, S.R., De, S. K. *Practical Physical Chemistry* Science Book Agency
5. *University Hand Book of Undergraduate Chemistry Experiments*, edited by Mukherjee, G. N., University of Calcutta
6. Levitt, B. P. edited *Findlay's Practical Physical Chemistry* Longman Group Ltd.
7. Gurtu, J. N., Kapoor, R., *Advanced Experimental Chemistry* S. Chand & Co. Ltd.

Discipline Specific Electives (DSE)

DSE-3: Green Chemistry Credits 06

DSE3T: Green Chemistry **Credits 04**

Course Contents:

Introduction to Green Chemistry:

What is Green Chemistry? Need for Green Chemistry. Goals of Green Chemistry. Limitations/ Obstacles in the pursuit of the goals of Green Chemistry

Principles of Green Chemistry and Designing a Chemical synthesis:

Twelve principles of Green Chemistry with their explanations and examples and special

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

emphasis on the following:

- Designing a Green Synthesis using these principles; Prevention of Waste/ byproducts; maximum incorporation of the materials used in the process into the final products , Atom Economy, calculation of atom economy of the rearrangement, addition, substitution and elimination reactions.
- Prevention/ minimization of hazardous/ toxic products reducing toxicity. risk =

  (function) hazard × exposure; waste or pollution prevention hierarchy.

- Green solvents– supercritical fluids, water as a solvent for organic reactions, ionic liquids, fluorous biphasic solvent, PEG, solventless processes, immobilized solvents and how to compare greenness of solvents.

- Energy requirements for reactions – alternative sources of energy: use of microwaves and ultrasonic energy.
- Selection of starting materials; avoidance of unnecessary derivatization – careful use of blocking/protecting groups.

- Use of catalytic reagents (wherever possible) in preference to stoichiometric reagents; catalysis and green chemistry, comparison of heterogeneous and homogeneous catalysis, biocatalysis, asymmetric catalysis and photocatalysis.

- Prevention of chemical accidents designing greener processes, inherent safer design, principle of ISD "What you don't have cannot harm you", greener alternative to Bhopal Gas Tragedy (safer route to carcarbaryl) and Flixiborough accident (safer route to cyclohexanol) subdivision of ISD, minimization, simplification, substitution, moderation and limitation.

- Strengthening/ development of analytical techniques to prevent and minimize the generation of hazardous substances in chemical processes.

Examples of Green Synthesis/ Reactions and some real world cases:

1. Green Synthesis of the following compounds: adipic acid, catechol, disodium iminodiacetate (alternative to Strecker synthesis)

2. Microwave assisted reactions in water: Hofmann Elimination, methyl benzoate to benzoic acid, oxidation of toluene and alcohols; microwave assisted reactions in organic solvents Diels-Alder reaction and Decarboxylation reaction

3. Ultrasound assisted reactions: sonochemical Simmons-Smith Reaction (Ultrasonic alternative to Iodine)
4 Surfactants for carbon dioxide – replacing smog producing and ozone depleting solvents with CO_2 for precision cleaning and dry cleaning of garments.

5 Designing of Environmentally safe marine antifoulant.
6 Rightfit pigment: synthetic azopigments to replace toxic organic and inorganic pigments.

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

7 An efficient, green synthesis of a compostable and widely applicable plastic (poly lactic acid) made from corn.

8 Healthier Fats and oil by Green Chemistry: Enzymatic Inter esterification for production of no Trans-Fats and Oils

9 Development of Fully Recyclable Carpet: Cradle to Cradle Carpeting

Future Trends in Green Chemistry:

Oxidation reagents and catalysts; Biomimetic, multifunctional reagents; Combinatorial green chemistry; Proliferation of solventless reactions; co crystal controlled solid state synthesis (C^2S^3); Green chemistry in sustainable development.

Suggested Readings:

1. Anastas, P.T. & Warner, J.K.: *Green Chemistry - Theory and Practical*, Oxford University Press (1998).
2. Matlack, A.S. *Introduction to Green Chemistry*, Marcel Dekker (2001).
3. Cann, M.C. & Connely, M.E. *Real-World cases in Green Chemistry*, American Chemical Society, Washington (2000).
4. Ryan, M.A. & Tinnesand, M. *Introduction to Green Chemistry*, American Chemical Society, Washington (2002).
5. Lancaster, M. *Green Chemistry: An Introductory Text* RSC Publishing, 2nd Edition, 2010.

DSE3P: LAB Credits 02

Practical:

1. Safer starting materials

- Preparation and characterization of nanoparticles of gold using tea leaves.

2. Using renewable resources

- Preparation of biodiesel from vegetable/ waste cooking oil.

3. Avoiding waste

Principle of atom economy

- Use of molecular model kit to stimulate the reaction to investigate how the atom economy can illustrate Green Chemistry.
- Preparation of propene by two methods can be studied

$$\text{Triethylamine ion} + OH^- \rightarrow \text{propene} + \text{trimethyl propene} + \text{water}$$

$$\text{1-propanol} \xrightarrow{H_2SO_4/\Delta} \text{propene} + \text{water}$$

- Other types of reactions, like addition, elimination, substitution and rearrangement should also be studied for the calculation of atom economy.

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

3. Use of enzymes as catalysts

- Benzoin condensation using Thiamine Hydrochloride as a catalyst instead of cyanide.

4. Alternative Green solvents

- Extraction of D-limonene from orange peel using liquid CO2 prepared form dry ice. Mechanochemical solvent free synthesis of azomethines

6. Alternative sources of energy

- Solvent free, microwave assisted one pot synthesis of phthalocyanine complex of copper (II).
- Photoreduction of benzophenone to benzopinacol in the presence of sunlight.

Or

DSE- 3: Inorganic Materials of Industrial Importance Credits 06

DSE3T: Inorganic Materials of Industrial Importance Credits 04

Course Contents:

1. Silicate Industries:

Glass: Glassy state and its properties, classification (silicate and non-silicate glasses). Manufacture and processing of glass. Composition and properties of the following types of

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

glasses: Soda lime glass, lead glass, armoured glass, safety glass, borosilicate glass, fluorosilicate, coloured glass, photosensitive glass.

Ceramics: Important clays and feldspar, ceramic, their types and manufacture. High technology ceramics and their applications, superconducting and semiconducting oxides, fullerenes carbon nanotubes and carbon fibre.

Cements: Classification of cement, ingredients and their role, Manufacture of cement and the setting process, quick setting cements.

2. Fertilizers:

Different types of fertilizers. Manufacture of the following fertilizers: Urea, ammonium nitrate, calcium ammonium nitrate, ammonium phosphates; polyphosphate, superphosphate, compound and mixed fertilizers, potassium chloride, potassium sulphate.

3. Surface Coatings:

Objectives of coatings surfaces, preliminary treatment of surface, classification of surface coatings. Paints and pigments-formulation, composition and related properties. Oil paint, Vehicle, modified oils, Pigments, toners and lakes pigments, Fillers, Thinners, Enamels, emulsifying agents. Special paints (Heat retardant, Fire retardant, Eco-friendly paint, Plastic paint), Dyes, Wax polishing, Water and Oil paints, additives, Metallic coatings (electrolytic and electroless), metal spraying and anodizing.

4. Batteries:

Primary and secondary batteries, battery components and their role, Characteristics of Battery. Working of following batteries: Pb acid, Li-Battery, Solid state electrolyte battery. Fuel cells, Solar cell and polymer cell.

5. Alloys:

Classification of alloys, ferrous and non-ferrous alloys, Specific properties of elements in alloys. Manufacture of Steel (removal of silicon decarbonization, demanganization, desulphurization dephosphorisation) and surface treatment (Ar and heat treatment, nitriding, carburizing). Composition and properties of different types of steels.

6. Chemistry of Nano Materials including Graphene. Syntheses, characterization and applications. Plasmonic materials, Semiconductor, Band gap, Types of Semiconductors, Colour Centres.

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

7. Catalysis:

General principles and properties of catalysts, homogenous catalysis (catalytic steps and examples) and heterogenous catalysis (catalytic steps and examples) and their industrial applications, Deactivation or regeneration of catalysts.

Phase transfer catalysts, application of zeolites as catalysts.

8. Chemical explosives:

Origin of explosive properties in organic compounds, preparation and explosive properties of lead azide, PETN, cyclonite (RDX). Introduction to rocket propellants.

Suggested Readings:

1. E. Stocchi: *Industrial Chemistry*, Vol-I, Ellis Horwood Ltd. UK.
2. R. M. Felder, R. W. Rousseau: *Elementary Principles of Chemical Processes*, Wiley Publishers, New Delhi.
3. W. D. Kingery, H. K. Bowen, D. R. Uhlmann: *Introduction to Ceramics*, Wiley Publishers, New Delhi.
4. J. A. Kent: Riegel's *Handbook of Industrial Chemistry*, CBS Publishers, New Delhi.
5. P. C. Jain, M. Jain: *Engineering Chemistry*, Dhanpat Rai & Sons, Delhi.
6. R. Gopalan, D. Venkappayya, S. Nagarajan: *Engineering Chemistry*, Vikas Publications, New Delhi.
7. Sharma, B.K. & Gaur, H. *Industrial Chemistry*, Goel Publishing House, Meerut (1996).

DSE3P: LAB **Credits 02**

Practical:

1. Determination of free acidity in ammonium sulphate fertilizer.
2. Estimation of Calcium in Calcium ammonium nitrate fertilizer.
3. Estimation of phosphoric acid in superphosphate fertilizer.
4. Electroless metallic coatings on ceramic and plastic material.
5. Determination of composition of dolomite (by complexometric titration).
6. Analysis of (Cu, Ni); (Cu, Zn) in alloy or synthetic samples.
7. Analysis of Cement.
8. Preparation of pigment (zinc oxide).

Suggested Readings:

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University

6. R. Gopalan, D. Venkappayya, S. Nagarajan: *Engineering Chemistry*, Vikas
7. Publications, New Delhi.
8. Sharma, B.K. & Gaur, H. *Industrial Chemistry*, Goel Publishing House, Meerut (1996).

DSE-4: Polymer Chemistry — Credits 06

DSE4T: Polymer Chemistry — Credits 04

Course Contents:

Introduction and history of polymeric materials:

Different schemes of classification of polymers, Polymer nomenclature, Molecular forces and chemical bonding in polymers, Texture of Polymers.

Functionality and its importance:

Criteria for synthetic polymer formation, classification of polymerization processes, Relationships between functionality, extent of reaction and degree of polymerization. Bi-functional systems, Poly-functional systems.

Kinetics of Polymerization:

Mechanism and kinetics of step growth, radical chain growth, ionic chain (both cationic and anionic) and coordination polymerizations, Mechanism and kinetics of copolymerization, polymerization techniques.

Crystallization and crystallinity:

Determination of crystalline melting point and degree of crystallinity, Morphology of crystalline polymers, Factors affecting crystalline melting point.

Nature and structure of polymers:

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

Structure Property relationships.

Determination of molecular weight of polymers:

(*Mn*, *Mw*, etc) by end group analysis, viscometry, light scattering and osmotic pressure methods. Molecular weight distribution and its significance. Polydispersity index.

Glass transition temperature (Tg) and determination of Tg:

Free volume theory, WLF equation, Factors affecting glass transition temperature (Tg).

Polymer Solution:

Criteria for polymer solubility, Solubility parameter, Thermodynamics of polymer solutions, entropy, enthalpy, and free energy change of mixing of polymers solutions, Flory- Huggins theory, Lower and Upper critical solution temperatures.

Properties of Polymer:

(Physical, thermal, Flow & Mechanical Properties).

Brief introduction to preparation, structure, properties and application of the following polymers: polyolefins, polystyrene and styrene copolymers, poly(vinyl chloride) and related polymers, poly(vinyl acetate) and related polymers, acrylic polymers, fluoro polymers,

polyamides and related polymers. Phenol formaldehyde resins (Bakelite, Novalac), polyurethanes, silicone polymers, polydienes,

Polycarbonates, Conducting Polymers, [polyacetylene, polyaniline, poly(p-phenylene sulphide polypyrrole, polythiophene)].

Suggested Readings:

1. R.B. Seymour & C.E. Carraher: *Polymer Chemistry: An Introduction*, Marcel Dekker, Inc. New York, 1981.
2. G. Odian: *Principles of Polymerization*, 4th Ed. Wiley, 2004.
3. F.W. Billmeyer: *Textbook of Polymer Science*, 2nd Ed. Wiley Interscience, 1971.
4. P. Ghosh: Polymer Science & Technology, Tata McGraw-Hill Education, 1991.
5. R.W. Lenz: *Organic Chemistry of Synthetic High Polymers.* Interscience Publishers, New York, 1967.

DSE4P: LAB Credits 02

Practical:

Polymer synthesis

Downloaded from Vidyasagar University by 202.142.96.3 on 10 January 2020 : 10:40:14; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Chemistry_Hons6.pdf

1. Free radical solution polymerization of styrene (St) / Methyl Methacrylate (MMA) / Methyl Acrylate (MA) / Acrylic acid (AA).
    a) Purification of monomer
    b) Polymerization using benzoyl peroxide (BPO) / 2,2'-azo-bis-isobutylonitrile (AIBN)
    2. Preparation of nylon 66/6
    3. Interfacial polymerization, preparation of polyester from isophthaloyl chloride (IPC) and phenolphthalein
    4. Redox polymerization of acrylamide
    5. Precipitation polymerization of acrylonitrile
    6. Preparation of urea-formaldehyde resin
    7. Preparations of novalac resin/ resold resin.
    8. Microscale Emulsion Polymerization of Poly(methylacrylate).

Polymer characterization

1. Determination of molecular weight by viscometry:
    (a) Polyacrylamide-aq.$NaNO_2$ solution

    (b) (Poly vinyl proplylidine (PVP) in water
2. Determination of the viscosity-average molecular weight of poly(vinyl alcohol) (PVOH) and the fraction of "head-to-head" monomer linkages in the polymer.
3. Determination of molecular weight by end group analysis: Polyethylene glycol (PEG) (OH group).
4. Testing of mechanical properties of polymers.
5. Determination of hydroxyl number of a polymer using colorimetric method.

Polymer analysis

1. Estimation of the amount of HCHO in the given solution by sodium sulphite method
2. Instrumental Techniques
3. IR studies of polymers
4. DSC analysis of polymers
5. Preparation of polyacrylamide and its electrophoresis

*at least 7 experiments to be carried out.

Suggested Readings:

1. M.P. Stevens, *Polymer Chemistry: An Introduction*, 3rd Ed., Oxford University Press, 1999.
2. H.R. Allcock, F.W. Lampe & J.E. Mark, *Contemporary Polymer Chemistry*, 3rd ed. Prentice-Hall (2003)

List of Core and Elective Courses

Core Courses (CC)

DSC-1A: Atomic Structure, Bonding, general organic chemistry & aliphatic hydrocarbons
DSC-1B: Chemical Energetics, Equilibria &Functional Organic Chemistry
DSC-1C: Solutions, Phase equilibrium, Conductance, Electrochemistry & Functional Organic Chemistry
DSC-1D: Coordination Chemistry, States of matter Chemical Kinetics

Discipline Specific Electives (DSE)

DSE-1: Analytical Methods in Chemistry
Or
DSE-1: Polymer Chemistry
Or
DSE-1: Instrumental Methods of Chemical Analysis
Or
DSE-1: Organometallics, Bioinorganic Chemistry, Polynuclear hydrocarbons and **UV,** IR Spectroscopy
DSE-2: Applications of Computers in Chemistry.
Or
DSE-2: Green Chemistry
Or
DSE-2: Industrial Chemicals and Environment
Or
DSE-2: Quantum Chemistry, Spectroscopy & Photochemistry
Or
DSE-2: Molecular Modelling & Drug design

Skill Enhancement Course (SEC)

SEC-1: Basic Analytical Chemistry
Or
SEC-1: Chemo informatics
SEC-2: Analytical Clinical Biochemistry
Or
SEC-2: Intellectual Property Rights (IPR)
SEC-3: Pharmaceutical Chemistry
Or
SEC-3: Chemistry of Cosmetics & Perfumes
SEC-4: Pesticide Chemistry
Or
SEC-4: Fuel Chemistry

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Core Courses (CC)

DSC-1A(CC-1): Atomic Structure, Bonding, general organic chemistry & aliphatic hydrocarbons Credits 06

DSC1AT: Atomic Structure, Bonding, general organic chemistry & aliphatic hydrocarbons Credits 04

Course Contents:

Section A: Inorganic Chemistry-1

Atomic Structure:

Review of Bohr's theory and its limitations, dual behaviour of matter and radiation, de Broglie's relation, Heisenberg Uncertainty principle. Hydrogen atom spectra. Need of a new approach to Atomic structure. What is Quantum mechanics? Time independent Schrodinger equation and meaning of various terms in it. Significance of ψ and ψ^2, Schrödinger equation for hydrogen atom. Radial and angular parts of the hydogenic wavefunctions (atomic orbitals) and their variations for 1*s*, 2*s*, 2*p*, 3*s*, 3*p* and 3*d* orbitals (Only graphical representation). Radial and angular nodes and their significance. Radial distribution functions and the concept of the most probable distance with special reference to 1*s* and 2*s* atomic orbitals. Significance of quantum numbers, orbital angular momentum and quantum numbers m_l and m_s. Shapes of *s, p* and *d* atomic orbitals, nodal planes. Discovery of spin, spin quantum number (*s*) and magnetic spin quantum number (m_s). Rules for filling electrons in various orbitals, Electronic configurations of the atoms. Stability of half-filled and completely filled orbitals, concept of exchange energy. Relative energies of atomic orbitals, Anomalous electronic configurations.

Chemical Bonding and Molecular Structure

Ionic Bonding: General characteristics of ionic bonding. Energy considerations in ionic bonding, lattice energy and solvation energy and their importance in the context of stability and solubility of ionic compounds. Statement of Born-Landé equation for calculation of lattice energy, Born-Haber cycle and its applications, polarizing power and polarizability. Fajan's rules, ionic character in covalent compounds, bond moment, dipole moment and percentage ionic character. *Covalent bonding:* VB Approach: Shapes of some inorganic molecules and ions on the basis of VSEPR and hybridization with suitable examples of linear, trigonal planar, square planar, tetrahedral, trigonal bipyramidal and octahedral arrangements. Concept of resonance and resonating structures in various inorganic and organic compounds. MO Approach: Rules for the LCAO method, bonding and antibonding MOs and their haracteristics or *s-s*, *s-p* and *p-p* combinations of atomic orbitals, nonbonding combination of orbitals, MO treatment of homonuclear diatomic molecules of 1st and 2nd periods (including idea of *s-p* mixing) and heteronuclear diatomic molecules such as CO, NO and NO^+. Comparison of VB and MO approaches.

Section B: Organic Chemistry-1

Fundamentals of Organic Chemistry

Physical Effects, Electronic Displacements: Inductive Effect, Electromeric Effect, Resonance

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

and Hyperconjugation. Cleavage of Bonds: Homolysis and Heterolysis. Structure, shape and reactivity of organic molecules: Nucleophiles and electrophiles. Reactive Intermediates: Carbocations, Carbanions and free radicals. Strength of organic acids and bases: Comparative study with emphasis on factors affecting pK values. Aromaticity: Benzenoids and Hückel's rule.

Stereochemistry

Conformations with respect to ethane, butane and cyclohexane. Interconversion of Wedge Formula, Newmann, Sawhorse and Fischer representations. Concept of chirality (upto two carbon atoms). Configuration: Geometrical and Optical isomerism; Enantiomerism, Diastereomerism and Meso compounds). Threo and erythro; D and L; *cis – trans* nomenclature; CIP Rules: R/ S (for upto 2 chiral carbon atoms) and E / Z Nomenclature (for upto two C=C systems).

Aliphatic Hydrocarbons

Functional group approach for the following reactions (preparations & reactions) to be studied in context to their structure.

Alkanes: (Upto 5 Carbons). *Preparation:* Catalytic hydrogenation, Wurtz reaction, Kolbe's synthesis, from Grignard reagent. *Reactions:* Free radical Substitution: Halogenation.

Alkenes: (Upto 5 Carbons) *Preparation:* Elimination reactions: Dehydration of alkenes and dehydrohalogenation of alkyl halides (Saytzeff's rule); cis alkenes (Partial catalytic hydrogenation) and trans alkenes (Birch reduction). *Reactions:* cis-addition (alk. KMnO4) and trans-addition (bromine), Addition of HX (Markownikoff's and anti-Markownikoff's addition), Hydration, Ozonolysis, oxymecuration-demercuration, Hydroboration-oxidation.

Alkynes: (Upto 5 Carbons) *Preparation:* Acetylene from CaC_2 and conversion into higher alkynes; by dehalogenation of tetra halides and dehydrohalogenation of vicinal-dihalides. *Reactions:* formation of metal acetylides, addition of bromine and alkaline $KMnO_4$, ozonolysis and oxidation with hot alk. $KMnO_4$.

DSC1AP: Atomic structure, Bonding, general organic chemistry & aliphatic hydrocarbons (Practical) **Credits 02**

Practical:

Section A: Inorganic Chemistry - Volumetric Analysis

1. Estimation of sodium carbonate and sodium hydrogen carbonate present in a mixture.
2. Estimation of oxalic acid by titrating it with $KMnO_4$.
3. Estimation of water of crystallization in Mohr's salt by titrating with $KMnO_4$.
4. Estimation of Fe (II) ions by titrating it with $K_2Cr_2O_7$ using internal indicator.
5. Estimation of Cu (II) ions iodometrically using $Na_2S_2O_3$.

Section B: Organic Chemistry

1. Detection of extra elements (N, S, Cl, Br, I) in organic compounds (containing upto two extra elements)
2. Separation of mixtures by Chromatography: Measure the R_f value in each case (combination of two compounds to be given)
   (a) Identify and separate the components of a given mixture of 2 amino acids (glycine, aspartic acid, glutamic acid, tyrosine or any other amino acid) by paper chromatography

   (b) Identify and separate the sugars present in the given mixture by paper chromatography.

Suggested Readings:

- Svehla, G. *Vogel's Qualitative Inorganic Analysis*, Pearson Education, 2012.
- Mendham, J. *Vogel's Quantitative Chemical Analysis*, Pearson, 2009.
- Vogel, A.I., Tatchell, A.R., Furnis, B.S., Hannaford, A.J. & Smith, P.W.G., *Textbook of Practical Organic Chemistry*, Prentice-Hall, 5th edition, 1996.

DSC-1B (CC-2): Chemical Energetics, Equilibria & Functional Organic Chemistry Credits 06

DSC1BT: Chemical Energetics, Equilibria &Functional Organic Chemistry
Credits 04

Course Contents:

Section A: Physical Chemistry-1

Chemical Energetic

Review of thermodynamics and the Laws of Thermodynamics. Important principles and definitions of thermochemistry. Concept of standard state and standard enthalpies of formations, integral and

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

differential enthalpies of solution and dilution. Calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data. Variation of enthalpy of a reaction with temperature – Kirchhoff's equation. Statement of Third Law of thermodynamics and calculation of absolute entropies of substances.

Chemical Equilibrium:
Free energy change in a chemical reaction. Thermodynamic derivation of the law of chemical equilibrium. Distinction between ΔG and ΔG_o, Le Chatelier's principle. Relationships between K_p, K_c and K_x for reactions involving ideal gases.

Ionic Equilibria:

Strong, moderate and weak electrolytes, degree of ionization, factors affecting degree of ionization, ionization constant and ionic product of water. Ionization of weak acids and bases, pH scale, common ion effect. Salt hydrolysis-calculation of hydrolysis constant, degree of hydrolysis and pH for different salts. Buffer solutions. Solubility and solubility product of sparingly soluble salts – applications of solubility product principle.

Section B: Organic Chemistry-2

Functional group approach for the following reactions (preparations & reactions) to be studied in context to their structure.

Aromatic hydrocarbons
Preparation (Case benzene): from phenol, by decarboxylation, from acetylene, from benzene sulphonic acid.
Reactions: (Case benzene): Electrophilic substitution: nitration, halogenation and sulphonation. Friedel-Craft's reaction (alkylation and acylation) (upto 4 carbons on benzene). Side chain oxidation of alkyl benzenes (upto 4 carbons on benzene).

Alkyl and Aryl Halides

Alkyl Halides (Upto 5 Carbons) Types of Nucleophilic Substitution (S_N1, S_N2 and S_Ni) reactions. *Preparation:* from alkenes *and* alcohols. *Reactions:* hydrolysis, nitrite & nitro formation, nitrile & isonitrile formation. Williamson's ether synthesis: Elimination vs substitution.

Aryl Halides *Preparation:* (Chloro, bromo and iodo-benzene case): from phenol, Sandmeyer & Gattermann reactions. *Reactions (Chlorobenzene):* Aromatic nucleophilic substitution (replacement by –OH group) and effect of nitro substituent. Benzyne Mechanism: KNH_2/NH_3 (or $NaNH_2/NH_3$). Reactivity and Relative strength of C-Halogen bond in alkyl, allyl, benzyl, vinyl and aryl halides.

Alcohols, Phenols and Ethers (Upto 5 Carbons)

Alcohols: *Preparation:* Preparation of 1^o, 2^o and 3^o alcohols: using Grignard reagent, Ester hydrolysis, Reduction of aldehydes, ketones, carboxylic acid and esters. *Reactions:* With sodium, HX (Lucas test), esterification, oxidation (with PCC, alk. $KMnO_4$, acidic dichromate, conc. HNO_3). Oppeneauer oxidation *Diols:* (Upto 6 Carbons) oxidation of diols. Pinacol-Pinacolone rearrangement.

Phenols: (Phenol case) *Preparation:* Cumene hydroperoxide method, from diazonium salts.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Reactions: Electrophilic substitution: Nitration, halogenation and sulphonation. Reimer-Tiemann Reaction, Gattermann-Koch Reaction, Houben–Hoesch Condensation, Schotten – Baumann Reaction.

Ethers (aliphatic and aromatic): Cleavage of ethers with HI.

Aldehydes and ketones (aliphatic and aromatic): (Formaldehye, acetaldehyde, acetone and benzaldehyde) *Preparation:* from acid chlorides and from nitriles. *Reactions* – Reaction with HCN, ROH, $NaHSO_3$, NH_2-G derivatives. Iodoform test. Aldol Condensation, Cannizzaro's reaction, Wittig reaction, Benzoin condensation. Clemensen reduction and Wolff Kishner reduction. Meerwein-Pondorff Verley reduction.

Suggested Readings:

DSC1BP: Chemical Energetics, Equilibria & Functional Organic Chemistry (Practical)

Credits 02

Section A: Physical Chemistry

Thermo chemistry:

1. Determination of heat capacity of calorimeter for different volumes.
2. Determination of enthalpy of neutralization of hydrochloric acid with sodium hydroxide.
3. Determination of enthalpy of ionization of acetic acid.
4. Determination of integral enthalpy of solution of salts (KNO_3, NH_4Cl).
5. Determination of enthalpy of hydration of copper sulphate.
6. Study of the solubility of benzoic acid in water and determination of ΔH.

Ionic equilibria:

pH measurements

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

a) Measurement of pH of different solutions like aerated drinks, fruit juices, shampoos and soaps (use dilute solutions of soaps and shampoos to prevent damage to the glass electrode) using pH-meter.
b) Preparation of buffer solutions:

(i) Sodium acetate-acetic acid
(ii) Ammonium chloride-ammonium hydroxide Measurement of the pH of buffer solutions and comparison of the values with theoretical values.

Section B: Organic Chemistry

1. Purification of organic compounds by crystallization (from water and alcohol) and distillation.
2. Criteria of Purity: Determination of melting and boiling points.
3. Preparations: Mechanism of various reactions involved to be discussed. Recrystallisation, determination of melting point and calculation of quantitative yields to be done.

(a) Bromination of Phenol/Aniline
(b) Benzoylation of amines/phenols
(c) Oxime and 2,4-dinitrophenylhydrazone of aldehyde/ketone

Suggested Readings:

- Vogel, A.I., Tatchell, A.R., Furnis, B.S., Hannaford, A.J. & Smith, P.W.G., *Textbook of Practical Organic Chemistry*, Prentice-Hall, 5th edition, 1996.
- Mann, F.G. & Saunders, B.C. *Practical Organic Chemistry* Orient-Longman, 1960.
- Khosla, B. D.; Garg, V. C. & Gulati, A. *Senior Practical Physical Chemistry*, R. Chand & Co.: New Delhi (2011).

DSC-1C(CC-3): Solutions, Phase equilibrium, Conductance, Electrochemistry & Functional Organic Chemistry Credits 06

DSC1CT: Solutions, Phase equilibrium, Conductance, Electrochemistry & Functional Organic Chemistry Credits 04

Course Contents:

Section A: Physical Chemistry-2

Solutions

Thermodynamics of ideal solutions: Ideal solutions and Raoult's law, deviations from Raoult's law – non-ideal solutions. Vapour pressure-composition and temperature composition curves of ideal and non-ideal solutions. Distillation of solutions. Lever rule. Azeotropes. Partial miscibility of liquids: Critical solution temperature; effect of impurity on partial miscibility of liquids. Immiscibility of liquids- Principle of steam distillation. Nernst distribution law and its applications, solvent extraction.

Phase Equilibrium

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Phases, components and degrees of freedom of a system, criteria of phase equilibrium. Gibbs Phase Rule and its thermodynamic derivation. Derivation of Clausius – Clapeyron equation and its importance in phase equilibria. Phase diagrams of one-component systems (water and sulphur) and two component systems involving eutectics, congruent and incongruent melting points (lead-silver, $FeCl_3$-H_2O and Na-K only).

Conductance

Conductivity, equivalent and molar conductivity and their variation with dilution for weak and strong electrolytes. Kohlrausch law of independent migration of ions. Transference number and its experimental determination using Hittorf and Moving boundary methods. Ionic obility. Applications of conductance measurements: determination of degree of ionization of weak electrolyte, solubility and solubility products of sparingly soluble salts, ionic product of water, hydrolysis constant of a salt. Conductometric titrations (only acidbase).

Electrochemistry

Reversible and irreversible cells. Concept of EMF of a cell. Measurement of EMF of a cell. Nernst equation and its importance. Types of electrodes. Standard electrode potential. Electrochemical series. Thermodynamics of a reversible cell, calculation of thermodynamic properties: ΔG, ΔH and ΔS from EMF data. Calculation of equilibrium constant from EMF data. Concentration cells with transference and without transference. Liquid junction potential and salt bridge. pH determination using hydrogen electrode and quinhydrone electrode. Potentiometric titrations -qualitative treatment (acid-base and oxidation-reduction only).

Section B: Organic Chemistry-3

Functional group approach for the following reactions (preparations & reactions) to be studied in context to their structure.

Carboxylic acids and their derivatives

Carboxylic acids (aliphatic and aromatic)

Preparation: Acidic and Alkaline hydrolysis of esters. *Reactions:* Hell – Vohlard - Zelinsky Reaction.

Carboxylic acid derivatives (aliphatic): (Upto 5 carbons)

Preparation: Acid chlorides, Anhydrides, Esters and Amides from acids and their inter-conversion. *Reactions:* Comparative study of nucleophilicity of acyl derivatives. Reformatsky Reaction, Perkin condensation.

Amines and Diazonium Salts

Amines (Aliphatic and Aromatic): (Upto 5 carbons)

Preparation: from alkyl halides, Gabriel's Phthalimide synthesis, Hofmann Bromamide reaction. *Reactions:* Hofmann vs. Saytzeff elimination, Carbylamine test, Hinsberg test, with HNO_2, Schotten – Baumann Reaction. Electrophilic substitution (case aniline): nitration, bromination, sulphonation.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Diazonium salts: *Preparation:* from aromatic amines.*Reactions:* conversion to benzene, phenol, dyes.

Amino Acids, Peptides and Proteins:

Preparation of Amino Acids: Strecker synthesis using Gabriel's phthalimide synthesis. Zwitterion, Isoelectric point and Electrophoresis. *Reactions of Amino acids*: ester of – COOH group, acetylation of $–NH_2$ group, complexation with Cu^{2+} ions, ninhydrin test. Overview of Primary, Secondary, Tertiary and Quaternary Structure of proteins. Determination of Primary structure of Peptides by degradation Edmann degradation (Nterminal) and C–terminal (thiohydantoin and with carboxypeptidase enzyme). Synthesis of simple peptides (upto dipeptides) by N-protection (t-butyloxycarbonyl and phthaloyl) & Cactivating groups and Merrifield solid-phase synthesis.

Carbohydrates:

Classification, and General Properties, Glucose and Fructose (open chain and cyclic structure), Determination of configuration of monosaccharides, absolute configuration of Glucose and Fructose, Mutarotation, ascending and descending in monosaccharides. Structure of disacharrides (sucrose, cellobiose, maltose, lactose) and polysacharrides (starch and cellulose) excluding their structure elucidation.

Suggested Readings:

- Barrow, G.M. *Physical Chemistry* Tata McGraw-Hill (2007).
- Castellan, G.W. *Physical Chemistry* 4th Ed. Narosa (2004).
- Kotz, J.C., Treichel, P.M. & Townsend, J.R. *General Chemistry*, Cengage Learning India Pvt. Ltd.: New Delhi (2009).

- Finar, I. L. *Organic Chemistry* (*Volume 1*), Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
- Finar, I. L. *Organic Chemistry* (*Volume 2)*, Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
- Nelson, D. L. & Cox, M. M. *Lehninger's Principles of Bioch*emistry *7th Ed.*, W. H. Freeman.
- Berg, J.M., Tymoczko, J.L. & Stryer, L. *Biochemistry*, W.H. Freeman, 2002.

DSC-1CP: Solutions, Phase Equilibrium, Conductance, Electrochemistry & Functional Organic Chemistry (Practical) Credits 02

Practical:

Section A: Physical Chemistry

Distribution

Study of the equilibrium of one of the following reactions by the distribution method:

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

$I_2(aq) + I^-(aq) \rightleftharpoons I_3^-(aq)$
$Cu^{2+}(aq) + xNH_2(aq) \rightleftharpoons [Cu(NH_3)_x]^{2+}$

Phase equilibria

a) Construction of the phase diagram of a binary system (simple eutectic) using cooling curves.
b) Determination of the critical solution temperature and composition of the phenol water system and study of the effect of impurities on it.
c) Study of the variation of mutual solubility temperature with concentration for the phenol water system and determination of the critical solubility temperature.

Conductance

I. Determination of cell constant
II. Determination of equivalent conductance, degree of dissociation and dissociation constant of a weak acid.
III. Perform the following conductometric titrations:

i. Strong acid vs. strong base
ii. Weak acid vs. strong base

Potentiometry

Perform the following potentiometric titrations:
i. Strong acid vs. strong base
ii. Weak acid vs. strong base
iii. Potassium dichromate vs. Mohr's salt

Section B: Organic Chemistry

I Systematic Qualitative Organic Analysis of Organic Compounds possessing monofunctional groups (-COOH, phenolic, aldehydic, ketonic, amide, nitro, amines) and preparation of one derivative.

II

1. Separation of amino acids by paper chromatography
2. Determination of the concentration of glycine solution by formylation method.
3. Titration curve of glycine
4. Action of salivary amylase on starch
5. Effect of temperature on the action of salivary amylase on starch.
6. Differentiation between a reducing and a nonreducing sugar.

Suggested Readings:

- Vogel, A.I., Tatchell, A.R., Furnis, B.S., Hannaford, A.J. & Smith, P.W.G., *Textbook of Practical Organic Chemistry,* Prentice-Hall, 5th edition, 1996.
- Mann, F.G. & Saunders, B.C. *Practical Organic Chemistry* Orient-Longman, 1960.
- Khosla, B. D.; Garg, V. C. & Gulati, A. *Senior Practical Physical Chemistry*, R. Chand & Co.: New Delhi (2011).
- Ahluwalia, V.K. & Aggarwal, R. *Comprehensive Practical Organic Chemistry*, Universities Press.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University

DSC-1D(CC-4):Coordination Chemistry, States of matter Chemical Kinetics Credits 06

DSC1DT: Coordination Chemistry, States of matter Chemical Kinetics Credits 04

Course Contents:

Transition Elements (3d series)

General group trends with special reference to electronic configuration, variable valency, colour, magnetic and catalytic properties, ability to form complexes and stability of various oxidation states (Latimer diagrams) for Mn, Fe and Cu. Lanthanoids and actinoids: Electronic configurations, oxidation states, colour, magnetic properties, lanthanide contraction, separation of lanthanides (ion exchange method only).

Coordination Chemistry

Valence Bond Theory (VBT): Inner and outer orbital complexes of Cr, Fe, Co, Ni and Cu (coordination numbers 4 and 6). Structural and stereoisomerism in complexes with coordination numbers 4 and 6. Drawbacks of VBT. IUPAC system of nomenclature.

Crystal Field Theory

Crystal field effect, octahedral symmetry. Crystal field stabilization energy (CFSE), Crystal field effects for weak and strong fields. Tetrahedral symmetry. Factors affecting the magnitude of D. Spectrochemical series. Comparison of CFSE for O_h and T_d complexes, Tetragonal distortion of octahedral geometry. Jahn-Teller distortion, Square planar coordination.

Section B: Physical Chemistry-3

Kinetic Theory of Gases

Postulates of Kinetic Theory of Gases and derivation of the kinetic gas equation. Deviation of real gases from ideal behaviour, compressibility factor, causes of deviation. Van der Waals equation of state for real gases. Boyle temperature (derivation not required). Critical phenomena, critical constants and their calculation from van der Waals equation. Andrews isotherms of CO_2. Maxwell Boltzmann distribution laws of molecular velocities and molecular energies (graphic representation – derivation not required) and their importance. Temperature dependence of these distributions. Most probable, average and root mean square velocities (no derivation). Collision cross section, collision number, collision frequency, collision diameter and mean free path of molecules. Viscosity of gases and effect of temperature and pressure on coefficient of viscosity (qualitative treatment only).

Liquids

Surface tension and its determination using stalagmometer. Viscosity of a liquid and determination of coefficient of viscosity using Ostwald viscometer. Effect of temperature on surface tension and coefficient of viscosity of a liquid (qualitative treatment only).

Solids

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Forms of solids. Symmetry elements, unit cells, crystal systems, Bravais lattice types and identification of lattice planes. Laws of Crystallography - Law of constancy of interfacial angles, Law of rational indices. Miller indices. X–Ray diffraction by crystals, Bragg's law. Structures of NaCl, KCl and CsCl (qualitative treatment only). Defects in crystals. Glasses and liquid crystals.

Chemical Kinetics

The concept of reaction rates. Effect of temperature, pressure, catalyst and other factors on reaction rates. Order and molecularity of a reaction. Derivation of integrated rate equations for zero, first and second order reactions (both for equal and unequal concentrations of reactants). Half–life of a reaction. General methods for determination of order of a reaction. Concept of activation energy and its calculation from Arrhenius equation.
Theories of Reaction Rates: Collision theory and Activated Complex theory of bimolecular reactions. Comparison of the two theories (qualitative treatment only).

Suggested Readings:

DSC1DP: Coordination Chemistry, States of matter & Chemical Kinetics (Practical)

Credits 02

Practical:

Section A: Inorganic Chemistry

Semi-micro qualitative analysis using H_2S of mixtures - not more than four ionic species (two anions and two cations and excluding insoluble salts) out of the following:

Cations : NH^{4+}, Pb^{2+}, Ag^{2+}, Bi^{3+}, Cu^{2+}, Cd^{2+}, Sn^{2+}, Fe^{3+}, Al^{3+}, Co^{2+}, Cr^{3+}, Ni^{2+}, Mn^{2+}, Zn^{2+}, Ba^{2+}, Sr^{2+}, Ca^{2+}, K^{+}

Anions : CO_3^{2-}, S^{2-}, SO^{2-}, $S_2O_3^{2-}$, NO_3^{-}, CH_3COO^{-}, Cl^{-}, Br^{-}, I^{-}, NO_3^{-},SO_4^{2-}, PO_4^{3-}, BO_3^{3-}, $C_2O_4^{2-}$, F^{-}

(Spot tests should be carried out wherever feasible)

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

1. Estimate the amount of nickel present in a given solution as bis (dimethylglyoximato) nickel(II) or aluminium as oximate in a given solution gravimetrically.
2. Draw calibration curve (absorbance at λ_{max} vs. concentration) for various concentrations of a given coloured compound ($KMnO_4$/ $CuSO_4$) and estimate the concentration of the same in a given solution.
3. Determine the composition of the Fe^{3+}-salicylic acid complex solution by Job's method.
4. Estimation of (i) Mg^{2+} or (ii) Zn^{2+} by complexometric titrations using EDTA.
5. Estimation of total hardness of a given sample of water by complexometric titration.
6. Determination of concentration of Na^+ and K^+ using Flame Photometry.

Section B: Physical Chemistry

(I) Surface tension measurement (use of organic solvents excluded).

a) Determination of the surface tension of a liquid or a dilute solution using a stalagmometer.
c) Study of the variation of surface tension of a detergent solution with concentration.

(II) Viscosity measurement (use of organic solvents excluded).
a) Determination of the relative and absolute viscosity of a liquid or dilute solution using an Ostwald's viscometer.
b) Study of the variation of viscosity of an aqueous solution with concentration of solute.

(III) Chemical Kinetics

Study the kinetics of the following reactions.
1. Initial rate method: Iodide-persulphate reaction
2. Integrated rate method:
   a. Acid hydrolysis of methyl acetate with hydrochloric acid.
   b. Saponification of ethyl acetate.
   c. Compare the strengths of HCl and H_2SO_4 by studying kinetics of hydrolysis of methyl acetate

Suggested Readings:

- Svehla, G. *Vogel's Qualitative Inorganic Analysis*, Pearson Education, 2012.
- Mendham, J. *Vogel's Quantitative Chemical Analysis*, Pearson, 2009.
- Khosla, B. D.; Garg, V. C. & Gulati, A. *Senior Practical Physical Chemistry*, R.
- Chand & Co.: New Delhi (2011).

Discipline Specific Electives (DSE)

DSE-1: Analytical Methods in Chemistry — Credits 06

DSE1T: Analytical Methods in Chemistry — Credits 04

Course Contents:

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Qualitative and quantitative aspects of analysis:

Sampling, evaluation of analytical data, errors, accuracy and precision, methods of their expression, normal law of distribution if indeterminate errors, statistical test of data; F, Q and t test, rejection of data, and confidence intervals.

Optical methods of analysis:

Origin of spectra, interaction of radiation with matter, fundamental laws of spectroscopy and selection rules, validity of Beer-Lambert's law.

UV-Visible Spectrometry: Basic principles of instrumentation (choice of source, monochromator and detector) for single and double beam instrument; *Basic principles of quantitative analysis:* estimation of metal ions from aqueous solution, geometrical isomers, keto -enol tautomers. Determination of composition of metal complexes using Job's method of continuous variation and mole ratio method.

Infrared Spectrometry: Basic principles of instrumentation (choice of source, monochromator & detector) for single and double beam instrument; sampling techniques. Structural illustration through interpretation of data, Effect and importance of isotope substitution.

Flame Atomic Absorption and Emission Spectrometry: Basic principles of instrumentation (choice of source, monochromator, detector, choice of flame and Burner designs. Techniques of atomization and sample introduction; Method of background correction, sources of chemical interferences and their method of removal. Techniques for the quantitative estimation of trace level of metal ions from water samples.

Thermal methods of analysis:

Theory of thermogravimetry (TG), basic principle of instrumentation. Techniques for quantitative estimation of Ca and Mg from their mixture.

Electro-analytical methods:

Classification of electroanalytical methods, basic principle of pH metric, potentiometric and conductometric titrations. Techniques used for the determination of equivalence points. Techniques used for the determination of pK_a values.

Separation techniques:

Solvent extraction: Classification, principle and efficiency of the technique. Mechanism of extraction: extraction by solvation and chelation. **Technique of extraction:** batch, continuous and counter current extractions. **Qualitative and quantitative aspects of solvent extraction:** extraction of metal ions from aqueous solution, extraction of organic species from the aqueous and nonaqueous media. **Chromatography:** Classification, principle and efficiency of the technique. Mechanism of separation: adsorption, partition & ion exchange. **Development of chromatograms:** frontal, elution and displacement methods. Qualitative and quantitative aspects of chromatographic methods of analysis: IC, GLC, GPC, TLC and HPLC. **Stereoisomeric separation and analysis:** Measurement of optical rotation, calculation of Enantiomeric excess (ee)/ diastereomeric excess (de) ratios and determination of enantiomeric composition using NMR, Chiral solvents and chiral shift reagents.

- Mikes, O. *Laboratory Hand Book of Chromatographic & Allied Methods*, Elles Harwood Series on Analytical Chemistry, John Wiley & Sons.
- Ditts, R.V. *Analytical Chemistry; Methods of Separation*, van Nostrand.

DSE1P: Analytical methods in Chemistry (Lab) **Credits 02**

I. Separation Techniques

1. Chromatography:
   (a) Separation of mixtures
      (i) Paper chromatographic separation of Fe^{3+} Al^{3+}, and Cr^{3+} .
      (ii) Separation and identification of the monosaccharide present in the given mixture (glucose & fructose) by paper chromatography. Reporting the R_f values.
   (b) Separate a mixture of Sudan yellow and Sudan Red by TLC technique and identify them on the basis of their R_f values.
   (c) Chromatographic separation of the active ingredients of plants, flowers and juices by TLC

II. Solvent Extractions:

1. To separate a mixture of Ni^{2+} & Fe^{2+} by complexation with DMG and extracting the Ni^{2+}-DMG complex in chloroform, and determine its concentration by spectrophotometry.
2. Solvent extraction of zisconium with amberliti LA-1, separation from a mixture of irons and gallium.
3. Determine the pH of the given aerated drinks fruit juices, shampoos and soaps.
4. Determination of Na, Ca, Li in cola drinks and fruit juices using flame photometric techniques.
5. Analysis of soil:
   1. Determination of pH of soil.
   2. Total soluble salt
   3. Estimation of calcium, magnesium, phosphate, nitrate
6. Ion exchange:
   i. Determination of exchange capacity of cation exchange resins and anion exchange resins.
   ii. Separation of metal ions from their binary mixture.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

iii. Separation of amino acids from organic acids by ion exchange chromatography.

III Spectrophotometry

1. Determination of pK_a values of indicator using spectrophotometry.
2 Structural characterization of compounds by infrared spectroscopy.
3 Determination of dissolved oxygen in water.
4 Determination of chemical oxygen demand (COD).
5 Determination of Biological oxygen demand (BOD).
6 Determine the composition of the Ferric-salicylate / Ferric-thiocyanate complex by Job's method.

Suggested Readings:

- Jeffery, G.H., Bassett, J., Mendham, J. & Denney, R.C. *Vogel's Textbook of Quantitative Chemical Analysis*, John Wiley & Sons.

DSE-1: Polymer Chemistry — Credits 06

DSE1T: Polymer Chemistry — Credits 04

Course Contents:

Introduction and history of polymeric materials:

Different schemes of classification of polymers, Polymer nomenclature, Molecular forces and chemical bonding in polymers, Texture of Polymers.

Functionality and its importance:

Criteria for synthetic polymer formation, classification of polymerization processes, Relationships between functionality, extent of reaction and degree of polymerization. Bifunctional systems, Poly-functional systems.

Kinetics of Polymerization:

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Mechanism and kinetics of step growth, radical chain growth, ionic chain (both cationic and anionic) and coordination polymerizations, Mechanism and kinetics of copolymerization, polymerization techniques.

Crystallization and crystallinity:

Determination of crystalline melting point and degree of crystallinity, Morphology of crystalline polymers, Factors affecting crystalline melting point.

Nature and structure of polymers - Structure Property relationships.

Determination of molecular weight of polymers (M_n, M_w, etc) by end group analysis, viscometry, light scattering and osmotic pressure methods. Molecular weight distribution and its significance. Polydispersity index.

Glass transition temperature (Tg) and determination of Tg, Free volume theory, WLF equation, Factors affecting glass transition temperature (Tg).

Polymer Solution – Criteria for polymer solubility, Solubility parameter, Thermodynamics of polymer solutions, entropy, enthalpy, and free energy change of mixing of polymers olutions, Flory-Huggins theory, Lower and Upper critical solution temperatures.

Properties of Polymers (Physical, thermal, Flow & Mechanical Properties).

Brief introduction to preparation, structure, properties and application of the following polymers: polyolefins, polystyrene and styrene copolymers, poly(vinyl chloride) and related polymers, poly(vinyl acetate) and related polymers, acrylic polymers, fluoro polymers, polyamides and related polymers. Phenol formaldehyde resins (Bakelite, Novalac), polyurethanes, silicone polymers, polydienes, Polycarbonates, Conducting Polymers, [polyacetylene, polyaniline, poly(p-phenylene sulphide polypyrrole, polythiophene)].

Suggested Readings:

- Seymour, R.B. & Carraher, C.E. *Polymer Chemistry: An Introduction,* Marcel Dekker, Inc. New York, 1981.
- Odian, G. *Principles of Polymerization*, 4th Ed. Wiley, 2004.
- Billmeyer, F.W. *Textbook of Polymer Science*, 2nd Ed. Wiley Interscience, 1971.
- Ghosh, P. *Polymer Science & Technology*, Tata McGraw-Hill Education, 1991.
- Lenz, R.W. *Organic Chemistry of Synthetic High Polymers.* Interscience Publishers, New York, 1967.

DSE1P: Polymer Chemistry (Lab) **Credits 02**

Practical:

1. **Polymer synthesis**
    1. Free radical solution polymerization of styrene (St) / Methyl Methacrylate (MMA) Methyl Acrylate (MA) / Acrylic acid (AA).
        a. Purification of monomer
        b. Polymerization using benzoyl peroxide (BPO) / 2,2'-azo-bis-isobutylonitrile (AIBN)

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

2. Preparation of nylon 66/6
3. Interfacial polymerization, preparation of polyester from isophthaloyl chloride (IPC) and phenolphthalein
    a. Preparation of IPC
    b. Purification of IPC
    c. Interfacial polymerization
4. Redox polymerization of acrylamide
5. Precipitation polymerization of acrylonitrile
6. Preparation of urea-formaldehyde resin
7. Preparations of novalac resin/resold resin.
8. Microscale Emulsion Polymerization of Poly(methylacrylate).

Polymer characterization

1. Determination of molecular weight by viscometry:
   (a) Polyacrylamide-aq.$NaNO_2$ solution
   (b) (Poly vinyl proplylidine (PVP) in water
2. Determination of the viscosity-average molecular weight of poly(vinyl alcohol) (PVOH) and the fraction of "head-to-head" monomer linkages in the polymer.
3. Determination of molecular weight by end group analysis: Polyethylene glycol (PEG)(OH group).
4. Testing of mechanical properties of polymers.
5. Determination of hydroxyl number of a polymer using colorimetric method.

Polymer analysis

1. Estimation of the amount of HCHO in the given solution by sodium sulphite method
2. Instrumental Techniques
3. IR studies of polymers
4. DSC analysis of polymers
5. Preparation of polyacrylamide and its electrophoresis

*at least 7 experiments to be carried out.

Suggested Readings:

DSE-1: Instrumental Methods of Chemical Analysis Credits 06

DSE1T: Instrumental Methods of Chemical Analysis Credits 04

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Course Contents:

Introduction to spectroscopic methods of analysis:

Recap of the spectroscopic methods covered in detail in the core chemistry syllabus: Treatment of analytical data, including error analysis. Classification of analytical methods and the types of instrumental methods. Consideration of electromagnetic radiation.

Molecular spectroscopy:

Infrared spectroscopy:

Interactions with molecules: absorption and scattering. Means of excitation (light sources), separation of spectrum (wavelength dispersion, time resolution), detection of the signal (heat, differential detection), interpretation of spectrum (qualitative, mixtures, resolution),advantages of Fourier Transform (FTIR). Samples and results expected. Applications: Issues of quality assurance and quality control, Special problems for portable instrumentation and rapid detection.

UV-Visible/ Near IR – emission, absorption, fluorescence and photoaccoustic. Excitation sources (lasers, time resolution), wavelength dispersion (gratings, prisms, interference filters, laser, placement of sample relative to dispersion, resolution), Detection of signal (photocells, photomultipliers, diode arrays, sensitivity and S/N), Single and Double Beam instruments, Interpretation (quantification, mixtures, absorption vs. fluorescence and the use of time, photoaccoustic, fluorescent tags).

Separation techniques

Chromatography: Gas chromatography, liquid chromatography, supercritical fluids, Importance of column technology (packing, capillaries), Separation based on increasing number of factors (volatility, solubility, interactions with stationary phase, size, electrical field), Detection: simple vs. specific (gas and liquid), Detection as a means of further analysis (use of tags and coupling to IR and MS), Electrophoresis (plates and capillary) and use with DNA analysis. Immunoassays and DNA techniques

Mass spectroscopy: Making the gaseous molecule into an ion (electron impact, chemical ionization), Making liquids and solids into ions (electrospray, electrical discharge, laser desorption, fast atom bombardment), Separation of ions on basis of mass to charge ratio, Magnetic, Time of flight, Electric quadrupole. Resolution, time and multiple separations, Detection and interpretation (how this is linked to excitation).

Elemental analysis:

Mass spectrometry (electrical discharges).
Atomic spectroscopy: Atomic absorption, Atomic emission, and Atomic fluorescence. Excitation and getting sample into gas phase (flames, electrical discharges, plasmas), Wavelength separation and resolution (dependence on technique), Detection of radiation (simultaneous/scanning, signal noise), Interpretation (errors due to molecular and ionic species, matrix effects, other interferences).

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

NMR spectroscopy: **P**rinciple, Instrumentation, Factors affecting chemical shift, Spin coupling, Applications.

Electro analytical Methods: Potentiometry & Voltammetry

Radiochemical Methods.

X-ray analysis and electron spectroscopy (surface analysis).

Suggested Readings:

- Skoog, D.A. Holler F.J. & Nieman, T.A. *Principles of Instrumental Analysis*, Cengage Learning India Ed.
- Willard, H.H., Merritt, L.L., Dean, J. & Settoe, F.A. *Instrumental Methods of Analysis*, 7th Ed. Wadsworth Publishing Company Ltd., Belmont, California, USA, 1988.

- G.W. Castellan: Physical Chemistry.
- C.N. Banwell: Fundamentals of Molecular Spectroscopy.
- Brian Smith: Infrared Spectral Interpretations: A Systematic Approach.
- W.J. Moore: Physical Chemistry.

DSE1P: Instrumental Methods of Chemical Analysis (Lab) Credits 02

Practical:

1. Safety Practices in the Chemistry Laboratory
2. Determination of the isoelectric pH of a protein.
3. Titration curve of an amino acid.
4. Determination of the void volume of a gel filtration column.
5. Determination of a Mixture of Cobalt and Nickel (UV/Vis spec.)
6. Study of Electronic Transitions in Organic Molecules (i.e., acetone in water)
7. IR Absorption Spectra (Study of Aldehydes and Ketones)
8. Determination of Calcium, Iron, and Copper in Food by Atomic Absorption
9. Quantitative Analysis of Mixtures by Gas Chromatography (i.e., chloroform and carbon tetrachloride)
10. Separation of Carbohydrates by HPLC
11. Determination of Caffeine in Beverages by HPLC
12. Potentiometric Titration of a Chloride-Iodide Mixture
13. Cyclic Voltammetry of the Ferrocyanide/Ferricyanide Couple
14. Nuclear Magnetic Resonance
15. Use of fluorescence to do “presumptive tests” to identify blood or other body fluids.
16. Use of “presumptive tests” for anthrax or cocaine
17. Collection, preservation, and control of blood evidence being used for DNA testing
18. Use of capillary electrophoresis with laser fluorescence detection for nuclear DNA (Y chromosome only or multiple chromosomes)
19. Use of sequencing for the analysis of mitochondrial DNA
20. Laboratory analysis to confirm anthrax or cocaine
21. Detection in the field and confirmation in the laboratory of flammable accelerants or explosives
22. Detection of illegal drugs or steroids in athletes
23. Detection of pollutants or illegal dumping
24. Fibre analysis

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

At least 10 experiments to be performed.

Suggested Readings:

- Skoog, D.A. Holler F.J. & Nieman, T.A. *Principles of Instrumental Analysis*, Cengage Learning India Ed.

- Willard, H.H., Merritt, L.L., Dean, J. & Settoe, F.A. *Instrumental Methods of Analysis*, 7th Ed. Wadsworth Publishing Company Ltd., Belmont, California, USA, 1988.

Or

DSE-1: Organometallics, Bioinorganic Chemistry, Polynuclear hydrocarbons and UV, IR Spectroscopy

Credits 06

DSE1T: Organometallics, Bioinorganic Chemistry, Polynuclear hydrocarbons and UV, IR Spectroscopy **Credits 04**

Course Contents:

Section A: Inorganic Chemistry-4

Chemistry of 3d metals

Oxidation states displayed by Cr, Fe, Co, Ni and Co. A study of the following compounds (including preparation and important properties); Peroxo compounds of Cr, $K_2Cr_2O_7$, $KMnO_4$, $K_4[Fe(CN)_6]$, sodium nitroprusside $[Co(NH_3)_6]Cl_3$, $Na_3[Co(NO_2)_6]$.

Organometallic Compounds

Definition and Classification with appropriate examples based on nature of metal-carbon bond (ionic, s, p and multicentre bonds). Structures of methyl lithium, Zeiss salt and ferrocene. AN rule as applied to carbonyls. Preparation, structure, bonding and properties of mononuclear and polynuclear carbonyls of 3d metals. p-acceptor behaviour of carbon monoxide. Synergic effects (VB approach)-(MO diagram of CO can be referred to for synergic effect to IR frequencies).

Bio-inorganic Chemistry

A brief introduction to bio-inorganic chemistry. Role of metal ions present in biological systems with special reference to Na^+, K^+ and Mg^{2+} ions: Na/K pump; Role of Mg^{2+} ions in energy production and chlorophyll. Role of Ca^{2+} in blood clotting, stabilization of protein structures and structural role (bones).

Section B: Organic Chemistry - 4

Polynuclear and heteronuclear aromatic compounds:

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Properties of the following compounds with reference to electrophilic and nucleophilic substitution: Naphthalene, Anthracene , Furan, Pyrrole, Thiophene, and Pyridine.

Active methylene compounds:

Preparation: Claisen ester condensation. Keto-enol tautomerism. *Reactions:* Synthetic uses of ethylacetoacetate (preparation of non-heteromolecules having upto 6 carbon).

Application of Spectroscopy to Simple Organic Molecules

Application of visible, ultraviolet and Infrared spectroscopy in organic molecules. Electromagnetic radiations, electronic transitions, λ_{max} & ε_{max}, chromophore, auxochrome, bathochromic and hypsochromic shifts. Application of electronic spectroscopy and Woodward rules for calculating l max of conjugated dienes and α,β – unsaturated Compounds.

Infrared radiation and types of molecular vibrations, functional group and fingerprint region. IR spectra of alkanes, alkenes and simple alcohols (inter and intramolecular hydrogen bonding), aldehydes, ketones, carboxylic acids and their derivatives (effect of substitution on >C=O stretching absorptions).

Suggested Readings:

- Peter Sykes: *A Guide Book to Mechanism* in *Organic Chemistry*, Orient Longman.
- Arun Bahl and B. S. Bahl: *Advanced Organic Chemistry*, S. Chand.

DSE-1P: Practical **Credits 02**

Practical:

Section A: Inorganic Chemistry

1. Separation of mixtures by chromatography: Measure the R_f value in each case. (Combination of two ions to be given) Paper chromatographic separation of Fe^{3+}, $A1^{3+}$ and Cr^{3+} or Paper chromatographic separation of Ni^{2+}, Co^{2+}, Mn^{2+} and Zn^{2+}
2. Preparation of any two of the following complexes and measurement of their conductivity:
   (i) tetraamminecarbonatocobalt (III) nitrate
   (ii) tetraamminecopper (II) sulphate
   (iii) potassium trioxalatoferrate (III) trihydrate

Compare the conductance of the complexes with that of M/1000 solution of NaCl, $MgCl_2$ and

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

$LiCl_3$.

Section B: Organic Chemistry

Systematic Qualitative Organic Analysis of Organic Compounds possessing monofunctional groups (-COOH, phenolic, aldehydic, ketonic, amide, nitro, amines) and preparation of one derivative.

Suggested Readings:

- A.I. Vogel: Qualitative Inorganic Analysis, Prentice Hall, 7th Edn.
- A.I. Vogel: Quantitative Chemical Analysis, Prentice Hall, 6th Edn.
- Vogel, A.I., Tatchell, A.R., Furnis, B.S., Hannaford, A.J. & Smith, P.W.G., *Textbook of Practical Organic Chemistry*, Prentice-Hall, 5th edition, 1996.
- Mann, F.G. & Saunders, B.C. *Practical Organic Chemistry* Orient-Longman, 1960.

DSE-2: Applications of computers in chemistry Credits 06

DSE2T: Applications of computers in chemistry Credits 04

Course Contents:

Basics:

Constants, variables, bits, bytes, binary and ASCII formats, arithmetic expressions, hierarchy of operations, inbuilt functions. Elements of the BASIC language. BASIC keywords and commands. Logical and relative operators. Strings and graphics. Compiled versus interpreted languages. Debugging. Simple programs using these concepts. Matrix addition and multiplication. Statistical analysis.

Numerical methods:

Roots of equations: Numerical methods for roots of equations: Quadratic formula, iterative method, Newton-Raphson method, Binary bisection and Regula-Falsi. *Differential calculus:* Numerical differentiation. *Integral calculus:* Numerical integration (Trapezoidal and Simpson's rule), probability distributions and mean values. *Simultaneous equations:* Matrix manipulation: addition, multiplication. Gauss-Siedal method. *Interpolation, extrapolation and curve fitting:* Handling of experimental data. *Conceptual background of molecular modelling:* Potential energy surfaces. Elementary idea of molecular mechanics and practical MO methods.

Suggested Readings:

- Harris, D. C. *Quantitative Chemical Analysis*. 6th Ed., Freeman (2007) Chapters 3-5.
- Levie, R. de, *How to use Excel in analytical chemistry and in general scientific data analysis*, Cambridge Univ. Press (2001) 487 pages.
- Noggle, J. H. *Physical chemistry on a Microcomputer*. Little Brown & Co. (1985).
- Venit, S.M. *Programming in BASIC: Problem solving with structure and style.* Jaico Publishing House: Delhi (1996).

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

DSE1P: Applications of computers in chemistry (Lab) **Credits 02**

Computer programs based on numerical methods for

1. Roots of equations: (e.g. volume of *van der Waals* gas and comparison with ideal gas, pH of a weak acid).
2. Numerical differentiation (e.g., change in pressure for small change in volume of a van der Waals gas, potentiometric titrations).
3. Numerical integration (e.g. entropy/ enthalpy change from heat capacity data), probability distributions (gas kinetic theory) and mean values.
4. Matrix operations. Application of Gauss-Siedel method in colourimetry.
5. Simple exercises using molecular visualization software.

Suggested Readings:

- McQuarrie, D. A. *Mathematics for Physical Chemistry* University Science Books (2008).
- Mortimer, R. *Mathematics for Physical Chemistry*. 3rd Ed. Elsevier (2005).
- Steiner, E. *The Chemical Maths Book* Oxford University Press (1996).

DSE-2: Green Chemistry **Credits 06**

DSE2T: Green Chemistry **Credits 04**

Course Contents:

Introduction to Green Chemistry

What is Green Chemistry? Need for Green Chemistry. Goals of Green Chemistry. Limitations/ Obstacles in the pursuit of the goals of Green Chemistry

Principles of Green Chemistry and Designing a Chemical synthesis

Twelve principles of Green Chemistry with their explanations and examples and special emphasis on the following:

- Designing a Green Synthesis using these principles; Prevention of Waste/ byproducts; maximum incorporation of the materials used in the process into the final products , Atom Economy, calculation of atom economy of the rearrangement, addition, substitution and elimination reactions.
- Prevention/ minimization of hazardous/ toxic products reducing toxicity. Risk = (function) hazard × exposure; waste or pollution prevention hierarchy.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

- Green solvents – supercritical fluids, water as a solvent for organic reactions, ionic liquids, fluorous biphasic solvent, PEG, solvent less processes, immobilized solvents and how to compare greenness of solvents.
- Energy requirements for reactions – alternative sources of energy: use of microwaves and ultrasonic energy.
- Selection of starting materials; avoidance of unnecessary derivatization – careful use of blocking/protecting groups.
- Use of catalytic reagents (wherever possible) in preference to stoichiometric reagents; catalysis and green chemistry, comparison of heterogeneous and homogeneous catalysis, biocatalysis, asymmetric catalysis and photocatalysis.
- Prevention of chemical accidents designing greener processes, inherent safer design, principle of ISD "What you don't have cannot harm you", greener alternative to Bhopal Gas Tragedy (safer route to carcarbaryl) and Flixiborough accident (safer route to cyclohexanol) subdivision of ISD, minimization, simplification, substitution, moderation and limitation.
- Strengthening/ development of analytical techniques to prevent and minimize the generation of hazardous substances in chemical processes.

Green Synthesis/ Reactions and some real world cases:

1. Green Synthesis of the following compounds: adipic acid, catechol, disodium iminodiacetate (alternative to Strecker synthesis)
2. Microwave assisted reactions in water: Hofmann Elimination, methyl benzoate to benzoic acid, oxidation of toluene and alcohols; microwave assisted reactions in organic solvents Diels-Alder reaction and Decarboxylation reaction
3. Ultrasound assisted reactions: sonochemical Simmons-Smith Reaction (Ultrasonic alternative to iodine)
4 Surfactants for carbon dioxide – replacing smog producing and ozone depleting solvents with CO_2 for precision cleaning and dry cleaning of garments.
5 Designing of Environmentally safe marine antifoulant.
6 Rightfit pigment: synthetic azopigments to replace toxic organic and inorganic pigments.
7 n efficient, green synthesis of a compostable and widely applicable plastic (poly lactic acid) made from corn.
8 Healthier fats and oil by Green Chemistry: Enzymatic interesterification for production of no Trans-Fats and Oils
9 Development of Fully Recyclable Carpet: Cradle to Cradle Carpeting

Future Trends in Green Chemistry

Oxidation reagents and catalysts; Biomimetic, multifunctional reagents; Combinatorial green chemistry; Proliferation of solventless reactions; co crystal controlled solid state synthesis (C_2S_3); Green chemistry in sustainable development.

Suggested Readings:

- Ahluwalia, V.K. & Kidwai, M.R. *New Trends in Green Chemistry*, Anamalaya Publishers (2005).

- Lancaster, M. *Green Chemistry: An Introductory Text* RSC Publishing, 2nd Edition, 2010.

DSE2P: Green Chemistry (Lab) **Credits 02**

Practical:

1. Safer starting materials

Preparation and characterization of nanoparticles of gold using tea leaves.

2. Using renewable resources

Preparation of biodiesel from vegetable/ waste cooking oil.

3. Avoiding waste

- Principle of atom economy.

- Use of molecular model kit to stimulate the reaction to investigate how the atom economy can illustrate Green Chemistry.
- Preparation of propene by two methods can be studied
  (I) Triethylamine ion + OH^- → propene + trimethylpropene + water
  (II) 1-propanol $\xrightarrow{H_2SO_4/\Delta}$ propane + water

- Other types of reactions, like addition, elimination, substitution and rearrangement should also be studied for the calculation of atom economy.

4. Use of enzymes as catalysts

Benzoin condensation using Thiamine Hydrochloride as a catalyst instead of cyanide.

5. Alternative Green solvents

Extraction of D-limonene from orange peel using liquid CO_2 prepared form dry ice.

Mechanochemical solvent free synthesis of azomethines

6. Alternative sources of energy

- Solvent free, microwave assisted one pot synthesis of phthalocyanine complex of copper (II).
- Photoreduction of benzophenone to benzopinacol in the presence of sunlight.

DSE-2: Industrial Chemicals and Environment — Credits 06

DSE2T: Industrial Chemicals and Environment — Credits 04

Course Contents:

Industrial Gases and Inorganic Chemicals

Industrial Gases: Large scale production, uses, storage and hazards in handling of the following gases: oxygen, nitrogen, argon, neon, helium, hydrogen, acetylene, carbon monoxide, chlorine, fluorine, sulphur dioxide and phosgene.

Inorganic Chemicals: Manufacture, application, analysis and hazards in handling the following chemicals: hydrochloric acid, nitric acid, sulphuric acid, caustic soda, common salt, borax, bleaching powder, sodium thiosulphate, hydrogen peroxide, potash alum, chrome alum, potassium dichromate and potassium permanganate.

Industrial Metallurgy

General Principles of Metallurgy

Chief modes of occurrence of metals based on standard electrode potentials. Ellingham diagrams for reduction of metal oxides using carbon as reducing agent. Hydrometallurgy, Methods of purification of metals (Al, Pb, Ti, Fe, Cu, Ni, Zn): electrolytic, oxidative refining, Kroll process, Parting process, van Arkel-de Boer process and Mond's process. Preparation of metals (ferrous and nonferrous) and ultrapure metals for semiconductor technology.

Environment and its segments

Ecosystems. Biogeochemical cycles of carbon, nitrogen and sulphur.

Air Pollution: Major regions of atmosphere. Chemical and photochemical reactions in atmosphere. Air pollutants: types, sources, particle size and chemical nature; Photochemical smog: its constituents and photochemistry. Environmental effects of ozone, Major sources of air pollution. Pollution by SO_2, CO_2, CO, NO_x, H_2S and other foul smelling gases. Methods of estimation of CO, NO_x, SO_x and control procedures. Effects of air pollution on living organisms and vegetation. Greenhouse effect and Global warming, Ozone depletion by oxides of nitrogen, chlorofluorocarbons and Halogens, removal of sulphur from coal. Control of particulates.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Water Pollution: Hydrological cycle, water resources, aquatic ecosystems, Sources and nature of water pollutants, Techniques for measuring water pollution, Impacts of water pollution on hydrological and ecosystems. Water purification methods. Effluent treatment plants (primary, secondary and tertiary treatment). Industrial effluents from the following industries and their treatment: lectroplating, textile, tannery, dairy, petroleum and petrochemicals, agro, fertilizer, etc. Sludge disposal. Industrial waste management, incineration of waste. Water treatment and purification (reverse osmosis, electro dialysis, ion exchange). Water quality parameters for waste water, industrial water and domestic water.

Energy & Environment

Sources of energy: Coal, petrol and natural gas. Nuclear Fusion / Fission, Solar energy, Hydrogen, geothermal, Tidal and Hydel, etc.
Nuclear Pollution: Disposal of nuclear waste, nuclear disaster and its management.

Biocatalysis

Introduction to biocatalysis: Importance in "Green Chemistry" and Chemical Industry.

Suggested Readings:

- E. Stocchi: *Industrial Chemistry*, Vol-I, Ellis Horwood Ltd. UK.
- R.M. Felder, R.W. Rousseau: *Elementary Principles of Chemical Processes*, Wiley Publishers, New Delhi.
- J. A. Kent: *Riegel's Handbook of Industrial Chemistry, CBS Publishers, New Delhi.*

- G.T. Miller, *Environmental Science* 11th edition. Brooks/ Cole (2006).
- Mishra, *Environmental Studies*. Selective and Scientific Books, New Delhi (2005).

DSE2P: Industrial Chemicals & Environment **Credits 02**

Practical:

1. Determination of dissolved oxygen in water.
2. Determination of Chemical Oxygen Demand (COD)
3. Determination of Biological Oxygen Demand (BOD)
4. Percentage of available chlorine in bleaching powder.
5. Measurement of chloride, sulphate and salinity of water samples by simple titration method ($AgNO_3$ and potassium chromate).
6. Estimation of total alkalinity of water samples (CO_3^{2-} HCO_3^-) using double titration method.
7. Measurement of dissolved CO_2.
8. Study of some of the common bio-indicators of pollution.
9. Estimation of SPM in air samples.
10. Preparation of borax/ boric acid.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University

Or

DSE-2: Quantum Chemistry, Spectroscopy & Photochemistry Credits 06

DSE2T: Quantum Chemistry, Spectroscopy & Photochemistry Credits 04

Course Contents:

Quantum Chemistry

Postulates of quantum mechanics, quantum mechanical operators, Schrödinger equation and its application to free particle and "particle-in-a-box" (rigorous treatment), quantization of energy levels, zero-point energy and Heisenberg Uncertainty principle; wavefunctions, probability distribution functions, nodal properties, Extension to two and three dimensional boxes, separation of variables, degeneracy.

Qualitative treatment of simple harmonic oscillator model of vibrational motion: Setting up of Schrödinger equation and discussion of solution and wave functions. Vibrational energy of diatomic molecules and zero-point energy.

Angular momentum: Commutation rules, quantization of square of total angular momentum and z-component. Rigid rotator model of rotation of diatomic molecule. Schrödinger equation, transformation to spherical polar coordinates. Separation of variables. Spherical harmonics. Discussion of solution.

Qualitative treatment of hydrogen atom and hydrogen like ions: setting up of Schrödinger equation in spherical polar coordinates, radial part, quantization of energy (only final energy expression). Average and most probable distances of electron from nucleus. Setting up of Schrödinger equation for many-electron atoms (He, Li). Need for approximation methods. Statement of variation theorem and application to simple systems (particle-in-a-box, harmonic oscillator, hydrogen atom).

Chemical bonding: Covalent bonding, valence bond and molecular orbital approaches, LCAO-MO treatment of H_2^+. Bonding and antibonding orbitals. Qualitative extension to H_2. Comparison of LCAO-MO and VB treatments of H_2 (only wave functions, detailed solution not required) and their limitations. Refinements of the two approaches (Configuration Interaction for MO, ionic terms in VB). Qualitative description of LCAO-MO treatment of homonuclear and heteronuclear diatomic molecules (HF, LiH). Localised and non-localised molecular orbitals treatment of triatomic (BeH_2, H_2O) molecules. Qualitative MO theory and its application to AH_2 type molecules.

Molecular Spectroscopy:

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Interaction of electromagnetic radiation with molecules and various types of spectra; Born Oppenheimer approximation.

Rotation spectroscopy: Selection rules, intensities of spectral lines, determination of bond lengths of diatomic and linear triatomic molecules, isotopic substitution.

Vibrational spectroscopy: Classical equation of vibration, computation of force constant, amplitude of diatomic molecular vibrations, anharmonicity, Morse potential, dissociation energies, fundamental frequencies, overtones, hot bands, degrees of freedom for polyatomic molecules, modes of vibration, concept of group frequencies. Vibration-rotation spectroscopy: diatomic vibrating rotator, P, Q, R branches.

Raman spectroscopy: Qualitative treatment of Rotational Raman effect; Effect of nuclear spin, Vibrational Raman spectra, Stokes and anti-Stokes lines; their intensity difference, rule of mutual exclusion.

Electronic spectroscopy: Franck-Condon principle, electronic transitions, singlet and triplet states, fluorescence and phosphorescence, dissociation and predissociation, calculation of electronic transitions of polyenes using free electron model.

Nuclear Magnetic Resonance (NMR) spectroscopy: Principles of NMR spectroscopy, Larmor precession, chemical shift and low resolution spectra, different scales, spin-spin coupling and high resolution spectra, interpretation of PMR spectra of organic molecules.

Electron Spin Resonance (ESR) spectroscopy: Its principle, hyperfine structure, ESR of simple radicals.

Photochemistry

Characteristics of electromagnetic radiation, Lambert-Beer's law and its limitations, physical significance of absorption coefficients. Laws, of photochemistry, quantum yield, actinometry, examples of low and high quantum yields, photochemical equilibrium and the differential rate of photochemical reactions, photosensitised reactions, quenching. Role of photochemical reactions in biochemical processes, photostationary states, chemiluminescence.

Suggested Readings:

- Banwell, C. N. & McCash, E. M. *Fundamentals of Molecular Spectroscopy* 4th Ed. Tata McGraw-Hill: New Delhi (2006).
- Chandra, A. K. *Introductory Quantum Chemistry* Tata McGraw-Hill (2001).
- House, J. E. *Fundamentals of Quantum Chemistry* 2nd
- Ed. Elsevier: USA (2004).
- Lowe, J. P. & Peterson, K. *Quantum Chemistry*, Academic Press (2005).
- Kakkar, R. *Atomic & Molecular Spectroscopy*: *Concepts & Applications*, Cambridge University Press (2015).

DSE2P: Practical **Credits 02**

UV/Visible spectroscopy

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

I. Study the 200-500 nm absorbance spectra of $KMnO_4$ and $K_2Cr_2O_7$ (in 0.1 M H_2SO_4) and determine the λ_{max} values. Calculate the energies of the two transitions in different units (J molecule^{-1}, kJ mol^{-1}, cm^{-1}, eV).
II. Study the pH-dependence of the UV-Vis spectrum (200-500 nm) of $K_2Cr_2O_7$.
III. Record the 200-350 nm UV spectra of the given compounds (acetone, acetaldehyde, 2-propanol, acetic acid) in water. Comment on the effect of structure on the UV spectra of organic compounds.

Colourimetry

I. Verify Lambert-Beer's law and determine the concentration of $CuSO_4$/$KMnO_4$/$K_2Cr_2O_7$ in a solution of unknown concentration
II. Determine the concentrations of $KMnO_4$ and $K_2Cr_2O_7$ in a mixture.
III. Study the kinetics of iodination of propanone in acidic medium.
IV. Determine the amount of iron present in a sample using 1,10-phenathroline.
V. Determine the dissociation constant of an indicator (phenolphthalein).
VI. Study the kinetics of interaction of crystal violet/ phenolphthalein with sodium hydroxide.
VII. Analyse the given vibration-rotation spectrum of HCl (g)

Suggested Readings:

- Mendham, J. *Vogel's Quantitative Chemical Analysis*, Pearson, 2009.
- Khosla, B. D.; Garg, V. C. & Gulati, A., *Senior Practical Physical Chemistry*, R. Chand & Co.: New Delhi (2011).
- Garland, C. W.; Nibler, J. W. & Shoemaker, D. P. *Experiments in Physical Chemistry 8th Ed.;* McGraw-Hill: New York (2003).
- Halpern, A. M. & McBane, G. C. *Experimental Physical Chemistry 3rd Ed.;* W.H. Freeman & Co.: New York (2003).

Or

DSE-2: Molecular Modelling & Drug design — Credits 06

DSE2T: Molecular Modelling & Drug design — Credits 04

Course Contents:

Introduction to Molecular Modelling:

Introduction. Useful Concepts in Molecular Modelling: Coordinate Systems. Potential Energy Surfaces. Molecular Graphics. Surfaces. Computer Hardware and Software. The Molecular Modelling Literature.

Force Fields:

Fields. Bond Stretching. Angle Bending. Introduction to non-bonded interactions. Electrostatic interactions. *van der Waals* Interactions. Hydrogen bonding in Molecular Mechanics. Force Field Models for the Simulation of Liquid Water.

Energy Minimization and Computer Simulation:

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Minimization and related methods for exploring the energy surface. Non-derivative method, First and second order minimization methods. Computer simulation methods. Simple thermodynamic properties and Phase Space. Boundaries. Analyzing the results of a simulation and estimating Errors.

Molecular Dynamics & Monte Carlo Simulation:

Molecular Dynamics Simulation Methods. Molecular Dynamics using simple models. Molecular Dynamics with continuous potentials. Molecular Dynamics at constant temperature and pressure. Metropolis method. Monte Carlo simulation of molecules. Models used in Monte Carlo simulations of polymers.

Structure Prediction and Drug Design:

Structure prediction - Introduction to comparative Modelling. Sequence alignment. Constructing and evaluating a comparative model. Predicting protein structures by 'Threading', Molecular docking. Structure based de novo ligand design, Drug Discovery – Chemo informatics – QSAR.

Suggested Readings:

- Leach, A.R. *Molecular Modelling Principles and Application*, Longman, 2001.
- Haile, J.M. *Molecular Dynamics Simulation Elementary Methods*, John Wiley and Sons, 1997.
- Gupta, S.P. *QSAR and Molecular Modeling*, Springer - Anamaya Publishers, 2008.

DSE2P: Molecular Modelling & Drug design (Lab) Credits 02

Practical:

i. Compare the optimized C-C bond lengths in ethane, ethene, ethyne and benzene. Visualize the molecular orbitals of the ethane σ bonds and ethene, ethyne, benzene and pyridine π bonds.

ii. (a) Perform a conformational analysis of butane.
(b) Determine the enthalpy of isomerization of *cis* and *trans* 2-butene.

iii. Visualize the electron density and electrostatic potential maps for LiH, HF, N_2, NO and CO and comment. Relate to the dipole moments. Animate the vibrations of these molecules.

iv. (a) Relate the charge on the hydrogen atom in hydrogen halides with their acid character.
(b) Compare the basicities of the nitrogen atoms in ammonia, methylamine, dimethylamine and trimethylamine.

v. (a) Compare the shapes of the molecules: 1-butanol, 2-butanol, 2-methyl-1-propanol, and 2-methyl-2-propanol. Note the dipole moment of each molecule.
(b) Show how the shapes affect the trend in boiling points: (118 ºC, 100 ºC, 108 ºC, 82 ºC, respectively).

vi. Build and minimize organic compounds of your choice containing the following functional groups. Note the dipole moment of each compound:
(a) alkyl halide (b) aldehyde (c) ketone (d) amine (e) ether (f) nitrile (g) thiol (h) carboxylic acid (i) ester (j) amide.

vii. (a) Determine the heat of hydration of ethylene.
(b) Compute the resonance energy of benzene by comparison of its enthalpy of hydrogenation with that of cyclohexene.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

viii. Arrange 1-hexene, 2-methyl-2-pentene, (*E*)-3-methyl-2-pentene, (*Z*)-3-methyl-2-pentene, and 2,3-dimethyl-2-butene in order of increasing stability.

ix. (a) Compare the optimized bond angles H_2O, H_2S, H_2Se.
(b) Compare the HAH bond angles for the second row dihydrides and compare with the results from qualitative MO theory.

Note: Software: ChemSketch, ArgusLab (www.planaria-software.com), TINKER 6.2 (dasher.wustl.edu/ffe), WebLab Viewer, Hyperchem, or any similar software.

Suggested Readings:

- Leach, A.R. *Molecular Modelling Principles and Application*, Longman, 2001.
- Haile, J.M. *Molecular Dynamics Simulation Elementary Methods*, John Wiley and Sons, 1997.
- Gupta, S.P. *QSAR and Molecular Modeling*, Springer - Anamaya Publishers, 2008.

Skill Enhancement Course (SEC)

SEC-1: Basic Analytical Chemistry — Credits 02

SEC1T: Basic Analytical Chemistry — Credits 01

Course Contents:

Introduction: Introduction to Analytical Chemistry and its interdisciplinary nature. Concept of sampling. Importance of accuracy, precision and sources of error in analytical measurements. Presentation of experimental data and results, from the point of view of significant figures.

Analysis of soil: Composition of soil, Concept of pH and pH measurement, Complexometric titrations, Chelation, Chelating agents, use of indicators.

Analysis of water: Definition of pure water, sources responsible for contaminating water, water sampling methods, water purification methods.

Analysis of food products: Nutritional value of foods, idea about food processing and food preservations and adulteration.

Chromatography: Definition, general introduction on principles of chromatography, paper chromatography, TLC etc.

Ion-exchange: Column, ion-exchange chromatography etc. Determination of ion exchange capacity of anion / cation exchange resin (using batch procedure if use of column is not feasible).

Analysis of cosmetics: Major and minor constituents and their function.

SEC1P: Practical — Credits 01

A:

1. Determination of pH of soil samples.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

2. Estimation of Calcium and Magnesium ions as Calcium carbonate by complexometric titration.
3. Determination of pH, acidity and alkalinity of a water sample.
4. Determination of dissolved oxygen (DO) of a water sample.
5. Identification of adulterants in some common food items like coffee powder, asafoetida,chilli powder, turmeric powder, coriander powder and pulses, etc.
6. Analysis of preservatives and colouring matter.
7. Paper chromatographic separation of mixture of metal ion (Fe^{3+} and Al^{3+}).
8. To compare paint samples by TLC method.
9. Determination of ion exchange capacity of anion / cation exchange resin (using batch procedure if use of column is not feasible).
10. Analysis of deodorants and antiperspirants, Al, Zn, boric acid, chloride, sulphate.
11. Determination of constituents of talcum powder: Magnesium oxide, Calcium oxide, Zinc oxide and Calcium carbonate by complexometric titration.

B:

Suggested Applications (Any one):

1. To study the use of phenolphthalein in trap cases.
2. To analyze arson accelerants.
3. To carry out analysis of gasoline.

C:

Suggested Instrumental demonstrations:

1. Estimation of macro nutrients: Potassium, Calcium, Magnesium in soil samples by flame photometry.
2. Spectrophotometric determination of Iron in Vitamin / Dietary Tablets.
3. Spectrophotometric Identification and Determination of Caffeine and Benzoic Acid in Soft Drink.

Suggested Readings:

- Willard, H.H., Merritt, L.L., Dean, J. & Settoe, F.A. *Instrumental Methods of Analysis*. 7th Ed. Wadsworth Publishing Co. Ltd., Belmont, California, USA.
- Skoog, D.A. Holler F.J. & Nieman, T.A. *Principles of Instrumental Analysis*, Cengage Learning India Ed.
- Skoog, D.A.; West, D.M. & Holler, F.J. *Fundamentals of Analytical Chemistry 6th Ed.*, Saunders College Publishing, Fort Worth.
- Harris, D. C. *Quantitative Chemical Analysis*, W. H. Freeman.
- Dean, J. A. *Analytical Chemistry Notebook*, McGraw Hill.
- Day, R. A. & Underwood, A. L. *Quantitative Analysis*, Prentice Hall of India.
- Freifelder, D. *Physical Biochemistry 2nd Ed.*, W.H. Freeman and Co., N.Y. USA.
- Cooper, T.G. *The Tools of Biochemistry*, John Wiley and Sons, N.Y. USA.
- Vogel, A. I. *Vogel's Qualitative Inorganic Analysis 7th Ed.*, Prentice Hall.
- Vogel, A. I. Vogel's *Quantitative Chemical Analysis 6th Ed.*, Prentice Hall.
- Robinson, J.W. *Undergraduate Instrumental Analysis 5th Ed.*, Marcel Dekker, Inc., New York.

Or

SEC-1: Chemo informatics Credits 02

SEC1T: Chemo informatics

Course Contents:

Introduction to Chemo informatics:

History and evolution of chemo informatics, Use of chemo informatics, Prospects of chemo informatics, Molecular Modelling and Structure elucidation.

Representation of molecules and chemical reactions:

Nomenclature, Different types of notations, SMILES coding, Matrix representations, Structure of Molfiles and Sdfiles, Libraries and toolkits, Different electronic effects, Reaction classification.

Searching chemical structures:
Full structure search, sub-structure search, basic ideas, similarity search, three dimensional search methods, basics of computation of physical and chemical data and structure descriptors, data visualization.

Applications:

Prediction of Properties of Compounds; Linear Free Energy Relations; Quantitative Structure-Property Relations; Descriptor Analysis; Model Building; Modeling Toxicity; Structure-Spectra correlations; Prediction of NMR, IR and Mass spectra; Computer Assisted Structure elucidations; Computer Assisted Synthesis Design, Introduction to drug design; Target Identification and Validation; Lead Finding and Optimization; Analysis of HTS data; Virtual Screening; Design of Combinatorial Libraries; Ligand-Based and Structure Based Drug design; Application of Chemoinformatics in Drug Design.

Suggested Readings:

- Andrew R. Leach & Valerie, J. Gillet (2007) *An introduction to Chemoinformatics.* Springer: The Netherlands.
- Gasteiger, J. & Engel, T. (2003) *Chemoinformatics: A text-book.* Wiley-VCH.
- Gupta, S. P. (2011) *QSAR & Molecular Modeling.* Anamaya Pub.: New Delhi.

SEC-2: Intellectual Property Rights (IPR) Credits 02

SEC2T: Intellectual Property Rights (IPR)

Course Contents:

Introduction to Intellectual Property: Historical Perspective, Different Types of IP, Importance of protecting IP.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Copyrights: Introduction, How to obtain, Differences from Patents.

Trade Marks: Introduction, How to obtain, Different types of marks – Collective marks, certification marks, service marks, Trade names, etc. Differences from Designs.

Patents: Historical Perspective, Basic and associated right, WIPO, PCT system, Traditional Knowledge, Patents and Healthcare – balancing promoting innovation with public health, Software patents and their importance for India.

Geographical indications: Definition, rules for registration, prevention of illegal exploitation, importance to India.

Industrial Designs: Definition, How to obtain, features, International design registration.

Layout design of integrated circuits: Circuit Boards, Integrated Chips, Importance for electronic industry.

Trade Secrets: Introduction and Historical Perspectives, Scope of Protection, Risks involved and legal aspects of Trade Secret Protection.

Different International agreements

(a) Word Trade Organization (WTO):

(i) General Agreement on Tariffs & Trade (GATT), Trade Related Intellectual Property Rights (TRIPS) agreement
(ii) General Agreement on Trade related Services (GATS)
(iii) Madrid Protocol
(iv) Berne Convention
(v) Budapest Treaty

(b) Paris Convention

WIPO and **TRIPS, IPR** and Plant Breeders Rights, IPR and Biodiversity

IP Infringement issue and enforcement – Role of Judiciary, Role of law enforcement agencies – Police, Customs etc. Economic Value of Intellectual Property – Intangible assets and their valuation, Intellectual Property in the Indian Context – Various laws in India Licensing and technology transfer.

Suggested Readings:

- N.K. Acharya: *Textbook on intellectual property rights*, Asia Law House .
- Manjula Guru & M.B. Rao, *Understanding Trips: Managing Knowledge in Developing Countries*, Sage Publications.
- P. Ganguli, Intellectual Property Rights: *Unleashing the Knowledge Economy*, Tata McGraw-Hill.
- Arthur Raphael Miller, Micheal H.Davis; *Intellectual Property: Patents, Trademarks and Copyright in a Nutshell*, West Group Publishers (2000).
- Jayashree Watal, *Intellectual property rights in the WTO and developing countries*, Oxford University Press, Oxford.

Or

SEC-2: Analytical Clinical Biochemistry Credits 02

SEC2T: Analytical Clinical Biochemistry Credits 01

Course Contents:

Basic understanding of the structures, properties and functions of carbohydrates, lipids and proteins:

Review of concepts studied in the core course:

Carbohydrates: Biological importance of carbohydrates, Metabolism, Cellular currency of energy (ATP), Glycolysis, Alcoholic and Lactic acid fermentations, Krebs cycle. Isolation and characterization of polysachharides.

Proteins: Classification, biological importance; Primary and secondary and tertiary structures of proteins: α-helix and β- pleated sheets, Isolation, characterization, denaturation of proteins.

Enzymes: Nomenclature, Characteristics (mention of Ribozymes), Classification; Active site, Mechanism of enzyme action, Stereospecificity of enzymes, Coenzymes and cofactors, Enzyme inhibitors, Introduction to Biocatalysis: Importance in "Green Chemistry" and Chemical Industry.

Lipids: Classification. Biological importance of triglycerides and phosphoglycerides and cholesterol; Lipid membrane, Liposomes and their biological functions and underlying applications. Lipoproteins.

Hormone : Properties, functions and biochemical functions of steroid hormones. Biochemistry of peptide hormones.

Structure of DNA (Watson-Crick model) and RNA, Genetic Code, Biological roles of DNA and RNA: Replication, Transcription and Translation, Introduction to Gene therapy.

Enzymes: Nomenclature, classification, effect of pH, temperature on enzyme activity, enzyme inhibition.

Biochemistry of disease: A diagnostic approach by blood/ urine analysis.

Blood: Composition and functions of blood, blood coagulation. Blood collection and preservation of samples. Anaemia, Regulation, estimation and interpretation of data for blood sugar, urea, creatinine, cholesterol and bilirubin.
Urine: Collection and preservation of samples. Formation of urine. Composition an estimation of constituents of normal and pathological urine.

SEC2P: Practical Credit 01

Practical
Identification and estimation of the following:

1. Carbohydrates – qualitative and quantitative.

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

2. Lipids – qualitative.
3. Determination of the iodine number of oil.
4. Determination of the saponification number of oil.
5. Determination of cholesterol using Liebermann- Burchard reaction.
6. Proteins – qualitative.
7. Isolation of protein.
8. Determination of protein by the Biuret reaction.
9. Determination of nucleic acids

Suggested Readings:

- T.G. Cooper: Tool of Biochemistry.
- Keith Wilson and John Walker: Practical Biochemistry.
- Alan H Gowenlock: Varley's Practical Clinical Biochemistry.
- Thomas M. Devlin: Textbook of Biochemistry.
- Berg, J.M., Tymoczko, J.L. & Stryer, L. *Biochemistry*, W.H. Freeman, 2002.
- Talwar, G.P. & Srivastava, M. *Textbook of Biochemistry and Human Biology*, 3rd Ed. PHI Learning.
- Nelson, D. L. & Cox, M. M. *Lehninger's Principles of Biochemistry 7th Ed.*, W. H. Freeman.
- Mikes, O. *Laboratory Hand Book of Chromatographic & Allied Methods*, Elles Harwood Series on Analytical Chemistry, John Wiley & Sons, 1979.

SEC-3: Pharmaceutical Chemistry — Credits 02

SEC3T: Pharmaceutical Chemistry — Credits 01

Course Contents:

Drugs & Pharmaceuticals:

Drug discovery, design and development; Basic Retrosynthetic approach. Synthesis of the representative drugs of the following classes: analgesics agents, antipyretic agents, antiinflammatory agents (Aspirin, paracetamol, lbuprofen); antibiotics (Chloramphenicol); antibacterial and antifungal agents (Sulphonamides; Sulphanethoxazol, Sulphacetamide, Trimethoprim); antiviral agents (Acyclovir), Central Nervous System agents (Phenobarbital, Diazepam),Cardiovascular (Glyceryl trinitrate), antilaprosy (Dapsone), HIV-AIDS related drugs (AZT- Zidovudine).

Fermentation:

Aerobic and anaerobic fermentation. Production of (i) Ethyl alcohol and citric acid, (ii) Antibiotics; Penicillin, Cephalosporin, Chloromycetin and Streptomycin, (iii) Lysine, Glutamic acid, Vitamin B2, Vitamin B12 and Vitamin C.

SEC3P: Practical — Credit 01

Practical:

1. Preparation of Aspirin and its analysis.
2. Preparation of magnesium bisilicate (Antacid).

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Suggested Readings:

- G.L. Patrick: Introduction to *Medicinal Chemistry, Oxford University* Press, UK.
- Hakishan, V.K. Kapoor: *Medicinal and Pharmaceutical Chemistry,* Vallabh Prakashan, Pitampura, New Delhi.
- William O. Foye, Thomas L., Lemke , David A. William: *Principles of Medicinal Chemistry*, B.I. Waverly Pvt. Ltd. New Delhi.

Or

SEC-3: Chemistry of Cosmetics & Perfumes — Credits 02

SEC3T: Chemistry of Cosmetics & Perfumes — Credits 01

Course Contents:

A general study including preparation and uses of the following: Hair dye, hair spray, shampoo, suntan lotions, face powder, lipsticks, talcum powder, nail enamel, creams (cold, vanishing and shaving creams), antiperspirants and artificial flavours. Essential oils and their importance in cosmetic industries with reference to Eugenol, Geraniol, sandalwood oil, eucalyptus, rose oil, 2-phenyl ethyl alcohol, Jasmone, Civetone, Muscone.

SEC3P: Practical — Credit 01

1. Preparation of talcum powder.
2. Preparation of shampoo.
3. Preparation of enamels.
4. Preparation of hair remover.
5. Preparation of face cream.
6. Preparation of nail polish and nail polish remover.

Suggested Readings:

- E. Stocchi: *Industrial Chemistry*, Vol -I, Ellis Horwood Ltd. UK.
- P.C. Jain, M. Jain: *Engineering Chemistry*, Dhanpat Rai & Sons, Delhi.
- Sharma, B.K. & Gaur, H. *Industrial Chemistry,* Goel Publishing House, Meerut (1996).

SEC-4: Pesticide Chemistry — Credits 02

SEC4T: Pesticide Chemistry — Credits 01

Course Contents:

General introduction to pesticides (natural and synthetic), benefits and adverse effects, changing concepts of pesticides, structure activity relationship, synthesis and technical manufacture and uses of representative pesticides in the following classes: Organochlorines (DDT, Gammexene,);

Downloaded from Vidyasagar University by 103.77.136.236 on 06 December 2021 : 14:34:31; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Chemistry_General.pdf

Organophosphates (Malathion, Parathion); Carbamates (Carbofuran and carbaryl); Quinones (Chloranil), Anilides (Alachlor and Butachlor).

SEC4P: Practical **Credit 01**

1 To calculate acidity/alkalinity in given sample of pesticide formulations as per BIS specifications.
2 Preparation of simple organophosphates, phosphonates and thiophosphates

Suggested Readings:

- Cremlyn, R. *Pesticides. Preparation and Modes of Action*, John Wiley & Sons, New York, 1978.

Or

SEC- 4: Fuel Chemistry Credits 02

SEC4T: Fuel Chemistry

Course Contents:

Introduction: Review of energy sources (renewable and non-renewable). Classification of fuels and their calorific value.

Coal: Uses of coal (fuel and nonfuel) in various industries, its composition, carbonization of coal. Coal gas, producer gas and water gas—composition and uses. Fractionation of coal tar, uses of coal tar bases chemicals, requisites of a good metallurgical coke, Coal gasification (Hydro gasification and Catalytic gasification), Coal liquefaction and Solvent Refining. **Petroleum and Petrochemical Industry:** Composition of crude petroleum, Refining and different types of petroleum products and their applications. Fractional Distillation (Principle and process), Cracking (Thermal and catalytic cracking), Reforming Petroleum and non-petroleum fuels (LPG, CNG, LNG, bio-gas, fuels derived from biomass), fuel from waste, synthetic fuels (gaseous and liquids), clean fuels. **Petrochemicals:** Vinyl acetate, Propylene oxide, Isoprene, Butadiene, Toluene and its derivatives Xylene. **Lubricants:** Classification of lubricants, lubricating oils (conducting and non-conducting), Solid and semisolid lubricants, synthetic lubricants. Properties of lubricants (viscosity index, cloud point, pore point) and their determination.

Suggested Readings:

- Stocchi, E. *Industrial Chemistry*, Vol-I, Ellis Horwood Ltd. UK (1990).
- Jain, P.C. & Jain, M. *Engineering Chemistry* Dhanpat Rai & Sons, Delhi.
- Sharma, B.K. & Gaur, H. *Industrial Chemistry*, Goel Publishing House, Meerut (1996).

Curriculum for B.Sc. Honours in Nutrition [Choice Based Credit System]

Semester-I

Sl.No.	Name of the Subject	Nature	Code	Teaching Scheme in hour per week			Credit	Marks
				L	T	P		
C1	**C1T:** Basic Nutrition (Theory)	Core Course-1		4	0	0	6	75
	C1P: Basic Nutrition (Practical)	Core Course1 [Practical]		0	0	4		
C2	**C2T:** Food Science and Food Commodity (Theory)	Core Course-2		4	0	0	6	75
	C2P: Nutritional Biochemistry (Practical)	Core Course-2 [Practical]		0	0	4		
GE-1	GE-1	GE					4/5	75
	GE-1	GE					2/1	
AECC	English	AECC					2	50
				Total Credits =20				

L= Lecture, T= Tutorial, P=Practical

AECC- Ability Enhancement Compulsory Course: English /Modern Indian Language

Interdisciplinary/Generic Elective (GE) from other Department

[**Four papers are to be taken and each paper will be of 6 credits**]: Papers are to be taken from any of the following discipline: **Chemistry/Physiology/Botany /Zoology/Computer Sc/Microbiology/Bio-Technology/Mathematics/Statistics**

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

Semester-1

Core Courses

CC-1 : Basic Nutrition **Credits 06**

C1 T1: Basic Nutrition (Theory) **Credits 04**

1. Concept and definition of terms Nutrition, Malnutrition and Health: Brief history of nutritional science. Scope of nutrition.

2. Minimum Nutritional Requirements and RDA : Formulation of RDA and Dietary Guidelines: Reference Man and Reference Woman.

3. Body Composition and Changes through the life cycle.

4. Energy in Human Nutrition: Idea of energy and its unit, energy balance, Assessment of energy requirements, Deficiency and Excess, Determination of energy in food, B.M.R & influencing factors, S.D.A.

5. Energy and other nutritional requirement of adult male and female engaged in different types of work (Sedentary, moderate, heavy).

6. Food as source of nutrients, function of food, definition of nutrition, nutrients and energy, adequate, optimum and good nutrition, malnutrition.

7. Nutrition- Fitness, Athletics and sports.

8. Food Guide- Basic food groups, How to use food guide (according to RDA).

9. Interrelationship between nutrition and health- Visible symptoms of goods health.

10. Function of nutrients- Carbohydrate, dietary fibre, protein, fat, vitamins, minerals, anti-oxidants, water.

11. Effect of cooking and heat processing on the nutritive value of foods.

12. Processed supplementary foods

13. Food sanitation in hygiene.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

C1 P1: Basic Nutrition (Practical) Credits 02

1. Use and care of kitchen equipment.

2. Weights and measures standards; household measures of raw and cooked foods.
3. Food preparation and classifying recipes as good, moderate or poor, sources of specific nutrients, Amount of ingredients to be in standard recipe-

a) Portion size
b) Beverages: tea, coffee, cocoa, fruit juice, milk, milkshakes.
c) Cereals and flour mixtures- basic preparation and there nutritive value- Boiled rice and rice pulao, chapatti, parantha, sandwiches, pastas, pancakes, cookies and cakes.

4. Vegetables and fruits: Simple salad, dry vegetables, curries, fruits preparation using fresh and dried stewed fruit, fruit salad.

5. Milk and milk products: Porridges, curds, anner and their commonly made preparations, milk based simple desserts and puddings, custard, kheer, ice-cream.

6. Meat- Cut of meats Meat preparations, Fish, poultry, hard and soft cooked, poached, scrambled, fried omelette, eggnogs.

7. Soups: Basic, clear and cream soups.
8. Snacks: pakoras, cheese toast, upma, poha, peanut, chikki, ti and laddo

Core Course -2

CC-2 : Food Science and food commodity Credits 06

C2 T2: Food Science and food commodity Credits 04

1. Basic concept on Food, Nutrients, Nutrition.

2. Classification of Food, Classification of Nutrients.

3. Carbohydrates - Definition, Classification, Structure and properties. Monosaccharides - glucose, fructose, galactose. Disaccharides - Maltose, lactose, sucrose. Polysaccharides - Dextrin, starch, glycogen, resistance starch.

4. Lipids - Definition, Classification & Properties. Fatty acids - composition, properties, types.

5. Proteins - Definition, Classification, Structure & properties.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

Amino acids - Classification, types, functions.

6. Carbohydrates - Sources, daily requirements, functions. Effects of too high - too low carbohydrates on health. Digestion & Absorption. Blood glucose and effect of different carbohydrates on blood glucose. Glycemic Index. Functional role of Sugars in food, Fermention of Sugar.

7. Proteins - Sources, daily requirements, functions. Effect of too high - too low proteins on health. Digestion & absorption. Assessment of Protein quality (BV, PER, NPU). Factors affecting protein bio-availability including anti-nutritional factors.

8. Lipids - Sources, daily requirements, functions. Digestion & Absorption. Role & nutritional significances of PUFA, MUFA, SFA, W-3 fatty acid.

9. Dietary Fibre - Classification, sources, composition, properties & nutritional significance.

10. Minerals & Trace Elements, Bio-Chemical and Physiological Role, bio-availability & requirements, sources, deficiency & excess (Calcium, Sodium, Potassium Phosphorus, Iron, Fluoride, Zinc, Selenium, Iodine, Chromium).

11. Vitamins - Bio-Chemical and Physiological Role Physiological role, bio-availability and requirements, sources, deficiency & excess.

12. Water - Functions, daily requirements, Water balance.

13. Sensory characteristics of food

14 Food behaviour, modification of food behaviour

15. Cereals and Millets: Cereal products, breakfast cereals, fast foods. Structure, processing, storage, use in various preparations, variety, selection and cost.

16. Pulses and Legumes: Production (in brief), structures, selection and variety. Storage, processing and use in different preparations. Nutritional aspects and cost.

17. Milk and Milk-products: Composition, classification, selection quality and cost, processing, storage and uses in different preparations. Nutritional aspects, shelf - life and spoilage.

18. Eggs: Production, grade, quality, selection, storage and spoilage, cost, nutritional aspects and use in different preparations.

19. Meat, Fish and Poultry: Types, selection, purchase, storage, uses, cost, spoilage of fish poultry and meat, uses and preparations.

20. Vegetables and Fruits: Types, selection, purchase, storage, availability. Cost of use and nutritional aspects of raw & processed products and use in different preparations.

21. Sugar and Sugar products: Types of natural sweeteners, manufacture, selection, storage and use as preserver, stages in sugar cookery.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

22. Fats and Oils: Types and sources (animal and vegetable), processing, uses in different preparations, storage, cost and nutritional aspects.

23. Raising and Leavening agents: Types, Constituents, Uses in cookery and bakery, Storage.

24. Food Adjuncts: Spices, Condiments, Herbs, Extracts, Concentrates, Essences, Food Colours. Origin, classification, Description, uses, Specifications, procurements and Storage.

25. Convenience Foods: Role, types, advantages, uses, cost and contribution to diet.

26. Salt: Types and uses.

27. Beverages: Tea; Coffee. Chocolate and Cocoa Powder-Processing, cost and nutritional aspects, other beverages-Aerated beverages, juices.

28. Preserved Products : Jams, Jellies, Pickles, Squashes, Syrups types, composition and manufacture, selection, cost, storage, uses and nutritional aspects.

29. Food Standards : ISI, Agmark, FPO, MPO, PFA.

30. New food: fast food, junk food, GM food, Free food

31. Food, preservation, food processing, food adulteration and food storage.

C2 P2: Nutritional Biochemistry (Practical) Credits 02

1. **Carbohydrate**

a. Reactions of Mono, Di and Polysaccharides and their identification in unknown mixtures.
b. Estimation of reducing and total sugars in foods.
c. Estimation of lactose in milk.

2. **Fats**

a. Reactions of fats and oils
b. Determination of Acid value, Saponification of natural fats and oils.

3. **Proteins**

a. Reactions of proteins in foods
b. Reaction of amino acids and their identification in unknown mixtures
c. Estimation of total nitrogen of foods by Kjeldhal method.

Generic Elective

GE-1 [Interdisciplinary for other department]

GE-1 : BASIC HUMAN NUTRITION Credits 06

GE-1 T: BASIC HUMAN NUTRITION

(Credits: 6)

1. Concept and definition of terms-Nutrition, Malnutrition and Health. Brief history of nutrition science. Scope of Nutrition.

2. Body Composition and Changes through the life cycle.

3. Minimum Nutritional Requirement and RDA. Reference Man and Reference Woman.

3. Energy in Human Nutrition : Idea of Energy and its unit, Energy Balance, Assessment of Energy Requirements of the body, B.M.R & influencing factors, S.D.A, Calorific value of food, Determination of Energy in food.
4. Food groups.

5. Function of nutrients- Carbohydrate, dietary fibre, protein, fat, vitamins, minerals, anti-oxidants, water.

6. Effect of cooking and heat processing on the nutritive value of foods.

L= Lecture, T= Tutorial, P=Practical

AECC- Ability Enhancement Compulsory Course: Environmental Studies.

Interdisciplinary/Generic Elective (GE) from other Department

[**Four papers are to be taken and each paper will be of 6 credits**]: Papers are to be taken from any of the following discipline: **Chemistry/Physiology/Botany /Zoology**

/Computer Sc/Microbiology/Bio-Technology/Mathematics/Statistics

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

Semester-2

Core Courses

Core -3

CC-3 Nutritional Biophysics and biochemistry Credits 06

C3T Nutritional Biophysics and biochemistry Credits 04

1. Biochemistry: Definition, objectives, scope and interrelationship between biochemistry and other biological science.
2. Biophysics- general idea of biophysics in nutrition
3. Basic process and nutritional importances of Diffusion,Osmosis, Absorption, Viscosity, Surface tension, Colloids.
4. Principles of Thermodynamics and its importance in nutrition.
5. Acid, Base, Buffer, pH and Acid-Base balance.
6. Molecular aspects of transport; Passive diffusion, facilitated diffusion, active transport.
7. Enzymes: Definition, types and classification of enzymes, definition and types of coenzymes. specificity of enzymes, Isozymes, enzyme Kinetics including factors affecting enzyme action, velocity of enzyme catalyzed reactions, enzyme inhibition.
8. Intermediary metabolism:
   a) Carbohydrate Metabolism, Glycolysis, TCA cycle & energy generation, gluconeogenesis, glycogenesis, glycogenolysis, blood sugar regulation.
   b) Lipids : Oxidation and biosynthesis of fatty acids (saturated &mono-unsaturated) : Synthesis and utilization of ketone bodies, Ketosis, fatty livers.
   c) Proteins : General reaction of amino acid metabolism, urea cycle.
9. Lipoproteins : Types, composition, role and significance in disease (in brief)
10. Introduction to Nucleic acids: Structure, replication, transcription, genetic code (in brief) elementary knowledge of biosynthesis of proteins.
11. Fluid, Electrolytes and Acid-Base balance brief.

C3P Nutritional Biophysics and biochemistry(Practicals) Credits 02

1. To study the general properties of urease amd salivary amylase.
2. Preparation of buffer of particular PH (Phosphate buffer, tris buffer)
3. Determination of strength of $KMNO_4$ using primary standard (oxalic acid).
4. Electrophoresis
5. Dialysis

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

Core -4

CC-4: HUMAN PHYSIOLOGY **Credits 06**

C4T: HUMAN PHYSIOLOGY **Credits 04**

1. Cell structure and function
2. Blood cells: Haemoglobin, Blood groups, Coagulation factors, Anaemia.
3. Skeletal System: bones, joints and bone deformities in brief.
4. Cardiovascular System: Cardiac cycle, Cardiac output, Blood pressure, Hypertension, Radial Pulse
5. Lymphatic System: Lymph glands and its function, Splen- Structure and functions.
6. Respiratory System:- Ventilation, functions, Lungs volume and capacities.
7. Gastrointestinal System: a. Structure of various parts of the GI tract b. Digestion and absorption of Carbohydrate, protein and fat. (Digestion and absorption of Carbohydrate, protein and fat repeated in CC2T 6, 7, 8)
8. Endocrinology: List of endocrine glands, Hormonestheir secretion and function (in brief)
9. Excretory System: Structure of Nephron, formation of urine.
10. Central Nervous System: Parts, Sliding filament theory, neuromuscular junction, wallerian egeneration, Motor Nervous System- Upper motor Nervous System and lower motor Nervous System. Sensory Nervous System, Sympathetic and Parasympathetic nervous system.
11. Skin: Structure and function of skin
12. Reproductive System: a. Structure and functions of male and female reproductive organs, Menstrual cycle, Puberty, Menopause, fertilization and development of fertilized ovum, placenta and its function.
13. Special senses: Structure and function of eye and ear, common diseases in eye and ear (in brief).

C4 P: HUMAN PHYSIOLOGY (Practicals) **Credits 02**

1. Identification of prepared Slides:
(a) Lungs, (b) Supra Renal Gland, (c) Thyroid, (d) Pituitary (e) Testis, (f) Ovary, (g) Kidney, (h) Liver, (i) Pancreas, G) Small Intestine, (k) Large Intestine, (1) Spinal cord, (m) Cerebellum.
2. Preparation of blood film and identification of white blood cells, Differential count.
3. Estimation of Haemoglobin.
4. Determination of Bleeding time and clotting time of blood, Blood grouping.
5. Measurement of Blood pressure and Pulse Rate.
6. Elicitation of Reflexes and jerks.
7. Estimation of haemoglobin, RBC, WBC, TLC, DLC and ESR.

Generic Elective

GE-2 [Interdisciplinary for other department]

GE-2 : FOOD SCIENCE **Credits : 06**

GE-2 T : FOOD SCIENCE

1. Cereals and Millets: Cereal products, breakfast cereals, fast foods. Structure, processing, storage, use in various preparations, variety, selection and cost.
2. Pulses and Legumes: Production (in brief), structures, selection and variety. Storage, processing and use in different preparations. Nutritional aspects and cost.
3. Milk and Milk-products: Composition, classification, selection quality and cost, processing, storage and uses in different preparations. Nutritional aspects, shelf - life and spoilage.
4. Eggs: Production, grade, quality, selection, storage and spoilage, cost, nutritional aspects and use in different preparations.
5. Meat, Fish and Poultry: Types, selection, purchase, storage, uses, cost, spoilage of fish poultry and meat, uses and preparations.
6. Vegetables and Fruits: Types, selection, purchase, storage, availability. Cost of use and nutritional aspects of raw & processed products and use in different preparations.
7. Sugar and Sugar products: Types of natural sweeteners, manufacture, selection, storage and use as preserver, stages in sugar cookery.
8. Fats and Oils: Types and sources (animal and vegetable), processing, uses in different preparations, storage, cost and nutritional aspects.
9. Raising and Leavening agents: Types, Constituents, Uses in cookery and bakery, Storage.
10. Food Adjuncts: Spices, Condiments, Herbs, Extracts, Concentrates, Essences, Food Colours. Origin, classification, Description, uses, Specifications, procurements and Storage.
11. Convenience Foods: Role, types, advantages, uses, cost and contribution to diet.
12. Salt : Types and uses.

L=Lecture, **T=** Tutorial, **P**=Practical, **CC =** Core Course, **GE**= Generic Elective, **SEC** = Skill Enhancement Course, **TBD =** to be decided

Generic Elective (GE)(Interdisciplinary) from other Department [**Four papers are to be taken and each paper will be of 6 credits**]:

Papers are to be taken from any of the following discipline:

Chemistry/Physiology/Botany /Zoology/Computer Sc/Microbiology/Bio-Technology/ Mathematics/Statistics

Modalities of selection of Generic Electives (GE): A student shall have to choose **04** Generic Elective (GE1 to GE4) strictly from **02** subjects / disciplines of choice taking exactly **02** courses from each subjects of disciplines. Such a student shall have to study the curriculum of Generic Elective (GE) of a subject or discipline specified for the relevant semester.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

Semester-III
Core Course (CC)

CC-5: Family meal management and meal planning **Credits 06**

CC5T: Family meal management and meal planning **Credits 04**

Course Contents:

1. Nutrition during Pregnancy: Physiology of pregnancy, factors (nonnutritional) affecting pregnancy outcome, importance of adequate weight gain during pregnancy, antenatal care and its schedule, Nutritional requirements during pregnancy and modification of existing diet and supplementation, nutritional factors affecting breast feeding. Deficiency of nutrients and impact- energy, iron, folic acid, protein, calcium, iodine. Common problems of pregnancy and their managements- nausea, vomiting, pica, food aversions, pregnancy induced hypertension, obesity, diabetes and Adolescent Pregnancy.
2. Nutrition during Lactation: Physiology of Lactation: Nutritional requirements during lactation, dietary management, food supplements, galactogogues, preparation for lactation. Care and preparation of nipples during breast feeding.
3. Nutrition during infancy: Infant physiology relevant to feeding and care. Breast feeding - colostrums, its composition and importance in feeding. Initiation of breast-feeding and duration of breast-feeding, Advantages of exclusive breast-feeding, Nutritional and other advantages of breast-feeding. Introduction of complementary foods, initiation of management of weaning, breast feeding etc. Bottlefeeding circumstances under which bottle-feeding is to be given. Careand sterilization of bottles. Preparation of formula. Mixed feeding, breast feeding and artificial feeding. Teething and management of problems.
4. Nutrition to toddlers / preschool/school going children or adolescent.
5. Management of preterm and low birth weight children – their special needs.
6. Growth and development from infancy to adulthood: Importance of nutrition for ensuring adequate development, Preventions of growth faltering. Growth assessment by Height, Weight, BMI, Skin fold thickness, Waist Hip Ratio.
7. Geriatric nutrition – Dietary requirement, Geriatric health problems, Nutritional care.
8. Sports Nutrition- nutritional demand on different sports and dietary recommendations.
9. Space Nutrition- Body composition changes in space, special diet in space persons.
10. Meal planning for the family
11. Indian meal pattern- vegetarian and non- vegetarian
12. Food faddism and the faulty food habits
13. Nutritive value of common Indian recepies.

C5P: Family meal management and meal planning (practical) **Credits 02**

1. Planning and preparation of balanced diet for a pregnant women
2. Diet during complication of pregnancy
3. Planning and preparation of balanced diet for a lactating women
4. Preparation of weaning food
5. Planning and preparation of balanced diet for a pre-school children
6. Planning and preparation of balanced diet for school going child. Preparation of packed lunch
7. Planning and preparation of balanced diet for adolescents

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

8. Planning and preparation of balanced diet for adult men and women of different Physical activity and economic status.
9. Planning and preparation of balanced diet for senior citizen.

CC-6: COMMUNITY NUTRITION AND NUTRITIONAL EPIDEMIOLOGY

Credit 06

C6T: Community Nutrition and Nutritional Epidemiology Credit 04

Course Contents:

1. Concept of community, types of community, factors affecting health of Community.
2. Nutritional Anthropometry, Biochemical tests and Biophysical methodology - Merits, Limitations
3. Diet Survey: Need and importance, methods of dietary survey- Merits and Limitations. Family food security.
4. Clinical Signs: Merits, Limitations, Need and importance, identifying signs of PEM, vitamin A deficiency,Vit.–D deficiency and iodine deficiency, Classify clinical sign according to WHO.
5. Nutritional problem in the community
6. National Nutritional Intervention Programme to combat malnutrition
7. Food availability, factors affective food availability and its consumption.
8. Infection and Immunization:Importance and Schedule of Vaccination of Children, Adult andforeign travelers. Full and partial immunization. Role of community for universal vaccination implementation
9. Principles of Epidemiology: Concept of disease, rate of a disease in a population (attack rate, morbidity rate, mortality rate, incidence and prevalence rate).
10. Dietary Exposure-National, Household, Institution and Individual level (NHFS and NNMB)
11. Biomarkers and nutrient intakes.
12. Epidemiological methods: descriptive studies, analytical studies and experimental studies.
13. Study of the epidemiologic approach – time, place, person distribution. Determinants of disease. Vital statistics and their significance.
14. Demography- Demography cycle and its applications. Socio-demographic and psychosocial variables.
15. Public health hazards from contaminated foods
16. Comparison with norms, standards, Z-scores.
17. Interpretation of the nutritional assessment data and its significance
18. Determining Validity and Reliability
19. Sources of errors for different methods of measurement relating to nutritional exposures.
20. Malnutrition and Infection vicious cycle-UNICEF conceptual model of Malnutrition.

C6P: Community Nutrition and Nutritional Epidemiology (Practical) Credit 02

1. Diet and nutrition surveys
   a. Identification of vulnerable and risk groups
   b. Diet survey for breast feeding and weaning practices of specific groups

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

c. Use of anthropometric measurement of children and adolescent girls and boys
2. Preparation of visual aids to highlight community nutrition, nutritional awareness, nutritional surveillance.
3. Field visit to-
   a. Observe the working of nutrition and health oriented programmes (survey based result).
   b. Hospitals to observe nutritional deficiencies.

CC-7: Basic Dietetics **Credits 06**

C7T: Basic Dietetics **Credits 04**

1. Role of dietician: The hospital and community
2. Basic Concepts of diet therapy
3. Principle of diet therapy and therapeutic nutrition for changing needs
4. Routine Hospital Diets: Regular, light, soft, fluid, parenteral and eternal feeding
5. Diets for febrile conditions, infections and surgical conditions.
6. Diet for gastro-intestinal disorders- Constipation, diarrhoea, peptic ulcer
7. Diet for Renal Diseases- Nephritis, Nephrotic syndrome, Renal failure.
8. Diet for obesity and different cardiovascular disorders
9. Diet for diabetes mellitus
10. Nutrition in cancer
11. Nutrition in Immune system dysfunction (AIDS &Allergy)
12. Nutrition support in metabolic disorder
13. Nutrition in burn and surgery
14. Nutrition- Addictive behaviour in anorexia nervosa, bulimia and alcoholism
15. Nutrient Drug interaction
16. Feeding infants and children's- problems in feeding children in hospital
17. Nutrition and diet clinics- Nutrition education in general, Patients check-up and dietary counselling, educating the patient and follow up.

C7P: Basic Dietetics (Practical) **Credits 02**

1. Planning and preparation of normal diets.
2. Planning and preparation of fluid diets.
3. Planning and preparation of soft/semi solid diets.
4. Planning and preparation of high and low calorie diets.
5. Planning and preparation of diets for diabetes mellitus
6. Planning and preparation of diet for hypertension and atherosclerosis
7. Planning the preparation of diets for nephritis and nephrotic syndrome
8. Planning and preparation of diets for Peptic Ulcers.
9. Low and medium cost diets for PEM, anaemia and vitamin A deficiency

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University

Skill Enhancement Course (SEC)

SEC-1: IMMUNOLOGY, TOXICOLOGY AND PUBLIC HEALTH Credits 02

SEC1T: Immunology, Toxicology and Public Health

Theory:

1. Immunology:
• Basic concept of immunity, Types of immunity-innate, acquired, active and passive immunity.

2. Humoral immune system:
• Mechanisms of humoral immunity, Immunoglobulin isotypes- IgG, IgM, IgA, IgD, and IgE.

3. Cell mediated immune system:
• Types of effector T cells, mechanisms of cell mediated immunity.

4. Toxic agents:
• Human exposure, mechanism of action and resultant toxicities of the following xenobiotics: Metals: lead, arsenic Pesticides: organophosphates, carbamates, organochlorine.

5. Eco-toxicology:
• Brief introduction to avian and aquatic toxicology, movement and effect of toxic compounds in food chain (DDT, mercury), bioaccumulation, biomagnifications, concept of BOD and COD.

Suggested Reading:

1. Immunology, 8th edition, (2012), Male, D., Brostoff, J., Roth, D.B. and Roitt, I., Elseivier-Sauders.
2. An Introduction to Immunology, Immunochemistry and Immunobiology, 5th edition, (1988), Barrett, James T., Mosby Company, St. Louis.
3. Immunology: An Introduction, 4th edition, (1994), Tizard, I.R., Saunders College Publishing, Philadelphia.
4. Cassarett and Doull's "Essentials of Toxicology" 2nd edition (2010), Klaassen and Whatkins, McGraw Hill Publisher.
5. Introduction to Toxicology, 3rd edition (2001), John Timbrell, Taylor and Francis Publishers..
6. Principles of Toxicology, 2nd edition (2006), Stine Karen and Thomas M Brown, CRC press.
7. Lu's basic toxicology: Fundamentals target organ and risk assessment, 5th edition (2009), Frank C Lu and Sam Kacow, Informa Health care.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons.pdf

OR

SEC 1: BIOSTATISTICS AND BIOINFORMATICS **Credits 02**

SEC1T: Biostatistics and Bioinformatics

Theory:

1. Data and Data Types: Primary data and Secondary Data.
2. Measures of Central Tendency: Mean, Median, Mode.
3. Dispersion: Range, Standard Deviation.
4. Hypothesis Testing: Chi-square Test, Student‘t’ test, Analysis of Variance (ANOVA).
5. Bioinformatics and Health Informatics: Concept and applications.
6. Nucleic acid and Protein Data Bases, Nutrient data bases.
7. Sequence similarity searching by BLAST, Principle, features and types of BLAST, Significance of Multiple Sequence Alignments, Phylogenetic Tree.

Suggested Readings :

1. Saxena Sanjay (2003) A First Course in Computers, Vikas Publishing House.
2. Pradeep and Sinha Preeti (2007) Foundations of Computing, 4th ed., BPB Publications.
3. Lesk M.A. (2008) Introduction to Bioinformatics. Oxford Publication, 3rd International Student Edition.
4. Rastogi S.C., Mendiratta N. and Rastogi P. (2007) Bioinformatics: methods and applications, genomics, proteomics and drug discovery, 2nd ed. Prentice Hall India Publication.
5. Primrose and Twyman (2003) Principles of Genome Analysis & Genomics. Blackwell.
6. Debjyoti Das (2012). Biostatistics. Academic Publishers
7. E. Batschelet : Introduction to Mathematics for Life Scientists,Springer Verlag, International Student Edition, Narosa Publishing House, New Delhi (1971, 1975).
8. A. Edmondson and D. Druce : Advanced Biology Statistics, Oxford University Press; 1996.
9. W. Danial : Biostatistics : A foundation for Analysis in Health Sciences, John Wiley and Sons Inc; 2004.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:17:37; Copyright : Vidyasagar University

Generic Elective Syllabus
GE-3 [Interdisciplinary for other department]

GE-3: Community Nutrition and Nutritional Programme **Credits 06**

GE3T: Community Nutrition and Nutritional Programme

Community Nutrition and Nutritional Programme:

1. Concept of community, types of community, factors affecting health of Community.
2. Basic concept of Nutritional Programme Formulation.
3. ICDS Programme – Aims, Objectives, Target group, Services provided, Advantages, Limitation, Suggestion for improvement.
4. MDMP – Aims, Objectives, Target group, Service provided, Advantages, Limitation, Suggestion for improvement.
5. ANP, SNP, CNP, BFP – Aims and Objectives, Target group, Service provided, Advantages, Limitation.
6. PHC and Public distribution system to combat malnutrition
7. Identifying signs and symptoms of vitamin A deficiency, Vit.–D deficiency, iodine and iron deficiency, and role of prophylaxis programme to overcome such deficiencies.
8. Nutritional Anthropometry, Biochemical tests and Biophysical methodology - Merits, Limitations
9. Diet Survey: Need and importance, methods of dietary survey- Merits and Limitations. Family food security.
10. Concept of Surveillance Systems: Role of international, national, regionalagencies and organizations.
11. Nutritional problem in the community : Epidemiology, etiology and prevention of Marasmus, Kworshiorkar, Scurvy, Ricket, Osteomalacia, Obesity.
12. Importance of dietitian in community

Nutrition in specific pathophysiological conditions:

1. Hospital diets- liquid, clear fluid, soft & normal diets.
2. Diet therapy in diabetes mellitus and obesity.
3. Dietary management and nutritional factors involved in cardiovascular disease like atherosclerosis,hyperlipidemia, hypertension.
4. Diet therapy in peptic ulcer, gastritis, diarrhea, colitis, constipation, flatulence and jaundice.
5. Diet during febrile condition, infection, surgical condition, nephritis, and nutritional anemia.
6. Therapeutic uses of dietary fibers with special reference to chronic constipation, diverticular disease, irritable bone syndrome, obesity and diabetes, possible adverse effects of dietary fibers.
7. Rehydration therapy- Elementary idea about rehydration, Conditions for rehydration. Different types of rehydration therapy with special emphasis on ORS -its types and importance, Age dependent ORS quantity for rehydration therapy.
8. Nutrition and Infection:Infection, a cause of malnutrition and vice-versa. Nutrition and immunity during childhood and in adult.

Vidyasagar University

Curriculum for B.Sc (Honours) in Nutrition

[Choice Based Credit System]

Semester-IV

Course	Course Code	Name of the Subjects	Course Type/ Nature	Teaching Scheme in hour per week			Credit	Marks
				L	T	P		
CC-8		**C8T:** Diet and Diseases	Core Course - 8	4	0	0	6	75
		C8P: Practical		0	0	4		
CC-9		**C9T:** Food Microbiology	Core Course - 9	4	0	0	6	75
		C9P: Practical		0	0	4		
CC-10		**C10T:** Food processing and Preservation	Core Course - 10	4	0	0	6	75
		C10P: Practical		0	0	4		
GE-4	TBD		Generic Elective-4				4/5	75
							2/1	
SEC-2		Basic Molecular Biology **Or** Nutrition and Fitness **Or** Entrepreneurship Development **Or** Women Health & Nutrition	Skill Enhancement Course-2	1	1	0	2	50
Semester Total							**26**	**350**

L=Lecture, **T=** Tutorial, **P=**Practical, **CC =** Core Course, **GE**= Generic Elective, **SEC** = Skill Enhancement Course, **TBD =** to be decided

Generic Elective (GE)(Interdisciplinary) from other Department: Papers are to be taken from any of the following discipline: **Chemistry/Physiology/Botany /Zoology/Computer Sc/Microbiology/Bio-Technology/ Mathematics/Statistics**

Modalities of selection of Generic Electives (GE): A student shall have to choose **04** Generic Elective (GE1 to GE4) strictly from **02** subjects / disciplines of choice taking exactly **02** courses from each subjects of disciplines. Such a student shall have to study the curriculum of Generic Elective (GE) of a subject or discipline specified for the relevant semester.

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

Core Course (CC)

CC-8: Diet and Diseases — Credits 06

C8T: Diet and Diseases — Credits 04

Course Contents:

1. Inborn error of metabolism – Lactose Intolerance, Galactosamia, Phenylketonuria and its dietary management.

2. Etiology, symptoms, diagnostic tests and dietary management of intestinal diseases: Diarrhea, Steatorrhoea, Diverticular disease, Inflammatorybowel disease, Ulcerative Colitis, Flatulence, Constipation, Irritable Bowel Syndrome, Haemorrhoids.

3. Etiology, symptoms, diagnostic tests and dietary management of Malabsorption syndrome, Celiacsprue, tropical sprue, Intestinal brushborder deficiencies (Acquired disaccharide intolerance), Protein losingenteropathy. RUTF.

4. Disease of the liver, Exocrine Pancreas and Biliary System. Liver function tests, application of diet therapy and nutritional care in liver disease. Dietary care and management in Viral Hepatitis, Cirrhosis of liver, Wilson's diseases. Dietary care and management in diseases of Gall Bladder and Pancreas Cholelithiasis, Cholecystitis, Cholecystectomy,Pancreatitis.

5. Anaemias: Pathogenesis and dietary management - Nutritional Anaemias, Sickle Cell Anaemias, Thalassemia, Anaemia resulting from Acute Haemorrhage.

6. Arthritis and gout: Etiology, symptoms, diagnostic tests and dietary management.

C8P: Diet and Diseases (Practical) — Credits 02

Practical:

1. Planning and preparation of diet for diarrhoea patient.
2. Planning and preparation of diet for Steatorrhoea patient.
3. Planning and preparation of diet for Diverticular disease patient.
4. Planning and preparation of diet for Ulcerative Colitis patient.
5. Planning and preparation of diet for Flatulence patient.
6. Planning and preparation of diet for Constipation patient.
7. Planning and preparation of diet for IrritableBowel Syndrome patient.
8. Planning and preparation of diet for Haemorrhoids patient.
9. Planning and preparation of diet for Celiac sprue patient.

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

10. Planning and preparation of diet forViral Hepatitis patient.
11. Planning and preparation of diet for Cirrhosis ofliver patient.
12. Planning and preparation of diet for Cholelithiasis patient.
13. Planning and preparation of diet for Pancreatitis patient.
14. Planning and preparation of diet for Anaemia patient.
15. Planning and preparation of diet for Thalassemia patient.

CC-9: Food Microbiology — Credits 06

C9T: Food Microbiology — Credits 04

Course Contents:

1. Introduction to microbiology and its relevance to everyday life. General characteristics of bacteria, fungi, virus, protozoa and algae.
2. Cultivation of microorganisms: Nutritional requirements of microorganisms, types of media used, methods of isolation.
3. Growth of microorganisms: Growth curve, effect of environmental factors in growth of microorganism – pH, water activity, oxygen availability, temperature and others.
4. Primary sources of microorganisms in foods, physical and chemical methods used in destruction of micro organisms in foods - sterilisation and disinfection.
5. Food Spoilage: Contamination of micro organisms in the spoilage of different kinds of foods, such as cereal and cereal products, vegetable and fruits, fish and other sea foods, meat and meat products, eggs and poultry, milk and milk products, canned foods.
6. Assessing the microbiological quality of food: indicator organisms, microbiological standards, principles of GMP & HACCP in food processing. Safety management at household and industrial level.
7. Foodborne infections: Bacterial food infections-Salmonellosis, Shigellosis and Listeriosis. Food poisoning (Staphylococcal and Botulism) - Symptoms, mode of transmission and methods of prevention, Concept of aflatoxin intoxication.
8. Beneficial effect of microorganisms-concept of probiotics and related factors
9. Environmental microbiology: Water and water borne diseases, air and air borne diseases, soil and soil borne diseases, sewage and diseases.
10. Waste product handling: Planning for waste disposal- solid wastes and liquid wastes.
11. Fermented Foods- Dietary different fermented products, importance of fermented foods.

C9P: Food Microbiology (Practical) — Credits 02

Practical:

1. Study of equipments in a microbiology lab.
2. Preparation of different culture media.
3. Staining of bacteria with gram staining.
4. Microbiological examination of milk (Methylene blue reduction test).

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

5. Preparation of traditional Indian fermented food and its quality checking e.g. testing of physical, chemical and nutritional properties.

CC-10: Food processing and Preservation Credits 06

C10T: Food processing and Preservation Credits 04

Course Contents:

1. Significance, principles of different methods of food processing: thermal processing-Cooking (moist heat, dry heat, combination method of cooking), blanching, pasteurization, sterilization, canning.
2. Principles of microwave cooking and solar cooking.
3. Principle of freezing, changes occurring during freezing. Types of freezing - slow freezing, quick freezing. Food preservation by drying and dehydration, differences between sun drying and dehydration (i.e. mechanical drying), types of driers used in the food industry.
4. Preservation by Irradiation: Units of radiation, kinds of ionizing radiations used in food irradiation. Mechanism of action, concept of cold sterilization.
5. Principle and methods of making pickles, jam and jellies from different vegetables / fruits.
6. Principle and methods of preparation of food from cereals.
7. Principle and methods of preparation of meat, fish, poultry and egg products.

C10P: Food processing and Preservation (Practical) Credits 02

Practical:

A:

1. **Milk cookery**: Experimental milk cookery. Preparation of selected common recipes.
2. **Egg cookery:** Experimental cookery on eggs-boiled eggs, poached eggs, Omelettes and custards. Preparation of selected common recipes.
3. **Vegetables Cookery:** a. Different methods of cooking vegetables – effect of shredding, dicing, acid and alkali, pressure cooking, steaming with and without lid. e.g. Potato, beetroot, carrot and greens. Recipes with Vegetables
4. **Fruits**: Prevention of browning on fruits. Preparation of selected common recipes.
5. Estimation of Sodium, Potassium, Calcium and Iron in different food staffs.
6. Estimation of vitamin C content of food by biochemical method.

B:

Visit to a food processing industry.

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University

Skill Enhancement Course (SEC)

SEC-2: Basic Molecular Biology **Credits 02**

SEC2T: Basic Molecular Biology

Course Contents:

1. Nucleic acid: Bases, nucleosides and nucleotides.
2. DNA structure: DNA double helix (Watson and Crick Model). Types of DNA and RNA, DNA and RNA as genetic material.
3. DNA replication: Semi-conservative replication, Basic mechanism of replication (Prokaryotes / Eukaryotes).
4. Transcriptional unit and basic concept of transcription (Prokaryotes / Eukaryotes).
5. Genetic code and basic mechanism of translation (Prokaryotes / Eukaryotes).
6. Basic concept of genomics, proteomics and metabolomics.

Suggested readings

1. Bolandar, M. (2001). Molecular Endocrinology. Elsevier Science.
2. Alberts, B. et al. (2008). Molecular Biology of the Cell. 5th Ed. Garland Publishing House.
3. Yoshinori Mine (Editor), Kazuo Miyashita (Editor), Fereidoon Shahidi (Editor): Nutrigenomics and Proteomics in Health and Disease: Food Factors and Gene Interactions.
4. Van Ommen, B. (2004). Nutrigenomics: Exploiting systems biology in the nutrition and health arenas. Nutrition.20:4-8.
5. Simopoulos, A.P. and Ordovas, J.M. (Editors)(2004). Nutrigenetics and Nutrigenomics.
6. Roche, H.M. (2004). Dietary lipids and gene expression. Biochem Soc Trans. 32(Pt 6):999-1002.
7. Mount, D. W. Bioinformatics. Sequence and Genome Analysis, CSHL Press.
8. Jones.N. C., Pevzner, P. A. (2004). An Introduction to Bioinformatics Algorithms, MPI Press.
9. Kaput J, Rodriguez RL. (2004)Nutritional genomics: The next frontier in the Postgenomic era. Physiol Genomics.16:166-177.
10. Kaput J. and Rodriguez. R. L. (2006). Nutritional Genomics. John Wiley & Sons, Inc.
11. De Busk RM, Fogarty CP, Ordovas JM, Kornman KS. (2005). Nutritional genomics in practice: Where do we begin? *J Am Diet Assoc*. 105:589-598.

Or

SEC2T: Nutrition and Fitness **Credits 02**

SEC2T: Nutrition and Fitness

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

Course Contents

1. Understanding Fitness: Definition of fitness, health and related terms. Assessment of fitness, Approaches for keeping fit.

.

2. Importance and benefits of physical activity: Physical Activity – frequency, intensity, time and type with examples Physical Activity, physical activity guidelines and physical activity pyramid.

3. Importance of nutrition Role of nutrition in fitness, Nutritional guidelines for health and fitness, Nutritional supplements.

4. Importance of diet and exercise for weight management.

Suggested Readings:

1. Campbell BI. (2014). Sports Nutrition: Enhancing Athletic Performance, CRC Press, Taylor& Francis,
2. Haff GG. (2008). Essentials of Sports Nutrition Study Guide, Humana Press.
3. Dunford M and Doyle JA. (2008). Nutrition for Sport and Exercise, Thomson Wadsworth.
4. Srilakshmi B. (2018). Dietetics, New Delhi: New Age International.

Or

SEC-2: Entrepreneurship Development **Credits 02**

SEC2T: Entrepreneurships Development

Unit-I: Introduction

Meaning, Needs and Importance of Entrepreneurship, Promotion of entrepreneurship, Factors influencing entrepreneurship, Features of a successful Entrepreneurship.

Unit-II: Establishing an enterprise

Forms of Business Organization, Project Identification, Selection of the product, Project formulation, Assessment of project feasibility.

Unit- III: Financing the enterprise

Importance of finance / loans and repayments, Characteristics of Business finance, Fixed capital management: Sources of fixed capital, working capital its sources and how to move for loans, Inventory direct and indirect raw materials and its management.

Unit- IV: Marketing management

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

Meaning and Importance, Marketing-mix, product management – Product line, Product mix, stages of product like cycle, marketing Research and Importance of survey, Physical Distribution and Stock Management.

Unit – V: Entrepreneurship and International business

Meaning of international business, Selection of a product, Selection of a market for international business, Export financing, Institutional support for exports.

Suggested Reading:

1. Holt DH. Entrepreneurship: New Venture Creation.
2. Kaplan JM Patterns of Entrepreneurship.
3. Gupta CB, Khanka SS. Entrepreneurship and Small Business Management, Sultan Chand & Sons.

Or

SEC-2: Women Health & Nutrition **Credits 02**

SEC2T: Women Health & Nutrition

1. Factors (non-nutritional) affecting pregnancy outcome, importance of adequate weight gain during pregnancy, antenatal care and its schedule, Nutritional requirements during pregnancy and modification of existing diet and supplementation, Deficiency of nutrients, specially energy, iron folic acid, protein, calcium, iodine. Common problems of pregnancy and their managements, specially - nausea, vomiting, pica, food aversions, pregnancy induced hypertension, obesity, diabetes. Adolescent pregnancy.

2. Nutritional requirements during lactation, dietary management, food supplements, galactogogues, preparation for lactation. Care and preparation of nipples during breast feeding.

Suggested Readings:

1. Ghosh, S: The Feeding and Care of Infants arid Young Children, VHAI. 6th Ed. Delhi.
2. WHO: A growth chart for International use In Maternal and Children Health Care, Geneva.
3. Mann and Truswell: Essentials of Human Nitration, Oxford University press.
4. Indian Council of Medical Research: Nutrient Requirements and Recommended- Dietary Allowance for Indians, New Delhi.

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

Generic Elective Syllabus
GE-4 [Interdisciplinary for other department]

GE-4: Family Meal Management — Credits 06

GE4T: Family Meal Management — Credits 04

Course Contents:

1. Introduction to meal management - balanced diet, food groups & the planning of balance diet.
2. Food guides for selecting adequate diet .
3. Diet therapy
4. Diet & stress in current scenario.
5. Meal planning for the family.
6. Indian meal patterns - vegetarian & non-vegetarian.
7. Food faddism & the faulty food habits.
8. Nutritive value of common Indian recepies.
9. Nutrition in pregnancy - Physiological stages of pregnancy, nutritional requirements. Food selection, complication of pregnancy.
10. Nutrition during lactation - Physiology of lactation, nutritional requirements.
11. Nutrition during infancy - growth & development, nutritional requirements, breast feeding, infant formula, introduction of supplementary foods.
12. Nutrition during early childhood (Toddler/Preschool)- Growth & nutrient need, nutrition related problems, feeding patterns.
13. Nutrition of school children- Nutritional requirement, importance of snacks, school lunch.
14. Nutrition during adolescence - Growth & nutrient needs, food choices, eating habits, factor influencing needs.
15. Nutrition during adulthood - Nutritional requirements, feeding pattern.
16. Geriatric nutrition: Factors affecting food intake and nutrient use, nutrient needs, nutrition related problems.

GE4P: Family Meal Management (Lab) — Credits 02

Practical:
Planning, preparation and nutritional evaluation of diets in relation to activity levels and physiological state.

A:

1. Planning and preparation of a balanced diet for a pregnant woman.
2. Diet during complication of pregnancy.
3. Planning and preparation of a balanced diet for a lactating woman.
4. Preparation of weaning foods.

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

5. Planning and preparation of a balanced diet for pre-school child.
6. Balanced diet for school going child. Preparation of packed lunch.
7. Planning and preparation of a balanced diet for adolescence.
8. Planning of meals for adult belonging to different income group.
9. Planning meal for senior citizen.

B: Project work with proper diet plan based on survey.

Or

GE-4: Dietetics and Counseling **Credits 06**

GE4T: Dietetics and Counseling **Credits 04**

Course Contents:

1. Practical consideration in giving dietary advice and counselling -
    a) Factors affecting and individual food choice.
    b) Communication of dietary advice
    c) Consideration of behaviour modification
    d) Motivation.

2. Counselling and educating patient
    a) Introduction to nutrition counselling
    b) Determining the role of nutrition counseller
    c) Responsibilities of the nutrition counseller
    d) Practitioner v/s client managed care
    e) Conceptualizing entrepreneur skills and behaviour
    f) Communication and negotiation skills.

3. Teaching aids used by dietitians- charts, leaflets, posters etc., preparation of teaching material for patients suffering from Digestive disorders, Hypertension, Diabetes, Atherosclerosis & Hepatitis and cirrhosis.

4. Computer application
    a) Use of computers by dietitian
    b) Dietary computations
    c) Dietetic management
    d) Education/ training
    e) Information storage
    f) Administrations
    g) Research

5. Computer application
    a) Execution of software packages

Downloaded from Vidyasagar University by 103.77.136.197 on 26 July 2023 : 13:47:20; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons4.pdf

b) Straight line, frequency table, bar diagram, pie chart, Preparation of dietary charts for patients
c) Statistical computation- mean, median, standard deviation, conclusion and regression test.

GE4P: Practical **Credit 02**

1. Project planning for any one disease.
2. Computer application for different diseases.
3. Submitting computed data.
4. Preparations of teaching aids in the field of nutrition.
5. Preparation of case history of a patient and feeding of information in the hard disc.

Semester-V

Core Courses (CC)

CC- 11: Public Health and Hygiene **Credits 06**

CC11T: Public Health and Hygiene **Credits 04**

Course Contents:

1. **Food adulteration**: common, adulterants, and health hazards.Food standards and food laws. National and International; PFA, FSSAI, HACCP, ISO Certification; Consumer guidance society, Consumer rights, Consumer court, Central facilities for assessing food adulteration, Role of food inspectors.

2. **Community Water and Waste Management**: Importance of water to the community, etiology and effects of toxic agents, water borne infectious agents, sources of water, safe drinking water/portability and tests for portability, community, waste and waste disposal, sewage disposal and treatment, solid waste and disposal, liquid waste disposal.

3. **Food Borne Disorders**: Food borne infections- Typhoid, Para typhoid, cholera, infective hepatitis, amoebiasis - Food borne intoxications- Disorders caused by; Natural toxins, chemical toxins and Microbiological toxins in food- Lathyrism, staphylococcal intoxication, Botulism, clostridium perfrignens, Mycotoxins.

4. **Food handling and Public Health**: Preventing food borne illness and the speed of communicable disease; Sanitation of food serving institution; environmental sanitation, hygienic in food handling and personal hygiene of food handler.

5. **Air & health**- Indices of thermal comfort , Pollution a) Sources b) Pollutants c) Monitoring d) Effects e) Prevention & control.

6. **Mental health**- Health & diseases, Concept of a) Normality b) Mental health, Magnitude of the problem, Prevention of mental diseases, Alcohol related & drug related problems, mental health services in India.

7. **Health care delivery system**: Patterns of health care delivery, History of development of health care delivery system in India, Reports of different committees, Three–tier health care delivery system, Primary health center, Subcentre, CHV, Urban health infrastructure.
8. **Demography & Population Control**: Introduction, Definition, Demographic cycle, Population Pyramid, Fertility, Factors affecting fertility, Indicators of fertility, Population

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

explosion as a public health problem, Approaches for population control, Family planning methods.

C11P: Public Health and Hygiene (Lab) **Credits 02**

List of Practical

Assignment programme on public health, nutrition and disease – covering any one of the following fields

1. Protein under nutrition and its recovery.
2. Vitamin or Mineral under nutrition and its recovery.
3. Dietary management of non-communicable disease.
4. Dietary management of growing child.
5. Impact of nutrition education on awareness development in the field of personal health.

CC-12: Research Methodology **Credits 06**

C12T: Research Methodology **Credits 04**

Course Contents:

1. Introduction to Research Methodology: Meaning of Research, Objectives of Research, Motivations in Research, Criteria of Good Research, Types of Research– Fundamental research, Applied Research, Action research, Qualitative Research, Quantitative Research, Historical research.

2. Defining the Research Problem : Scientific Problem, Formation of scientific Problem, criteria of good research problem

3. The Review of Literature: Meaning of Review of Literature, Need and importances of Review of Literature, Objectives of Review of Literature

4. The Research Hypotheses: Definitions of Hypothesis, Functions of Hypothesis, types of Hypothesis, Characteristics of a Good Hypothesis

5. Sampling – Criteria, Design, Characteristics of good sampling, types of sampling method.

6. Methods of Data Collection: Primary and secondary data, Criteria of good data, Observation Method, Interview method, questionnaire and Schedules, Case Study Method.

7. Experimental design – single and multi group experimental design, Quasi experimental Design

9. Ethical issues in research: Code of Ethics in Research – Ethics and Research Process – Importance of Ethics in Research

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

C12P: Research Methodology (Lab) **Credits 02**

Practical

A Project work on public health / nutritional biochemistry / nutritional survey to be submitted.
Formulation of the Project:

1. Meaning of scientific research and its methods. Formulation of project design.
2. Types of project design- exploratory, descriptive, experimental, cross sectional or longitudinal.
3. Methods: survey, case study, anthropological or experimental
4. Tools and techniques: observation, interviewing, questionnaire schedules or rating scales
5. Tabulation and interpretation: Tabular and graphic representation of data and its interpretation, bar diagram, pie diagram. Statistical procedures - variables, mean, standard deviation, test of hypothesis (t-test), chi-square test, degrees of freedom, null hypothesis, z-score.

Discipline Specific Electives (DSE)

DSE-1: Chemical Safety of Foods **Credits 06**

DSE1T: Chemical Safety of Foods **Credits 06**

Course Contents:

Pesticides and veterinary drugs: Detection and quantification of carbamates, organochlorine and organosuplhur, organohalogens, nitrites, herbicides, hormones, antibiotics, steroids, environmental chemicals - heavy metals, toxic residues, radioactive isotopes.

Processing contaminants: Detection, quantification and health hazards of direct contaminants – acrylamide, PAHs, oxyhalides, and haloacetic acids, preservatives, flavor enhancers, color additives. Indirect contaminants- boiler water additives, peeling aids, defoaming agents, building and equipment contaminates: lubricants, paint and coatings, contaminants during packaging, storage and transport: cleaners, sanitizers and cross contaminants.

Food additives: Detection, quantification and health hazards of hydrogenated or partially hydrogenated oils, high-fructose corn syrup, artificial colorants, artificial sweeteners such as aspartame, sucralose and saccharin, BHA or BHT, monosodium glutamate, hydrolyzed vegetable protein or autolyzed yeast extract, potassium bromate, propyl gallate, sulfites, sodium nitrate, sodium benzoate.

Food colorants and sweeteners: Detection, quantification and health hazards of brilliant

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

blue, Indigo, carmine, citrus red , fast green, erythrosine, allura red ,tartrazine, sunset yellow,lake pigments and non-certified colorants, food sweeteners- neotame, sorbitol and non certified sweeteners.

Emulsifiers, stabilizers, thickening and gelling agents: tara gum, soyabean hemicelucose, sucroglycerides, stearyltartarate, talc, gluconic acid, candelilla wax, carbamide, argon, salt of aspartame and other non certified agents- detection, quantification and health hazards.

Suggested Readings:

1. Branen, A.L., Davidson, P.M. & Salminen, S. (2007) Food Additives, 2nd Ed., Marcel Dekker.
2. George, A.B. (2006) Encyclopedia of Food and Color Additives, Vol. III, CRC Press, LLC. Boca Raton, FL
3. George, A.B. (2008) Fenaroli's Handbook of Flavor Ingredients, 5th Ed, CRC Press, LLC. Boca Raton, FL
4. Madhavi, D.L., Deshpande, S.S., & Salunkhe, D.K. (2006) Food Antioxidants: Technological, Toxicological and Health Perspective, MarcelDekker
5. Morton, I.D., & MacLeod, A.J. (2008) Food Flavors, Part A, B & C. Elsevier.
6. Nakai, S., & Modler, H.W. (2007) Food Proteins. Processing Applications. Wiley VCH.

Or

DSE-1: Microbiological Safety of Foods **Credits 06**

DSE1T: Microbiological Safety of Foods **Credits 06**

Course Contents:

Importance and significance of microorganisms in food safety, intrinsic and extrinsic factors affecting the growth of micro organisms in food. Protection and preservation of foods: Hurdle technology, chemical, modified atmosphere, irradiation, thermal and non thermal techniques.

Food borne diseases: characteristics and incidence - global and Indian scenario, food poisoning and food intoxications of microbial origin, bacterial food borne diseases; viral food borne diseases; protozoa animal parasite food borne diseases; mycotoxicoses; mushroom poisoning; investigation and management of food borne diseases.
Food spoilage: characteristic features, dynamics and significance of spoilage of different groups of foods - cereal and cereal products, vegetables and fruits, meat poultry and sea foods, milk and milk products, packed and canned foods.

Determination of microorganisms and their products in food: sampling, sample collection, transport and storage, sample preparation for analysis. microscopic and culture dependent

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

methods- direct microscopic observation, culture enumeration and isolation methods ; culture independent techniques – PCR Based, DGGE, metagenomics, etc.; chemical, physical, immunological methods for microbial metabolites- microbial metabolites.

Suggested Readings:

1. Pelczar, M.I., and Reid, R.D. (2009) Microbiology, 5th Ed., McGraw Hill Inc., New York.
2. James, M.J. (2007) Modern Food Microbiology, 2nd Ed., CBS Publisher, New Delhi
3. Adams, M.R., and Moss, M.G., (2005) Food Microbiology, 1st Ed., New Age International (P) Ltd., NewDelhi.
4. Frazier, W.C. (2008) Food Microbiology, 4th Ed., McGraw Hill Inc., NewYork.
5. Doyle, P., Bonehat, L.R. and Mantville, T.J. (2007) Food Microbiology, Fundamentals and Frontiers, ASM Press, WashingtonDC.

Or

DSE-1: Food Sanitation and Hygiene **Credits 06**

DSE1T: Food Sanitation and Hygiene **Credits 04**

Course Contents:

1. The relationship of micro organisms to sanitation. Role of microbiology – Environmental effects of microbial growth. Effects of micro- organisms on food degradation and food borne illnesses- bacteria, virus, molds, yeasts, and parasites.

2. Other food hazards – chemicals, antibiotics, hormones, metal contamination poisonous foods.

3. Food contamination- sources and transmissions. Water, air, sewage and soil as reservoirs of infection and ways of spread. Other agents of contamination - Humans, domestic animals, vermins, birds.

4. Importance of personal hygiene of food handler - habits -clothes, illness. Education of food handler in handling and serving food.

5. Safety in food procurement, storage, handling and preparation – control of spoilage – safety of left over foods.

6. Cleaning methods – sterilization, and disinfection –products and methods –use of detergents, heat, chemicals, and tests for sanitizer strength.

7. Control of infestation: rodent control- rats, mice; vector control- use of pesticides

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

8. Food sanitation, control and inspection-planning and implementation of training programme for health personnel.

DSE1P: Food Sanitation and Hygiene (Lab) **Credits 02**

Practical:

1. Study of personal and environmental hygiene habits of street food handlers. Intervention and result analysis. Project submission and presentation.
2. Preservation of fruits and vegetables for later use-peas, carrots, cauliflower, chutney, soup, pickle, jam, jelly, marmalade, squash.

Suggested Readings:

1. Textbook of Food and Beverage Management by Sudhir Andrews, Tata Mc Graw Hill, New Delhi.
2. Food Hygiene and Sanitation by S. Roday
3. Essentials of food safety and sanitation by David Ms Swane, Nancy Rue and Richard Linton
4. Essentials of Food Sanitation by Marriott**,** Norman
5. Food Safety, Sanitation and Personal Hygiene by BC Cook Articulation Committee and the BC Cook Articulation Committee.

DSE-2: Quality Assurance in Food Sectors **Credits 06**

DSE2T: Quality Assurance in Food Sectors **Credits 06**

Course Contents:

Food laboratories : need for food analysis, accreditation of food laboratory, referral laboratories, functions of food analysts, hierarchy of food safety authorities, analysis of food samples and reports, other regulatory provisions pertaining to analysis of food

Validation of analytical methods: Good Laboratory Practices (GLP)- history of GLP, areas of application, facilities, test systems, test and reference items, Standard Operating Procedure (SOP), study performance and reporting.

Analytical method used for quality determination: chemical and physical, microbiological, biochemical and sensory analysis.

Analytical methods of determination of basic food components: protein, saccharides, lipids, vitamins, water, minerals and trace elements, sensory active compounds, anti-nutritive and natural toxic compounds, food additives and food contaminants.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

Advanced laboratory techniques: principle, working and application of GC, HPLC, HPTLC, LC/MS, inductively coupled Plasma Mass Spectroscopy and PCR, real time PCR, ELISA, Triple Quadra pole system.

Suggested Readings:

1. The training manual for Food Safety Regulators. Vol. II- Food Safety regulations and food safety management. (2011) Food safety and Standards Authority of India. New Delhi.

Or

DSE-2: Quality Control and Food Standards **Credits 06**

DSE2T: Quality Control and Food Standards **Credits 06**

Course Contents:

Principal aspects of sampling of food: Importance of sample collection, sampling tools and containers, sample collection techniques, sampling for microbiological analysis of food, routine versus investigational sampling, quantity of sample to be collected, packaging and sealing of sample, dispatch of sample, documentation and commodity specific sampling procedure.

Codex Alimentarius Commission (CODEX): Introduction, standards, codex of practice, guidelines and recommendations, applying codex standards, Codex India, core functions of National Codex Contact Point, National Codex Committee of India

International Organization of Standardization (ISO): Overview, structure, interpretation and case studies of food safety and Quality management including ISO-22000, ISO-9001:2000, ISO22000:2005, ISO 17025/CODES/GLP, Retailers standards: BRC food and BRC IOP standards, IFS, SQF: 1000, SQF: 2000.

Hazard Analysis Critical Control Point (HACCP): History, structure, pre- requites and principles, HACCP applications, HACCP based SOPs.

Good Manufacturing Practices (GMP), Good Hygienic Practices (GHP), Good Agricultural Practice(GAP), Good Veterinary Practice (GVP),Storage and distribution of food, sanitation and safety in food services.

Suggested Readings:

1. The Training Manual for Food Safety Regulators. Vol. II- Food Safety regulations and food safety management. (2011) Food safety and Standards Authority of India. New Delhi

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

2. Mortimre, S., and Wallace, C., (2005) HACCP: A practical approach, 2nd Ed, Aspen Publication

3. Surak, J.G., and Wilson, S. (2007) American Society for Quality, 2nd Ed., Quality Press

Or

DSE-2: Food Quality and Sensory Evaluation **Credits 06**

DSE2T: Food Quality and Sensory Evaluation **Credits 04**

Course Contents:

UNIT- 1: Introduction to quality attributes of food
- Appearance, flavour, textural factors and additional quality factors.

UNIT- 2: Gustation

- Introduction and importance of gustation.
- Structure and physiology of taste organs- tongue, papillae, taste buds, salivary glands.
- Mechanism of taste perception.
- Chemical dimensions of basic tastes- sweet, salt, sour, bitter and umami.
- Factors affecting taste quality, reaction time, taste modification, absolute and recognition threshold.
- Taste measurement- Electronic Tongue.
- Taste abnormalities.

UNIT- 3: Olfaction
- Introduction, definition and importance of odour and flavor.
- Anatomy of nose, physiology of odour perception.
- Mechanism of odour perception.
- Theories of odour classification, chemical specificity of odour.
- Odour measurement techniques – historical perspective and emphasis on recent techniques-e-nose,etc .Merits and Demerits of each methods.
- Olfactory abnormalities.

UNIT- 4: Colour
- Introduction and importance of colour.
- Dimensions of colour and attributes of colour;appearance factors, gloss etc.
- Perception of colour.
- Colour Measurement: Munsell colour system, CIE colour system, Hunter colour system, spectrophotometry and colorimetry etc.
- Colour abnormalities.

UNIT- 5: Texture
- Introduction, definition and importance of texture.
- Phases of oral processing.

Downloaded from Vidyasagar University by 106.196.5.139 on 27 October 2022 : 18:18:51; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons5.pdf

- Texture perception, receptors involved in texture perception.
- Rheology of foods.
- Texture classification.
- Texture measurement – basic rheological models, forces involved in texture measurement and recent advances in texture evaluation.
- Application of texture measurement in cereals, fruits and vegetables, dairy, meat and meat products.

DSE2P: Food Quality and Sensory Evaluation (Lab) **Credits 02**

Practical:

Content

1. Training of sensory panel.
2. To perform recognition and sensitivity tests for four basic tastes.
3. To perform analytical and affective tests of sensory evaluation.
4. Recognition tests for various food flavors.
5. Sensory evaluation of milk and milk products.
6. Flavor defects in milk
7. Extraction of pigments from various fruits and vegetables and study the effect of temperature and pH.
8. Texture evaluation of various food samples- crispies / cookies/ biscuits/ snack foods.
9. Textural measurement of various food products using Texture Analyzer.
10. Measurement of colour by using Tintometer/ Hunter Colour Lab etc.
11. Qualitative tests for hydrogenated fats, butter, ghee
12. Platform tests for milk.
13. Quality evaluation of various food stuffs- cereals, pulses, honey, jaggery, sugar, tea, coffee, etc

Suggested Readings:

1. Rao E. S. (2013). Food Quality Evaluation. Variety Books.
2. Pomeranz Y and Meloan CE (2002). Food Analysis – Theory and Practice, CBS Publishers and Distributors, New Delhi.
3. deMan J. (2007). Principles of Food Chemistry, 3rd ed., Springer.
4. Meilgard (1999). Sensory Evaluation Techniques, 3rd ed. CRC Press LLC, 1999.
5. Amerine, Pangborn & Roessler (1965). Principles of Sensory Evaluation of food, Academic Press, London.

Semester-VI

Core Course (CC)

CC-13: Dietetics and Counselling **Credits 06**

CT13: Dietetics and Counselling **Credits 04**

Course Contents:

Unit-I: Introduction to Psychology and counselling

Introduction to psychology – Definition , Nature and Scope. Attention and perception – Types of attention and factors influencing attention , principles of perceptual organization and abnormalities in perception. Learning and memory- Types of learning, Types of memory, Forgetting and its causes. Motivation and emotion- Types of motives, types of emotions, emotional expression. Personality- nature and definition , factors influencing personality, Psycho analytic theory of personality. Nature and goals of counselling. Principles of counselling. Characteristics of a good counsellor. Ethical principles of counselling. Special areas of counselling: Educational, family, health, community and counselling of alcoholic, and drug addicts.

Unit-II: Counselling Skills

Approaches to counselling – i. Psycho analytic approach, ii. Behaviouristic, iii. Humanistic approach.

Pre – Helping phase: i. Rapport building skills, ii. Attending and listening skills,

Stage I skills: Empathy, respect, Genuineness and concreteness,

Stage II skills: Advanced empathy, self disclosure, Immediacy and Confrontation.

Stage III skills: Goal setting, Action plan Programme and Brainstorming.

Unit-III: Basics of Diet Counceling

Diet Counselling - meaning, significance, process, types. Goals of counselling, individuals, group and family counselling. Basic sequence in counselling. Materials needed for counselling – models, charts, posters, AV aids, Hand outs etc. Communication process in counselling and linguistics in clinical dietary practices, problems in communication. Role of Counsellor & Counselee. Techniques of obtaining relevant information- 24 Hour Dietary recall, List of food likes and dislikes, Lifestyle. Dietician as a part of medical team and research team. Impact of counselling on health and disease of individuals – discussion of hospital case studies.

Processes involved in dietary counseling

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Managing resources of the communicator/counselor. Designing of counseling plans – goals & objectives, evaluation instruments. Implementation: facilitating self-management of disease condition. Evaluation: evaluating adherence to dietary changes. Counseling approaches after evaluation**.**

Unit-IV: Practical consideration in giving dietary advice and counselling

a) Factors affecting and individual food choice. b) Communication of dietary advice c) Consideration of behaviour modification d) Motivation.

Unit-V: Counselling and educating patient

a) Introduction to nutrition counselling, b) Determining the role of nutrition counsellor, c) Responsibilities of the nutrition counselor , d) Practitioner v/s client managed care, e) Conceptualizing entrepreneur skills and behavior , f) Communication and negotiation skills.

Unit-VI: Teaching aids used by dietitians

Charts, leaflets, posters etc., preparation of teaching material for patients suffering from Digestive disorders, Hypertension, Diabetes, Atherosclerosis & Hepatitis and cirrhosis.

Unit-VII: Diet Counselling at Hospital and Community level

Role of counselling in hospital. Role of counselling in community. Organizing health camps and patient feedback – at hospital level. Organizing health camps and patient feedback – at community level.
Dietary counseling through the life span - Diet counselling plans for obese people, Diabetics, CVD, dyslipidemia, cancer risk prevention, renal diseases, liver disorders mother and child care, Prenatal and pregnant women, Lactating women Childhood nutrition problems like, SAM, weight management, vitamin and mineral deficiencies, School children, adolescents, young adults, fitness, weight management, eating disorders. Geriatric counselling. Patient follow up / home visits,

Unit-VIII: Computer application

a) Execution of software packages.

b) Straight line, frequency table, bar diagram, pie chart, Preparation of dietary charts for patients.

c) Statistical computation- mean, median, standard deviation, conclusion and regression test.

Unit-IX: Computer application in dietetic management

a) Use of computers by dietician, b) Dietary computations, c) Dietetic management ,d) Education/ training , e) Information storage, f) Administrations , g) Research

Unit -X: Nutritional/medicinal role of traditional foods:

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Traditional food beliefs, role of Ayurveda, Naturopathy, Yoga and other traditional medicines in disease management.

C13P: Dietetics and Counselling (Practical) **Credits 02**

Practical

1. Computer application for collection of data of different diseases. Submitting computed data.

2. Preparations of teaching aids in the field of nutrition.

3. Preparation of case history of a patient and feeding of information in the hard disc.

4. Understanding the use of conventional and non-conventional methods of counseling

i. Face to face counseling. **ii.** Use of software for counseling e.g Dietcal. **iii.** Use of any one Diet App for counseling and assessing food intake.

5. Planning Nutrition counseling sessions and identifying ways to adhere to dietary changes for the following conditions:

Lactation counseling, SAM. Eating disorders. Overweight / Obesity in School children, adolescent and adults. Metabolic syndrome. Diabetes- Gestational Diabetes. Renal disease, Liver disorders.

6. Organizing health camps and patient feedback – both at hospital level and community level.

7. Project planning for any one disease.

CC- 14: Entrepreneurship development, Enterprise management and Entrepreneurship for small catering units Credits 06

C14T: Entrepreneurship development, Enterprise management and Entrepreneurship for small catering units Credits 04

Course Contents:

Unit-I: Entrepreneurship development

Entrepreneurship - concept, definition, need and significance of entrepreneurship development in India, entrepreneurship growth process, barriers, entrepreneurship education model.

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Entrepreneur- their characteristics, types, gender issues, role demands and challenges. Entrepreneurial motivation. Challenges faced by Women Entrepreneurs

Unit- II: Enterprise Planning and Launching

Types of enterprises classification based on capital, product, location, ownership pattern and process. Sensing business opportunities and assessing market potential; market research. Appraising of project and feasibility

Unit-III: Enterprise Management and Networking

a. Organization and Management - Principles of management. Functions of management/ manager.

b. Managing Production: Organizing Production; input- output cycle. Ensuring Quality

c. Managing marketing: Understanding markets and marketing. Functions of marketing. 4Ps of marketing (same as marketing mix).

d. Financial Management: Meaning of Finance. Types and sources of Finance. Estimation of project cost. Profit Assessment. Networking of Enterprises. Importance of Financial Management. Budgets and Budgeting process. Cost concepts

Unit - IV: Personnel management

Functions of a personnel manager, Factors to consider while planning the kind and number of personnel: Menu, type of operations, Type of service, Job description and job specification

Unit-V: Food service units, Menu planning, Food production process, Space and equipment

1. **Food service units:** Origin of Food Service units. Kinds of food service units.
2. **Menu Planning:** Importance of menu. Factors affecting menu planning, Types of menu.
3. **Food Production Process:** Food purchase and receiving, Storage. Quantity food production: Standardization of recipes, Recipe adjustments and portion control, Quantity food production techniques. Food service. Food hygiene and sanitation.
4. **Space and Equipment:** Types of kitchen areas, Flow of work and work area relationship. Equipment a) Factors affecting selection of equipment, b) Equipment needs for different situations

Unit VI: Planning of a small food service unit

a. **Preliminary Planning:** Survey of types of units, identifying clientele, menu, operations and delivery.
b. **Planning the set up:** a) Identifying resources, b) Developing Project plan, c) Determining investments

Unit-VII: Development of a business plan

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

CC14P: Entrepreneurship development, Enterprise management and Entrepreneurship for small catering units (Practical) **Credits 02**

Practical

1. SWOT analysis with respect to entrepreneurial competencies through case profiling of successful entrepreneurs and enterprises.
2. Achievement Motivation lab-development of entrepreneurial competencies.
3. Survey of an institution facilitating entrepreneurship development in India.
4. Preparation of business plan.
5. Market survey for food items both raw and processed. Survey of food service units.
6. Standardization of a recipe.
7. Preparing Quick Foods for scaling up for quantity production.
8. Planning menus for the following:
    a. Packed meals for office employees.
    b. Nutritious Tiffin for school children.
    c. School/college canteens.
9. Demonstration of a specialized cuisine.
10. Develop a checklist for good hygiene practices.

Discipline Specific Electives (DSE)

DSE-3: Geriatric Nutrition **Credits 06**

DSE3T: Geriatric Nutrition **Credits 04**

Course Contents:

Unit-I: Introduction to ageing

Definition of ageing, senescence, old age or aged people, gerontology, geriatrics, and Geriatric nutrition. Classification of old population.
Introduction to geriatric care- concept of gerontology. Ageing - Biology of ageing. Theories of ageing – disengagement theory, activity theory, selective theory and continuity. Microscopic theories, changes in ageing scenario. Interaction between biological and psychological in ageing. Interaction between physiological and social processes in ageing. Drug, food, and nutrient reaction. Dietetics of Geriatric care-Nutritional requirement. Food requirement, dietary modification.
Implication of ageing population for rehabilitation: Demography, mortality and morbidity.

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Unit-II: Issues and challenges of ageing

Issues and challenges of ageing – economic dependence/ poverty, elderly in rural/ urban area. Abuse, neglect, abandonment, physical, health and sensory problems. Crime against elderly, retirement and related issues. Ageing sensory system and issues with falling. Common complaints during ageing. Geriatric guidance and counselling. Depression in old age. Exercise- yoga, meditation .

Behavior therapy: rational- emotive behavior therapy (REBT), horticultural therapy. Music therapy, Art therapy, Bibliotherapy

Unit-III: Clinical Geriatric

Physiological and biochemical changes during old age. Nutritional requirements and general dietary guidelines for elderly. Major nutritional and health problems during old age - osteoporosis ,obesity, neurological dysfunction. Anaemia. Malnutrition and constipation. Infection and Immunity. Degenerative disorders in elderly- Dementia, Alzheimer, Parkinson's disease. Disorders of upper GIT. Disorders of lower GIT. Disorders of Liver. Disorders of Billiary system and pancreas. Infection of Respiratory system. Coronary heart disease.

Assessment of nutritional status of older adults.

Unit – IV: Social Geriatric

Types of family – Joint family System, Role of Elders and Younger generation. Isolation, Loneliness and Dependency – Dependency Ratio – Generational equality. Financial aspects – Sources of income, Old age pension. Role of Govt. and NGOs in Socio – economic status of the elderly. Geriatric service for the elderly in western countries and India. Structure of geriatric service, family as basic unit- models of geriatric service. Day hospital, day care centre, long stay care institution. Home for the aged, function of the day hospital staff and patients of day hospital. Ethical issues in geriatric medicine- age limits on health care. Life sustaining measures.

DSE-3: Geriatric Nutrition (practical) **Credits 02**

1. Visit to old- age homes- assessment of nutritional status of old people, diet counselling.
2. Preparation of dishes suitable for older person- soft, semisolid, easily digestible, nutritious and calorie dense balanced diet.

Or

DSE-3: Nutrition communication for Health promotion Credits 06

DSE3T: Nutrition communication for Health promotion **Credits 04**

Course Contents:

Unit-I: Dietary guidelines for nutrition and health related concerns

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

National and international guidelines and their role in nutrition promotion. Critical appraisal of the current guidelines.

Unit-II: Nutrition and behaviour inter-relationship

Food and health behaviour, models/ theories of health behaviour, food choices, strategies for intervention at the ecological and individual level.

Unit-III: Social and Behaviour Change Communication for nutrition and health promotion

a. Concept and objectives of communication for behaviour change
b. Planning of communication strategies for social and behaviour change programme,
c. Communication needs analysis, stakeholders in nutrition promotion, developing nutrition education plan, identifying communication strategies/ approaches for nutrition and health promotion (e.g. social marketing), designing nutrition and health messages, selecting communication channels, developing and field testing of communication materials, designing training strategies for trainers and their capacity building.
d. Implementing social and behaviour change communication intervention: an overview
e. Evaluation of social and behaviour change communication programmes

Unit-IV: Nutrition Advocacy

a. Meaning, types, tools and techniques and advocacy planning.
b. Role of advocacy in nutrition policy formulation, preparation of policy briefs.

Unit V Ethics in nutrition and health communication

a. Significance of ethics in nutrition and health communication.
b. Ethical Principles and concerns

DSE3P: Nutrition communication for Health promotion (Practical) Credits 02

1. Planning of communication strategies for public health nutrition problems among vulnerable groups in the community -field testing of messages, materials and methods.

2. Review of communication strategies being used in any one public health nutrition programme in the community.

Or

DSE-3: Personnel management and Food service management Credits 06

DSE3T: Personnel management and Food service management Credits 04

Course Contents:

Personnel Management

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Unit-I: Organization and management: a) Definition and types of organization. b) Definition-functions and tools of management. c) Technique of effective management and its application to food preparation and science.

Unit-II: Food material management: a) Meaning, definition, and importance. b) Food selection, purchasing, receiving and storeroom management. c) Control in relation to the above operations (material planning, budgeting, material identification, modification and standardization, inventory control, store keeping, definition, objectives, functions, factors underlying successful storekeeping, duties and responsibilities of a storekeeper, purchasing, organization, principle, procedure, systems and quality control).

Unit-III: Personnel Management: Recruitment, selection and training of personalities, work standards, productivity, supervision, and performance appraisal and motivation incentives for effective performances.

Unit-IV: Labour policies and legislation: (Personnel policies related to salaries, other emoluments, allowances, leave, uniform and other prize benefit, laws and organization)- Laws affecting food service institution to study the following: (hospital, flight kitchen, hotel, Restaurant, canteen, Industrial) - a. Organization, b. Physical plan and layout. c. Food and silver equipment, d. Sanitation and hygiene.

Food Service Management

Unit-V: Foundations: The Foodservice Industry, The Systems Approach, The Fundamentals, Food Safety, Cleaning, Sanitation, and Environmental Safety, The Menu.

Unit-VI: Operational Functions: Purchasing, Receiving, Storage, and Inventory, Production, Beverage Provision, Food and Beverage Service, Events Conferencing & Banqueting, Apprising Performance, Strategic Decisions.

Unit-VII: Facilities: Facilities Planning and Design, Equipment and Furnishings, Environmental Management.

Unit-VIII: Management Functions: Organizational Design, Leadership, Human Resource Management, Performance Improvement, Financial Management, Marketing.

DSE3P: Personnel management and Food service management (Practical) Credits 02

Visit and appraisal of any two medical organizations.

1. Work simplification: food preparation, Calculating work unit, time norms etc.
2. Costing, accounting, budgeting, purchase.
3. Storekeeping: Listing and management of food items in the store.
4. Personnel recruitment: Preparations of a project and report making.

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

5. Maintenance of the clothing for persons and staff involved in kitchen area.
6. Prepare an inventory for evaluating staffs personal hygiene.

Food service Management:

1. Layout of Food Service Outlets & Organisations
2. Food Service Operations
3. Conferencing & Banqueting
4. Equipment and Furnishings, Environmental Management in Food Service Operations
5. Visit to a professional Food Service Outlet

Note: An Event may be planned to supplement learning of students and practical may be conducted in view of theory syllabus to provide practical inputs to learners.

DSE- 4: Methods for Epidemiological Data Analysis Credits 06

DSE4T: Methods for Epidemiological Data Analysis Credits 04

Course Contents:

Unit I: Understanding Epidemiological Data
Components of epidemiology: disease frequency, distribution of disease and determinants of disease. Epidemiological approach and measurements- vital statistics (rates, ratios and proportions), measurements of health indicators (morbidity, mortality and fertility rates).

Unit II: Epidemiologic Methods and Survey
Data collection: observational (descriptive and analytical) and experimental studies. Epidemiology study designs - case control and cohort studies (prospective and retrospective), techniques of sampling and matching, sources of bias.

Unit III: Data Organization and Presentation
Basic principles of 'R' software for tabulation and graphical representations (bar diagrams, histograms, pie charts, box plot, etc.), measures of central tendency (mean, mode, median and partition values), dispersion (range, standard deviation, coefficient of variance and covariance) and skewness.

Unit IV: Statistical Modeling and Analysis using 'R' on NCRP data and survey conducted by the students

Correlation analysis (scatter diagrams and Karl Pearsons coefficient of determination, standard and probable errors) and regression analysis. Inferential statistics: sampling distributions and standard error null and alternate hypothesis, basic concept and illustrations of type I and type II

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

errors, concept of confidence interval estimation, large sample tests for single mean and difference of means, single proportion and difference of proportions, students t-distribution (test for single mean, difference of means and paired t-test), chi-square distribution, F-distribution, one-way and two-way ANOVA, non parametric analysis (sign and rank tests), p-value.

DSE4P: Methods for epidemiological data analysis (Practical) Credits 02

List of Practical

1. Analysis of data from National Cancer Registry Program (NCRP). Understanding incidence, mortality (rates, ratios and proportions).
2. Designing a questionnaire for survey of prevalence diabetes/ hypertension/ allergy/ respiratory disorders/etc. Determining the target and control populations
3. Surveying the population for the diseases mentioned above.
4. Introduction to 'R' software. Analysis of data from NCRP data and survey conducted by the students.
5. Correlation studies. Regression studies. Probabilistic distribution studies. Comparison of groups and ascertaining statistical significance of differences.

Or

DSE-4: Food packaging Credits 06

DSE4T: Food packaging Credits 04

Course Contents:

Unit 1: Introduction to Food Packaging -Packaging Functions and Requirements,, Printing of packages .Barcodes & other marking, Labeling Laws

Unit 2: Food Packaging Materials -Paper and paper-based materials, corrugated fiber board (CFB). Plastics, formation- Injection molding, Blow molding, Types of plastics, Lamination, Biodegradable plastics, Edible packaging and Bio-composites. Environmental Concerns recycling and disposal of plastic waste Metal packaging- Metals: Tinplate, tinning process, components of tinplate, tin free can (TFC) types of can, metallic films, lacquers Glass: Composition, Properties, Methods of bottle making, Types of closures.

Unit 3: Package Designing for Foods - Package design for fresh horticultural produce and animal foods, dry and moisture sensitive foods, frozen foods, fats and oils, thermally processed foods and beverages.

Unit 4: Testing and Regulatory Aspects of Food Packaging- Testing Procedures for Packaging Materials- thickness, tensile strength, puncture resistance, bursting strength, seal strength, water

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

vapor permeability, CO_2 permeability, oxygen permeability, grease resistance, Testing Procedures for Packaged Foods - Compatibility and shelf life studies, evaluation of transport worthiness of filled packages. Food Packaging Laws and Regulations.

Unit 5: Packaging Machinery and Systems - Bottling machines, Cartoning systems, Seal and Shrink packaging machine; Form, Fill and Sealing machine (FFS). Vacuum, Controlled and Modified atmosphere packaging systems; Aseptic packaging systems; Retort packaging, Active and Intelligent packaging systems

DSE4P: Food Packaging (Practical) **Credits 02**

List of Practical:

1. Testing of physical/mechanical properties of food packaging material.

2. Testing of thermal shock resistance of glass.

3. Gas/Vacuum packaging of foods and shelf life studies.

5. Edible packaging of Food Samples.

6. Packaged food cut-out analysis.

Demonstration:

1. Study of Sorption Isotherm for Food Package Design **(Demonstration)**.

2. Determination of Water Vapor Transmission rate of Packaging Material **(Demonstration)**.

3. Study the operation of FFS machine **(Demonstration**).

Or

DSE-3: Bakery Technology and Mushroom Culture **Credits 06**

DSE3T: Bakery Technology and Mushroom Culture **Credits 04**

Course Contents:

Unit- I: Bakery industry: Current status, growth rate, and economic importance of Bakery Industry in India. Product types, nutritional quality and safety of products, pertinent standards & regulations.

Unit- II: Bread, Buns and Pizza base - Ingredients & processes for breads, buns, pizza base, Equipments used, product quality characteristics, faults and corrective measures

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Unit- III: Cakes - Ingredients & processes for cakes, Equipments used, product quality characteristics, faults and corrective measures. Different types of icings.

Unit- IV: Biscuits, Cookies & Crackers - Ingredients & processes, Equipments used, product quality characteristics, faults and corrective measures.

Unit- V: Modified Bakery Products - Modification of bakery products for people with special nutritional requirements e.g. high fibre, low sugar, low fat, and gluten free bakery products.

Unit- VI: Breakfast Cereals, Macaroni Products and Malt - Production and quality of breakfast cereals, macaroni products and malt.

Unit- VI:

Mushroom Culture: 1. Definition and characteristics of mushroom. **2.** Morphology and life cycle of Mushroom**. 3.** Identification and classification of mushroom **4** Nutritional and medicinal value of edible mushrooms; poisonous mushrooms. **5.** Types of edible mushrooms available in India- Volvariella volvacea, Pleurotus citrinopileatus, Agaricus bisporus. **6.** Process of mushroom cultivation. **7.** Storage and nutrition: short term storage (Refrigeration- upto 24 hours), long term storage (canning, pickles, papads), drying, storage in salt solutions.

DSEP: Bakery Technology and Mushroom Culture (Practical) Credits 02

List of Practical:

1. Preparation of pizza base and assessment of its quality

2. Preparation of bread and assessment of its quality

3. Preparation of buns and assessment of quality

4. Preparation of butter cake and assessment of its quality.

5. Preparation of sponge cake with icing and assessment of its quality.

6. Preparation of cookies and assessment of quality.

7. Preparation of biscuits and assessment of quality.

8. Visit to Mushroom Culture Centres/ Farms for:

    Process involved in mushroom cultivation Types and varieties of mushroom. Visual Identification of edible and poisonous mushroom Marketing.

9. Different Food preparation from mushroom.

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Or

DSE-4: Sea food and Dairy Technology — Credits 06

DSE4T: Sea food and Dairy Technology — Credits 04

Course Contents:

Technology of Sea food:

Unit-I: Introduction. Status of fishery industry in India.

Unit-II: Chilling and Freezing of fish. Relationship between chilling and storage life, MAP, general aspects of freezing, freezing systems (air blast freezing, plate or contact freezing spray or immersion freezing, freezing on board, onshore processing, changes in quality in chilled and frozen storage, thawing.

Unit-III: Fish Curing and Smoking - Drying and salting of fish, water activity and shelf-life , salting process, salting methods (brining, pickling, kench curing, gaspe curing), types of salts, dried and salted fish products- pindang, fishwood, dried shrimp. Preservation by smoking, smoke production , smoke components, quality, safety and nutritive value of smoked fish, processing and equipment, pre-smoking processes, smoking process control. Traditional chimney kiln, modern mechanical fish smoking kiln, examples of smoked and dried products.

Unit-IV: Canning of fish: Principles of canning, classification based on pH groupings, effect of heat processing on fish, storage of canned fish, pre-process operations, post process operations, cannery operations for specific canned products.(Tuna,Mackerel,Sardine).

Unit-V: Fishery by-products - Surimi- Introduction, fish muscle proteins, the surimi process, traditional and modern surimi production lines, quality of surimi products, comparision of surimi and fish mince products. Fish protein concentrates (FPC), fish protein extracts (FPE), fish protein hydrolysis (FPH)

Unit-VI: Fermented fish- Flowchart of Indigenous products- Fish sauce and Paste

Unit-VII: Concept of other Sea foods - Crabs, lobsters, prawns, shrimps, shell- fish.

Technology of milk and milk products

Unit-VIII: Physical properties of milk : Color, taste, pH and buffering capacity, refractive index, viscosity, surface tension, freezing, boiling point, specific heat, OR, electrical conductivity.

Unit-IX: Lactose - Lactose (alpha and beta forms and their differences) Significances of lactose in dairy industry.

Downloaded from Vidyasagar University by 47.11.142.18 on 14 January 2020 : 17:57:57; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Nutrition_Hons6.pdf

Unit-X: Milk fat: Composition and structure, factors affecting melting point, boiling point, solubility and Refractive Index, fat constants (saponification value, iodine value, RM value, Polenske value, peroxide value). Chemical reactions of fat (hydrolysis, auto-oxidation), condition favouring autooxidation, prevention, measurement of auto-oxidation.

Unit-XI: Protein and Enzymes - General structure, amphoteric nature, difference between casein and serum protein, different types of casein (acid and rennet), uses of casein, fractionation of protein. Enzymes- catalase, alkaline phosphatase, lipases and proteases.

Unit-XII: Market milk industry and milk products: Systems of collection of milk Reception, Platform testing- Various stages of processing, Filtration, Clarification • Homogenization • Pasteurization • Description and working of clarifier, cream separator, homogenizer and plate heat exchanger. Flow diagram of following milk products - Butter, ghee, flavored milk, yoghurt, dahi, shrikhand, ice-cream, condensed milk, milk powder, channa, paneer, cheese (cheddar).

DSE4P: Sea food and Dairy Technology (Practical) Credits 02

List of Practical:

1. Perform platform tests in milk.(Acidity, COB, MBRT, specific gravity, SNF)
2. Estimate milk protein by Folin method.
3. Estimate milk fat by Gerber method.
4. Preparation of flavoured milk. Pasteurization of milk.
5. Prepare casein and calculate its yield.
6. Quality evaluation of fish/prawn.
7. Subjective evaluation of Fresh Fish.
8. Cut out examination of canned fish.(Sardine, Mackerel, Tuna)
9. Fish product formulation/canning.

LIST OF CORE & ELECTIVES

CORE COURSE (CC)

DSC-1A: Nutritional aspect of food items.
DSC-1B: Nutrients and its physiological role
DSC-1C: Nutrition: Infancy to old age
DSC-1D: Nutritional Surveillance and programme

DISCIPLINE SPECIFIC ELECTIVE (DSE)

DSE- 1: Food Microbiology and Food Borne Illness
Or
DSE- 1: Food Standard and Food Safety Guidelines
Or
DSE-1: Dietetics and Counselling

DSE- 2: Community Nutrition and Epidemiology
Or
DSE-2: Personnel Management
Or
DSE-2: Computer Application and Research Methodology

SKILL ENHANCEMENT COURSE (SEC)

SEC- 1: Diet Therapy – 1

SEC- 2: Diet Therapy-II

SEC-3: Basic Molecular Biology and Immunology
Or
SEC- 3: Toxicology and Public Health

SEC- 4: Biostatistics and Bioinformatics
Or
SEC-4: Nutrition and Fitness
Or
SEC-4: Women Health and Nutrition

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

CORE COURSE (CC)

DSC-1A (CC- 1): Nutritional aspect of food items. **Credits 06**

DSC1AT : Nutritional aspect of food items. **Credits 04**

Course Contents:

1. Concept and definition of terms:

- Food, Food Groups, Food Pyramid, Functions of food.
- Nutrient and Nutritive value, Concept of Balanced Diet.

2. Cereals, **Pulses and legumes:**

- Nutritional aspects of wheat, rice and oat.
- Types of pulses and legumes, uses, and nutritional aspects.

3. Milk and milk Products:

- Nutritive value of milk, composition of milk,
- Types of processed milk, milk products (butter, curd, paneer and cheese), Pasteurization.

4. Egg, **Fish and meat:**

- Nutritional aspects and uses.
- Nutritional aspects of edible fish and meat, concept of red and white meat.

5. Vegetables and fruits:

- Uses and nutritional aspect of commonly available vegetables.
- Fresh fruits and dry fruits– raw and processed product.

6. Salts, **Fats and oils:**

- Uses and nutritional aspects of various salts.
- Types, sources, use and nutritional aspects of fats and oils.

7. Methods of cooking:

- Dry, moist, frying and microwave cooking.
- Effect of various methods of cooking on foods, nutrient losses in cooking.

DSC1AP: Practical **Credits 02**

Food preparation and nutritive value as per portion size wherever applicable -

1. **Beverages:** Lassi

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

2. **Cereals:** Fried Rice
3. **Milk and milk products:** Payasam
4. **Eggs:** Egg pudding
5. **Snacks:** Sandwiches

Suggested Readings:

1. Hughes O, Bennion M (1970). Introductory Foods, Macrnillan & Co. New York.
2. Lavies S (1998). Food Commodities.
3. Pomeranz Y (Ed) (1991). Functional Properties of Food Components, (2nd edition), Academic Press, New York.
4. Tindall HD (1983). Vegetables in the Tropics, MacMillan Press, London.
5. Winton AL, Winton KB (1999). Techniques of Food Analysis. Allied Scientific Publishers.
6. Winton AL, Winton KB (1999). Techniques of Food Analysis. Allied Scientific Publishers.

DSC-1B (CC- 2): Nutrients and its physiological role **Credits 06**

DSC1BT: Nutrients and its physiological role **Credits 04**

Course Contents:

1. Concept and definition of terms:
Growth, Development, Nutrition, Malnutrition and Health, Scope of Nutrition.

2. Introduce of protein, carbohydrate and fats
Dietary sources, physiological role and deficiency disorders.

3. Role of Vitamins and Minerals:

- Fat soluble vitamin-Physiological role, dietary sources and deficiency disorders.
- Water soluble vitamin- Physiological role, dietary sources and deficiency disorders.
- Minerals-Physiological role, dietary sources and deficiency disorders in special references to calcium, iron, sodium and potassium.

4. Principles of meal planning:

- Food exchange list, Factors affecting meal planning and food related behavior.
- Dietary guidelines for Indians.

5. Minimum nutritional requirement and RDA:

- Formulation of RDA, dietary guidelines with reference to man and woman.

6. Energy in human nutrition:

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

• Energy and its unit, Energy assessment and balance, Factors of energy requirement, BMR and its regulation, SDA of food**.**

DSC1BP: Practical **Credits 02**

1. Growth chart: Plotting and Interpretation using primary or secondary data in accordance with both ICMR and WHO Chart.
2. Clinical assessment and sign of nutrient deficiency disorders: Protein energy malnutrition (PEM), Anemia, Rickets, Goiter (Slide/Photography).
3. Clinical assessment and sign of vitamin deficiency disorders: Vitamin A, Vitamin C and Vitamin B-complex (Slide/Photography).
4. Clinical assessment and sign of obesity and metabolic disorders risk factors.

Suggested Readings:

1. Gopalan C (198). Nutritive value of Indian Foods. Indian Council of Medical Research.
2. Guthrie AH (1986). Introductory Nutrition, 6th Ed. The C.V. Mesby Company.
3. Indian Council of Medical Research (2003). Nutrient Requirements and Recommended-Dietary Allowance for Indians. New Delhi.
4. WHO (1979). A growth chart for International use in Maternal and Children Health Care, Geneva.
5. Winword (1988). Sear's Anatomy and Physiology for Nurses. London, Edward Arno ll.
6. Swaminathan M (2009). Essentials of Foods and Nutrition, Vols -1 and II. Ganesh and Co. Madras.

DSC-1C (CC- 3): Nutrition: Infancy to old age **Credits 06**

DSC1CT : Nutrition: Infancy to old age **Credits 04**

Course Contents:

1. Nutrition during infancy:
• Breast feeding, Formula feeding, Weaning, Supplementary foods, Nutritional management of Preterm baby.

2. Nutrition for children:
• Diet in early childhood, elementary school age, high school age.

3. Nutrition during pregnancy and lactation:
• Nutritional demands of Pregnancy, Food selection during Pregnancy, Complications of pregnancy and dietary management, Diet during Lactation.

4. Geriatric nutrition:
• Planning of meals for older people, Nutrition of aged persons, Physiological complications in geriatric group and dietary modifications required.

DSC1CP: Practical **Credits 02**

1. Preparation of normal diets for infant (Dahl soup).

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

2. Preparation of normal diets for preschool children (Dalia).
3. Preparation of normal diets for pregnant lady and lactating mother (Khicheri with mixed vegetables).

Note: In laboratory note book, calculation of nutritive value should be recorded according to portion size of specific diet for particular individual.

Suggested readings:

1. Hoar WS (1984). General and comparative Physiology. 3rd ed. Prentice-Hall of India.
2. Indian Council of Medical Research (2003). Nutrient Requirements and Recommended-Dietary Allowance for Indians. New Delhi.
3. Sherwood L (2004). Human Physiology: From cells to systems. 5th ed. Thomson Brooks Cole.
4. Swaminathan M (2009). Essentials of Foods and Nutrition, Vols -1 and II. Ganesh and Co. Madras.
5. Walker WA and Watkins JB (Ed.) (1985). Nutrition in Pediatrics, Boston, Little Brown & Co.
6. WHO (1979). A growth chart for International use in Material and Children Health Care. Geneva.
7. Wilson (1989). Anatomy and Physiology in Health and Illness. Edinburgh, Churchill Livingstone.

DSC-1D (CC- 4): Nutritional Surveillance and Programme **Credits 06**

DSC1DT : Nutritional Surveillance and Programme **Credits 04**

Course Contents:

1. Assessment of Nutritional Status and Surveillance:
- Direct Nutritional status assessment of human groups - Biochemical, Biophysical and anthropometric methods.
- Indirect assessment: Secondary sources of community health data.

2. Concept of surveillance systems:
- Role of international and national organizations and agencies (WHO, FAO, UNICEF, CARE, NIN, CFTRI, ICMR).

3. Communication in Nutrition and Health Education:
- Type, process and media of communication.
- Importance and relevance of Information, Education and communication (IEC) in Nutrition and Public Health..

4. National Nutritional Intervention Programmes:
- Objective, Target group, Scheme details - Integrated Child Development Services (ICDS), Mid Day Meal Programme (MDMP), Vit A prophylaxis Prophylaxis programme, Anemia prophylaxis programme.

5. Immunization Programme:

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

- Immunization: National Immunization schedule for children and adults, Immunization for foreign travelers.

DSC1DP: Practical **Credits 02**

1. Anthropometric measurement of Weight for age, height for age, weight for height and its comparison with reference value.
2. Determination of BMI and comments on results.
3. Measurement of circumference of chest, upper arm, waist - hip ratio.

Suggested Readings:

1. Jelliffe DB and Jelliffe EFP (1989). Community Nutritional Assessment, Oxford University Press
2. WHO. The growth chart: A tool for use in infant and child health care. Geneva: WHO; 1986.
3. Gopalan C (1992). Growth charts in Primary Health Care – Time for Reassessment. NFI Bulletin.
4. Ghosh S (1997). Nutrition and child care – A practical guide. 1st ed. Jaypee Brothers; New Delhi.
5. NIPCCD. Growth Monitoring Manual. 1st ed. Deptt. Of Women and child development. Ministry of HRD: 1988.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University

DISCIPLINE SPECIFIC ELECTIVE (DSE)

DSE- 1: Food Microbiology and Food borne Illness **Credits 06**

DSE1T: Food Microbiology and Food borne Illness **Credits 04**

Course Contents:

1. Introduction of Microbiology:

Introduction of microbiology and its relevance to everyday life. General characteristics of bacteria, fungi, virus, protozoa and algae.

Growth of microorganisms : Growth curve, effects of environment factors in growth of microorganisms –pH, water activity, oxygen availability, temperature and others.

Microorganisms involved in food fermentation and their role.

2. Microbiology of deficient food: Spoilage. Contamination sources, types, effect on the following:

a. Cereal and cereal products. **b.** Sugar and sugar products**. c.** Vegetables and fruits **d.** Meat and meat products. **e.** Fish, egg and poultry, Milk and milk products. **f.** Canned foods.

3. Environmental microbiology:

a. Water and water borne diseases. **b.** Air and air borne diseases. **c.** Soil and soil borne diseases. **d.** Sewage and diseases.

4. Beneficial effect of microorganisms.

5. Waste product handling:

a. planning for waste disposal. **b.** Solid wastes and liquid wastes.

6. Microbial intoxication and infections: Sources of contamination of food, toxin production and physiological action, sources of infection of food by pathogenic organisms, symptoms and method of control.

7. Control of microorganisms:

1. Physical and chemical methods used in sterilization and disinfection.
2. Uses of high and low temperature, dehydration, freezing, freeze drying, irradiation and use of preservatives.

8. Nutrition and culture of microorganisms:

1. Microbial nutrition-Types of culture media, Methods of pure culture and sub culture.
2. Bacterial growth-Extrinsic and intrinsic factors affecting growth.

9. Food contamination:

Primary sources of food contamination

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

10. Food infections:

1. Bacterial food infections-Salmonellosis, Shigellosis and Listeriosis.
2. Food poisoning (Staphylococcal & Botulism) - Symptoms, mode of transmission and methods of prevention, Concept of aflatoxin intoxication.
3. Relevance of microbial standards for food safety.

DSE1P: Practical **Credits 02**

1. Study of equipments in a microbiology lab.
2. Preparation of laboratory media and special media, liquid (broth) and solid media Slant and Stab.
3. Microbiological pure culture technique: Spread plate, Pour plate and Streak plate. Cultivation of yeasts and moulds.
4. Microbial Staining: Simple stain, Differential stain (Gram stain).
5. Cultivation and identifications of important molds and yeast in food items.
6. Demonstration of available rapid methods and diagnostic kits used in identification of microorganisms or their products.
7. Visits (at least two) to food processing units or any other organization dealing with advanced methods in food microbiology.

Suggested Readings:

1. Pelczar MJ, Chan ECS, and Krieg NR (2004). Microbiology. 5th edition Tata McGraw Hill.
2. Prazier WC and Westhoff DC (1988). 4th edition, Food Microbiology, MaGraw Hill Inc.
3. Prescott SC, Dunn CG (2009). Industrial Microbiology.
4. Roday S (1999). Food Hygiene and Sanitation, 1st Edition, Tata McGraw Hill, New Delhi.
5. Stanier RY, Ingraham JL, Wheelis ML, and Painter PR (2005). General Microbiology. 5th edition. McMillan.
6. Talaro K and Talaro A (2011). Foundations in Microbiology, 8th ed. McGraw-Hill
7. Tortora GJ, Funke BR, Case CL (2008). Microbiology. An Introduction. 9th ed. Benjamin/Cummings Publishing.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University

Or

DSE 1: Food Standards and Food Safety Guidelines Credits 06

DSE1T: Food Standards and Food Safety Guidelines Credits 04

Course Contents:

1. **Microorganisms and Sanitation:**

   - The relationship of microorganisms to sanitation. Effects of microorganisms on food degradation and food – borne illness.
   - Importance of personal hygiene of food handlers: Habits, cloths, illness, education of food handler in handling and serving food. Concepts of food contamination.

2. **Food additive and food safety:**

   • Concept of food safety, definition and factors affecting food safety.
   • Food additives-various types and their effects on health.

3. **Food processing** – Definition, types, enzyme of importance in food processing – Proteases, lipases, oxidoreductase and hydrolase.

4. **Food security:** Concept of food security**,** factors affecting food security.

5. **Food adjuncts and preserved products:**
   - Elementary idea on food preservation: principles and different methods – drying, freezing, frying, canning,etc.
   - Spices (Chilies, Turmeric, Garlic and Ginger), use and nutritional aspect.
   - Jams, Jellies, Squashes–uses and nutritional aspects.

6. **Food adulteration:**
   - Definition, Reasons and types.
   - PFA definition of food adulteration, Common adulterants in food and their effects on health.
   - Common household methods to detect adulterants in food,

7. Food laws and Regulatory authority:

- Food Laws, Consumerisms: Definition, consumer protection, Consumer education, Legal mode of protection, Machinery for redresal of consumer grievances.
- Prevention of Food Adulteration (PFA) Act.
- Regulating authority - Codex Alimentarius, ISI, Agmark, Fruit Products Order (FPO), Meat Products Order (MPO), Bureau of Indian Standards (BIS), Food Standards and Safety Authority of India (FSSAI).

DSE1P: Practical Credits 02

<u>Detection of common adulterants in foods:</u>

1. Detection of vanaspati in ghee/ butter.
2. Detection of khesari flour in besan.
3. Detection of argemone oil in edible oil.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

4. Detection of metanil yellow in turmeric or colour sweet products.
5. Detection of dried papya seeds in black pepper.
6. Detection of artificially foreign matter in tea (dust/leaves).
7. Visit to food preservation centre/industry and demonstration of preparation and packaging of jam, jelly, chilli sauce, tomato ketchup, squash, pickles, etc.

Suggested readings:

1. Gopalan C and Kaur S (Eds.) (1993). Towards Better Nutrition, Problems and Policies, Nutrition Foundation of India.
2. Tovel AP (1984). Standardising Food Service for Quality and Efficiency. AVI Publishing Company INC.
3. Dept. of WCD, Govt. of India. (1993): National Nutrition Policy.
4. Food and Nutrition Board, Dept. of WCD, Govt. of India (1995): National Plan of Action on Nutrition.
5. Roday S (1999). Food Hygiene and Sanitation, 1st Edition, Tata McGraw Hill, New Delhi.
6. Diehl JF (1995). Safety of Irradiated Foods Marcel Dekker Inc, New York.
7. Raheena Begum: A textbook of food, nutrition and dietetics Sterling Publishers, New Delhi.
8. Joshi SA. Nutrition and Dietetics. Tata McGraw Hill, Publications, New Delhi.
9. Mahan LK and Escott-Stump S (2000). Krause's Food Nutrition and Diet Therapy, 10th edition, W.B. Saunders Ltd.

Or

DSE-1: Dietetics and Counseling — Credits 06

DSE1T: Dietetics and Counseling — Credits 04

Course Contents:

1. Practical consideration in giving dietary advice and counselling -
    a) Factors affecting and individual food choice.
    b) Communication of dietary advice
    c) Consideration of behaviour modification
    d) Motivation.
2. Counselling and educating patient
    a) Introduction to nutrition counselling
    b) Determining the role of nutrition counseller
    c) Responsibilities of the nutrition counseller
    d) Practitioner v/s client managed care
    e) Conceptualizing entrepreneur skills and behaviour
    f) Communication and negotiation skills.
3. Teaching aids used by dietitians- charts, leaflets, posters etc., preparation of teaching material for patients suffering from Digestive disorders, Hypertension, Diabetes, Atherosclerosis & Hepatitis and cirrhosis.

4. Computer application
    a) Use of computers by dietitian

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

b) Dietary computations
c) Dietetic management
d) Education/ training
e) Information storage
f) Administrations
g) Research

5. Computer application
   a) Execution of software packages
   b) Straight line, frequency table, bar diagram, pie chart, Preparation of dietary charts for patients
   c) Statistical computation- mean, median, standard deviation, conclusion and regression test.

DSE1P: Practical **Credit 02**

1. Project planning for any one disease.
2. Computer application for different diseases.
3. Submitting computed data.
4. Preparations of teaching aids in the field of nutrition.
5. Preparation of case history of a patient and feeding of information in the hard disc.

DSE-2: Community Nutrition and Epidemiology **Credits 06**

DSE-2P: Community Nutrition and Epidemiology **Credits 04**

Course Contents:

1. **Concept of population and Community:** Concept and characteristic features of population. Concepts and types of community. Concept of community nutrition. Factors affecting health of community – environmental, social, political, cultural and economical.

2. **Community water and waste management:** Source of water, safe drinking water, etiology and effects of toxic agents. Microbial examination of water, Water-Potability test (MPN Test). Sewage disposal and treatment.

3. **Nutritional problems in community:**
   a. Nutrition and health in National Development.
   b. Malnutrition – meaning, factors contributing to malnutrition, over nutrition.
   c. Nutritional disorders : Epidemiology, clinical features, prevention and dietary treatment for protein energy malnutrition, nutritional anaemias & vitamin deficiency disorders.
   d. Nutritional and infection relationship : Immunization and its importance, Food borne infection,and intoxication diseases, foods involved, methods of prevention, infestation of food borne diseases, outbreak, Prevention sign and control of infection.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

4. **Community nutrition programme planning** – identification of problem, analysis of causes, resources constraints, selection of interventions, setting a strategy, implementations and evaluation of the programme.

5. Nutritional status assessments and Nutritional intervention programmes :

a. Nutritional status assessment: Meaning, need, objectives and importance.

Methods of assessing nutritional status:

i. Sampling techniques, identification of risk groups.

ii. Direct assesement – Diet surveys, Nutritional anthropometry – height, weight, BMI, MUAC, head and chest circumference, Diet survey by recall method, Clinical assessment, biochemical assessments.

iii. Indirect assesement – Food balance sheet, ecological parameters and vital statistics.

b. National and International agencies in uplifting the nutritional status:

- FAO,WHO, UNICEF, CARE, ICMR, ICDS, ICAR, CSIR, CFTRI ANP,VHAI,NIN.
- Role of voluntary health organization in the improvement of community health.

c. Nutritional intervention programmes :

Nutritional intervention programme to combat malnutrition. Concept of food fortification and food enrichment.

6. Nutrition Education :

Definition, objectives of nutrition education. Methods of imparting nutrition education.

7. Concept of Disease:

Endemic, Epidemic and Pandemic, Acute and Chronic. Communicable and Non-communicable diseases, Zoonosis, Epizootic and Enzootic.

8. Principles of Epidemiology:

Epidemiological study-Descriptive and Analytical. Rate of Disease in a Population-Attack rate, Mortality and Morbidity rate, Prevalence and Incidence of a disease, The incubation period, Quarantine period. Factors that Influence the Epidemiology of Disease.

DSE2P: Practical **Credits 02**

1. Preparation of homemade ORS.
2. Identification of vulnerable and risk groups,
3. Preparation of weaning foods for infants.
4. Preparation of low cost and medium cost school tiffin.
5. Use of anthropometric measurements in children.
6. Diet survey by 24 Hours recall methods.
7. Preparation of visual aids.
8. Field visit to : a) Observe the working of nutrition and health oriented programmes (survey based results), b) Hospitals to observe nutritional deficiencies.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

9. Visit to old age home / ICDS Centre / Nutrition Rehabilitation Centre (NRC) / Slum area / any public place and Prepare a report on nutritional status and health concern (at least 10-15 case studies to be done).
10. Visit to a Rural Technology Centre/Community Welfare Centre and prepare a brief field report on Rural Technology and Community Development.

Suggested Readings:

1. Park K (2009). Park's Textbook of Preventive and Social Medicine, 20th Edition, M/s Banarasidas Bhanot, Jabalpur.
2. Gordis L (1996). Epidemiology, Saunders, Pennsylvania.
3. Norell SE (1998): Workbook of Epidemiology. Oxford: University Press, New York.
4. Owen AY and Frankle RT (1986). Nutrition in the Community, The Art of Delivering Services, 2nd Edition, Times Mirror/Mosby.
5. Roday, S. (1999) Food Hygiene and Sanitation. 1st Edition, Tata McGraw Hill, New Delhi.
6. Saha A, Shattock F, Mustafa T. Epidemology in Primary Health Care. The McGraw- Hill Companies.

Or

DSE-2: Personnel Management **Credits 06**

DSE2T: Personnel Management **Credits 04**

Course Contents:

1. Organization and management:
   a) Definition and types of organization.
   b) Definition- functions and tools of management.
   c) Technique of effective management and its application to food preparation and science.

2. Food material management:
   a) Meaning, definition, and importance.
   b) Food selection, purchasing, receiving and storeroom management.
   c) Control in relation to the above operations (material planning, budgeting, material identification, modification and standardization, inventory control, store keeping, definition, objectives, functions, factors underlying successful storekeeping, duties and responsibilities of a storekeeper, purchasing, organization, principle, procedure, systems and quality control).

3. Personnel Management: Recruitment, selection and training of personalities, work standards, productivity, supervision, performance appraisal and motivation incentives for effective performances.

4. Labour policies and legislation: (Personnel policies related to salaries, other emoluments, allowances, leave, uniform and other prize benefit, laws and organization)- Laws affecting food service institution to study the following: (hospital, flight kitchen, hotel, restaurant, canteen, Industrial) -

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

a. Organization
b. Physical plan and layout.
c. Food and silver equipment
d. Sanitation and hygiene.

DSE2P: Practical **Credits 02**

Visit and appraisal of any two medical organization.

1. Work simplification: food preparation, Calculating work unit, time norms etc.
2. Costing, accounting, budgeting, purchase.
3. Storekeeping: Listing and management of food items in the store.
4. Personnel recruitment: Preparations of a project and report making.
5. Maintenance of the clothing for persons and staff involved in kitchen area.
6. Prepare an inventory for evaluating staffs personal hygiene.

Or

DSE-2: Computer Application and Research Methodology Credit 06

DSE2T: Computer Application and Research Methodology Credit 04

Course Contents:

A. Computer

1. Computer fundamental – Basic anatomy of computer, generation of computer, application of computer.
2. Hardware and Software concept – Storage devices, system software, multi programming operating system, multi tasking operating system.
3. Computer viruses: Computer viruses, working of viruses, network viruses, antivirus, common antivirus software.
4. Data Processing – Types of data, types of data processing, step in data processing, application of data processing.
5. Principle of Programming – Programme language approaches.
6. Word Processing: Basic features of Text formatting; Creating documents; Heading Styles; Creating Reference Lists
7. Presentations: Creating Presentations; Pasting Charts etc in Presentations; Exporting Presentations as PDF

B. Research Methodology

1. General concept of research, types of research – Exp. Research, Action research, Historical research. Understanding the Nature of Research. Formulation of the Research Topic Approaches to Research and Research Strategy. Research Ethics.
2. Sampling – Criteria, Design, characteristics of good sampling, types of sampling. Sample Selection Methods

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

3. Data, data collection method, Criteria of good data, grouped data, ungrouped data. Using Secondary Data Using Primary Data – Collecting Data through Observations/ Interviews/ Questionnaire.
4. Experimental design –In brief.
5. Analysing Data. Writing Project Report - Referencing Styles. Review of Literature

DSE2P: Computer & Assignment Programme on Research Methodology Credit 02

1. Tabular form of data presentation in computer. File Creation and Management System. Word Processing.
2. Use of Microsoft Word and Excel with specific problem.
3. Assignment programme for Experimental design – covering any one of the following fields.
    i. Protein under nutrition and its recovery.
    ii. Vitamin or Mineral under nutrition and its recovery.
    iii. Dietary management of non-communicable disease.
    iv. Impact of nutrition education on awareness development in the field of personal health.

Suggested Readings:

1. Ranjit Kumar: Research Methodology - A Step by Step Guide for Beginners (Sage Publications, 4th Edn.)
2. Data Analysis using Microsoft Excel – Ash Narayan Sah, Excel Books India
3. Antia,F.P and Abraham,P Clinical Dietetics and Nutrition. Oxford University Press, New Delhi.
4. Joshi,SA. : Nutrition and Dietatics. Tata McGraw – Hill Publishing Co. Ltd., New Delhi.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University

SKILL ENHANCEMENT COURSE (SEC)

SEC- 1: Diet Therapy - I **Credits 02**

SEC1T: Diet Therapy - I **Credits 01**

Course Contents:

1. Definition of Dietetics, dietitian, goals of diet therapy.

2. **Basic concepts of Diet therapy:** Therapeutic adaptations of normal diet, Classification of therapeutic diets (Progressive diets – Normal, Soft, Clear fluid diet and Full fluid).

3. **Dietitians and hospital basic diets:**
- Types of dietitians and role of dietitian in a hospital. Routin hospital diets. Specially modified therapeutic diet.
- Nutritional adequacy of hospital diets, Basic concept and methods of (i) Oral feeding (ii) Tube feeding (iii) Parenteral feeding.

4. Etiology, symptoms, diagnostic tests and dietary management of Gastro-intestinal tract and liver diseases - Diarrhoea, Constipation, Irritable Bowel Syndrome, Peptic ulcer , Jaundice and Cirrhosis of liver.

5. Etiology, Risk factor, Sign and Symptom, Diagnosis and dietary management: Diabetes mellitus, Diabetes insipidus

6. Etiology, symptoms, diagnostic tests and dietary management of Malabsorption syndrome, Lactose intolerance, Food allergy

7. Anemia: definition, causes, classification and dietary management of nutritional anaemia.

8. Fever: Definition, causes, types, symptoms and dietary management.

SEC1P: Practical **Credits 01**

Planning and preparation of therapeutic diets for the following diseases: Diabetes melilitus (case specific), Hepatitis (case specific), gastrointestinal diseases (case specific), anemia (case specific).

Suggested Readings:

1. Anderson L, Dibble MV, Tukki PR, Mitchall HS, and Rynbergin HJ. Nutrition in Health and Disease. 17th edition, JB Lipincott & Co. Philadelphia.
2. Anita FP. Clinical Dietetics and Nutrition. Second Edition, Oxford University Press, Delhi.
3. Davis J and Sherer K (1994). Applied Nutrition and Diet Therapy for Nurses, 2nd Edition, WB Saunders Co.
4. Escott-Stump S (1998). Nutrition and Diagnosis Related Care, 4th Edition, Williams and Wilkinson
5. Garrow JS, James WPT and Ralph A (2000). Human Nutrition and Diabetics, 10th Edition, Churchill Livingstone.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

SEC- 2: Diet Therapy – II **Credits 02**

SEC2T: Diet Therapy –II **Credit 01**

Course Contents:

1. Etiology, clinical features, dietary and general management of Weight Imbalances**:** Underweight, Overweight and Obesity.

2. Eating disorder: Concept of Anorexia nervosa and bulimia.

3. Etiology, Risk factor, Sign and Symptom, Diagnosis and dietary management of Hypertension, Renal diseases in special reference to Glomereulo -nephritis, Uremia, and Nephrosis.

4. Diseases of the cardio vascular system:
a. Brief review of lipoproteins (TC, TG, LDL, HDL, VLDL),
b. Atherosclerosis – etiology, risk factor and dietary management.

5. Etiology, Risk factor, Sign and Symptom, Diagnosis and dietary management of Cancer

SEC2P: Practical **Credit 01**

1. Planning and preparation of therapeutic diet for obesity (Case Specific),
2. Planning and preparation of therapeutic diet for Hyper tension (Case Specific),
3. Planning and preparation of therapeutic diet for Renal Diseases (Case Specific),

Suggested Readings:

1. Anderson L, Dibble MV, Tukki PR, Mitchall HS, and Rynbergin HJ.: Nutrition in Health and Disease. 17th edition, J.B. Lipincott & Co. Philadelphia.
2. Anita FP. Clinical Dietetics and Nutrition. 2nd Edition, Oxford University Press, Delhi.
3. Davis J and Sherer K (1994). Applied Nutrition and Diet Therapy for Nurses, 2nd Edition, W.B. Saunders Co.
4. Escott-Stump S (1998): Nutrition and Diagnosis Related Care, 4th Edition, Williams and Wilkinson.
5. Garrow JS, James WPT and Ralph A (2000). Human Nutrition and Diabetics, 10th Edition, Churchill Livingstone.
6. Srilakshmi B (2016). Dietetics. New Age International.

SEC 3: Basic Molecular Biology and Immunology **Credits 02**

SEC3T: Basic Molecular Biology and Immunology **Credit 02**

Course Contents:

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

Molecular Biology

1. Nucleic acid: Bases, nucleosides and nucleotides.
2. DNA structure: DNA double helix (Watson and Crick Model). Types of DNA and RNA, DNA and RNA as genetic material.
4. DNA replication: Semi-conservative replication, Basic mechanism of replication (Prokaryotes / Eukaryotes).
5. Transcriptional unit and basic concept of transcription (Prokaryotes / Eukaryotes).
6. Genetic code and basic mechanism of translation (Prokaryotes / Eukaryotes).
7. Basic concept of genomics, proteomics and metabolomics.

Immunology:

1. Introduction: Basic concept of immunity, Types of immunity-innate, acquired, active and passive immunity.
2. Humoral immune system: Mechanisms of humoral immunity, Immunoglobulin isotypes - IgG, IgM, IgA, IgD, and IgE.
3. Cell mediated immune system: Types of effector T cells, mechanisms of cell mediated immunity.

Suggested Readings:

1. Bolandar, M. (2001). Molecular Endocrinology. Elsevier Science.
2. Alberts, B. et al. (2008). Molecular Biology of the Cell. 5th Ed. Garland Publishing House.
3. Yoshinori Mine (Editor), Kazuo Miyashita (Editor), Fereidoon Shahidi (Editor): Nutrigenomics and Proteomics in Health and Disease: Food Factors and Gene Interactions.
4. Van Ommen, B. (2004). Nutrigenomics: Exploiting systems biology in the nutrition and health arenas. Nutrition.20:4-8.
5. Simopoulos, A.P. and Ordovas, J.M. (Editors)(2004). Nutrigenetics and Nutrigenomics.
6. Roche, H.M. (2004). Dietary lipids and gene expression. Biochem Soc Trans. 32(Pt 6):999-1002.
7. Mount, D. W. Bioinformatics. Sequence and Genome Analysis, CSHL Press.
8. Jones.N. C., Pevzner, P. A. (2004). An Introduction to Bioinformatics Algorithms, MPI Press.
9. Kaput J, Rodriguez RL. (2004)Nutritional genomics: The next frontier in the postgenomic era. Physiol Genomics.16:166-177.
10. Kaput J. and Rodriguez. R. L. (2006). Nutritional Genomics. John Wiley & Sons, Inc.
11. DeBusk RM, Fogarty CP, Ordovas JM, Kornman KS. (2005). Nutritional genomics in practice: Where do we begin? *J Am Diet Assoc*. 105:589-598.

SEC- 3: Toxicology and Public Health **Credit 02**

SEC3T: Toxicology and Public Health **Credit 01**

Course Contents:

1. Toxic agents: Human exposure, Xenobiotics- Definition, types. Mechanism of action and resultant toxicities of the following xenobiotics: Metals: Lead, arsenic, Pesticides: Organophosphates, carbamates, organochlorine.

2. Eco-toxicology: Basic concepts, significances. Brief introduction to avian and aquatic toxicology. Movement and effect of toxic compounds in food chain (DDT, mercury). Bioaccumulation: Concept & significance. Biomagnification : Concepts and Significance. Concept of BOD and COD.

3. Concepts of health and community health. Factors affecting community health.

4. Maternal and Child mortality: Definition and causes. Role of health workers in the improvement of maternal and child health.

5. Immunization: Importance and immunization schedule for children and adults.

6. General idea about the contamination of food (chemical and microbial) – Sources and transmission, elementary ideas about food toxins,aflatoxins & food toxicology with reference to lead, cadmium & zinc.

7. Contamination of water and prevention of contaminations of diarrhea, dysentery,typhoid, hepatitis,preventive measures and dietary management of such diseases.

SEC3P: Practical **Credit 01**

1. Calculation of BMI of an individual and interpretation of results.
2. Growth charts – Plotting of growth charts for growth monitoring.
3. Formulation and demonstration of nutrition education tools such as charts, posters, and models related to health and nutrition education.

Suggested Reading:

1. Immunology, 8th edition, (2012), Male, D., Brostoff, J., Roth, D.B. and Roitt, I., Elseivier-Saunders.
2. An Introduction to Immunology, Immunochemistry and Immunobiology, 5th edition, (1988), Barrett, James T., Mosby Company, St. Louis..
3. Immunology: An Introduction, 4th edition, (1994), Tizard, I.R., Saunders College Publishing, Philadelphia.
4. Cassarett and Doull's Toxicology "The Basic Science of The Poisons" 7th edition (2008).
5. Cassarett and Doull's "Essentials of Toxicology" 2nd edition (2010), Klaassen and Whatkins, McGraw Hill Publisher.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

6. Introduction to Toxicology, 3rd edition (2001), John Timbrell, Taylor and Francis Publishers.
7. Principles of Toxicology, 2nd edition (2006), Stine Karen and Thomas M Brown, CRC press.
8. Lu's basic toxicology: Fundamentals target organ and risk assessment, 5th edition (2009), Frank C Lu and Sam Kacow, Informa Health care.

SEC - 4: Biostatistics and Bioinformatics **Credits 02**

SEC4T: Biostatistics and Bioinformatics

Course Contents:

Biostatistics

Introduction to Biostatistics: Variable and attribute; population vs sample; Census vs sample survey; Data and Data type. Primary and Secondary data. Arrangement of data; Frequency distribution. Graphical Representation of Data: Line diagram, Bar diagram, Pie Chart, Histogram.

Measures of Central Tendency.Arithmetic mean, Mode, Median.

Dispersion-Range,Variance, Standard deviation, Standard error of mean, standard score.

Testing Hypothesis and Goodness of fit- Null hypothesis, Level of significance, Probability, Normal distribution, Error of inference, Student's t-test, Paired t-test, Fisher's t-test, Chi-square test.Analysis of Variance(ANOVA)

Bioinformatics :

Introduction to bioinformatics : Computer Fundamentals – Programming languages in bioinformatics, Role of Super computer in biology. Historical background. Scope of bioinformatics – Genomics, Proteomics and Computer aided Drug Design (Structure based and ligand based approaches). Application of Bioinformatics. Bioinformatics and Health Informatics: Concept and applications.

Biological databases and data retrieval: Introduction to biological databases – Primary, secondary and composite databases, NCBI, nucleic acid databases (GenBank, EMBL,DDBJ,NDB), Protein databases (PIR, Swiss- Prot, TrEMBL, PDB). Nutrient data bases.

Suggested readings

1. Saxena Sanjay (2003) A First Course in Computers, Vikas Publishing House.
2. Pradeep and Sinha Preeti (2007) Foundations of Computing, 4th ed., BPB Publications.
3. Lesk M.A. (2008) Introduction to Bioinformatics. Oxford Publication, 3rd International Student Edition.
4. Rastogi S.C., Mendiratta N. and Rastogi P. (2007) Bioinformatics: methods and applications, genomics, proteomics and drug discovery, 2nd ed. Prentice Hall India Publication.
5. Primrose and Twyman (2003) Principles of Genome Analysis & Genomics. Blackwell.
6. Debjyoti Das (2012). Biostatistics.

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

7. E. Batschelet : Introduction to Mathematics for Life Scientists,Springer Verlag, International Student Edition, Narosa Publishing House, New Delhi (1971, 1975).
8. W. Danial : Biostatistics : A foundation for Analysis in Health Sciences, John Wiley and Sons Inc; 2004.
9. A Edmondson and D. Druce : Advanced Biology Statistics, Oxford University Press; 1996.

Or

SEC4T: Nutrition and Fitness **Credits 02**

SEC4T: Nutrition and Fitness

Course Contents

1. Body composition, concept of fat free mass, lean body mass and related measurements.
2. Understanding Fitness: Definition of fitness, health and related terms. Assessment of fitness, Approaches for keeping fit.
3. Importance and benefits of physical activity: Physical Activity – frequency, intensity, time and type with examples Physical Activity, physical activity guidelines and physical activity pyramid.
4. Importance of nutrition Role of nutrition in fitness, Nutritional guidelines for health and fitness, Nutritional supplements.
5. Importance of diet and exercise for weight management.
6. Fitness in athletics and sports.
7. Role of nutrients on sports performance.
8. Doping and related hazards.

Suggested Readings:

1. Campbell BI. (2014). Sports Nutrition: Enhancing Athletic Performance, CRC Press, Taylor& Francis,
2. Haff GG. (2008). Essentials of Sports Nutrition Study Guide, Humana Press.
3. Dunford M and Doyle JA. (2008). Nutrition for Sport and Exercise, Thomson Wadsworth.
4. Srilakshmi B. (2018). Dietetics, New Delhi: New Age International.

Or

SEC-4: Women Health & Nutrition **Credits 02**

SEC4T: Women Health & Nutrition

Course Contents

1. Factors (non-nutritional) affecting pregnancy outcome, importance of adequate weight gain during pregnancy, antenatal care and its schedule, Nutritional requirements during pregnancy and modification of existing diet and supplementation, Deficiency of nutrients,

Downloaded from Vidyasagar University by 106.196.3.252 on 29 November 2022 : 09:22:59; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BSC_GENERAL/Nutrition_General.pdf

specially energy, iron folic acid, protein, calcium, iodine. Common problems of pregnancy and their managements, specially - nausea, vomiting, pica, food aversions, pregnancy induced hypertension, obesity, diabetes. Adolescent pregnancy.

2. Nutritional requirements during lactation, dietary management, food supplements, galactogogues, preparation for lactation. Care and preparation of nipples during breast feeding.

Suggested Readings:

1. Ghosh, S: The Feeding and Care of Infants arid Young Children, VHAI. 6th Ed. Delhi.
2. WHO: A growth chart for International use In Maternal and Children Health Care, Geneva.
3. Mann and Truswell: Essentials of Human Nitration, Oxford University press.
4. Indian Council of Medical Research: Nutrient Requirements and Recommended- Dietary Allowance for Indians, New Delhi.

List of Core Courses and Electives

Core Course (CC)

DSC- 1A: Foundation and History of Physical Education
DSC-1B: Management of Physical Education and Sports
DSC-1C: Anatomy, Physiology and Exercise Physiology
DSC-1D: Health Education, Physical Fitness and Wellness

Discipline Specific Electives (DSE)

DSE-1A: Tests, Measurements and Evaluation in Physical Education
Or
DSE-1A: Psychology in Physical Education and Sports
Or
DSE-1A: Environmental Education
DSE-1B: Sports Training
Or
DSE-1B: Project Work

Skill Enhancement Course (SEC)

SEC- 1: Indian Games and Racket Sports
SEC- 2: Ball Games
SEC- 3: Gymnastics and Yoga
Or
SEC-3: Computer Application in Education
SEC-4: Track and Field

Generic Elective (GE)
[Interdisciplinary for other Departments]

GE-1: Modern Trends and Practices in Physical Education & Exercise Sciences
Or
GE-1: Foundation and History of Physical Education
Or
GE-1: Management of Physical Education and Sports
GE-2: Health Education and Tests & Measurements in Physical Education
Or
GE-2: Anatomy, Physiology and Exercise Physiology
Or
GE-2: Yoga Education

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

Core Courses (CC)

DSC-1A (CC-1): Foundation and History of Physical Education **Credits 06**

DSC1AT: Foundation and History of Physical Education **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Meaning, definition and scope of Physical Education.
1.2. Aims and objectives of Physical Education.
1.3. Misconception and modern concept of Physical Education.
1.4. Needs and importance of Physical Education in modern society.

Unit- II: Biological and Sociological Foundations of Physical Education

2.1. Biological Foundation- Meaning and definition of growth and development. Factors affecting growth and development. Differences of growth and development. Principles of growth and development.
2.2. Age- Chronological age, anatomical age, physiological age and mental age.
2.3. Sociological Foundation- Meaning and definition of Sociology, Society, Socialization in Physical Education and Sports, Sports Ethics.
2.4. Role of games and sports in National and International integration.

Unit- III: History of Physical Education

3.1 Historical development of Physical Education and Sports in India- Pre-Independence period and Post-Independence period.
3.2 Olympic Movement- Ancient Olympic Games and Modern Olympic Games.
3.3 Brief historical background of Asian Games and Commonwealth Games.
3.4 National Sports Awards- Arjuna Award, Rajiv Gandhi Khel Ratna Award, Dronacharya Award, Dhyanchand Award.

Unit- IV: Yoga Education

4.1 Meaning and definition of the term Yoga, types, aims, objectives and importance of Yoga.
4.2 History of Yoga.
4.3 Astanga Yoga
4.4 Hatha Yoga

DSC1AP: Field Practical **Credits 02**

1. Marching- fall in attention, Stand at ease, stand easy, Eyes right, Eyes front, Right Turn, Left Turn, About Turn, Mark Time Mark, Forward Mark
2. Learn and demonstrate the technique of Suryanamaskar.
3. Development of physical fitness through Callisthenics and Aerobic activities.

Suggested Readings:

1. Graham, G. (2001) Teaching Children Physical Education: Becoming a Master Teacher. Human Kinetics, Champaign, Illinois, USA.
2. Kamlesh, M.L. & Singh, M.K. (2006) Physical Education (Naveen Publication).
3. Lau, S.K. (1999) Great Indian Players, New Delhi, Sports.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

4. Lumpkin, A. (2007) Introduction to Physical Education, Exercise Science and Sports Studies, McGraw Hill, New York, USA.
5. Siedentop, D. (2004) Introduction to Physical Education, Fitness and Sport, McGraw Hill Companies Inc., New York, USA.
6. Shaffer, D.R. (2002) Development Psychology: Childhood and Adolescence. Thomson, Sydney, Australia.
7. Shukla, (2000) Mother on Education, National Council of Teacher Education, New Delhi.
8. Singh, A. et al. (2000) Essential of Physical Education, Kalyani Publishers, Ludhiana, Punjab.
9. Wuest, D.A. & C.A. Bucher (2006) Foundation of Physical Education, Exercise Science, and Sports. McGraw Hill Companies Inc.; New York, USA.
10. Fahey, T.D., M.P. Insel and W.T. Rath (2006) Fit & Well: Core Concepts and Labs in Physical Fitness, McGraw Hill, New York.
11. Kansal, D.K. (2012) A Practical Approach to Test Measurement and Evaluation Sports and Spiritual Science Publication, New Delhi.

DSC-1B (CC- 2): Management of Physical Education and Sports Credits 06

DSC1BT: Management of Physical Education and Sports Credits 04

Course Contents:

Unit- I: Introduction

1.1. Concept and definition of Sports Management.
1.2. Purpose of Sports Management, Importantance of Sports Management,
1.3. Principles of Sports Management.
1.4. Sports Manager and his duties.

Unit- II: Tournaments

2.1. Tournaments: Meaning and definition, and types of tournaments (Knock-out, League, Combination, Challenge).
2.2. Procedure of drawing fixture.
2.3. Method of organizing Annual Athletic Meet and Play Day.
2.4. Method of organizing of Intramural and Extramural competition.

Unit- III: Facilities and Equipments

3.1 Method of calculation of Standard Athletic Track marking.
3.2 Care and maintenance of play ground and gymnasium.
3.3 Importance, care and maintenance of sports equipment.
3.4 Time Table: Meaning, importance and factors affecting school Physical Education Time Table.

Unit- IV: Leadership

4.1 Meaning and definition of leadership.
4.2 Qualities of good leader in Physical Education.
4.3 Types of Leadership.
4.4 Principles of leadership activities.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

DSC1BP: Practical **Credits 02**

1. Lay out knowledge and Officiating ability of Track and field events
2. Lay out knowledge and Officiating ability of Games: Football, Kabaddi, Kho-Kho,Volleyball, Hand Ball, Net Ball, Throw Ball, Badminton and Table Tennis.
3. Gymnastic and Yoga Scoring

Suggested Readings :

- Broyles, F. J. &Rober, H. D. (1979). Administration of sports, Athletic programme: A Managerial Approach. New York: Prentice hall Inc.
- Bucher, C. A. (1983). Administration of Physical Education and Athletic programme. St. Lolis: The C.V. Hosby Co.
- Kozman, H.C. Cassidly, R. & Jackson, C. (1960).Methods in Physical Education. London: W.B. Saunders Co.
- Pandy, L.K. (1977). Methods in Physical Education. Delhe: Metropolitan Book Depo.
- Sharma, V.M. & Tiwari, R.H.: (1979). Teaching Methods in Physical Education. Amaravati: Shakti Publication.
- Thomas, J. P. (1967). Organization & administration of Physical Education. Madras: Gyanodayal Press.
- Tirunarayanan, C. &Hariharan, S. (1969). Methods in Physical Education.Karaikudi: South India Press.
- Voltmer, E. F. & Esslinger, A. A. (1979).The organization and administration of Physical Education. New York: Prentice Hall Inc.
- Singh, A. et al. (2010) Essential of Physical Education. Kalyayani Publishers.

DSC-1C (CC- 3): Anatomy, Physiology and Exercise Physiology **Credits 06**

DSC1CT: Anatomy, Physiology and Exercise Physiology **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Meaning and definition of Human Anatomy, Physiology and Exercise Physiology.
1.2. Importance of Human Anatomy, Physiology and Exercise Physiology in Physical Education.
1.3. Cell- Structure and function.
1.4. Tissue- Types and functions.

Unit- II: Musculo-skeletal System

2.1. Skeletal System- Structure of Skeletal System. Classification and locations of bones and joints. Anatomical differences between male and female.
2.2. Muscular System- Type, location, function and structure of muscle.
2.3. Types of muscular contraction.
2.4. Effect of exercise and training on muscular system.

Unit- III: Circulatory System

3.1 Blood- Composition and function.
3.2 Heart- Structure and functions. Mechanism of blood circulation through heart.
3.3 Blood Pressure, Athletic Heart and Bradycardia.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

3.4 Effect of exercise and training on circulatory system.

Unit- IV: Respiratory System

4.1 Structure and function of Respiratory organs.
4.2 Mechanism of Respiration.
4.3 Vital Capacity, O_2 Debt and Second Wind.
4.4 Effect of exercise and training on respiratory system.

DSC1CP: Practical **Credits 02**

1. Assessment of BMI, and WHR.
2. Measurement of Blood Pressure, Vital Capacity, Respiratory rate, Heart Rate, Limb length, PEI, and Pick flow Rate.

Suggested Readings:

- Amrit Kumar, R, Moses. (1995). Introduction to Exercise Physiology. Madras: Poompugar Pathipagam.
- Clarke, D.H. (1975). Exercise Physiology. New Jersey: Prentice Hall Inc., Englewood Cliffs.
- David, L Costill. (2004). Physiology of Sports and Exercise. Human Kinetics.
- Fox, E.L., and Mathews, D.K. (1981). The Physiological Basis of Physical Education and Athletics. Philadelphia: Sanders College Publishing.
- Guyton, A.C. (1976). Textbook of Medical Physiology. Philadelphia: W.B. Sanders co. Richard, W. Bowers. (1989). Sports Physiology. WMC: Brown Publishers.
- Sandhya Tiwaji. (1999). Exercise Physiology. Sports Publishers.
- Shaver, L. (1981). Essentials of Exercise Physiology. New Delhi: Subject Publications.
- Vincent, T. Murche. (2007). Elementary Physiology. Hyderabad: Sports Publication.
- William, D. Mc Aradle. (1996). Exercise Physiology, Energy, Nutrition and Human Performance. Philadelphia: Lippincott Williams and Wilkins Company.

DSC-1D (CC- 4): Health Education, Physical Fitness and Wellness **Credits 06**

DSC1DT: Health Education, Physical Fitness and Wellness **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Concept, definition and dimension of Health.
1.2. Definition, aims, objectives and principles of Health Education.
1.3. Activities of Health Agencies- World Health Organization (WHO), United Nations Educational Scientific and Cultural Organization (UNESCO) and United Nations International Children's Emergency Fund (UNICEF)
1.4. School Health Program- Health Service, Health Instruction, Health Supervision, Health appraisal and Health Record, Personal hygiene.

Unit- II: Health Problems in India- Prevention and Control

2.1. Communicable Diseases- Malaria, Dengue and Chicken Pox and Diarrhea.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

2.2. Non-Communicable Diseases- Obesity, Diabetes and Asthma.
2.3. Nutrition- Nutritional requirements for daily living. Preparation and Principles of Balance Diet. Health disorders due to deficiencies of Protein, Vitamins and Minerals.
2.4. Postural deformities- Causes and corrective exercises of Kyphosis, Lordosis, Scoliosis, Knock Knee, Flat Foot and Bow Legs.

Unit- III: Physical Fitness and Wellness
3.1 Physical Fitness- Meaning, definition and importance of Physical Fitness.
3.2 Components of Physical Fitness- Health and performance related Physical Fitness.
3.3 Concept of Wellness. Relationship between physical activities and wellness.
3.4 Ageing- Physical activities and its importance.

Unit- IV: Health and First-aid Management
4.1 First aid- Meaning, definition, importance and golden rules of First-aid.
4.2 Concept of sports injuries- Sprain, Strain, Facture, Dislocation and Wound.
4.3 Management of sports injuries through the application of Hydro-therapy and Thermo-therapy.
4.4 Physiotherapy: Basic concept, types & principles. Management of sports injuries through the application of exercise and massage therapy.

DSC1DP: Practical **Credits 02**

1. First aid - Triangular Bandage: Slings (Arm Sling, Collar & Cuff Sling), Roller Bandages: Simple Spiral, Reverse Spiral, Figure of Eight, Spica.
2. Practical Knowledge of Hydro-therapy, Thermo-therapy and Cryo-therapy.

Suggested Readings:

- Bucher, Charles A. "Administration of Health and Physical Education Programme".
- Delbert, Oberteuffer, et. al." The School Health Education".
- Ghosh, B.N. "Treaties of Hygiene and Public Health".
- Hanlon, John J. "Principles of Public Health Administration" 2003.
- Turner, C.E. "The School Health and Health Education".
- Moss et. al. "Health Education" (National Education Association of U.T.A.).
- Nemir A. 'The School Health Education" (Harber and Brothers, New York).
- Nutrition Encyclopedia, edited by Delores C.S. James, The Gale Group, Inc.

Discipline Specific Electives (DSE)

DSE- 1A: Tests, Measurements and Evaluation in Physical Education **Credits 06**

DSE1AT: Tests, Measurements and Evaluation in Physical Education **Credits 04**

Course Contents:

Unit- I: Introduction
1.1. Concept of test, measurement & evaluation.
1.2. Criteria of good test.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

1.3. Principles of evaluation.
1.4. Importance of Test, Measurement and Evaluation in Physical Education and Sports.

Unit- II: Measurements of Body Compositions and Somatotype Assessment
2.1 Body Mass Index (BMI) - Concept and method of measurement.
2.2. Body Fat - Concept and method of measurement.
2.3. Lean Body Mass (LBM) - Concept and method of measurement.
2.4. Somatotype- Concept and method of measurement.

Unit- III: Fitness Test
3.1 Kraus-Weber Muscular Strength Test
3.2 AAHPER Youth Fitness Test
3.3 Queens College Step Test
3.4 Harvard Step Test

Unit- IV: Sports Skill Test
4.1 Lockhart and McPherson Badminton Skill Test
4.2 Johnson Basketball Test Battery
4.3 McDonald Soccer Test
4.4 Brady Volleyball Test

DSE1AP: Practical **Credits 02**
1. Assessment of somatotype and Body fat percentage (%)
2. Assessment of AAHPER Youth Fitness Test and Harvard Step Test.

Suggested Readings:

- Authors Guide (2013): ACSM's Health Related Physical Fitness Assessment Manual, USA: ACSM Publications.
- Collins, R.D., & Hodges P.B. (2001): A Comprehensive Guide to Sports Skills Tests and Measurement (2nd edition) Lanham: Scarecrow Press.

DSE- 1A: Psychology in Physical Education and Sports **Credits 06**

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

DSE1AT: Psychology in Physical Education and Sports **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Meaning and definition Psychology.
1.2. Importance and scope of Psychology.
1.3. Meaning and definition Sports Psychology.
1.4. Need for knowledge of Sports Psychology in the field of Physical Education.

Unit- II: Learning

2.1. Meaning and definition of learning.
2.2. Theories of learning and laws of learning.
2.3. Learning curve: Meaning and types.
2.4. Transfer of learning- Meaning, definition type and factors affecting transfer of learning.

Unit- III: Psychological Factors

3.1 Motivation - Meaning, definition, type and importance of motivation in Physical Education and Sports.
3.2 Emotion- Meaning, definition, type and importance of emotion in Physical Education and Sports.
3.3 Personality- Meaning, definition and types, personality traits.
3.4 Role of physical activities in the development of personality.

Unit- IV: Stress and Anxiety

4.1 Stress- Meaning, definition and types of Stress.
4.2 Causes of Stress.
4.3 Anxiety- Meaning, definition and types of Anxiety.
4.4 Management of Stress and Anxiety through physical activity and sports.

DSE1AP: Practical **Credits 02**

1. Assessment of Personality, Stress and Anxiety.
2. Measurement of Reaction Time, Depth Perception and Mirror Drawing.

Suggested Readings:

- Authors Guide (2013): National Library of Educational and Psychological Test (NLEPT) Catalogue of Tests, New Delhi: National Council of Educational Research and Training Publication.
- Jain. (2002): Sports Sociology, Heal Sahety Kendre Publishers.

DSE-1A: Environmental Education **Credits 06**

DSE1AT: Environmental Education

Course Contents:

Unit-I: Environmental Education

1. Environmental Education: Concept, Characteristics, Components and Scope
2. Historical Background of Environmental Education

Unit-II: Education of Environmental Concepts

1. Concept of Environment and Ecosystem
2. Disasters: Natural and Man Made

Unit III: Environmental Education and Social Issues

1. Education for Sustainable development: From Unsustainable to Sustainable development.
2. Education of Urban Environment: Problems related to energy and water

Unit-IV: Approaches and Methods of Environmental Education

Approaches to Environmental Education: Interdisciplinary and Multidisciplinary Methods: Discussion, Seminar, And Workshop, Problem solving and Field survey.

Suggested Readings:

- Environmental Analysis of Water, Soil, Air by Saxena.
- Environmental Pollution and Bhopal Killing.
- Environmental Pollution of Cadmium by Rohatgi.
- Our Planet Our Health – WHO, Oxford Publications, 1992.
- Perspectives on Environment by I. R. Manners, M.W.M. Micksell
- Soil and water Conservation Engineering by Schwab, S. D., Frevert, R. K., Edminster, T.W. and Earns K. K. John Wiley and Sons.
- Water Pollution and Management by C. F. Vershney.

DSE – 1B: Sports Training **Credits 06**

DSE1BT: Sports Training **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Meaning and definition of Sports Training.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

1.2. Aim and characteristics of Sports Training.
1.3. Principles of Sports Training.
1.4. Importance of Sports Training.

Unit- II: Principle of Training and Conditioning

2.1. Warming up and cooling down- Meaning, types and methods.
2.2. Conditioning - Concept of Conditioning and its principles.
2.3. Training Methods- Circuit Training, Interval Training, Weight Training.
2.4. Periodisation- Meaning, types, aim and contents of different periods.

Unit- III: Training Load and Adaptation

3.1 Training Load - Meaning, definition, types and factors of training load.
3.2 Components of training load.
3.3 Over Load - Meaning, causes, symptoms and tackling of over load.
3.4 Adaptation - Meaning and conditions of adaptation.

Unit- IV: Training Techniques

4.1 Strength - Means, types and methods of strength development.
4.2 Speed - Means, types and methods of speed development.
4.3 Endurance - Means, types and methods of endurance development.
4.4 Flexibility - Means, types and methods of flexibility development.

DSE1BP: PRACTICAL **Credits 02**

1. Practical Experience of Weight Training and Circuit Training.
2. Measurement of Speed, Strength (Grip/Leg), Explosive Strength (Leg) and Flexibility.

Suggested Readings:

- Bunn, J.N. (1998) Scientific Principles of Coaching, New Jersey Engle Wood Cliffs, Prentice Hall Inc.
- Cart, E. Klafs &Daniel, D. Arnheim (1999) Modern Principles of Athletic Training St. Louis C. V. Mosphy Company.
- Daniel, D. Arnheim (1991) Principles of Athletic Training, St. Luis, Mosby Year Book.
- David R. Mottram (1996) Drugs in Sport, School of Pharmacy, Liverpool: John Moore University.
- Gary, T. Moran (1997) – Cross Training for Sports, Canada : Human Kinetics Hardayal.
- Singh (1991) Science of Sports Training, New Delhi, DVS Publications.
- Jensen, C.R. & Fisher A.G. (2000) Scientific Basic of Athletic Conditioning, Philadelphia.
- Ronald, P. Pfeiffer (1998) Concepts of Athletics Training 2nd Edition, London: Jones and Bartlett Publications.
- Yograj Thani (2003), Sports Training, Delhi : Sports Publications

DSE – 1B: Project Work **Credits 06**

Guideline:

Assessment and Comparison of Body Composition and AAHPER Youth Fitness Components among Physical Education Students of Even Semesters in Under-Graduate Colleges affiliated to Vidyasagar University.

Outline of the Project Work:

- Introduction,
- Procedure,
- Results,
- Conclusions,
- Recommendations.

Body Composition Components:

1. Height,
2. Weight,
3. Body Mass Index (BMI),
4. Fat %,
5. Lean Body Mass (LBM).

AAHPER Youth Fitness Components:

1. Pull Ups (for boy) / Flexed Arm Hang (for girls),
2. Sit Ups,
3. 50 Yard Dash,
4. Standing Broad Jump,
5. Shuttle Run,
6. 600 Yard Run & Walk

Instructions:

1. Student group consisted of maximum four (04) members,
2. Number of students of both the college should be minimum 12 students each group,
3. Methodology of every test items should be written with Objective(s), Equipments, Test Administration and Scoring.
4. A group Photograph of all subjects of two college groups should be present on Project Work,
5. Every test item of all 11 components of individual subject should be present on Project Work,
6. Only average value of all eleven test items must have reflected on table,
7. Data should be presented on tabular form with unit,
8. Separate comparison table of all test items should be reflected,
9. Declaration and acknowledgement also be there.

Skill Enhancement Courses (SEC)

SEC- 1: Indian Games and Racket Sports (Practical) **Credits 02**

Course Contents:

A. KABADDI

a. Fundamental skills

1. Skills in Raiding: Touching with hands, Use of leg-toe touch, squat leg thrust, side kick, mule kick, arrow fly kick, crossing of baulk line. Crossing of Bonus line.
2. Skills of holding the raider: Various formations, catching from particular position, different catches, catching formation and techniques.
3. Additional skills in raiding: Escaping from various holds, techniques of escaping from chain formation, offense and defence.
4. Game practice with application of Rules and Regulations.

b. Rules and their interpretations, and duties of the officials.

B. KHO-KHO

a. Fundamental skills

1. Skills in Chasing: Sit on the box (Parallel & Bullet toe method), Get up from the box (Proximal & Distyal foot method), Give Kho (Simple, Early, Late & Judgment), Pole Turn, Pole Dive, Tapping, Hammering, Rectification of foul.
2. Skills in running: Chain Play, Ring play and Chain & Ring mixed play.
3. Game practice with application of Rules and Regulations.

b. Rules and their interpretations and duties of the officials.

C. BADMINTON

a. Fundamental skills

1. Basic Knowledge: Various parts of the Racket and Grip.
2. Service: Short service, Long service, Long-high service.
3. Shots: Over head shot, Defensive clear shot, Attacking clear shot, Drop shot, Net shot, Smash.
4. Game practice with application of Rules and Regulations.

b. Rules and their interpretations and duties of the officials.

D. TABLE TENNIS

a. Fundamental skills

1. Basic Knowledge: Various parts of the Racket and Grip (Shake Hand & Pen Hold Grip).
2. Stance: Alternate & Parallel.
3. Push and Service: Backhand & Forehand.
4. Chop: Backhand & Forehand.
5. Receive: Push and Chop with both Backhand & Forehand.
6. Game practice with application of Rules and Regulations.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University

B. Rules and their interpretations and duties of the officials.

SEC- 2: Ball Games (Practical) Credits 02

Course Contents:

A. FOOTBALL

a. Fundamental Skills

1. Kicking: Kicking the ball with inside of the foot, Kicking the ball with Full Instep of the foot, Kicking the ball with Inner Instep of the foot, Kicking the ball with Outer Instep of the foot and Lofted Kick.
2. Trapping: Trapping- the Rolling ball, and the Bouncing ball with sole of the foot.
3. Dribbling: Dribbling the ball with Instep of the foot, Dribbling the ball with Inner and Outer Instep of the foot.
4. Heading: In standing, running and jumping condition.
5. Throw-in: Standing throw-in and Running throw-in.
6. Feinting: With the lower limb and upper part of the body.
7. Tackling: Simple Tackling, Slide Tackling.
8. Goal Keeping: Collection of Ball, Ball clearance- kicking, throwing and deflecting.
9. Game practice with application of Rules and Regulations.

b. Rules and their interpretation and duties of officials.

B. HANDBALL

a. Fundamental Skills

1. Catching, Throwing and Ball control,
2. Goal Throws: Jump shot, Center shot, Dive shot, Reverse shot.
3. Dribbling: High and low.
4. Attack and counter attack, simple counter attack, counter attack from two wings and center.
5. Blocking, GoalKeeping and Defensive skills.
6. Game practice with application of Rules and Regulations.

b. Rules and their interpretation and duties of officials.

B. BASKETBALL

a. Fundamental Skills

1. Passing: Two hand Chest Pass, Two hands Bounce Pass, One hand Baseball Pass, Side arm Pass, Overhead Pass, Hook Pass.
2. Receiving: Two hand receiving, One hand receiving, Receiving in stationary position, Receiving while Jumping and Receiving while Running.
3. Dribbling: How to start dribble, drop dribble, High Dribble, Low Dribble, Reverse Dribble, Rolling Dribble.
4. Shooting: Lay-up shot and its variations, One hand set shot, Two hands jump shot, Hook shot, Free Throw.
5. Rebounding: Defensive rebound and Offensive rebound.
6. Individual Defence: Guarding the player with the ball and without the ball, Pivoting.
7. Game practice with application of Rules and Regulations.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

b. Rules and their interpretation and duties of officials.

C. VOLLEYBALL

a. Fundamental skills

1. Service: Under arm service, Side arm service, Tennis service, Floating service.
2. Pass: Under arm pass, Over head pass.
3. Spiking and Blocking.
4. Game practice with application of Rules and Regulations.

b. Rules and their interpretation and duties of officials.

D. NETBALL

a. Fundamental skills

1. Catching: one handed, two handed, with feet grounded and in flight.
2. Throwing (Different passes and their uses): One hand passes (shoulder, high shoulder, underarm, bounce, lob), two hand passes (Push, overhead and bounce).
3. Footwork: Landing on one foot, landing on two feet, Pivot, Running pass.
4. Shooting: One hand, forward step shot, and backward step shot.
5. Techniques of free dodge and sprint, sudden sprint, sprint and stop, sprinting with change at speed.
6. Defending: Marking the player, marking the ball, blocking, inside the circle, outside the circle. Defending the circle edge against the passing.
7. Intercepting: Pass and shot.
8. Game practice with application of Rules and Regulations.

b. Rules and their interpretation and duties of officials.

E. THROWBALL

a. Fundamental skills:

Overhand service, Side arm service, two hand catching, one hand overhead return, side arm return.

b. Rules and their interpretations and duties of official

SEC- 3: Gymnastics and Yoga (Practical) Credits 02

Course Contents:

GYMNASTICS

1. Compulsory

1.1. Forward Roll
1.2. T-Balance
1.3. Forward Roll with Split leg
1.4. Backward Roll
1.5. Cart-Wheel

[Note: Perform the above Gymnastic skills continuously in the same sequence]

2. Optional

2.1. Dive and Forward Roll

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

2.2. Hand Spring
2.3. Head Spring
2.4. Neck Spring
2.5. Hand Stand and Forward Roll
2.6. Summersault

3. YOGA
3.1 **Asanas**
3.1.1 Ardhachandrasana
3.1.2. Brikshasana
3.1.3. Padahastasana

3.2. **Sitting Position**
3.2.1. Ardhakurmasana
3.2.2. Paschimottanasana
3.2.3. Gomukhasana

3.3. **Supine Position**
3.3.1. Setubandhasana
3.3.2. Halasana
3.3.3. Matsyasana

3.4 **Prone Position**
3.4.1 Bhujangasana
3.4.2 Salvasana
3.4.3 Dhanurasana

3.5 **Inverted Position**
3.5.1 Sarbangasana
3.5.2 Shirsasana
3.5.3 Bhagrasana
[Note: One Asana is compulsory from each position]

4. Pranayama
4.1. Kapalbhati
4.2. Bhramri
4.3. Anulam Vilom.

Or

SEC-3: Computer Application in Education **Credits 02**

SEC3T: Computer Application in Education (Theory)

Course Contents:

Unit I:
MS office:

- MS Word

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

- MS Power Point
- MS Excel

Unit II:

- Concepts of information and communication technology; Universal access VS Digital Divide - issues and initiatives;
- Challenges of Integration of ICT in School; Aims and objectives of National Policy on Information and Communication Technology (ICT) in School Education in India.

Unit III:

- Components and Objectives of National Mission on Education, through ICT (NMEICT), Spoken Tutorials Gyan Darshan, Gyanvani, Sakshat Portal, e Gyan Kosh; Virtual laboratory and Haptic technology

Unit IV:
Internet

- Introduction to Internet
- E-mail, Search Engines, Info-Savvy Skills; Digital Age Skills, safe surfing mode

Unit V: Educational Resources

- Internet resources for different disciplines like natural sciences, social sciences, Humanities and Mathematics.
- General Introduction to E-learning, Mobile-learning, distance learning, On-line learning,
- Virtual University, Wikipedia, Massive Open Online Courses (MOOCs);
- Social networking

Unit VI: ICT Integrated Education

- On line Admissions
- Digital Lesson Designing
- Evaluation Rubrics
- E-Portfolios of Learners
- Time-Space-Personnel Management
- Learning Resources Management
- Web Based Instruction
- Office Automation
- E-guidance & counseling
- E-modules
- E-learning Resources

SEC- 4: Track and Field (Practical) **Credits 02**

Course Contents:

1. Track Events

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

1.1. Starting Techniques: Standing start and Crouch start (its variations) use of Block.
1.2. Acceleration with proper running techniques.
1.3. Finishing technique: Run Through, Forward Lunging and Shoulder Shrug.
1.4. Relay Race: Starting, Baton Holding/Carrying, Baton Exchange in between zone, and Finishing.

2. Field events

2.1. Long Jump: Approach Run, Take-off, Flight in the air (Hang Style/Hitch Kick) and Landing.
2.2. High jump: Approach Run, Take-off, Bar Clearance (Straddle) and Landing.
2.3. Shot put: Holding the Shot, Placement, Initial Stance, Glide, Delivery Stance and Recovery (Perry O'Brien Technique).
2.4. Discus Throw: Holding the Discus, Initial Stance, Primary Swing, Turn, Release and Recovery (Rotation in the circle).
2.5. Javelin Throw: Grip, Carry, Release and Recovery (3/5 Impulse stride).

Generic Elective (GE) [Interdisciplinary for other Departments]

GE- 1: Modern Trends and Practices in Physical Education & Exercise Sciences

Credits 06

GE1T: Modern Trends and Practices in Physical Education& Exercise Sciences

Course Contents:

Unit- I: Introduction

1.1. Meaning, definition and importance of physical Education and Sports.
1.2. Aims, objectives and scope of Physical Education.
1.3. Types of sports and their utility in physical education.
1.4. Meaning, definition and importance of Physical fitness and Motor fitness. Difference between Physical fitness and Motor fitness. Components of Physical fitness.

Unit- II: Biological, Psychological and Sociological Foundations of Physical Education

2.1. Biological Foundation- Meaning and definition of growth and development. Factors affecting growth and development. Differences between growth and development. Principles of growth and development.
2.2. Meaning and definition of Psychology. Importance of Psychology in Physical Education. Qualities of good leader in Physical Education. Principles of leadership activities.
2.3. Sociological Foundation- Meaning and definition of Sociology. Social values and their importance. Socialization through Sports
2.4. Role of games and sports in National and International integration.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

Unit- III: History of Physical Education

3.1 Historical development of Physical Education and Sports in India- Pre-Independence period and Post-Independence period.
3.2 Ancient Olympic Games
3.3 Modern Olympic Games.
3.4 Asian Games

Unit- IV: Exercise Sciences

4.1 Meaning, definition and importance Exercise and Exercise Physiology.
4.2 Effects of short and long term exercise on Muscular systems.
4.3 Effects of short and long term exercise on Circulatory System.
4.4 Effects of short and long term exercise on Respiratory System.

Unit- II: Biological and Sociological Foundations of Physical Education

2.1. Biological Foundation- Meaning and definition of growth and development. Factors affecting growth and development. Differences of growth and development. Principles of growth and development.
2.2. Age- Chronological age, anatomical age, physiological age and mental age.
2.3. Sociological Foundation- Meaning and definition of Sociology, Society, Socialization in Physical Education and Sports, Sports Ethic.
2.4. Role of games and sports in National and International integration.

Unit- III: History of Physical Education

3.1 Historical development of Physical Education and Sports in India- Pre-Independence period and Post-Independence period.
3.2 Olympic Movement- Ancient Olympic Games and Modern Olympic Games.
3.3 Brief historical background of Asian Games and Commonwealth Games.
3.4 National Sports Awards- Arjuna Award, Rajiv Gandhi Khel Ratna Award, Dronacharya Award, Dhyanchand Award.

Unit- IV: Yoga Education

4.1 Meaning and definition of the term Yoga, types, aim, objectives and important of Yoga.
4.2 History of Yoga.
4.3 Astanga Yoga
4.4 Hatha Yoga

DSC1AP: Practical **Credits 02**

1. Marching- fall in attention, Stand at ease, stand easy, Eyes right, Eyes front, Right Turn, Left Turn, About Turn, Mark Time Mark, Forward Mark
2. Learn and demonstrate the technique of Suryanamaskar.
3. Development of physical fitness through Callisthenics and Aerobic activities.

Suggested Readings:

- Graham, G. (2001) Teaching Children Physical Education: Becoming a Master Teacher. Human Kinetics, Champaign, Illinois, USA.
- Kamlesh, M.L. & Singh, M.K. (2006) Physical Education (Naveen Publication).
- Lau, S.K. (1999) Great Indian Players, New Delhi, Sports.
- Lumpkin, A. (2007) Introduction to Physical Education, Exercise Science and Sports Studies, McGraw Hill, New York, USA.
- Siedentop, D. (2004) Introduction to Physical Education, Fitness and Sport, McGraw Hill Companies Inc., New York, USA.
- Shaffer, D.R. (2002) Development Psychology: Childhood and Adolescence. Thomson, Sydney, Australia.
- Shukla, (2000) Mother on Education, National Council of Teacher Education, New Delhi.
- Singh, A. et al. (2000) Essential of Physical Education, Kalyani Publishers, Ludhiana, Punjab.

Or

GE-1: Management of Physical Education and Sports **Credits 06**

GE1T: Management of Physical Education and Sports **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Concept and definition of Sports Management.
1.2. Purpose of Sports Management, Important of Sports Management,
1.3. Principles of Sports Management.
1.4. Sports Manager and his duties.

Unit- II: Tournaments

2.1. Tournaments: Meaning and definition and types of tournaments (Knock-out, League, Combination, Challenge).
2.2. Procedure of drawing fixture.
2.3. Method of organising Annual Athletic Meet and Play Day.
2.4. Method of organising of Intramural and Extramural competition.

Unit- III: Facilities and Equipments

3.1 Method of calculation of Standard Athletic Track marking.
3.2 Care and maintenance of play ground and gymnasium.
3.3 Importance, care and maintenance of sports equipments.
3.4 Time Table: Meaning, importance and factors affecting school Physical Education Time Table.

Unit- IV: Leadership

4.1 Meaning and definition of leadership.
4.2 Qualities of good leader in Physical Education.
4.3 Types of Leadership.
4.4 Principles of leadership activities.

GE1P: Practical **Credits 02**

1. Lay out knowledge and Officiating ability of Track and field events
2. Lay out knowledge and Officiating ability of Games: Football, Kabaddi, Kho-Kho, Volleyball, Hand Ball, Net Ball, Throw Ball, Badminton, and Table Tennis.
3. Gymnastic and Yoga Scoring

Suggested Readings:

Broyles, F. J. &Rober, H. D. (1979). Administration of sports, Athletic programme: A Managerial Approach. New York: Prentice hall Inc.

Bucher, C. A. (1983). Administration of Physical Education and Athletic programme. St. Lolis: The C.V. Hosby Co.

- Singh, A. et al. (2010) Essential of Physical Education. Kalyayani Publishers.

GE-2: Health Education and Tests & Measurements in Physical Education

Credits 06

GE2T: Health Education and Tests & Measurements in Physical Education

Credits 04

Course Contents:

Unit- I: Introduction

1.1. Concept, definition and dimension of Health.
1.2. Definition, aim, objectives and principles of Health Education.
1.3. Health Agencies- World Health Organization (WHO), United Nations Educational Scientific and Cultural Organization (UNESCO).
1.4. Nutrition- Nutritional requirements for daily living. Balance Diet. Health disorders due to deficiencies of Vitamins and Minerals.

Unit- II: Health and First-aid Management

2.1 First aid- Meaning, definition, importance and golden rules of First-aid.
2.2 Concept of sports injuries- Sprain, Strain, Facture, Dislocation and Wound.
2.3. Postural deformities- Causes and corrective exercise of Kyphosis, Lordosis, Scoliosis, Knock Knees and Flat Foot.
2.4. Hypo-kinetic Diseases and Physical Activities- Obesity and Diabetes
2.5 Management of sports injuries through the application of Hydro-therapy and Thermo-therapy.
2.6 Physiotherapy: Basic Concept, Types & Principles. Management of sports injuries through the application of Exercise and Massage therapy.

Unit- III: Measurement of Body Compositions and Somatotype Assessment

3.1 Body Mass Index (BMI) - Concept and method of measurement.
3.2 Body Fat - Concept and method of measurement.
3.3 Lean Body Mass (LBM) - Concept and method of measurement.
3.4 Somatotype - Concept and method of Assessment

Unit- IV: Fitness Test

4.1 Kraus-Weber Muscular Strength Test
4.2 AAHPER Youth Fitness Test
4.3 Queens College Step Test
4.4 Harvard Step Test

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

GE2P: Practical **Credits 02**

1. First aid- Triangular Bandage: Slings (Arm Sling, Collar & Cuff sling), Roller Bandages: Simple spiral, Reverse Spiral, figure of Eight, Spica.
2. Practical Knowledge of Hydro -therapy, Thermo - therapy and Cryo-therapy.
3. Assessment of somatotype and % body fat.
4. Assessment of AAHPER Youth Fitness Test and Harvard Step Test.

Suggested Readings:

- Bucher, Charles A. "Administration of Health and Physical Education Programme".
- Hanlon, John J. "Principles of Public Health Administration" 2003.
- Turner, C.E. "The School Health and Health Education".
- Nutrition Encyclopedia, edited by Delores C.S. James, The Gale Group, Inc.

GE-2: Anatomy, Physiology and Exercise Physiology **Credits 06**

GE2T: Anatomy, Physiology and Exercise Physiology **Credits 04**

Course Contents:

Unit- I: Introduction

1.1. Meaning and definition of Human Anatomy, Physiology and Exercise Physiology.

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

1.2. Importance of Human Anatomy, Physiology and Exercise Physiology in Physical Education.
1.3. Human Cell- Structure and function.
1.4. Tissue- Types and functions.

Unit- II: Musculo-skeletal System

2.1. Skeletal System- Structure of Skeletal System. Classification and location of bones and joints. Anatomical differences between male and female.
2.2. Muscular System- Type, location, function and structure of muscle.
2.3. Types of muscular contraction.
2.4. Effect of exercise and training on muscular system.

Unit- III: Circulatory System

3.1 Blood- Composition and function.
3.2 Heart- Structure and functions. Mechanism of blood circulation through heart.
3.3 Blood Pressure, Athletic Heart and Bradycardia.
3.4 Effect of exercise and training on circulatory system.

Unit- IV: Respiratory System

4.1 Structure and function of Respiratory organs.
4.2 Mechanism of Respiration.
4.3 Vital Capacity, O_2 Debt and Second Wind.
4.4 Effect of exercise and training on respiratory system.

GE2P: Practical **Credits 02**

1. Assessment of BMI, and WHR.
2. Measurement of Blood pressure, Vital capacity, Respiratory rate, Heart rate, Limb length, PEI, and Pick flow Rate.

Suggested Readings:

- Amrit Kumar, R, Moses. (1995). Introduction to Exercise Physiology. Madras: Poompugar Pathipagam.
- Clarke, D.H. (1975). Exercise Physiology. New Jersey: Prentice Hall Inc., Englewood Cliffs.
- David, L Costill. (2004). Physiology of Sports and Exercise. Human Kinetics.

GE-2: Yoga Education **Credits 06**

GE-2T: Yoga Education

Course Contents:

Unit –I:

- Basis of Yoga Meaning and Concept.
- Patanjala Yogasutra.
- Hathayoga Pradipika.

Unit –II:

- Concept of Yoga.
- Streams of Yoga.
- Raja Yoga: Eight Fold Path.
- Anand Mimamsa.

Unit –III:

- Theories of Yoga Practices.
- Asana.
- Pranayama.
- Kriyas.
- Dhyana.

Unit –IV:

- Practical Eight Step Method: Single Group and Double Group Practice.
- Asana.
- Pranayama.
- Relaxation Techniques

Suggested Readings:

- Gore, M.M. –Anatomy and Physiology of Yogic Practices; New Age Books, New Delhi,
- Coulter.H.David- Anatomy of Hathayoga; MLBD, New Delhi,
- Gharote, Manmath M. and Others- Application in Yoga; Lonavla,
- Saraswati, Swami Satyananda- Asana Pranayama & Mudra Bandha; Bihar School of Yoga, Munger,
- Tiwari, O.P.- Asana Why and How?; Kaivalyadhama, Lonavla
- Iyengar, B.K.S. Astadal Yoga Mala, (Vol. I-VIII); Allied Publishers Pvt. Ltd., Lucknow,

GE2P: Yoga Education (Practical) **Credits 02**

Practicals: YOGA

1. Asanas

1 Ardhachandrasana
2. Brikshasana

Downloaded from Vidyasagar University by 103.77.136.15 on 26 July 2023 : 12:07:21; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS_FULL/BA_GENERAL/Physical_Education_General_rev

3. Padahastasana

2. **Sitting Position**
   1. Ardhakurmasana
   .2. Paschimottanasana
   .3. Gomukhasana

3. **Supine Position**
   1. Setubandhasana
   2. Halasana
   3. Matsyasana

4**. Prone Position**
   1 Bhujangasana
   .2 Salvasana
   3 Dhanurasana

5**. Inverted Position**
. 1 Sarbangasana
   .2 Shirsasana
   3 Bhagrasana

[Note: One Asana is compulsory from each position]

6. **Pranayama**
   1. Kapalbhati
   2. Bhramri
   3. Anulam Vilom.

Semester -1

Core Courses

CC-1: Cellular Basis of Physiology — Credits 06

C1T1 : Cellular Basis of Physiology — Credits 04

Cell Biology and Structural Units of Human System:

Cell Types – Eukaryotic, Prokaryotic. Electron microscopic structure and functions of the organ cells of eukarytotic cells: Structure of plasma membrane – Bio-chemical components, their arrangement, membrane asymmetry and fluidity; Functions; Fluid mosaic model. Membrane transport: active and carrier mediated transport: Mechanism of exocytosis and endocytosis. Structure functions and control of ion channels. Artificial membrane: Liposome and its functions. Endoplasmic reticulum: EM structure and function (Molecular basis) of smooth and rough ER. Microsomes: basic functional aspects. Golgi complex: structure, its functions, EM structure and functions of nucleus. Peroxisomes and its function. Mitochondria: EM structure and functions of nucleus. Ribosomes – cytoribosomes and mitoribosomes; their structure and functions. Cytoskeleton: structure and its role in stabilization of cell shape. Microtubules and their role in cellular movements and secretions. Events of Cell cycle; Apoptosis Cell differentiation; Gap junction, Tight junction (structure and functions): Cell adhesion molecule (brief), Cell division, mitosis, meiosis.

Structure, classification, distribution and functions of different tissues. Development and Organization of different organs and systems of the human body.

Development and organization of different organs and systems.

Basic principle and use of different microscopes - light, phase contrast. Electron microscopy, Atomic force microscopy and Fluorescence microscopy, Spectrophotometer.

C1P1 : Histology — Credits 02

Study and Identification of Stained Sections of different Mammalian Tissue and Organs.

Bone, Cartilage, Trachea, Lungs, Spleen, Lymph gland, Esophagus, Stomach, Duodenum, Ileum, Jejunum, Large Intestine, Liver, Kidney, Ureter, Salivary glands, Pancreas, Adrenal gland, Thyroid gland, Testes, Ovary, Spinal Cord, Cerebral cortex, Cerebellum, Skin, Cardiac muscle, Skeletal muscle, Smooth muscle, Artery, Vein, Tongue, Uterus.

CC-2: Biological Physics and Enzymes — Credits 06

C2T2: Biological Physics and Enzymes — Credits 04

- Units for measuring concentration of solutes: Moles, Equivalents, Osmoles
- Bonds and Forces in Bio-molecules

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Biophysical and Biochemical Principles: Law of mass action, orders of reactions, properties of water, Significance and physiological application of the following phenomena: diffusion, osmosis, dialysis, surface tension, viseosity, adsorption, absorption, Colloids: properties and significances, sol and gel, lyophilic and lyophobic sol, electrokinetic properties; Isoelectric pH and isoelectric precipitation. Gibbs-Donnan membrane equilibrium and its biological importance. Acids and bases as proton donors and acceptors. Conjugate acid-base pairs: pH: definition, explanation, determination and significance; Buffers: definition, types; functions of buffers. Role of kidney, erythrocyte and lungs for maintaining body pH. Indicators and its applications. First and second laws of themodynamis, closed and open system, living body as a thermodynamic system, entropy, enthalpy, maintenance of physiological steady state. Gibbs concept of free energy.

- Flow and Pressure and Ultracentrifugation

  Basic principle and use of light, phase contrast, election microscopy, atomic force microscopy and fluorescence microscopy. Spectrophotometer.
  Principle of chromatography, ion exchange, gel filtration, GLC, TLC and immune-affinity chromatography. Electrphoresis: SDS-PAGE and agarose gel. Cell fractionation: Homogenization and ultrasonication, Ultracentrifugation. Differential and density gradient centrifugation for separation of cell fractions. Radio activity – use of radio isotopes in physiological studies.

- Nanoparticles and its application in Physiology
- Laminar and Streamline flow

  Enzyme: Definition, chemical nature, classification and nomenclature. Mechanism of enzyme action – active site, specificity and enzyme-substrate complex formation. Enzyme kinetics: Hyperbolic kinetics and linear transformation (Lineweaver-Burk, Plot; *Elsenthal Cornish-Bowden Plot*). Michaelis – Menten constant. Effect of temperature, pH and metal ions on enzyme activity. Allosteric enzyme – Definition, properties, and types; Sigmoid kinetics. Regulation of enzyme activity – Allosteric modulation; Feedback and feed forward regulations; Covalent modification; Inhibition: Reversible-competitive, non-competitive and uncompetitive inhibition; Irreversible inhibition, Coenzyme and prosthetic groups; Activation of pro enzymes, Isoenzymes. Rate limiting enzymes. Ribozymes, Absymes, Antizymes, Fundamental ideas about immobilized enzyme. Enzymes in clinical diagnosis (amylase, acid and alkaline phosphatase, SGOT, SGPT, LDH and CPK)

C2P2: Biological Physics and Enzymes Credits 02

Demonstration of oncotic pressure of colloidal solutions by Oncometers; Determination of Systolic, Diastolic, Pulse and Mean Blood Pressure by non-invasive methods (Auscultatory Methods). Determination of enzyme actions (e.g. CAT, Amylase,)

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Generic Elective Syllabus

GE-1 [Interdisciplinary for other department]

GE-1: Blood and Immune System and Cardiovascular system Credits 06

GE-1T1: Blood and Immune System and Cardiovascular system Credits 04

A. Blood and Immune System

Blood – Composition and function, blood cell formation and related disorders, Blood groups, Blood transfusion and its hazards, Blood clotting and its disorders, Normal and abnormal hemoglobin.

Immunity-innate and acquired, Antigens, antibody-structure, classification and functions, Cytokines, Phagocytosis, Cytotoxicity, Allergy, Inflammation, Autoimmune diseases – Arthritis, Graves disease, Myasthenia Graves, Hashimoto's disease, Vaccine toxoids, HIV

B. Cardiovascular system

Structure of heart and blood vessels, Junctional tissues of the heart, Cardiac cycle and heart sounds, Cardiac output – factor affecting, Heart rate – regulation, bradicardia, tachycardia, Blood pressure -regulation, hypertension and hypotension, Athrosclerosis, ECG – principle, normal and abnormalities, Artifificial pacemaker, Angina pectoris, Cardiac hypertrophy, rheumatoid arthritis, Angiography.

GE-1P1: Practical Credits 02

A. TC of WBC, DC of WBC (with Leishman stain), Haemoglobin estimation by haematometer, Haemin crystal. BT, CT & Blood group.
B. Measurement of HR,PFI, Step Test. BP: systolic, diastolic, mean arterial blood pressure, pulse pressure by Riva- Royce mercury manometer

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University

Semester -II

Core Courses

Core – 3

CC-3: Physiology of Nerve & Muscle Cells **Credits 06**

C3T: Physiology of Nerve & Muscle Cells (Theory) **Credits 04**

1. **Excitable Tissue: Nerve**
   - Introduction
   - Nerve Cells
   - Excitation & Conduction
   - Measurement of Electrical Events
   - Ionic Basis of Excitation & Conduction
   - Properties of Mixed Nerves
   - Nerve Fiber Types & Function
   - Neurotrophins
   - Glia

2. **Excitable Tissue: Muscle**
   - Introduction
   - Skeletal Muscle
     - Morphology
     - Electrical Phenomena & Ionic Fluxes
     - Contractile Responses
     - Energy Sources & Metabolism
     - Properties of Muscle in the Intact Organism
   - Cardiac Muscle
     - Morphology
     - Electrical Properties
     - Mechanical Properties
     - Metabolism
     - Pacemaker Tissue
   - Smooth Muscle
     - Morphology
     - Visceral Smooth Muscle
     - Multi-Unit Smooth Muscle

3. **Synaptic & Junctional Transmission**
   - Introduction
   - Synaptic Transmission
     - Functional Anatomy
     - Electrical Events at Synapses
     - Inhibition & Facilitation at Synapses
     - Chemical Transmission of Synaptic Activity
     - Principal Neurotransmitter Systems
     - Synaptic Plasticity & Learning
   - Neuromuscular Transmission
     - Neuromuscular Junction

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Denervation Hypersensitivity

4. **Initiation of Impulses in Sense Organs**
   Introduction
   Sense Organs & Receptors
   The Senses
   Electrical & Ionic Events in Receptors
   "Coding" of Sensory Information

C3P: Histological Study, Experiment of Nerve and Muscle (Lab) Credits 02

Isolation and Staining of nerve fibres with node(s) of Ranvier ($AgNO_3$) and muscle fibres (H and E).
Preparation of sciatic nerve innervated gastrocnemius muscle of toad.
Study of Kymograph, Induction coil, Key and other instruments used to study mechanical responses of skeletal muscle.
Kymographic recording of mechanical responses of gastrocnemius muscle to a single stimulus and two successive stimuli.
Kymographic recording of the effects of variations of temperature and load (after-load) on single muscle twitch.
Calculation of work done by the muscle.
Determination of nerve conduction velocity.

Core – 4

CC-4: Chemistry of Bio-molecules Credits 06

C4T: Chemistry of Bio-molecules (Theory) Credits 04

Classification, structure, Properties and Functions of Carbohydrates, Proteins and lipids.
Structure, types and Function of DNAs and RNAs.

C4P: Biological Chemistry(Lab) Credits 02

Qualitative tests for the identification of physiologically important substances: Hydrochloric acid, lactic Acid, Uric Acid, Glucose, Galactose, Fructose, Sucrose, Lactose, Albumin, Gelatin, Peptone, Starch, Dextrin, Urea, Glycerol, Bile salts.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Generic Elective Syllabus

GE-2 [Interdisciplinary for other department]

GE- 2 : Developmental Biology / Embryology **Credits 06**

GE 2 T : Developmental Biology / Embryology **Credits 04**

Gametogenesis: Spermatogenesis & Oogenesis. ,Ultra structure: sperm and ovum in mammals. Egg Membranes,
Fertilization: In Sea-urchin and mammals
Cleavage: Cleavage plane, types, role of yolk in cleavage; cleavage process in mammals. Blastula formation: mammals Morphogenetic movements: Types and examples.
Gastrulation: Mammals Concept of induction, determination, and differentiation. Organogenesis: development of eye as an example of reciprocal and repeated inductive events.

GE2 P: Developmental Biology / Embryology (Lab) **Credits 02**

H & E staining of ovarian tissue sections and identification of Graafian follicle, Corpus Luteum, and demonstration of preserved mammalian embryo.

Semester-III
Core Course (CC)

CC-5: Circulating Body Fluids **Credits 06**
C5T: Circulating Body Fluids **Credits 04**

Introduction, Blood ,Bone Marrow,White Blood Cells, Immune Mechanisms, Platelets, Red Blood Cells, Blood Types, Plasma,Hemostasis, Lymph, Clinical implications

C5P: Hematological Experiments **Credits 02**

Practical:

Preparation and staining of blood film with Leishman's stain.
Identification of the blood corpuscles.
Differential count of WBC.
Total count of RBC and WBC.
Bleeding time and clotting time.
Hemoglobin estimation.
Preparation of haemin crystal.
Preparation and staining of bone marrow.
Measurement of diameter of megakaryocyte.
Reticulocyte staining.
Blood group determintation.

CC-6: Circulation **Credits 06**

C6T: Circulation **Credits 04**

1. **Origin of the Heartbeat & the Electrical Activity of the heart**
   Introduction
   Origin & Spread Of Cardiac Excitation
   The Electrocardiogram
   Cardiac Arrhythmias
   Electrocardiographic Findings in Other Cardiac & Systemic Diseases, hypertrophy and cardiac myopathy

2. **The Heart as a Pump**
   Introduction
   Mechanical Events of the Cardiac Cycle
   Cardiac Output

3. **Dynamics of Blood & Lymph Flow**
   Introduction
   Anatomic Considerations
   Biophysical Considerations
   Arterial & Arteriolar Circulation
   Capillary Circulation
   Lymphatic Circulation & Interstitial Fluid Volume

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Venous Circulation

4. **Cardiovascular regulatory Mechanisms**
   Introduction
   Local Regulatory Mechanisms
   Substances Secreted by the Endothelium
   Systemic Regulation by Hormones
   Systemic Regulation by the Nervous System

5. **Circulation Through special Regions**
   Introduction
   Cerebral Circulation
   Anatomic Considerations
   Cerebrospinal Fluid
   The Blood-Brain barrier
   Cerebral Blood Flow
   Regulation of Cerebral Circulation
   Brain Metabolism & Oxygen Requirements
   Coronary Circulation
   Splanchnic Circulation
   Circulation of the skin
   Placental & Fetal Circulation

6. **Cardiovascular Homeostasis in Health & Disease**
   Introduction
   Compensation for Gravitational Effects
   Exercise
   Inflammation & Wound Healing
   Shock
   Hypertension
   Heart Failure, stroke

C6P: Cardiovascular Physiology Experimental **Credits 02**

Practical:
Preparation of Amphibian Ringer solution.
Kymographic recording of the movements of perfused heart of toad.
Study of the effects of changes in perfusion fluid pressure, changes in temperature, excess calcium and potassium ion concentration, acetylcholine, adrenaline on the on the movement of heart.

CC-7: Functions of the Nervous System **Credits 06**

C7T: Functions of the Nervous System **Credits 04**

1. **Reflexes**
   Introduction
   Monosynaptic Reflexes: The Stretch Reflex

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Polysynaptic Reflexes: The Withdrawal Reflex
General Properties of Reflexes

2. **Cutaneous, Deep & Visceral Sensation**
   Introduction
   Pathways
   Touch
   Proprioception
   Temperature
   Pain
   Other Sensations

3. **Arousal Mechanisms, Sleep, & the Electrical Activity of the Brain**
   Introduction
   The Reticular Formation & the Reticular Activating System
   The Thalamus & the Cerebral Cortex
   Evoked Cortical Potentials
   The Electroencephalogram
   Physiological Basis of the EEG, Consciousness, & Sleep
   Interpretation of abnormal EEG pattern

4. **Control of Posture & Movement**
   Introduction
   General Principles
   Corticospinal & Corticobulbar System
   Anatomy & Function
   Posture and its regulation
   Basal Ganglia
   Cerebellum
   Movement disorders

5. **The Autonomic Nervous System**
   Introduction
   Anatomic Organization of Autonomic Outflow
   Chemical Transmission at autonomic Junctions
   Responses of Effector Organs to Autonomic Nerve Impulses
   Cholinergic and Adrenergic Discharge

6. **Central Regulation of Visceral Function**
   Introduction
   Medulla Oblongata
   Hypothalamus
   Anatomic Considerations
   Hypothalamic Function
   Relation to Autonomic Function
   Relation to Sleep
   Relation to Cyclic Phenomena
   Hunger

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Thirst
Control of Posterior Pituitary Secretion
Control of Anterior pituitary Secretion
Temperature Regulation, fever

7. **Neural Basis of Instinctual Behavior & Emotions**
   Introduction
   Anatomic Considerations
   Limbic Functions
   Sexual Behavior
   Fear & Rage
   Motivation

8. **" Higher Functions of the Nervous System": Conditioned Reflexes , Learning, & Related Phenomena**
   Introduction
   Methods
   Learning & Memory
   Functions of the Neocortex
   Disorders relating learning and memory

C7P: Neurological Experimental **Credits 02**

Practical:

Experiments on superficial (plantar) and deep (knee jerk) reflex
Measurement of grip strength
Reaction time by stick drop test
Short term memory test (shape, picture word)
Two point discrimination test

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:58:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons.pdf

Skill Enhancement Course (SEC)

SEC-1: Detection of Food Additives / Adulterants — Credits 02

SEC1T: Detection of Food Additives / Adulterants

Qualitative tests for identifying Food Adulterants in some food samples: Metanil yellow, Rhodamin B, Saccharin, Monosodium glutamate, Aluminium foil, Chicory, Bisphenol A and Bisphenol S, Chocolate Brown HT, Margarine, Pb, Hg, As, PCB, Dioxin etc in turmeric powder, besan, laddoo, noodles, chocolate and amriti.

OR

SEC-1: Clinical Biochemistry — Credits 02

SEC1T: Clinical Biochemistry

Photo-colorimetric estimation of blood constituents. Measurement of blood glucose by Nelson-Somogyi method, measurement of blood inorganic phosphate by Fiske - Subbarow method, measurement of serum total protein by Biuret method and determination albumin globulin ratio, determination of serum amylase by iodometric method.

Generic Elective Syllabus
GE-3 [Interdisciplinary for other department]

GE-3: Community and Public Health — Credits 06

GE3T: Community and Public Health — Credits 04

Basic idea about community health and public health issues, Malnutririon in a community, overnutrition, issues of obesity; possible remedial measures. Composition and nutritional value of common Indian foodstuffs, rice, wheat, pulses, egg, meat, fish and milk. Dietary fibers. Calorie requirement. Concept of ACU. Principles of formulation of balanced diets for growing child, adult man and woman, pregnant and lactating woman. Diet management of obese, diabetic, hypertensive person and athlete. Basic idea on PCM, marasmus, kwashiorkor and their prevention. Iron and iodine deficiency.
Sound pollution as a community health issue; definition, concept of noise, source of extraordinary sound, effects of sound pollution on human health, noise index (noise standards).

GE-3P: Community and Public Health — Credits 02

Qualitative assessment of noise, survey on the status of dietary intake in the surrounding area through visits, etc.

Semester-IV
Core Course (CC)

CC-8: Energy Balance, Metabolism and Nutrition **Credits 06**

C8T: Energy Balance, Metabolism and Nutrition **Credits 04**

Introduction
Energy metabolism
Carbohydrate metabolism
Biological oxidation
Protein metabolism
Fat and cholesterol metabolism
Integration of carbohydrate, fat and protein metabolism
Reactive Oxygen Species
Nutrition – Basic concepts of nutrients, nutraceutical, cosmoceutical, neutrigenomics.
Nutrition – BMR, RQ, RDA, SDA, NPU, Biological value of proteins, vitamins and minerals. Energy in Human nutrition.

C8P: Biochemical Estimation **Credits 02**

a. Quantitative estimation of glucose and sucrose by Benedict's method.
b. Quantitative estimation of amino nitrogen [Sorensen's formol titration method (percentage as well as total quantity to be done)].
c. Estimation of percentage quantity of lactose in milk by Benedict's method.

CC-9: Gastrointestinal Function **Credits 06**

C9T: Gastrointestinal Function **Credits 04**

1. **Digestion & Absorption**
   Introduction
   Carbohydrates
   Proteins & Nucleic Acids
   Lipids
   Absorption of Water & Electrolytes
   Absorption of Vitamins & Minerals
2. **Regulation of Gastrointestinal Function**
   Introduction
   General Considerations
   Gastrointestinal hormones
   Mouth & Esophagus

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

Stomach
Exocrine Portion of the Pancreas
Liver & Biliary System
Small Intestine, Colon
Mechanism, function and regulation of mastication, deglutition, movements of alimentary canal.

C9P: Gastrointestinal Function Lab **Credits 02**

Dale's Experimental

1. Kymographic recording of normal movements of rat's intestine in Dale's apparatus.
2. Effects of hypoxia, acetylcholine and adrenaline on normal intestinal movements.

CC-10: Respiratory Physiology **Credits 06**

CC10T: Respiratory Physiology **Credits 04**

1. **Pulmonary Function**
   Introduction, Properties of gases. Anatomy of the lungs. Mechanics of breathing. Gas exchange in the lungs. Pulmonary circulation. Other functions of the Respiratory System.

2. **Gas transport between the Lungs & the tissues**
   Introduction. Oxygen transport. Carbon Dioxide transport. Respiratory acidosis and alkalosis

3. **Regulation of Respiration**
   Introduction. Neural control of Breathing. Chemical Control of Breathing. Nonchemical influences on Respiration

4. **Respiratory adjustments in Health & Disease**
   Introduction. Effects of exercise. Other forms of Hypoxia. Oxygen treatment, O_2 toxicity. Hypercapnia & Hypocapnia. Other respiratory abnormalities. Sleep and Respiration. Effects of increased Barometric Pressure. Artificial respiration. Respiratory failure. High altitude sickness. Lung Function Tests.

CC10P: Respiratory Physiology Lab **Credits 02**

Practical:

Respiratory Human Experiments

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

a. Measurement of peak expiratory flow rate
b. Measurement of oxygen saturation by pulse oxymeter before and after exercise
c. Measurement of forced expiratory volume (FEV) in first second.

Skill Enhancement Course (SEC)

SEC-2: Computer application in Health science **Credits 02**

SEC2T: Computer application in Health science **Credits 01**

Course Contents:

Importance of computer application in biological sciences and medicine. Brief history of development of computer. Generation of Computer. Classification of computer – analogue, digital, hybrid, micro, mini, mainframe and super computers. Computer hardware: Different components of computer. Computer Software – types of software - monitor program and operating system, utility program, application program. Computation of data – mean, median, mode, SD, SEM & t-value. Graphical representation of data in pie, bar and line diagram using Microsoft excel, Power Point: Preparation of body text and table by sing MS word. Slide preparation for Physiological items. Presentation of study material by using power point. e-mail, internet- concepts.

Application of computer in physiology and medicine. Application of computer in physiological data analysis – M.S. Word, Excel. M.S. Excel**:** Basic application in physiology. Use of computer by dietitian and dietary computation.

Physiological Modeling: Concepts, Computer in physiological models. Human Brain and Computer. Computer and their use in medical field. Basics of computer assisted imaging. Computer assisted therapy in health science.

SEC2P: Computer application in Health science **Credit 01**

1. Basic operation of computer: Operations of WINDOWS; data entry.
2. Graphical presentation of data. Computer tabulation of physiological data. Making charts with Ms Excel - bar diagram, line diagram, pie diagram for representing physiological data.
3. Computation of frequency and percentage distribution of different physiological parameters in different age groups, in different communities, percentage distribution of blood groups.
4. Significance of testing by ‘t’ test with interpretation – Paired observation, standard/population mean.
5. Power point - making slide for any topic related to physiology or medicine, editing, slide show.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

6. Preparation of case history of a patient and feeding of information in the hard disc.

Or

SEC-2: Physiological Techniques and Public Health Assessments **Credits 02**

SEC2T: Physiological Techniques and Public Health Assessments **Credits 01**

Course Contents:

Physiological Techniques:

Audiometry, Perimetry, Visual Acuity, Colour Blindness, EMG, EEG ,ECG, Nerve Conduction velocity, Autonomic Status assessment (Valsalva maneuver), Deep breathing test, Reaction time (Choice), Stereotactic techniques.

Public Health assessment:

Nutritional status of children and adults: Growth curves (Height-for-age, Weight –for-age, weight-for-height, BMI-for-age) for detection of stunting, under weight, wasting, thinness, overweight and obesity. Somatotype for adult (Health – Carter method). Socioeconomic status assessment (Kuppuswamy's Socioeconomic scale)

SEC2P: Practical **Credit 01**

1. Growth charts – plotting growth charts for growth monitoring.
2. Calculation of BMI of an individual and interpretation of results.
3. Prepare growth curves for stunting, under weight, wasting and obese person.
4. To map the peripheral field of vision with perimeter(Perimetry)
5. Mapping of physiological blind spot and calculation of optic disc size.
6. Determination of visual acuity by Snellen's chart/Landolt's chart..
7. Determination of colour blindness by Ishihara Charts.
8. Recording of auditory and visual reaction time.
9. Somatotyping of Human subjects.
10. Survey of dietary status of people in the nearby area by students, analysis of survey results and formulation of diet charts.
11. Submit a socioeconomic status assessment report.
12. To study the phenomenon of fatigue by Mosso's ergograph.
13. Audiometry (Demonstration).
14. Recording of human electrocardiogram (ECG) (Demonstration).
15. Recording of electroencephalogram (EEG) (Demonstration).

Or

SEC-2: Histopathological Techniques **Credits 02**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

SEC2T: Histopathological Techniques **Credits 01**

Course Contents:

Unit-I

Introduction of histopathology: cellular physiology and Pathology. Evolution of histology. Quality control in histopathology. Histological laboratory organization, care & maintenance of equipments used in histopathology laboratory. Fixation and fixatives : Types and mechanism Microtome, its type. Staining theory: Stains and dyes, dye types. mordant, accelerators. silver impregnations. Haematoxylin and Eosin staining, Mounting and mounting media, Tissue processing and its steps. Decalcification. Embedding media - types and properties. Cryotomy, cryostat, impregnation techniques, frozen sections and staining for emergency diagnosis

Unit-II:

Histochemistry : General consideration, limitation to histochemistry. PAS reactions, Sudan Black, Perchloric acid/ Napthaquinone reaction(PAN). Histochemistry of Nuclic acids, proteins and enzymes – basic concept, process, and quantitation of enzyme activity. Histochemistry of Pigments.

Unit-III:

Immunological Techniques : Principles, types, application. Antibody as histological reagents, autoradioactivity. Exfoliative cytology – advantage and disadvantage, Gynaecological smear, fluid sample, thick fluid sample.

Unit -IV:

Cytogenetics & Molecular Techniques: Cytogenetics , chromosomal studies. Karyotyping, growth of cells in tissue cultures. DNA hybridization techniques.

Microscopy : Light Microscopy – types, procedure, tissue preparations, photomicrography. Electron Microscopy : Types, Principle, tissue preparation & techniques.

SEC2P: Histopathological Techniques **Credits 01**

Practical:

1. Glass wares and equipment used in histopathology lab.To prepare alcohol of different concentration. To prepare formalin from stock solution.
2. Preparation of tissue sections, To perform section cutting of paraffin embedded tissue.
3. H&E staining of tissue sections,

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

4. Preparation and staining of bone marrow smear,
5. Measurement of diameter of megakaryocyte,
6. Reticulocyte staining,
7. Staining of collagen in tissue sections.
8. PAP staining techniques.
9. Staining carbohydrates with PAS reaction.
10. Sudan Black staining (Demonstration)

Or

SEC-2: Sports Medicine & Nutritional Physiology Credits 02

SEC2T: Sports Medicine & Nutritional Physiology

Course Contents:

Introduction: Concept of Sports medicine. Aims and objectives of sports medicine. Need and Scope of Sports Medicine. Role of Sports Physician, Physical Educator / Sports Coaches in Sports Medicine.

Basic kinesiology: Meaning and definition of Kinesiology. Importance of Kinesiology for games and sports. Kinesiological classification of muscle. Role of muscles. Joints and their Movements.

Sports Injuries: Introduction. Types of Sports injuries. Reasons of sports injuries. Prevention and management of Sports injuries.

Therapeutic modalities: Brief description of therapeutic modalities. Role of ice in treatment of sports injuries. Clinical application of heat modalities. Brief concepts of Short wave Diathermy (SWD), Whirlpool Bath, Transcutaneous Electrical Nerve Stimulation (TENS). Interferential Stimulation..

Nutritional Physiology & Athlete:
Nutritional parameters of athletics performances including intervention planning, energy production, energy nutrients, vitamins and minerals, Timing and composition of intakes. Planning and preparation of diets for younger and older athletics of various categories – age group, gender and sports type. Weight management strategies for sports persons. Planning and preparation of diets for sports persons suffering from anemia and osteoporosis.

Suggested Readings:

1. Steven Ray, Irvin Richer. Sports Medicine, Prentice Hall,1983.
2. Vinger and Roerner. Sports Injuries, PSG Publishing Co., Inc.,
3. Williams, JGP. Sports Medicine . London Edward Arnold Pub.
4. Morehouse and Rash, Sports Medicine for Trainer, WB Saunders.
5. Armstrong and Trucker, Injuries and Sports, London Scampless Press.

Generic Elective (GE)
[Interdisciplinary for other department]

GE-4: Nerve -Muscle Physiology, Nervous system and Sensory Physiology Credits 06

GE4T: Nerve -Muscle Physiology, Nervous system and Sensory Physiology Credits 04

Course Contents:

A. Nerve - Muscle Physiology

1. Excitable Tissue: Nerve Introduction, Nerve Cells, Excitation & Conduction, Measurement of Electrical Events, Ionic Basis of Excitation & Conduction, Properties of Mixed Nerves, Nerve Fiber Types. Neurotropin. Regeneration and Degeneration of nerve fibers.

2. Excitable Tissue: Muscle: Introduction, Skeletal Muscle: Morphology, Electrical Phenomena & Ionic Fluxes, Contractile Responses, Properties. Cardiac Muscle: Morphology, Electrical Properties, Mechanical Properties Pacemaker Tissue, Smooth Muscle: Morphology.

3. Synapse and Neuro muscular Junction: Introduction, Synaptic Transmission: Functional Anatomy, Electrical Events at Synapses, Inhibition & Facilitation at Synapses, Chemical Transmission of synaptic activity. Neurotransmitter. EPSP,IPSP.
Neuro muscular Junction: Introduction, structure, transmission of impulse. Electromyography.

4. Initiation of Impulses in Sense Organs Introduction, Sense Organs & Receptors, The Senses, Electrical & Ionic Events in Receptors, "Coding" of Sensory Information.

B. Nervous system

1. **Reflexes** Introduction, Monosynaptic Reflexes: The Stretch Reflex, Polysynaptic Reflexes: The Withdrawal Reflex, General Properties of Reflexes.

2. Cutaneous, Deep & Visceral Sensation Introduction, Pathways Touch, Proprioception, Temperature, Pain.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

3. Arousal Mechanisms, Sleep, & the Electrical Activity of the Brain The Reticular Formation & the Reticular Activating System, The Thalamus & the Cerebral Cortex: structure & functions. The Electroencephalogram, Physiological Basis of the EEG & Sleep, Interpretation of abnormal EEG pattern.

4. **Control of Posture & Movement** Introduction, General Principles, Basal Ganglia & Cerebellum: Structure & functions. Movement disorders.

5. The Autonomic Nervous System Introduction, Anatomic Organization of Autonomic Outflow, Chemical Transmission at autonomic Junctions.

6. Central Regulation of Visceral Function Introduction, Hypothalamus: Anatomic Considerations, Hypothalamic Function, Relation to Autonomic Function, Relation to Sleep, Hunger, Thirst, Control of Posterior Pituitary Secretion, Control of Anterior pituitary Secretion, Temperature Regulation, fever.

7. Neural Basis of Instinctual Behavior & Emotions Introduction, Limbic system: Anatomic Considerations, Functions - Sexual Behavior, Fear & Rage, Motivation,

C. Special sense

Vision: Anatomic Considerations, The Image-Forming Mechanism (accommodation and visual acuity), The Photoreceptor Mechanism: Genesis of Electrical Responses, Visual Pathways and effects of lesions of these pathways, Color Vision, Errors in visual process.

Hearing & Equilibrium: Introduction, Anatomic considerations, Hair cells, Mechanism of hearing, Vestibular function.

Smell & Taste: Introduction, Smell: Receptors & Pathways. Taste: Receptor Organs & Pathways.

GE4P: Histological Study and Experiments of Nerve and Muscle **Credit 02**

Practical:

1. Isolation and Staining of nerve fibers with node(s) of Ranvier (AgNO3) and muscle fibers (Haematoxylin and Eosin).
2. Measurement of grip strength.
3. Determination of visual acuity by Snellen's chart / Landolt's C chart.
4. Determination of colour blindness by Ishihara chart.

Demonstration:

Study of Kymograph, Induction coil, Key and other instruments used to study mechanical responses of skeletal muscle.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

Kymographic recording of mechanical responses of gastrocnemius muscle to a single stimulus and two successive stimuli.

Kymographic recording of the effects of variations of temperature and load (after-load) on single muscle twitch.

Calculation of work done by the muscle.

Determination of nerve conduction velocity.

Neurological experiments:

Experiments on superficial (plantar) and deep (knee jerk) reflex.

Reaction time by stick drop test.

Short term memory test (shape, picture word).

Two point discrimination test.

Principles of fixation and staining, Staining and identification of fixed endocrine glands and nervous tissue.

Or

GE-4: Excretory System & Body Temperature Regulation **Credits 06**

GE4T: Excretory System & Body Temperature Regulation **Credits 04**

Course Contents:

Renal Function & Micturition:

Introduction, Juxta Glomerular Apparatus, Function of Malpighian corpuscles and renal tubule, counter-current mechanism, Water Excretion, Acidification of the Urine & Bicarbonate Excretion, Regulation of Na^+ & Cl^- Excretion, Renal Circulation, Disorders of Renal Functions, Filling of the Bladder, Emptying of the Bladder, Non-excretory function of kidney. Diuretics.

Skin and Body temperature regulation:

Histological structure of skin. Colour of the skin. Organization of sweat gland. Composition and function of the sweat. Regulation of sweat secretion. Insensible and sensible perspiration. Composition and function of sebum. Triple response.

Normal body temperature. Channels of heat loss and heat gain process. Regulation of body temperature: Higher centre and mechanism of regulation. Hypothermia and Hyperthermia. Physiological basis of fever. Cold sress. Insulating effects. Acclimatization to colds.

GE4P: Excretory System & Body temperature regulation (Lab) **Credits 02**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:48:25; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons4.pdf

Practical

1. Identification of normal constituents of urine.
2. Identification of abnormal constituents of urine.
3. Tests for Urinary deposits.
4. Estimation of albumin in urine.
5. Detection of specific gravity of urine.
6. Quantitative estimation of Urea in Urine.
7. Recording of Body Temperature.
8. To study the response of the skin to blunt injury (triple response)(Demonstration).

Or

GE-4: Environmental pollution and Human health **Credits 06**

GE4T: Environmental pollution and Human health **Credits 04**

Course Contents:

Environment & Health : Definition concepts, components. Major environmental health problems in industrialized and developing countries. Occupational Health. Occupational diseases. Occupational safety.

Environmental Pollution and its impacts on Human health : Air Pollution: definition, sources, air pollutants, effects of air pollution on human health, concept of ozone hole, green house effects and global warming. **Water Pollution:** definition, types, health hazards, water pollutants, biochemical oxygen demand (BOD), thermal pollution, concept of safe drinking water standards. **Soil Pollution:** causes, health hazards, solid waste management - bioremediation, phytoremediation. **Sound Pollution:** definition, concept of noise, source of sound pollution, effects of sound pollution on human health, noise index (noise standards). **Radionuclide Pollution:** ionizing radiations, effects of ionizing radiation on human health, permissible doses. **Arsenic Pollution:** sources, sources of arsenic in ground water, drinking water standard for arsenic (WHO, USEPA), health effects of chronic arsenic poisoning.

Source, health problems and preventions of Bio- medical waste & e-waste.

Environment and Health impacts assessment – Concept, Steps and application.

GE4P: Environmental pollution and human health **Credits 02**

I. **Physiological (experimental) Experiments:**
Kymographic recordind of the effects of Hg, Pb and As compounds on: The contraction of perfused heart of toad. The intestinal movements of rats in Dale's bath.

II. **Histo-chemical Experiments:** Histochemical studies: chronic effects of food additives and arsenic compounds on liver, kidney, intestine, brain, muscle and lung tissues in rat.

Semester-V

Core Course (CC)

CC-11: Sensory Physiology **Credits 06**

C11T: Sensory Physiology **Credits 04**

Course Contents:

Classification of general and special senses and their receptors. Muller's law of specific nerve energies. Weber-Fechner law. Mechanism of transduction of stimuli from sensory receptors. Adaptation of receptors- phasic and tonic adaptations.

General Sense: Classification, distribution, function and neural pathway of touch, pressure, pain, thermal and kinesthetic sensation.

Vision: Introduction. Anatomic considerations. The structures of lens. Errors of refraction and their corrections. Contact Lens. Pupillary reflexes, light reflex, near response. Argyll Robertson pupil. Histological details of retina. Photopic and Scotopic vision. The Photoreceptor Mechanism: Genesis of Electrical Responses. Chemical and electrical changes in retina on exposure to light. Visual Pathway and effects of lesion of these path ways. Colour visions and its modem concept. Colour blindness. Other aspects of Visual Function. Visual field, Perimetry. The Image-Forming Mechanism (accommodation and visual acuity) Factors affecting Visual Acuity. Visual acuity and its measurement. Binocular vision and depth perception. Eye Movements. Errors in visual process. Electroretinogram.

Hearing & Equilibrium: Introduction, Sound waves, decibel, Anatomic considerations, structure and functional significance of auditory apparatus – external, middle and internal ears. Structure of Organ of Corti. Hair cells. Mechanism of hearing and its modern theories. Discrimination of sound frequency and loudness. Auditory pathway and centers. Vestibular function. Loss of hearing. Deafness & tests of deafness. Audiometry.

Smell & Taste: Introduction, Smell: Receptors & Pathways - Structure and function of the receptor organs, nerve pathways, centers. Physiology of Olfaction. Olfactometer. Taste: Receptor Organs & Pathways- Structure and functions of the receptor organs, nerve pathways, centers. Physiology of Taste. Features of Taste sensation.

C11P: Histological and Human Experiments **Credits 02**

Practical

1. Principles of fixation and staining, staining and identification of fixed nervous tissue.
2. Silver nitrate preparation of corneal cell space.
3. Determination of visual acuity by Snellen's chart / Landolt's C chart.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

1. Determination of colour blindness by Ishihara chart.
2. To map the peripheral field of vision with perimeter(Perimetry)
3. Mapping of physiological blind spot and calculation of optic disc size.
4. Recording of auditory and visual reaction time.
4. Exploration of conductive and perceptive deafness by tuning fork method.
5. Audiometry (Demonstration).

CC-12: Endocrinology **Credits 06**

C12T: Endocrinology **Credits 04**

Course Contents:

General Consideration: Concept of endocrine systems, glands and hormones. Types of endocrine glands. Experimental and clinical methods of study of endocrine glands. General classification of hormones on chemical basis. Concepts of hormone receptors and cell signalling. Mechanisms and Modern Concept of hormone actions: G-protein, Cyclic AMP, cyclic GMP, IP3-DAG, Ca2+, Tyrosine Kinase, JAK-STAT pathway and nuclear receptor mediated action. Hypothalamo - hypophysial axis: Feedback regulation, Hypothalamus as a neuroendocrine organ, Releasing Factors, Tropic hormones of hypothalamus. Vascular and neural connections between the hypothalamus and the pituitary, role of median eminence.

The Pituitary Gland: Introduction. Morphology. Histological structures, functions, and regulation of anterior, middle and posterior lobes of pituitary. Posterior pituitary hormones. Growth Hormone: Chemistry, modes of action and functions of growth hormone. Physiology of Growth & factors influencing growth. TSH, ACTH, FSH, LH, Prolactin, MSH, Vasopressin and Oxytocin. Pituitary Insufficiency Pituitary Hyperfunction in Humans. Cushing's disease, gigantism, acromegaly, dwarfism, Simmond's diseases, Frolich's syndrome, diabetes insipidus.

Thyroid Gland: Introduction. Anatomical considerations. Electron microscopic structure of thyroid gland. Thyroid hormone: Chemistry, Biosynthesis, Storage and Transport of thyroid hormones. Effects of thyroid hormones. Functions of T4 (Thyroxin) and T3 (Triiodothyronine). Regulation of Thyroid hormone secretion. Clinical feature of Cretinism. Myxedema, Grave's disease. Hashimoto's disease, iodine deficiency goiter.

Hormonal Control of Calcium Metabolism & the Physiology of Bone

Introduction, Calcium & Phosphate Metabolism, Bone Physiology, Vitamin D & the Hydroxy cholecalciferols. Parathyroid Gland: Histological Structure, Parathyroid hormone: Role in calcium metabolism. Relation of parathyroid hormone with bone formation and bone resorption, fragile bone and aging process, Concept of Vitamin D3 treatment. Calcitonin: its source, functions and regulation. Hormonal control of calcium homeostasis. Effects of Other Hormones & Humoral Agents on Calcium Metabolism

Endocrine Functions of the Pancreas & the Regulation of Carbohydrate Metabolism:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

Pancreas: Introduction. Histological structure of pancreatic islets Cell. Structure, Biosynthesis & secretion of Insulin. Sources, modes of action and functions of insulin. Insulin Excess**.** Regulation of Insulin Secretion. Glucagon. Other Islets Cell Hormones. Hypoglycemia & Diabetes Mellitus in Humans.

The Adrenal Medulla & Adrenal Cortex:

Introduction. Adrenal Cortex: histological structure. Structure & Biosynthesis of Adrenocortical Hormones. Regulation different types of hormones and functions of adrenal cortex, Effects of Adrenal androgens & estrogens. Physiologic effects of glucocorticoids. Pharmacologic & Pathologic effects of Glucocorticoids. Regulation of glucocorticoid secretion. Effects of Mineralocorticoids Regulation of aldosterone secretion. Cushing's syndrome, Addison's disease, Hyperaldosteronism. Adrenal Medulla: Histological structure, hormonal function of adrenal medulla. Synthesis and metabolism of catecholamine hormones. Regulation of adrenal Medullary secretion. Actions of adrenaline and nor-adrenaline on different organs and their effect. Pheochromocytoma. Summary of the effects of Adrenocortical Hyper & Hypofunction in humans

Endocrine Functions of the Kidneys, Heart, & Pineal Gland

Introduction. The Renin- Angiotensin System. Erythropoietin. The Endocrine Function of the Heart: Atrial Natriuretic Peptide.

Pineal Gland - Histological structure. Chemical nature, biosynthesis, molecular mechanism of action, functions and regulation of secretion of melatonin.

C12P: Endocrinology (Lab) **Credits 02**

1. Fixation, staining and identification of endocrine glands.
2. Study of the effects of oxytocin on uterine contraction of albino rat.
3. Study of the effects of adrenaline on uterine movements of albino rat.
4. Estimation of estrogen by spectrophotometric method.
5. Estimation of plasma level of any hormone using ELISA (Demonstration)

Discipline Specific Electives (DSE)

DSE-1: Human nutrition and dietetics **Credits 06**

DSE1T: Human nutrition and dietetics **Credits 04**

Course Contents:

Basic concept: Nutrition, Nutrients, Nutraceutical, Cosmoceutical, Nutrigenomics. Constituents of food and their significance. Composition and nutritional value of common food stuffs. Calorific value of foods. Dietary requirements of carbohydrate, protein, lipid and other nutrients.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

Nutritional evaluation of carbohydrates: Glycemic Index (GI), Classification of dietary fibers with potential of health benefit, Resistant starch as prebiotics - Fructo - oligosaccharide, Galacto-oligosaccharide, soy - oligosaccharide, Nutritive value of major carbohydrates like rice, wheat, roots, tubers, leafy vegetables, red-yellow vegetables and fruits.

Nutritional evaluation of proteins: Essential and Non essential amino acids, Protein Efficiency ratio (PER), nitrogen balance, Net protein utilization (NPU), Biological value(BV) of protein, protein spares, Nutritive value of protein food stuffs like pulses, egg, fish, meat, milk, soybeans.

Nutritional evaluation of fats: essential fatty acids, saturated and unsaturated fatty acids, Dietary requirement of fat, Non-glyceride edible oil, Nutritive value of fat food stuffs like egg, fish, milk, edible oils, and nuts.

Vitamins: Water soluble vitamins (Vit - B complex, Vit - C, Folic acid) and fat soluble vitamins (Vit-A, D, E and K): source, brief chemistry, dietary requirements, functions, deficiency, hyper-vitaminosis, and antioxidant. Physiological significances of minerals.

Dietary fibers: Concepts and physiological significance.

Energy in human nutrition: Basic concept of energy and units, calorific and physiological fuel value, Body calorie requirements – adult consumption unit. Respiratory quotient (RQ), Total energy expenditure (TEE), Basal metabolic rate (BMR) and Resting energy expenditure (REE), Specific dynamic action (SDA), physical activity ratio (PAR), Determination of BMR by Benedict Roth apparatus and WHO/ICMR prediction equation, Factors affecting BMR, adult consumption unit (ACU), determination of energy requirements of Indians in different age groups by doubly labeled water (DLW) method and prediction equation method.

Physiology of starvation and obesity.

Formulation of diet chart: Basic principle of diet chart. ICMR specified food groups (Five Group Plans, Nine Group Plan and 11-Group Plan), Food guide pyramid. Balanced diet and principles of formulation of balanced diets for vegetarian and non vegetarian, infant, growing child, sedentary adults, moderate working adults, college students, pregnant and lactating mothers and athletes in low and moderate socioeconomic status. Principles of Diet Survey.

Space Nutrition: change of body composition, energy recommendation for space flights, space food system, types of space foods.

DSE1P: Human Nutrition and Dietetics (Lab) **Credits 02**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

a. Food analysis:

1. Estimation of lactose and calcium from milk.

2. Determination of total carbohydrate by phenol-sulphuric acid method from cereals.

3. Estimation of free amino acids by ninhydrin method and total protein by quantitative biurette reagent method from pulses.

4. Determination of acid value and iodine number of fat.

5. Estimation of Vit-C from lemon juice.

b. **Identification of food adulterants:**

Starch from milk, dalda from butter, saw dust and colouring agents from spices, saccharine in sugar.

c. **Planning and preparation of therapeutic diets :**

Planning and preparation of therapeutic diets for the following diseases: Hypertension, Obesity, Anemia, Diabetes melilitus, Hepatitis , Gastrointestinal diseases.

d. Diet survey (Field study record):

1. Diet survey report (hand-written) of a family (as per ICMR specification) (Steps- Introduction, Diet History, Methodology, Diet Survey, Clinical Examinations, Remarks, Recommendation and Conclusion) : Each student has to submit a report on his/her own family.

2. A report (hand-written) on the basis of field survey from one of the followings:

(1). Physiological parameters of human (at least three parameters).

(2). Anthropometric measurements on human (at least three parameters).

(3). Epidemiological studies on human.

Or

DSE-1: Community nutrition and Public health **Credits 06**

DSE1T: Community nutrition and Public health **Credits 04**

Course contents:

Population, society, community and community health: concepts. Nutrition - Introduction. Food as source of nutrients, functions of food, definition of nutrition, nutrients & energy. Adequate,

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

optimum & good nutrition. Malnutrition and under nutrition, over nutrition. Human nutrition-principle, interrelationship between nutrition, health & diseases. Visible symptoms of good health. Nutrition - fitness, athletics & sports.

Food guide - basic food groups. Use of food guide (according to R.D.A.). Use of food in body - digestion, absorption, transport & utilization. ACU- concept.

Balanced diet. Diet Survey – Principles. Composition and nutritional value of common Indian food stuff - rice, wheat, pulses, egg, meat, fish and milk. Dietary fibres - role of fibers in human nutrition. Calorie requirement. Vitamins and minerals. Malnutrition and under nutrition.
Principles of formulation of balanced diets for growing child, adult man and woman, pregnant and lactating woman. Diet management of obese, diabetic, hypertensive person and athlete. Basic idea on PCM, marasmus, kwashiorkor and their prevention. Iron and iodine deficiency. Recommended dietary allowances, malnutrition and chronic energy, LBW, PEM, xerophthalmia, micronutrient disorders. Physiology of starvation and obesity. Food toxicity. Effect of processing on nutritive values of foods.
Socioecology of nutrition, habitual diets in India and their adequacy. Nutritional assessment of human and community. Malnutrition in a community. National nutrition related health program.

Epidemiology : Concepts. Public health and public health issues: Basic ideas. Etiology, epidemiology and prevention of malaria, dengue, filaria, hepatitis, AIDS, nutritional anemia, atherosclerotic disorders. Causes and management of thalassemia, gout, obesity, endemic goiter, dental carries.

Population problem – principles and methods of family planning and assisted reproductive technology. Sound pollution as a community health issue; definition, concept of noise, source of extraordinary sound, effects of sound pollution on human health, noise index (noise standards).

DSE1P: Practical **Credits 02**

Practical:

1. Quantitative estimation of glucose, sucrose by Benedict’s method.
2. Estimation of lactose from milk by Benedict’s methods.
3. Estimation of Chloride by Mohr’s methods.
4. Estimation of amino nitrogen through formol titration methods.
5. Qualitative analysis of pulse, rice, milk to test the presence of carbohydrates, protein, fat.
6. Qualitative identification of lipids and cholesterol.
7. Qualitative assessment of noise by sound level meter.

Field Survey Report:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

1. Survey on the status of dietary intake in the surrounding area through visits, etc.
2. Diet survey report of a family (as per ICMR specification). Each student has to submit a report on his/her own family. [Report should be as per ICMR specification. Report should be hand written].
3. A report (hand-written) on the basis of field survey from one of the followings:
   (1) Physiological parameters of human (at least three parameters).
   (2) Anthropometric measurements on human (at least three parameters).

Or

DSE-1: Clinical Hematology **Credits 06**

DSE-1T: Clinical Hematology **Credits 04**

Course Contents:

Anemia and its classification. Laboratory investigation and management of anemia. Iron deficiency anemia, megaloblastic anemia, pernicious anemia- pathogenesis and laboratory investigation. Reticulocytes. Aplastic anemia- laboratory diagnosis. Bone marrow examination. Aspiration techniques.

Hemoglobin - abnormal hemoglobin. Hemolytic anemia and its laboratory investigation. Haemoglobinopathies. Hemoglobin electrophoresis. Sickle cell anemia , Thalassemia- laboratory diagnosis.

Blast cell. Causes and significances of leucocytosis, leucopenia, neutrophilia, eosinophilia, basophilia, monocytosis, lymphocytosis, neutropenia, lymphopenia. Toxic granulation. Leukemia and its classification. HIV on blood cell parameters. LE cells and its significances. Blood parasites.

Hemostasis and Coagulation: Platelet development. Qualitative and quantitative disorders of platelets. Secondary hemostasis. Hemophilia, Willebrand diseases. Disorder of fibrinogen. Fibrinolysis. Bleeding and coagulation disorders.

Blood groups: Immunological basis of identification of ABO and RH blood groups. Biochemical basis of ABO system and Bombay phenotyping. Others blood groups : Kell, Kidd, Duffy, etc. Blood transfusion. Blood banking.

Definition determination and significance of TC, DC ,ESR, Arnth count, PCV, MCV, MHC, MCHC. bleeding time, clotting time, prothrombin time.

DSE 1P: Practical **Credits 02**

1. General blood picture

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

2. Differential Leucocute Count. Absolute leucocyte count
3. Determination of haemoglobin by various methods.
4. Determination of total RBC count and WBC count.
5. Determination of PCV
6. Determination of red cell indices
7. Determination of ESR.
8. Determination of reticulocyte count.
9. Staining of bone marrow
10. Determination of blood groups.
11. Determination of toxic granulation of neutrophil
12. Determination of total platelet count.
13. Demonstration of thrombin time.**(Demonstration)**
14. Perform sickling test (**Demonstration**)
15. Perform Heinz bodies(**Demonstration**)
16. Demonstration of leukemic slides (**Demonstration**).
17. Determine fibrinogen conc.(**Demonstration**)
18. Demonstrate malarial slide(**Demonstration**)
19. Haemoglobin electrophoresis(**Demonstration**).

Or

DSE-1: Biostatistics **Credits 06**

DSE1T: Biostatistics **Credits 04**

Course Contents:

Scope of statistics– utility and misuse. Principles of statistical analysis of biological data. Basic concepts – variable. Population and sampling -- parameter, statistic. Presentation of data, frequency distribution, frequency polygon, histogram, bar diagram and pie diagram. Different classes of statistics - mean, median, mode, mean deviation, variance, standard deviation, standard error of the mean, standard score. Degrees of freedom, probability. Normal distribution. Student's t- distribution. Testing of hypothesis - Null hypothesis, errors of inference, levels of significance, t- test and z score for significance of difference. Distribution-free test - Chi-square test. Linear correlation and linear regression

DSE1P: Biostatistics (Practical) **Credits 02**

Practical:

1. Computation of mean, median, mode, standard deviation and standard error of the mean with physiological data like body temperature, pulse rate, respiratory rate, height and weight of human subjects.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

2. Graphical representation of data in frequency polygon and histogram.

3. Student's t test for significance of difference between means.

4. Demonstration: Statistical analysis and graphical representation of biological data with computer application program one way ANOVA .

DSE-2: Environmental Physiology **Credits 06**

DSE2T: Environmental Physiology **Credits 04**

Course Contents:

Ecosystem – Structure and function, different types of ecosystem, food chains, food webs and energy flow and mineral cycling in ecosystems; primary production and decomposition , biogeochemical cycle. Global environmental problems: global climate change, ozone layer depletion, concept of ozone hole, green house effect, global warming and its consequences.

Environment – Physical and biological aspects. Effects of exposure to hot and cold environment. Acclimatization to hot and cold environment. Heat disorders and its preventive measures. Effects of hypobaric and hyperbaric environment. Caisson disease. Mountain sickness. Acclimatization to high altitudes. Preventive measure for hypobaric and hyperbaric effects. Physiological effects and preventive measures against G force, noise, vibration and radiation. Types of pollutants (Primary, secondary and tertiary).

Environment and human health: Definition: hygiene, health and public health. Air, Water, Food Borne Diseases: causes, symptoms and control. Food Additives and Adulterants: definition, examples and human health hazards.Vector borne epidemic diseases: Malaria and Plague-etiology and control. Environmental Pollution and Health Hazards: Air Pollution: Definition, sources, air pollutants, effects of air pollution on human health, Water Pollution: Definition, types, health hazards, water pollutants, biological oxygen demand (BOD), thermal pollution, concept of safe drinking water standards. Soil Pollution: causes, health hazards, solid waste management - bioremediation, phytoremediation. Sound pollution: Definition, concept of noise, source of sound pollution, effects of sound pollution on human health, noise index (noise standards). Radionuclide Pollution: ionizing radiations, effects of ionizing radiation on human health, permissible doses. Arsenic Pollution: sources, sources of arsenic in ground water, drinking water standard for arsenic (WHO, USEPA), health effects of chronic arsenic poisoning. Climate change, health impact.

Environmental management: Environmental ethics**.** Conservation of topsoil, ground water and wild lives; rain water harvesting; sanctuary, national park, biosphere reserve, wildlife (conservation) Act, 1992.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

Toxicology: Toxins and Toxicology. Factors Affecting toxicity. LD_{50}, LOD_{50}, ED_{50}, NOEL, LOEL. Concept of acute and chronic Effects. Birth defects and teratogens. Concepts of bio-magnification and bio-concentration. Popular food additives and Food adulterants. Prevention of food adulteration Act, 1954. Other food toxicants: BPA, BPS, Pesticides, PAH, Dioxin, PCB, Heavy Metals: Pb, Hg, Cd, As etc.

DSE2P: Environmental Physiology **Credits 02**

Practical:

A:

1. Determination of O_2, CO_2, BOD & COD.
2. Determination of total alkalinity and chlorine in water.
3. Determination of dissolve oxygen in the supplied water samples-supplied water, ground water extracted by shallow and deep tube wells, stream waters, pond water etc.
4. Detection of food additives in different food samples.
5. Biochemical estimation of serum glucose, total proteins, SGPT and SGOT
6. Measurement of environmental temperature – dry bulb and wet bulb, relative humidity, air velocity.
7. Determination of light intensity (at library, laboratory, and class room) by lux meter.
8. Determination of sound levels by sound level meter and noise index.

B: Physiological (experimental) Experiments

1. Kymographic recording of the effects of Hg, Pb , As compounds and food additives on the movements of perfused heart of toad.

2. Kymographic recording of the effects of Hg, Pb , As compounds and food additives on the intestinal movements of rats in Dale's bath.

C: Histo-chemical Experiments

Histochemical studies: chronic effects of food additives and arsenic compounds on liver, kidney, intestine, brain, muscle and lung tissues in rat.

Or

DSE-2: Pharmacology & Toxicology **Credits 06**

DSE2T: Pharmacology & Toxicology **Credits 02**

Course Contents:

1. **Pharmacology: General Pharmacology:** The importance of pharmacology in the study of physiological processes. Definition of drug, agonist and antagonist.. Nature and source of drugs, routes of drug administration and their advantages, receptor and receptor subtypes. Drug-receptor

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

interaction, desensitization of receptors. Drug delivery. **Pharmacokinetics**: Drug absorption, distribution, metabolism, and excretion, bioavailability, first pass metabolism, excretion and kinetics of elimination, Biological half life of drug and its significance, Drug-drug interactions. **Pharmacodynamics:** Beneficial versus toxic effects of drugs. Principles and mechanism of drug action, factors affecting drug action. Drug biotransformation. Bioavailability. Drug accumulation. Dose – Response Curve.Adverse drug reaction. Gene therapy.

General considerations, pharmacological classification, mechanism of action and uses of following classes of drugs acting on various systems.

Drugs acting on nervous system: a) General anaesthetics (Nitric oxide, halothane), b) sedative and hypnotic drugs (Phenobarbitone, diazepam), c) Opioid analgesics (Morphine), d) CNS stimulants (strychnine, amphetamine). Neuromuscular blockers : Tubocurarine and succinyl choline. E)Adrenergic stimulants : Amphetamine and ephedrine. α- adrenergic stimulants – Methaxomine and clonidine. β- adrenergic stimulants – Metaproterenol and salbutamol. Adrenergic antagonists :Labetelol. α- adrenergic blockers – Phenoxybenzamine andphentolamine. β- adrenergic blockers – Propranolol and atenolol.

Autacoids & chemotherapy of microbial diseases: Brief introduction to autacoids : drug therapy of inflammation, NSAID and other drugs (aspirin, celecoxib). Chemotherapy of microbial diseases: Antibacterial (sulfonamides), antifungal (amphotericin B).

Hormones and hormone antagonists: Insulin and oral hypoglycaemic agents (tolbutamide, rosiglitazone), thyroid and anti-thyroid drugs (eltroxin, carbimazole), estrogen and progestins (progesterone, hydroxyprogesteronecaproate).

Diuretics - Carbonic anhydrase inhibitor, loop diuretic, potassium sparing and osmotic diuretics.

Antianginal drugs :Nitroglycerine and calcium-channel blocker – Nifedipine and verapamil.

2. **Toxicology: a. Introduction**: Brief history, Different areas of modern toxicology, classification of toxic substances. Toxins and toxicology. Factors affecting toxicity. **b. Toxic agents, toxic exposure and response:** Toxic agents: Human exposure, mechanism of action and resultant toxicities of the following xenobiotics: Metals: lead, arsenic, Pesticides: organophosphtes, carbamates, organochlorine, bipyridyl compounds and anticoagulant pesticides. Toxic exposure and response: Effect of duration, frequency, route and site of exposure of xenobiotics on its toxicity. Characteristic and types of toxic response. Interactions between two and more xenobiotics exposure in humans. Tolerance and addiction. **c. Eco-toxicology:** Brief introduction to avian and aquatic toxicology, movements and effects of toxic compounds in food chain (DDT, mercury), bioaccumulation, biomagnification, acid rain and its effect on ecosystems, concept of BOD and COD. **d. Mechanism of toxicity & evaluation of toxicity:** Mechanism of toxicity: Delivery of the toxicant, mechanisms involved in formation of ultimate toxicant, detoxification of ultimate toxicant. Evaluation of toxicity: various types of dose response relationships, LD_{50}, LC_{50}, LOD_{50}, ED_{50}, NOEL, LOEL, TD_{50} and therapeutic index. **e. Fate of xenobiotics in human body:** Absorption, distribution, excretion and metabolism of xenobiotics (biotransformation, Phase- I reactions including oxidations, hydrolysis, reductions and phase II conjugation reactions).Toxic insult to liver, its susceptibility to toxicants with reference to any two hepatotoxicants.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

3. **Clinical toxicology:** Management of poisoned patients, clinical methods to decrease absorption and enhance excretion of toxicants from the body use of antidotes.

DSE2P: Pharmacology & Toxicology **Credits 02**

Pharmacology

1. Handling of laboratory animals. Routes of drug administration (Oral, I.M.)
2. To study the presence of acetaminophen/ aspirin in given sample.
3. Effect of analgesic (Tail-flick test).
4. Pharmacodynamics: dose- response curve**.**
5. Kymographic recording of the effects of atropine and propranonol on the perfused heart of toad.
6. Setting of organ bath and kymograph. To record the effects of acetylcholine using guinea pig ileum / rat intestine.
7. Anti-anxiety effect of valium (Plus maze test) **(Demonstration)**
8. To study the stages of general anesthesia **(Demonstration).**
9. To determine partition coefficient of general anesthetics **(Demonstration).**
10. Study of competitive antagonism using acetylcholine and atropine **(Demonstration).**

Toxicology

1. Determination of Dissolved Oxygen (DO) using Winkler's method.
2. Determination of Biological Oxygen Demand (BOD) and Chemical Oxygen Demand (COD) of water.
3. To perform quantitative estimation of residual chlorine in water samples.
4. To determine the total hardness of water by complexo-metric method using EDTA.
5. To determine acid value of the given oil sample.
6. Calculation of LD_{50} value of an insecticide from the data provided.
7. Separation of a mixture of benzoic acid, beta- napthol and napthelene by solvent extraction and identification of their functional Groups **(Demonstration).**
8. To estimate formaldehyde content of given sample **(Demonstration).**

Suggested Readings:

1. Essentials of Medical Pharmacology, 7th edition (2010), K.D. Tripathi, Jaypee Brothers,
2. Pharmacology, 7th edition (2011), H.P. Rang, M.M. Dale, J.M. Ritter and P.K. Moore, Churchill Livingstone.
3. Hand book of Experimental Pharmacology, 4th edition (2012), S.K. Kulkarni, Vallabh Prakashan, 2012.
4. Cassarett and Doull's "Essentials of Toxicology" 2nd edition (2010), Klaassen and Whatkins, McGraw Hill Publisher.
5. Introduction to Toxicology, 3rd edition (2001), John Timbrell, Taylor and Francis Publishers.
6. Principles of Toxicology, 2nd edition (2006), Stine Karen and Thomas M Brown, CRC press.

Or

DSE -2: Sports Physiology, Work Physiology and Ergonomics Credits 06

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

DSE2T: Sports Physiology, Work Physiology and Ergonomics **Credits 04**

Course Contents:

Sports & work Physiology: Concepts of physical work and physiological work. Physical work: Definition and units of measurement. Classification of physical work. Classification of workloads. Differences between work and sports. Energetic of muscular works. Measurement of energy cost for various physical work. Cardiovascular and respiratory changes during graded exercise. Aerobic and anaerobic capacity. Maximum aerobic power.
Exercise Physiology. Exercise & Performance. Exercise Physiology & Gender. Environmental Exercise Physiology. Maximal oxygen consumption and post exercise oxygen consumption – definition, factors affecting, measurement and significance. Muscle fatigue and recovery. Tests for Physical work capacity – measurement with Bicycle Ergometer, Tread Mill and Harvard Step Test. Work rest cycle and importance of rest pause.
Physical Training: General principles and different methods. Effects of overtraining and detraining. Nutrition in sports – neutrient and caloric requirements for different kinds of sports. Sports injury and its management. Sports rehabilitation and sports medicine. Role of sports in emotion and social factors. Basic concepts of sports psychology. Sports Biochemistry. Ergogenic aids. Ergogenic aids & Dietary supplement.

Ergonomics – Basic concepts and its application in industry to improve efficiency. Ergonomics-importance of ergonomics in occupational health and well beings. Physical work environment. Occupational hazards- Physical, biochemical hazards. Occupational diseases – Silicosis, Asbestosis, Farmer's Lung. Industrial safety.

Anthropometry : Anthropometry and its implication in general. Different body dimension measures in anthropometry and their significances. Sports Anthropometry.

DSE2P: Practical **Credits 02**

1. Measurements of resting and working heart rate using thirty beats and ten beats methods respectively.
2. Measurement of blood pressure before and after different graded exercise.
3. Determination of Physical Fitness Index (PFI) of an individual and recording of recovery heart rate after standard exercise.
4. Determination of cardiac cost of specific work.
5. Determination of $VO_{2\ max}$ by Queens College step test.
6. Determination of endurance time by hand gripdynamometer..
7. Six minutes walk tests.
8. Measurement of some common anthropometric parameters – stature, weight, eye height(standing), shoulder height, sitting height, knee height (sitting), arm reach from wall, mid upper arm circumference, waist

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

circumference, hip circumference, neck circumference, head circumference, chest circumference.

9. Determination of body surface area (using a nomogram) and Body Mass Index (BMI) for an anthropometric measurement.
10. Measurement of body fat percentage.

Or

DSE-2: Ergonomics and Occupational Health **Credits 06**

DSE2T: Ergonomics and Occupational Health **Credits 04**

Course Contents:

Ergonomics: Genesis and concept of ergonomics, significance and growth. Importance of ergonomics in occupational health and well being. Application of ergonomics in design and work efficiency. Human machine interaction- concepts, fundamentals of human computer interaction, fundamental idea of display and control. The bio-mechanism of work as related to the user, the work and the environment. Classification of physiological work load. Concept of work rest cycle.

Work environment – Work place components, functional design and arrangements of workplaces, work study, indices of indoor comfort – ventilation, lighting, temperature, noise. Work place stressors and work place risk factors.

Physical work environment: (a) Thermal environment, its' effects, Heat stress indices, (b) Noise and vibration, it's effects on workers. Occupational deafness, (c) Illumination level and it's effect on visual performances, (d) Ergonomic principles of control of physical hazards.

Ergonomic principles of reducing work place stressors and improving work efficiency

Anthropometry and ergonomics: Definition , terminology used in anthropometry. Different body dimensions measured in anthropometry. Anthropometric measurements and its applications in interior designing for different work areas and workers. Concept of percentile and its calculation, and use of percentile values in anthropometry. Static anthropometry, applications of anthropometric data in design. User interface and control display compatibility. Components of worker input – affective, cognitive, temporal and physical (Physical, Physiological, Psycho – physiological aspects of work).

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:46:12; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons5.pdf

Occupational Health: Concept. The occupational medical history, workers compensations, disability prevention and management. Occupational health risk. Occupational Injury: Musculoskeletal injury, peripheral nervous injury, eye injuries, facial injuries, hearing loss, injury caused by physical hazards, Ergonomics and the prevention of occupational injuries. Occupational exposures: Metals, chemicals, solvents, gasses & airborne toxicants, pesticides. Occupational illness: Brief idea on : Clinical toxicology & immunology, cardiovascular toxicology, liver, renal & neurotoxicology. Occupational hematology, infection, skin disorders & lung disease. Reproductive toxicology. Occupational Diseases: Human diseases associated with occupational exposure. Brief idea on pneumoconiosis, asbestosis, silicosis, farmer's lung and work-related musculoskeletal disorders.

Program management: Occupational stress, substances abuse & employee assistance programs. Occupational safety, industrial hygiene, biological monitoring. Prevention of accidents. Concept of industrial safety.

DSE2P: Ergonomics and Occupational Health **Credits 02**

1. Measurement of working heart rate by ten beats methods.
2. Determination cardiac cost of specific work.
3. Measurement of blood pressure before and after different grades of exercise.
4. Measurement of some common anthropometric parameters. Calculation of BSA and BMI from anthropometric data.
5. Measurement of WBGT indices.
6. Measurement of noise level by noise level meter.
7. Assessment of illumination.
8. Determination of strength by hand grip dynamometer.

Semester-VI

Core Course (CC)

CC-13: Reproductive Physiology, Embryology and Chronobiology Credits 06

C13T: Reproductive Physiology, Embryology and Chronobiology Credits 04

Course Contents:

Reproductive Physiology:

Reproductive physiology - introduction. Sex Differentiation & Development - Chromosomal Sex. Reproductive genetics. Aberrant Sexual Differentiation. Phenotypic sex differentiation. Gonadal development in the embryo. Pituitary Gonadotropins & Prolactin. Puberty in boys and girls and its control, onset of puberty. Secondary sexual characters, Human sexual response. Menopause.

The Male Reproductive System- Gross anatomy and microscopical anatomy of the male reproductive tract. Histoarchitecture of male reproductive system, testis , seminiferous tubules and interstitial cells of Leydig. Male Reproductive Physiology : gametogenesis - spermatogenesis, spermiogenesis & epididymal function, sperm maturation and ejaculation. Endocrine function of the testes. Control of testicular function, prostate and seminal vesicle. Abnormalities of testicular function.

The Female Reproductive system- Gross anatomy and microscopical anatomy of the female reproductive tract. Histological structure of ovary, Graafian follicle and Corpus luteum, Formation and maturation of ovum. Ovarian Hormones - Chemical nature and function. Steriodogenesis. Control of ovarian function. Physiological mechanism and control of ovulation. Abnormalities of ovarian function. Reproductive cycles: Menstrual Cycle – duration, description and hormonal control, Estrous cycle.

Pregnancy: Transport of ovum and sperm in female reproductive tract. Fertilization and the establishment of pregnancy. Hormones in pregnancy. Placenta - formation, structure, functions and fate of placenta. Placental hormones. Maternal adaptation to pregnancy : changes during pregnancy and its hormonal control. Pregnancy diagnosis : Pregnancy tests (immunological). Foeto-maternal relationship, faeto-placental unit. Ectopic pregnancy. Labour . Parturition: mechanisms and hormonal regulation.

Lactation and Mammary gland: Anatomical and histological structure of mammary gland. Phases of mammary development and their hormonal control. Hormonal control of lactation and milk ejection reflex.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Reproductive Health - Physiological concepts for a planned family. Demographic terminology of family planning. Infertility in male and female: causes, diagnosis and management. Assisted Reproductive Technology (ART): sex selection, sperm banks, frozen embryos, in vitro fertilization. Contraception- Concepts, methods, Process, modern contraceptive technologies. Stem cell biology- concept, characterization and application. Exfoliative cytology on gynecological smear –Use of exfoliative cytology on gynecological screening, sample type, fixation & staining, normal constituents, cytology of menstrual cycle, hormonal assessment of smear, inflammatory changes of smear, malignancy.

Reproductive Genetics, Human Genetics and Human Reproductive Disorders: Reproductive Genetics, Human Genetics: Principle of molecular genetics: Gene expression, Gene Structures. Medical genetics: General concepts, Genetic diseases, Population genetics, Pharmacogenetics and pharmacogenomics. Human Genetic Architecture and diseases - Human genetic architecture. Genes and Human diseases. Mendelian disorders. Complex multigenic disorders. Chromosomal disorders: Normal karyotype – concept, significance, techniques-staining, banding, FISH. Structural abnormalities of chromosomes, Cytogenetic disorders involving autosomes and sex chromosomes. Single gene disorders with non-classic inheritance. Mosaicism. Molecular diagnosis of genetic diseases.
Human reproductive disorders: Abnormalities of male and female sexual differentiation and development. Puberty: Precocious, delayed or absent puberty, Amenorrhoea: Primary and Secondary. Hyper-prolactinaemia, Sexual dysfunction, infertility, Pregnancy: multifoetal pregnancy and spontaneous pregnancy loss, Pre- eclampsia, eclampsia, endometriosis. Basic concepts of ovarian cysts. Genetic imprinting and reproductive tumors.

Embryology:

Cleavage: cleavage plane, types, role of yolk in cleavage; cleavage process in mammals. Embryogenesis, morula, blastula, gastrula and blastocyst. Formation of trilaminar germ disc. Gastrulation, organogenesis. Development of alimentary system, heart and urogenital system. Development of eye as an example of reciprocal and repeated inductive events. Foetal circulation and its changes after birth.

Chronobiology:

Introduction to Chronobiology. Historical developments in chronobiology; Biological oscillation: the concept of average, amplitude, phase and period.

Biological Rhythm – Definition, terminology of biorhythm, significance. Types and characteristics of biological rhythms: Short- and Long- term rhythms; Circadian rhythms; Tidal rhythms and Lunar rhythms. Circannual rhythms; Photoperiod and regulation of seasonal reproduction of vertebrates. Different types of physiological rhythms - ultradian, circadian, infradian. Circadian rythms - concepts, types, explanation and experimental evidences.

Concept of synchronization and masking; Photic and non-photic zeitgebers. Importance of environmental synchronization (Zeitgeber or Synchronizer) on Circadian rhythms. Different

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

zeitgebers and their relation with circadian rhythm. Circadian rhythms in human. Biorhythms of LH, FSH, Prolactin, Estrogen, Progesterone, ACTH, GH, Cortisol. Light dark cycle and regulation of penial hormone.

Biological clock, physiological clock: Concepts, biological clock and environmental changes, classification and function of biological clock. Location and origin of biological clock. Fundamental nature of biological clock. Mechanism of biological clock. Master clock or central clock – types, location and mechanisms. Neural basis of biological clock and the role of suprachiasrnatic nuclei. Adaptive significance of biological clocks. Sleep – wakefulness cycle. Body temperature rhythm. Time keeping Genes. Brief idea of jet-lag and shift work. Chronobiology in health. Biological clock and medicine.

C13P: Reproductive Physiology, Embryology and Chronobiology (Practical) Credits 02

List of Practical:

1. Study of estrous cycle.
2. Tissue fixation, embedding in paraffin, microtomy , slide preparation and identification of uterus, testis, ovary.
3. Examination of histological sections of permanent slides of rat/human: testis, epididymis and accessory glands of male reproductive system; Sections of ovary, fallopian tube, uterus (proliferative and secretory stages), cervix and vagina.
4. Pregnancy test from human urine by kit method.
5. Sperm count, sperm motility test in rat. Sperm viability test by using eosin - Y.
6. Determination of diurnal and /or circalunar rhythm of body temperature of college going students.
7. Study of circadian functions in humans (daily eating, sleep and temperature patterns).
8. Project work on assessment of individual differences in human circadian rhythms (chronotype in human population) by questionnaire method among school children and college students.

Demonstration:

1. Surgical techniques: Principles of surgery in endocrinology and Reproductive Physiology.
2. Overectomy, Histerectomy, Castration and Vasectomy in rats.
3. Human vaginal exfoliate cytology.

CC-14: Renal Physiology, Skin and Body Temperature Regulation, Biomedical Instrumentation Credits 06

C14T: Renal Physiology, Skin and Body Temperature Regulation, Biomedical Instrumentation Credits 04

Course Content:

Renal Physiology:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Renal Physiology- introduction. Gross structure of kidney. Microanatomy (including electron microscopy) of a nephron and structural differences between cortical and juxtamedullary nephrons. Juxtaglomerular apparatus. Function of Malpighian corpuscle and renal tubule. Renal circulation- peculiarities and autoregulation.

Mechanism of urine formation: Concept of ultrafiltration, glomerular filtration rate, reabsorption by passive and active tubular transport. Concept of counter current system, counter-current mechanism countercurrent multiplier, exchanger and mechanism of concentrated urine formation. Water excretion, acidification of the urine & bicarbonate excretion. Regulation of Na^+ & Cl^- excretion. Non-excretory function of kidney. Constituents of urine - normal and abnormal constituents of urine and their clinical significance. Concept of renal threshold. Renal Function Tests. Renal stone formation. Dialysis and artificial kidney. Diuretics. Disorders of Renal Functions.

Physiology of Urinary bladder, urine storage and micturation. Innervations of urinary bladder. Filling of the Bladder and emptying of the bladder. Micturition reflexes and its regulation by higher centers.

Skin and Body Temperature Regulation:

Histological structure of skin. Colour of the skin. Organization of sweat gland. Composition and functions of sweat. Regulation of sweat secretion. Insensible and sensible perspiration. Composition and functions of sebum. Triple response.

Normal body temperature. Channels of heat loss and heat gain process. Regulation of body temperature in homeotherms : physical and physiological processes, roles of neural and hormonal processes, higher centers and mechanism of regulation.
Pyrexia, Hypothermia and hyperthermia, physiological basis of fever. Cold stress. Insulating effects. Acclimatization to heat and cold.

Biomedical Instrumentation and Techniques:

Biomedical basis of Diseases: Basic concepts, pathogenesis to symptoms and diagnosis of infectious diseases, inherited/genetic diseases; immunological diseases, cancer.

Basics of Biomedical Instrumentation: Development of biomedical instrumentation, components of man-instrument system. Biomedical systems, design factors and limitations of biomedical instruments. Transducer, Biosensors - concept, classification. Bioelectric potentials, Bio potential electrodes – concepts, significance and application .Electric current - physiological effects. Shock hazards, safety. Measurement system and errors.

Medical diagnostic techniques related equipment: Principles of microscopy including Fluorescence microscopy, Atomic Force Microscopy, Transmission and Scanning Electron Microscopy. Flow Cytometry (FACS). Karyotyping – Chromosome banding, FISH. Spectroscopic Techniques - Principle, different types, instrumentation. Histopathology, Histochemistry, Cytogenetics – staining techniques. Chromatography – Principle and application of different chromatography including TLC, GLC, HPLC, Ion-exchange chromatography,

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

molecular sieve chromatography, affinity chromatography. Electrophoresis - Principle, instrumentation and medical significances of AGE, PAGE, SDS-PAGE. Centrifugation - Principle and physiological significances.

Biomedical instruments – Biomedical instruments and cardiovascular monitoring systems: Basic concepts, instrumentation of Cardiac monitor, ECG, Blood flow meters, Oximeter, equipments for blood pressure, cardiac output and heart sounds. Methods of monitoring fatal heart rate. Cardiac pacemakers, cardiac defibrillators. Clinical Laboratory Instruments: General principle and instrumentation of Blood Gases Analyzer, Auto-analyzer, Blood Cell Counters, ELISA reader, spectrophotometer, flame photometer. Auto analyzer. Biomedical Instruments for Respiratory measurement systems: Basic principles and instrumentation of pneumograph, Spirometer, pneumotachometers, Respiratory therapy equipment, apparatus for anaesthesia. Biomedical Instruments and Nervous system: Concept and basic principles of Psycho-physiological measurement techniques, instruments for measurements of nervous system, motor response, sensory response. EEG. Imaging systems: Basic principles, instrumentation of X-Ray machine, Mammography, X-ray computed tomography (CT Scanner) and computer-aided tomography (CAT), Fluoroscopy. Ultrasound Imaging - Ultrasonic imaging system. Echocardiography, Doppler effects, three dimensional ultrasound. Radioactivity : Radiation, Radio isotopes-concepts, Scintillation counter, Gamma camera & Gamma camera imaging , Radio nucleotide scan, Emission Tomography- ECT Emission Coupled Tomography, SPECT & PET - concept. Magnetic Resonance Imaging- Magnetism and nuclear magnetism, Magnetic Resonance Imaging (MRI) system, MRI Maps of body, Sports medicine, Breast imaging and Brain Mapping. **Optics, Fiber Optics, Diathermy equipment, Audiometer and Laser :** Optics: science of life. Fiber Optics - Endoscopes and Laparoscope - principles and applications. Diathermy: principles, types and biomedical significance. Audiometers: principle and methods. Laser- formation, mechanisms and medical application. Significances. **Application of computer in Biomedical field, Biotelemetry, Physiological modeling-** Computer: basic components, imaging techniques, database, web design, automation for instruments used for clinical laboratory, use of microprocessor in medical instruments, PC- based medical instruments, computerized critical care unit. Biotelemetry: concepts, components, application. Physiological modeling: biological modeling - modeling process, methods, equation. Deterministic & stochastic model. Compartmental model- concept. Physiological modeling software.

C14P: Renal Physiology, Skin and Body Temperature Regulation, Biomedical Instrumentation (Practical) **Credits 02**

List of Practical:

1. Tissue fixation, embedding in paraffin, microtomy, slide preparation and identification of kidney and ureter.
2. Identification for normal constituents of urine.
3. Identification for abnormal or pathological constituents of urine.
4. Tests for urinary deposits.
5. Detection of specific gravity of urine.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

6. Estimation of albumin in urine.
7. Estimation of urea in urine.
8. Estimation of total phosphates in urine.
9. Routine clinical tests of urine.
10. Recording of body temperature.
11. Study the skin to blunt injury (triple response).
12. Measurement of heart sound using electronic stethoscope.

Demonstration

1. SDS – PAGE electrophoresis for protein (**Demonstration)**
2. Physiological data acquisition by ECG, EEG **(Demonstration)**
3. Study of X ray/CT machine (**through demonstration**).
4. Study of mammograms and CT scan images (**Demonstration**).
5. Estimation of sodium and potassium in blood serum or urine sample by using auto analyzer **(Demonstration).**
6. Determination pulmonary function using spirometer (using mechanical system) (**Demonstration**).

Discipline Specific Electives (DSE)

DSE-3: Medical Biochemistry — Credits 06

DSE3T: Medical Biochemistry — **Credits 04**

Course Contents:

Unit-I: Basic Concepts and scope. Clinical Biochemistry - Organization of clinical laboratory, Introduction to instrumentation and automation in clinical biochemistry laboratories safety regulations and first aid. General comments on specimen collection, types of specimen for biochemical analysis. Precision, accuracy, quality control, precautions and limitations.

Unit-II: Evaluation of biochemical changes in diseases: Basic hepatic, renal and cardiovascular physiology. Biochemical symptoms associated with disease and their evaluation. Diagnostic biochemical profile. Pathophysiological significances of glucose, serum protein, albumin, urea, creatinine, uric acids, ketone bodies.

Unit- III: Enzymes: Distribution and diagnostic significance- Properties of enzymes used in diagnosis of metabolic disorders, clinical significance of diagnostically important enzymes: creatine kinase, lactate dehydrogenase, alanine and aspartate aminotransferases, amylase, acid and alkaline phosphatase, beta glucoronidase, with a detailed account of the biochemical

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

reactions catalysed by these enzymes and of their clinical assays; kinetic assay and end point assay for the enzymes. A detailed account on isoenzymes, their tissue distribution and clinical significance.

Unit -IV: Hormones: Classification with reference to their biochemical nature, mechanism of action (one example from each class of hormones), Function. Pathophysiology of disorders associated with hormones. Biochemical diagnosis of hormonal disorders.

Unit-V: Structural complexities and diseases associated with carbohydrates and lipids:
Carbohydrates: Sugars as information molecules; detailed account on Lectins: their role in physiological functions and their potential as drug targets in various infectious diseases. Dietary fibers. Assessment of glucose metabolism in blood: Clinical significance of variations in blood glucose. Diabetes mellitus. Glycosylated Hb

Lipid profile: Types of Lipoproteins (chylomicrons, VLDL, LDL, HDL); disorders associated with lipoprotein metabolism (hypercholesterolemia, atherosclerosis). Composition and functions of lipoproteins. Clinical significance of elevated lipoprotein. Lipid profile in health and diseases.

Metabolism of ketone bodies in diabetic patients. Prostaglandins- classification, biosynthesis, role of COX-1, COX-2, NSAIDS in synthesis; functions Steroids-Cholesterol- biosynthesis and regulation, inhibitors of cholesterol biosynthesis (Statins-structure and mechanism of action).

Unit -VI: Vitamins: Definition, classification, requirement and recommended allowances, and dietary precursors; diseases due to deficiency of water-soluble and fat-soluble vitamins: the symptoms and the clinical significance. Assay of vitamin.

Unit- VII: An overview of integrative metabolism: Local and global regulation in tissue specific metabolism, interplay of insulin and glucagon integration of various metabolic pathways of proteins, lipids, carbohydrates and nucleic acids, obesity- role of Leptin, Ghrelin and other hormones in regulation of body mass, electron transport chain and inhibitors, oxidative phosphorylation, role of uncouplers and ionophores.

Unit -VIII: Organ Function Tests: **a.** Liver function tests: Structure of the liver, liver function tests, causes of different liver diseases, liver function tests in the diagnosis of liver diseases. Pathophysiological significance of bilirubin. **b.** Renal function tests and urine analysis: Composition of urine. Use of urine strip / dipstick method for urine analysis. Basic ideas on different types of test for renal diseses. **c.** Tests for cardiovascular diseases: Involvement of enzymes in diagnostics of heart disease: aspartate transaminase, isoenzymes of creatine kinase and lactate dehydrogenase and troponin.

DSE3P: Medical Biochemistry (Practical) **Credits 02**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

List of Practical:

A. Collection of blood and storage. Preparation of serum and plasma from whole blood and storage.

B. Quantitative determination of the following in the whole blood/plasma/serum:

1. Estimation of blood glucose by glucose oxidase peroxides method.
2. Estimation of blood glucose by Nelson – Somogyi method.
3. Estimation of blood inorganic phosphates by Fiske - Subbaraow method.
4. Estimation of serum total protein by Biurate methods and determination of albumin globulin ratio.
5. Estimation of HDL/LDL and Triglycerides.
6. Estimation of bilirubin (direct and indirect).
7. Quantitative determination of serum creatinine, uric acid and urea.
8. Determination of serum amylase by iodometric method.
9. Estimation of creatine kinase.
10. Estimation of SGOT, SGPT, Acid & Alkaline Phosphatase.

Demonstration:

1. Estimation of Lactate dehydrogenase, beta glucoronidase **(Demonstration).**
2. SDS-PAGE Electrophoresis for Protein **(Demonstration).**
3. Five case studies based on above quantitative estimations performed **(Demonstration).**.

Or

DSE-3: Microbiology and Biotechnology — Credits 06

DSE3T: Microbiology and Biotechnology — Credits 04

Course Contents:

Microbiology:

Viruses: structure, types. Lytic and lysogenic cycle. DNA & RNA Viruses. Viroids and Prions. Bacteriophages – structure & morphological classification.
Bacteria: structure, classification. Staining :- Principle , procedure, uses. Gram stain, Acid – fast stain, Albert stain .Biochemical tests for identification Pathogenic and non - pathogenic bacteria. Nutritional requirements of bacteria, nutritional types culture media. Bacterial Growth curve-preparation, physiological factors required for growth. Bacrterial metabolism: fermentation (ethanol, lactic acid, acetic acid), glyoxalate cycle, Entner – Doudoroff pathway, Phosphoketolase pathway. Bacterial genetics: elementary idea of transformation, conjugation and transduction. Sterilization, disinfection and pasteurization: Physical and chemical methods used. Antibiotics, bacteriostatic & bacteriocidal agents. Bacteriolytic agents. Concepts of antiseptic, probiotics and prebiotics. Basic idea about medical bacteriology, virology and mycology.Food microbiology – brief ideas about food spoilage (fish, meat, milk, vegetables) and its prevention. Industrial Microbiology: Elementary knowledge for production of fermented products like alcohol, glutamic acid, penicillin and milk products (cheese, dahi). Environmental Microbiology: Role of microbes in Bio-geo chemical cycle (brief).

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Biotechnology: History and importance. DNA and RNA. Gene, Genome and Genetic code, translation. Recombinant DNA technology: concepts, techniques and application., DNA manipulation. Cloning – concept and significances. Cloning vectors. cDNA libraries. DNA sequencing. Basic concepts of Southern, Northern, Western blot techniques and DNA micro array. Polymerase Chain Reaction (PCR). RT-PCR- Basic concepts. Enzyme immobilization: basic concepts. Tissue culture – basic concepts. Human genome projects. Transgenic animals. Hybridoma techniques - Basic concepts. Monoclonal antibody. Protein interaction technology. DNA technology and gene therapy. DNA technology in diseases diagnosis. Genetic Bar-coding.
Fermentation technology: Fermentation, types, bioreactors, upstream and downstream processing. Physiology and biotechnology process.
Bio-pesticides, bio-plastics, biosensors, biochips: concepts and significances. Bio-safety and intellectual property Rights. Genomics and Proteomics. Bio-safety and ethical issues in biotechnology

DSE3P: Microbiology and Biotechnology (Practical) **Credits 02**

List of Practical

1. Study of disinfection and sterilization techniques.
2. Culture procedure and isolation of bacteria.
3. Biochemical characterization of microorganisms (Biochemical tests – Catalase test, Oxidase test, Fermentation of sugar- Glucose, Lactose, Sucrose, Mannitol, Hydrolysis of Starch, Gelatin, Casein, Citrate and Propionate utilization test, Indole production test, Nitrate reduction test, Methyl red test and Voges Proskauer [V. P.] test).
4. Negative staining. Gram staining techniques of bacteria. Acid-fast staining of bacteria. Bacterial spore staining.
5. Isolation of DNA from blood and microbial culture.
6. Separation of DNA by agarose gel electrophoresis. Extraction of DNA from agarose gel. Quantification of DNA.
7. Prepare SDS-PAGE for protein. Gel electrophoresis of protein. Quantification of protein.

Demonstration:

1. Perform immunodiffusion by Ouchterlony methods **(Demonstration).**
2. Analysis of DNA sequences (**Demonstration**).
3. Application of PCR (**Demonstration**).
4. Prepare ELISA (**Demonstration**).
5. Perform Immunoprecipitation (**Demonstration**).

Or

DSE-3: Medical Microbiology and Immunology **Credits 06**

DSE3T: Medical Microbiology and Immunology **Credits 04**

Course Contents:

Unit-I: Fundamental Concepts:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

a) History of microbiology, Discovery of microorganisms, Contributions of Louis Pasteur and Robert Koch in Medical Microbiology. b) Molecular methods of assessing microbial phylogeny-molecular chronometer, phylogenetic trees, rRNA, DNA and proteins as indicator of phylogeny. c) Microbial growth, growth factors, culture media - types of media. Pure Cultures, Growth curves and generation time, Control of microbial growth, general concept of effect of environmental factors on growth of microbes.
Normal microflora of the human body and host pathogen interaction : Normal microflora of the human body, importance of normal microflora, normal microflora of skin, throat, gastrointestinal tract, urogenital tract Host pathogen interaction: Definitions - Infection, Invasion, Pathogen, Pathogenicity, Virulence, Toxigenicity, Carriers and their types, Opportunistic infections, Nosocomial infections. Transmission of infection. Bacterial Cells - fine structure and function **:** Size, shape and arrangement of bacterial cells. Cell membrane, cytoplasmic matrix, inclusion bodies (eg. magnetosomes), nucleoid, ultrastructure of Gram +ve and Gram –ve bacterial cell wall, Pili, Capsule, Flagella and motility. Microbial Genetics. Principles of Diseases and Epidemiology:Relationship between normal microbiota and host, Opportunistic microorganisms.Development and spread of infectious diseases: invasion, pathogen,parasite, pathogenicity, virulence, carriers and their types.

Unit-II: Sample collection, transport and diagnosis: Collection, transport and culturing of clinical samples and their identification characteristics.

Unit-III: Bacterial Diseases (with reference to etiology, clinical symptoms, virulence factors involved, detection and prevention): Respiratory tract infections, Diphtheria and tuberculosis, Gastrointestinal tract infections, staphylococcal food poisoning and *E. coli* gastroenteritis, Urinary tract infections: gonorrhea and syphilis.

Unit-IV: Viruses, viroids, prions: General characteristics of viruses, structure, isolation, cultivation and identification of viruses, viral multiplication, one step multiplication curve, lytic and lysogenic phages (lambda phage), concept of early and late proteins, clinical virology with reference to HIV virus and hepatitis virus (Life cycle and clinical symptoms), viroids and prions.

Unit-V: Medical Mycology (with reference to life cycle and clinical symptoms) **:** General and detailed life cycle of *Aspergillus* and *Candida albicans* in relation to human diseases caused by them.

Unit-VI: Parasitology (with reference to life cycle and clinical symptoms): Classification of medically important parasites. Common protozoan disease: Malaria, Infections caused by *Taenia solium* / *Taenia saginata, Fasciola hepatica and Ascaris lumbricoides*.

Unit-VII : Antimicrobial chemotherapy and emerging antimicrobial resistance: Spectrum of antimicrobial activity, action of antimicrobial drugs, anti-mycobacterial antibiotics, inhibitors of protein synthesis and nucleic acid synthesis, inhibition of cell wall synthesis, inhibitor of cell membrane function, inhibitor of metabolism. Antifungal agents: mechanism of actions of Amphotericin B, Griseofulvin , Antiviral agents :Mechanism of action of Amantadine,

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Acyclovir, Azidothymidine. Anti - protozoan drugs; effectiveness of chemotherapeutic agents. Antimicrobial resistance – concepts.

Unit-VIII: Overview of Immune System - properties of immune system; types of immunity: innate immunity, acquired immunity, active and passive immunity. First and second line defence**.** Antigens and Antibodies: Characteristics of an antigen (foreignness, molecular size and heterogeneity); haptens; epitopes (T & B cell epitopes), Adjuvants : Structure, Types and Functions of antibodies.

Unit-IX: Generation of Immune Response: Primary and secondary immune response; Generation of humoral immune response (Plasma and Memory cells); Generation of cell mediated immune response. Cytokines. Complements.

Unit-X: Immunological Disorders and Tumor Immunity & Immunological Techniques: Types of Autoimmunity and Hypersensitivity with examples; Immunodeficiencies – acquired immune deficiency. Animal models (Nude and SCID mice). Transplantation immunity. Immunological Techniques: Principles of Precipitation, Agglutination, Immunodiffusion, Immunoelectrophoresis, ELISA, ELISPOT.

DSE3P: Medical Microbiology and Immunology (Practical) Credits 02

List of Practical:

1. Study of composition and use of important differential media for identification of bacteria: EMB Agar, McConkey agar, Mannitol salt agar, Deoxycholate citrate agar, TCBS
2. Staining methods: Gram staining, Acidfast staining (permanent slide only), Capsule staining and spore staining.
3. Study and plot the growth curve of *E coli* using turbidometric method and to calculate specific growth rate and generation time.
4. Identify bacteria on the basis of cultural, morphological and biochemical characteristics: IMViC, TSI, nitrate reduction, urease production and catalase tests .
5. Study of bacterial flora of skin by swab method.
6. Perform Widal test.
7. Staining and morphological characterization of Aspergillus sp., Pencillium sp. and Saccharomyces sp.
8. Antibacterial testing by Kirby-Bauer method.
9. Immunodiffusion by Ouchterlony method. Immunodiffusion by Mancini method.
10. Determination of minimal inhibitory concentration (MIC) of an antibiotic.
11. Study of various stages of malarial parasite in RBCs using permanent mounts.
12. Study symptoms of the diseases with the help of photographs: Polio, anthrax, herpes, chicken pox, HPV warts, AIDS (candidiasis), dermatomycoses (ring worms)

Demonstration:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

1. Demonstration of PCR based method of detection **of any causative gene (Demonstration).**
2. Isolation of bacteriophages (any with a non-pathogenic host) and calculation of the plaque forming units (pfu) **(Demonstration).**
3. Complement fixation assay **(Demonstration).**
4. Agglutination inhibition assay **(Demonstration).**
5. Sandwich dot ELISA **(Demonstration).**

Or

DSE-3: Genetics, Molecular Biology and Bioinformatics Credits 06

DSE3T: Genetics, Molecular Biology and Bioinformatics Credits 04

Course Contents:

Genetics:

Introduction to Genetics: Mendel's work on transmission of traits, Genetic variation, molecular basis of genetic information. Mitosis and Meiosis.
Mendelian Genetics and its Extension: Principles of inheritance, Chromosome theory of inheritance, Laws of probability, Pedigree analysis. Monohybrid and dihybrid, test and back crosses. Incomplete dominance and codominance. Bacterial genetics - transformation, transduction, conjugation (mention of F+ /F- , Hfr strain, function of pilus). Extension of Mendelism – Multiple alleles, Lethal alleles, Epistasis and its different types present in plants and animals. Penetrance, expressivity, pleiotropism. Environmental effects on phenotypic expression, sex linked inheritance. Linkage, Crossing over and Chromosome mapping. Mutations: Chromosomal mutations, Gene mutation. Detection of mutation: CLB method, Attached X method, DNA repair mechanism. Sex determination and sex linkage, Extrachromosomal inheritance. Quantitative genetics: Quantitative and multifactor inheritance, Transgressive variations, Heteriosis.
Chromosome structure: Concept of nucleosome, molecular organization, chromosomal proteins, the different levels of chromatin organization. Numerical and Structural variations in chromosome - basic concepts of aneuploids and polyploids.

Human Genetics: History of human genetics- Early Greek concepts about inheritance, Cytogenetics history (the works of Winiwater, Painter and Tjio and Levan), Landmark achievements of Galton, Garrod etc. Pedigree analysis. Patterns of inheritance for monogenic traits. Organization of Human Genome : General feature, gene clusters, diversity in size and organization of gene, types of repitative DNA, pseudogene, gene families, endoreplication and amplification, genetic markers.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Human Cytogenetic – Techniques (karyotyping and FISH), Human Karyotype –banding pattern and nomenclature (G and Q banding), Common syndrome – numerical chromosome changes, structural alterations. Use of human cytogenetics in medical science. Aneuploidy in humans. Chromosome abnormalities and cancer. Mapping strategies : Physical Map , Genetic Map. Techniques for genomics: DNA sequencing, DNA fingerprinting, polymorphism screening, expression analysis and proteomic analysis.

Identification of genetic basis of diseases. Population genetics. Prenatal diagnosis - introduction, significance and methods. Clinical genetics : inborn error of metabolism, genetic basis of colour blindness, familial cancer, infertility and in vitro fertilization, mental retardation. Genetic disorders of Haemopoietic systems.

Implications of Genome Research: Diagnosis and screening of genetic disorders**,** prenatal genotyping for mutations in β- globin gene and sickle cell anemia**,** DNA profiling: establishing identity and relationships**,** applications in personalized medicine (genetic polymorphism in drug metabolism genes e.g. cytP_{450} and GST and their effect on drug metabolism and drug response)**,** genetic counseling.

Molecular Biology:

Nucleic acids convey genetic information. The structure of DNA and RNA, DNA topology, organelle DNA. The Replication of DNA. The Mutability and Repair of DNA. Transcription (Prokaryotes and Eukaryotes). RNA modification. Translation (Prokaryotes and Eukaryotes). Regulatory RNAs. RNA editing. Gene and Genetic code - properties and wobble hypothesis. Gene expression and gene silencing. Methods for analysis of gene expression. Chromosomal aberration and gene mutations (agents and types). Gene Knockout. Protein sequencing methods, detection of post translation modification of proteins. DNA sequencing methods. Molecular markers in genome analysis. Genetic counseling.

Basic idea of Recombinant DNA technology and its applications, Polymerase Chain Reaction (PCR) – concepts, and application in human disease diagnosis.

Concept of oncogenes, tumour suppressor genes and properties of cancer cells. Molecular basis of apoptosis in brief. Gene therapy, transgenic animal. Molecular Techniques: PCR, Western and Southern blot, Northern blot, Sanger DNA sequencing.

Bioinformatics:

Introduction to bioinformatics - Definition, important contributions, task, application, challenge and opportunities. Computer Fundamentals – Programming languages in bioinformatics, Role of Super computer in biology. Historical background. Scope of bioinformatics – Genomics, Proteomics and Computer aided Drug Design (Structure based and ligand based approaches).

Biological databases and data retrieval: Information Network. Database, Tools and uses. Introduction to biological databases – primary, secondary and composite databases, NCBI, nucleic acid databases (GenBank, EMBL,DDBJ,NDB), Protein databases (PIR, Swiss- Prot, TrEMBL, PDB). Nutrient data bases. . Bioinformatic tools- FASTA, BLAST.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

DNA sequence analysis. Sequence Alignment. Predictive method using DNA and Protein sequences. Introduction to computational biology- prediction of 3-D protein structure. Identification of unknown protein. Phylogenetic Analysis. Drug design, Discovery and Pharmacoinformatics. Bioinformatics and Health informatics – concepts and application in health and medicine.

DSE3P: Genetics, Molecular Biology and Bioinformatics (Practical) Credits 02

List of Practical:

Genetics:

1. Preparation of human metaphase chromosomes and Giemsa staining.
2. Karyotyping with the help of photographs.
3. Abnormal karyotypes and chromosome aberrations.
4. PTC testing to prove monogenic inheritance.
5. Preparation of pedigree charts of some common characters like Tongue rolling, ear 6 lobes, blood groups, colour blindness.
6. Isolation of DNA from blood and microbial culture.
7. Estimation of DNA using colorimeter by Diphenyl reagent .
8. Estimation of DNA by Spectrophotometer (A 260 measurment). Quantify and analyze the purity of DNA using spectrophotometer (estimating at 260 nm, 280nm and 320nm).
9. Estimation of RNA by Orcinol method.
10. Separation of DNA by agarose gel electrophoresis. Extraction of DNA from agarose gel and quantification of DNA.
11. Determination of melting temperature of DNA.
12. Prepare SDS-PAGE for protein. Gel electrophoresis of protein and quantification of protein.
13. Searching of scientific information using NCBI or any search engine. Webbased analysis: retrieval of a desired human sequence from NCBI database and sequence alignment using BLAST.
14. Three dimension analysis of protein molecules.

Demonstration:

1. Demonstration of DNA fingerprinting (**Demonstration**).
2. Polymorphism analysis using PCR (**Demonstration**).
3. Demonstration of mammalian sex chromatin (**Demonstration**).
4. Demonstration Southern Blotting, Northern Blotting, Western Blotting (**Demonstration**).
5. Analysis of DNA sequences (**Demonstration**).
6. Phylogenetic analysis using PHYLIP (**Demonstration**).
7. Primer designing using software (**Demonstration**).
8. Microarray analysis using Bioconductor (**Demonstration**).

DSE-4: Cognitive Science Credits 06

DSE4T: Cognitive Science Credits 04

Course Contents:

Unit-1: Anatomy of brain and spinal cord

Gross anatomy of cerebrum, cerebellum, brain stem and spinal cord. Cranial and spinal nerves. Autonomic nervous system - sympathetic and parasympathetic nervous system. Neurogenesis in developing brain.

Unit-2: Methods of neuroscience

EEG, Event-related potential, CAT, MRI, fMRI, PET, Magnetoencephalography, Optical recording.

Unit-3: Memory and Emotion

Different types of memory. Neural organization of memory. Cellular and molecular basis of memory. Cortical and subcortical contribution to emotion: Fight or Flight response, Reward and motivation, Regulation of emotion, communicating emotion,

Unit-4: Language and speech

Neural basis of speech, Speech disorders. Neural organization of language, language processing. Hemispheric specialization in language and other functions. Split brain. Neural basis of attention and social cognition

Unit-5: Developmental disorders

Cognitive development theory,-piagets and Kohlberg moral reasoning theory, mental retardation, degree of mental retardation, causes of mental retardation, down syndrome, dyslexia, Attention deficit hyperactivity disorder, autism

Unit-6: Cognitive disorders

Cognitive changes with aging. Cognitive disorders: Alzheimer's disease, Frontotemporal dementia, Creutzfeldt Jakob disease, Vascular dementia, Schizophrenia, Depression, Anxiety disorders.

DSE4P: Cognitive Science (Practical) Credits 02

List of Practical:

1. Primacy and recency in short term memory in human subjects
2. Cognitive assessment by coloured matrices test in children

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

3. Test to assess the duration of short term memory
4. Psychometric tests for children- Developmental Assessment Scale for Indian Infants (DASII), Wechsler Preschool and Primary Scales of Intelligence (WPPSI), Children Apperception Test (CAT).
5. Animal study: Food retrival in maze study

Or

DSE-4: Community medicine, Epidemiological Data Analysis

Credits 06

DSE4T: Community medicine, Epidemiological Data Analysis **Credits 04**

Course Contents:

Unit-I: Concepts of Health and Disease: Definition of health, determinants of health. Agent, host and environmental factors in health and disease. Multifactorial etiology of disease.

Unit-II: Epidemiology: a. Principle of Epidemiology and Epidemiological methods: Terms used in describing disease transmission and control. Morbidity and mortality indicators. Measurements of epidemiological indicators, Epidemiology study designs. Concept of association, causation and bias. Screening for diseases. **b. Epidemiology of communicable diseases:** Extent of problem, Diagnosis- clinical and laboratory, Treatment and control, Health Programmes. Respiratory infections: measles, rubella, mumps, influenza, diphtheria, whooping cough, tuberculosis. Intestinal infections: poliomyelitis, viral hepatitis, cholera, typhoid, food poisoning, acute diarrheal diseases. Arthropod-borne infections: dengue, malaria, filariasis, leismaniasis. Zoonosis : rabies, surface infections: leprosy, HIV/AIDS **c. Epidemiology of chronic non-communicable disease and conditions:** Coronary heart disease, cancer, diabetes, hypertension, blindness.

Unit-III: Health & Nutrition and Reproductive & Child Health: a. Health & Nutrition: Concept of Balanced diet - nutritional requirement. Nutrition related disorders- Protein energy Malnutrition, Vitamin A deficiency, Iron deficiency anemia, lodine deficiency disorders. **b. Reproductive and Child Health:** Child Health, Maternal Health, Immunization, Population Control Measures.

Unit-IV: Environment & Health and Occupational Health: a. Environment & Health
Water pollution: Indicators of water pollution, Prevention and Control. Air pollution: Indicators of air pollution, Prevention and Control. **b. Occupational Health:** Basic Concepts (Silicosis and Byssinosis)

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Unit-V: Health Care system in India: Health planning, National Health Policy, Primary Health Care, Health Care delivery system in India.

Unit-VI: Medicine and Society: Introduction. Measuring diseases of a society - a. Prevalence. b. Incidence. Detection of causes of diseases and Risk factor - Methods of detection of diseases in a population. Assessing the effectiveness of the treatment of diseases: a. Effectiveness of treatment, b. Cost of therapy, c. Resource required to administer the therapy. The Socio-cultural context of medicine: a. Doctor- Patient's relationship, b. Illness behavior.

Unit -VII: Epidemiological Data, epidemiologic methods and survey: Components of epidemiology: Frequency, distribution and determinants of disease. Epidemiological approach and measurements - vital statistics (rates, ratios and proportions), measurements of health indicators. **Epidemiologic methods and survey:** Data collection: observational (descriptive and analytical) and experimental studies. Epidemiology study designs - case control and cohort studies (prospective and retrospective), techniques of sampling and matching, sources of bias.

Unit-VIII: Data Organization & Presentation, Statistical Modeling and analysis using 'R' on NCRP data and survey conducted by the students: Basic principles of 'R' software for tabulation and graphical representations, measures of central tendency, dispersion and skewness. **Statistical modeling and analysis using 'R' on NCRP data and survey conducted by the students:** Correlation analysis (scatter diagrams and Karl Pearsons coefficient of determination, standard and probable errors) and regression analysis. Inferential statistics: sampling distributions and standard error null and alternate hypothesis, basic concept and illustrations of type I and type II errors, concept of confidence interval estimation, large sample tests for single mean and difference of means, single proportion and difference of proportions, students t-distribution (test for single mean, difference of means and paired t-test), chi-square distribution, F-distribution, one-way and two-way ANOVA, non parametric analysis (sign and rank tests), p-value.

DSE4P: Community medicine, Epidemiological Data Analysis (Practical) Credits 02

List of Practical

1. Surveys/ Community based studies on the topics related to preventive and social medicine.
2. Designing a questionnaire for survey of prevalence diabetes/ hypertension/ allergy/ respiratory disorders/etc. Determining the target and control populations
3. Surveying the population for the diseases mentioned above.
4. Analysis of data from National Cancer Registry Program (NCRP). Understanding incidence, mortality (rates, ratios and proportions).

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

5. ‘R’ software and analysis of data from NCRP data and survey conducted by the students. Correlation studies. Regression studies. Probabilistic distribution studies. Comparison of groups and ascertaining statistical significance of differences.

Or

DSE-4: Patho-physiological Basis of Diseases — Credits 06

DSE4T: Patho-physiological Basis of Diseases — **Credits 04**

Course Contents:

Unit-I: **Introduction -** History of pathology, Basic definitions and common terms used in pathology, Survival mechanism and disease, microscopic and cellular pathology, scope and techniques used.

Unit-II: Cell Injury and responses of cells: Cellular Adaptations and Cell Death - An overview of cellular adaptation: Hyperplasia, Hypertrophy, Atrophy, Metaplasia; Causes and mechanisms of cell injury, reversible and irreversible injury, Necrosis, Apoptosis, Types of apoptosis, Intracellular accumulations, Cellular ageing

Unit-III: **Role of inflammation in disease (with suitable examples) -** Basic concepts with suitable examples of general features of acute and chronic inflammation: vascular changes, cellular events, important chemical mediators of inflammation, Morphological effects inflammation response, granulomatus inflammation.

Unit-IV: Role of tissue repair healing and fibrosis (with suitable examples) - Basic mechanism of tissue regeneration, and repair by healing, scar formation and fibrosis

Unit-V: **Common Hemodynamic Disorders in diseases (with suitable examples) -** An overview of edema, hyperemia, congestion, hemorrhage, hemostasis and thrombosis, Embolism, Infarction and shock with suitable examples

Unit-VI: Nutritional diseases - Protein energy malnutrition, deficiency diseases of vitamins, minerals, nutritional excess and imbalances. Roles and effects of metals.

Unit-VII: Cancer - Definitions, Nomenclature, characteristics of benign and malignant neoplasms, grading and staging of cancer, biology of tumor growth, invasion and metastasis, carcinogens and cancer, concept of oncogenes, tumor suppressor genes, DNA repair genes and cancer stem cells.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

Unit VIII: Infectious diseases epidemiology- Modes of infections with suitable examples. Overview of cause, extent, prevention, treatment and control of the diseases: Respiratory infections, Intestinal infections, Arthropod-borne infections, Zoonosis and Surface infections

DSE4P: Patho-physiological Basis of Diseases (Practical) **Credits 02**

List of Practical:

1. Urine analysis: Gross examination of urine for colour, odour, etc. Abnormal constituents like protein, ketone bodies, glucose, blood, and urea.
2. Measuring Erythrocyte Sedimentation Rate (ESR).
3. Tissue Processing, embedding and sectioning. Staining and preparation of permanent histological slide.
4. Study of histological slides showing hypertrophy, hyperplasia, dysplasia, leukemia, cirrhosis and any common cancer.
5. Diagnostic tests for detection of various diseases – CRP, VDRL, RA, Pregnancy, Dengue (any three)
6. PCR based diagnostics (for any one disease).
7. Physiological data acquisition like temperature, EEG, ECG.

Or

DSE-4: Research Methodology and Design **Credits 06**

DSE4T: Research Methodology and Design **Credits 04**

Course contents:

Foundation of Research: Meaning, Objectives, Motivation of research. Research Methods *vs.* Methodology, Types of Research: Analytical *vs.* Descriptive, Quantitative *vs.* Qualitative, Basic *vs.* applied.

Planning of Research design and experiment, - Need for research design: Features of good design, important concepts related to good design- Observation and Facts, Prediction and Explanation, Development of Models. Developing a research plan: Problem identification, Experimentation, Determining experimental and sample design, working a proposal - Review of literature. Research hypothesis sampling and data collection.

Ethics in research - Code of ethics and research, Ethics and research process, Importance of ethics in research, bio-safety. Intellectual property Rights, Commercialization, Copy Right, Royalty, Patent law, Plagiarism, Citation, Acknowledgement.

Tools, techniques for research in Physiology and health science: Microscopy, Spectrophotometry, Spectrofluorometry- principles and application in biological research. Chromatography: Principles and uses of Paper chromatography; Column chromatography, TLC,

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:43:37; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_HONS/Physiology_Hons6.pdf

GLC, HPLC, Ion-exchange chromatography; Molecular sieve chromatography; Affinity chromatography. Mass spectrometry, X-ray diffraction, X-ray crystallography: Basic principles and role in Characterization of proteins and nucleic acids. Electrophoresis: Principle, methods and uses of application of Agarose Gel Electrophoresis (AGE), PAGE, SDS-PAGE. Staining of DNA / RNA gel by ethidium bromide. Histology and Histopathology- principle and techniques. Karyotyping - techniques and staining. Cell fractionation – Cell fractionation techniques. Centrifugation: Differential and density gradient centrifugation, sucrose density gradient, $CsCl_2$ gradient, analytical centrifugation, ultracentrifugation- principles, moving boundary and density gradient ultracentrifugation technique. Marker enzymes. Radioactivity – classification and properties. Concept of radiolabelling of biomolecules and their detection by autoradiography. Principles of radioimmunoassay (RIA), ELISA and immunoblotting.

DSE4P: Research Methodology and Design (Practical) Credits 02

A Research project work on physiology/ or related health topics to be submitted based on any above tools and techniques. Formulation of the Project: meaning of scientific research and its methods, designing a project, types of project design, methods, tools and techniques, tabulation and interpretation.

Semester-I
Core Course (CC)

CC- I : Cellular Physiology, Biophysical Principles, Biochemistry, Digestive system & Metabolism **credits 06**

C1T : Cellular Physiology, Biophysical Principles, Biochemistry, Digestive system & Metabolism **credits 02**

Course Contents:

- **Cellular Physiology and Biophysical Principles**

Membrane physiology: structure and functions of cell and subcelluar membranes, cytoskeletal system, cell junctions and cell adhesion molecules, Physicocemical principles and Physiological importance of : Diffusion, Osmosis, Dialysis, Ultrafiltration, Surface tension, Adsorption, Absorption, pH and buffers, Colloids. Enzymes - classification, coenzymes, factors affecting enzyme action, regulation of enzymes- feedback, covalent and allosteric. Isozymes and non-protein enzymes

- **Biochemistry and Metabolism :**

Carbohydrates **:** classification , structure and properties
Proteins **:** Classification , order of structure (elementary idea), Amino acids**:** classification and properties
Lipids : classification. Fatty acids – Classification, and properties, lipoprotein – Classification and structure
Nucleic acid – structure of DNA and RNA
Vitamins – classification and functions. *Minerals* – functions of Sodium, Potassium, Calcium, Phosphorus, Iron, Zinc, Iodine and Fluoride.
Metabolism – Glycolysis, TCA cycle, Glycogenesis, Glycogenolysis. Gluconeogenesis, Beta oxidation of saturated fatty acid, Ketone bodies – formation and significance. Deamination, Transamination. Amino acid pool, Urea cycle, vitamins in metabolism

- **Digestive System:**

Alimentary cana1 and digestive glands – Structure in relation to functions. Composition, functions and regulation of secretion of digestive juices including bile. Digestion and absorption of carbohydrate, protein and lipid. Movements of the stomach and small intestine

C1P : Practical: Fresh tissue experiments & Identification of permanent slides **credits 02**

1. **Fresh tissue experiments:**

a) Examination & staining of fresh tissue: squamous, ciliated & columnar epithelium, skeletal muscle fibre (Rat/ Goat) by Methylene blue stain.
b) Transitional epithelium, mesentery (Rat/ Goat) (counter stain by Methylene blue)
c) Staining of adipose tissue by Sudan III or IV

2. **Identification of permanent slides:**

Bone, cartilage, lung, trachea, spleen, lymph gland, liver, salivary glands, pancreas, esophagus, stomach, small intestine, large intestine, ovary, adrenal, testis, thyroid, spinal cord, cerebellum, cerebral cortex, kidney, skin, tongue.

Semester-II
Core Course (CC)

DSC-1B: Blood, body fluid and immune System, Cardiovascular System and Respiratory System

Credits 06

DSC1BT: Blood, body fluid and immune System, Cardiovascular System and Respiratory System

Credits 04

Course Contents:

Blood & Body fluids:

Blood : Properties of blood, Composition, character, properties and function of blood. Plasma proteins: origin, separation and functions. Plasmapheresis. Bone marrow. Formed elements of blood. Erythrocytes :Morphology, fate and functions. Fragility of RBC. Erythropoiesis: Definition, steps of erythropoesis, role of different factors on erythropoesis. Haemoglobin**:** chemistry, biosynthesis, functions, catabolism, derivatives. Abnormal haemoglobin. Anaemia: different types, Clinical significances. Leucopoiesis. Leucocytes : staining, types and morphology, life cycles and functions. Colony Stimulating factor , Phagocytosis, Inflammation. Significances of leucocytosis and leucocytopenia. Leukaemia. Arneth counts. Schilling Index, Reticulocyte counts. Platelets: Structure, functions. Platelets reaction, Critical counts of Platelets. Significance of platelets counts. Thrombocytosis, Thrombocytopenia. Coagulation of blood: Mechanism of blood coagulation, factors affecting blood coagulations, Pro-coagulants, anticoagulants, disorder of coagulation. Fibrinolytic systems. Bleeding disorders, tests for bleeding disorders. Thrombotic disorders. Coagulation time, bleeding time, prothrombin time, hemolysis.

Blood groups - The ABO systems, The Rh systems, The MN system, Importance of blood groups, Immunological basis of identification of ABO and Rh blood groups. Cross matching, Donor and Recipient. Blood transfusion – collection and storage of bloods, Blood products, Preservation injuries, Precaution and hazards of blood transfusions. The RH system and pregnancy, Erythroblastosis foetalis. Blood volume: Normal value. Determination of blood volume. Determination of cell volume, Determination of plasma volume, variation and maintenance of blood volume. effective blood volume, factors influencing blood volume, regulation of blood volume.

Body fluids: Intracellular and extra cellular compartment of body fluids. Water : intake and excretion. Volumes of body water in different compartments and their estimation. Water balance and its regulation. Dehydration and oedema. Lymph and tissue fluids: Composition, formation, circulation , function and fate of lymph and tissue fluids.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:55:41; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)2.pdf

Immune System

Immune system: Overview, properties of immune system, types of immunity : innate immunity, acquired immunity, active and passive immunity. First and second line defence. Humoral and Cell mediated immunity. Complement system. Immune Competent cells : structure and functions of neutrophil, B lymphocytes, T- lymphocytes (helper, cytotoxic and suppressor), Natural killer cells, monocytes – macrophages. Primary and Secondary lymphoid organs.

Antigen and Antibody : Properties of immunogen, antigens and haptens. Classification, structure and functions of immunoglobulins. Antigen- antibody reaction, physiological effects and clinical significances. Major Histocompatibility Complex.. Brief idea of auto immunity. AIDS. Transplantation immunity.

Vaccination : Immunization- Passive and active immunozation. Immunizing agents. Vaccine. Antisera. Vaccination. Toxin and Toxoids.

Cardiovascular system:

Cardiovascular system - Anatomy and histology of the heart. Properties of cardiac muscle. Origin and propagation of cardiac impulse. Electrophysiology of cardiac tissue. Heart Block , basic idea about artificial pacemaker. Cardiac valves, Heart rate and its regulations. Heart sounds. Nerves and its role in the regulation of the heart function. Frank – Starlings law's of heart. Electrocardiography, Echocardiography,

Cardiac cycle : events. different phases and pressure changes in cardiac chamber, factors affecting and regulation. Cardiac output: methods of determination (dye dilution and Fick principle), factors affecting regulation.

Structure of arteries, arterioles, capillaries. Venules and veins. Pulse - arterial and venous. Blood pressure and its regulation and factors controlling. Baro - and Chemoreceptor. Vasomotor reflexes. Methods of measurement of blood pressure. Role of Renin- angiotensin system, Vasopressin or ADH in Blood Pressure regulations.

Peculiarities of regional circulations: Coronary, Pulmonary, Renal, Cutaneous, Hepatic and Cerebral.

Respiratory System:

Anatomy and histology of the respiratory passage and organs. Role of respiratory muscles in breathing. Compliance & elastic recoil of the lung, Lung surfactant, intra thoracic and intra pleural pressure. Respiratory failure. Artificial respiration. Significance of physiological and anatomical dead space. Lung volumes and capacities. Exchange of respiratory gases between lung and blood and between blood and

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:55:41; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)2.pdf

tissues. Transport of oxygen and carbon dioxide in blood. Regulation of respiration - neural and chemical. Role of respiratory centre, central and peripheral chemo-receptors.

Hypoxia, asphyxia, dyspnea, asthma, cyanosis, dysbarism,. Lung function tests. Non respiratory function of lungs.

DSC1BP: Practical **Credits 02**

Haematology:

1. Study of the compound microscope.
2. Preparation of blood film of your own blood. Staining of the blood film with Leishman's stain. Identification of different types of blood corpuscles.
3. Determination of TC of RBC and WBC by haemocytometer.
4. Differential count of WBC.
5. Determination of ESR of human blood.
6. Estimation of haemoglobin by haemoglobinometer.
7. Preparation of haemin crystals.
8. Determination of Blood groups.
9. Determination of clotting time, bleeding time, prothrombin time.
10. Determination of osmotic fragility of Red Blood Corpuscle.
11. Preparation and staining of bone marrow. Measurement of diameter of megakaryocyte.
12. Reticulocyte staining

Human Experiment:

1. Measurement of arterial blood pressure by Sphygmomanometer at rest and after exercise, Calculate the mean arterial blood pressure (MABP)
2. Measurement of heart rate and pulse rate (30 beats methods) during rest and exercise and graphical plotting.
3. Modified Harvard step test and determination of physical fitness.
4. Pneumographic recording of respiratory movements along with the effect of drinking of water, talking, laughing, coughing, exercise, hyperventilation and breathe holding.
5. **Demonstration:** Measurement of oxygen saturation by pulse oxymeter before and after exercise. Measurement of Peak Expiratory Flow Rate. Measurement of forced expiratory volume (FEV) in first second.

Semester-III

Core Course (CC)

DSC-1C (CC-3): Nerve –Muscle Physiology, Nervous system, Skin and Body Temperature Regulation Credits 06

DSC1CT: Nerve –Muscle Physiology, Nervous system, Skin and Body Temperature Regulation Credits 04

Course Contents:

Nerve-muscle Physiology

Different types of muscle and their structures. Sarcotubular system. Red and white muscles. Properties of muscle: all or none law, rheobase, chronaxie, indefatigability, beneficial effect, summation, refractory period, tetanus and fatigue. Smooth Muscle: Morphology, Single-unit and multi-unit smooth muscle. Muscle spindle. Cardiac Muscle: Morphology, Electrical Properties, Mechanical Properties Pacemaker Tissue.

Mechanism of muscular contraction. Structural, chemical and mechanical changes in skeletal muscle during contraction and relaxation. Isotonic and isometric contraction. Molecular basis of smooth muscle and cardiac muscle contraction and relaxation.

Structure and classification of nerves. Nerve cells. Excitation & Conduction. Measurment of electrical events. Degeneration and regeneration of nerve fibre. Myelination. Origin and propagation of nerve impulse. Velocity of impulse in different types of nerve fibres. Properties of nerve fibre: all or none law, rheobase, chronaxie, refractory period, indefatigability. Properties of mixed nerves. Neurotropin.

Synapse: structure , functional anatomy, classification, mechanism of synaptic transmission. Electrical Events at Synapses, Inhibition & Facilitation at Synapses. Motor unit, motor point. EPSP,IPSP.

Neuromuscular junction: structure, mechanism of impulse transmission, end plate potential. A brief overview on neurotransmitters. Electromyography.

Nervous System:

A brief outline of organization and basic functions of the nervous system - central and peripheral nervous system. Structural organization of the different parts of the brain and spinal cord. Hemi section and complete section of spinal cord. Brown- Sequard syndromes. Receptors : Definition, structure, classification, mode of action. Blocker and Stimulator. Reflexes: Introduction, Monosynaptic Reflexe, Stretch Reflex, Polysynaptic reflex. Withdrawal Reflex. General Properties of Reflexes. Reflex action - definition, classification, properties , reflex arc.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:47:05; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)3.pdf

Ascending and Descending tracts : Origin, course, terminations, and functions. Lower motor neurone and upper motor neurone. Postural reflex, Muscle spindle, Muscle tone and its regulation. Decrebrate and decorticoid rigidity.

Arousal Mechanisms, Sleep, & the Electrical Activity of the Brain - The Reticular Formation & the Reticular Activating System, The Thalamus & the Cerebral Cortex: structure & functions. The Electroencephalogram, Physiological Basis of the EEG & Sleep, Interpretation of abnormal EEG pattern.

Control of Posture & Movement - Introduction, General Principles, Basal Ganglia & Cerebellum: Structure & functions. Disorders of basal ganglia and cerebellum.

The Autonomic Nervous System - Introduction, Anatomic Organization of Autonomic Outflow, Chemical Transmission at autonomic Junctions.

Central Regulation of Visceral Function - Introduction, Hypothalamus: Anatomic Considerations, Hypothalamic Function, Relation to Autonomic Function, Relation to Sleep, Hunger, Thirst, Control of Posterior Pituitary Secretion, Control of Anterior pituitary Secretion, Temperature Regulation, fever.
Neural Basis of instinctual Behavior & Emotions - Introduction, Limbic system: Anatomic Considerations, Functions - Sexual Behavior, Fear & Rage, Motivation.

CSF: composition, formation, circulation and functions. A brief idea of speech, aphasia, memory conditioning and learning. Sleep and sleep wakefulness cycle.

Skin and Body temperature regulation:

Histological structure of skin. Colour of the skin. Organization of sweat gland. Composition and function of the sweat. Regulation of sweat secretion. Insensible and sensible perspiration. Composition and function of sebum. Triple response.
Normal body temperature. Channels of heat loss and heat gain process. Regulation of body temperature: Higher centre and mechanism of regulation. Hypothermia and Hyperthermia. Physiological basis of fever. Cold sress. Insulating effects. Acclimatization to colds.

DSC1CP: Practical **Credit 02**

Practical:

1. Isolation and Staining of nerve fibers with node(s) of Ranvier (AgNO3).
2. Staining of skeletal and cardiac muscles by Methylene Blue stain.
3. Measurement of grip strength.
4. Recording of body temperature.
5. To study the response of the skin to blunt injury (triple response) (**Demonstration)**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:47:05; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)3.pdf

Neurological experiments:

1. Experiments on superficial (plantar) and deep (knee jerk) reflex.
2. Reaction time by stick drop test.
3. Short term memory test (shape, picture word).
4. Two point discrimination test.

Demonstration:

1. Study of Kymograph, Induction coil, Key and other instruments used to study mechanical responses of skeletal muscle.
2. Kymographic recording of mechanical responses of gastrocnemius muscle to a single stimulus and two successive stimuli.
3. Kymographic recording of the effects of variations of temperature and load (after-load) on single muscle twitch.
4. Calculation of work done by the muscle.
5. Determination of nerve conduction velocity.

Skill Enhancement Course (SEC)

SEC- 1: Public Health and Epidemiology Credits 02

SEC1T: Public Health and Epidemiology

Course Contents:

Unit I: Principles of Epidemiology in Public Health: Overview of epidemiology methods used in research studies to address disease patterns in community and clinic-based populations, distribution and determinants of health-related states or events in specific populations, and strategies to control health problems

Unit II: Statistical Methods for Health Science Analysis and interpretation of data including data cleaning, data file construction and management; implementation of analytic strategies appropriate for the type of data, study design and research hypothesis; parametric and nonparametric methods, measures of association, Linear and Logistic regression, Generalized Linear Modeling, and Survival analysis

Unit III:
Environmental Health. Effects of biological, chemical, and physical agents in environment on health (water, air, food and land resources); ecological model of population health; current legal framework, policies, and practices associated with environmental health and intended to improve public health.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:47:05; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)3.pdf

Unit IV: Psychological, Behavioural, and Social Issues in Public Health. Cultural, social, behavioural, psychological and economic factors that influence health and illness; behavioural science theory and methods for understanding and resolving public health problems; assess knowledge, attitudes, behaviours towards disease and patient compliance to treatment.

Unit V: Management of Health Care Program and Service Organizations Techniques and procedures for monitoring achievement of a program's objectives, generating evidence of program effectiveness, assessing impacts in public health settings; evaluation of framework that leads to evidence-based decision-making in public health. Organizational principles and practices including organizational theory, managerial role, managing groups, work design, and organization design at primary, secondary, and tertiary levels of care

Unit VI: Epidemiology of disease. Contemporary methods for surveillance, assessment, prevention, and control of infectious and chronic diseases, disabilities, HIV/AIDS; understanding etiology; determining change in trend over time; implementation of control measures

Suggested Readings:

1. Gordis Leon. Epidemiology (Fifth edition) , Elsevier Saunders.
2. Dona Schneider and David E. Lilienfeld. Lilienfeld's Foundations of Epidemiology, Fourth Edition, Oxford University Press, USA.
3. Porta Miquel. A Dictionary of Epidemiology, Oxford University Press, USA,
4. Somerville Margaret, et al., Public Health and Epidemiology at a Glance, Second Edition, Wiley-Blackwell,
5. Beaglehole. R. Bonita, et. al Basic Epidemiology, 2nd Edition, WHO Publication, Geneva, .
6. Spassoff R.A. Epidemiologic Methods for Health Policy, Oxford University Press,
7. Barkar, D.J.P., Practical Epidemiology: Churchill pub, Livingstone.
8. Knox E. G. Epidemiology in health care planning: A Guide to the Uses of a Scientific Method, Oxford University Press, USA.

Or

SEC-1: Environmental Epidemiology Credits 02

SEC1T: Environmental Epidemiology

Course Contents:

UNIT-I:
Introduction, Definitions, man - environment relation, terms, Historical Background- brief history of social reforms. Branches – Descriptive, research, bio- statistical, economic, Methodological and Administrative.

UNIT-II:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:47:05; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)3.pdf

Principles- an epidemic and ingredients - and types of studies – Descriptive, analytical- cohort, case- control and cross sectional an biological studies.

UNIT-III:

Causes – Koch postulates. Immunological proof- cancers and slow viruses- Hills criteria- emergence of new diseases-and effect modifications. Diseases of plants and animals - extinct and endangered animals - causes and effects - Measurements and statistical associations –prevalence rate – incidence rate - Cumulative incidence rate-Mortality rate- Mean and standard error–risk ratio, attributable ratio - simple problems.

UNIT-IV:

Types of sampling - simple random sampling; stratified sampling; systematic sampling; multi stage sampling; cluster sampling.

Methods in Field study – questionnaire preparation; Data analysis; Report writing.

UNIT –VI:

Environmental hazards and Public health management: Sources of Environmental hazards, hazard identification and accounting, fate of toxic and persistent substances in the environment, dose response, evaluation, exposure assessment. Pollution: Air, water, noise pollution sources and effects. Waste management and hazards: Types and characteristics of wastes, biomedical waste handling and disposal, nuclear waste handling and disposal, Waste from thermal power plants. Case histories on Bhopal gas tragedy, Chernobyl disaster, Seveso disaster and Three Mile Island accident and their aftermath. Diseases: Social and economic factors of disease including role of health services and other organizations: Infectious (Bacterial-Tuberculosis, Typhoid; Viral - AIDS, Poliomyelitis, Hepatitis; Protozoan- Leishmaniasis, Malaria); Lifestyle and Inherited/genetic diseases, Immunological diseases; Cancer; Diseases impacting on Western versus developing societies.

Suggested Readings:

1. Anisa Basheer, Environmental Epidemiology, Pointer Pub .
2. R.Beaglehole, R. Bonita & T. Kjellstrom Epidemiology WHO Publ., Current edition .
3. Epidemiology of Occupational Health, WHO publication.
4. Rose, G. The Strategy of Preventive Medicine, Oxford pres.
5. Gordis Leon. Epidemiology (Fifth edition) , Elsevier Saunders.
6. Porta Miquel. A Dictionary of Epidemiology, Oxford University Press, USA,
7. Somerville Margaret, et al., Public Health and Epidemiology at a Glance, Second Edition, Wiley-Blackwell,
8. Spassoff R.A. Epidemiologic Methods for Health Policy, Oxford University Press,
9. Knox E. G. Epidemiology in health care planning: A Guide to the Uses of a Scientific Method, Oxford University Press, USA.

Semester-IV
Core Course (CC)

DSC-1D (CC-4): Sensory Physiology, Endocrinology and Reproductive Physiology, Renal Physiology Credit 06

DSC1DT: Sensory Physiology, Endocrine and Reproductive System, Renal Physiology

Credit 04

Course Contents:

Sensory Physiology

Classification of general and special senses and their receptors. Muller's law of specific nerve energetic. Weber – Fechner Law, Mechanism of transduction of stimuli from sensory receptors. Adaptation of receptors. Receptors as biological transducer. Neural pathway of touch, pressure, pain, thermal and kinaesthetic sensation.

Olfaction and Gustation: Structure of sensory organ, neural pathway of olfactory and gustatory sensation. Physiology of olfactory and gustatory sensation. Olfactory and gustatory adaptation. After-taste.Olfactometer.

Audition & Equilibrium: Sound wave, decibel**,** Structure of ear ,anatomic consideration, Auditory apparatus- external, middle and internal ears. Organ of Corti. Mechanism of hearing and its modern theory. Vestibular function. Discrimination of sound frequency and loudness. Auditory pathways and centres.

Vision: Structure of the eye anatomic consideration.. Structure of the lens. Error of refraction. Pupilary reflex, Light reflex. Argyll Robertson pupil. Histology of retina. Photopic and Scotopic vision. Chemical changes in retina on exposure to light. Genesis of electrical response, Visual pathway and effects of lesions of these pathways. Light reflex. Accommodation and Visual acuity. Errors of refraction. Positive and negative after-image. Light and dark adaptation. Colour vision and colour blindness. Errors in visual processes. Electroretinogram, Visual Field, Perimetry, Binocular vision.

Endocrinology:

Anatomy of endocrine system. Hormones - classification. Experimental and clinical methods of study of endocrine glands. Hormone receptor and cell signalling. Mechanism and modern concepts of hormone action. Basic concept of regulation of hormone actions. Positive and negative feedback mechanism.

Hypothalamo - Hypophysial axis: Basic concept of neurohormone. Hypothalamo-hypophyseal tract and portal system. Releasing factors, Tropic hormones, vascular and neural connections

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:45:01; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)4.pdf

between the hypothalamus and pituitary.

Pituitary gland: Histological structure, hormones, functions and regulation of anterior, middle and posterior lobes of pituitary. Growth hormone. Oxytocin and Vasopressin. Hypo and hyperactive states of pituitary gland.

Thyroid gland: Histological structure. Thyroid hormone: chemistry, biosynthesis, storage and transport. Functions of thyroid hormones (T_4 T_3) Thyrocalcitonin. Hypo and hyper-active states of thyroid.Regulation of thyroid hormone secretion.

Parathyroid gland: Histological structure, functions of parathyroid hormone. Role in calcium metabolism, Parathyroid hormone and bone. Tetany. Calcitonin- source, function and regulations.

Adrenal Cortex: Histological structure and functions of different hormones. Biosynthesis of adrenocortical hormone. Hypo and hyper-active states of adrenal cortex.

Adrenal Medulla: Histological structure, regulation and hormonal functions of adrenal medulla. Pheochromocytoma.

Pancreas: Histological structure of panchreatic islets. Source, regulation, mode of action and function of pancreatic hormones.Diabetes mellitus.

Brief idea of the origin and functions of renin- angiotensin, prostaglandins. Erythropoietin and melatonin. Gastrointestinal hormones- physiological functions. The endocrine function of the heart : Atrial Natriuretic Peptide and its function.

Reproductive Physiology:
Primary and secondary sex organs: Anatomy and Physiology, secondary sex characters. Puberty, Precocious & Delayed Puberty.

Testis: histology, spermatogenesis, spermiogenesis, testicular hormones and their functions, Abnormalities of the testicular function. Prostate and seminal vesicle.

Ovary: histology, oogenesis, ovarian hormones and their functions. Control of ovarian functions. Physiological mechanism of ovulation. Abnormalities of ovarian functions. Ovarian cysts.

Oestrus and menstrual cycles and their hormonal control. Fertilization, implantation and structure and functions of placenta. Placental hormone. Pregnancy : Physiological changes during pregnancy. Maintenance of pregnancy – role of hormones. Pregnancy tests, Parturation, ectopic pregnancy. Development of mammary gland. Lactation - Role of hormones, Sympathetic nervous system. Menopause. Stem cell biology.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:45:01; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)4.pdf

Renal Physiology:

Structure and functions of kidney. Microanatomy of a nephron. Juxtaglomerular apparatous.Mechanism of formation of urine. Counter current system, counter current multiplier. Function of Malpighian corpuscles and renal tubule. Normal and abnormal constituents of urine and their clinical significances. Renal threshold. Physiology of urine storage and micturation.Non excretory function of kidney. Disorders of Renal Functions. Renal stone formation. Renal function tests. Dialysis and Artificial kidney.

DSC1DP: Practical **Credits 02**

1. Staining and identification of kidney and ureters.
2. Silver nitrate preparation of corneal cell space.
3. Study of estrous cycle.
4. Identification of normal and abnormal constituents of urine.
5. Tests for Urinary deposits.
6. Estimation of albumin in urine.
7. Detection of specific gravity of urine.
8. Determination of visual acuity by Snellen's chart / Landolt's chart.
9. Determination of colour blindness by Ishihara chart.
10. Exploration of conductive and perceptive deafness by tuning fork method.
11. Sperm count and sperm motility in rat.

Demonstration:

1. Study of the effects of oxytocin on uterine contraction.
2. Study of the effects of adrenaline on intestinal / uterine movements.
3. Estimation of estrogen by Spectrophotometric method.
4. Pregnancy test from human urine by kit method.
5. Quantitative estimation of Urea in Urine
6. Surgical techniques: principles of surgery in endocrinology. Ovarectomy, hysterectorny, castration and vasectomy in rats.
12. Human vaginal exfoliate cytology.

Skill Enhancement Course (SEC)

SEC-2: Biochemical Techniques **Credits 02**

SEC2T: Biochemical Techniques

Course Contents:

Unit-I: Spectroscopic Techniques

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:45:01; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)4.pdf

Principle of UV- Visible absorption spectrophotometry, instrumentation and applications. Flourimetry: Phenomena of fluorescence, intrinsic and extrinsic fluorescence, instrumentation and applications

Unit-II: Chromatography

Basic principles of chromatography: Partition coefficient, concept of theoretical plates, various modes of chromatography (paper, thin layer, column), preparative and analytical applications, LPLC and HPLC. Principle and applications of: Paper Chromatography, Thin Layer Chromatography. Molecular Sieve Chromatography, Ion Exchange Chromatography, Affinity Chromatography

Unit-III: Electrophoresis

Basic principle of electrophoresis, Paper electrophoresis, Gel electrophoresis, discontinuous gel electrophoresis, PAGE, SDS-PAGE, Native and denaturing gels. Agarose gel electrophoresis, buffer systems in electrophoresis. Electrophoresis of proteins and nucleic acids, protein and nucleic acid blotting, detection and identification. Molecular weight determination, Isoelectric Focusing of proteins

Unit-IV: Centrifugation

Principle of centrifugation, basic rules of sedimentation, sedimentation coefficient, various types of centrifuges, different types of rotors, differential centrifugation, density gradient centrifugation (Rate zonal and Isopycnic)

Suggested Readings:

1. Human Molecular Genetics, 3rd edition (2003), Tom Strachan and Andrew Read; Garland Science Publishers.
2. Physical Biochemistry: Applications to Biochemistry and Molecular Biology, 2nd edition (1982), David Freifelder, W.H. Freeman and Company.
3. Principles and Techniques of Biochemistry and Molecular Biology 7th edition (2010), Wilson K and Walker J. Cambridge University Press, 2010.
4. Principles of Gene Manipulation and Genomics, 7th edition (2006), S.B. Primrose and R.M.
   Twyman. Blackwell Scientific
5. Molecular Biotechnology: Principles and Applications of Recombinant DNA, 4th edition (2009), Bernard R. Glick, Jack J. Paternack, Cheryl I. Patten. ASM press,
6. Molecular Cloning: A Laboratory Manual, 4th edition (2012), Three-volume set by Michael
   R. Green, Joseph Sambrook; Cold Spring Harbor Laboratory Press,
7. Culture of Animal Cells: A Manual of Basic Technique and Specialized Applications, 6th edition (2010),

SEC-2: Medical Diagnostics Credits 02

SEC2T: Medical Diagnostics

Course Contents:

Unit-1: Biomedical basis of Diseases

Infectious diseases (Bacterial, Viral, Protozoan); Inherited/genetic diseases (Diabetes, Hypertension); Immunological diseases [Autoimmune hemolytic anemia (AHA), Di George's Syndrome, Systemic Lupus Erythematosus (SLE)]; Cancer- Nature/ types; Treatment, Relation of pathogenesis to symptoms, diagnosis and treatment.

Unit-II: Analytical Technology

Brief and relevant description of the following Wet techniques: UV Chromatography Methods-LC, HPLC and GC-MS Nuclear Magnetic Resonance Spectroscopy (NMR) Atomic Force and Scanning Electron Microscopy (AFM and SEM) Electrochemistry Molecular Modeling and Chemical Databases

Unit-III: Diagnostic Methods

Outline methods used in hospital histopathology, biochemistry, hematology and microbiology laboratories. Theoretical knowledge - ECG, Echo, X-ray, CT, MRI, PET, Ultrasonography.

Suggested Readings

1. Bailey and Scott's Diagnostic Microbiology, 12th edition (2007), Betty A. Forbes, Daniel,F. Sahm and Alice S. Weissfeld; Mosby Elsevier Publishers.
2. Medical Laboratory Technology Methods and Interpretations Volume 1 and 2, 6th edition (2009), Ramnik Sood; Jaypee Brothers Medical Publishers.
3. Current Protocols in Human Genetics, 1st edition (1994), Dracopoli and Nicolas C. Dracopoli; John Wiley and Sons, Inc.,
4. Molecular Cloning: A Laboratory Manual, 4th edition (2012), Michael R. Green and Joseph Sambrook; Cold Spring Harbor Laboratory Press,
5. Microbiology: A Laboratory Manual, 10th edition (2013), James Cappuccino and Natalie Sherman, Benjamin Cummings,

Or

SEC-2: Instrumentation Techniques in Biology Credits 02

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:45:01; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)4.pdf

SEC2T: Instrumentation Techniques in Biology

Course Contents:

Unit-I: Basics of Microscopy-Features, Working principle, Advantages and limitations - Introduction- Bright field Microscopy - Dark Field Microscopy, Light microscopy-Construction and working of compound microscope - Phase contrast microscopy - Electron microscopy-TEM, SEM

Unit-II: Staining methods - Simple staining; Gram staining - Lacto-phenol cotton blue staining

Unit-III: Optical Methods - Features, Working principle, Advantages and Limitations **-** Absorption Methods; Ultraviolet Spectrophotometer; Infrared spectrophotometer **-** Emission methods; Atomic Absorption Spectrophotometer (AAS) Flame Photometry

Unit-IV: Chromatography methods - Features, Working principle, Advantages and Imitations High performance liquid chromatography (HPL Gas Chromatography

Unit-V: Biotechnology and Immunological techniques- Features, Working principle, Advantages and limitations - Electrophoresis –Introduction, Types of electrophoresis, Agarose gel electrophoresis, Gradient gel electrophoresis, DNA finger printing PCR Technique ELISA (Enzyme Linked Immuno Sorbant Assay)

Suggested Readings:

1. A. R. Murugesan and C. Rajakumari, Environmental Science and biotechnology-Theory and Techniques, MJP Publishers.
2. M. L. Srivastava, Bioanalytical Techniques, Narosa Publishing House.
3. R.Gopalan, P.S.Subramanian and K.Rangarajan, Elements of Analytical Chemistry, Sultan Chand and Sons.
4. S.Sadasivam and A. Manicham, Biochemical methods, New Age International Publishers.

Semester-V

Discipline Specific Electives (DSE)

DSE -1A: Sports Physiology, Work Physiology and Ergonomics Credits 06

DSE1AT: Sports Physiology, Work Physiology and Ergonomics Credits 04

Course Contents:

Sports & work Physiology: Concepts of Physical work and Physiological work. Physical work: Definition and units of measurement. Classification of Physical work. Classification of workloads. Differences between work and sports. Energetic of muscular works. Measurement of energy cost for various Physical Work. Cardiovascular and respiratory changes during graded exercise. Aerobic and anaerobic capacity. Maximum aerobic power.
Exercise Physiology. Exercise & Performance. Exercise Physiology & Gender. Environmental Exercise Physiology. Maximal oxygen consumption and post exercise oxygen consumption – definition, factors affecting, measurement and significance. Muscle fatigue and recovery. Tests for Physical work capacity – measurement with Bicycle Ergo meter, Tread Mill and Harvard Step Test. Work rest cycle and importance of rest pause.
Physical Training: General Principles and different methods. Effects of overtraining and detraining. Nutrition in sports – neutrient and caloric requirements for different kinds of sports. Sports injury and its management. Sports rehabilitation and sports medicine. Role of sports in emotion and social factors. Basic concepts of sports psychology. Sports Biochemistry. Ergogenic aids. Ergogenic aids & Dietary supplement.

Ergonomic – Basic concepts and its application in industry to improve efficiency. Ergonomics-importance of ergonomics in occupational health and well beings. Physical work environment. Occupational hazards- Physical, Biochemical Hazards. Occupation diseases – Silicosis, Asbestosis, Farmer's Lung. Industrial safety.

Anthropometry: Anthropometry and its implication in general. Different body dimension measures in anthropometry and their significances. Sports Anthropometry.

DSE1AP: Sports Physiology, Work Physiology and Ergonomics (Practical) Credits 02

List of Practical

1. Measurements of resting and working heart rate using thirty beats and ten beats methods respectively.
2. Measurement of blood pressure before and after different graded exercise.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:42:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)5.pdf

3. Determination of Physical Fitness Index (PFI) of an individual and recording of recovery heart rate after standard exercise.
4. Determine cardiac cost of specific work.
5. Determination of $VO_{2\,max}$ by Queen College step test.
6. Determination of endurance time by hand grip dyanometer.
7. Six minutes walk tests.
8. Measurement of some common anthropometric parameters – stature, weight, eye height(standing), shoulder height, sitting height, knee height (sitting), arm reach from wall, mid – arm circumference, waist circumference, hip circumference, neck circumference, head circumference, chest circumference.
9. Determination of body surface area (using a nomogram) and Body Mass Index (BMI) for an anthropometric measurement.
10. Measurement of body fat percentage.

Or

DSE-1A: Environmental Physiology — Credits 06

DSE1AT: Environmental Physiology — Credits 04

Course contents:

Ecosystem – structure and function, different types of ecosystem, food chains, food webs and energy flow and mineral cycling in ecosystems; primary production and decomposition , Biogeochemical cycle. Global environmental problems: global climate change, ozone layer depletion, the green house effect, global warming and its consequences.

Environment – Physical and biological aspects. Effects of exposure to hot and cold environment. Acclimatization to hot and cold environment. Heat disorders and its preventive measures. Effects of hypobaric and hyperbaric environment. Caisson disease. Mountain sickness. Acclimatization to high altitudes. Preventive measure for hypobaric and hyperbaric effects. Physiological effects and preventive measures against G force, noise, vibration and radiation. Types of pollutants (Primary, secondary and tertiary).

Environmental Pollutions and Health Hazards: Concept of hygiene, health and public health. Air, water, food borne diseases: causes, symptoms and control. Food Additives and Adulterants: definition, examples and human health hazards. Vector Borne Epidemic Diseases: Malaria and Plague- aetiology and control.

Air Pollution: definition, sources, air pollutants, effects of air pollution on human health. Water Pollution: definition, types, health hazards, water pollutants, biochemical oxygen demand (BOD), thermal pollution, concept of safe drinking water standards. Soil Pollution: causes, health hazards, solid waste management, bioremediation, phyto-remediation. Sound Pollution: definition, concept of noise, source of sound pollution, effects of sound pollution on human health, noise index (noise standards). Radionuclide Pollution: ionizing radiations, effects of ionizing radiation on human health, permissible doses. Source, health problems and preventions

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:42:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)5.pdf

of Bio- medical waste. Environment and Health impacts assessment – Concept, Steps and application. Brief idea about biotransformation, bioaccumulation, biomagnifications. Population over growth and its effects on health. Xenobiotics. Impacts of green house effects in life. Human health, permissible doses.

Environmental management: Environmental ethics. Conservation of topsoil, ground water and wild lives; rain water harvesting; sanctuary, national park, biosphere reserve, wildlife (conservation) Act, 1992.

DSE1AP: Environmental Physiology (Practical) **Credits 02**

Practical:

A:

1. Measurement of environmental temperature – dry bulb and wet bulb, relative humidity, air velocity.
2. Determination of O_2,CO_2, BOD & COD
3. Determination of total alkalinity and chlorine in water.
4. Determination of dissolve oxygen in the supplied water samples-supplied water, ground water extracted by shallow and deep tube wells, stream waters, pond water etc.
5. Detection of food additives in different food samples.
6. Biochemical estimation of serum glucose, total proteins, SGPT and SGOT
7. Detection of food additives in different food samples.
8. Determination of light intensity (at library, laboratory, and class room) by lux meter.
9. Determination of sound levels by sound level meter and noise index.

B:

Physiological (experimental) Experiments (Demonstration)

1. Kymographic recording of the effects of Hg, Pb , As compounds and food additives on the movements of perfused heart of toad.

2. Kymographic recordind of the effects of Hg, Pb , As compounds and food additives on the intestinal movements of rats in Dale's bath.

C: Histo - chemical Experiments (Demonstration)

Histochemical studies: chronic effects of food additives and arsenic compounds on liver, kidney, intestine, brain, muscle and lung tissues in rat.

Or

DSE-1A: Community Nutrition and Public Health Credits 06

DSE1AT: Community Nutrition and Public Health **Credits 04**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:42:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)5.pdf

Course contents:

Population, society, community and community health: concepts. Nutrition - introduction. Food as source of nutrients, functions of food, definition of nutrition, Nutrients & energy. Adequate, optimum & good nutrition. Malnutrition and under nutrition, Over nutrition. Human Nutrition- Principle, Interrelationship between nutrition, health& diseases. Visible symptoms of good health. Nutrition - fitness, athletics & sports.

Food guide - Basic food groups. Use of food guide (according to R.D.A.). Use of food in body - digestion, absorption, transport & utilization. ACU- concept.

Balanced diet. Diet Survey – Principles. Composition and nutritional value of common Indian food stuff - rice, wheat, pulses, egg, meat, fish and milk. Dietary fibres - role of fibers in human nutrition. Calorie requirement. Vitamins and Minerals. Malnutrition and under nutrition.
Principles of formulation of balanced diets for growing child, adult man and woman, pregnant and lactating woman. Diet management of obese, diabetic, hypertensive person and athlete. Basic idea on PCM, marasmus, kwashiorkor and their prevention. Iron and Iodine deficiency. Recommended dietary allowances, malnutrition and chronic energy, LBW, PEM, Xerophthalmia, micronutrient disorders. Physiology of starvation and obesity. Food toxicity. Effect of processing on nutritive values of foods.
Socio ecology of nutrition, Habitual diets in India and their adequacy. Nutritional assessment of human and community. Malnutrition in a community. National nutritional related health program.

Epidemiology : Concepts. Public health and public health issues: Basic ideas.Etiology, epidemiology and prevention of malaria, dengue, filarial, hepatitis, AIDS, nutritional anemia, atherosclerotic disorders. Cause and management of thalassemia, gout, obesity, endemic goiter, dental carries.

Population problem – principles and methods of family planning and Assisted Reproductive Technology. Sound pollution as a community health issue; definition, concept of noise, source of extraordinary sound, effects of sound pollution on human health, noise index (noise standards).

DSE1AP: Community Nutrition and Public Health (Practical) Credits 02

Practical:

1. Quantitative estimation of glucose, sucrose by Benedict’s method.
2. Estimation of lactose from milk by Benedict’s methods.
3. Estimation of Chloride by Mohr’s methods.
4. Estimation of amino nitrogen through formol titration methods.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:42:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)5.pdf

5. Qualitative analysis of pulse, rice, milk to test the presence of carbohydrates, protein, fat.
6. Qualitative identification of lipids and cholesterol.
7. Qualitative assessment of noise by sound level meter.

Field Survey Report:

1. Survey on the status of dietary intake in the surrounding area through visits, etc.

Or

2. Diet survey report of a family (as per ICMR specification). Each student has to submit a report on his/her own family. [Report should be as per ICMR specification. Report should be hand written].
3. A report (hand-written) on the basis of field survey from one of the followings:
   (1) Physiological parameters of human (at least three parameters).
   (2) Anthropometric measurements on human (at least three parameters).

Or

DSE-1A: Biostatistics — Credits 06

DSE1AT: Biostatistics — Credits 04

Course Contents:

Scope of statistics– utility and misuse. Principles of statistical analysis of biological data. Basic concepts –variable. Population and Sampling -- parameter, statistic. Presentation of data frequency distribution, frequency polygon, histogram, bar diagram and pie diagram. Different classes of statistics-mean, median, mode, mean deviation, variance, standard deviation, standard error of the mean, Standard score. Degrees of freedom, Probability. Normal distribution. Student's t- distribution. Testing of hypothesis-Null hypothesis, errors of inference, levels of significance, t- test and z score for significance of difference. Distribution-free test - Chi-square test. Linear correlation and linear regression

DSE1AP: Biostatistics (Practical) — Credits 02

Practical:

1. Computation of mean, median, mode, standard deviation and standard error of the mean with physiological data like body temperature, pulse rate, respiratory rate, height and weight of human subjects.

2. Graphical representation of data in frequency polygon and histogram.

3. Student's t test for significance of difference between means.

4. Demonstration: Statistical analysis and graphical representation of biological data with computer application program (Microsoft Excel).

Skill Enhancement Course (SEC)

SEC- 3: Maternal and Child Nutrition — Credits 02

SEC3T: Maternal and Child Nutrition

Course Contents:

Unit - I

• Nutritional needs during pregnancy, common disorders of pregnancy (Anaemia, HIV infection, Pregnancy induced hypertension), relationship between maternal diet and birth outcome.
• Maternal health and nutritional status, maternal mortality and issues relating to maternal health.

Unit - II

• Nutritional needs of nursing mothers and infants, determinants of birth weight and consequences of low birth weight, Breastfeeding biology, Breastfeeding support and counselling

Unit - III

• Infant and young child feeding and care - Current feeding practices and nutritional concerns, guidelines for infant and young child feeding, Breast feeding, weaning and complementary feeding.
• Assessment and management of moderate and severe malnutrition among children, Micronutrient malnutrition among preschool children
• Child health and morbidity, neonatal, infant and child mortality, IMR, U5MR and MMR; link between mortality and malnutrition;

Unit - IV

Overview of maternal and child nutrition policies and programmes.

Or

SEC-3: Nutrition and Fitness — Credits 02

SEC3T: Nutrition and Fitness

Course Contents:

Unit -1: Understanding Fitness

- Definition of fitness, health and related terms
- Assessment of fitness
- Approaches for keeping fit

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:42:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)5.pdf

Unit- 2: Importance of nutrition

- Role of nutrition in fitness
- Nutritional guidelines for health and fitness
- Nutritional supplements

Unit -3: Importance of Physical activity

- Importance and benefits of physical activity
- Physical Activity – frequency, intensity, time and type with examples
- Physical Activity Guidelines and physical activity pyramid

Unit - 4: Weight Management

- Assessment, etiology, health complications of overweight and obesity
- Diet and exercise for weight management
- Fad diets
- Principles of planning weight reducing diets

Discipline Specific Electives (DSE)

DSE-1B: Microbiology, Immunity and Biotechnology — Credits 06

DSE1BT: Microbiology, Immunity and Biotechnology — Credits 04

Course Contents:

Microbiology:

Viruses: DNA & RNA Viruses. Viroids and Prions. Bacteriophages – structure & morphological classification. Bacteria: structure, classification. Staining :- Principal, procedure, uses. Gram stain, Acid – fast stain, Albert stain. Pathogenic and non - pathogenic bacteria. Nutritional requirements of bacteria, nutritional types culture media. Bacterial Growth curve- Preparation, physiological factors required for growth. Bacrterial metabolism: fermentation (ethanol, lactic acid, acetic acid), glyoxalate cycle, Entner – Doudoroff pathway, Phosphoketolase pathway. Bacterial Genetics: elementary idea of transformation, conjugation and transduction. Sterilization, disinfection and pasteurization: Physical and chemical methods used. Antibiotics, Bacteriostatic & Bacteriocidal agents. Bacteriolytic agents. Concepts of antiseptic, probiotics and prebiotics. Basic idea about medical bacteriology, virology and mycology.

Immunity and Vaccination: Elementary knowledge of innate and acquired immunity. Humoral and Cell mediated immunity. Toxin and toxoids. Vaccination : Principles and importance. Passive and active immunisation. Types and uses of vaccine.

Biotechnology: History and importance. DNA and RNA. Gene, Genome and Genetic code, translation. Recombinant DNA technology : concepts, techniques and application., DNA manipulation. Cloning – concept and significances. Cloning vectors. c DNA libraries. DNA sequencing. Basic concepts of Southern, Northern, Western blot techniques and DNA micro array. Polymerase Chain Reaction (PCR). RT-PCR- Basic concepts. Enzyme immobilization: basic concepts. Tissue culture – basic concepts. Human genome projects. Transgenic animals. Hybridoma techniques- Basic concepts. Monoclonal antibody. Protein interaction technology. DNA technology and gene therapy. DNA technology in diseases diagnosis. Genetic Barcode.
Fermentation technology: Fermentation, types, bioreactors, Upstream and downstream processing. Physiology and biotechnology process.
Bio-pesticides, bio plastics, biosensors, biochips: concepts and significances. Bio-safety and intellectual property Rights. Genomics and Proteomics.

DSE1BP: Microbiology, Immunity and Biotechnology (Practical) — Credits 02

Practical

1. Study disinfection and sterilization techniques.
2. Culture procedure and isolation of bacteria.
3. Gram staining techniques of bacteria. Acid- fast staining of bacteria. Spore Staining.
4. Isolation of DNA from blood.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:40:11; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)6.pdf

5. Separation of DNA by agarose gel electrophoresis. Extraction of DNA from agarose gel.
6. Prepare SDS-PAGE for protein.
7. Perform immunodiffusion by Ouchterlony methods.
8. Biochemical characterization of microorganisms (**Demonstration**).
9. DNA and Protein quantification (**Demonstration**)
10. Analysis of DNA sequences (**Demonstration**).
11. Application of PCR (**Demonstration**).
12. Prepare ELISA (**Demonstration**).
13. Perform Immunoprecipitation (**Demonstration**).

Or

DSE-1B: Developmental aspects of embryo — Credits 06

DSE1B T: Developmental aspects of embryo — Credits 04

Course Structure:

Theoretical concepts:

General concepts of reproductive system. Stem cell : Characteristics and applications.
Gametogenesis: Spermatogenesis and Oogenesis. Sperm and Ovum of mammals: ultra structure. Egg membrane. Fertilization in mammals.
Cleavage: Cleavage plane, types, role of yolk in cleavage; Cleavage process in mammals.
Blastula formation : Mammals. Morphogenetic movements : types and examples.
Gastrulation : Mammals general concepts of induction, determination and differentiation.
Organogenesis : Development of eye as an example of reciprocal and repeated inductive events.

DSE1BP: Developmental aspects of embryo (Practical) — Credits 02

List of Practical

1. Hematoxylin and Eosin staining of testicular, ovarian tissue sections.
2. Identification of spermatocytes, spermatids, Graafian follicle, Corpus Luteum.
3. Demonstration of preserved mammalian embryo.

Or

DSE-1B: Clinical Biochemistry — Credits 06

DSE1BT: Clinical Biochemistry — Credits 04

Course Contents:

Unit 1: Introduction: Organization of clinical laboratory, Introduction to instrumentation and automation in clinical biochemistry laboratories safety regulations and first aid. General

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:40:11; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)6.pdf

comments on specimen collection, types of specimen for biochemical analysis. Precision, accuracy, quality control, precautions and limitations.

Unit 2: Evaluation of biochemical changes in diseases: Basic hepatic, renal and cardiovascular physiology. Biochemical symptoms associated with disease and their evaluation. Diagnostic biochemical profile. Pathophysiological significances of glucose, serum protein,albumin, urea, creatinine, uric acids, ketone bodies.Pathophysiological significances of following enzymes : Lactate dehydrogenase, Creatinine kinase, Amylase, Acid and alkaline phosphatase, beta glucoronidase, SGPT & SGOT.

Unit 3: Assessment of glucose metabolism in blood: Clinical significance of variations in blood glucose. Diabetes mellitus. Glycosylated Hb.

Unit 4: Lipid profile: Composition and functions of lipoproteins. Clinical significance of elevated lipoprotein. Lipid profile in health and diseases.

Unit 5: Liver function tests: Structure of the liver, liver function tests, causes of different liver diseases, liver function tests in the diagnosis of liver diseases. Pathophysiological significance of bilirubin.

Unit 6: Renal function tests and urine analysis: Composition of urine. Use of urine strip / dipstick method for urine analysis. Basic ideas on different types of test for renal diseses.

Unit 7: Tests for cardiovascular diseases: Involvement of enzymes in diagnostics of heart disease including aspartate transaminase, isoenzymes of creatine kinase and lactate dehydrogenase and troponin.

DSE1BP: Clinical Biochemistry (Practical) **Credits 02**

List of Practical

1. Collection of blood and storage. Separation and storage of serum.
2. Estimation of blood glucose by glucose oxidase peroxidase method.
3. Estimation of blood glucose by Nelson – Somogyi method.
4. Estimation of blood inorganic phosphates by Fiske- Subbaraow method.
5. Estimation of serum total protein by Biurate methods, and determination of albumin globulin ratio.
6. Estimation of triglycerides.
7. Estimation of bilirubin (direct and indirect).
8. Quantitative determination of serum creatinine and urea.
9. Determination of serum amylase by iodometric method.
10. Estimation of creatine kinase.

Or

DSE-1B: Clinical Hematology **Credits 06**

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:40:11; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)6.pdf

DSE1BT: Clinical Hematology **Credits 04**

Course Contents:

Anemia and its classification. Laboratory investigation and management of anemia. Iron deficiency anemia, megaloblastic anemia, pernicious anemia- pathogenesis and laboratory investigation. Reticulocytes. Aplastic anemia- laboratory diagnosis. Bone marrow examination. Aspiration techniques.

Hemoglobin - abnormal hemoglobin. Hemolytic anemia and its laboratory investigation. Haemoglobinopathies. Hemoglobin electrophoresis. Sickle cell anemia , Thalassemia- laboratory diagnosis.

Blast cell. Causes and significances of leucocytosis, leucopenia, neutrophilia, eosinophilia, basophilia, monocytosis, lymphocytosis, neutropenia, lymphopenia. Toxic granulation. Leukemia and its classification. HIV on blood cell parameters. LE cells and its significances. Blood parasites.

Hemostasis and Coagulation: Platelet development. Qualitative and quantitative disorders of platelets. Secondary hemostasis. Hemophilia, Willebrand diseases. Disorder of fibrinogen. Fibrinolysis. Bleeding and coagulation disorders.

Blood groups: Immunological basis of identification of ABO and RH blood groups. Biochemical basis of ABO system and Bombay phenotyping. Others blood groups : Kell, Kidd, Duffy, etc. Blood transfusion. Blood banking.

Definition determination and significance of TC, DC ,ESR, Arnth count, PCV, MCV, MHC, MCHC. bleeding time, clotting time, prothrombin time.

DSE1BP: Clinical Hematology (Practical) **Credits 02**

List of Practical

1. General blood picture
2. Differential Leucocute Count. Absolute leucocyte count
3. Determination of haemoglobin by various methods.
4. Determination of total RBC count and WBC count.
5. Determination of PCV
6. Determination of red cell indices
7. Determination of ESR.
8. Determination of reticulocyte count.
9. Staining of bone marrow
10. Determination of blood groups.

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:40:11; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)6.pdf

11. Determination of toxic granulation of neutrophil
12. Determination of total platelet count.
13. Demonstration of thrombin time.**(Demonstration)**
14. Perform sickling test (**Demonstration**)
15. Perform Heinz bodies(**Demonstration**)
16. Demonstration of leukemic slides (**Demonstration**).
17. Determine fibrinogen conc.(**Demonstration**)
18. Demonstrate malarial slide(**Demonstration**)
19. Haemoglobin electrophoresis(**Demonstration**)

Skill Enhancement Course (SEC)

SEC- 4: Environmental Surveillance Credits 02

SEC4T: Environmental Surveillance

Course Contents:

UNIT – I: Environmental Surveillance Monitoring – definition, advantages, disadvantages, scale of observation, GEMS and its goal current and future status of environmental surveillance and monitoring
UNIT - II: Types of Environmental surveillance, systematic ground surveys (SGS), soil, surface water and air surveillance – parameters and instruments, standards, sensors and RUSS, Surveillance devices, Social Network Analysis
UNIT - III: Water quality surveillance and air, water and health, Water quality and sanitary inspection data collection. Sampling site selection and sample approaches. Systematic aerial reconnaissance flight surveillance, using the surveillance data, Household water and the safe water chain
UNIT – IV: Biological surveillance programme for the monitoring of crop pests, Biometric surveillance – aquatic bodies, various invertebrates and vertebrate vectors surveillance, Biomarkers in environmental surveillance
UNIT - V: Disease surveillance (of pathogens) – Definition, World Health Organization AIDS surveillance case definition, Anthrax, Avian influenza, Dengue hemorrhagic fever, Hepatitis, Influenza, Plague, Severe Acute Respiratory Syndrome, Smallpox

Or

SEC-4: Health Psychology, Physiology of stress and Stress Management Credits 02

SEC4T: Health Psychology, Physiology of stress and Stress Management

Course Contents:

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:40:11; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)6.pdf

Health Psychology:

Introduction: Definition, Mind-body relationship, Bio-psychosocial model of Health, Life styles and disease patterns. Behaviour and Health: Characteristics of health behaviour; Barriers to health behaviour; Theories of health behaviour and their implications. Health Enhancing Behaviour: Exercise, nutrition, accident prevention, pain and stress management. Health and Well-being: Happiness; Life satisfaction; Resilience; Optimism and Hope.

Physiology of Stress:

Stress: Definition, Nature of stress, symptoms of stress. Physical and Emotional Stressors. General Adaptation Syndrome. Role of Hypothalamic - Pituitary- Adrenal Axis and Sympatho-adrenal Medullary Axis in coping stress. Effects of chronic stress: Immunological, Cardiovascular, Emotional problem.

Stress Management

Various sources of stress: environmental, social, physiological and psychological. Stress and health: effects of stress on health, eustress, distress**.** Managing stress: Methods - yoga, meditation, relaxation techniques, Problem focused and emotion focused approaches.

Or

SEC- 4: Pharmacology and Toxicology — Credits 02

SEC4T: Pharmacology and Toxicology — **Credit 01**

Course Contents:

Unit I: General pharmacology and toxicology

Nature and source of drugs, routes of drug administration and their advantages, definitions and scope of toxicology. Introduction to eco-toxicology.

Unit II: Mechanism of toxicity

Formation of ultimate toxicant of xenobiotics and its interaction with target molecules.

Unit III: Pharmacokinetics

Downloaded from Vidyasagar University by 103.77.136.219 on 26 July 2023 : 13:40:11; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/Physiology(General)6.pdf

Membrane transport, absorption, distribution of xenobiotics. Brief introduction to biotransformation, Phase- I reactions including oxidations, hydrolysis, reductions and phase II conjugation reactions and excretion of drugs.

Unit IV: Pharmacodynamics

Mechanism of drug action, receptors and receptors subtypes, Dose response relationship and combined effect of drugs. Concept of LD50, LC50, TD50 and therapeutic index.

Unit V: Introduction and classification of the drugs acting on:

a. Central and autonomic nervous system, neurotoxic agents.
b. Cardiovascular system and cardiotoxic agents.
c. Kidney and nephrotoxic agents.

Unit VI: Introduction and classification

a. Anti-inflammatory and analgesic drugs and their related toxicity.
b. Endocrine drugs
c. Antimicrobial chemotherapeutic drugs

SEC4P: Pharmacology and Toxicology **Credits 01**

Practical

1. To study presence of paracetamol /aspirin in the given sample.
2. Determination of Dissolved water (DO) using Winkler's method.
3. To determine the total hardness of water by complexometric method Using EDTA.
4. To determine Acid value of the given oil sample.
5. Calculation of LD50 value of an insecticide from the data provided.
6. Handling of laboratory animals and various routes of drug administration **(Demonstration).**
7. Separation of a mixture of benzoic acid, beta- napthol and napthelene by solvent extraction and identification of their functional groups **(Demonstration).**
8. Pharmacodynamics : dose- response curve **(Demonstration).**

Semester-I
Core Courses (CC)

CC-1: National Security, NCC, Indian Army – Organization ,National Integration & Awareness **Credits 06**

C1T: National Security, NCC, Indian Army – Organization ,National Integration & Awareness **Credits 04**

Module I : NCC organization

1. History of NCC, Aims and Objectives of NCC.
2. Organization &Training and NCC Song, Motto of NCC - Motivation of Cadets.
3. System of NCC Trainings. Incentives and benefits.
4. Awards, different types, Rank of officers and cadets.
5. Role of NCC Cadets in National programmes.
6. Opportunities of NCC Cadets in army and other services.
7. Camps, types of camps. Preparation and participation.

Module II : National Integration and Awareness

1. Religions, Culture, Traditions and Customs of India.
2. National Integration: Importance and Necessity. Unity in diversity.
3. Freedom Struggle and Nationalist Movement in India.
4. National Interests, Objectives, Threats and Opportunities.
5. Problems / Challenges of National Integration.
6. National Integration Council.
7. Contribution of Youth in Nation Building.

Module III: National Security Organizations

1. National Defence Policy.
2. Organization and Administration of defence.
3. Role of intelligence.
4. National security system.

Module IV : Indian Army – Functional Organisations

1. Combat Branches-Infantry, Armoured.
2. Supporting Arms – Artillery including Air Defence, Engineers, Signals, Aviation.
3. Logistic Organisations – ASC, AOC, EME, AMC, ENGINEERS.
4. Other – Intelligence, Education, Legal.

Module V : Drill

1. General and words of command.
2. Attention, stand at ease and stand easy, turning and inclining at the halt.

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 11:57:08; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General).pdf

3. Sizing, forming up in three ranks and numbering, open and close order march and dressing.
4. Saluting at the halt, getting on parade, dismissing and falling out.
5. Marching, Length of pace and time of marching in quick time and halt, slow march and halt.
6. Side pace, pace forward and to the rear.
7. Turning on the march and wheeling.
8. Saluting on the march .
9. Marking time, forward March and halt in quick time.
10. Changing step.
11. Formation of squad and squad drill.
12. Guard of Honour and Ceremonial drill.

C1P: Drill (without arms) & Social activity **(Practical)** **Credits 02**

1. **Drill (Without arms) :**
   Drill without Arms : i) Savdhan (Attention), ii) Vishram (stand on easy), iii) Aram se (stand easy), iv) Tej Chal (quick march), v) Thum (halt), vi) Dahine Mur (Right turn), vii) Baen Mur (left turn), viii) Piche Mur (About turn), ix) Samne ka Salute, x) Patra ke sath Salute, xi) Line Tour (Falling out), xii) Visarjan (Dismiss).

2. **Social Activity** – any one
   i) Tree plantation, ii) Blood Donation, iii) Participation in Social Awareness Programme, iv) Participation in Environment Awareness Programme, v) Participation in Health and Hygiene Awareness Programme.

3. **Field reports**: Students will be submitted a Field Reports on any Social Awareness Programme organized by the Institution.

4. **Laboratory Note Book**
   Students will be required to maintain records of all works done in connection with the topics taught in this paper.

Semester-II
Core Courses (CC)

DSC-1B (CC-2): Personality Development, Human Health, Social & Environmental awareness and Community Development. **Credits 06**

DSC1BT: Personality Development, Human Health, Social & Environmental awareness and Community Development.

Credits 04

Course Contents:

Module -I: Personality Development and Leadership

1. Personality Development introduction. Factors Influencing /shaping Personality: Physical, social, psychological and philosophical.
2. Self-Awareness – Know yourself/ Insight. Self Defense- Theory and practice, prevention of untoward incidence. Self defense mechanisms. Change your mind set.
3. Interpersonal relationship and communication.
4. Leadership Traits. Types of Leadership and perception. Effects of Leadership with historical examples. Attitude – Assertiveness and negotiation.
5. Time management. Stress management.
6. Importance of Group /Team Work.
7. Influencing Skills. Sociability: Social Skills. Values / Code of Ethics.

Module-II: Health and Hygiene

1. Structure & functioning of the human body. Hygiene & sanitation (Personal & Food hygiene). Physical & Mental Health. Infectious & Contagious Diseases & its prevention. Preventable diseases, fractures and types of treatments.
2. Basics of home nursing. First aids: methods and Practice. First aids in common medical emergencies. Snake bites. Wounds & Fractures. Dressing of wounds.
3. Yoga &Exercises – introduction. Role on physical and mental health.

Module-III: Environmental Awareness and Conservation

1. Natural Resources – Conservation & Management. Water Conservation &Rainwater harvesting. Waste Management.
2. Environment and ecology – pollution and its control; Water, Air, Noise and Soil. Wild life conservation. Energy Conservation.

Module-IV: Social Awareness and Community Development

1. Basics of Social Service, weaker sections of our society and their needs. Social / Rural Development Projects: MNREGA, SGSY, NSAP etc. NGOs: Role & Contribution. Social service – family planning.

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 11:57:08; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General).pdf

2. Drug Abuse & Trafficking. Causes & Prevention of HIV/AIDS; Role of youth
3. Social Evils - Dowry/Female Foeticide /Child abuse & trafficking, etc. Provisions of Protection of Children from Sexual Harassment Act 2012.
4. Traffic Control Organization and Anti-drunken driving. Traffic rule and road signs.
5. Counter Terrorism. Corruption
6. Contribution of youth towards social welfare. Civic Responsibilities.
7. NCC cadets and civil administration.

DSC1BP: Practical **Credits 02**

1. **Drill :**

Drill without Arms: i) Sizing, forming up in three ranks, numbering, open and close order march and dressing, ii) Getting on parade, dismissing and fall out, iii) Saluting at the halt, iv) Marching, length of space and time of marching, marching in quick tome and halt, v) Turning at the march and wheeling, vi) Saluting at the march, vii) Side space, pace forward and to the rear, viii) Marking time, forward and halt in quick time and changing step, ix) Formation of squad and squad drill.

2. **First Aids**
   i. Principles of First aids.
   ii. First aids for Snake bite, Burns and Scalds, Drowning, Poisoning, Dog bite.

3. **Tactical exercise without troops**

   a. Sand model on the following: a) attack, b) defense
   b. Outline organization of infantry Battalion in Lab Note Book
   c. Chart showing Organization, weapons at equipments at platoon level
   d. Verbal order at platoon level
   e. Movement without arms and section battle drill
   f. Message writing

4. **Field reports**
   Students will be submitted a Field Reports on any Health & Hygiene, / Environment Awareness Program organized by the Institution.

5. **News paper clippings**
   News paper clippings on relevant defense related topics and a short essay on the basis of clippings to be produced.

6. **Field visit:** Field visit to defense establishment/ places of military interests. Students will submit a field report.
7. **Laboratory Note Book**
   Students will be required to maintain records of all works done in connection with the topics taught in this paper.

Semester-III

Core Course (CC)

DSC-1C (CC-3): Defense Organization, Military Geography, Military History, Field Craft & Battle Craft and Weapon Training **Credits 06**

DSC1CT: Defense Organization, Military Geography, Military History, Field Craft & Battle Craft and Weapon Training **Credits 04**

Course Contents:

Module-I: Defense Organization of India

a) Principles of Defense Organization. Principles of defense organization and administration. **Reconstruction of Indian Armed Forces -** a) Indian armed forces under the British Rule, b) Reconstruction of Army after 1947, b) Reconstruction of Navy, c) Reconstruction of Air Force- Hierchy of Higher Defense Organization of India of Present time. Hierarchy of Higher Defense Organization.

b) Indian Armed Forces : Basic organisation of Armed Forces. Strength, task & role of Indian armed forces. Organizational structure of Indian Army : Different Commands of Indian army. Static formation of army, field formation of army. Composition of Indian army: a) Organizational structure of an infantry battalion, b) Organizational structure of an Armoured regiment, c) Organizational structure of artillery Field Regiment.
c) Indian Navy: History, structure, organization, characteristics, command, support services, its role during war.

d) Indian Air Force: History, structure, organization, characteristics and Different commands of Indian Air Force: Limitation of Air Force role during war.

Module -II:

A. Organization of Supported Arms:

a) **Paramilitary Forces:** Assam Rifles, Central Armed Police Forces, Special Frontier Forces. Central Reserve Police Forces (CRPF), Boarder Security Forces (BSF), Indo-Tibetan Boarder Police (ITBP), Shasastra Seema Bal (SSB),
b) **Special Forces:** Special Frontier Forces, Central Industry Security Force (CISF).
c) **Para Special Force [Para (SF)]:** Ghatak Force, Marine Commando (MARCOS), Guard Commando Force.
d) **Other Protection Forces:** National Security Guards (NSG), Special Protection Group (SPG), Railway Protection Forces (RPF).
e) **Second Line of Defense :** Indian Coast Guard, National Cadet Corps (NCC). Territorial Army

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General)sem3.pdf

B. Military decoration of Indian army:

Badges of Ranks- Honours and Awards - Gallantry award - Doctrine, Corps and field forces - Concept of Integrated Defence staff- Modes of entry to army - Structural changes in Indian Defense Organization

Module -III: Military Geography

a) Introduction: Meaning, nature, scope and elements of Military Geography. Man and Environment. Role of geography in military application. Military geography in India and defense problem in relation thereto-role of geography in different warfare.

b) Evolution of Military Geography: a) History & Development. b) Founders of Military Geography - F. Ratzal, A.T. Mahan, c) Sir. Halfred Mackinder, Karl Haushofer, N.J. Spykman

c) Inter-State relations & Geographical factors: a) Frontiers and Boundaries of India - its meaning & differences types of borders and boundaries. b) Communication routes- land, sea and aerial- strategic scope. c) Population and Power

d) Geography and Foreign Policy of India: a) India's Geo-strategic significance, b) India's borders, c) Indian Ocean territory and strategic significance.

e) Applied Military Geography: Brief idea on a) Global Positioning System (GPS), b) Global Information System (GIS) and c) Remote Sensing.

Module -III: Map Reading

Theoretical aspects of Map Reading:
Introduction to different types of Maps, and Conventional Signs. Scales & Grid System. Topographical Relief features, Contours and Gradients - Cardinal points and Types of North - Types of bearings and use of Service Protractor - Prismatic compass and its use. Setting a Map - finding North and own position - Map to Ground, Ground to Map - Point to Point March – use of GPS.

Module -IV: Military History

a. Definition, Concept, Significance to study Military history. Military system of India since Vedic era to modern India.. A brief survey of the military tradition of India. Weapon, Battle dress. Kautilya’s philosophy of war organization and art of war, weapons and interstate relation. War pattern and tactics in different periods in India – a comparative study. Historiography of military history of India.

b. Biographies of renowned Generals:

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 12:02:41; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General)sem3.pdf

i. Niccolo Machiavelli (1469-1527), Giulio Douhet (1869 - 1930), Jorge Smith Patton (1885-1945), Bernard Law Montogomery (1887-1976), J. E. Rommel (1891-1944)

ii. Kodandera Madappa Cariappa (1899-1993), S.H.F.J. Manekshaw (1914-2008), Subrata Mukherjee (1911- 1960), Sundarilal Matharadas Nanda (1915-2009).

c. Indian Army War Heroes – PVCs.

d. Study of the following important battles of India with its background, causes, results and its review: Battle of Panipath (1526AD), Battle of Plessey (1757AD), Battle of Chillianwalla (1849AD), Kashmir Conflict (1947), Operation of Mizo National Front (1966), Indo Pak war 1965, 1971, Operation Cactus (1988), Sri-Lanka Mission (1987-1990) & Kargil war (1999).

Module - V: Field Craft, Battle Craft

Introduction. Judging Distance and its methods. Description of ground. Recognition, description and indication of landmarks & targets. Observation, Camouflage and Concealment. Field Signals. Section Formations . Section Battle Drill. Fire fighting. Fire Control Orders. Fire and Movement. Knots and Lashings. Section Battle Drill.

Module -VI : Weapon Training

Theoretical aspects of Weapon Training:

1. Object of Weapon training . Types of weapons, parts, stripping and assembling of light guns. Characteristics of a rifle - rifle ammunition and its firepower. Rifle Mark III.
2. Stripping, assembling, care and cleaning and sight setting of .22 rifle.
3. Stripping, assembling, care and cleaning of 7.62mm SLR and its loading cocking and unloading.
4. Rules of Aiming. Firing position. The lying position, Holding& aiming.
5. Trigger control and firing a shot.
7. Range procedure and safety precautions.
8. Theory of Group and Snap shooting.
9. Short range firing, Aiming – Alteration of sight.
10. Rifle firing and follow up practice.
11. Parts of heavy weapons, stripping and assembling of heavy weapons.
12. Essentials of Good Shooting

DSC1CP: Drill, Military History & Map Reading (Practical) Credits 02

Practical:

1. Drill with Arms:

a. Getting on parade with rifle and dressing at the order.
b. Dismissing and falling out.

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 12:02:41; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General)sem3.pdf

c. Ground / take up arms
d. General salute, salami shastra
e. Squad drill
f. Short / long tail from the order and vice-versa
g. Examine arms

2. Military History:

a. Prepare sand models of Battle formation of the following Battles:

i) Battle of Plessey, 1757,
ii) Battle of Chilianwala, 1849,
iii) Three battles of Panipath,
iv) Indo-Pak war of 1947, 1962, 1971,
v) Kargil war, 1999.

b. Draw sketches on plan papers of the following Battles:

i) Battle of Plessey, 1757,
ii) Battle of Chilianwala, 1849,
iii) Three battles of Panipath,
iv) Indo-Pak war of 1947, 1962, 1971,
v) Kargil war, 1999.

3. Map Reading:

1. Map – civil and military
2. Concept of military maps and map index
3. Topographical sheet
4. Scales and grid system
5. Conventional sign – civil and military
6. Compass : liquid prismatic compass – uses of compass during day and night
7. Location and identification of objects from ground to map and vice-versa
8. Preparation of night march chart
9. Preparation of weather chart
10. Field sketching, eye and memory sketching
11. Determination of visibility of survey maps of hilly region by comparing gradients and section drawing methods.

4. Field reports:

Students will submit a field report based on participation in a NCC camps.

5. Field visit: Field visit to military establishment for the demonstration of different weapons, armaments and weapon carriers. Students will submit a field report.

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 12:02:41; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General)sem3.pdf

6. Laboratory note book

Students will be required to maintain records of all works done in connection with the topic taught in this paper.

Skill Enhancement Course (SEC)

SEC-1: Volunteering **Credits 02**

SEC1T: Volunteering

Course Contents:

a) Meaning of volunteering, need for volunteering, types of volunteering, benefits of volunteering.
b) United Nations volunteers: An introduction; Youth Empowerment and volunteerism; Role of youth in peace building, development and socio-economic change; Group presentations.
c) Traits of an effective volunteers; Self awareness, Essential skills of a volunteer: Importance of effective communication, skills in Conflict Resolution, Team Building, Leadership.

Or

SEC-1: Human Rights Education and Humanitarian Law **Credits 02**

SEC1T: Human Rights Education and Humanitarian Law

Course Contents:

a) Meaning of Human Rights, Importance of Human Rights: Social, Economic and Political Universal Declaration of Human Rights.
b) Human Rights and Duties in India: fundamental Rights, Directive Principles of State Policy and Fundamental Duties.
c) Importance of Internalizing Human Rights Value – Urgent need for not only sensitizing others of Human Rights and duties, but of practicing oneself those values: Self inculcation, endeavor to live up to those ideals; Duty to respect others' rights, respect each other's human dignity.

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 12:02:41; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BA_GENERAL/NCC(General)sem3.pdf

d) United Nations and Human Rights. Human Rights and International Politics. Violation of Human Rights.
e) India and Human Rights: Indian Constitution and Human Rights - Enforcement and Policy Implementation - Human Rights Protection/Violations as Chosen by Faculty – Special Laws for Protection of Specific Categories / Vulnerable Sections of the people – Problems of Enforcement of Human Rights in India.

Or

SEC-1: News Writing Procedure and News Story **Credits 02**

SEC1T: News Writing Procedure and News Story

Course Contents:

Unit-I: Introduction to News Writing Procedure a) Where to begin, the Date and Place b) Paragraphing and Readability c) Aids to clarity and Journalistic Style

Unit-II: Defining the News Story a) The Journalist as an Interpreter b) The inverted Pyramid News vs Sequential Style c) The Usage of the third person, Grammar Quotation and Ending the story

Unit-III: The Five 'W's a) Emphasizing important points b) The Importance of time c) Telling a story 'Where' and other application of the 'W' s

Unit-IV: Types of News story a) Political b) Industrial and Finance c) Civic Affairs

Unit-V: Specialized reporting a) Science reporting b) Industrial reporting c) Entertainment Reporting- Defence Journalism & Defence Reporting- Basic idea.

http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/NCC(Gen)sem4.pdf

Module - IV: Field Engineering: Principles and applications, camouflage and concealment. Section formation. Mines and types of mines fields, anti tanks and explosive.

Module - V: Adventure Training: Introduction to adventure Training, Planning Organization & Conduct. Cycle & Trekking Expeditions. Organization & Conduct of Sightseeing. Spirit of Mountaineering. Selection of camp site Layout & Sanitation in camp.

Module -VI: Weapon and Armaments

a. Evolution of arms and armaments in art of war.

b. **Modern weapons** - Small Arms - Theories of small arms. History, characteristics, design, variant, operating mechanism and military significance of following common arms used in Indian Army: Glock, Mouser, IM1 Galil snaiper. .22 Rifle, .303 Rifle, 7.62 Self Loading Rifle . INSAS, LMG, 5.56 mm Rifle. Light Machine Gun (LMG).Multi caliber Individual Weapon System (MCIWS). Modern Submachine Carbine (MSMC), Artillery : Artillery Gun, No 35 HE Grenade, 2 inch Mortar. 40mm L-60 and L-70 BOFFORS GUN. DRDO 155 mm artillery gun, Dhanush Howitzer Indian Fields Gun. Shell and Ammunition: Explosive, Rockets and Mortar- Properties & Types. Missiles: Concept, characteristics, types. Anti Tank : Brief idea. Nuclear explosive: History, uses, effects, science for formation of nuclear bomb.

Weapon Carriers: Characteristics, mechanisms of operation, fire power and military importance of following: Land war weapon carrier, Naval war weapon carrier, Air war weapon carrier, Strategic transport aircraft, Tactile transport aircraft. Military Glider, Military Helicopter Fighter airplane, Bomber, Fighter- Bomber Airplane.

Weapons of Mass Destruction - Chemical & Biological Weapons: concept, characteristics and , uses. Nuclear weapons: Nuclear Command Authority in India. Strategic forces command, Indian land based nuclear armed ballistic missile, : Indian Sea based nuclear armed ballistic missiles, Nuclear armed cruise missiles. Air Defense: Brief idea.

DSC1DP: Practical Credits 02

Practical

a) **Adventure training :**

Parasailing, Sailing, Slithering, Rock climbing, Cycling and trekking.

b) **Weapon Training**

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 11:59:28; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/BSC_GENERAL/NCC(Gen)sem4.pdf

Stripping as aiming & Sight setting of Riffle. Lying position 'and hold', including bolt manipulation. Trigger control and firing a shot. Aiming, Range figures targets–Range procedure and safety precautions. Alteration of Sight and firing shots. Firing in different wind conditions. Range classification firing.

On Guard hip firing. The point 2 point. Training stick (Self defense & attack).

LMG - Stripping, assembling, piston group and barrel. LMG - Loading, unloading, Sight, aiming and holding.

c) **Weapon Training - Field craft, Battle craft, Patrolling and Field engineering:**

1. Judging distance and indication of targets.
2. Camouflage & Concealment
3. Fire discipline & Fire control order.
4. Observation and Concealment exercise.
5. Simple Verbal orders.
6. Field Signals
7. Section battle drill.

d) **Weapons and Armaments:**

1. Demonstrate following arms: .22 Riffles, .303 Riffles, Self Loading Rifles, INSAS LMG 5.56 mm, LMG, Sten Machine Carbine. Pistol & Revolvers. No 36 HE Grenade, Artillery Gun, Air Defense Gun.
   Students will require drawing and explaining the important stages of mechanisms of the above weapons.
2. Students will be required to draw sectional diagrams showing the parts connected with the mechanisms of movements and firing of the following armaments: Tanks, Air craft - Fighters, Bombers, Transport, Helicopters. Naval Ships - Frigates, Destroyers, Submarine and Torpedo.

e) **Project:** Project report will be based on Field visit to military establishment/ places of military interests.

f) **Laboratory Note Book and Viva Voce:**
Students will be required to maintain records of all works done in connection with the topic taught in this paper.

Skill Enhancement Course (SEC)

SEC-3:Armed Forces (Specialized Subject) Credits 02

SEC3T:Armed Forces

Course contents:

Unit I: **Organizations**

a) Basic Organizations of Armed Forces
b) Organization of Army
c) Badges and Ranks

Unit II:Infantry Weapon and Equipment

a) Characteristics of Rifle and 7.62 mm SLR,
b) Ammunition, Fire Power, Stripping, Assembling and Cleaning

Unit III:Military History

a) Biographies of Renowned Generals
b) Indian Army War Heroes-PVCs

Unit IV: Communications

a) Types of Communications
b) Characteristics of Wireless Technology (Mobile, WiFietc)

Or

SEC-3: Indian Navy (Specialized Subject) Credits 02

SEC3T:Indian Navy

Course contents:

Unit I: **Orientation and Service Subjects**

a) History of Indian Navy- In Pre and Post Independent India, Gallantry Award Winners
b) Organization of Navy Head Quarter- Commands, Fleets, Ships and Shore Establishment
c) Types of Warships and their Role
d) Ranks of Officers and Sailors, Equivalent Ranks in other Services

Unit II: Ship and Boat Modelling

a) Principle of Ship Modelling

Downloaded from Vidyasagar University by 115.187.50.121 on 16 August 2022 : 12:01:54; Copyright : Vidyasagar University

Or

GE- 2: Project Management and Documentation Skills Credits 06

GE2T: Project Management and Documentation Skills (Marks- 50) Credits 04

Course contents:

Unit I: Introduction of Project Management

a) Overview of Project Management;
b) Problem Identification and Project plan;
c) Selection of Basic Research Methods- Field Study, Laboratory Study, Survey Method, Observational Method, Existing Data Based Research, Longitudinal Studies, Panel Studies

Unit II: **Project Cycle Management**

a) Project planning
b) Project implementation
c) Project monitoring
d) Project evaluation: impact assessment

Unit III: Documentation & Reporting

a) Collection and analysis of data
b) Layout of Project report
c) Steps in report writing; Citations, Bibliography and Annexure in report
d) Dissemination of documents/reports

GE2P: Practical (Marks- 25) Credits 02

Course contents:

1. The Project to be identified and carried out under the supervision of a faculty member assigned by the college/institution based on NSS field work. The Project Report to be submitted and the same will be evaluated by University appointed examiners.
2. Records
3. Viva Voce

Vidyasagar University

Ability Enhancement Compulsory Course (AECC – Environmental Studies)

Environmental Studies Credits: 4

Unit 1: Introduction to environmental studies

- Multidisciplinary nature of environmental studies;
- Scope and importance; Concept of sustainability and sustainable development.

(2 lectures)

Unit 2: Ecosystems

- What is an ecosystem? Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems:
  a) Forest ecosystem
  b) Grassland ecosystem
  c) Desert ecosystem
  d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

(6 lectures)

Unit 3: Natural Resources: Renewable and Non---renewable Resources

- Land resources and land use change; Land degradation, soil erosion and desertification.
- Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations. Joint forest management.
- Water: Use and over---exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter---state).
- Energy resources: Renewable and non renewable energy sources, use of alternate energy sources, growing energy needs, case studies.

(8 lectures)

Unit 4: Biodiversity and Conservation

- Levels of biological diversity : genetic, species and ecosystem diversity; Bio-geographic zones of India; Biodiversity patterns and global biodiversity hot spots
- India as a mega---biodiversity nation; Endangered and endemic species of India
- Threats to biodiversity: Habitat loss, poaching of wildlife, man---wildlife conflicts, biological invasions; Conservation of biodiversity: In---situ and Ex---situ conservation of biodiversity.
- Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.

(8 lectures)

Unit 5: Environmental Pollution

- Environmental pollution : types, causes, effects and controls; Air, water, soil and noise pollution
- Nuclear hazards and human health risks
- Solid waste management: Control measures of urban and industrial waste.
- Pollution case studies.
- Noise pollution.

(8 lectures)

Downloaded from Vidyasagar University by 103.77.136.15 on 27 July 2023 : 16:33:16; Copyright : Vidyasagar University
http://www.vidyasagar.ac.in/Downloads/ShowPdf.aspx?file=/UG_Syllabus_CBCS/AECC/AECC_Electives_Env_studies.pdf

Unit 6: Environmental Policies & Practices

- Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture
- Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. International agreements: Montreal and Kyoto protocols and Convention on Biological Diversity (CBD).
- Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian context.
- Environmental policy and gender issues.

(7 lectures)

Unit 7: Human Communities and the Environment

- Human population growth: Impacts on environment, human health and welfare.
- Resettlement and rehabilitation of project affected persons; case studies.
- Disaster management: floods, earthquake, cyclones and landslides.
- Environmental movements: Chipko, Silent valley, Bishnois of Rajasthan.
- Environmental ethics: Role of Indian and other religions and cultures in environmental conservation.
- Environmental communication and public awareness, case studies (e.g., CNG vehicles in Delhi).

(6 lectures)

Unit 8: Field work

- Visit to an area to document environmental assets: river/ forest/ flora/fauna, etc.
- Visit to a local polluted site---Urban/Rural/Industrial/Agricultural.
- Study of common plants, insects, birds and basic principles of identification.
- Study of simple ecosystems---pond, river, Delhi Ridge, etc.
- Disaster management.
- Coastal ecosystem.

(Equal to 5 lectures)

Academic calendar prepared and adhered for conduct of Examination and other related matters-2022

- Our college, Bajkul Milani Mahavidyalaya is affiliated to Vidyasagar University, one of the state universities in West Bengal. Since, we have under the affiliation of it, we must have to obey the basic rules and features of the Academic Calendar made of and provided by the mother university. Hence, following the university academic calendar, our college prepares a separate academic calendar alongwith the Holiday List for every year. Generally, each session starts with UG and PG classes in the months of July and August according to the guidelines of Vidyasagar University.
- Accordingly we schedule tentative internal assessment dates for both UG and PG courses, tentative date regarding form fill up. Internal Assessments are conducted centrally involving concerned departments in the process. College informs students about the university notices and circulars related to examinations from time to time through students' notice board, college website and also departmental notice board and also verbally by the faculty members of the respective departments. All the departments conduct Internal Assessment of students and students are well informed regarding the Internal Examinations by the departmental Teachers.
- Within two months from the new session, class tests and pre-final examination are scheduled in the academic calendar. Two class tests/ internal examination/ assessments for UG/ PG throughout the session in every paper are arranged and conducted. Yet, extra class tests are continued till the end of the session.
- As per rule of Vidyasagar University examination pattern, Internal Assessment like class test and Mid-term test are arranged by every department of the college as per university calendar. Beside this, many departments organize Pre-Final Test for both UG and PG students at the last moment of every academic year or during study leave before Final Examination/ End Semester/ End Term Examination. Generally, Pre-final examinations are conducted in the next November-December (Sem-I, III & V) and May-June (Sem-II, IV & VI) for UG and PG.

List of Holidays for 2022:

Sl. No.	Occasion	Month	Date	No. of days	Name of the day
1.	New Year's day (English)	Jan.	01	1	Saturday
2.	Birthday of Vivekananda		12	1	Wednesday
3.	Poush Parban (local)		14	1	Friday
4.	Birthday of Netaji		23	(1)	Sunday
5.	Republic Day		26	1	Wednesday
6.	Saraswati Puja	Feb.	05 & 06	2 (1)	Saturday & Sunday
7.	Shri Shri Thakur Panchanan Barma's Birthday		14	1	Monday
8.	Sivaratri (local)	March	01	1	Tuesday
9.	Doljatra		18 & 19	2	Friday & Saturday
10.	Sabebarat		18		Friday
11.	Madhukrishna Trayodoshi		30	1	Wednesday
12.	Shri Harichand Thakur's Birthday & Ramnabami	April	10	(1)	Sunday
13.	Chaitra Sankranti		14	1	Thursday
14.	Good Friday		15	1	Friday
15.	New Year's day (Bengali)				
16.	Easter Saturday		16	1	Saturday
17.	May Day	May	01	(1)	Sunday
18.	Id-Ul-Fitre		03	1	Tuesday
19.	Birthday of Rabindranath		09	1	Monday
20.	Buddha Purnima		26	1	Monday
21.	Jamaisasthi	June	05	(1)	Sunday
22.	Summer recess	16th May to 30th June		46	Except Sunday & holidays
23.	Rathajatra	July	01	1	Friday
24.	Id-ud-Zoha		10	(1)	Sunday
25.	Muharram	Aug.	09	1	Tuesday
26.	Independence Day		15	1	Monday
27.	Janmastami		19	1	Friday
28.	College Foundation Day	Sept.	03	1	Saturday
29.	Viswakarma Puja (local)		17	1	Saturday
30.	Mahalaya		25	(1)	Sunday
31.	Birthday of Vidyasagar		26	1	Monday
32.	University Foundation Day		29	1	Thursday
33.	Birthday of Gandhiji	Oct.	02	(1)	Sunday
34.	Fateha - Doaz - Daham		09	(1)	Sunday
35.	Chhatpuja		30	(1)	Sunday
36.	Puja holidays	Sept. 30 to Oct. 27		24	Except Sunday
37.	Jagadhatri Puja	Nov.	02	1	Wednesday
38.	Birthday of Guru Nanak		08	1	Tuesday
39.	Birthday of Birsa Munda		15	1	Tuesday
40.	Christmas Day	Dec.	25	(1)	Sunday
41.	Winter Recess		26 – 31	6	Except Sunday
42.	Principal's Discretion		-	4	-

Academic calendar prepared and adhered for conduct of Examination and other related matters-2021

- Our college, Bajkul Milani Mahavidyalaya is affiliated to Vidyasagar University, one of the state universities in West Bengal. Since, we have under the affiliation of it, we must have to obey the basic rules and features of the Academic Calendar made of and provided by the mother university. Hence, following the university academic calendar, our college prepares a separate academic calendar alongwith the Holiday List for every year. Generally, each session starts with UG and PG classes in the months of July and August according to the guidelines of Vidyasagar University.
- Accordingly we schedule tentative internal assessment dates for both UG and PG courses, tentative date regarding form fill up. Internal Assessments are conducted centrally involving concerned departments in the process. College informs students about the university notices and circulars related to examinations from time to time through students' notice board, college website and also departmental notice board and also verbally by the faculty members of the respective departments. All the departments conduct Internal Assessment of students and students are well informed regarding the Internal Examinations by the departmental Teachers.
- Within two months from the new session, class tests and pre-final examination are scheduled in the academic calendar. Two class tests/ internal examination/ assessments for UG/ PG throughout the session in every paper are arranged and conducted. Yet, extra class tests are continued till the end of the session.
- As per rule of Vidyasagar University examination pattern, Internal Assessment like class test and Mid-term test are arranged by every department of the college as per university calendar. Beside this, many departments organize Pre-Final Test for both UG and PG students at the last moment of every academic year or during study leave before Final Examination/ End Semester/ End Term Examination. Generally, Pre-final examinations are conducted in the next November-December (Sem-I, III & V) and May-June (Sem-II, IV & VI) for CBCS Curriculum based UG and PG.

List of Holidays for 2021:

Sl. No.	Occasion	Month	Date	No. of days	Name of the day

Automobile Maintenance

Teaching Plan: Department of Automobile Maintenance: SEMESTER-I(HONOURS)

UNITS	PAPER: CC1 T Principles of Automobiles	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
Unit-I	Basic concept of thermodynamics, 1st and 2nd laws, reversible, irreversible process and adiabatic, Isothermal Process. Thermodynamic Cycle: Carnot, Otto, Diesel, Dual cycles and their air standard efficiency, Numerical Problems.	75	PARTHA SAKHA JANA	01.10.2021-24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit-II	Classification of I.C Engines, S.I. and C.I Engines, 2 Stroke, 4-Stroke engines and their working Principle.				
Unit-III	Engine specifications-Bore, Stroke-length, MEP, I.H.P, B.H.P, S.F.C, mechanical and thermal efficiencies.				
Unit-IV	Valve timing diagram-2-stroke and 4 stroke engine.				
Unit-V	Fuel used in I.C Engines, Properties of Fuel, Petrol and Diesel, Fuel additives and- fuel rating (Octane and cetane numbers)				
Unit-VI	Combustion Process in I.C engines Auto ignition and chemical reaction, pre-ignition MAN and open combustion chambers, effect of knocking, calorific value of fuels, requirement of oxygen for complete combustion.				
Unit-VII	Stress, strain, their types, Numerical problems on principle of stresses,				

UNITS	PAPER: CC1 P Principles of Automobiles	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS REMARKS
Unit-I	**Engineering drawing:** Scales, projections of solid, surface developments, Isomentric and oblique views, elevations, plans and end views off different objects and design.		KRISHNENDU BERA	01.10.2021-24.02.2022	
Unit-II	**2-stroke and 4 stroke (C.I &S.I engine):** Valve, Valve seat, Rocker arm, Push rod, Cam shaft, Crank shaft, Piston, piston ring, Connecting rod, Oil pump, fuel pump, Distributor, Oil filter, Fuel filter, Starter motor, alternator, Dynamo, Solex carburettor, inlet manifold, exhaust manifold, water pump, fly-wheel, vibration damper, spark plug, heater plug, injector, F.I.P pump. Adjustment:- C.B point, piston ring joined, piston ring groove, Cylinder bore, fan belt adjustment, valve tappet.		PRIYANSHU JANA & RANAJIT BERA		
Unit-III	**Cooling system**: Radiator cleaning, thermostat valve, testing fan valve adjust, water pump service, pressure cap testing, over hauling viscous fan.		PRIYANSHU JANA		
Unit-IV	Electrical safety precaution ,Electrical hand tools, Electrical measuring instrument practice(Volt Metre, Ammeter, Ohm metre, AVO Metre), Wire cutting and joint practice (Basic wire joints, soldering, Lug joint), Wire checking, use of terminal block, Magnetic effect of current, Practice using relay.		PRADIP SANTRA		
UNITS	PAPER: CC2 T Constructional details and working of I.C engines	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	

Unit-I	Layout of an automobile: Main Components and assemblies.	75	Partha Sakha Jana	01.10.2021-24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit-II	Constructional features and functions of 2& 4 wheelers, Cylinder block, Crankcase, Cylinder head, Oil Pump, Gasket, Crank Shaft, Main Bearing, Vibration dampers, Exhaust system, Inlet and exhaust manifolds, fly-whell, Piston, Piston rings, Piston Pin, Connecting rod, Cams and Camshaft, Valve and Valve mechanism.				
Unit-III	S.I Engines: Combustion process, types of fuel feed system, various components of fuel system, fuel tank, fuel filters and screens, fuel losses, fuel gauges, fuel pumps, air cleaners, carburettor and its working its working, trouble shooting, servicing adjustments and M.P.F.I system.				
Unit- IV	C.I engines: Combustion and combustion chambers, fuel injection system, fuel tanks, fuel feed pumps, fuel injectors, nozzles and their types, details of nozzles and fuel injector unit, CRDI system.				
Unit-V	Cooling System: Importance, types, various components and accessories with troubles shooting.				
Unit-VI	Lubrication system: Importance, lubricants and their properties, their selections, lubrication system and their working, filters, lubrications in other parts of an automobiles, trouble shooting.				
UNITS	PAPER: CC 2P Constructional details and working of I.C engines	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS

Unit-I	Fuel system (Petrol engine): Over hauling fuel pump, carburettor, fuel fitter and air cleaner, practice in engine tune up in a vehicle.		PRIYANSHU JANA	01.10.2021-24.02.2022	
Unit-II	Lubrication system: Oil pump over-hauling and refitting, Replacing oil filter, Drawing engine oil, Repairs oil galleries.		RANAJIT BERA		
Unit-III	Fuel system (Diesel engine): Fuel feed pump over hauling, F.I.P pump single & multi cylinder over hauling, over hauling injector, testing the injector, Fuel bleeding, cleaning the injector.		RANAJIT BERA		
Unit-IV	Basic idea and details of fitting shop, First aid, 5S concept, fire, Measuring instruments, Gauge Measurement, Cutting tool's Operation, Heat Treatment, Drill and Grinding Machine Operation.		AVIJIT BERA		

Teaching Plan: Department of Automobile Mentainance: SEMESTER-II(HONOURS)

UNITS	PAPER: CC3 T Theory of Machine	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
Unit-I	Friction: Introduction, types of friction, coefficient of friction, limiting friction, laws of solid friction and kinetic friction, screw jack.	75	Partha Sakha Jana	01.04.2022-09.07.2022	1st internal examination on 2nd week of May, 2022 and 2nd internal
Unit-II	Belt, Rope and Chain Drive: Introduction, Belt drive, types of belts, Materials used, Velocity ratio, Slip, Length of belt, Comparison, flat and v-belt, Rope drive & Chain Drive.				

Unit-III	Gear and Gear Trains: Fundamental laws of gearing, spur, bevel and worm gears, gear train, Interference, epicyclic gear trains.				examination on 2nd week of July,2022
Unit-IV	Cam: Types, displacement diagrams.				
Unit-V	Flywheels: Turning moment diagrams, fluctuations of energy and speed.				
Unit-VI	Governors: Types, Principles, working, Characteristics and performance. .				
Unit-VII	Torsion and tensional effect, Shear force and bending moment diagram, bending stress				
UNITS	**PAPER: CC3P Theory of Machine**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
Unit-I	Valve timing: C.I. & S.I. valve timing adjustment of 2-stroke & 4-stroke.		RANAJIT BERA	01.04.2022-09.07.2022	
Unit-II	Firing order set (Multi cylinder S.I. & C.I. 4-stroke) petrol- tappet timing, gear timing, chain timing, ignition timing. Diesel- tappet timing, gear timing, fuel timing.		PRIYANSHU JANA		
Unit-III	Electronics components checking (Resistor, Capacitor, Diode, Transistor, and I.C), Construction of D.C Generator, Starter motor, Wiper Motor, Alternator, Transformer.		PRADIP SANTRA		
UNITS	PAPER: CC4T Suspension system, Steering system, Ignition system and Auto Air conditioning	**FULL MARKS**	NAME OF THE TEACHER	**MONTH OF TEACHING**	
Unit-I	Suspension system:- Objectives, principles of working, types of suspension system, independent and rigid axle suspension system, shock absorber and damper, troubles in a suspension system.	75	Partha Sakha Jana	01.04.2022-09.07.2022	**1st internal examination on 2nd**

Unit-II	Steering system:- Steering geometry, their effect, steering angle, steering mechanism, steering linkages, power steering , trouble shooting.				week of May, 2022 and 2nd internal examination on 2nd week of July,2022
Unit-III	Ignition System: Battery, electrical, magneto and electronic ignition systems and their troubles				
Unit-IV	Auto Air conditioning: Introduction, Air conditioning system, components, effect of Air conditioning of fuel economy, car Air conditioning system, Truck Air conditioning, trouble shooting.				
UNITS	PAPER: CC4P Suspension system, Steering system, Ignition system and Auto Air conditioning	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	
Unit-I	Suspension system: Replacing shock absorber, servicing shackle, over hauling leaf spring, over hauling coil spring, over hauling front suspension system.		RANAJIT BABU	01.04.2022-09.07.2022	
Unit-II	Spark plug cleaning and testing: Spark plug cleaning, spark plug gap setting and spark plug testing.		PRIYANSHU JANA		
Unit-III	Use of general hand tools (Vice, Screw driver, Spanner, Pliers etc.), identify of various types (Bolts, Nuts, Washers, Keys, pins, Bearing, Pulley , Gear etc.), Limit, Fit and Tolerance, Transmission of power.		AVIJIT DAS		
Unit-IV	Practice to Operate the lathe machine tools , Welding(Arc), sheet metal work and Forging.				
Teaching Plan: Department of Automobile Mentainance: SEMESTER-III(HONOURS)					
UNITS	PAPER: CC5 T CC-5: Transmission system Part -I	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	INTERNAL EXAMINATION
Unit-I	General principle, objectives and types (Manual, Semi-automatic, Automatic, Hydraulic transmission)	75	PARTHA SAKHA JANA	01.10.2021-05.02.2022	

Unit-II	Gear boxes, resistance to motion of a vehicle, power required for propulsion				
Unit-III	acceleration and hill climbing, necessity of gear box, function and types of gears, synchromesh gear box, free wheel drive, gear lubrication, transmission troubles.				
UNITS	**PAPER: CC5 P** **CC-5: Transmission system Part -I**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**1st internal 4th week of November,2021** **&** **2nd Internal 1st week of January, 2022**
Unit-I	Over hauling, sliding mesh, constant mesh and synchromesh gear box and other gear box.		PRIYANSHU JANA	01.10.2021-05.02.2022	
Unit-II	Moulds – Describe of Mould materials, Types of sand, Sand moulding, Pit moulding, machine moulding.				
Unit-III	Melting practice. Types of furnaces with specific application Cupola furnace, Electric arc furnace.		AVIJIT DAS		
Unit-IV	Special casting processes die casting, centrifugal casting, investment casting, Shell moulding				
Unit-V	Casting defects & its remedies. Green sand mould making process				
Unit-VI	Patterns - Material used, types, Patterns allowances, Cores, Core allowances. Core Prints.				
UNITS	PAPER: CC6 T Transmission System Part –II	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
Unit-I	Clutch System: Function, types, clutch linkage, clutch facing &friction material, common faults.	75	PARTHA SAKHA JANA	01.10.2021-05.02.2022	
Unit-II	Propeller Shaft: Types, fluid drives, Hotchkiss drive, universal & slip joint, Torque convertors.				
Unit-III	Final drive and rear axle: Types of final drives, differential gears and its principles of operation, rear axle and its types.				
Unit- IV	Front Axle: Types and their components, swivelling mechanism, front form of motor cycle.				

UNITS	PAPER: CC6 P Transmission System Part –II	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING
Unit-I	Clutch: Over hauling single plate, multi plate, diaphragm clutch and other clutch.		RANAJIT BERA	01.10.2021-05.02.2022
Unit-II	Steering System and power steering: Overhauling steering linkage, steering gear box adjustment, power steering overhauling.		PRIYANSHU JANA	
Unit-III	Servicing tyre: Repairing tube and tyre puncture.		RANAJIT BERA	
UNITS	PAPER: CC7 T Manufacturing process or Production Engineering - 1	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING
Unit-I	Mechanical properties of metals, ferrous and non ferrous metals used in engineering practice, Influence of carbon on iron and steel. Heat treatment of metals-different process-heat treatment equipments and materials.	75	PARTHA SAKHA JANA	01.10.2021-05.02.2022
Unit-II	Hand tools used in different shops, bench work and fitting shop, Hand tools used in fitting shops, chipping, filing, scraping, measuring tools and gauges, limit, fit, allowance and clearance, jug stand and fixtures.			
Unit-III	Definition and concept of different mechanical process like rolling, drawing, spinning, firging, casting, welding, brazing, and soldering.			
Unit-IV	Machine shops- Elementary ideas about different machines like Lathe, Shaper, Grinder, Drill & Milling.			
UNITS	PAPER: CC7 P Manufacturing process or Production Engineering - 1	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING
Unit-I	Forgeable material and forgeability, forging temperature, Grain flow in forged parts, Types of Presses and hammers.		PRIYANSHU JANA	01.10.2021-05.02.2022
Unit-II	Forging Processes – Drop forging, Upset forging, Die forging or press forging. Hot working & Cold working.			
Unit-III	Types of dies - Open Die, Closed Die (Single Impression and Multi impression) Closed Die forging operations - Fullering, Edging, Bending, Blocking, Finishing.		AVIJIT DAS	

Unit-IV	Types of rolling mills: 2 Hi, 3 Hi & 4 Hi mills. Different rolled sections.			
UNITS	PAPER: SEC-1Assembling Simple Electronics Circuits	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING
Unit- I	Semiconductor and Diode P-type and N-type semiconductor, Junction of P-type & N type i.e. PN junction, Barrier voltage , depletion region ,Junction Capacitance, Forward biased & reversed biased junction, Diode symbol ,circuit diagram for characteristics (forward & reversed),Characteristics of PN junction diode, Specifications:-Forward voltage drop , Reversed saturation current, maximum forward current , power dissipation, Package view of diodes of different power ratings (to be shown during practical hours) Zener diode: Construction, Symbol, Circuit diagram for characteristics of zener diode (Forward & Reverse),Zener & Avalanche Breakdown, Zener diode specifications – zener voltage, power dissipation, break over current, dynamic resistance & maximum reverse current.	50	PRADIP SANTRA	01.10.2021-05.02.2022
Unit- II	Rectifiers, Filters and Power Supply Need of rectifier , definition ,Types of rectifier – Half wave rectifier, Full wave rectifier,(Bridge & centre tapped) Circuit operation Input/output waveforms for voltage & current, Average (dc) value of current & voltage (no derivation), Ripple , ripple factor , ripple frequency , PIV of diode used , efficiency of rectifier.(no derivation only definition), Comparison of three types of rectifier, Need of filters, Types of filters- A] shunt capacitor, B] Series inductor, C] LC filter , D] - filter --- only circuit operation (no mathematical derivation),limitations & advantages 2.5 Voltage regulator-Simple voltage regulator circuit using zener, familirisation with IC regulator circuit (like 78XX , 79XX series etc.), IC 723 adjustable power supply, concept of Switch mode power supply (SMPS) block diagram only.		UJJWAL BHUNIA	

Unit-III	Transistors, Switching and Optoelectronics Devices Bipolar Junction Transistor (BJT): Symbol of NPN & PNP types, Construction, Different types of package, Operation of NPN and PNP transistor – current flow, relation between different currents ,Transistor configurations – CB, CE, CC circuit diagram for input & output characteristics of each configuration, Input & output characteristics, Comparison between three configuration, Transistor parameters – input & output resistance and relation between them. Transistor specification – VCE Sat, IC Max, VCEO, ICEO, VCE Breakdown, Power dissipation. Field effect Transistor (FET): Symbol, Construction of JFET, Working principle and V-I characteristics of JFET, pinch- off voltage, drain résistance, trans conductance, amplification factor and their relationship, Enhancement and depletion type MOSFET. TRIAC, DIAC, Silicon control rectifier (SCR):-Symbol, working, application (elementary ideas only) Comparison between Transistor and SCR. Elementary ideas of LED, LCD, photodiode, phototransistor and solar cell and their applications only.		PRADIP SANTRA	01.10.2021-05.02.2022
Unit- IV	Transistor Biasing Need of biasing, concept of DC load line and AC load line, selection of Q point and Stabilization, Types of biasing circuits (no mathematical derivation) – a) Fixed biased circuit, b) Collector-to-base biased circuit, c) Voltage divider bias circuit		UJJWAL BHUNIA	01.10.2021-05.02.2022
Unit – V	Small Signal Transistor Amplifiers Concept of amplification----Small signal amplifier using BJT, Determination of current, voltage & power gain, Input & output resistance. Single stage CE amplifier with voltage divider bias. Its explanation. Frequency response of single stage CE Amplifier, Bel and Decibel unit. Bandwidth & its significance. Cascade Amplifiers (Multistage Amplifier), Need of Multistage Amplifiers, Gain of amplifier. Types of amplifier coupling – RC, transformer & direct coupling. Two stage amplifier circuit diagram, working (briefly), frequency response, merits & demerits & applications of each.		PRADIP SANTRA	

Unit- VI	Oscillator Oscillator – Requirement of oscillator circuit, Barkhauson's criteria of oscillator, circuit diagram and its application only - .Phase shift oscillator, Hartley oscillator, Colpitts oscillator, Crystal oscillator		UJJWAL BHUNIA		
Unit – VII	Op-Amp OP-Amp Block diagram and use of op amp as - Inverting, non inverting, summing amplifier, differentiator, integrator, buffer, comparator, Schmitt's trigger.				
Teaching Plan: Department of Automobile Mentainance: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC8 T** Chassis, Frame &Body, Brake & Braking System, Wheel &Tyres.	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	Internal examination
Unit-I	**Chassis, Frame and Body:** Chassis layout and its main components, design features, types of chassis and frames, materials and dimensions for auto body work, method of manufacturing and space requirements.	75	PARTHA SAKHA JANA	15.03.2022-25.06.2022	1st internal: 4th week of April,2022 & 2nd internal :3rd week of June,2022
Unit-II	**Brake and braking system:** Principles of brakes, braking mechanisms, classifications, bleeding in hydraulic system, brake troubles.				
Unit-III	**Wheels and tyres:** Types of tyres and their specification, tubeless tyres, radial tyres, friction due to pavement and earth in relation to wear, care and maintenance of tyres and tubes, repair and retreading of tyres.				
UNITS	**PAPER: CC8 P Chassis, Frame &Body, Brake & Braking System, Wheel &Tyres.**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
Unit-I	Wheel alignment and wheel balancing: toe-in, toe-out, caster angle, camber angle, king pin, inclination, adjustment and setting and wheel balance.		PRIYANSHU JANA	15.03.2022-25.06.2022	

Unit-II	Brake system: Over hauling master cylinder, wheel cylinder, front and rear brake, air servo unit, unloaded valve, release valve, hand brake, vacuum 2uffer, single brake chamber,			
Unit-III	Brake bleeding, Relining, brake shoes, servicing air tank, servicing brake valve and disc brake, demonstration of working of ABS system, sensors.			
UNITS	PAPER: CC9 T Engine Servicing And Tuning, Garage & Service Station, Electrical System and Motor Vehicles Act.	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING
Unit-I	Engine servicing and tuning: Basic requirements of automobiles engine servicing types and procedures.	75	PARTHA SAKHA JANA	15.03.2022-25.06.2022
Unit-II	Garage and service station: Location and layout, equipment required in a service station, types of service.			
Unit-III	Servicing of Motor vehicles: Signification of servicing and its types, engine tuning and various instruments used, decarbonizing of engine parts, servicing of batteries,			
Unit-IV	Electrical systems, servicing of fuel injection and ignition system, lubrication system, cooling system, braking system and other accessories.			
Unit-V	Inspection and Testing of motor vehicles, types of inspection , inspection card , inspection and repair accident inspection , diagnosis of faults , Laboratory road testing of motor vehicles.			
Unit-VI	Concept of Motor vehicles Act, different rules of Motor vehicles Act, Motor vehicle Act with special reference to pollution control and measure required to safe drive, Effect of pollutant.			
UNITS	PAPER: CC9 P Engine Servicing And Tuning, Garage & Service Station, Electrical System and Motor Vehicles Act.	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING

Unit-I	Specifications of drilling machine. Types of drills and reamers		PRIYANSHU JANA	15.03.2022-25.06.2022
Unit-II	Basic parts and their functions – Pillar drilling machine & Radial drilling machine.			
Unit-III	drilling, boring, reaming, Counter boring, countersinking, chamfering, Spot facing, Trepanning			
Unit-IV	Arc Welding – working Principle, component, working Applications=		AVIJIT DAS	
Unit-V	Principle & Application of Shielded metal arc welding, Submerged arc welding. TIG / MIG welding			
Unit-VI	Principle & Application of process Resistance welding.(Principle & Application) – Spot welding, Seam welding, Projection welding			
Unit-VII	Types of Brazing and soldering application process, Inspection of Welding defects.			
UNITS	PAPER: CC10 T Manufacturing Process and Machine Tools-ll	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING
Unit-I	Casting process, Permanent mould casting, semi permanent mould casting, die casting,centrifugal casting , investment casting, continuous casting , defect in casting ,inspection ofcasting ,cleaning of casting.	75	PARTHA SAKHA JANA	15.03.2022-25.06.2022
Unit-II	Definition and concept of smithy and forging, sheet metal work, rivets and screws,			
Unit-III	Machine Shops:- Elementary ideas about different machines like Slotting machine,planning machine , boring machine , broaching machine , press machine.			
Unit- IV	Elementary ideas about different non-traditional machine like Ultrasonic machining(USM) , Electro chemical machining (ECM) , Electrical discharge machining (EDM) , Laser beam machining (LBM)			

Unit-V	Definition and concept of N.C Machine tools and C.N.C Machine tools.			
UNITS	**PAPER: CC10 P** Manufacturing Process and Machine Tools-ll	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Transmission system: Over hauling universal joint, differential, remove and refitting propeller shaft over hauling slip joint.		RANAJIT BERA	15.03.2022-25.06.2022
Unit-II	Cutting tool nomenclature & tool signature of single point cutting tool. Orthogonal & oblique cutting, chip formation & type of chips		AVIJIT DAS & PRIYANSHU JANA	
Unit-III	Types of lathes – Centre lathe, Capstan & Turret Lathe, CNC Lathe Specification of Centre lathe. Basic parts and their functions of centre lathe.			
Unit-IV	Operations and tools Centering, facing, Turning, parting off, undercutting, grooving, Knurling, boring, thread cutting			
UNITS	**PAPER: SEC-2 Electro Magnetism and Digital Electronics**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Steady electric current: Current density, equation of continuity, condition for the steady current, Kirchhoff's laws and analysis of multi loop circuits.	50	PRADIP SANTRA	15.03.2022-25.06.2022
Unit-II	Magneto statics: Force on a moving charge, Lorentz force and definition of B, force on a straight current carrying conductor in a uniform magnetic field, torque on a current loop. Biot Savart law, Ampere's circuital law, determination of magnetic fields (B) due to a straight current mcarrying conductor, a circular coil, a solenoid, magnetic field due to a small current loop, concept of magnetic dipole as a tiny current loop.		UJJWALBHUNIA	

Unit-III	Magnetic fields in matter- magnetization (M), relation between B, H, and M, magnetic susceptibility and permeability, diamagnetic, paramagnetic and ferromagnetic materials, Curie's law, hysteresis in ferromagnetic material.				
Unit-IV	Electromagnetic induction and Maxwell's Equations: Faraday's law (both the integral and the differential forms), self and mutual inductances, transformers, energy stored in a coil of self inductance L, displacement current, Maxwell's equations.		PRADIP SANTRA		
Unit-V	Transients in DC: Growth and decay of current in LR circuit, charging and discharging of capacitor in CR circuit, time constants.			15.03.2022-25.06.2022	
Unit-VI	Alternating current: LR and CR circuits, complex number and their applications in AC circuits, impedance and reactance, series and parallel resonances, Q– factor, power dissipation in AC circuit, power factor.				
Unit-VII	Digital Electronics - binary number system, conversion from decimal to binary and vice versa. Logic gates- OR, AND, NOT gates, truth tables, de Morgan's theorem, NOR and NAND universal gates. Combinational logic - Half adder, full adder, digital comparator, decoder, encoder (ROM), digital to analog conversion, analog to digital conversion, multiplexer. Sequential logic - Flip - Flops - RS, D, JK, JKMS, edge triggering and locked operation, shift registers, ripple counter (binary and decade).		UJJWAL BHUNIA		

Teaching Plan: Department of Automobile Mentainance: SEMESTER-V(HONOURS)

UNITS	PAPER: CC11 T Electrical System	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal examination
Unit-I	**Generator, Alternator and Batteries, Maintenance** Various electrical Instruments in an automobile, Automobile batteries and its maintenance and	75	PARTHA SAKHA JANA	14.09.2021-18.01.2022	

	function of generator, alternator, battery charging system, voltage and current regulator, selfstarter and bendix drive, ignition system and its components, ignition timing, setting of contact breaker gap, spark plug, firing order, checking electrical system.				1st internal:1st week of November,2021 & 2nd internal:3rd week of December,2021
Unit – II	**Lighting System** Concept of Wring system, wring diagram, colour coding with diagram.				
Unit-III	**Accessories and control** Horn and its type, wind screens, wiper, direction indicators and flashing units, signalling system, lamps and their types, starter switch, Speedo meter , Antitheft devices, fuel gauge, oil pressure gauge, Temperature gauge.				
UNITS	**PAPER: CC11 P Electrical System**	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	
Unit-I	**Disassemble the engine component:** Overhauling cylinder head rockenarm piston, connecting rod, crankshaft pulley, timing geals-chain, fly wheel, crank shaft, of multi-cylinder engine. Injector testing with bench tester Fresing and calibration of diesel engine		RANAJIT BERA	14.09.2021-18.01.2022	
Unit-II	**Electrical system** Battery, battery testing, ignition circuit , lighting circuit, battery charging circuit, dynamo circuit, alternator circuit, Overhauling starter motor, dynamo alternator, Wiper motors, horn operation		PRIYANSHU JANA		

Unit-III	**M.P.F.I system** Fuel pump overhauling, common rail service, injector testing and service, M.P.F.I Total Sensor System, Fuel line service. . Bleed air from the fuel lines		**RANAJIT BERA**	
Unit-IV	**ECU** Carryout Identification of Electronic control Unit, Perform Set up for testing, Testing of Electronic Control Circuit. Perform Identification of various sensors installed in engine & it'smounting. Check instruments & Gauges on dash board & replace defective gauges. Test Temperature sensor, Pressure senor, potentiometer, magnetic induction sensor, cam shaft sensor, crankshaft position sensor and all sensor		**PRIYANSHU JANA**	
Unit-V	**Turbocharger & super charger** Overhauling turbo charger & supercharger unit, impalas shaft inspect and impeller service.		**RANAJIT BERA**	14.09.2021-18.01.2022
Unit-VI	**Total light circuit** Trace the light circuit - test bulbs, align head lamps, aiming headlights. Changing a headlight bulb, checking of a head light switch and to replace if faulty Check the all wiring wire with MultiMate, service head light, fog light, indicator light, parking light, break light tell light ,check ignition switch		**PRIYANSHU JANA**	
UNITS	**PAPER: CC12 T Estimating, Costing and Machine Design**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	**Estimating and Costing** Definition of estimating and costing, elements of costing, Determination of weight of various	75	PARTHA SAKHA JANA	14.09.2021-18.01.2022

	parts such as block, cylinder, nuts, bolts, rivets, Estimate of machining price of several parts			
Unit-II	**Machine Design** Concept and definition of machine Design, Types of stress, strain such as tension, compression, shear, bearing pressure.			
Unit-III	**Design of simple machine parts** Design of Rivets joint such as single rivet lap joint, Double rivet lap joint, single rivet butt joint, Double rivet butt joint. Flange coupling, universal coupling, Gears.			
UNITS	**PAPER: DSE-1 T** Alternate Fuels and Energy Systems	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	**Introduction to alternate fuels and energy systems**: Estimation of petroleum reserve; Need for alternate fuel; Availability and properties of alternate fuels; general use of alcohols, LPG, Hydrogen, Ammonia, CNG, and LNG; Vegetable oils and Biogas; Merits and demerits of various alternate fuels.	75	PARTHA SAKHA JANA	14.09.2021-18.01.2022
Unit-II	**Alcohols:** Properties as engine fuels; alchohols and gasoline blends; Combustion characteristics in engines; emission characteristics			
Unit-III	**Natural Gas, LPG, Hydrogen and Biogas** Availability of CNG, properties modification required to use in engines-performance and emission characteristics of CNG using LPG in SI & CI engines. Performance and emission for LPG, Hydrogen; Storage and handling, performance and safety aspects; Vegetable Oils - Various			

	vegetable oils for engines, esterification, performance and emission characteristics			
Unit-IV	**Electrical and Solar Powered Vehicles:** Layout of an electric vehicle, Advantage and limitations, Specifications-System component,Electronic control system-High energy and power density batteries, Hybrid vehicle, Solar powered vehicles			
UNITS	**PAPER: DSE-1 P** Alternate Fuels and Energy Systems	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Physical demonstration of engines powered with alternative fuels/ energies		PRIYANSHU JANA	14.09.2021-18.01.2022
Unit-II	Perform Checking of petroleum and alternate fuel engine		RANAJIT BERA	
Unit-III	Training on Solar/ Electrical powered vehicle.		RANAJIT BERA	
Unit-IV	Laboratory note book and Viva Voce: Students will be required to maintain records of all works done in connection with the topic taught in this paper.		PRIYANSHU JANA	
Unit-V	Visit to industry / Project work			
UNITS	**PAPER: DSE-2 T Motor Vehicle Act & Pollution Control**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit I	**Motor vehicle act** Various section of the motor vehicle act, Licensing of drivers of motor vehicles, Registration of motor vehicles, Control of transport vehicles, Control of traffic, Insurance of motor vehicles, Offence - Penalties and Procedure, Mandatory sings, Accident claims, Accident claims tribunals.	75	PARTHA SAKHA JANA	14.09.2021-18.01.2022
Unit II	**Introduction**			

	Vehicle population assessment in metropolitan cities and contribution to pollution, effects on human health and environment, global warming, types of emission, transient operational effects on pollution.			
Unit III	**Pollutant Formation in SI Engines** Pollutant formation in SI Engines, mechanism of HC and CO formation in four stroke and two stroke SI engines, NOx formation in SI engines, effects of design and operating variables on emission formation, control of evaporative emission. Two stroke engine pollution.			
Unit IV	**Pollutant Formation in CI Engines** Pollutant formation in CI engines, smoke and particulate emissions in CI engines, effects of design and operating variables on CI engine emissions, Nox formation and control. Noise pollution from automobiles, measurement and standards	75	PARTHA SAKHA JANA	14.09.2021-18.01.2022
Unit V	**Measurement Techniques Emission Standards and Test Procedure** NDIR, FID, Chemiluminescent analyzers, Gas Chromatograph, smoke meters, emission standards, driving cycles - USA, Japan, Euro and India. Test procedures - ECE, FTP Tests. SHED Test - chassis dynamometers, dilution tunnels			
UNITS	**PAPER: DSE-2 P Motor Vehicle Act & Pollution Control**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Identification of Informatory, Warning and Mandatory Road Signs.		RANAJIT BERA	14.09.2021-18.01.2022
Unit-II	Knowing various traffic signals		PRIYANSHU JANA	
Unit-III	Familiarising with layout and identifying various items and parts of various emission controlling system e.g :-EGR system, Cat Con , PCV System and Fuel vapour Purge Control System.		RANAJIT BERA	

Unit-IV	Laboratory note book and Viva Voce		PRIYANSHU JANA		
Teaching Plan: Department of Automobile Mentainance: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13 T** Automotive Air Conditioning	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**Internal examination**
Unit-I	**Air-conditioning Fundamentals** Basic air conditioning system - location of air conditioning components in a car, schematic layout of a refrigeration system, compressor components, condenser and high pressure service ports, thermostatic expansion valve, expansion valve calibration, controlling evaporator temperature, evaporator pressure regulator, evaporator temperature regulator.	75	PARTHA SAKHA JANA	21.02.2022-10.06.2022	**1st internal: 1st week of April,2022** **&** **2nd Internal:1st week ofJune,2022**
Unit – II	**Air Conditioner** - Heating System Automotive heaters, manually controlled air conditioner, heater system, automatically controlled air conditioner and heater systems, automatic temperature control, air conditioning protection, engine protection. **Refrigerant:** Containers handling refrigerants, tapping into the refrigerant container, refrigeration system diagnosis, diagnostic procedure, ambient conditions affecting system pressures				
Unit-III	**Air Routing and Temperature Control** Objectives, evaporator airflow through the recirculating unit, automatic temperature control, duct system, controlling flow, vacuum reserve, testing the air control and handling systems.				

Unit-IV	**Air Conditioning Service** Air conditioner maintenance and service, servicing heater system removing and replacing components, trouble shooting of air controlling system, compressor service.			
UNITS	**PAPER: CC13 P** Automotive Air Conditioning	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Layout of car AC system		PRIYANSHU JANA	21.02.2022-10.06.2022
Unit-II	Construction and operation of condenser and evaporator.			
Unit-III	Construction and operation of heating system.			
Unit-IV	Case study of AC system.			
Unit-V	Controlling system of AC			
Unit-VI	Servicing of AC system.			
UNITS	**PAPER: CC14 T** Vehicle Performance and Testing	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	**Vehicle Performance Parameters** Vehicle Performance parameters, Fuel economy, acceleration, deceleration, grad ability, top speed, handling, comfort, life durability, EGR systems, and Vehicular systems: Suspension steering, Brakes & carriage unit testing, test procedure. Test procedure for gear box noise and shifting force.	75	PARTHA SAKHA JANA	21.02.2022-10.06.2022
Unit-II	**Vehicle Testing** Vehicle Testing - Road test, Free acceleration test, Coast down test, Passer by noise test, Wheel alignment and balancing test, Test tracks û proving ground testing, high speed track, pavement track, corrugated track, mud track, steering pad, gradient track, deep wading through shallow water, Laboratory testing û testing on chassis dynamometer transition testing- Euro III onwards, accelerated testing, Virtual testing, Evaporative emission testing, Oil consumption testing.			

Unit-III	**Collisions and Crash Testing** Crash testing: Human testing, Dummies, crashworthiness, pole crash testing, rear crash testing, vehicle to vehicle impact, side impact testing, crash test sensors, sensor mounting, crash test data acquisition, Braking distance test.			
Unit-IV	**Noise Vibration** Noise & vibration: Mechanism of noise generation, engine noise & vibration, causes and remedies, road shocks wind noise & measurement, vehicle measurement testing. Instrumentation for functional tests, Battery testing, endurance test.			21.02.2022-10.06.2022
UNITS	**PAPER: CC14 P** Vehicle Performance and Testing	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Engine / vehicle performance, P.V. diagram, mechanical efficiency, volumetric efficiency and losses of fuel economy.		PRIYANSHU JANA	21.02.2022-10.06.2022
Unit-II	Construction and working principle of EGR and catalytic convertor. Testing procedure of suspension, brake and steering system.		RANAJIT BERA	
Unit-III	Exhaust emission testing, oil consumption testing and road test.		PRIYANSHU JANA	
Unit-IV	Construction and operation of automatic clutch epicyclic transmission ad troque converter. Testing of clutch, gear box, final drive and differential		RANAJIT BERA	
Unit-V	Safety of driver and occupants like seat belt, air bags, GPS, ESP, functions and operations.		PRIYANSHU JANA	
UNITS	**PAPER: DSE-3 T** Two and Three Wheelers	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	**Power system:** Two stroke SI engine, four stroke SI engine; merits and demerits, Symmetrical and unsymmetrical port timing diagrams, Types of scavenging processes, merits and demerits, scavenging pumps, Rotary valve engine; Fuel system, Lubrication system. Magneto coil and battery coil	75	PARTHA SAKHA JANA	21.02.2022-10.06.2022

	spark ignition system, electronic ignition system; Starting system, Kick starter system.			
Unit-II	**Chassis Systems:** Mainframe and its types. Chassis and shaft drive, Single, multiple plates and centrifugal clutches. Gear box and gear controls. Front and rear suspension systems; Shock absorbers; Panel meters and controls on handle bar.			
Unit-III	**Brakes, Wheels and Tyres** Drum brakes, disc brakes, front and rear brake links, layouts, Spoked wheel, cast wheel, disc Wheel, disc types; Tyres and tubes.			
Unit-IV	**Case studies:** Two Wheelers: Case study of major Indian models of motorcycles, scooters and mopeds, TVS mopeds and motorcycles, Hero Honda motorcycles, Bajaj scooters and motorcycles, Yamaha, Enfield motorcycles; Servicing and maintenance. **Three Wheelers:** Case study of Indian models, Auto rickshaws, pickup van, delivery van and trailer, Maintenance: daily, weekly, monthly, Fault tracing.			
UNITS	**PAPER: DSE-3 P** Two and Three Wheelers	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Construction and operation of 4stroke SI engine.		RANAJIT BERA	21.02.2022-10.06.2022
Unit-II	Construction and operation of 2stroke petrol.			
Unit-III	Fuel supply circuit of 2 wheeler and 3 wheeler.			
Unit-IV	Operation of lubricating system.			
Unit-V	Operation of Magneto coil and Magneto coil ignition.			
Unit-VI	Operation electronic ignition.		PRIYANSHU JANA	

Unit-VII	Starting system and operation.			
Unit-VIII	Construction and working of clutching system.			
Unit-IX	Construction and operation of Transmission Gear box.			
Unit-X	Construction and operation of suspension system.		PRIYANSHU JANA	
Unit-XI	Construction and operation of Braking system.			
Unit-XII	Fitment and operation of wheels, tyre and tube.		RANAJIT BERA	
Unit-XIII	Case study of motor cycles and scooter.			
UNITS	**PAPER: DSE-4 P** Industrial Training	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**
Unit-I	Industrial Training of 4 (four) weeks	75	4 WEEK INDUSTRIAL TRAINING GUIDENCE BY:- PARTHA SAKHA JANA & PRIYANSHU JANA POSTPONED due to COBID -19	21.02.2022-10.06.2022
Unit-II	Training may be done from industries/Skill knowledge providers (SKPs)/Sector Skill Councils (SSCs)/Training centers/Institutes dealing with automotive			
Unit-III	Trainings are to be carried out during summer vacations or Semester break			
Unit-IV	Training Report submission			
Unit-V	Viva - Voce.			

Bengali

Teaching Plan: Department of Bengali: SEMESTER-I(M.A) 25.10.2021-20.01.2022

		FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal Examination
UNITS	PAPER: 101 Vasar itihas O porichoy.	40		25.10.2021-20.01.2022	**3rd week of December,2021**
	1. Indo-Uropiun-Vasabansa abong Tar Parichay,Prach1in varatiya vasa samuha oTar parichay		Asutosh Barui		
	2. Madhavaratiya ArghaVasa Samuha		Asutosh Barui		
	3. Nabyavaratiya Arghavasar Bargikaran,Maghadhi Prakrita Udvuta Vasa Samuher Sangkhipta Parichay		Chandan Barik		
	4. LipirUdhvab o Bikash,Bangla Lipi		Chandan Barik		
UNITS	PAPER: 102 Madhyajuger Itihas.	40		25.10.2021-20.01.2022	

	1. Bangali Gatir Itihas o Dharma Darmadarsan,Madhaguger Bhibinna Sahitya Dharar Parichay.		Raka Maiti		
	2. Anubad Sahitya, Jiboni Sahitya,Baisanab Sahitya		Srilekha Dan

1	1.Baishnab padabali (atti nirbachita pad) Biddyapati- e sakhi hamari dukher nahi or,		Raka Maiti		1st internal examination on 2nd

	Aju rajani hum vage pohailu Chandidas- jata nibariye chai nibar na jay Radhar ki hailo antare byatha Gyandas- Rup lagi anakhi jhure Gobindadas-gaganahi nimagana dinamoni Knati Kantaka gari kamal-sama padatala Balaram Das - Shridam sudam shuna ore Balaram				week of May, 2022 and 2nd internal examination on 2nd week of July,2022
2	2.Shakta padaboli (chhati nirbachita pad) Ore nabami nishi - Kamala kanta Bhattacharya Ohe Giriraj gouri aviman - Kamala kanta Bhattacharya Ki holo nabami nishi - Kamala kanta Bhattacharya Bare bare kaha Rani - Kamala kanta Bhattacharya Ohe prananath giribar - Ramprashad sen Giri ebar amar uma - Ramprasad Sen		Santigopal Kar		

3	3.Adhunik juger kabby kobita: (1)Birangana kabbya (Dusanter proti shakuntala,somer prati tara,dasharather prati kekai,Lokhmaner prati surpanakha,Dwarakanather prati Rukmini, Niladwajer prati Jana)		Asutosh Barui		
	(2) Adhunik kabita sankalan (nirbachita kobita dashti) Madhusudan Dutta- Atmabilap Rabindranath Tagore- Sonar Tari Satyendra nath Datta- Champa Jatindranath sengupta- Dukkhobadi Dinesh Das - kaste Sudhindranath Datta - shashwati		Srilekha Dan Nabanita Ghorai		
	Subhas mukhapaddhya- Jata dure jai Shakti chattopadhyay - abani bari achho Sunil gangapaddhya - nirar jannyo kobitar vumika		Manas Maity		
UNITS	PAPER: MIL-1 AECC (CORE) CL 1:KABITA O CHHOTO GALPA	60		01.04.2022- 09.07.2022	1st internal examination on 2nd week of May, 2022 and 2nd internal

1	1.Bangla kabita(nirbachita panch ti) Ami - Rabindranath Tagore		Srilekha Dan		examination on 2nd week of July,2022
	Mahuyar desh- Samar sen		Asutosh Barui		
	Sammyabadi- Najrul Islam		Santigopal Kar		
	Barababur kachhe nibedan- Amiya chakraborty Utpakhi- sudhindra nath datta		Manas Maity		
2	2.Bangla chhoto galpa (birbachita panch ti) Mahesh- Sharat Chandra chattyapadhay Lambakarna- parashuram Puimancha- Bivutivushan Bandyapaddhay		Nabanita Ghorai		
	Girgiti- Jyoti rindra nandi Tichar- Manik Bandyapaddhay Tarini Majhi - Tarasankar Bandyapaddhay		Raka Maiti		
Teaching Plan: Department of Bengali: SEMESTER-III(GENERAL) *01.10.2021-05.02.2022*					

UNITS	PAPER: DSC-1C/2C Bangla kathasahitya path, natok O prbondho.	60		01.10.2021-05.02.2022	1st internal 4th week of November,2021 & 2nd Internal 1st week of January, 2022
	Sajahan		Nabnita Ghorai		
	Nirbachita Prabandha		Srilekha Dan		
	Bangla Chotogolpa		Santigopal Kar		
	Pother Panchali		Chandan Barik		
UNITS	PAPER: SEC-1 Likhon noipunyo briddhi.	40		01.10.2021-05.02.2022	
	Likhan Noipunnya Bridhdhi		Asutosh Barui		

Teaching Plan: Department of Bengali: SEMESTER-IV(GENERAL) 15.03.2022-25.06.2022

UNITS	PAPER: DSC-1D/2D Sahityatattwa O sahitya Nirmankala	60		01.10.2021-05.02.2022	
	A. Ras O Dhani(Kavyajingasa)		Raka Maiti		
	B. Chhanda		Chandan Barik		
	C. Alankar		Nabanita Ghorai		

UNITS	PAPER: SEC-2 Bangla Dhwanitattwa O Ruptattwa	40		01.10.2021- 05.02.2022	**4th week of April,2022**
	A. Dhanitattwa		Asutosh Barui		**&**
	B. Ruptattwa		Chandan Barik		**3rd week of June,2022**
UNITS	PAPER: MIL-2 Prabandha O Lokosahitya path	60		01.10.2021- 05.02.2022	
1	Mahuya pala		Raka Maiti		
2	Prabandha Path 1. Vidyasagar 2. Gitikavya		Manas Maity		
	3. Vabbar Katha 4. Musalmani Bangla		Nabanita Ghorai		

Teaching Plan: Department of Bengali: SEMESTER-V(GENERAL) 14.09.2021-18.01.2022

UNITS	PAPER: DSE-1A/2A Bangla natok O kobita.	60		14.09.2021- 18.01.2022	**1st week of November, 2021 &4th week of December,2021**
	Krishnakumai		Nabanita Ghorai		
	Kobita		Manas Maity		
UNITS	PAPER: SEC-3 Shoili, kabyashoili bichar, godya shoili O natya shoili bichar.	40		14.09.2021- 18.01.2022	
	Shoili, kabyashoili Bichar		Asutosh Barui		
	Godyashoili, O Natyashoili Bichar		Chandan Barik		
UNITS	PAPER: GE-1 Shishusahitya O goyenda kahini.	60			
	Shishusahitya		Asutosh Barui		
	Shishusahitya		Chandan Barik		
Teaching Plan: Department of Bengali: SEMESTER-VI(GENERAL) 21.02.2022-10.06.2022					
UNITS	PAPER: DSE-1B/2B Uponyas O chhoto galpo.	60		21.02.2022- 10.06.2022	**1st week of April,2022 & 1st week of June,2022**
1	Uponyas Radha - Tarashankar Bandyopadhyay		Nabanita Ghorai		

2	Chhotogalpo path 1. Bedini - Tarashankar Bandyopadhyay		Raka Maity		
3	2. Mayakurangi - Sharadindu Bandyopadhyay		Manas Maity		
4	3. Kachisangsad - Rajshekhar Basu		Santanu Pradhan		
5	4. Avagir Swagra, Sharatchandra chattopadhyay		Ashutosh Barui		
6	5. Vikhari Saheb - Pravatkumar Mukhopadhyay		Manas Maity		
UNITS	PAPER: SEC-4 Bishoyvittik alochana O alochana patra uposthapon.	40		21.02.2022- 10.06.2022	
	Bishay vittik alochana O alochana Patra upasthapan A. Prakalppatra rachana o prakalpa Patra upasthapana		Chandan Barik		

UNITS	PAPER: GE-2 Ekanka natok O goyenda kahini.	60		21.02.2022- 10.06.2022	
	Ekanka Natak o goyenda kahini path A. Ekanka natak path		Manas Maity		
	B. Sajarur kanta - Sharadindu Bandyopadhyay		Nabanita Ghorai		

Botany

Teaching Plan: Department of Botany: SEMESTER-I (HONOURS)

UNITS	PAPER: CC1	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
Unit-I	Introduction to microbial world	Theory-40 Practical-20 Internal-10 Class assessment -5	Debsankar Das Suvasree Sahu Moumita Barik Subir Pramanik Subhamita Das	1.10.2021-24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit-II	Virus				
3	Bacteria				
4	Algae				
5	Cyanophyta and Xanthophyta				
6	Chlorophyta and Charophyta				
7	Phaeophyta and Rhodophyta				
UNITS	PAPER: CC2	Theory-40			1st internal examination on 4th
1	Biomolecules		Chandan Acharya		

2	Bioenergetics	Practical-20 Internal-10 Class assessment-5	Subrata Giri	1.10.2021-24.02.2022	week of December, 2022 and 2nd internal examination on 2nd week of March,2022
3	Enzyme		Chandan Acharya		
4	The cell		Debsankar Das		
5	Cell wall and plasma membrane		Suvasree Sahu		
6	Cell organelles		Anjana Maity		
7	Cell division		Suvasree Sahu		
UNITS	PAPER: GE-1				
1	Microbes	Theory-40 Practical-20 Internal-10 Class assessment-5	Debsankar Das	1.10.2021-24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
2	Algae		Moumita Barik		
3	Fungi		Moumita Barik		
4	Introduction of archegoniates		Subir Pramanik		
5	Bryophytes		Subrata Giri		
6	Pteridophytes		Subir Pramanik		
7	Gymnosperm		Debsankar Das		

Teaching Plan: Department of Botany: SEMESTER-II (HONOURS)

UNITS	PAPER: CC3	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
1	Introduction of true fungi	Theory-40 Practical-20 Internal-10 Class assessment-5	Debsankar Das	01.04.2022-09.07.2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
2	Chitridiomycota and zygomycota				
3	Ascomycota		Subhamita Das		
4	Basidiomycota				
5	Allied fungi		Subir Pramanik		
6	Oomycota				
7	Symbiotic association		Moumita Barik		
8	Applied mycology				
9	Phyto-pathology		Subrata Giri		
UNITS	PAPER: CC4	Theory-40 Practical-20 Internal-10			
1	Introduction		Chandan Acharya	01.04.2022-09.07.2022	1st internal examination on 2nd week of May, 2022
2	Bryophytes				
3	Type studies –Bryophytes				

4	Pteridophytes	Class assessment -5	Anjana Maity		and 2nd internal examination on 2nd week of July,2022
5	Type studies –Pteridophytes				
6	Gymnosperms		Suvasree Sahu		
UNITS	PAPER: GE-2				1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
1	Introduction	Theory-40 Practical-20 Internal-10 Class assessment -5	Moumita Barik	01.04.2022-09.07.2022	
2	Ecological factors				
3	Plant communities				
4	Ecosystem		Anjana Maity		
5	Phytogeography				
6	Introduction to plant taxonomy		Debsankar Das		
7	Identification		Suvasree Sahu		
8	Taxonomic evidence...				
9	Taxonomic hierarchy				
10	Botanical nomenclature		Subrata Giri		
11	Classification		Debsankar Das		
12	Biometrics, numerical taxonomy and cladistics				
Teaching Plan: Department of Botany: SEMESTER-III (HONOURS)					
UNITS	PAPER: CC5				1st internal 4th week of November,2021 & 2nd Internal 1st week of January, 2022
1	Introduction and scope of plant anatomy	Theory-40 Practical-20 Internal-10 Class assessment -5	Subrata Giri	1.10.2021-05.02.2022	
2	Structure and development of plant body				
3	Tissues		Moumita Barik		
4	Apical meristems				
5	Vascular cambium and wood		Subhamita Das		
6	Adaptive and protective system		Chandan Acharya		
UNITS	PAPER: CC6				
1	Origin of cultivated plants	Theory-40 Practical-20 Internal-10	Anjana Maity	1.10.2021-05.02.2022	
2	Cereals				
3	Legumes				
4	Sources of sugars and starches			1.10.2021-05.02.2022	
5	Spices				
6	Beverages		Subhamita Das		

7	Sources of oils and fats	Class assessment -5		1.10.2021-05.02.2022
8	Natural rubber			
9	Drug yielding plants		Moumita Barik	
10	Timber plants			
11	Fibres			
UNITS	PAPER: CC7			1.10.2021-05.02.2022
1	Mendelian genetics and its extension	Theory-40 Practical-20 Internal-10 Class assessment -5	Subir Pramanik	
2	Extra chromosomal inheritance		Suvasree Sahu	
3	Linkage, crossing over and chromosomal mapping			
4	Variation in chromosome number and structure		Chandan Acharya	
5	Gene mutation			
6	Fine structure of gene		Debsankar Das	
7	Population and evolutionary genetics			
UNITS	PAPER: SEC-1			
1	General account about microbes used as bio fertilizers	Theory-40 Internal-5 Class assessment -5	Subrata Giri	1.10.2021-05.02.2022
2	Azospirillum			
3	Cyanobacteria			
4	Mycorrhizal association			
5	Organic farming			
UNITS	PAPER: GE-3			1.10.2021-05.02.2022
1	Origin of cultivated plants	Theory-40 Practical-20 Internal-10 Class assessment -5	Anjana Maity	
2	Cereals			
3	Legumes			
4	Spices		Anjana Maity	
5	Beverages		Moumita Barik	
6	Oils and fats			
7	Fibre yielding plants			
8	Introduction to biotechnology		Chandan Acharya	
9	Plant tissue culture			
10	Recombinant DNA technology		Subrata Giri	
Teaching Plan: Department of Botany: SEMESTER-IV(HONOURS)				

UNITS	PAPER: CC8	Theory-40 Practical-20 Internal-10 Class assessment-5			**4th week of April,2022 &3rd week of June,2022**
1	Nucleic acid		Suvasree Sahu	15.03.2022-25.06.2022	
2	The Structure of DNA and RNA				
3	The Replication of DNA		Subir Pramanik		
4	Central dogma and Genetic Code				
5	Transcription		Debsankar Das		
6	Processing and modification of RNA		Debsankar Das		
7	Translation		Suvasree Sahu		
UNITS	PAPER: CC9				
1	Introduction	Theory-40 Practical-20 Internal-10 Class assessment-5	Anjana Maity	15.03.2022-25.06.2022	
2	Soil				
3	Water				
4	Light, temp, wind and fire				
5	Ecosystem		Moumita Barik		
6	Population ecology				
7	Plant communities				
8	Biotic interaction		Subhamita Das		
9	Functional aspects of ecosystem				
10	Phyto-geography				
UNITS	PAPER: CC10	Theory-40 Practical-20 Internal-10 Class assessment-5			
1	Significance of plant systematics		Chandan Acharya	15.03.2022-25.06.2022	
2	Taxonomic hierarchy				
3	Botanical nomenclature		Subir Pramanik		
4	Systems of classification		Debsankar Das		
5	Biometrics, numerical taxonomy and cladistics		Subrata Giri		
6	Phylogeny of angiosperm				
UNITS	PAPER: SEC-2	Theory-40 Internal-5 Class assessment-5		15.03.2022-25.06.2022	
1, 2,3,4	Mushroom culture technology		Subrata Giri		

UNITS	PAPER: GE-4				
1	Plant-water relations	Theory-40 Practical-20 Internal-10 Class assessment-5	Debsankar Das	15.03.2022-25.06.2022	
2	Mineral nutrition				
3	Translocation in phloem.		Subhamita Das		
4	Photosynthesis		Anjana Maity		
5	Respiration				
6	Enzymes		Subhamita Das		
7	Nitrogen metabolism		Subir Pramanik		
8	Plant growth regulators				
9	Plant response to light and temperature		Subrata Giri		
Teaching Plan: Department of Botany: SEMESTER-V(HONOURS)					
UNITS	PAPER: CC11				**1st week of November, 2021 &4th week of December,2021**
1	Introduction	Theory-40 Practical-20 Internal-10 Class assessment-5	Subrata Giri	14.09.2021-18.1.2022	
2	Reproductive devt.				
3	Anther and pollen biology		Suvasree Sahu		
4	Ovule		Subrata Giri		
5	Pollination and fertilization		Suvasree Sahu		
6	Self -incompatibility		Moumita Barik		
7	Embryo , endosperm				
8	Polyembryony and apomixis		Subhamita Das		
UNITS	PAPER: CC12				
1	Plant water relationship	Theory-40 Practical-20 Internal-10 Class assessment-5	Debsankar Das	14.09.2021-18.1.2022	
2	Mineral nutrition				
3	Nutrient uptake				
4	Translocation in the phloem		Subhamita Das		
5	Plant growth regulators		Anjana Maity		
6	Physiology of flowering				
7	Phytochrome, cytochrome and phototropin				
UNITS	PAPER: DSE-1				

1	Biostatistics	Theory-40 Practical-20 Internal-10 Class assessment -5cal-20	Chandan Acharya	14.09.2021-18.1.2022	
2	Collection of data, primary and secondary				
3	Measures of central tendencies				
4	Correlation				
5	Statistical inference				
UNITS	PAPER: DSE-2	Theory-40 Practical-20 Internal-10 Class assessment -5			
1	Plant breeding		Subir Pramanik		
2	Methods of crop improvements				
3	Quantitative inheritance				
4	Inbreeding depression and heterosis.		Suvashree Shau		
5	Crop improvement and breeding				
Teaching Plan: Department of Botany: SEMESTER-VI (HONOURS)					
UNITS	PAPER: CC13	Theory-40 Practical-20 Internal-10 Class assessment -5	Chandan Acharya	21.02.2022-10.06.2022	**1st week of April,2022 & 1st week of June,2022**
1	Concept of metabolism				
2	Carbon assimilation				
3	Carbohydrate metabolism				
4	Carbon oxidation		Debsankar Das		
5	ATP Synthesis				
6	Lipid metabolism				
7	Nitrogen metabolism		Anjana Maity		
8	Mechanism of signal transduction				
UNITS	PAPER: CC14				
1	Plant Tissue culture	Theory-40 Practical-20 Internal-10	Suvashree Sahu	21.02.2022-10.06.2022	
2	Recombinant DNA technology				
3	Gene cloning				
4	Methods of Gene transfer				
5	Application of Biotechnology		Subhamita Das		

		Class assessment -5			
UNITS	PAPER: DSE-3				
1	Scope of microbes in industry and environment	Theory-40 Practical-20 Internal-10 Class assessment -5	Anjana Maity		
2	Bioreactors /fermenters and fermentation process				
3	Microbial productions of industrial products		Subhamita Das		
4	Microbial enzymes of industrial interest				
5	Microbes and quality of environment		Suvashree Sahu	21.02.2022-10.06.2022	
6	Microbial flora of water				
7	Microbes in agriculture				
UNITS	PAPER: DSE-4				
1	Imaging and related technique	Theory-40 Practical-20 Internal-10 Class assessment -5	Subrata Giri		
2	Cell fractionation				
3	Radio isotopes		Subir Pramanik		
4	Spectrophotometry			21.02.2022-10.06.2022	
5	Chromatography		Chandan Acharya		
6	Characterization of protein and neuclic acids		Debsankar Das		
7	Biostatistics		Chandan Acharya		
Teaching Plan: Department of Botany: SEMESTER-I (GENERAL)					
UNITS	PAPER: DSC-1A				
1	Microbes	Theory-40 Practical-20 Internal-10 Class assessment -5	Suvashree Sahu		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
2	Algae				
3	Fungi				
4	Introduction of Archegoniates		Debsankar Das	1.10.2021-24.02.2022	
5	Bryophytes		Subrata Giri		
6	Pteridophytes		Debsankar Das		
7	Gymnosperm		Suvashree Sahu		
Teaching Plan: Department of Botany: SEMESTER-II (GENERAL)					
UNITS	PAPER: DSC-2B				
1	Introduction	Theory-40	Anjana Maity		1st internal examination on 2nd
2	Ecological factors				

3	Plant communities	Practical-20 Internal-10 Class assessment -5		01.04.2022-09.07.2022	week of May, 2022 and 2nd internal examination on 2nd week of July,2022
4	Ecosystem		Subhamita Das		
5	Phytogeography				
6	Introduction to plant taxonomy		Debsankar Das		
7	Identification		Suvashree Sahu		
8	Palinological evidance from paly....				
9	Taxonomic hierarchy		Debsankar Das		
10	Botanical nomenclature				
11	Classification		Subrata Giri		
12	Biometrics, numerical taxonomy and cladistics				
Teaching Plan: Department of Botany: SEMESTER-III (GENERAL)					
UNITS	PAPER: DSC-3C			1.10.2021-05.02.2022	**4th week of November,2021 &1st Week of January,2022**
1	Meristematic and permanent tissue	Theory-40 Practical-20 Internal-10 Class assessment -5	Subrata Giri		
2	Organs				
3	Secondary growth		Subhamita Das		
4	Adaptive and protective systems				
5	Structural organization of flower		Suvashree Sahu		
6	Pollination and fertilization				
7	Embryo and endosperm		Moumita Barik		
8	Apomixes and polyembryony				
UNITS	PAPER: SEC-1				
1, 2, 3,4,5	Bio-fertilizers	Theory-40 Internal-5 Class assessment -5	Chandan Acharya, Subrata Giri		
Teaching Plan: Department of Botany: SEMESTER-IV(GENERAL)					
UNITS	PAPER: DSC-1D/2D/3D				**4th week of April,2022 &3rd week of June,2022**
1	Plant-water relations	Theory-40 Practical-20 Internal-10	Subrata Giri	15.03.2022-25.06.2022	
2	Mineral nutrition				
3	Translocation in phloem.		Subhamita Das		
4	Photosynthesis				

5	Respiration	Class assessment -5			
6	Enzymes		Anjana Maity		
7	Nitrogen metabolism		Subir Pramanik		
8	Plant growth regulators		Debsankar Das		
9	Plant response to light and temperature				
UNITS	PAPER: SEC-2				
1, 2,3,4	Mushroom culture technology	Theory-40 Internal-5 Class assessment -5	Chandan Acharya, Subir Pramanik	15.03.2022-25.06.2022	
Teaching Plan: Department of Botany: SEMESTER-V (GENERAL)					
UNITS	PAPER: DSE-1A/2A/3A				**1st week of November, 2021 &4th week of December,2021**
1	Origin of cultivated plants	Theory-40 Practical-20 Internal-10 Class assessment -5	Anjana Maity	14.09.2021-18.1.2022	
2	Cereals				
3	Legumes				
4	Spices				
5	Beverages		Moumita Barik		
6	Oils and fats				
7	Fibre yielding plants				
8	Introduction to biotechnology		Chandan Acharya		
9	Plant tissue culture				
10	Recombinant DNA technology		Subrata Giri		
UNITS	PAPER: SEC-3				
1-7	Floriculture	Theory-40 Internal-5 Class assessment -5	Subrata Giri, Moumita Barik	14.09.2021-18.1.2022	
Teaching Plan: Department of Botany: SEMESTER-VI (GENERAL)					

UNITS	PAPER: DSE-1B/2B/3B				**1st week of April,2022 & 1st week of June,2022**
1	Heredity	Theory-40 Practical-20 Internal-10 Class assessment -5	Subir Pramanik	21.02.2022-10.6.2022	
2	Sex-determination and Sex-linked Inheritance		Suvashree Sahu		
3	Linkage and Crossing over		Chandan Acharya		
4	Mutations and Chromosomal Aberrations				
5	Plant Breeding		Moumita Barik		
6	Methods of crop improvement				
7	Quantitative inheritance				
8	Inbreeding depression and heterosis				
9	Crop improvement and breeding				
UNITS	PAPER: SEC-4				
1-3	Medicinal Botany	Theory-40 Internal-5 Class assessment -5	Chandan Acharya, Subir Pramanik	21.02.2022-10.6.2022	

Computer Science

Teaching Plan: Department of Computer Science: SEMESTER-I(HONOURS)

UNITS	PAPER: GE-1: Computer Fundamentals	FULL MARKS	NAME OF TEACHER	MONTH OF TEACHING	REMARKS
1.	**Introduction:** Introduction to computer system, uses, types	**75**	Prasenjit Mura	**01/10/2021 to 24/02/2022**	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
2.	**Data Representation:** Number systems and character representation, binary 12L arithmetic		Prasenjit Mura		
3.	**Human Computer Interface:** Types of software, Operating system as user interface, utility programs		SubhasisMahapatra		
4.	**Devices:** Input and output devices (with connections and practical demo), keyboard, mouse, joystick, scanner, OCR, OMR, bar code reader, web camera, monitor, printer, plotter		SubhasisMahapatra		
5.	**Memory:** Primary, secondary, auxiliary memory, RAM, ROM, cache memory, hard disks, optical disks		Kuheli Ray Mahapatra		
6.	**Computer Organisation and Architecture:** C.P.U., registers, system bus, main memory unit, cache		Kuheli Ray Mahapatra		

	memory, Inside a computer, SMPS, Motherboard, Ports and Interfaces, expansion cards, ribbon cables, memory chips, processors.				
7.	**Overview of Emerging Technologies:** Bluetooth, cloud computing, big data, data mining, mobile computing and embedded systems.		SandipanSamanta		
GE-I P: Computer Fundamentals Lab			SubhasisMahapatra		
Teaching Plan: Department of Computer Science: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A/3A: Problem Solving using Computers(Theory)**	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	**REMARKS**
1.	**Computer Fundamentals:** Introduction to Computers: Characteristics of Computers, Uses of computers, Types and generations of Computers. Basic Computer Organization – Units of a computer, CPU, ALU, memory hierarchy, registers, I/O devices.	75	SubhasisMahapatra	**01/10/2021 to 24/02/2022**	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
2.	**Planning the Computer Program:** Concept of problem solving, Problem definition, Program design, Debugging, Types of errors in programming, Documentation.		Prasenjit Mura		
3.	**Techniques of Problem Solving:** Flowcharting, decision table, algorithms, Structured programming concepts, Programming methodologies viz. top-down and bottom-up programming.		Prasenjit Mura		
4.	**Overview of Programming:** Structure of a Python Program, Elements of Python.		Kuheli Ray Mahapatra		
5.	**Introduction to Python:** Python Interpreter, Using Python as calculator, Python shell, Indentation. Atoms, Identifiers and keywords, Literals, Strings, Operators (Arithmetic operator, Relational operator, Logical or Boolean operator, Assignment, Operator, Ternary operator, Bit wise operator, Increment or Decrement operator).		Kuheli Ray Mahapatra		
6.	**Creating Python Programs:** Input and Output Statements, Control statements (Looping- while Loop, for Loop, Loop Control, Conditional Statement- if...else, Difference between break, continue and pass).		SandipanSamanta		

7.	**Structures:** Numbers, Strings, Lists, Tuples, Dictionary, Date & Time, Modules, Defining Functions, Exit function, default arguments.		Kuheli Ray Mahapatra		
8.	**Introduction to Advanced Python:** Objects and Classes, Inheritance, Regular Expressions, Event Driven Programming, GUI Programming.		Prasenjit Mura		
DSC-(1A/2A/3A)P: Software Lab using Python(Lab)					
1.	Section: A (Simple programs)		Prasenjit Mura		
2.	Section: B (Visual Python): interval.		SandipanSamanta		
Teaching Plan: Department of Computer Science: SEMESTER-II(HONOURS)					
UNITS	**PAPER: GE-2: Introduction to Database System**	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	**REMARKS**
1.	**Database:** Introduction to database, relational data model, DBMS architecture, data independence, DBA, database users, end users, front end tools	**75**	SandipanSamanta	**01/04/2022 to 09/07/2022**	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
2.	**E-R Modeling:** Entity types, entity set, attribute and key, relationships, relation types, E- R diagrams, database design using ER diagrams		SandipanSamanta		
3.	**Relational Data Model:** Relational model concepts, relational constraints, primary and foreign key, normalization: 1NF, 2NF, 3NF		Prasenjit Mura		
4.	**Structured Query Language:**SQL queries, create a database table, create relationships between database tables, modify and manage tables, queries, forms, reports, modify, filter and view data.		Kuheli Ray Mahapatra		
GE2 P : Introduction to Database System (Lab)			Kuheli Ray Mahapatra		
Teaching Plan: Department of Computer Science: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B/3B:** Database Management Systems	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	**REMARKS**
1.	Introduction to Database Management Systems: Characteristics of database approach, data models, DBMS architecture and data independence.	75	Prasenjit Mura	**01/04/2022 to 09/07/2022**	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
2.	Entity Relationship and Enhanced ER Modeling: Entity types, relationships, SQL- 99: Schema Definition, constraints, and object modeling.		Kuheli Ray Mahapatra		
3.	Relational Data Model: Basic concepts, relational constraints, relational algebra, SQL queries.		SandipanSamanta		
4.	Database design: ER and EER to relational mapping, functional dependencies, normal forms up to third normal form.		Prasenjit Mura		

DSC-1BP/2BP/3BP: Software Lab based on Database Management Systems (Lab)			SandipanSamanta		
Teaching Plan: Department of Computer Science: SEMESTER-III					
UNITS	**PAPER:** GE-3: Introduction to Programming	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	**Internal examination**
1.	**Introduction to C and C++ :** History of C and C++, Overview of Procedural Programming and Object-Orientation Programming, Using main() function, Compiling and Executing Simple Programs in C++.		Kuheli Ray Mahapatra		1st internal 4th week of November,2021 & 2nd Internal 1st week of January, 2022
2.	**Data Types, Variables, Constants, Operators and Basic I/O** Declaring, Defining and Initializing Variables, Scope of Variables, Using Named Constants, Keywords, Data Types, Casting of Data Types, Operators (Arithmetic, Logical and Bitwise), Using Comments in programs, Character I/O (getc, getchar, putc, putcharetc), Formatted and Console I/O (printf(), scanf(), cin, cout), Using Basic Header Files (stdio.h, iostream.h, conio.hetc).		Kuheli Ray Mahapatra		
3.	**Expressions, Conditional Statements and Iterative Statements** Simple Expressions in C++ (including Unary Operator Expressions, Binary Operator Expressions), Understanding Operators Precedence in Expressions, Conditional Statements (if construct, switch-case construct), Understanding syntax and utility of Iterative Statements (while, do-while, and for loops), Use of break and continue in Loops, Using Nested Statements (Conditional as well as Iterative)	**75**	SandipanSamanta	01/10/2021 to 05/02/2022	
4.	**Functions and Arrays** Utility of functions, Call by Value, Call by Reference, Functions returning value, Void functions, Inline Functions, Return data type of functions, Functions parameters, Differentiating between Declaration and Definition of Functions, Command Line Arguments/Parameters in Functions, Functions with variable number of Arguments. Creating and Using One Dimensional Arrays (Declaring and Defining an Array, Initializing an Array, Accessing individual elements in an Array, Manipulating array elements using loops), Use Various types of arrays (integer, float and character arrays / Strings) Two-dimensional		Prasenjit Mura		

	Arrays (Declaring, Defining and Initializing Two Dimensional Array, Working with Rows and Columns), Introduction to Multi-dimensional arrays				
5.	**Derived Data Types (Structures and Unions)** Understanding utility of structures and unions, Declaring, initializing and using simple structures and unions, Manipulating individual members of structures and unions, Array of Structures, Individual data members as structures, Passing and returning structures from functions, Structure with union as members, Union with structures as members.		Kuheli Ray Mahapatra		1st internal 4th week of November,2021 & 2nd Internal 1st week of January, 2022
6.	**File I/O, Preprocessor Directives** Opening and closing a file (use of fstream header file, ifstream, ofstream and fstream classes), Reading and writing Text Files, Using put(), get(), read() and write() functions, Random access in files, Understanding the Preprocessor Directives (#include, #define, #error, #if, #else, #elif, #endif, #ifdef, #ifndef and #undef), Macros		SandipanSamanta		
7.	**Using Classes in C++** Principles of Object-Oriented Programming, Defining & Using Classes, Class Constructors, Constructor Overloading, Function overloading in classes, Class Variables &Functions, Objects as parameters, specifying the Protected and Private Access, Copy Constructors, Overview of Template classes and their use.		Prasenjit Mura		
8.	**Inheritance and Polymorphism** Introduction to Inheritance and Polymorphism		Prasenjit Mura		
	GE3P: Introduction to c/c++ Programming Lab		Prasenjit Mura,SandipanSamanta ,Kuheli Ray Mahapatra		
Teaching Plan: Department of Computer Science: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C:** Operating Systems	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	1st internal 4th week of November,2021 & 2nd Internal 1st week of January, 2022
1.	**Introduction:** System Software, Resource Abstraction, OS strategies.	75	Sandipan Samanta	01/10/2021 to 05/02/2022	
2.	**Types of operating systems -** Multiprogramming, Batch, Time Sharing, Single user and Multiuser, Process Control & Real Time Systems.		Sandipan Samanta		
3.	**Operating System Organization:** Factors in operating system design, basic OS functions, implementation consideration; process modes,		Kuheli Ray Mahapatra		

	methods of requesting system services – system calls and system programs.			
4.	**Process Management :** System view of the process and resources, initiating the OS, process address space, process abstraction, resource abstraction, process hierarchy, Thread model		Prasenjit Mura	
5.	**Scheduling:** Scheduling Mechanisms, Strategy selection, non-pre-emptive and pre-emptive strategies.		Prasenjit Mura	
6.	**Memory Management:** Mapping address space to memory space, memory allocation strategies, fixed partition, variable partition, paging, virtual memory		Kuheli Ray Mahapatra	
7.	**Shell introduction and Shell Scripting :** What is shell and various type of shell, Various editors present in linux Different modes of operation in vi editor What is shell script, Writing and executing the shell script Shell variable (user defined and system variables) System calls, Using system calls Pipes and Filters Decision making in Shell Scripts (If else, switch), Loops in shell Functions Utility programs (cut, paste, join, tr , uniq utilities) Pattern matching utility (grep)		SandipanSamanta	
	DSC1CP: Software Lab based on Operating Systems (Lab)		Kuheli Ray Mahapatra,	
UNITS	**PAPER: SEC-1: HTML Programming**			
1.	Unit-I: Introduction		Prasenjit Mura	
2.	Unit-II: The Basics The Head, the Body Colors, Attributes Lists, ordered and unordere		SubhasisMahapatra	
3.	Unit-III: Links Introduction Relative Links, Absolute Links Link Attributes Using the ID Attribute to Link Within a Document	50	Kuheli Ray Mahapatra,	01/10/2021 to 05/02/2022
4.	Unit-IV: Images Putting an Image on a Page		SandipanSamanta	

	Using Images as Links Putting an Image in the Background				
5.	Unit V: Tables Creating a Table Table Headers Captions Spanning Multiple Columns Styling Table		Prasenjit Mura		
6.	Unit VI: Forms Basic Input and Attributes Other Kinds of Inputs Styling forms with CSS Where To Go From Here		SubhasisMahapatra		
SEC1P: Software Lab Based on HTML			SubhasisMahapatra		

Teaching Plan: Department of Computer Science: SEMESTER-IV					
UNITS	**PAPER: GE-4: Programming in Python**	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	**REMARKS**
1.	**Planning the Computer Program:** Concept of problem solving, Problem definition, Program design, Debugging, Types of errors in programming, Documentation.	75	Prasenjit Mura	**15/03/2022 to 25/06/2022**	**4th week of April,2022 &3rd week of June,2022**
2.	**Techniques of Problem Solving:** Flowcharting, decision table, algorithms, Structured programming concepts, Programming methodologies viz. top-down and bottom-up programming.		Prasenjit Mura		
3.	**Overview of Programming :** Structure of a Python Program, Elements of Python		SandipanSamanta		
4.	**Introduction to Python:** Python Interpreter, Using Python as calculator, Python shell, Indentation. Atoms, Identifiers and keywords, Literals, Strings, Operators(Arithmetic operator, Relational operator, Logical or Boolean operator, Assignment, Operator, Ternary operator, Bit wise operator, Increment or Decrement operator)		SandipanSamanta		
5.	**Creating Python Programs:** Input and Output Statements, Control statements (Branching, Looping, Conditional Statement, Exit function, Difference between break, continue and pass.), Defining Functions, default arguments, Errors and Exceptions.		SandipanSamanta		
6.	**Iteration and Recursion:** Conditional execution, Alternative execution, Nested conditionals, The return statement, Recursion, Stack diagrams for recursive		SubhasisMahapatra		

	functions ,Multiple assignment, The while statement, Tables, Two-dimensional tables Strings and Lists: String as a compound data type, Length, Traversal and the for loop, String slices, String comparison, A find function, Looping and counting, List values, Accessing elements, List length, List membership, Lists and for loops, List operations, List deletion. Cloning lists, Nested lists Object Oriented Programming: Introduction to Classes, Objects and Methods, Standard Libraries. Data Structures: Arrays, list, set, stacks and queues. Searching and Sorting: Linear and Binary Search, Bubble, Selection and Insertion sorting.				
7.	**Strings and Lists:** String as a compound data type, Length, Traversal and the for loop, String slices, String comparison, A find function, Looping and counting, List values, Accessing elements, List length, List membership, Lists and for loops, List operations, List deletion. Cloning lists, Nested lists		Kuheli Ray Mahapatra,		
8.	**Object Oriented Programming:** Introduction to Classes, Objects and Methods, Standard Libraries		Prasenjit Mura		
9.	**Data Structures:** Arrays, list, set, stacks and queues.		Kuheli Ray Mahapatra,		
10.	**Searching and Sorting:** Linear and Binary Search, Bubble, Selection and Insertion sorting.		Kuheli Ray Mahapatra,		
	GE4P: Programming in Python Lab		Prasenjit Mura, Kuheli Ray Mahapatra, SandipanSamanta		
Teaching Plan: Department of Computer Science: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3D:** Computer System Architecture	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	
1.	**Introduction:** Logic gates, boolean algebra, combinational circuits, circuit simplification, flipflops and sequential circuits, decoders, multiplexors, registers, counters and memory units.		Kuheli Ray Mahapatra		
2.	**Data Representation and basic Computer Arithmetic:** Number systems, complements, fixed and floating point representation, character representation, addition, subtraction, magnitude comparison.	75	SubhasisMahapatra	**15/03/2022 to 25/06/2022**	
3.	**Basic Computer Organization and Design:** Computer registers, bus system, instruction set,		Prasenjit Mura		

	timing and control, instruction cycle, memory reference, input-output and interrupt.				
4.	**Central Processing Unit:** Register organization, arithmetic and logical micro-operations, stack organization, micro programmed control.		Prasenjit Mura		
5.	**Programming the Basic Computer:** Instruction formats, addressing modes, instruction codes, machine language, and assembly language, input output programming.		SandipanSamanta		
6.	**Input-output Organization:** Peripheral devices, I/O interface, Modes of data transfer, direct memory access.		SandipanSamanta		
DSC1DP: Computer System Architecture Lab			SandipanSamanta,Kuheli Ray Mahapatra		
UNITS	**PAPER: SEC-2: PHP Programming**				
1.	Introduction to PHP: PHP introduction, inventions and versions, important tools and software requirements (like Web Server, Database, Editors etc.) PHP with other technologies, scope of PHP Basic Syntax, PHP variables and constants Types of data in PHP , Expressions, scopes of a variable (local, global) PHP Operators: Arithmetic, Assignment, Relational, Logical operators, Bitwise, ternary and MOD operator. PHP operator Precedence and associativity	50	Kuheli Ray Mahapatra	**15/03/2022 to 25/06/2022**	
2.	Handling HTML form with PHP: Capturing Form Data GET and POST form methods Dealing with multi value fields Redirecting a form after submission		SubhasisMahapatra		
3.	PHP conditional events and Loops: PHP IF Else conditional statements (Nested IF and Else) Switch case, while ,For and Do While Loop Goto , Break ,Continue and exit		Prasenjit Mura		
4.	PHP Functions: Function, Need of Function , declaration and calling of a function PHP Function with arguments, Default Arguments in Function		SandipanSamanta		

	Function argument with call by value, call by reference Scope of Function Global and Local				
5.	String Manipulation and Regular Expression: Creating and accessing String , Searching & Replacing String Formatting, joining and splitting String , String Related Library functions Use and advantage of regular expression over inbuilt function Use of preg_match(), preg_replace(), preg_split() functions in regular expression		SandipanSamanta		
6.	Array: Anatomy of an Array ,Creating index based and Associative array ,Accessing array Looping with Index based array, with associative array using each() and foreach() Some useful Library function		Kuheli Ray Mahapatra		
SEC2P: PHP Programming (Lab)			**SubhasisMahapatra**		
Teaching Plan: Department of Computer Science: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A: Computer Networks**	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	
1.	**Basic concepts :** Components of data communication, standards and organizations, Network Classification, Network Topologies ; network protocol; layered network architecture; overview of OSI reference model; overview of TCP/IP protocol suite.	75	Kuheli Ray Mahapatra	14/09/2021 to 18/01/2022	**1st week of November, 2021 &4th week of December,2021**
2.	**Physical Layer:** Cabling, Network Interface Card, Transmission Media Devices- Repeater, Hub, Bridge, Switch, Router, Gateway.		SubhasisMahapatra		
3.	**Data Link Layer :** Framing techniques; Error Control; Flow Control Protocols; Shared media protocols - CSMA/CD and CSMA/CA.		Prasenjit Mura		
4.	**Network Layer :** Virtual Circuits and Datagram approach, IP addressing methods – Subnetting; Routing Algorithms (adaptive and non-adaptive)		Sandipan Samanta		
5.	**Transport Layer:** Transport services, Transport Layer protocol of TCP and UDP		Sandipan Samanta		
6.	**Application Layer :** Application layer protocols and services – Domain name system, HTTP, WWW, telnet, FTP, SMTP		Kuheli Ray Mahapatra		

7.	**Network Security :** Common Terms, Firewalls, Virtual Private Networks		Sandipan Samanta		
DSE1P: Computer Networks			Prasenjit Mura		
UNITS	**PAPER: SEC-3: Programming with Matlab**				
1.	MATLAB Basics The MATLAB environment - Basic computer programming - Variables and constants, operators and simple calculations - Formulas and functions - MATLAB toolboxes	50	Prasenjit Mura	14/09/2021 to 18/01/2022	
2.	Matrices and vectors Matrix and linear algebra review - Vectors and matrices in MATLAB - Matrix operations and functions in MATLAB		SandipanSamanta		
3.	Computer programming Algorithms and structures - MATLAB scripts and functions (m-files) - Simple sequential algorithms - Control structures		Kuheli Ray Mahapatra		
4.	MATLAB programming and Numerical Simulations Matlab Programming. Reading and writing data, file handling - Personalized functions - Toolbox structure - MATLAB graphic functions. Numerical simulations. Numerical methods and simulations - Random number generation – Monte carlo methods		Prasenjit Mura		
Teaching Plan: Department of Computer Science: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B: Cloud Computing**	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	**Internal examination**
1.	Cloud Introduction: Cloud Computing Fundamentals: Cloud Computing definition, Types of cloud, Cloud services: Benefits and challenges of cloud computing, Evolution of Cloud Computing , usage scenarios and Applications , Business models around Cloud – Major Players in Cloud Computing - Issues in Cloud - Eucalyptus - Nimbus - Open Nebula, CloudSim.	75	Kuheli Ray Mahapatra	**21/02/2022 to 10/06/2022**	**1st week of April,2022 & 1st week of June,2022**
2.	Cloud Services And File System: Types of Cloud services: Software as a Service - Platform as a Service – Infrastructure as a Service - Database as a Service - Monitoring as a Service – Communication as services. Service providers- Google App Engine, Amazon EC2, Microsoft Azure, Sales force. Introduction to MapReduce, GFS, HDFS, Hadoop Framework.)		SandipanSamanta		
3.	Collaborating With Cloud: Collaborating on Calendars, Schedules and Task Management – Collaborating on Event Management, Contact Management, Project Management – Collaborating on Word Processing, Databases – Storing and Sharing Files- Collaborating		SubhasisMahapatra		

	via Web-Based Communication Tools – Evaluating Web Mail Services – Collaborating via Social Networks – Collaborating via Blogs and Wikis. 185 CS-Engg&Tech-SRM-2013				
4.	Virtualization For Cloud :Need for Virtualization – Pros and cons of Virtualization – Types of Virtualization – System Vm, Process VM, Virtual Machine monitor – Virtual machine properties - Interpretation and binary translation, HLL VM - Hypervisors – Xen, KVM , VMWare, Virtual Box, Hyper-V.		Prasenjit Mura		
5.	Security, Standards, And Applications Security in Clouds: Cloud security challenges – Software as a Service Security, Common Standards: The Open Cloud Consortium – The Distributed management Task Force – Standards for application Developers – Standards for Messaging – Standards for Security, End user access to cloud computing, Mobile Internet devices and the cloud.		SandipanSamanta		
DSE2P: Cloud Computing (Lab)			SandipanSamanta		
UNITS	**PAPER: SEC-4: XML Programming**	**FULL MARKS**	**NAME OF TEACHER**	**MONTH OF TEACHING**	
1.	Introduction: Understanding Mark-up Languages, Introduction to XML and its Goals.		Prasenjit Mura		
2.	XML Basics: XML Structure and Syntax, Document classes and Rules.		Sandipan Samanta		
3.	Other XML Concepts: Scripting XML, XML as Data, Linking with XML.	50	Subhasis Mahapatra	**21/02/2022 to 10/06/2022**	
4.	XML with Style: XSL –Style Sheet Basics, XSL basics, XSL style sheets.		Kuheli Ray Mahapatra		
	SEC4P: Software Lab Based on XML		Prasenjit Mura		

Economics

Teaching Plan: Department of ECONOMICS: SEMESTER-I(HONOURS)

UNITS	**PAPER: CC -1 Introductory Microeconomics**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**Internal exanination**

I	Why Study Economics? Nature and Scope, Thinking like an economist, what to produce, how to produce, production possibility curve, marginal benefit and marginal costs, competitive model, property rights, incentives information, rationing, working with graphs.	75	Mr. Amitabha Sarkar	01/10/2021 to 24/02/2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
II	Elementary theory of demand, individual and market demand, determinants of demand, shift of demand. Elementary theory of supply, individual and market supply, determinants of supply, shift of supply. Market price, equilibrium price, excess demand function, existence, uniqueness, stability of equilibrium, consumer and producer surplus, market failure, government intervention, price ceiling and floor.		Mr. Amitabha Sarkar		
III	The households: The theory of consumer behaviour, cardinal and ordinal utility, Indifference curve and its properties, consumption decision, budget constraint, consumption income and price change, consumers optimal choice, income and substitution effect, compensated and uncompensated demand curves, Price consumption and income consumption curves, Engel curve, choice between leisure and consumption.		Mr. Amitabha Sarkar		

	The Firm and perfect completion: The legal forms of firm, profit maximization hypothesis, contractual and organizational theories of firm, short run and long run.			
IV	The imperfect market structure: Monopoly and antitrust policy, monopoly power, government policies towards competition, various types of imperfect completion. Input Markets: Rent-Ricardo, Marshall, and modern theory of rent, land and labour markets, marginal productivity theory, labour market and public policy.		Mr. Amitabha Sarkar	
UNITS	**PAPER: CC-2: Mathematical methods in Economics-1**	75		
I	Login and proof techniques, sets and operations, relations, functions, number systems, convex sets, functions and convex functions, quasi convex functions, limit continuity.		Syed Saddam Ali	
II	Functions of one real variable: continuous functions of different types, quadratic, polynomial, power, exponential, logarithms, derivatives of first and second order, convex concave and linear functions, economic applications.		Syed Saddam Ali	

	Single variable optimization: local and global optima, geometric characterization, characterization using calculus, applications in economics, profit maximization and minimization.			
III	Integrations of functions: Integrations of different types of functions, methods of substitution by parts, Applications in economics. Difference equation: finite difference, equations of first and second orders, Cobweb model.		Syed Saddam Ali	
IV	Probability: sample space events, probability axioms and properties, conditional probability, Bayes rule, random variable and probability distribution- discrete and continuous, expectation.		Syed Saddam Ali	
UNITS	**PAPER: GE-1: Introductory Microeconomics.**	75		
I	Exploring the subject matter of economics: Why Study Economics? Nature and Scope, Thinking like an economist, what to produce, how to produce, production possibility curve, marginal benefit and marginal costs, competitive model, property rights, incentives information, rationing, working with graphs.		Mr. Amitabha Sarkar	
II	Supply and demand: markets and competition, individual demand and supply, market demand and supply, demand and supply together, how prices		Mr. Amitabha Sarkar	

	allocate resources, elasticity and its application, taxes and costs of taxation, consumer and producer surplus, efficiency of market. The households:, Indifference curve and its properties, consumption decision, budget constraint, consumption income and price change, consumers optimal choice, income and substitution effect, compensated and uncompensated demand curves, Price consumption and income consumption curves, Engel curve, choice between leisure and consumption			
III	The firm and perfect market structure: Behaviour of profit maximization firm, short run costs and output decisions in the short and long run. Imperfect market structure: monopoly and antitrust policies, government policies towards competition, imperfect competition.		Syed Saddam Ali	
IV	Input market: labour and land markets, derived demand, marginal productivity theory, marginal revenue product, competitive labour market, public policy.		Syed Saddam Ali	

Teaching Plan: Department of Economics: SEMESTER-II(HONOURS)

UNITS	PAPER: CC-3 : Introductory Macroeconomics	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal examination
I	Macroeconomic data- National Income accounting and cost of living; Concept of Growth- role of savings, investment, and financial intermediation; Open Economy- Balance ofPayments, exchange rates, and capital flow; Concept of unemployment- Types and their characteristics; Growth accounting and Solow residual.	75	Amitabha Sarkar	01/04/2022 to 09/07/2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
II	Monetary system- definitions of money and determinants of money supply – money multiplier and central bank's role in controlling money supply; quantity theory of money; inflation and its costs.		Amitabha Sarkar		
III	Theory of aggregate demand- components and their interrelations - crowing out- Factors causing shift in the function; Theory of aggregate supply- determinants of supply and shift factors; Interaction of aggregate demand and supply.		Amitabha Sarkar		
UNITS	**PAPER: CC-4: Mathematical Methods in Economics-II**	75	Syed Saddam Ali		

I	Matrix: its elementary operations; different types of matrix; Rank of a matrix; Determinants and inverse of a square matrix; solution of system of linear equations; Eigen values and Eigen vectors. System of nonlinear equations- Jacobian determinant and existence of solution.		Syed Saddam Ali	
II	Continuous and differentiable functions: partial derivatives and Hessian matrix. Homogeneous and homothetic functions. Euler's theorem, implicit function theorem andits application to comparative statics problems. Economic applications- theories of consumer behaviour and theory of production.		Syed Saddam Ali	
III	Optimization of nonlinear functions: Convex, concave, and quasi-concave functions; Unconstrained optimization; Constrained optimization with equality constraints- Lagrangian multiplier method; role of Hessian determinant; Inequality constraints and Kuhn-Tucker Conditions; Value function and Envelope theorem; Economic applications – consumer behaviour and theory of production. Optimization of linear function: Linear programming; concept of slack and surplus		Syed Saddam Ali	

	variables (graphical solution only) concept of convex set.				
IV	Solution of Differential equations of first order and second order; Economic application- price dynamics in a single market- multimarket supply demand model with two independent markets. Qualitative graphic solution to 2x2 linear simultaneous differential equation system- phase diagram, fixed point and stability.		Syed Saddam Ali		
UNITS	**PAPER: GE-2: Introductory Macroeconomics**	75			
I	Basic issues studied in macroeconomics; measurement of gross domestic product; income, expenditure and the circular flow; real versus nominal GDP; price indices; national income accounting for an open economy; balance of payments: current and capital accounts		Amitabha Sarkar		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022

II	Functions of money; quantity theory of money; determination of money supply anddemand; credit creation; tools of monetary policy.		Syed Saddam Ali		
III	Inflation and its social costs; hyperinflation. Classical and Keynesian systems; simple Keynesian model of income determination; IS-LM model; fiscal and monetary multipliers.		Syed Saddam Ali		
Teaching Plan: Department of Economics: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC-5: : Intermediate Microeconomics – I**	75	Amitabha Sarkar	01/10/2021 to 05/02/2022	1st internal 4th week of November,2021 & 2nd Internal 1st week of January, 2022
I	Cardinal utility; Preference: ordering and properties of ordinal utility; existence of utility functions, different utility functions				

	and their properties, compensating and equivalent variation, Slutsky equation; consumption-leisure choice and labour supply; choice under uncertainty (expected utility and risk aversion), inter- temporal choice and savings decision; revealed preference approach.			
II	Technology- general concept of production function; returns to factor and returns to scale, isoquants and diminishing rate of factor substitution – elasticity of substitution –some examples of technology (fixed proportion, perfect substitute, Cobb– Douglas Production Function, CES Production Function), General concept of homogenous and homothetic production function and their properties; production with one and more variable inputs; isocost line and firms equilibrium and expansion paths; short run and long run costs; cost curves in the short run and long run; relation between short run and long run costs.		Amitabha Sarkar	

III	Short run and long run equilibrium; determination of the supply curve of the firm and the industry: with reference to external economies and diseconomies of scale.		Amitabha Sarkar	
IV	Derived demand for input, marginal product and marginal revenue product, input demand for competitive firm and competitive industry, returns to scale and product exhaustion.		Amitabha Sarkar	
UNITS	**PAPER: CC-6: Intermediate Macroeconomics – I**	75		
I	Simple Keynesian System: Multipliers; equilibrium in both closed and open economy and stability; autonomous expenditure, balanced budget, and net exports; paradox of thrift. IS-LM Model - equilibrium,		Amitabha Sarkar	

	stability and comparative statics; effects of fiscal and monetary policies, real balance effects; IS-LM in the open economy under fixed and flexible exchange rate with perfect and imperfect capital mobility (Mundell-Fleming model).			
II	Derivation of aggregate demand assuming price flexibility; Derivation of aggregate supply curves both in the presence and absence of wage rigidity; equilibrium, stability, and comparative statics-effects of monetary and fiscal policies; Unemployment and its causes-possible solutions, including real balance effect and wage cut policy.		Amitabha Sarkar	
III	Inflation and unemployment trade-off- Short run and long- run Phillips curve under adaptive expectations-outcome under rational expectations (non-rigorous).		Amitabha Sarkar	
UNITS	**PAPER: CC-7 Statistical Methods for Economics**	75		

I	Presentation of Data; Frequency Distribution; Measures of central tendency, Dispersion, Moments, Skewness and Kurtosis; Bivariate Frequency Distribution-correlation and regression.		Syed Saddam Ali	
II	Discrete distribution-Binomial, Poisson; Continuous Distributions-Uniform, Normal, Exponential (Properties of each distribution; mean and variance).		Syed Saddam Ali	
III	Density function of Bivariate normal distribution and obtaining means, variances, and correlation coefficients.		Syed Saddam Ali	
IV	Concept of sampling and random sampling. Principal steps in a sample survey; methods of sampling;-SRSWR, SRSWOR, Stratified sampling. Sampling vs non-sampling error.		Syed Saddam Ali	
V	Price and quantity index number; Different formula; Tests for an ideal index application-Cost of		Syed Saddam Ali	

	living index; Real GDP			
VI	Parameters and statistics; Point estimation-Properties of a good estimator; Maximum Likelihood Method and the method of moments; Estimation of population parameters using SRSWR and SRSWOR; Interval estimation.		Syed Saddam Ali	
UNITS	**PAPER: SEC-1: Data Analysis**	50		
I	Sources of data. Population census versus sample surveys. Random sampling. Frequency distribution and summary Statistics.		Amitabha Sarkar	
II	Analysis of Indian Data: Economic Survey, RBI Bulletin on currency and finance, ASIDATA, Foreign Trade Statistics, NSS Consumer surveys.		Amitabha Sarkar	
UNITS	**GE3: Environmental Economics**	75		
I	Key environmental issues and		Amitabha Sarkar	

	problems, economic way of thinking about these problems, basic concepts from economics; Pareto optimality and market failure in the presence of externalities; property rights and other approaches.				
II	Overview, Pigouvian taxes and effluent fees, tradable permits, implementation of environmental policies in India and international experience; transboundary environmental problems; economics of climate change.		Amitabha Sarkar		
III	Valuation of non-market goods and services--theory and practice; measurement methods; cost-benefit analysis of environmental policies and regulations.		Syed Saddam Ali		
IV	Concepts; measurement, perspectives from Indian experience		Syed Saddam Ali		

Teaching Plan: Department of Economics: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC-8: Intermediate Microeconomics – II**	75		15/03/2022 to 25/06/2022	Internal examination
I	Exchange Economy, Consumption Allocation and Pareto Optimality; Edgeworth box and contract curve; Equilibrium and efficiency under pure exchange. Pareto efficiency with production: concepts of PPF, SIC, and resource allocation; Perfect competition, Pareto efficiency and market failure (externalities and publicgood); property right and Coase Theorem.		Amitabha Sarkar		**4th week of April,2022 &3rd week of June,2022**
II	Monopoly; pricing with market power; degree of monopoly; price discrimination-different degrees; multiplant monopoly; peak-load pricing; two-part tariff; monopolistic competition. Oligopoly and game theory (Cooperative and Non-cooperative static games; simultaneous move and sequential move		Amitabha Sarkar		

	games; non- cooperative games of perfect information; the Prisoner's dilemma, Nash equilibrium in pure and mixed strategies; Backward induction solutions and SPNE); Applications of game theory in oligopolistic markets (Cournot Equilibrium, Bertrand Equilibrium, Stackleberg Equiibrium) ; concept of collusion and cartels; Solution by backward induction.			
III	Monopsony, bilateral monopoly in labour market; Externalities; public goods and marketswith asymmetric information.		Amitabha Sarkar	
UNITS	**PAPER: CC-9: Intermediate Macroeconomics – II**	75		
I	Classical System: Say's law and quantity theory; Friedman's restatement; classical dichotomy and neutrality of money; Keynesian vs classical system; basic tenets of New Classical and New Keynesian System.		Amitabha Sarkar	
II	Consumption: Keynesian consumption function; Fisher's theory of optimal intertemporal choice; life-cycle and permanent		Amitabha Sarkar	

	income hypotheses; Dusenberry's relative income hypothesis; rational expectations and random-walk of consumption expenditure. Investment: MEC and MEI- Jorgenson's neo-classical theory- Acceleration principle-fixed and variable. Demand for money: Regressive expectations and Tobin's portfolio choice models; Baumol's inventory theoretic money demand			
III	Government debt and Ricardian equivalence; high-powered money; money multiplier analysis; monetary policy – OMO, Bank rate, variable reserve ratio, repo and reverse repo.		Amitabha Sarkar	
IV	Harrod- Domar model and Solow one sector growth models; golden rule; dynamic efficiency, technological progress and elements of endogenous growth theory.		Amitabha Sarkar	
UNITS	**PAPER: CC-10: Introductory Econometrics**	75		
I	Definition and Scope of Econometrics; Importance of Error Term. Sampling Distributions- χ^2 , t- and F-distributions and their application in testing of hypothesis; Defining hypothesis; Distribution of test-statistics; testing hypotheses relatedto population parameters; Type I and Type II		Syed Saddam Ali	

	errors; power of a test.			
II	The model and the role of disturbance term ; Estimation of model by method of ordinary least squares (OLS);Gauss-Markov theorem, Reverse Regression, properties of estimators; goodness of fit; testing of hypotheses and confidence intervals; scaling and units of measurement; prediction and forecasting, Problems in OLS Method		Syed Saddam Ali	
III	Problems of Multi-collinearity, Heteroscedasticity**,** and Auto correlation; Consequences of applying OLS under Heteroscedasticity and Autocorrelation and their detection– Durbin- Watson Test, Glesjer Test, Goldfeld-Quandt Test.		Syed Saddam Ali	
IV	Omission of a relevant variable; inclusion of an irrelevant variable; tests of specification errors.		Syed Saddam Ali	
UNITS	**PAPER: SEC-2: Research Methodology**	50		
I	Understanding the nature of Research Formulating the research topic Review of literature Using Secondary data		Syed Saddam Ali	

	Using Primary data- collecting data through observations/ interviews/ questionnaire				
II	Using Secondary data Using Primary data- collecting data through observations/ interviews/ questionnaire		Syed Saddam Ali		
III	Writing Project Report – Referencing Styles Sample Selection Model		Syed Saddam Ali		
UNITS	**PAPER: GE-4: Public Finance**	75			
I	Overview of Fiscal Functions, Tools of Normative Analysis, Pareto Efficiency,Equity and the Social Welfare. Market Failure, Public Good and Externalities. Elementary Theories of Product and Factor Taxation (Excess Burden andIncidence).		Amitabha Sarkar		
II	Overview of Fiscal Functions, Tools of Normative Analysis, Pareto Efficiency,Equity and the Social Welfare. Market Failure, Public Good and Externalities. Elementary Theories of Product and Factor Taxation (Excess Burden andIncidence).		Amitabha Sarkar		

Teaching Plan: Department of Economics: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC-11: International Economics**	75		14/09/2021 to 18/01/2022	Internal examination
I	Arbitrage as basis and direction of trade; fundamental sources of cross-country price differences and arbitrage; concept of comparative advantage; externalities, regulation and perverse comparative advantage; International equilibrium; offer curves, ToT and stability; Gains from Trade (GFT) Theorem; Concepts of Production possibility Frontier and Community Indifference curves; Illustration of GFT; Decomposition of GFT; Substitution possibilities and magnitude of GFT.		Amitabha Sarkar		**1st week of November, 2021 &4th week of December,2021**
II	Comparative versus Absolute Advantage, One-factor economy, production possibility frontier, relative demand and relative supply, terms of trade; Trade in Ricardian world, Determination of intermediate ToT, Complete specialization & GFT		Amitabha Sarkar		

III	H-O theorem and physical vs. price definitions of factor abundance; Properties of the HO model: Factor intensity ranking, one-to-one correspondence between commodity priceratio & factor price ratio (Stolper-Samuelson theorem), One to one correspondence between endowment ratio and production proportion (Rybczysky's theorem); Proof ofHO theorem; Taste bias and invalidation of HO theorem; Empirical studies- Leontief Paradox; Effects of trade on factor price and income distribution, factor price equalization,factor intensity reversal & factor price equalization. Partial Equilibrium Analysis: Tariff - cost–benefit, Quota, Quota- Tariff equivalence & non-equivalence, effects of tariff, quota, subsidy and voluntary export restraint; General Equilibrium Analysis- distinction between large and small economy, welfare effects of a tariff on small country and large country, Offer curve and ToT, Tariff ridden offer curve, Tariff war, Optimum tariff for large economy, Metzler's Paradox.		Amitabha Sarkar	
IV	Balance of Payment accounts in an open economy; Determination of National Income, Transfer problem, Introduction of foreign Country & repercussion effect - open economy multiplier with & without repercussion effect; Fixed		Amitabha Sarkar	

	&Flexible Exchange Rate:adjustment of demand and supply of Foreign Exchange, Effect of devaluation, Effects of exchange rate on domestic prices and ToT, Marshall-Lerner Condition, J-Curve effect.			
UNITS	**PAPER: CC-12: Public Economics**	75		
I	Definition and Scope of Public Economics; Externalities, Market Failure andGovernment Intervention; Coase Theorem; Public Expenditure to finance Development		Amitabha Sarkar	
II	Overview of Public Good; Characteristics of Pure Public Good; Distinction between Pure Public Good and Private Good; Market Failure in case of Pure Public Good; Optimal provision of Public Goods; Private Provision and Public Provision of Public Goods; Lindahl Equilibrium, Voting Equilibrium.		Amitabha Sarkar	
III	Classification of Taxes; Canons of Taxation; Benefit Principle; Equal Sacrifice Principle; Ability to Pay Principle; Incidence and Burden of Taxes; Effects of taxation on income distribution, work efforts, and on savings; the Laffer curve; Optimal Taxation		Amitabha Sarkar	

IV	Meaning and Classification of Public Expenditure; government budget and its types; government expenditure and tax multipliers, balanced budget multiplier; Fiscal Federalismin India; Meaning of Public Debt; Sources of Public Borrowings: internal and external borrowing; Effects of Public Debt.		Amitabha Sarkar	
UNITS	**PAPER: DSE -1 Economics of Health and Education**	75		
I	Importance in poverty alleviation; health and education outcomes and their relationship with macroeconomic performance Demand for health; uncertainty and health insurance market; alternative insurance mechanisms; market failure and rationale for public intervention; equity and inequality.		Syed Saddam Ali	
II	Costing, cost effectiveness and cost-benefit analysis; burden of disease. Health outcomes; health systems; health financing.		Syed Saddam Ali	
III	Rate of return to education: private and social; quality of education; signaling or human capital; theories of discrimination; gender and caste discrimination in India.		Syed Saddam Ali	

	Literacy rates, school participation, school quality measures.			
UNITS	**Paper DSE-2: Money and Financial Markets**	75	Syed Saddam Ali	
I	Concept, functions, measurement; theories of money supply determination. Role of financial markets and institutions; problem of asymmetric information –adverse selection and moral hazard; financial crises. Money and capital markets: organization, structure and reforms in India; role offinancial derivatives and other innovations.		Syed Saddam Ali	
II	Determination; sources of interest rate differentials; theories of term structure of interestrates; interest rates in India.		Syed Saddam Ali	

III	Balance sheet and portfolio management; Multiple Deposit Creation,Determinants of the Money Supply. Indian banking system: Changing role and structure; banking sector reforms.		Syed Saddam Ali		
IV	Functions, balance sheet;goals, targets, indicators and instruments of monetary control;monetary management in an open economy; current monetary policy of India.		Syed Saddam Ali		
Teaching Plan: Department of Economics: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC-13: Indian Economy**	75		21/02/2022 to 10/06/2022	
I	Major features of the economy at independence; Planning: Evolution of India's development goals and strategies -Structural constraints and Indian development strategy: Debates between Growth and distribution, Public sector vs. Private sector, Consumer goods vs. Capital goods, Import substitution vs. Export promotion ; growth and development under different policy regimes—goals, constraints, institutions and		Amitabha Sarkar		**1st week of April,2022 & 1st week of June,2022**

	policy framework; an assessment of performance—sustainability and regional contrasts; structural changes, savings and investment including the saving-investment paradox.				
II	Demographic trends and issues; education; health and malnutrition		Amitabha Sarkar		
III	Trends and policies in poverty including Sen's Entitlement Analysis; inequality and unemployment.		Amitabha Sarkar		
IV	Monetary, Fiscal, and Trade Policy Reforms**.**		Amitabha Sarkar		
UNITS	**PAPER: CC-14: Development Economics**	75			
I	Income Approach and Capability Approach, construction and interpretation of HDI; international variations in development measures; comparing development trajectories across nations and within them. Dependency school of development.		Amitabha Sarkar		
II	An overview and policy implications of one sector growth models- Harrod- Domar, and		Amitabha Sarkar		

	Solow; Sources of economic growth, international comparisons. Inequality axioms; a comparison of commonly used inequality measures; Gender Inequality, connections between inequality and development; poverty measurement, HPI;poverty traps and path dependence of growth processes			
II	Definition of institutions, Evolution of Political and Economic Institutions; The determinants of democracy; alternative institutional trajectories and their relationship with economic performance; within-country differences in the functioning of state institutions; state ownership and regulation; government failures and corruption.		Amitabha Sarkar	
UNITS	**PAPER: DSE -3: Environmental Economics**	75		
I	What is environmental economics; review of microeconomics and welfare economics. Pareto optimality and market failure in the presence of externalities; property rights andthe coase theorem		Syed Saddam Ali	
II	Overview; pigouvian taxes and effluent fees; tradable permits; choice between taxes and quotas under uncertainty; implementation of environmental policy.		Syed Saddam Ali	

	Trans-boundary environmental problems; economics of climate change; trade and environment			
III	Non-Market values and measurement methods; risk assessment and perception. Concepts; measurement		Syed Saddam Ali	
UNITS	**PAPER: DSE-4: Project Work**	75		
I	Sources of data. Population census versus sample surveys. Random sampling. Frequency distribution and summary Statistics.		Syed Saddam Ali	
II	Analysis of Indian Data: Economic Survey, RBI Bulletin on currency and finance, ASI DATA, Foreign Trade Statistics, NSS Consumer surveys.		Syed Saddam Ali	

Teaching Plan: Department of Economics: SEMESTER-I(GENERAL)

UNITS	PAPER: DSC-1A/2A/3A DSC-1A (CC-1): Microeconomics	75		01/10/2021 to 24/02/2022	
I	Elasticity of Demand – price and income elasticity, cross price elasticity ofdemand, Measurement of price elasticity		Mr. Syed Saddam Ali		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
II	Production Function: AP, MP and their derivation from TP Curve, Returns to Factor and Returns to Scale. Cost of Production: Real cost and Opportunity cost – Fixed and Variable cost. Shape of cost curves -- short run and long run. Relation between Average cost and Marginal cost. Total Revenue, Marginal Revenue and Average Revenue – Relation between TR, AR and MR curves. Relation between AR, MR and Price elasticity of Demand		Mr. Syed Saddam Ali		
III	Perfect competition, Monopoly, Monopolistic Competition, Oligopoly andDuopoly (concepts only). Short run and Long run equilibrium of firm and industry under Perfectcompetition, Price discrimination. Price and Output determination under Monopoly.		Mr. Amitabha Sarkar		

IV	Marginal Productivity Theory of Distribution, Factor price determination. Rent: Ricardian Theory and Modern Theory. Wage: Distinction between Money and Real wage – Factors determining Realwage – Role of Trade Unions in wage determination under competitive set up. Interest: Real and money Interest – Loanable fund and Liquidity PreferenceTheory of Interest. Profit: Alternative Theories of Profit Graphical presentation of Pareto optimality		Mr. Amitabha Sarkar		
Teaching Plan: Department of Economics: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B/3B** D**SC-1B (CC-2): Macroeconomics**	75		01/04/2022 to 09/07/2022	
I	Definition, concepts and measurement of GNP, NNP, GDP, NDP, NI, DI, GNPdeflator, GDP deflator and price indices. parabolic and hyperbolic through illustrations only.		Mr. Syed Saddam Ali		1st internal examination on 2nd week of May, 2022 and 2nd internal

	Different methods of measuring national income – product method, income methodand expenditure method. Problems of using national income as a measure of Economic welfare. Problems of measuring national income in any country Circular flow of income – equilibrium condition – concepts of injection, withdrawaletc.		Mr. Amitabha Sarkar		examination on 2nd week of July,2022
II	Motives of holding money – Transactions, Precautionary and Speculative motives. Keynesian liquidity preference theory – indeterminacy of rate of interest in theliquidity preference theory – the liquidity trap. Supply of money – Different sources of money supply – M1, M2, M3, and M4 –functions of money		Mr. Syed Saddam Ali		
III	Concept of effective demand – Keynesian consumption function, relation between average propensity to consume and marginal propensity to consume – Simple Keynesian static multiplier theory – investment		Mr. Amitabha Sarkar		
IV	IS – LM model- construction of IS and LM curves – shapes – determination of equilibrium values of rate		Mr. Syed Saddam Ali		

	of interest and level of income.				
V	The Classical view of macroeconomics in respect of the determination of employment,output and prices – Say's law of market.. The Classical quantity theory of money and its criticisms – Fischer's transactionversion - Cambridge cash balance version		Mr. Amitabha Sarkar		
VI	Concept of inflation - Demand pull inflation and cost push inflation – comparisonbetween them. Inflationary gap – Limitations of it. Consequences of inflation – measures to control inflation		Mr. Amitabha Sarkar		
VII	Functions of Commercial Banks Functions of Central Bank Credit creation by Commercial Banks – credit creation multiplier. Credit control by Central Bank – Different methods of credit control.		Mr. Syed Saddam Ali		
Teaching Plan: Department of Economics: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C** **DSC-1C (CC-3): Development Economics**	75		01/10/2021-05/02/2022	**4th week of November,2021**

I	Distinction between Economic Growth and Economic Development. Net National Income and Per Capita Income as Growth Indicators construction and interpretation of HDI; international variations in development measures; comparing development trajectories across nations and within them, Dependency school of development.		Mr. Amitabha Sarkar		**&1st Week of January,2022**
II	An overview and policy implications of one sector growth models- Harrod- Domar, and Solow; Sources of economic growth, international comparisons, Development Planning andits necessity–balanced vs. Unbalanced Growth		Mr. Amitabha Sarkar		
III	Inequality axioms; a comparison of commonly used inequality measures; Gender Inequality – Gender Development Index, connections between inequality and development; poverty measurement, HPI; poverty traps and path dependence of growth processes.		Mr. Syed Saddam Ali		
IV	Definition of institutions, Evolution of Political and Economic Institutions; The determinants of democracy; alternative institutional trajectories and their relationship with economic performance; within-country differences in the functioning of state institutions; stateownership and regulation; government failures and corruption.		Mr. Syed Saddam Ali		
V	Different forms, Their Roles in Economic Development		Mr. Syed Saddam Ali		

UNITS	**PAPER: SEC-1: Indian Financial System**	50		
I	Basic Concepts of Call money market, Commercial Bills market, Treasury Bills market, Short-Term loan market, Features and objectives of Money Market, Features of Developed Money Market		Mr. Amitabha Sarkar	
II	Nature and function of Central Bank and the money supply-different concept ofmoney supply and their uses-credit creation and credit multiplier-theories of asset management- Role of commercial banks in development Central Bank's functions- Central Bank and money market– Techniques of management-bank rate policy, open market operations and variable reserve ratio and selective instruments of credit control.		Mr. Syed Saddam Ali	
III	Distinction between commercial banks and NBFIs- validity of the distinction-Central bank's control over the NBFIs.		Mr. Syed Saddam Ali	

IV	Basic Concept of organized and unorganized Capital Market Distinction betweenPrimary Market and Secondary market. Differences between Share and Bond		Mr. Amitabha Sarkar		
V	Stock Exchanges in India–national and regional, Market Players, types of tradedinstruments, Trading–floor based and screen based, Stock Indices, Credit rating and Credit rating agencies.		Mr. Amitabha Sarkar		
VI	Role and Functions of Regulatory Authorities Securities and Exchange Board of India (SEBI)		Mr. Syed Saddam Ali		
Teaching Plan: Department of Economics: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3D** **DSC1DT(CC-4): Features of Indian Economy**	75		15/03/2022 to 25/06/2022	**4th week of April,2022 &3rd week of June,2022**
I	Sectoral distribution of National Income and its change since inception of Planning. Occupational pattern in India-A trend analysis since 1901. Inequalities in Income distribution.		Mr. Amitabha Sarkar		

	Economic reforms and reduction of poverty; Poverty eradication programmes andtheir effectiveness. Structure and quality if employment in India; Government undertaken differentschemes to reduce unemployment and underemployment.			
II	Size and growth rate of population in India. Changes in sex composition since inception of planning. Population policy and population projections for India.		Mr. Amitabha Sarkar	
II	Causes for low productivity. Targeted public distribution system. New agricultural policy; Green revolution and its prospects. Land reforms and its appraisal. Effects of GATT on Indian Agriculture.		Mr. Syed Saddam Ali	
IV	Review of Industrial growth under planning.		Mr. Amitabha Sarkar	

	Role of small-scale industries and policy perspective to help them. Role of trade union and social security measures in India.				
V	Role of Indian Commercial Banks and Reserve Bank of India. Monetary Policy of the Reserve Bank of India. Profitability of banks in India. Call money market, Repo, reverse repo rate, TBs, CDs.		Mr. Syed Saddam Ali		
VI	Sources of Revenue and Expenditure of Union and State Government. Union-State Financial Relation. Centre-State Conflict on Finances. Volume and direction of India's foreign trade in the post-Liberalization period		Mr. Syed Saddam Ali		
UNITS	**SEC2: Practical**	50			
I	File Creation and Management System Word Processing Excel/Spreadsheet for Economic Analysis of Data Graphical Representation of Data Sets Using Spreadsheet / Excel for Calculation of Descriptive Statistics Presentations		Mr. Syed Saddam Ali		

Teaching Plan: Department of Economics: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A** **DSE1T: Money & Banking**	75		14/09/2021 to 18/01/2022	**1st week of November, 2021 &4th week of December,2021**
I	Definition of Money – Kinds of Money: Fiduciary/ Debt/ Credit Money – Coins, Paper Currency & Deposit Money - Legal Tender or Fiat Money and Non-legal Tender or Credit Money Proper - Limited & Unlimited Legal Tender – e-Money & Plastic Money – Functions of Money – Money Vs. Near Money – Examples of Near Money - Value of Money – High-powered Money or Monetary Base - Measures of Money Supply.		Mr. Amitabha Sarkar		
II	Meaning & the Role/Functions of the Financial System - Constituents of the Financial System: Financial Assets/ Instruments; Financial Intermediaries/ Institutions; and Financial Markets Definition & Role of Financial Markets – Classification of Financial Markets: Money Market & Capital Market – Basic Distinction between Money Market & Capital Market Definition & Role of Financial Intermediaries – Classification of Financial Intermediaries: Banks and Non- Bank Financial Institutions (NBFIs)		Mr. Amitabha Sarkar		

	Financial Assets/Instruments: Distinction between Primary & Secondary Securities – Debt & Equity Instruments of Various Types – Bonds, Shares, Debentures etc. – Distinction between Bonds & Shares			
III	Features, Importance & Functions of the Money Market - Characteristics ofDeveloped and Underdeveloped Money Markets Components of Money Market: Call Money Market - Commercial Bill Market -Treasury Bill Market – Repo & Reverse Repo Markets.		Mr. Amitabha Sarkar	
IV	Features, Importance & Functions of the Capital Market - Characteristics ofDeveloped and Underdeveloped Capital Markets Components of Capital Market: Gilt-edged Market and the Industrial SecuritiesMarket – Distinction between Primary Market and Secondary Market Features, Role & Functions of Stock Market or Stock Exchange		Mr. Syed Saddam Ali	

V	Definition & Functions of Commercial Banks – Concepts of Primary & Derivative Deposits and the Process of Credit Creation by Commercial Banks – Role of Commercial Banks in Economic Development. Definition & Functions of Central Bank – Distinction between Central Bank & Commercial Bank & Monetary Policy: Definition, Goals, Targets, Indicators & Instruments of Monetary Policy – Various Types of Quantitative & Qualitative Instruments of Credit Control.		Mr. Syed Saddam Ali	
VI	Distinction Between Commercial Banks & NBFIs – Validity of the Distinction - Examples of NBFIs – Development Banks, Mutual Funds, Insurance Companies - Central Bank's Control Over NBFIs.		Mr. Syed Saddam Ali	
VII	Real & Nominal Interest Rates – Sources of Interest Rate Differentials – Meaning of Term Structure of Interest Rates - Theories of Term Structure of Interest Rates: The Expectations Theory – The Liquidity or Risk Premium Theory – The Market Segmentation Theory		Mr. Syed Saddam Ali	
UNITS	**PAPER: SEC-3: Research Methodology**	50		
I	Understanding the Nature of Research Formulation of the Research Topic		Mr. Syed Saddam Ali	

	Review of Literature				
II	Approaches to Research and Research Strategy Research Ethics Using Secondary Data Using Primary Data – Collecting Data through Observations/ Interviews/Questionnaire		Mr. Syed Saddam Ali		
III	Sample Selection Methods Analysing Data Writing Project Report - Referencing Styles		Mr. Syed Saddam Ali		
Teaching Plan: Department of Economics: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B** **DSE2T: Public Finance**	75		21/02/2022 to 10/06/2022	**1st week of April,2022 & 1st week of June,2022**
I	Overview of Fiscal Functions. Tool of Normative Analysis, Pareto Efficiency, Equityand Social Welfare		Mr. Amitabha Sarkar		
II	Characteristics; Exclusion Principle; Non-Applicability of exclusion Principle; MarketFailure and Externalities.		Mr. Syed Saddam Ali		

III	Benefit and Ability to Pay Approach-Direct and Indirect Taxation–Regressive, Progressive, Proportional Taxation. Public Debt- Internal and External-Burden ofDebt.		Mr. Amitabha Sarkar	
IV	Current Issues of India's Tax System Working of (Monetary and) Fiscal Policies Analysis of Budget and Deficits Fiscal Federalism in India State and Local Finance		Mr. Syed Saddam Ali	
UNITS	**PAPER: SEC-4: Data Analysis**	50		
I	Meaning of Statistical Data – Classification of Data - Variable & Attribute - Primary Data & Secondary Data - Methods of Collection of Data - Population & Sample - Complete Enumeration (Census) & Sample Survey- Random Sampling (Concept only). Tabulation & Diagrammatic Presentation of Data – Line, Bar & Pie Diagram. Frequency Distribution and its Diagrammatic Presentation: Construction of FrequencyDistribution		Mr. Syed Saddam Ali	

	(Simple & Grouped) –Histogram, Ogive & Frequency Polygon.				
II	Measures of Central Tendency – Mean, Median & Mode (Concepts & Formulae Only) Measures of Dispersion – Range, Mean Deviation, Standard Deviation, Co-efficient ofVariation (Concepts & Formulae Only) Concept of Simple Correlation & Regression		Mr. Syed Saddam Ali		
III	Economic Surveys – RBI Bulletins – Handbook of Statistics for the Indian Economy (RBI) – ASI Data – Census Data - Foreign Trade Statistics – NSS Data		Mr. Syed Saddam Ali		
Education					
UNITS	PAPER: CC1(Introduction to Education)	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
unit-1	Concept of Education: Narrow and border concept of Education Meaning, nature and scope of education. Aims of education- individual, social, vocational and	TOTAL-75	Sovan Arui	01-10-2021 to 24-02-2022	1st internal examination on 4th week of December, 2022 and 2nd

	democratic. Aims of modern education with special reference to Delor's Commission.				internal examination on 2nd week of March,2022
unit-2	Factors of Education child/learner: influence of heredity and environment on the learner Teacher: qualities and duties of a good teacher Curriculum: concept and types. Co-curricular activities: meaning, values and significance. Educational institutions: informal, formal and non-formal, their interrelation.		Pinki Mondal		
unit-3	Child Centricism and Play-way in Education · Concept of child centricism in education · Characteristics and significance of child centricism in education · Concept of play and work. · Characteristics of play way in Education, Kindergarten, Montessori, Project method.		Supriya Pramanik		
unit-4	Agencies of Education: ● Home ● School ● State ● Mass-media-television, radio, cinema and newspaper		Suman Kamila		
UNITS	PAPER: CC2(History of Indian Education)				

unit-1	Education in India during ancient and medieval period Vedic (aim, curriculum, teaching method, teacher-pupil relation) Brahmanic Buddhistic Islamic	TOTAL-75	Suman Kamila		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
unit-2	Education in India during British period (1800-1853) Serampore trio and their contribution in the field of Education. Charter Act, (Oriental-occidental controversy). Macaulay Minute and Bentinck's resolution. Adam's report		Sovan Arui		
unit-3	: Education in India during British period (1854-1946) Woods Despatch, Hunter Commission. Curzon policy regarding primary, secondary and higher education, National education movement (cause and effect). Basic education (concept and development). Sadler Commission		Supriya Pramanik		
unit-4	Education in India after independence Radhakrishnan Commission(aim,curriculum of higher education, rural university)Mudaliar Commission(aim,structure and curriculum of secondary education)Kothari Commission(aim,structure of primary and secondary education)National Policy of Education 1986,POA1992.		Pinki Mondal		
UNITS	PAPER: GE-1(Educational Psychology)				

unit-1	• Educational Psychology: Meaning, Nature and Scope • Relation between Education and Psychology • Methods of Educational Psychology	TOTAL-75	Sovan Arui		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
unit-2	Growth and Development: Meaning and Concepts Stages of Development of a Child: Infancy, Childhood and Adolescence. Aspects of Child Development: Physical, Intellectual, Emotional, Social		Suman Kamila		
unit-3	• Personality: Concept and Definition. • Development of Personality • Types and Traits Approaches to Personality • Individual Differences: Concept and Types • Causes of Individual Difference				
unit-4	Intelligence: Concept and Definition Theories of intelligence: two factor, Group-factor, Structure of intellect Intelligence test: Verbal, Non-Verbal test and their uses.		Pinki Mondal		
unit-5	• Learning: Meaning & Nature • Factors associated with learning.		Sovan Arui		

	• Theories of Learning: Trial & Error, Classical conditioning and Gestalt theory of learning. • Learning relation to; Attention, Interest, Maturation and Motivation.				

Teaching Plan: Department of Education: SEMESTER-II(HONOURS)

UNITS	**PAPER: CC3(Psychological Foundation Of Education)**				
unit-1	Relation between Psychology and Education Meaning and definition of Psychology. Meaning and definition of Education. Relation between Psychology and Education. Nature, Scope and significance of Educational Psychology.	TOTAL-75	Sovan Arui	01-04-2022 to 09-07-2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
unit-2	Stages and types of Human Development and their educational significance. Piaget cognitive development theory. Erikson's psycho-social development theory. Kohlberg's moral development theory. Vygotsky's Social development theory. Bandura's social learning theory.		Pinki Mondal		

unit-3	Learning: concept and theories Concept and characteristics of learning. Theories: Connectionism (Trial and error, classical, operant). Insightful learning. Memorization and Forgetting: Process of memorization, causes of forgetting and economical ways of improving memorization		Supriya Pramanik		
unit-4	**Intelligence** Concept of Intelligence. Theories of Spearman, Thorndike and Guilford. Types and uses of intelligence tests. Concept of Emotional Intelligence and E.Q.		Suman Kamila		
UNITS	**PAPER: CC4(Philosophical Foundation of Education)**				
unit-1	**Concept of educational philosophy** Meaning of philosophy. Etymological meaning of education. Relation between philosophy and education. Importance of philosophy in education	TOTAL-75	Supriya Pramanik		1st internal examination on 2nd week of May, 2022 and 2nd internal

unit-2	Indian school of Philosophy: Vedic school-Sankhya, Yoga, Non -vedic school -Buddhism, Jainism		Pinki Mondal		examination on 2nd week of July,2022
unit-3	Western Schools of philosophy: ● Idealism ● Naturalism ● Pragmatism ● Realism		Suman Kamila		
unit-4	Philosophy for the Development of Humanity. Education and development of values. Education for national integration. Education for international understanding. Education for promotion of peace and harmony.		Sovan Arui		
UNITS	**PAPER: GE-2(Psychology of Mental Health and Hygiene)**				
unit-1	➢ Mental Hygiene: Meaning and Concept. ➢ Mental Health: Meaning and Concept. ➢ Characteristics of Mental Health. ➢ Education and Mental Health & Hygiene.	TOTAL-75	Supriya Pamanik		1st internal examination on 2nd week of May, 2022

unit-2	● Adjustment: Concepts, Need, and Areas of Adjustment. ● Mechanism of Adjustment. ● Role of Family and School in effective Adjustment.		Suman Kamila		and 2nd internal examination on 2nd week of July,2022
unit-3	Maladjustment: Meaning and Definition. Causes of Maladjustment. Different forms of Maladjustment. Role of Family and school in remedial measures.		Sovan Arui		
Teaching Plan: Department of Education: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC5(Sociological Foundation of Education)**				
unit-1	**:** Introductory Concept of Sociology of Education Meaning and definition of Sociology of Education. Relation between Sociology and Education Nature of Sociology of Education. Scope of Sociology of Education	TOTAL-75	Supriya Pramanik	01-10-2021 to 05-02-2022	**4th week of November,2021 &**

unit-2	Social Groups Social Groups: meaning and definition. Types of Social groups - Primary, Secondary and Tertiary. Socialization Process: Concept. Role of the family and school in Socialization process		Sovan Arui		**1st Week of January,2022**
unit-3	Social Change and Education Concept of Social Change. Interrelation between Social Change and Education Social Stratification and Social Mobility.. Social Interaction Process		Suman Kamila		
unit-4	Social Communication in Education Social Communication: Concept. Informal agencies of social communication. Interrelation between Culture, religion, and Education. Inter relation between Technology, Economy and Education.		Pinki Mondal		
UNITS	**PAPER: CC6(Educational Organization, Management and Planning)**				

unit-1	Organization and Management Concept of Organization. Concept of Management. Concept of Educational Organization. Concept of school Management.	TOTAL-75	Pinki Mondal		
unit-2	Educational Organization: Meaning of School plant. Elements of school plant (concepts only). Features of library and time-table. Features of school medical services, workshop, and computer laboratory.		Suman Kamila		
unit-3	Educational Management Meaning of educational management. Objectives of educational management. Types of educational management. Significance of educational management		Supriya Pramanik		

unit-4	Educational Planning Meaning of Educational Planning. Aims and objectives of educational planning Steps of educational planning. Types and significance of Educational planning		Sovan Arui		
UNITS	**PAPER: CC7(Guidance and Counselling)**				
unit-1	**Guidance – Meaning, Functions, Need** 1. Guidance – Meaning, Definitions and Functions 2. Individual Guidance – Meaning, advantages and disadvantages 3. Group Guidance – Meaning and Advantages and disadvantages 4. Need for guidance in secondary schools and requisites of a good school guidance programme.	TOTAL-75	Supriya Pramanik		

unit-2	Guidance- Educational, Vocational, Perso 1. Educational Guidance- Meaning, Function and different stages of Education. 2. Vocational Guidance- Meaning, Function at different stages of Education 3. Personal Guidance- Meaning, Importance for the Adolescents.		Sovan Arui		
unit-3	Counselling- Meaning, Techniques, Types 1. Counselling-Meaning importance and Scope 2. Techniques of Counselling- Directive, Non-Directive, Eclectic Individual and Group Counselling- Meaning, Importance		Suman Kamila		
unit-4	Basic data necessary for Guidance Tools for collecting information on pupils: Intelligence Test, Personality Test, Aptitude Test. Cumulative Record Card Anecdotal Record Card		Pinki Mondal		
UNITS	**PAPER: SEC-1(Skill for Democratic citizenship)**				

unit-1	Rights and duties in Indian Constitution Democratic right Fundamental Rights Duties of Citizenship.	TOTAL-50			
unit-2	Protection of Children Child protection: concept, and need. Child Right -concept classification and need Legal actions- POSCO.		Sovan Arui		
unit-3	: Domestic Harmony Domestic violence – definition and types Protection of Women from Domestic Violence Act, 2005 – basic features Protection of males in DVA 2005		Supriya Pramanik		

unit-4	Role of Education: ● Awareness programmes- rallies, debates etc ● Mass media ● Seminars and workshops (any one may be taken up by the college and recorded by the students on any one of the above topics)		Suman Kamila		
UNITS	**PAPER: GE-3(Education of Children with Special Needs)**				
unit-1	Education of children with Visual Impairment :identification, intervention ,education, and prevention Hearing Impairment: identification, intervention, education and prevention.	TOTAL-75	Pinki Mondal		
unit-2	Education of Children with: Speech and Language Disorders: identification, intervention, education and prevention.		Supriya Pramanik		
unit-3	Education of Children with: Physically Handicraft: identification, intervention, education and prevention.		Sovan Arui		

unit-4	Education of Children with: Learning Disabilities: Identification, Intervention, education and prevention		Suman Kamila		
Teaching Plan: Department of Education: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC8(Technology in Education)**				**4th week of April,2022 &3rd week of June,2022**
unit-1	Introductory Concept ● Concept of Technology ● Need and scope of Educational Technology ● System approach- concept and need ● Classification and components of system approach.	TOTAL-75	Sovan Arui	15-03-2022 to 25-06-2022	
unit-2	Computer in education and communication Computer and its role in education Basic concept of hardware and software Computer network and internet- its role in education Communication and classroom interactions- concept, element and process		Supriya Pramanik		

unit-3	Instructional techniques ● Mass Instructional technique- characteristics and types ● Personalised instructional techniques- characteristics and types ● Difference in teaching and instruction ● Models of teaching- concept, components and significance		Suman Kamila		
unit-4	ICT & e-Learning Meaning and concept of ICT, e-learning Nature and characteristics of e-learning ICT integrated in teacher learning, massive open online course. Different approach- project based learning, cooperative learning collaborative learning.		Pinki Mondal		
UNITS	**PAPER: CC9(Curriculum Studies)**				

unit-1	**Introductory concept** ● Meaning, nature, scope and functions of curriculum ● Bases of curriculum: philosophical, psychological and sociological ● major approaches to curriculum- behavioural, managerial, system, humanistic ● Types of curriculum- knowledge, experience & activity based. ● Meaning, nature, scope and functions of curriculum ● Bases of curriculum: philosophical, psychological and sociological ● major approaches to curriculum- behavioural, managerial, system, humanistic ● Types of curriculum- knowledge, experience & activity based.	TOTAL-75	Sovan Arui		
unit-2	**Content Selection** ● Determinants of content selection- perspectives of knowledge, culture & need ● Curriculum and institution- instructional objectives ● Revised Bloom's taxonomy ● Bruner's theory of instruction		Suman Kamila		

unit-3	: Curriculum development Principles of curriculum construction Learner centred curriculum framework - concept, factors & characteristics Curriculum development - need, planning NCF, 2005		Supriya Pramanik		
unit-4	Evaluation & Reform of Curriculum Concept & significance of curriculum evaluation. Approach to curriculum evaluation -formative & summative Models of evaluation – shuffle beam & Taylor Curriculum reform-factors & obstacles		Pinki MONDAL		
UNITS	**PAPER: CC10 (Inclusive Education)**				

unit-1	Inclusive Overview: ➢ Meaning of Inclusion and Inclusive Society ➢ Exclusion and Inclusion: Conceptual overview ➢ Obstacles/ barriers in Inclusion ➢ Elements necessary for Creating an inclusive Society.	Full Marks- 75	Supriya Pramanik		
unit-2	Differently Abled: ➢ Concept of Impairment, Disablity and Handicap ➢ Types of disabilities- Orthopaedic, Visual, Auditory, Cerebral Palsy, Intellectual, Autism, Learning Disability (Only definition and their specific problems) ➢ General Causes of disabilities ➢ Role of school and society in creating a barrier free environment		Pinki Mondal		

unit-3	Socially Disabled: ➢ Concept of SC, ST and OBC groups ➢ Concept of Gender, and sexuality ➢ Causes of social exclusion ➢ Understanding social inclusion: role of education		Sovan Arui		
unit-4	Educational Reforms for Inclusive Society: ➢ Building an Inclusive school: desired changes in System, Structure, Practice and Culture, ➢ Education for a multicultural society. ➢ Education for peaceful co-existence ➢ Role of Informal agencies (like mass media etc) in building an inclusive society.		Suman Kamila		
UNITS	**PAPER: SEC-2(Special Education)**				
unit-1	Education of Children with Visual Impairment Hearing Impairment(identification ,intervention, education and prevention of each category)	Full Marks- 75	Pinki Mondal		

unit-2	● education of Children with ● Speech and Language Disorders and ● Learning Disabilities (With special reference to prevalence, etiology, identification, intervention, education and prevention of each category)		Sovan Arui		
unit-3	Educational Reforms for Inclusive Society: ● Building an Inclusive school: desired changes in System, Structure, Practice and Culture, ● Education for a multicultural society. ● Education for peaceful co-existence ● Role of Informal agencies (like mass media etc) in building an inclusive society.		Suman Kamila		
UNITS	**PAPER: GE-4(Mental Health Education)**				
unit-1	**Mental Health:** ➢ Concept and Importance of Mental Health ➢ Characteristics of Mental Health ➢ Factors Affecting Mental Health ➢ Educational Implications of Mental Health	Full Marks- 75	Supriya Pramanik		

unit-2	**Mental Hygiene:** ● Definition, Meaning and Aims of Mental Hygiene; ● Origin and Development of Mental Hygiene Movement		Sovan Arui		
unit-3	**Adjustment:** ● Definition and meaning of Adjustment ● Criteria of Good Adjustment ● Defence Mechanism- Definition, meaning and different methods of Defence Mechanism.		Suman Kamila		
unit-4	Maladjustment Meaning, causes of Maladjustment. Role of education.		Pinki Mondal		
Teaching Plan: Department of Education SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC11(Measurement and Evaluation in Education)**				**1st week of November,**

unit-1	Measurement and Evaluation in Education Concept, Scope and Need of Educational Measurement and Evaluation, Relation between Measurement, Assessment and Evaluation Scales of Measurement	Full Marks- 75	Pinki Mondal	14-09-2021 to 18-01-2022	**2021 &4th week of December,2021**
unit-2	Evaluation Process: ● Evaluation Process: (Formative and Summative) ● Types and steps of evaluation ● Norm-Referenced Test and Criterion Referenced Test ● Grading and Credit system.		Suman Kamila		

unit-3	Tools and Techniques of Evaluation 1. Concept of Tools and Techniques 2. Testing tools i. Educational : Essay type and Objective type, Written , Oral, and Practical ii. Psychological: Personality Test- Types, Rorschach Ink Blot Test , Interest Test- Types ,Kuder Richardson interest inventory, Intelligence Test - Types of intelligence tests , Standford – Binet Scale, 3. Non testing tools – Cumulative Record Card, Portfolio 4. Techniques: i) Self reporting : Interview , Questionnaire ii) Observation.		Supriya Pramanik		

unit-4	**Criteria of a Good Tool and its Construction** ● Characteristics of a good tool ○ Objectivity - Concept ○ Reliability- Concept, methods of determining reliability ○ Validity- Concept and types ○ Norms- Meaning & types ○ Usability- Concept ● Steps for construction & standardization of Achievement test		Sovan Arui		
UNITS	**PAPER: CC12(Statistics in Education)**				
unit-1	**Concept of Statistics and Descriptive Statistics** ● Concept of Statistics. Uses of Statistics in Education. ● Meaning & measures of Central Tendency- Arithmetic Mean, Median and Mode - their Properties, Calculation and Application. ● Meaning & measure ofVariability- Range, Standard Deviation and Quartile Deviation- their Properties, Calculation and Application. Percentile and Percentile Rank- Definition, Calculation, Application, Graphical Determination	Full Marks- 75	Sovan Arui		

Unit-2	Normal Distribution and Derived Score ➢ Concept of Normal Distribution- Properties ➢ Uses of NPC in Education ➢ Divergence from Normality- Skewness and Kurtosis.(Concept and Calculation) ➢ Derived Scores- Z-Score, T Score and Standard Score (Concept, Calculation and Uses).		Supriya Pramanik		
unit-3	Measure of Relationship: ➢ Bivariate Distribution- Concept and types of Correlation ➢ Scatter Diagram (only Concept) ➢ Computation of Co-efficient of Correlation by Rank Difference method and Product Moment method, Interpretation of Co-efficient of Correlation.		Suman Kamila		
unit-4	Statistics (Practical) ➢ Sources of Educational Data (Primary & Secondary data), Types of Data: Qualitative and Quantitative, Continuous and Discrete. ➢ Students are expected to collect relevant data (Bi-variate educational data) from their college or neighbourhood (minimum sample size must be 50) with the objective of - describing the nature and characteristics of the two distributions, - comparing two distributions and - finding association between two sets of data by applying the following:		Supriya Pramanik		
UNITS	**PAPER: DSE-1(Peace and Value Education)**				

Unit-1	Peace Education ➢ Concept and Scope of Peace Education ➢ Aims of peace Education ➢ Role of Teachers in Promoting Peace	Full Marks – 75	Sovan Arui		
Unit-2	Peace and Non Violence ➢ Factors of Violence ➢ Role of Peace for Non-Violence ➢ Gandhian principle of Non Violence ➢ Role of Educational Institutional in Promoting Peace education		Supriya Pramanik		
Unit-3	Value Education ➢ Meaning , Definition, Concept of Value Education ➢ Classification of Values and Sources of Values ➢ Need For Value education in the 21st Century ➢ Fostering Values – Role of Home, School and Society.		Pinki Mondal		
unit-4	**Peace, Value and Conflict Resolution** ● **Bases of conflict** ● **Role of Value Education in resolving conflict**		Suman Kamila		
UNITS	**PAPER: DSE-2(Teacher Education)**				
unit-1	Basic concept of teacher education. ➢ Concept and meaning of teacher education ➢ Scope of Teacher Education ➢ Aims and objectives of Education at Elementary, Secondary and College level. ➢ Teacher training Vs Teacher education	Full Marks- 75	Supriya Pramanik		

unit-2	Development of teacher education in India ➢ Historical perspective of development of teacher education in India ➢ Recommendations of Kothari Commission ➢ Recommendations of National Policy on Education regarding teacher education. ➢ Present System of teacher education in India.		Suman Kamila		
unit-3	**Role of the different agencies in Teacher Education** ● University ● NCTE ● NCERT ● NUEPA		Sovan Arui		
unit-4	Some courses for preparation of Teacher pre service teacher education In service teacher education Orientation and Refresher course.		Pinki Mondal		
Teaching Plan: Department of Education: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13(Psychology of Adjustment)**				

unit-1	Adjustment, Maladjustment and Problem Behaviour: ● Concept of adjustment, adjustment and adaptability ● Psychodynamic Concept of adjustment, criteria of good adjustment ● Concept of maladjustment. Causes of maladjustment, aggressiveness, delinquency, substance abuse	Full Marks-75	Suman Kamila	21-02-2022 to 10-06-2022	**1st week of April,2022 & 1st week of June,2022**
Unit-2	**Multi-axial Classification of Mental Disorders** ➢ DSM – 5 : Section 1, Section II and Section III ➢ Brief outline of Schizophrenia, anxiety disorder, depressive disorder and personality disorder ➢ Psychoanalysis, behavior therapy, cognitive therapy, and humanistic therapy.(Concept only)		Supriya Pramanik		
unit-3	**Coping Strategies for Stressful Situation** ➢ Stress and Stressors ➢ Personal and environmental stress ➢ Coping strategies for stress		Sovan Arui		
unit-4	**Administration, Scoring and Interpretation of the following Tests** ➢ KNPI ➢ KIPI ➢ Effect of Learning material on memorization		Pinki Mondal		
UNITS	**PAPER: CC14(Basic Concept of Educational Research)**				

Unit-1	**Concept of Educational Research:** ➢ Definition, meaning and concept of research ➢ Educational research and its characteristics ➢ Types of Educational Research Problems, difficulties and ethics		Suman Kamila		
Unit-2	**Basic elements of educational research** ➢ Literature review ➢ Problem selection ➢ Objectives, Research question and ➢ Tools of Data collection –types	Full Marks- 75	Sovan Arui		
Unit-3	Data collection procedure ➢ Sampling –concept and definition ➢ Types of sampling- Probability and non-probability ➢ Data reporting- Descriptive and Inferential (basic statistical procedure that come under each) ➢ Referencing and Bibliography		Pinki Mondal		
Unit-4	Practical ➢ Writing Research proposal (Plan of Work)– steps and review (atleast5) (Within 1000 words)		Supriya Pramanik		
UNITS	**PAPER: DSE-3(Educational Thought of Great Educators)**				
Unit-1	Western Educators-I ➢ Plato ➢ Rousseau ➢ Montessori	Full Marks- 75	Supriya Pramanik		

unit-2	**Western Educators- II** ● Pestalozzi ● Dewey ● Ivan Illich		Suman Kamila		
unit-3	**Indian Educators -I** ➢ Vivekananda ➢ Rabindranath ➢ Gandhiji		Pinki Mondal		
unit-4	**Indian Educators-II** ● Radhakrishnan ● Begum Rokeya ● Sister Nivedita		Sovan Arui		
UNITS	**PAPER: DSE-4(Women Education)**				
unit-1	**Historical Perspectives of Women Education** ● Synoptic view of women education through the ages: Vedic, Brahmanic, Medieval Period ● Contribution of Missionaries ● Role of British Govt.	Full Marks- 75	Suman Kamila

	IV. Role of Schools and Colleges in colonial and post-colonial period a. Girls School and Colleges, development towards co-education b. Expansion of infrastructural facilities in education c. Technical and vocational education for women		UTTAM DAS		
	V. Contours of female literacy since 1950 a. Interrogating literacy for women b. Government policies and Schemes c. Disparities in Literacy: Region, Community, Social and Eco-factors **VI. Present Scenario** a. Education as a tool of Empowerment		SANATANDAS		

UNITS	PAPER: DSC-1A/2A :Introduction to Human Rights:jurisprudence,Norms,Standards and Mechanisams	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	
	A.Human Rights and duties :Jurisprudence **i)philosophical and historical foundation of human rights and duties** **ii)Theories of rights** **iii)concept and classifications of human rights and duties** **iv)Human Rights and duties** **a)co-relationship of rights and duties/responsibilities** **b)tensions between rights inter se,duties inter se and rights and duties** **v)Importance of internalizing human rights and duties:** **vi)Urgent need for not only sensitizing others of human rights and duties, but of practicing oneself those values: self-inculcation, endeavour to live up to those ideals – Duty to respect others ' rights, respect each other's human dignity.**	**CA- 15** **ESE- 60** **Total 75**	Padmabati Chowdhury	01.10.2021 TO 24.02.2022	

	B. International Human Right: norms, standards and mechanisms **i)Evolution of human rights and duties on the international plane** **ii) The United Nations Charter and the development of human rights Provisions of the Charter,** Universal Declaration of Human Rights 1948, International Covenant on Civil and Political Rights 1966 and International Covenant on Economic, Social and Cultural Rights 1966, and other major UN instrumentson human rights (Conventions on Racial Discrimination, Women's Rights,Rights of the Child, Torture)		Sonam maiti		

Teaching Plan: Department of Human Rights Education: SEMESTER-II(GENERAL)

UNITS	**PAPER: DSC-1B/2B:): Promotion of Human Rights and Humanitarian Law**	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
	A. United Nations for promotion of Human Rights and Regional Human Rights standards and mechanisms i) UN bodies involved in promotion of human rights - Economic and Social Council, UN Commission on	**CA-15**			1st internal examination on 2nd week of May,

	Human Rights and its sub-commissions on women, minorities, etc., General Assembly, Human Rights Committee and other committees under the various conventions, ILO, UNESCO, WHO, FAO. i) European Convention on the Protection of Human Rights 1950 and institutions ii) Latin American standards and mechanisms for protection of human rights iii) African standards and mechanisms for protection of human rights	**ESE-60** **Total 75**	Padmabati Chowdhury	01.04.2022TO 09.07.2022	2022 and 2nd internal examination on 2nd week of July,2022
	B. International Humanitarian Law i) Evolution of IHL since the mid-nineteenth century: IHL conventions 1864, 1899 1907, 1929, and 1949, 1977 Geneva Protocols II & I. ii) Basic principles: humanity, protection of civilians and civilian objects, humane treatment of prisoners and civilians under custody, prohibition of use of weapons and methods of warfare, causing superfluous injury and unnecessary suffering, prohibition of widespread, long-term and severe damage to natural environment. iii) Indian Geneva Conventions Act 1949: Indian Red Cross Society iv) The role of International Committee of Red Cross				
			Sonam maiti		

Teaching Plan: Department of Human Rights Education: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C:**): **Refugee Law and Specially Disadvantaged Sections of Society in India**	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	**4th week of November,2021 &1st Week of January,2022**
	A. International Refugee Law i) Problem of refugees and displaced persons through the ages ii) The United Nations and the refugee problem iii) Refugee Convention 1951, Protocol 1967, Convention on the Stateless Persons 1951 - The core issues of the 'right' to seek and receive asylum, right of nonrefoulement (non-return) iv) Role of UN High Commissioner for Refugees		Sonam maiti	01.10.2021 TO 05.02.2022	
	B.Human Rights of specially disadvantaged sections of society in India i)Scheduled Castes/Scheduled Tribes and Other Backward Classes ii)Minorities	**CA-15** **ESE-60** **Total 75**	Padmabati Chowdhury		

	iii)Women and Children iv)Disabled Individuals v)The Elderly, 'Aged', Aging and Human Rights				
UNITS	**PAPER:SEC-1::Development, International Trade and Human Rights** **Credit 02**	CA-10 ESE-40 Total-50	Sonam Maiti	01.10.2021 TO 05.02.2022	
	i) Right to development: Issues of international equity and justice, equitable sharing of sharable resources and common amenities, equitable access to benefits of science and technology				
	ii) Freedom of international trade, most-favoured nation treatment (equality of treatment) versus special treatment of the developing countries, access to international markets, equitable pricing of raw materials		Padmabati Chowdhury		

Teaching Plan: Department of Human Rights Education: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D: Emerging Dimensions of Human Rights and Evolution of theConcept of Human Rights and Duties in India**	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	**4th week of April,2022 &3rd week of June,2022**
	A. Emerging Dimensions of Human Rights i) National Sovereignty versus international enforcement' of human rights, International ii) Politics of human rights and selective application of international sanctions, unilateral use of coercion and implementation of human rights iii) Human rights, and science and technology iv) Human rights violations by non-state entities such as corporations, other business entities, terrorists and other armed groups, militant religious groups, professional groups (doctors, lawyers, etc.) v) New rights: right to a future and rights of future generations, rights to peace (and disarmament), rights to clean environment	**CA- 15** **ESE- 60** **Total 75**	Sonam Maiti	15.03.2022 to 25.06.2022	

	B. Evolution of the concept of Human Rights and duties in India i) Evolution of the composite culture of India, contribution of diverse religions ii) Concepts of human welfare, rights and duties, totality of the cosmology ofuniverse with human beings as its intrinsic part iii) Human rights and duties in contemporary India: Law, politics and society iv) Social movements of the 19th and 20th centuries, independence movement,Gandhi, Nehru, Ambedkar etc. v) Making of the Constitution		Padmabati Chowdhury		
UNITS	**PAPER: SEC-2: Societal Problems of Human Rights in India**			15.03.2022 to 25.06.2022	
	i) Core problems: poverty, illiteracy, unemployment, socio-cultural-religious practices resulting in grave human rights deprivations ii) Domestic Violence and Intimate Partner's violence iii) Corruption iv) Terrorism v) Labour welfare legislation in India	**CA-10** **ESE-40** **Total-50**	Padmabati Chowdhury		

	vi) Problems of bonded labour, exploitation of child labour, female labour and				
	vii) Unorganized labour viii) Communal and caste conflicts and tensions ix) Violence against women and children, both inside and outside homes x) Custodial violence		Sonam Maiti		
Teaching Plan: Department of Human Rights Education: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A:** : Human Rights and Duties in India: Normative Framework, Constitution andStatutory Mechanisms	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	**1st week of November, 2021 &4th week of December,2021**
	A. Normative framework of Human Rights and duties in India i) Constitutional perspective: Fundamental Rights, Directive Principles, Fundamental Duties, and their interrelationships ii) Statutory protection of human rights	**CA-15** **ESE- 60** **Total- 75**	Padmabati Chowdhury	14.09.2021 TO 18.01.2022	

	B. Enforcement of Human Rights: constitution and statutory mechanisms in India i) Legislature, executive, and judiciary ii) National Human Rights Commission, other commissions and committees iii) Social, economic, political and administrative problems of enforcement		Sonam Maiti		
UNITS	**PAPER: SEC-3:** : **Human Rights Education, Teaching and Training**				
	Human Rights Education, Tehran Conference 1968, Vienna Conference 1993, Role of the Central and State Governments in Promoting Human Rights Education;UNESCO and its role in Human Rights Education for Social Change; Human Rights Education in India and UN Decade for Human Rights Education (1995 -2004);	**CA-10** **ESE- 40** **Total- 50**	Padmabati Chowdhury	14.09.2021 TO 18.01.2022	
	Human Rights and Value Education, Role of Government and Non-Governmental Organisations; Human Rights Teaching at School, College and University Levels; Human Rights Education: The Legal Perspective; Research Priorities in Human Rights;Peace Keeping and Training of International Civil Servants. Mandela Law (The World as it could be)		Sonam Maiti		

UNITS	**PAPER: GE-1**: **Introduction to Human Rights: Jurisprudence, Norms, Standards and Mechanisms** **Credit 06** **Credit 06** **A. Human Rights and duties: Jurisprudence** i) Philosophical and historical foundation of human rights and duties ii) Theories of rights iii) Concept and classifications of human rights and duties iv) Human rights and duties (a) Correlationship of rights and duties/responsibilities (b) Tensions between rights inter se, duties inter se, and rights and duties v) Importance of internalizing human rights and duties: Urgent need for not only sensitizing others of human rights and duties, but of practicing oneself those values: self-inculcation, endeavour to live up to those ideals - Duty to respect others' rights, respect each other's human dignity		Padmabati Chowdhury	14.09.2021 TO 18.01.2022	

	A. International Human Rights: norms, standards and mechanisms vi) Evolution of human rights and duties on the international plane vii) The United Nations Charter and the development of human rights Provisions of the Charter, Universal Declaration of Human Rights 1948, International Covenant on Civil and Political Rights 1966 and International Covenant on Economic, Social and Cultural Rights 1966, and other major UN instrumentson human rights (Conventions on Racial Discrimination, Women's Rights, Rights of the Child, Torture)	**CA-15** **ESE-60** **Total -75**	Sonam Maiti		

Teaching Plan: Department of Human Rights Education: SEMESTER-VI(GENERAL)

UNITS	**PAPER: DSE:2 Human Rights Movements and Criminal Justice System in India**	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	**1st week of April,2022 & 1st week of June,2022**
	A. Human Rights movements in India i) National freedom movement ii) Social and political movements iii) Dalit movements iv) Women's movements v) Environmental movements		Padmabati Chowdhury	21.02.2022 TO 10.06.2022	

	B. Human Rights and criminal justice system in India Criminal justice system and protection of Human Rights : treatment of individualsin **i)** Situations of crime **ii)** Human rights of the accused **iii)** Legal aid **iv)** Police, criminal investigation, custodial crimes **v)** Crimes (including custodial crimes) against women and children **vi)** Reform in jails/juvenile homes	**CA-15** **ESE-60** **Total-75**	Sonam Maiti		
UNITS	**PAPER: SEC-4: Environment and Human Rights**				
	i) Environment, Resources and Human Rights ii) Environmental rights ; social movements for protection of environment and ecology; role of various institutions like pollution Control Board; Indian environmental laws – an assessment; Green Tribunal and role of supremecourt; Forest Policies and Acts		Padmabati Chowdhury	21.02.2022 TO 10.06.2022	
	iii) Right to Development and its various dimensions ; debate around inclusive growth; movement against big dams- case study of Narmada Bachao movement; Sardar Sarobar Project	**CA-10** **ESE-40** **Total-50**	Sonam Maiti		

UNITS	**PAPER: GE-2: : Refugee Law and Specially Disadvantaged Sections of Society in India**				
	A. International Refugee Law i) Problem of refugees and displaced persons through the ages ii) The United Nations and the refugee problem i) Refugee Convention 1951, Protocol 1967, Convention on the Stateless Persons 1951 - The core issues of the 'right' to seek and receive asylum, right of nonrefoulement (non-return) ii) Role of UN High Commissioner for Refugees	**CA-15** **ESE-60** **Total-75**	Sonam MaitI	21.02.2022 TO 10.06.2022	
	B. Human Rights of specially disadvantaged sections of society in India i) Scheduled Castes/Scheduled Tribes and Other Backward Classes ii) Minorities iii) Women and Children iv) Disabled Individuals The Elderly, 'Aged', Aging and Human Rights		Padmabati Chowdhury		
Mathematics					

Teaching Plan: Department of Mathematics: SEMESTER-I(HONOURS)

UNITS	PAPER: CC -1: Calculus, Geometry &Differential Equation	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal examination
Unit 1	Hyperbolic functions, higher order derivatives, Leibnitz rule and its applications to problems of type $e^{ax+b}\sin x, e^{ax+b}\cos x,\ (ax+b)^n\sin x,\ (ax+b)^n\cos x$, concavity and inflection points, envelopes, asymptotes, curve tracing in cartesian coordinates, tracing in polar coordinates of standard curves, L'Hospital's rule, applications in business, economics and life sciences	75	Dr.Samir Kumar Bhandari	01/10/2021 to 24/02/2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit 2	Reduction formulae, derivations and illustrations of reduction formulae of the type$\int \sin nx dx, \int \cos nx dx,$ $\int \tan nx dx, \int \sec nx dx, \int (\log x)^n dx, \int \sin^n x \sin^m x dx,$, parametric equations, parameterizing a curve, arc length of a curve, arc length of parametric curves, area under a curve, area and volume of surface of revolution, techniques of sketching conics.		Suvendu Maity		
Unit 3	Reflection properties of conics, rotation of axes and second degree equations, classification of conics using the discriminant, polar equations of conics. Spheres. Cylindrical surfaces. Central conicoids, paraboloids, plane sections ofconicoids, generating lines, classification of quadrics, illustrations of graphingstandard quadric surfaces like cone, ellipsoid.		Mr. Sujoy Pradhan		

Unit 4	Differential equations and mathematical models. General, particular, explicit, implicit and singular solutions of a differential equation. Exact differential equations and integrating factors, separable equations and equations reducible to this form, linear equation and Bernoulli equations, special integrating factors and transformations.		Dr. Samir Kumar Bhandari		
UNITS	**PAPER: CC-2: Algebra**	75			
Unit 1	Polar representation of complex numbers, nth roots of unity, De Moivre's theorem for rational indices and its applications. Theory of equations: Relation between roots and coefficients, transformation ofequation, Descartes rule of signs, cubic and biquadratic equation. Inequality: The inequality involving AM≥ GM≥ HM, Cauchy-Schwartz inequality		Rudrani Jana		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit 2	Equivalence relations. Functions, composition of functions, Invertible functions, one to one correspondence and cardinality of a set. Well-ordering property of positive integers, division algorithm, divisibility and Euclidean algorithm. Congruence relation between integers. Principles of Mathematical induction, statement of Fundamental Theorem of Arithmetic.		Dr. Asgar Ali		
Unit 3	Systems of linear equations, row reduction and echelon forms, vector equations, the matrix equation Ax=b, solution sets of linear systems, applications of linear systems, linear independence		Sujoy Pradhan		
Unit 4	Introduction to linear transformations, matrix of a linear transformation, inverse of a matrix, characterizations of invertible		Sima Mondal		

	matrices. Subspaces ofR^n, dimension of subspaces of R^n, rank of a matrix, Eigen values, eigen vectors and characteristic equation of a matrix.Cayley-Hamilton theorem and its use in finding the inverseof a matrix.				
UNITS	**PAPER: GE-1: Calculus, Geometry & Differential Equation**	75			1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit 1	Hyperbolic functions, higher order derivatives, Leibnitz rule and its applications to problems of type $e^{ax+b}\sin x, e^{ax+b}\cos x,\ (ax+b)^n\sin x,\ (ax+b)^n\cos x$, concavity and inflection points, envelopes, asymptotes, curve tracing in cartesian coordinates, tracing in polar coordinates of standard curves, L'Hospital's rule, applications in business, economics and life sciences		Mr. SuvenduMaity		
Unit 2	Reduction formulae, derivations and illustrations of reduction formulae of the type $\int \sin nx dx, \int \cos nx dx,$ $\int \tan nx dx, \int \sec nx dx, \int (\log x)^n dx, \int \sin^n x \sin^m x dx,$, parametric equations, parameterizing a curve, arc length of a curve, arc length of parametric curves, area under a curve, area and volume of surface of revolution, techniques of sketching conics.		Sujoy Pradhan		
Unit 3	Reflection properties of conics, rotation of axes and second degree equations, classification of conics using the discriminant, polar equations of conics. Spheres. Cylindrical surfaces. Central conicoids, paraboloids, plane sections ofconicoids, generating lines, classification of quadrics, illustrations of graphingstandard quadric surfaces like cone, ellipsoid.		Dr. Samir Kumar Bhandari		

Unit 4	Differential equations and mathematical models. General, particular, explicit, implicit and singular solutions of a differential equation. Exact differential equations and integrating factors, separable equations and equations reducible to this form, linear equation and Bernoulli equations, special integrating factors and transformations.		Dr. Samir Kumar Bhandari		

Teaching Plan: Department of Mathematics: SEMESTER-II(HONOURS)

UNITS	**PAPER: CC-3 : Real Analysis**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
Unit 1	Review of algebraic and order properties of R, ε-neighborhood of a point in R. Idea of countable sets, uncountable sets and uncountability of R. Bounded above sets, bounded below sets, bounded sets, unbounded sets. Suprema and infima. Completeness property of R and its equivalent properties. The Archimedean property, density of rational (and Irrational) numbers in R, intervals. Limit points of a set, isolated points, open set, closed set, derived set,illustrations of Bolzano-Weierstrass theorem for sets, compact sets in R, Heine-Borel Theorem.	75	Dr.Samir Kumar Bhandari	01/04/2022 to 09/07/2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
Unit 2	Sequences, bounded sequence, convergent sequence, limit of a sequence, liminf, lim sup. Limit theorems. Monotone sequences, monotone convergence theorem. Subsequences, divergence criteria. Monotone subsequence theorem (statement only), Bolzano Weierstrass theorem for sequences. Cauchy sequence, Cauchy's convergence criterion.		Mr. Sujoy Pradhan		
Unit 3	Infinite series, convergence and divergence of infinite series, Cauchy criterion, tests for convergence: comparison test, limit comparison test,		Rudrani Jana		

	ratio test, Cauchy's nth root test, integral test. Alternating series, Leibniz test. Absolute and conditional convergence.				
UNITS	**PAPER: CC-4: Differential Equations & Vector Calculus**	75			
Unit 1	Lipschitz condition and Picard's Theorem (Statement only). General solution of homogeneous equation of second order, principle of super position for homogeneous equation, Wronskian: its properties and applications, Linear homogeneous and non-homogeneous equations of higher order with constant coefficients, Euler's equation, method of undetermined coefficients, method of variation of parameters.		Dr. Asgar Ali		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
Unit 2	Systems of linear differential equations, types of linear systems, differential operators, an operator method for linear systems with constant coefficients, Basic Theory of linear systems in normal form, homogeneous linear systems with constant coefficients: Two Equations in two unknown functions.		Dr. Asgar Ali		
Unit 3	Equilibrium points, Interpretation of the phase plane Power series solution of a differential equation about an ordinary point, solution about a regular singular point.		Dr. Asgar Ali		
Unit 4	Triple product, introduction to vector functions, operations with vector-valuedfunctions, limits and continuity of vector functions, differentiation and integration of vector functions.		Sima Mondal		
UNITS	**PAPER: GE-2: Algebra**	75			
Unit 1	Polar representation of complex numbers, nth roots of unity, De Moivre's theorem for rational indices and its applications. Theory of equations: Relation between roots and coefficients, transformation		Suvendu Maity		1st internal examination on

	ofequation, Descartes rule of signs, cubic and biquadratic equation. Inequality: The inequality involving AM≥ GM≥ HM, Cauchy-Schwartz inequality				2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
Unit 2	Equivalence relations. Functions, composition of functions, Invertible functions, one to one correspondence and cardinality of a set. Well-ordering property of positive integers, division algorithm, divisibility and Euclidean algorithm. Congruence relation between integers. Principles of Mathematical induction, statement of Fundamental Theorem of Arithmetic.		Rudranijana		
Unit 3	Systems of linear equations, row reduction and echelon forms, vector equations, the matrix equation Ax=b, solution sets of linear systems, applications of linear systems, linear independence		Sima Mondal		
Unit 4	Introduction to linear transformations, matrix of a linear transformation, inverse of a matrix, characterizations of invertible matrices. Subspaces of R^n, dimension of subspaces of R^n, rank of a matrix, Eigen values, eigen vectors and characteristic equation of a matrix.Cayley-Hamilton theorem and its use in finding the inverseof a matrix.		Sima Mondal		
Teaching Plan: Department of Mathematics: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC-5: Theory of Real Functions& Introduction to Metric Space**	75		01/10/2021 to 05/02/2022	**4th week of November,2021 &1st Week of January,2022**
Unit 1	Limits of functions (ε - δ approach), sequential criterion for limits, divergence criteria. Limit theorems, one sided limits. Infinite limits and limits at infinity. Continuous functions, sequential criterion for		Dr. Samir Kumar Bhandari		

	continuity and discontinuity. Algebra of continuous functions. Continuous functions on an interval, intermediate value theorem, location of roots theorem, preservation of intervals theorem. Uniform continuity, non-uniform continuity criteria, uniform continuity theorem.			
Unit 2	Differentiability of a function at a point and in an interval, Caratheodory's theorem, algebra of differentiable functions. Relative extrema, interior extremum theorem. Rolle's theorem. Mean value theorem, intermediate value property of derivatives, Darboux's theorem. Applications of mean value theorem to inequalities and approximation of polynomials.		Dr. Samir Kumar Bhandari	
Unit 3	Cauchy's mean value theorem. Taylor's theorem with Lagrange's form of remainder, Taylor's theorem with Cauchy's form of remainder, application of Taylor's theorem to convex functions, relative extrema. Taylor's series and Maclaurin's series expansions ofexponential and trigonometric functions, ln (1 + x), 1/(ax + b) and$(x+1)^n$. Application of Taylor's theorem to inequalities.		Dr. Samir Kumar Bhandari	
Unit 4	Metric spaces: Definition and examples. open and closed balls, neighbourhood,open set, interior of a set. Limit point of a set, closed set, diameter of a set, subspaces, dense sets, separable spaces.		Mr. Sujoy Pradhan	
UNITS	**PAPER: CC-6: Group Theory 1**	75		
Unit 1	Symmetries of a square, dihedral groups, definition andexamples of groups including permutation groups and quaternion groups (through matrices), elementary properties of groups.		Rudranijana	

Unit 2	Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups.		Rudranijana	
Unit 3	Properties of cyclic groups, classification of subgroups of cyclic groups. Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem.		Rudranijana	
Unit 4	External direct product of a finite number of groups, normal subgroups, factor groups, Cauchy's theorem for finite abelian groups.		Mr. Sujoy Pradhan	
Unit 5	Group homomorphisms, properties of homomorphisms, Cayley's theorem, properties of isomorphisms. First, Second and Third isomorphism theorems.		Mr. Sujoy Pradhan	
UNITS	**PAPER: CC-7: Numerical Methods**	55		
Unit 1	Algorithms. Convergence. Errors: relative, absolute. Round off. Truncation.		Mr. SuvenduMaity	
Unit 2	Transcendental and polynomial equations: Bisection method, Newton's method, secant method, Regula-falsimethod, fixed point iteration, Newton-Raphson method. Rate of convergence of these methods.		Mr. SuvenduMaity	
Unit 3	System of linear algebraic equations: Gaussian elimination and Gauss Jordan methods. Gauss Jacobi method, Gauss Seidel method and their convergence analysis. LU decomposition.		Mr. SuvenduMaity	
Unit 4	Interpolation: Lagrange and Newton's methods. Error bounds. Finite difference operators. Gregory forward and backward difference		Dr. Asgar Ali	

	interpolation. Numerical differentiation: Methods based on interpolations, methods based on finite differences.			
Unit 5	Numerical Integration: Newton Cotes formula, Trapezoidal rule, Simpson's 1/3rd rule, Simpsons 3/8th rule, Weddle's rule, Boole's Rule. midpoint rule, Composite trapezoidal rule, composite Simpson's 1/3rd rule, Gauss quadrature formula. The algebraic eigen value problem: Power method. Approximation: Least square polynomial approximation.		Dr. Asgar Ali	
Unit 6	Ordinary differential equations: The method of successive approximations, Euler's method, the modified Euler method, Runge-Kutta methods of orders two and four.		Dr. Asgar Ali	
	C7P: Numerical Methods Lab	20		
	List of practical (using any software): 1. Calculate the sum 1/1 + 1/2 + 1/3 + 1/4 + ----------+ 1/ N. 2. Enter 100 integers into an array and sort them in an ascending order. 3. Solution of transcendental and algebraic equations by i) Bisection method ii) Newton Raphson method. iii) Secant method. iv) Regula Falsi method.		Dr. Asgar Ali	

	4. Solution of system of linear equations i) LU decomposition method ii) Gaussian elimination method iii) Gauss-Jacobi method iv) Gauss-Seidel method 5. Interpolation i) Lagrange Interpolation ii) Newton Interpolation 6. Numerical Integration i) Trapezoidal Rule ii) Simpson's one third rule iii) Weddle's Rule iv) Gauss Quadrature 7. Method of finding Eigenvalue by Power method 8. Fitting a Polynomial Function 9. Solution of ordinary differential equations i) Euler method			

	ii) Modified Euler method iii) Runge Kutta method			
UNITS	**PAPER: SEC-1: Logic and Sets**	50		
Unit 1	Introduction, propositions, truth table, negation, conjunction and disjunction. Implications, biconditional propositions, converse, contra positive and inverse propositions and precedence of logical operators. Propositional equivalence: Logical equivalences. Predicates and quantifiers: Introduction, quantifiers, binding variables and negations.		Sima Mondal	
Unit 2	Sets, subsets, set operations and the laws of set theory and Venn diagrams. Examples of finite and infinite sets. Finite sets and counting principle. Empty set, properties of empty set. Standard set operations. classes of sets. Power set of a set.		Sima Mondal	
Unit 3	Difference and Symmetric difference of two sets. Set identities, generalized union and intersections. Relation: Product set. Composition of relations, types of relations, partitions, equivalence Relations with example of congruence modulo relation. Partial ordering relations, n-ary relations.		Sima Mondal	
UNITS	**PAPER: GE-3: Differential Equations &Vector Calculus**	75		
Unit 1	Lipschitz condition and Picard's Theorem (Statement only). General solution of homogeneous equation of second order, principle of super position for homogeneous equation, Wronskian: its properties and applications, Linear homogeneous and non-homogeneous equations of		Dr. Asgar Ali	

	higher order with constant coefficients, Euler's equation, method of undetermined coefficients, method of variation of parameters.				
Unit 2	Systems of linear differential equations, types of linear systems, differential operators, an operator method for linear systems with constant coefficients, Basic Theory of linear systems in normal form, homogeneous linear systems with constant coefficients: Two Equations in two unknown functions.		Dr. Asgar Ali		
Unit 3	Equilibrium points, Interpretation of the phase plane Power series solution of a differential equation about an ordinary point, solution about a regular singular point.		Mr. SuvenduMaity		
Unit 4	Triple product, introduction to vector functions, operations with vector-valued functions, limits and continuity of vector functions, differentiation and integration of vector functions.		Sima Mondal		
Teaching Plan: Department of Mathematics: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC-8: Riemann Integration and Series of Functions**	75		15/03/2022 to 25/06/2022	**4th week of April,2022 &3rd week of June,2022**
Unit 1	Riemann integration: inequalities of upper and lower sums, Darbaux integration, Darbaux theorem, Riemann conditions of integrability, Riemann sum and definition of Riemann integral through Riemann sums, equivalence of two definitions. Riemann integrability of monotone and continuous functions, properties of the Riemann integral; definition and integrability of piecewise continuous and monotone functions.		Dr. Samir Kumar Bhandari		

	Intermediate Value theorem for Integrals; Fundamental theorem of Integral Calculus.			
Unit 2	Improper integrals. Convergence of Beta and Gamma functions.		Dr. Samir Kumar Bhandari	
Unit 3	Pointwise and uniform convergence of sequence of functions. Theorems on continuity, derivability and integrability of the limit function of a sequence of functions. Series of functions; Theorems on the continuity and derivability of the sum function of a series of functions; Cauchy criterion for uniform convergence and Weierstrass M-Test.		Dr. Samir Kumar Bhandari	
Unit 4	Fourier series: Definition of Fourier coefficients and series, Reimann Lebesgue lemma, Bessel's inequality, Parseval's identity, Dirichlet's condition. Examples of Fourier expansions and summation results for series.		Mr. Sujoy Pradhan	
Unit 5	Power series, radius of convergence, Cauchy Hadamard theorem. Differentiation and integration of power series; Abel's theorem; Weierstrass approximation theorem.		Mr. Sujoy Pradhan	
UNITS	**PAPER: CC-9: Multivariate Calculus**	75		
Unit 1	Functions of several variables, limit and continuity of functions of two or more variables Partial differentiation, total differentiability and differentiability, sufficient condition for differentiability. Chain rule for one and two independent parameters, directional derivatives, the gradient, maximal and normal property of the gradient, tangent planes, Extrema of		Sima Mondal	

	functions of two variables, method of Lagrange multipliers, constrained optimization problems			
Unit 2	Double integration over rectangular region, double integration over non-rectangular region, Double integrals in polar co-ordinates, Triple integrals, triple integral over a parallelepiped and solid regions. Volume by triple integrals, cylindrical and spherical co-ordinates.Change of variables in double integrals and triple integrals.		Sima Mondal	
Unit 3	Definition of vector field, divergence and curl. Line integrals, applications of line integrals: mass and work. Fundamental theorem for line integrals, conservative vector fields, independence of path.		Mr. SuvenduMaity	
Unit 4	Green's theorem, surface integrals, integrals over parametrically defined surfaces. Stoke's theorem, The Divergence theorem.		Mr. SuvenduMaity	
UNITS	**PAPER: CC-10: Ring Theory and Linear Algebra I**	75		
Unit 1	Definition and examples of rings, properties of rings, subrings, integral domains and fields, characteristic of a ring. Ideal, ideal generated by a subset of a ring, factor rings, operations on ideals, prime and maximal ideals.		Rudrani Jana	
Unit 2	Ring homomorphisms, properties of ring homomorphisms. Isomorphism theorems I, II and III, field of quotients.		Rudrani Jana	

Unit 3	Vector spaces, subspaces, algebra of subspaces, quotient spaces, linear combination of vectors, linear span, linear independence, basis and dimension, dimension of subspaces.		Rudrani Jana	
Unit 4	Linear transformations, null space, range, rank and nullity of a linear transformation, matrix representation of a linear transformation, algebra of linear transformations. Isomorphisms. Isomorphism theorems, invertibility and isomorphisms, change of coordinate matrix.		Rudrani Jana	
UNITS	**PAPER: SEC-2: Graph Theory**	50		
Unit 1	Definition, examples and basic properties of graphs, pseudo graphs, complete graphs, bipartite graphs isomorphism of graphs.		Dr. Asgar Ali	
Unit 2	Eulerian circuits, Eulerian graph, semi-Eulerian graph, theorems, Hamiltonian cycles,theorems Representation of a graph by matrix, the adjacency matrix, incidence matrix, weighted graph.		Dr. Asgar Ali	
Unit 3	Travelling salesman's problem, shortest path, Tree and their properties, spanning tree, Dijkstra's algorithm, Warshall algorithm.		Dr. Asgar Ali	
UNITS	**PAPER: GE-4: Numerical Methods**	55	Dr. Asgar Ali	
Unit 1	Algorithms. Convergence. Errors: relative, absolute. Round off. Truncation.		Dr. Asgar Ali	
Unit 2	Transcendental and polynomial equations: Bisection method, Newton's method, secant method, Regula-falsi method, fixed point iteration, Newton-Raphson method. Rate of convergence of these methods.		Dr. Asgar Ali	

Unit 3	System of linear algebraic equations: Gaussian elimination and Gauss Jordan methods. Gauss Jacobi method, Gauss Seidel method and their convergence analysis. LU decomposition.		Dr. Asgar Ali		
Unit 4	Interpolation: Lagrange and Newton's methods. Error bounds. Finite difference operators. Gregory forward and backward difference interpolation. Numerical differentiation: Methods based on interpolations, methods based on finite differences.		Dr. Asgar Ali		
Unit 5	Numerical Integration: Newton Cotes formula, Trapezoidal rule, Simpson's 1/3rd rule, Simpsons 3/8th rule, Weddle's rule, Boole's Rule. midpoint rule, Composite trapezoidal rule, composite Simpson's 1/3rd rule, Gauss quadrature formula. The algebraic eigen value problem: Power method. Approximation: Least square polynomial approximation.		Dr. Asgar Ali		
Unit 6	Ordinary differential equations: The method of successive approximations, Euler's method, the modified Euler method, Runge-Kutta methods of orders two and four.		Dr. Asgar Ali		
	C7P: Numerical Methods Lab	20			
	List of practical (using any software): 1. Calculate the sum 1/1 + 1/2 + 1/3 + 1/4 + ----------+ 1/ N. 2. Enter 100 integers into an array and sort them in an ascending order. 3. Solution of transcendental and algebraic equations by i) Bisection method		Dr. Asgar Ali		

	ii) Newton Raphson method. iii) Secant method. iv) Regula Falsi method. 4. Solution of system of linear equations i) LU decomposition method ii) Gaussian elimination method iii) Gauss-Jacobi method iv) Gauss-Seidel method 5. Interpolation i) Lagrange Interpolation ii) Newton Interpolation 6. Numerical Integration i) Trapezoidal Rule ii) Simpson's one third rule iii) Weddle's Rule iv) Gauss Quadrature 7. Method of finding Eigenvalue by Power method				

	8. Fitting a Polynomial Function 9. Solution of ordinary differential equations i) Euler method ii) Modified Euler method iii) Runge Kutta method				
Teaching Plan: Department of Mathematics: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC-11: Partial Differential Equations & Applications**	75		14/09/2021 to 18/01/2022	**1st week of November, 2021 &4th week of December,2021**
Unit 1	Partial differential equations – Basic concepts and definitions. Mathematical problems. First- order equations: classification, construction and geometrical interpretation. Method of characteristics for obtaining general solution of quasi linear equations. Canonical forms of first-order linear equations. Method of separation of variables for solving first order partial differential equations.		Dr. Samir Kumar Bhandari		
Unit 2	Derivation of heat equation, wave equation and Laplace equation. Classification of second order linear equations as hyperbolic, parabolic or elliptic. Reduction of second order linear equations to canonical forms.		Dr. Samir Kumar Bhandari		
Unit 3	The Cauchy problem, Cauchy-Kowalewskaya theorem, Cauchy problem of an infinite string. Initial boundary value problems. Semi-		Dr. Samir Kumar Bhandari		

	infinite string with a fixed end, semi-infinite string with a free end. Equations with non-homogeneous boundary conditions. Non-homogeneous wave equation. Method of separation of variables, solving the vibrating string problem. Solving the heat conduction problem			
Unit 4	Central force. Constrained motion, varying mass, tangent and normal components of acceleration, modelling ballistics and planetary motion, Kepler's second law.		Dr. Asgar Ali	
UNITS	**PAPER: CC-12: Group Theory II**	75		
Unit 1	Automorphism, inner automorphism, automorphism groups, automorphism groups of finite and infinite cyclic groups, applications of factor groups to automorphism groups, Characteristic subgroups, Commutator subgroup and its properties.		Mr. Sujoy Pradhan	
Unit 2	Properties of external direct products, the group of units modulo n as an external direct product, internal direct products, Fundamental theorem of finite abelian groups.		Mr. Sujoy Pradhan	
Unit 3	Group actions, stabilizers and kernels, permutation representation associated with a given group action. Applications of group actions. Generalized Cayley's theorem. Index theorem.		Rudrani Jana	
Unit 4	Groups acting on themselves by conjugation, class equation and consequences, conjugacy in Sn, p-groups, Sylow's theorems and consequences, Cauchy's theorem, Simplicity of An for $n \geq 5$, non-simplicity tests.		Rudrani Jana	

UNITS	**PAPER: DSE -1: Linear Programming**	75	Mr. SuvenduMaity	
Unit 1	Introduction to linear programming problem. Theory of simplex method, graphical solution, convex sets, optimality and unboundedness, the simplex algorithm, simplex method in tableau format, introduction to artificial variables, two-phase method. Big-M method and their comparison.		Mr. SuvenduMaity	
Unit 2	Duality, formulation of the dual problem, primal-dual relationships, economic interpretation of the dual. Transportation problem and its mathematical formulation, northwest-corner method, least cost method and Vogel approximation method for determination of starting basic solution, algorithm for solving transportation problem, assignment problem and its mathematical formulation, Hungarian method for solving assignment problem.		Mr. SuvenduMaity	
Unit 3	Game theory: formulation of two-person zero sum games, solving two-person zero sum games, games with mixed strategies, graphical solution procedure,linearprogramming solutionof games.		Mr. SuvenduMaity	
UNITS	**PAPER: DSE-2: Probability and Statistics**	75	Sima Mondal	
Unit 1	Sample space, probability axioms, real random variables (discrete and continuous), cumulative distribution function, probability mass/density functions, mathematical expectation, moments, moment generating function, characteristic function, discrete distributions: uniform, binomial, Poisson, geometric, negative binomial, continuous distributions: uniform, normal, exponential.		Sima Mondal	

Unit 2	Joint cumulative distribution function and its properties, joint probability density functions, marginal and conditional distributions, expectation of function of two random variables, conditional expectations, independent random variables, bivariate normal distribution, correlation coefficient, joint moment generating function (jmgf) and calculation of covariance (from jmgf), linear regression for two variables.		Sima Mondal		
Unit 3	Chebyshev's inequality, statement and interpretation of (weak) law of large numbers and strong law of large numbers. Central limit theorem for independent and identically distributed random variables with finite variance, Markov chains, Chapman-Kolmogorov equations, classification of states.		Sima Mondal		
Unit 4	Random Samples, Sampling Diatributions, Estimation of parameters, Testing of hypothesis.		Mr. Sujoy Pradhan		
Teaching Plan: Department of Mathematics: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC-13: Metric Spaces and Complex Analysis**	75		21/02/2022 to10/06/2022	**1st week of April,2022 & 1st week of June,2022**
Unit 1	Metric spaces: sequences in metric spaces, Cauchy sequences. Complete metric spaces, Cantor's theorem.		Dr. Samir Kumar Bhandari		
Unit 2	Continuous mappings, sequential criterion and other characterizations of continuity. Uniform continuity. Connectedness, connected subsets of R.		Dr. Samir Kumar Bhandari		

	Compactness: Sequential compactness, Heine-Borel property, totally bounded spaces, finite intersection property, and continuous functions on compact sets. Homeomorphism. Contraction mappings. Banach fixed point theorem and its application to ordinary differential equation.			
Unit 3	Limits, limits involving the point at infinity, continuity. Properties of complex numbers, regions in the complex plane, functions of complex variable, mappings. Derivatives, differentiation formulas, Cauchy-Riemann equations, sufficient conditions for differentiability.		Dr. Samir Kumar Bhandari	
Unit 4	Analytic functions, examples of analytic functions, exponential function, logarithmic function, trigonometric function, derivatives of functions, and definite integrals of functions. Contours, Contour integrals and its examples, upper bounds for moduli of contour integrals. Cauchy- Goursat theorem, Cauchy integral formula.		Dr. Samir Kumar Bhandari	
Unit 5	Liouville's theorem and the fundamental theorem of algebra. Convergence of sequences and series, Taylor series and its examples.		Mr. SuvenduMaity	
Unit 6	Laurent series and its examples, absolute and uniform convergence of power series.		Mr. SuvenduMaity	
UNITS	**PAPER: CC-14: Ring Theory and Linear Algebra II**	75		
Unit 1	Polynomial rings over commutative rings, division algorithm and consequences, principal ideal domains, factorization of polynomials, reducibility tests, irreducibility tests, Eisenstein criterion, and unique		Rudrani Jana	

	factorization in Z [x]. Divisibility in integral domains, irreducible, primes, unique factorization domains, Euclidean domains.			
Unit 2	Dual spaces, dual basis, double dual, transpose of a linear transformation and its matrix in the dual basis, annihilators. Eigen spaces of a linear operator, diagonalizability, invariant subspaces and Cayley-Hamilton theorem, the minimal polynomial for a linear operator, canonical forms.		Rudrani Jana	
Unit 3	Inner product spaces and norms, Gram-Schmidt orthogonalisation process, orthogonal complements, Bessel's inequality, the adjoint of a linear operator. Least squares approximation, minimal solutions to systems of linear equations. Normal and self-adjoint operators. Orthogonal projections and Spectral theorem.		Mr. Sujoy Pradhan	
UNITS	**PAPER: DSE -3: Mechanics**	75		
Unit 1	Co-planar forces. Astatic equilibrium. Friction. Equilibrium of a particle on a rough curve. Virtual work.. Forces in three dimensions. General conditions of equilibrium. Centre of gravity for different bodies. Stable and unstable equilibrium.		Dr. Asgar Ali	
Unit 2	Equations of motion referred to a set of rotating axes. Motion of a projectile in a resisting medium. Stability of nearly circular orbits. Motion under the inverse square law.Slightly disturbed orbits. Motion of artificial satellites. Motion of a particle in three dimensions. Motion on a smooth sphere, cone, and on any surface of revolution.		Dr. Asgar Ali	

Unit 3	Degrees of freedom. Moments and products of inertia. Momental Ellipsoid. Principal axes. D'Alembert's Principle. Motion about a fixed axis. Compound pendulum. Motion of a rigid body in two dimensions under finite and impulsive forces. Conservation of momentum and energy.		Sima Mondal		
UNITS	**PAPER: DSE-4: Bio Mathematics**	75			
Unit 1	Mathematical biology and the modeling process: an overview. Continuous models: Malthus model, logistic growth, Allee effect, Gompertz growth, Michaelis-Menten Kinetics, Holling type growth, bacterial growth in a chemostat, harvesting a single natural population, Prey predator systems and LotkaVolterra equations, populations in competitions, epidemic models (SI, SIR, SIRS, SIC).		Mr. Sujoy Pradhan		
Unit 2	Activator-inhibitor system, insect outbreak model: Spruce Budworm. Numerical solution of the models and its graphical representation. Qualitative analysis of continuous models: Steady state solutions, stability and linearization, multiple species communities and Routh-Hurwitz Criteria. Phase plane methods and qualitative solutions, bifurcations and limit cycles with examples in the context of biological scenario. Spatial models: One species model with diffusion. Two species model with diffusion, conditions for diffusive instability, spreading colonies of microorganisms, Blood flow in circulatory system, travelling wave solutions, spread of genes in a population.		Mr. Sujoy Pradhan		
Unit 3	Discrete models: Overview of difference equations, steady state solution and linear stability analysis. Introduction to discrete models,		Mr. Sujoy Pradhan		

	linear models, growth models, decay models, drug delivery problem, discrete prey-predator models, density dependent growth models with harvesting, host-parasitoid systems (Nicholson-Bailey model), numerical solution of the models and its graphical representation. case studies. Optimal exploitation models, models in genetics, stage structure models, age structure models.				
Teaching Plan: Department of Mathematics: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A/3A** **DSC-1A(CC-1): Differential Calculus**	75		01/10/2021 to 24/02/2022	
	Limit and Continuity (ε and δ definition), Types of discontinuities, Differentiability of functions, Successive differentiation, Leibnitz's theorem, Partial differentiation, Euler's theorem on homogeneous functions. Tangents and normals, Curvature, Asymptotes, Singular points, Tracing of curves. Parametric representation of curves and tracing of parametric curves, Polar coordinates and tracing of curves in polar coordinates. Rolle's theorem, Mean Value theorems, Lagrange and cauchy theorems. Taylor's theorem with Lagrange's and Cauchy's forms of remainder, Power series and its convergences. Taylor's series, Maclaurin's series of sin x, cos x, ex, log(l+x), (l+x)m, Maxima and Minima, Indeterminate forms.		Mr. SuvenduMaity Dr. Samir Kumar Bhandari Dr. Asgar Ali		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Teaching Plan: Department of Mathematics: SEMESTER-II(GENERAL)					

UNITS	**PAPER: DSC-1B/2B/3B** **DSC-1B(CC-2): Differential Equations**	75		01/04/2022 to 09/07/2022	
	First order exact differential equations. Integrating factors, rules to find an integrating factor. First order higher degree equations solvable for x, y, p. Methods for solving higher-order differential equations. Basic theory of linear differential equations, Wronskian, and its properties. Solving a differential equation by reducing its order. Linear homogenous equations with constant coefficients, Linear non-homogenous equations, The method of variation of parameters, The Cauchy-Euler equation, Simultaneous differential equations, Total differential equations. Order and degree of partial differential equations, Concept of linear and non-linear partial differential equations, Formation of first order partial differential equations, Linear partial differential equation of first order, Lagrange's method, Charpit's method. Classification of second order partial differential equations into elliptic, parabolic and hyperbolic through illustrations only.		Mr. SuvenduMaity Dr. Asgar Ali Sima Mondal		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
Teaching Plan: Department of Mathematics: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C** **DSC-1C(CC-3): Real Analysis**	75		01/10/2021 - 05/02/2022	**4th week of November,2021 &1st Week of January,2022**
	Finite and infinite sets, examples of countable and uncountable sets. Real line, bounded sets, suprema and infima, completeness property of R, Archimedean property of R, intervals. Concept of cluster points		Mr. Sujoy Pradhan Mr. Rudrani Jana		

	and statement of Bolzano-Weierstrasstheorem.Real Sequence, Bounded sequence, Cauchy convergence criterion for sequences. Cauchy's theorem on limits, order preservation and squeeze theorem, monotone sequences and their convergence (monotone convergence theorem without proof). Infinite series. Cauchy convergence criterion for series, positive term series, geometric series, comparison test, convergence of p-series, Root test, Ratio test, alternating series, Leibnitz's test (Tests of Convergence without proof). Definition and examples of absolute and conditional Convergence Series. Sequences and series of functions, Pointwise and uniform convergence. μ-test, M-test, Statements of the results about uniform convergence and integrability and differentiability of functions, Power series and radius of convergence.		Dr. Samir Kumar Bhandari Dr. Asgar Ali		
UNITS	**PAPER: SEC-1: Logic and Sets**	50			
	Introduction, propositions, truth table, negation, conjunction and disjunction. Implications, biconditional propositions, converse, single words and inverse propositions and precedence of logical operators. Propositional equivalence: Logical equivalences. Predicates and quantifiers: Introduction, Quantifiers, Binding variables and Negations. Sets, subsets, Set operations, the laws of set theory and Venn diagrams. Examples of finite and infinite sets. Finite sets and counting principle. Empty set, properties of empty set. Cartesian product. Partition of sets. Power set of a set. Difference and Symmetric difference of two sets. Set identities, Generalized union and intersections. Relation: Product set, Composition of relations,		Sima Mondal		

	Types of relations, Partitions, Equivalence Relations with example of congruence modulo relation.				
Teaching Plan: Department of Mathematics: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3D** **DSC-1D (CC-4): Algebra**	75		15/03/2022 to 25/06/2022	**4th week of April,2022 &3rd week of June,2022**
	Definition and examples of groups, examples of abelian and non-abelian groups, the group Zn of integers under addition modulo n and the group U(n) of units under multiplication modulo n. Cyclic groups from number systems, complex roots of unity, circle group, the general linear group GLn (R), groups of symmetries of (i) an isosceles triangle, (ii) an equilateral triangle, (iii) a rectangle, and (iv) a square, the permutation group Sym (n), Group of quaternions. Subgroups, cyclic subgroups, the concept of a subgroup generated by a subset and the commutator subgroup of group, examples of subgroups including the center of a group. Cosets, Index of subgroup, Lagrange's theorem, order of an element, Normal subgroups: their definition, examples, and characterizations, Quotient groups.Definition and examples of rings, examples of commutative and non-commutative rings: rings from number systems, Zn the ring of integers modulo n, ring of real quaternions, rings of matrices, polynomial rings, and rings of continuous functions. Subrings and ideals, Integral domains and fields, examples of fields: Zp, Q, R, and C. Field of rational functions.		Dr. Asgar Ali Dr. Samir Kumar Bhandari Rudrani Jana Mr. SuvenduMaity		
UNITS	**PAPER: SEC-2: Graph Theory**	50			

	Definition, examples and basic properties of graphs, pseudo graphs, complete graphs, bi-partite graphs, isomorphism of graphs, paths and circuits, connected graphs, Eulerian circuits, Hamiltonian cycles, the adjacency matrix, weighted graph, travelling salesman's problem, shortest path, Dijkstra's algorithm, Floyd-Warshall algorithm.		Mr. Sujoy Pradhan Sima Mondal		
Teaching Plan: Department of Mathematics: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A** **DSE-1: Linear Algebra**	75		14/09/2021 to 18/01/2022	**1st week of November, 2021 &4th week of December,2021**
	Vector spaces, subspaces, algebra of subspaces, quotient spaces, linear combination of vectors, linear span, linear independence, basis and dimension, dimension of subspaces. Linear transformations, null space, range, rank and nullity of a linear transformation, matrix representation of a linear transformation, algebra of linear transformations. Isomorphisms, Isomorphism theorems, invertibility and isomorphisms, change of coordinate matrix.		Dr. Asgar Ali Rudrani Jana Mr. SuvenduMaity Sima Mondal		
UNITS	**PAPER: SEC-3: Number Theory**	50			
	Division algorithm, Lame's theorem, linear Diophantine equation, fundamental theorem of arithmetic, prime counting function, statement of prime number theorem. Goldbach conjecture, binary and decimal representation of integers, linear congruences, complete set of residues. Number theoretic functions, sum and number of divisors, totally multiplicativefunctions, definition and properties of the Dirichlet		Mr. Sujoy Pradhan Dr. Samir Kumar Bhandari		

	product, the Möbius inversion formula, the greatest integer function, Euler's phi-function.				
Teaching Plan: Department of Mathematics: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B** **DSE-2 : Numerical Methods**	75		21/02/2022 to 10/06/2022	**1st week of April,2022 & 1st week of June,2022**
	Algorithms, Convergence, Bisection method, False position method, fixed point iteration method, Newton's method, Secant method, LU decomposition, Gauss-Jacobi, Gauss-Siedel and SOR iterative methods. Lagrange and Newton interpolation: linear and higher order, finite difference operators. Numerical differentiation: forward difference, backward difference and central Difference. Integration: trapezoidal rule, Simpson's rule. Solving ordinary differential equations : Euler's method. Runge – Kutta method of second and fourth order, Prediction – correlation methods.		Dr. Asgar Ali Mr. Suvendu Maity Mr. Sujoy Pradhan		
UNITS	**PAPER: SEC-4: Probability and Statistics**	50			
	Sample space, probability axioms, real random variables (discrete and continuous), cumulative distribution function, probability mass/density functions, mathematical expectation, moments, moment generating function, characteristic function, discrete distributions: uniform, binomial, Poisson, continuous distributions: uniform, normal, exponential. Joint cumulative distribution function and its properties, joint probability density functions, marginal and conditional		Rudrani Jana Sima Mondal Mr. Sujoy Pradhan Dr. Samir Kumar Bhandari		

	distributions, expectation of function of two random variables, conditional expectations, independent random variables.				

Music

Teaching Plan: Department of Music: SEMESTER-I (HONOURS)

UNITS	PAPER: CC1 Elementary Knowledge of Music: Terminologies and Concepts	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
1.	Elementary study of sound: musical and non-musical.	75	Mrs Madhushree Sasmal	01-10-2021 to 24-02-2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
2.	Indian concept of nada.		Mrs Shampa Mallick		
3.	Swara – suddha, komal and tibra, chal, achal.		Mrs Shampa Mallick		
4.	Sruti - sruti and swarasthana (ancient and modern period)		Mrs Madhushree Sasmal		
5.	Knowledge of the following musical terms : Sangit, varna, alankar, saptak, (mandra, madhya, tar) thata, raga, astak, murchhana, alap, tan, badi, sambadi, vivadi, anubadi, bandish, gayaki, nayaki, bagyeyakar, murki, jamjama.		Mrs Shampa Mallick		
6.	Theory of mela, thata and raga a. Mela system as introduced by Venkatmakhi. b. Thata system as introduced by V. N. Bhatkhande. c. Difference between thata and raga / mela.		Mrs Madhushree Sasmal		

UNITS	**PAPER: CC2 Thata-Raga Swaramalika Lakshman giti in different Talas (Practical)**	75			1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
1.	Voice culture with the tanpura (manual): suddha swaras, komal swaras, tabraswars.		Dr Payel Mridha		
2.	Basic knowledge of tanpura and its tuning.		Dr Payel Mridha		
3.	Voice culture according to the array of notes of 10 thatas / thata-ragas e.g. i) Bilabal ii) Bhairab iii) Bhairabi iv) Ashabari v) Tori vi) Marowa vi) Purabi vii) Kalyan / iman viii) Bhupali ix) Khambaj x) Kafi		Mr Anupam Jana		
4.	a) alankar b) swaramalika in different talas (such as tintal, jhaptal, ektal) c) lakshman giti and drut kheyal of choosen prescribed ragas: Bhairab, Yaman,Bhupali, Bilawal		Dr Payel Mridha		
UNITS	**PAPER: GE-1 History of Indian Music**	75			1st internal examination on 4th week of December, 2022 and 2nd
1.	Music during the Indus Valley Civilization		Mr Anupam Jana		
2.	Music in the Vedic Period.		Mr Anupam Jana		
3.	Development of Dhrupad.		Mrs Madhushree Sasmal		

4.	Development of Khyal.		Mrs Madhushree Sasmal		internal examination on 2nd week of March,2022
5.	Theoretical knowledge of Akar Matric Swaralipi System.		Mrs Madhushree Sasmal		
6.	Theoretical knowledge of Hindusthani Notation System.		Mrs Madhushree Sasmal		
7.	Theoretical knowledge of the following Ragas. *Bhairab, Bilabal, Yaman,Bhupali, Asabari, Khambaj, kafi, Bhairabi.*		Mrs Madhushree Sasmal		
8.	Theoretical knowledge of Trital, Ektal, Choutal, Dadra, and Kharba. Ability towrite the thakas of the above Talas in Barabar ,Dwigun and Chowgun Laya.		Mr Tarun Mishra		

Teaching Plan: Department of Music: SEMESTER-II(HONOURS)

UNITS	**PAPER: CC3** Introduction of Rabindra Sangeet and Theoretical Knowledge of Ragas,Talas and Notations **(Theoretical)**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**REMARKS**
1.	The study and overview of Gitabitan and Swarabitan	75	Mrs Madhushree Sasmal	01-04-2022 to 09-07-2022	
2.	Musical atmosphere of jorasanko tagore palace		Mr Tarun Mishra		1st internal examination on 2nd week of May, 2022 and 2nd internal
3.	Introduction to the music masters of Rabindranath		Mrs Shampa Mallick		
4.	Rabindranath's life and creativity in short.		Mrs Madhushree Sasmal		
5.	Knowledge of the following ragas :Bilawal		Mrs Madhushree Sasmal		

	Khambaj Iman Kafi Bhairab Bhairabi Behag Ashabari Jounpuri Jogiya				examination on 2nd week of July,2022
6.	Knowledge of the following talas :Dadra Teora Rupak Kaharba Jhaptal Surfanktal Ektal Choutal Dhamar Trital		Mrs Shampa Mallick		
7.	Talas introduced by Rabindranath		Mrs Madhushree Sasmal		
8.	Knowledge of notations: (Bhatkhande system & Akarmatrik system).				
UNITS	**PAPER: CC4** Rabindra Sangeet: Themetic Variations (Practical)	75			1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
1.	Rabindra Sangeet: Themetic Variations (Practical)60%		Mrs Shampa Mallick		
2.	Rabindra Sangeet: Themetic Variations(Practical) 40%		Dr Payel Mridha		
3.	Practice of Rabindra Sangeet In taal		Mr Tarun Mishra		
UNITS	**PAPER: GE-2** Aspects of Thata, Mela, Raga & Tala (Theoretical)	75			

a.	Knowledge of the Ten Thata system of V.N. Bhatkhande		Mrs Madhushree Sasmal		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
b.	Definition of raga & a brief knowledge of the following:				
	i) Difference between thata & raga		Mr Anupam Jana		
	ii) Raga vargikaran & definition of suddha, chhayalog, sankirna, sandhiprakashraga, paramel prabesak raga		Mr Anupam Jana		
	iii) Theoretical knowledge of Akarmatrik Swaralipi & Hindustani SwaralipiPaddhati		Mrs Madhushree Sasmal		
	iv) Time theory of raga		Mr Anupam Jana		
	Aspects of Tala: 1. Theoretical knowledge of Trital, Ektal (Dwimatric & Trimatric), Chautal, Surphaktala & ability to write the thekas of the above Talas in Barabar, Dwigun & Chaugun Laya		Mr. Tarun Mishra		
	2. Definition of Tala, Matra & Laya • Swara : knowledge of suddha & vikrit swaras, achal swara, ardhodarshak swara • Brief knowledge of sruti & swarasthana (both ancient & modern) • Ten Principal Features (Dasaprana) of Tala		Mr. Tarun Mishra		

Teaching Plan: Department of Music: SEMESTER-III(HONOURS)

UNITS	PAPER: CC5 History of Indian Music – I (Theoretical)	75		01-10-2021to 05-02-2022	4th week of November,2021 &1st Week of January,2022
1.	History of Indian Music in : 1) Music during the Indus Valley Civilization 2) Music in Vedic period 3) Information about music as available in the Epics & Purans		Mrs Madhushree Sasmal		
2.	Detailed theoretical knowledge of the following Talas : Trital, Jhaptal, Chautal, Ektal, Dadra, Kaharwa, Rupak, Surphaktal, Dhamar & Tewra		Mr. Tarun Mishra		
3.	Detailed theoretical knowledge of the following Ragas : Bilawal, Yaman, Bhairava, Khamaj, Kafi & Ashavari		Mrs Shampa Mallick		
4.	Development of music of Sultenate Period & Mughal Period		Mrs Madhushree Sasmal		
5.	Study of the following texts with reference to musical aspects: Natyashastra of Bharata. Brihaddesi of Matanga, Sangeet Ratnakar of Sarangadeva, Naradi Sikhsa of Muni Narad, Rag Tarangini of Kabi Lochan, Sangeet Parijat Of Ahobal, Gitagobinda of Jayadeva, Chaturdandi Prakashika of Pt. Venkatmokhi		Mrs Madhushree Sasmal		
6.	Definition of the following : Sangeet , Nada, Swara, Saptak, Raga, Sruti, Dhwani, Aroha, Abaroha, Vadi, Samavadi, Murchhana,		Mrs Shampa Mallick		

	Thata, Sam, Tali, Khali, Tala, Laya,Anuvadi, Vivadi, Pakad, Jati, Matra, Vibhag, Gram, Alap.				
7.	Characteristics of musical sounds		Mrs Madhushree Sasmal		
UNITS	**PAPER: CC6** Practical Knowledge of Indian Music (Practical)	75			
1.	Ability to sing Alankaras in Barabar-Laya, Dwigun Laya & Chaugun Laya		Dr Payel Mridha		
2.	Identification of 10 Thatas with Swaramalika		Mr Anupam Jana		
3.	Drut Khayals with Alap, Vistars & Tanas in all the following Ragas : Khamaj,Kafi, Ashabari .		Mr Anupam Jana		
4.	General study of the following talas with the ability to recite the thekas in BarabarLaya, Digun & Chaugun Laya : Trital, Dadra, Kaharwa, Ektal & Jhaptal		Mr. Tarun Mishra		
5.	Identification of of Rabindra srista tala		Mr. Tarun Mishra		
UNITS	**PAPER: CC7** Practical Knowledge of RAGA -I(Practical)	75			
1.	Drut khayals with alap, vistars and Tanas in all the following rags : Bhairabi,Jaunpuri, Alahiya-Bilawal, Bhupali, Desh, Brindabani- sarang.		Mr Anupam Jana		

2.	Two Taranas in any two of the above mentioned rags.		Mr Anupam Jana		
3.	General study of the following talas and ability to recite the Thekas in Barabar-laya, Dwigun and chaugun laya.Choutal, Surfanktal, Dhamar, Teora, Rupak.		Mr. Tarun Mishra		
4.	Sight singing - Notation writing & reading (Hindustani and Akarmatrik systemboth)		Dr Payel Mridha		
UNITS	**PAPER: SEC-1 Knowledge of Tala(Theoretical)**	50			
1.	• Detailed theoretical knowledge of Tala with the ability to recite the thekas in Barabar-Laya, Dwigun-Laya,Chaugun-Laya & identification of Tala as mentioned below: • Jhaptal, Choutal, Dhamar, Kaharwa, Jhumra, Trital, dadra, ektal, teora		Mr. Tarun Mishra		
UNITS	**PAPER: GE-3** Theoretical knowledge of music (including advanced theory of Rabindranath)	75			
	a. Advanced theoretical knowledge of Rabindrasangeet – Study of Tagore's sangeetchinta,		Dr Payel Mridha		

	b. Experiments with various forms of music – Deshi, bideshi.		Mrs Shampa Mallick		
	c. Rabindrasangeet Talas, Geetinatya,Nrityanatya, Parjay, etc.- Rabindra Sangee		Mrs Shampa Mallick

	b. Description & history of Tanpura, Tabla- Banya & Pakhowaj		Dr Payel Mridha		
	c. Detailed knowledge of Regional Folk Songs of West Bengal		Dr Payel Mridha		
	d. Brief knowledge about : Kabi Gaan, Panchali Gaan, Akhrai, Jatra, Nataker Gaan.		Dr Payel Mridha		
	e. Detailed knowledge of Kirtan		Dr Payel Mridha		

Teaching Plan: Department of Music: SEMESTER-IV(HONOURS)

UNITS	**PAPER: CC8** History of Indian Music – II (Theoretical)	75		15-03-2022 to 25-06-2022	**4th week of April,2022**
1.	History of Indian Music : Knowledge of Paluskar Notation System, Hindusthani Notation system.		Mrs Madhushree Sasmal		

2.	Life sketch & musical contribution of the following Musicians: Sourindra Mohon Thakur, Swami Prajyananda, Krishnadhan Bandopadhaya,Bimal Roy, khestramohan Goswami, Rajeswar Mitra K.D Brihaspati,		Mrs Madhushree Sasmal		**&3rd week of June,2022**
3.	Study of the following texts: Sangeet Samaysar of Parsa Deva, Hriday Prakash ofHriday Narayan Deva, Raga Bibodh of Somenath		Mrs Madhushree Sasmal		
4.	Knowledge of the Musical instruments of Tata, Abanaddha, Ghana and Susir		Dr Payel Mridha		
5.	Time theory of raga & raga bargikaran		Dr Payel Mridha		
6.	Method of producing 72 Melas of pt. venkatmokhi		Mrs Madhushree Sasmal		
7.	Detailed theoretical knowledge of the following ragas & comparative study of similar type of ragas: Todi, Marwa, Puriyadhaneshri, Chayanat, Jaijawanti, Darbari-Kanada, Miyan-Ki-Mallahar, Gurjari-Tdi, Goud-Mallhar.		Mr Anupam Jana		
8.	Definition of the following: paramel prabesak raga, dhruba giti, suddha, chhayalag, sankirna, sandhi prakash raga, Purbanga & Uttaranga pradhan raga.		Mr Anupam Jana		
9.	Ten essential characters of raga		Dr Payel Mridha		
UNITS	**PAPER: CC9** Practical Knowledge of RAGA-II (Practical)	75			

1.	Two vilambit khayals from the mentioned ragas : behag, malkous, jaunpuri, kedar,bhimpalashri, purvi, marwa		Mr Anupam Jana		
2.	Drut khayal of above mentioned ragas		Mr Anupam Jana		
3.	Ability to show following talas with deferent layakaries : Jhumra, Addha, Chautal,Dhamar		Mr. Tarun Mishra		
4.	Ability to sing Bhajan any three of the following :Meerabai, Tulsidas, Kabir,Surdas		Dr. Payel Mridha		
UNITS	**PAPER: CC10** Rabindra Sangeet(Practical)	75			
1.	Tagoressong like,Dhamaranga,Khayalanga,Boulanga withreference to original /Dhramar/Kheyal/Boul/Folk Songs.		Mrs Shampa Mallick		
2.	Bhanu Singher Padabali (two songs only),		Dr. Payel Mridha		
3.	Selected scene from one Gitinatya & Nrityanatya .		Mrs Shampa Mallick		
4.	Tagores song like Dhrupadanga, reference to original Dhrupad		Dr. Payel Mridha		
UNITS	**PAPER: SEC-2 Stage Performance of Song-I (Practical)**	50			
	• Stage performance of Rabindra Sangeet, Nazrulgiti, Bangla Gaan		Dr Payel Mridha		
UNITS	**PAPER: GE-4** Practical Songs of Panchakobi except Rabindranath(Practical)	75			

1.	Any two songs from each composer Dwijendrageeti, Atulprosadi & Nazrulgeeti		Mrs Madhushree Sasmal		
2.	Rajanikanter Gann, Nazrulgeeti		Dr Payel Mridha		
Teaching Plan: Department of Music: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC11** Practical Knowledge of Rabindra Sangeet (Practical)	75		14-09-2021 to 18-01-2022	**1st week of Novembe r, 2021 &4th week of December ,2021**
1.	Ability to sing Rabindra Sangeet as mentionsed below (one from each):		Mrs Shampa Mallick		
2.	Puja Parjay, Swadesh Parjay,Prem parjai, Prakriti parjai, Bichitra Parjay,Anusthanik Parjay,etc.		Mrs Shampa Mallick		
3.	Kabyageeti(only two songs),		Dr Payel Mridha		
4.	Songs based on Rabindra srista Tala (only two songs).		Mrs Shampa Mallick		
5.	Raga analysis of Rabindra Sangeet		Dr Payel Mridha		
6.	Ability to read Notation of unknown Rabindra Sangeet		Dr Payel Mridha		
UNITS	**PAPER: CC12** Practical Knowledge of RAGA-III and TALA(Practical)	75			
1.	Two Dhrupads & two Dhamars from the following ragas with Alap,Layakari & Upaj :Bahar,Durga, Bageshri, Sohini, Sudh-		Mr Anupam Jana		

	Sarang, Bhairav,Yaman,Brindabani – Sarang, Hindol, Behag, MalkosTodi				
2.	One Thumri & one Dadra in the following Ragas : Bhairavi, Khamaj, Pilu, Kafi.		Mr Anupam Jana		
3.	Ability to recite Notation.		Dr Payel Mridha		
4.	Ability to recite the following talas with deferent layakaries: Jat, Deepchandi, Dhamar, Jhumra.		Mr. Tarun Mishra		
UNITS	**PAPER: DSE-1** Concept of music in Tagore Literature	75			
1.	Concept of music as reflected in Tagore Literature		Dr Payel Mridha		
	1. "Komal Gandhar" : Punascha; 2. "Panchishe Baishakh Choleche" : Seshsaptak (43) 3. "Amar Kachhe shunte Cheyecho Ganer Katha" : Seshsaptak (17) 4. Ora Antyaja Ora Mantrabarjita : Patraput (15) 5. Ganer Basa : Punascha; 6. Sangit O Bhab : Sangit Chinta 7. Gan Sambandhe Probandha : Jiban Smriti/Sangit Chinta 8. Sangiter Mukti : Sangit Chitna 9. Shona : Santiniketan 10. Siksha O Sanskritite Sangiter Sthan : Sangit Chinta		Dr Payel Mridha		

UNITS	**PAPER: DSE-2** Karnatak Music	75			
1.	Knowledge of Karnatak Swaras and their comparison with the North IndianSwaras;		Mrs Madhushree Sasmal		
2.	Karnatak Melodic Concepts;		Mrs Madhushree Sasmal		
3.	Karnatak Concepts of Tala with reference to the System of Tala-Subdivisions. Tala-jatis and brief knowledge of the following Talas: Dhruva, Natya, Rupaka, Triputa, Jhampa, Ata and Eka;		Mrs Madhushree Sasmal		
4.	Knowledge of the following: Katapayadi, Varnam, Kriti, Rangam-Tanam-Pallavi,Tillana and Javali;		Mrs Madhushree Sasmal		
5.	Muscial Contributions of Purandava Das, Tyagaraja, Shyama Sastri andMuttuswami Dixitar;		Mrs Madhushree Sasmal		
6.	Brief knowledge of the following musical instruments of Karnataka Music;Karnatak Vina, Vichitra Vina, Mridanga, Ghatam and Nagas waram		Mr. Tarun Mishra		
Teaching Plan: Department of Music: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13** Theoretical knowledge of music (Theoretical)	75		21-02-2022	**1st week**
1.	Comparative study of suddha & vikrit swaras of Hindustani & Carnatic system		Mrs Madhushree Sasmal	to10-06-2022	**of April,2022**

2.	Placing of suddha swaras on veena & their vibretions as explained by Pt. Shrinivas		Mr Anupam Jana		**& 1st week of June,2022**
3.	Detailed theoretical knowledge of the following Talas & ability to compose talalipinotation in Ada, Kuada, Viada Laya : Jhumra, Deepchandi, Ada-Chautal, Matta, Panchamswari, Shikhar		Mr. Tarun Mishra		
4.	Merits & Demerits of a singer		Mrs Shampa Mallick		
UNITS	**PAPER: CC14** Practical Knowledge of Bengali song/ Bangla Gaan(Practical)	75			
1.	Puratani bangla gaan : Shreedhar Kathak, GirishGhosh		Mrs Madhushree Sasmal		
2.	Ability to sing Brahma Sangeet of the following : Rammohan Roy, Debendra NathThakur, Jyotirindra Nath Thakur		Mrs Madhushree Sasmal		
3.	Ability to sing any two folk songs of the following : Baul, Bhatiyali, Jhumur, Tusu		Mrs Madhushree Sasmal		
4.	Ability to sing Kirtan : Gyandas, Chandidas & Vidyapati (any one)		Mrs Madhushree Sasmal		
5.	Puratani bangla gaan : Dasarathi Roy, Kamalakanta,		Dr Payel Mridha		
UNITS	**PAPER: DSE-3 Practical knowledge of Bhajan and Bengali Songs/Bangla Gan (Practical)**	75			
1.	Ability to sing Bhajan : Meera Bai, Surdas, Kabir,Tulsidas		Dr Payel Mridha		

2	Ability to sing the following songs of D.L.Roy, Atulprasad, Rajanikanta,		Mrs Shampa Mallick		
3.	Puratani,agamoni, bijaya, jatra gaan,ramprasadi		Dr Payel Mridha		
4.	Baul, kirtan, Jhumur		Dr Payel Mridha		
5.	Ability to Nazrul Geeti.		Dr Payel Mridha		
UNITS	**PAPER: DSE-4** Practical knowledge of Raga (Practical)				
1.	Ability to sing Drut khayal on the ragas as mentioned below : Yaman, Bhairav, Ashabari,Bhairavi, Jounpuri		Mr Anupam Jana		
	Practice Raaga in Taal		Mr. Tarun Mishra		
Teaching Plan: Department of Music: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A Theory of Indian Music**	75		01/10/2021to	
1.	***Aspects of Dwani & Swara*** : a) Nada & its basic characteristics b) Swara : knowledge of suddha & vikrit swaras, achal swara, ardhodarshak swara c) Brief knowledge of sruti & swarasthana (both ancient & modern) d) Brief knowledge of the following musical terms : Saptak, Murchhana, Tana, Alankar, Varna & Tuk e) Theoretical knowledge of Akarmatrik Swaralipi &		Mrs Shampa Mallick	24/02/2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination

	Hindustani Swaralipi paddhati				on 2nd week of March,2022
2.	***Aspects of Thata, Mela & Raga :*** a) Knowledge of the ten Thata & system of V.N. Bhatkhande b) Definition of raga & a brief knowledge of the following : 1. Difference between thata & raga 2. Raga vargikaran & definition of suddha, chhayalog, sankirna, sandhiprakashraga, paramel prabesak raga 3. Raga jati 4. Time theory of raga 5. Theoretical knowledge of raga prescribed in the syllabus		Mrs Madhushree Sasmal		
3.	***Aspects of Tala*** 1. Theoretical knowledge of Trital, Ektal(Dwimatric & Trimatric), Chautal, Surphaktala & ability to write the thekas of the above Talas in Barabar, Dwigun & Chaugun Laya 2. Detailed theoretical knowledge of Rabindra sristaTala & ability to show theThekas in Barabar-Laya, Dwigun-Laya, Chaugun-Laya 3. Definition of Tala, Matra & Laya. 4. Ten Principal Features (Dasaprana) of Tala		Mr. Tarun Mishra		

Teaching Plan: Department of Music: SEMESTER-II(GENERAL)

UNITS	**PAPER: DSC-1B/2B** History of Indian music –I	75	Mrs Madhushree Sasmal	01/04/2022	

1.	**Ancient period:** 1. Music in Vedic period 2. Development of Deshi Sangeet as can be traced from Matanga's Brihaddeshi 3. Development of Gandharva Sangeet as can be traced from Bharats Natyashastra 4. Knowledge of the music as available in the Epics, Buddhists literature & theSanskrit Drammas 5. Study of the following texts with reference to musical aspects: Naradiya Sikhsa ofMuni Narad, Dattilam of Dattila 6. 	infantry battalion, b) Organizational structure of an Armoured regiment, c) Organizational structure of artillery Field Regiment. c) Indian Navy: History, structure, organization, characteristics, command, support services, its role during war. d) Indian Air Force: History, structure, organization, characteristics and Different commands of Indian Air Force: Limitation of Air Force role during war.				
Module II	**Organization of Supported Arms-** a) Paramilitary Forces: Assam Rifles, Central Armed Police Forces, Special Frontier Forces. Central Reserve Police Forces (CRPF), Boarder Security Forces (BSF), IndoTibetan Boarder Police (ITBP), Shasastra Seema Bal (SSB), b) Special Forces: Special Frontier Forces, Central Industry Security Force (CISF). c) Para Special Force [Para (SF)]: Ghatak Force, Marine Commando (MARCOS), Guard Commando Force. d) Other Protection Forces:		Debabrata Samanta		

	National Security Guards (NSG), Special Protection Group (SPG), Railway Protection Forces (RPF). e) Second Line of Defense : Indian Coast Guard, National Cadet Corps (NCC). Territorial Army Badges of Ranks- Honours and Awards - Gallantry award - Doctrine, Corps and field forces - Concept of Integrated Defence staff- Modes of entry to army - Structural changes in Indian Defense Organization B. Military decoration of Indian army: Badges of Ranks- Honours and Awards - Gallantry award - Doctrine, Corps and field forces - Concept of Integrated Defence staff- Modes of entry to army - Structural changes in Indian Defense Organization				
Module III	**Military Geography-**a) Introduction: Meaning, nature, scope and elements of Military Geography. Man and Environment. Role of geography in military application. Military geography in India and defense problem in		Madhumita Maity		

	relation thereto-role of geography in different warfare. b) Evolution of Military Geography: a) History & Development. b) Founders of Military Geography - F. Ratzal, A.T. Mahan, c) Sir. Halfred Mackinder, Karl Haushofer, N.J. Spykman c) Inter-State relations & Geographical factors: a) Frontiers and Boundaries of India - its meaning & differences types of borders and boundaries. b) Communication routes- land, sea and aerial- strategic scope. c) Population and Power d) Geography and Foreign Policy of India: a) India's Geo-strategic significance, b) India's borders, c) Indian Ocean territory and strategic significance. e) Applied Military Geography: Brief idea on a) Global Positioning System (GPS), b) Global Information System (GIS) and c) Remote Sensing.				
Module IV	**Map Reading-** Theoretical aspects of Map Reading: Introduction to different types of Maps, and Conventional Signs. Scales & Grid		Madhumita Maity		

	System. Topographical Relief features, Contours and Gradients - Cardinal points and Types of North - Types of bearings and use of Service Protractor - Prismatic compass and its use. Setting a Map - finding North and own position - Map to Ground, Ground to Map - Point to Point March – use of GPS.				
Module V	**Military History-** a. Definition, Concept, Significance to study Military history. Military system of India since Vedic era to modern India.. A brief survey of the military tradition of India. Weapon, Battle dress. Kautilya's philosophy of war organization and art of war, weapons and interstate relation. War pattern and tactics in different periods in India – a comparative study. Historiography of military history of India. b. Biographies of renowned Generals: i. Niccolo Machiavelli (1469-1527), Giulio Douhet (1869 - 1930), Jorge Smith Patton (1885- 1945), Bernard Law Montogomery (1887-1976), J. E. Rommel		Madhumita Maity		

	(1891-1944) ii. Kodandera Madappa Cariappa (1899-1993), S.H.F.J. Manekshaw (1914-2008), Subrata Mukherjee (1911- 1960), Sundarilal Matharadas Nanda (1915-2009). c. Indian Army War Heroes – PVCs. d. Study of the following important battles of India with its background, causes, results and its review: Battle of Panipath (1526AD), Battle of Plessey (1757AD), Battle of Chillianwalla (1849AD), Kashmir Conflict (1947), Operation of Mizo National Front (1966), Indo Pak war 1965, 1971, Operation Cactus (1988), Sri-Lanka Mission (1987-1990) & Kargil war (1999).				
Module VI	**Field Craft, Battle Craft-** Introduction. Judging Distance and its methods. Description of ground. Recognition, description and indication of landmarks & targets. Observation, Camouflage and Concealment. Field Signals. Section Formations . Section Battle Drill. Fire fighting. Fire Control Orders.		Madhumita Maity		

	Fire and Movement. Knots and Lashings. Section Battle Drill.				
Module VII	**Weapon Training-** Theoretical aspects of Weapon Training: 1. Object of Weapon training . Types of weapons, parts, stripping and assembling of light guns. Characteristics of a rifle - rifle ammunition and its firepower. Rifle Mark III. 2. Stripping, assembling, care and cleaning and sight setting of .22 rifle. 3. Stripping, assembling, care and cleaning of 7.62mm SLR and its loading cocking and unloading. 4. Rules of Aiming. Firing position. The lying position, Holding& aiming. 5. Trigger control and firing a shot. 7. Range procedure and safety precautions. 8. Theory of Group and Snap shooting. 9. Short range firing, Aiming – Alteration of sight. 10. Rifle firing and follow up practice. 11. Parts of heavy weapons, stripping and assembling of heavy weapons. 12. Essentials of Good Shooting				

	DSC1CP: Drill, Military History & Map Reading (Practical)				
1	**Drill with Arms-** a. Getting on parade with rifle and dressing at the order. b. Dismissing and falling out. c. Ground / take up arms d. General salute, salami shastra e. Squad drill f. Short / long tail from the order and vice-versa g. Examine arms		Madhumita Maity		
2	**Military History-** a. Prepare sand models of Battle formation of the following Battles: i) Battle of Plessey, 1757, ii) Battle of Chilianwala, 1849, iii) Three battles of Panipath, iv) Indo-Pak war of 1947, 1962, 1971, v) Kargil war, 1999. b. Draw sketches on plan papers of the following Battles: i) Battle of Plessey, 1757, ii) Battle of Chilianwala, 1849, iii) Three battles of Panipath, iv) Indo-Pak war of 1947, 1962, 1971, v) Kargil war, 1999.		Dilip Biswas		

3	**Map Reading-** 1. Map – civil and military 2. Concept of military maps and map index 3. Topographical sheet 4. Scales and grid system 5. Conventional sign – civil and military 6. Compass : liquid prismatic compass – uses of compass during day and night 7. Location and identification of objects from ground to map and vice-versa 8. Preparation of night march chart 9. Preparation of weather chart 10. Field sketching, eye and memory sketching 11. Determination of visibility of survey maps of hilly region by comparing gradients and section drawing methods.		Madhumita Maity		
4	**Field reports-** Students will submit a field report based on participation in a NCC camps.		Dilip Biswas		
5	**Field visit-** Field visit to military establishment for the demonstration of different weapons, armaments and weapon carriers. Students will submit a field report.		Dilip Biswas		

6	**Laboratory note book-** Students will be required to maintain records of all works done in connection with the topic taught in this paper.		Madhumita Maity		
UNITS	**PAPER: SEC-1: Volunteering-** Course Contents: a) Meaning of volunteering, need for volunteering, types of volunteering, benefits of volunteering. b) United Nations volunteers: An introduction; Youth Empowerment and volunteerism; Role of youth in peace building, development and socio-economic change; Group presentations. c) Traits of an effective volunteers; Self awareness, Essential skills of a volunteer: Importance of effective communication, skills in Conflict Resolution, Team Building, Leadership.	**50**	Madhumita Maity		
Teaching Plan: Department of NCC: SEMESTER-IV(GENERAL)					

UNITS	**PAPER: DSC-1D/2D/3D:** Military Sociology, Military Psychology, Communication Process, Field Engineering, Weapon & Armaments and Adventure Trainings				**4th week of April,2022 &3rd week of June,2022**
Module I	**Military Sociology-** a) Study of Society, Social groups, social interaction: motivation, morality, Personality – Definition and determinants. Social aspects of war. Social effects of war. Post war social problems. Social background of military personnel of India. b) Armed Force and Society: Role of Indian Armed force society and inter-dependence, military aid to civil authorizes. Civil – Military relation in India. c) Indian Armed Forces and Disaster Management: Disaster – aims and objectives, Disaster management – meaning, concept, elements and preventive measures. War and disaster. d) Overseas bases and relations – peace keeping – anti piracy and exploration mission. e) Military Coups: causes and its consequences on society. f) Problem of ex-	**75**	Madhumita Maity	**15.03.2022-25.06.2022**	

	service men of India. Benefits of service for Jawans and Officers. One man one person demands. Role of women in Armed forces: contemporary trends.				
Module II	**Military Psychology-** Military Psychology - Meaning, definition, historical development, role, aim and importance. Relevance of Psychology in the defense problems. Use of the psychology in the war and military use of Psychology. Application of the principles of psychology in the Military training. Personal adjustment factors in adjustment during army life, the recruits of adjustment to combat. Problem of adjustment and the problem of Re-adjustment of ex-soldiers.		Kalpataru Samanta		
Module III	**Communication process-** Communication- main elements, types and methods of communications, media. Communication systems- internet, Faxi mail, Satellites. Characteristics of Wireless Technology (Mobile, Wi Fi, etc). Characteristics of Walkie		Debabrata Samanta		

	/Talkie. Basic Radio Telephony (RT) Procedure. Military Language. Latest trends and development (Multi Media, Video Conferencing, IT). Information system and type of information. Signals- introduction to radio, telephony procedure. Field signals. Air raid warnings.				
Module IV	**Field Engineering-** Principles and applications, camouflage and concealment. Section formation. Mines and types of mines fields, anti tanks and explosive.		Madhumita Maity		
Module V	**Adventure Training-** Introduction to adventure Training, Planning Organization & Conduct. Cycle & Trekking Expeditions. Organization & Conduct of Sightseeing. Spirit of Mountaineering. Selection of camp site Layout & Sanitation in camp.		Madhumita Maity		
Module VI	**Weapon and Armaments-** a. Evolution of arms and armaments in art of war. b. Modern weapons - Small Arms - Theories of small arms.		Madhumita Maity		

	History, characteristics, design, variant, operating mechanism and military significance of following common arms used in Indian Army: Glock, Mouser, IM1 Galil snaiper. .22 Rifle, .303 Rifle, 7.62 Self Loading Rifle . INSAS, LMG, 5.56 mm Rifle. Light Machine Gun (LMG).Multi caliber Individual Weapon System (MCIWS). Modern Submachine Carbine (MSMC), Artillery : Artillery Gun, No 35 HE Grenade, 2 inch Mortar. 40mm L-60 and L-70 BOFFORS GUN. DRDO 155 mm artillery gun, Dhanush Howitzer Indian Fields Gun. Shell and Ammunition: Explosive, Rockets and MortarProperties & Types. Missiles: Concept, characteristics, types. Anti Tank : Brief idea. Nuclear explosive: History, uses, effects, science for formation of nuclear bomb. Weapon Carriers: Characteristics, mechanisms of operation, fire power and military importance of following: Land war weapon carrier, Naval war weapon carrier, Air war weapon carrier, Strategic transport aircraft,				

	Tactile transport aircraft. Military Glider, Military Helicopter Fighter airplane, Bomber, Fighter- Bomber Airplane. Weapons of Mass Destruction - Chemical & Biological Weapons: concept, characteristics and , uses. Nuclear weapons: Nuclear Command Authority in India. Strategic forces command, Indian land based nuclear armed ballistic missile, : Indian Sea based nuclear armed ballistic missiles, Nuclear armed cruise missiles. Air Defense: Brief idea.				
	DSC1DP: Practical				
A	**Adventure training-** Parasailing, Sailing, Slithering, Rock climbing, Cycling and trekking		Madhumita Maity		
B	**Weapon Training-** Stripping as aiming & Sight setting of Riffle. Lying position 'and hold', including bolt manipulation. Trigger control and firing a shot. Aiming, Range figures targets–Range procedure and safety precautions. Alteration of Sight and firing				

	shots. Firing in different wind conditions. Range classification firing. On Guard hip firing. The point 2 point. Training stick (Self defense & attack). LMG - Stripping, assembling, piston group and barrel. LMG - Loading, unloading, Sight, aiming and holding.				
C	**Weapon Training – Field craft, Battle craft, Patrolling and Field engineering-** 1. Judging distance and indication of targets. 2. Camouflage & Concealment 3. Fire discipline & Fire control order. 4. Observation and Concealment exercise. 5. Simple Verbal orders. 6. Field Signals 7. Section battle drill.				
D	**Weapons and Armaments-** 1. Demonstrate following arms: .22 Riffles, .303 Riffles, Self Loading Rifles, INSAS LMG 5.56 mm, LMG, Sten Machine Carbine. Pistol & Revolvers. No 36 HE Grenade, Artillery Gun, Air Defense Gun. Students will require drawing and explaining the important stages of mechanisms of the above weapons. 2. Students will be required to				

	draw sectional diagrams showing the parts connected with the mechanisms of movements and firing of the following armaments: Tanks, Air craft - Fighters, Bombers, Transport, Helicopters. Naval Ships - Frigates, Destroyers, Submarine and Torpedo.				
E	**Project-** Project report will be based on Field visit to military establishment/ places of military interests.		Dilip Biswas		
F	**Laboratory Note Book and Viva Voce-** Students will be required to maintain records of all works done in connection with the topic taught in this paper.				
UNITS	**PAPER: SEC-2: Revolutionary war and low Intensity Operations-** Course Contents: A. Guerilla War / Asymmetric Warfare: 1. Meaning and concept, 2. Principal and characteristic 3. Guerilla strategy and Tactics, 4. Contributors to the Guerilla war B. Insurgency ad counters Insurgency: 1. Meaning		Madhumita Maity		

	and concept, 2. Basic Characteristics, 3. Causes, 4. Counter Measures.	**50**			
Teaching Plan: Department of NCC: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A:** India's Defence Mechanism	**75**			**1st week of November, 2021 &4th week of December,2021**
Unit I:	**India's Defence Forces-** a) Rank Structure of three Services b) Recruitment Methods of three Services c) Important Training Institutions of three Services d) Second Line of Defence(Introduction to Paramilitary Forces, in brief)		Dilip Biswas		
Unit II	**Defence Organizations in India-** a) Power of President of India in relation to Defence b) Role and Functions of Ministry of Defence, Government of India c) Composition and Function of Defence Committee/National Security Council(NSC) d) Chief of Staff (COS) and Joint Service Organization		Debabrata Samanta	**14.09.2021-18.01.2022**	

Unit III	**Army Organization-** a) Organization of Army Headquarter(Role of Chief of Army Staff(COAS) and Principal Staff Officers(PSOs) b) Static and Field Formation of Indian Army c) Arms and Services		Madhumita Maity		
Unit IV	**Air Force Organization-**a) Organization of Air Force Headquarter; b) Role of Chief of Army Staff(COAS) and Principal Staff Officer(PSOs) c) Static and Field Formation of Indian Air force		MM		
Unit V	**Navy Organization-** a) Organization of Air Force Headquarter b) Role of Chief of Army Staff(COAS) and Principal Staff Officer(PSOs) c) Static and Field Formation of Indian Navy		MM		
	DSE1AP: Practical				
1	Paper Clippings on Security related Issues and a Case Study Report thereon.		MM		
2	Field Visit: Field Visit to a Place/Unit having importance on National Security and/or Strategic Defence.		DB		

3	Laboratory Note Book: Sand Model on Human Security/ Illegal Migration/Organised Crime.		MM		
UNITS	**PAPER: SEC-3:** Armed Forces (Specialized Subject)	**50**			
Unit I	**Organizations-** a) Basic Organizations of Armed Forces b) Organization of Army c) Badges and Ranks		MM		
Unit II	**Infantry Weapon and Equipment-** a) Characteristics of Rifle and 7.62 mm SLR, b) Ammunition, Fire Power, Stripping, Assembling and Cleaning				
Unit III	**Military History-** a) Biographies of Renowned Generals b) Indian Army War Heroes-PVCs				
Unit IV	**Communications-** a) Types of Communications b) Characteristics of Wireless Technology (Mobile, WiFietc)		DB		
UNITS	**PAPER: GE-1:** Introduction to the History of National Cadet Corps (NCC)				

Unit I	**History of National Cadet Corps-** National Cadet Corps of Independent India, The National Cadet Corps Act 1948, Motto of NCC, Aims and Objectives, Emblem, National Flag, NCC Song, Organisation of NCC- Army, Navy, Air Force, Training Organization		MM		
Unit II	**Youth Organization-** Introduction, Importance, Association of our Great Leaders with Youth Organization- Mahatma Gandhi, Jawaharlal Nehru, Netaji Subhas Chandra Bose, Sardar Ballabh Bhai Patel		DB		
Unit III	**Nationalist Movement in India-** Formation of Indian National Congress, Jalianwalabagh Massacre, Non-Cooperation Movement, Simon Commission, Civil Disobedience Movement, Quit India Movement, Emergence of Independence Day and Republic Day	**75**	DS		
Unit IV	**Military History-** Great Military Leaders: Maharana Pratap, Chhatrapati Shivaji, Tipu Sultan, Rani Lakhsmi Bai, Famous Battle/War:		MM		

	Sepoy Mutiny, World War I and II, Ind- Pak War, 1948, 1965, 1971, and 1999, Sin-Indian War 1962				
Unit V	**Introduction to Defence Services-** Army, Navy and Air Force; Organization Structure of NCC Organizations (COY, Battalion, Group, Directorate);NCC as a path to Career Building.		MM		
	GE1P:Practical				
1	Paper Clippings and Photographs of different NCC activities and Training Programme son Security related Issues and a Case Study Report thereon.		MM		
2	Field Visit: Report on Field Visit to a Place/Unit having importance on NCC activities and Training.		DB		
3	VIVA VOCE		DB		
Teaching Plan: Department of NCC: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B:** International Terrorism				**1st week of April,2022 &**
Unit I	Terrorism, Meaning, Concept, Philosophy and Historical Perspective		MM		

Unit II	Causes of Terrorism: Social, Economic, Political and Religious		MM		**1st week of June,2022**
Unit III	International Terrorism, State Terrorism and State-sponsored Terrorism Context		DB		
Unit IV	Terrorism and National Security, Strategy for fighting against Terrorism		MM		
	DSE1BP: Practical				
1	Paper Clippings on Security related Issues and a Case Study Report thereon	**75**	MM	**21.02.2022-10.06.2022**	
2	Field Visit: Field Visit to a Place/Unit having importance on National Security and Strategic Defence				
3	Laboratory Note Book; Viva-Voce				
4	Educational Tours and its Reports				
UNITS	**PAPER: SEC-4:** Indian Air Force (Specialized Subject)				

Unit I	**General Service Knowledge-** a) Development of Aviation b) History of Indian Force	**50**	MM		
Unit II	**Principle of Flight-** a) Introduction b) Laws of Motion c) Glossary of Terms				
Unit III	**Airmanship-** a) Introduction b) Airfield Layout c) Role of the Air, Circuit Procedure d) ATC/RT Procedures e) Aviation Medicine				
Unit IV	**Maintenance-** a) Aero Engine Introduction b) Minimum Mechanical Knowledge for Maintenance c) Ammunition, Fire Power, Stripping, Assembling and Cleaning		DB		
UNITS	**PAPER: GE-2:** International Relations				
Unit I	Introduction to the Understanding of International Relations, Theories and Approaches		MM		
Unit II	Diplomacy and Foreign Policy: Theoretical Background, Contemporary Issues in Indian Context				

Unit III	International Relation of India with its Neighbouring Countries (Pakistan, Bangladesh, Nepal, Sri Lanka, Bhutan and China)				
Unit IV	End of Cold War and Emergence of New World Order (after 9/11/2001)		DS		
	GE2P: Practical	**75**			
1	Laboratory Note Book: Strategic Maps of India: India and her Neighbouring Countries; India and Indian States and Union Territories with Capital, Strategic Raw Materials, Defence Industries and Atomic Reactors		MM		
2	Short Presentation/ Lecture				
3	Records		DB		
4	VIVA VOCE				

NSS

Teaching Plan: Department of NSS: SEMESTER-I(GENERAL)

UNITS	PAPER: DSC-1A/2A/3A: History, Philosophy, Aims & Objectives of NSS	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
1	**Basic concept of NSS** **a. History and Objectives** **b. Significance of Emblem, Flag, Motto, Song, Badge Discipline** **c. Organisational Structure of NSS: National State, University, college** **d. NSS Functionaries : Roles and Responsibilities**	75	SUCHHANDA BERA	01/10/2021 TO 24/02/2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
2	**Concept of the Nation, Community, Family and Nature a. What is Nation and National integration** **b. Communities and intervention of Caste, Religion and language** **c. Family as primary Unit and Community** **d. Man and Nature**		RAJIV DEV GOSWAMI		

3	**From Campus to Community a. Concept of Activities : Regular and special camping & day camp** **b. Kinds of Activities: Legal Awareness, Health Awareness, First Aid, Career Gujdance, Child care, Leadership training, Skill development, afforestation, Old –age care, Blood donation, Disaster Management, Swachh Bharat, Campus development,** **c. Understanding Youth as an agent of social Change: Definition and categories of youth, Challenges and opportunities of youth.**		SUCHHANDA BERA		
4	**Volunteerism** **a. Indian Tradition of Volunteerism** **b. Needs and Importance of Volunteerism** **c. Motivation and constraints of Volunteerism**		RAJIV DEV GOSWAMI		

	d. Shramadan as a part of Volunteerism				
Teaching Plan: Department of NSS: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B/3B : Management of NSS Programme in Society**	75		01/04/2022 TO 09/07/2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
1	**Citizenship** **a. Basic features of Constitution of India** **b. Fundamental Rights And Duties** **c. Human Rights, Human Values And Personality Development.** **d. Consumer awareness and the legal rights of the consumer.** **e. RTI**		RAJIV DEV GOSWAMI		
2	**Health, Hygiene and Sanitation** **. Definition needs and scope of health education.** **b. Food and Nutrition.**		SUCHHANDA BERA		

	c. Safe drinking water, water borne diseases and Sanitation(Awachh Bharat Abhijan) **d. National health programme.** **e. Reproductive health** **f. Youth Health: Healthy lifestyles, HIV, AIDS Drugs and substance abuse. Home nursing. First Aid.**				
3	**Youth Development Programme : Yoga and Sports** **a. Youth Development Programme in India National Youth Day. Youth Development Programme at the National level, State level and voluntary sector. Youth focused and Youth-led organizations** **b. Yoga and Sports** **History, philosophy and concept of Yoga and Sports. Different yoga traditions and their impacts. Yoga as a preventive, promotive and**		SUCHHANDA BERA		

	curative method. Yoga and Sports as tools for healthy lifestyles.				
4	Environment Issues and Disaster Management a. Environment conservation, enrichment and sustainability. b. Climate change c. Waste management d. Natural resource management (Rain water harvesting, energy conservation, waste land development, soil conservation and afforestation) e. Energy conservation programme: concept of conservation- conservational and non - conservational energy. f. Introduction to Disaster Management, Classification of disasters. Role of Youth in Disaster Management.		RAJIV DEV GOSWAMI		

	g. Afforestation and tree plantation: Creation of tree consciousness among community. Prevention of soil erosion. Establishment of nurseries. Plantation OF trees and prevention and upkeep of trees. Weed control, pest management and rodent control.				
5	Methodology of conducting survey a. Need for action oriented surveys in NSS b. Identification and selection community problem for investigation c. Methods of collecting information d. Analysis of collected data and preparation of report e. Application of survey findings in problem solving process		RAJIV DEV GOSWAMI		
Practical					

1	First Aids a. Principles of First Aids. Importance of First Aids. b. First Aids for Snake bite, Burns, Drowning, Poisoning, Dog bite		SUCHHANDA BERA		
2	**Social Activity** **Tree plantation, Blood donation, Participation in Social Awareness Programme, Participation in Environment Awareness Programme, Participation in Health and Hygiene Awareness Programme. Participation in Awareness campaing Programme on welfare schemes of the central and state government.**		SUCHHANDA BERA		
3	**Campaigning Programme** **Campaigning on Awareness of Water hervesting techniques, Soil conservation techniques, Community health Programme of central and state government, Gender equality and women empowerment, Child health care Programme,**		SUCHHANDA BERA		

	Blood donors club. AIDS Awareness Campaigning, Self-employment opportunities as per local needs and feasibility.Animal health care Programme Dairy and poultry farming, Total literacy , Road safety, Biogas and smock less chulah.				
4	**Field reports Students will be asked to submit a Field reports on any social Awareness Programme organized by the Institution.** **5. Laboratory Note Book and Viva –voce.**		RAJIV DEV GOSWAMI		
Teaching Plan: Department of NSS: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C: Social work, Family, Community, Society & Youth and Life competencies, additional life skills & Civil /Self Defense.**	75		01/10/2021 TO 05/02/2022	**4th week of November,2021 &1st Week of January,2022**
1	**Family, Community, Society**		SUCHHANDA BERA		

	a. Concept of Family and Society. Growing up in the Family-dynamics and impact. **Community (PRLs and other community – based organization). Human Values – Concept & importance. Gender justice - Concept & needs Old age problems and care. Impact of modernization on family: Definition, nature and effects of modernization.** **b. Organization of Family and Child Care: Philosophy of family and child care programme. Nutrition: calories, protein and vitamin requirements of the child during development stages. Balanced diet. Nutrition education. Prevention of diseases caused by some deficiency. Common ailments of infancy and childhood, infectious diseases, immunization, booster doses. Role of Government and voluntary agencies in the development of Family and child care programme with special reference to: Integrated Child Development Service (ICDS), applied nutrition programme,**				

	mid-day meal programme, and special nutrition programme. Maternity and child care: Mother mental and physical health care during pregnancy and delivery. Child development from conception till maturity – role of parents. Peer groups, school community in socialization of the child health programme. Common ailments of infancy and child hood, infectious diseases, immunization, booster doses. **c. Population dynamics and family planning; Population problems, goals of family planning, methods of family planning, methods and media of communication in family planning. Population education and the role of NSS.** **d. Prevention and control of communicable diseases: infectious diseases, mass communication and the role of NSS.** **e. Community Mobilization: Mapping of Community Stakeholders. Designing the message in the context of the problem and the**				

	culture of the community. Identifying methods of Mobilization. Youth-Adult Partnership.				
2	**Society and Youth** **a. Definition and Profile of youth. Importance of youth for society. National youth policy. Other youth programme / schemes of GOI.** **b. Current issues and social problems. Poverty, ill health, illiteracy, rapid population growth, youth employment and under employment. Nature of social deviance, delinquency and crime, beggary, corruption, adulteration hoarding, profiteering, dowry system, etc. Problems of physically and mentally handicapped. Problems of socially/ educationally backward communities' i.e. Schedule castes Schedule tribes and Denitrified Tribes. Problem resulting from regional on national catastrophes – draught, flood, etc.** **c. Youth leadership: Meaning and types of leadership. Qualities of good leaders; traits of**		RAJIV DEV GOSWAMI		

	leadership. Importance and role of youth leadership. **d. Social harmony, National Integration and youth: Indian History and culture. Role of youth in peace building and conflict resolution. Role of youth in Nation building** **e. Youth and Crime: Sociological and Psychological factors influencing Youth Crime. Peer mentoring in preventing crimes. Awareness about anti ragging. Cyber-crime and its prevention. Juvenile Justice: concepts & needs.**				
3	**Social Work** **a. Social Work- History, philosophy, ideology. Social service and its need. Weaker sections of our society and their Needs.** **b. Relationship of social work with social services, social welfare, social security & social reforms.**		RAJIV DEV GOSWAMI		

	c. Family planning, HIV/AIDS: Causes & Prevention and contribution of Youth towards prevention of AIDS. Cancer, its causes and preventive measures. Drugs and substance abuse. Drug trafficking and crime. **d. Contribution of Youth towards social welfare. NGOs and their contribution to society Life Competencies, additional life skills and Civil/Self Defense** **a. Life Competencies: Definition and importance of life competencies. Communication - process, types & barriers. Inter personal. Motivation – Concept & Cycle. Problem solving and Decision making.** **b. Additional life skills: Communication, interpersonal, problem solving and decision making. Positive thinking. Self-confidence and self-esteem. Setting life goals and working to achieve them. Management of stress including time management.**				

	c. Civil/Self Defense: Civil defense services, aims and objectives of civil defense. Needs for Self-defense training. NCC, NSS, Home Guard, Scouts, Guide - objectives & role.				
4	**Life Competencies, additional life skills and Civil/Self Defense**		SUCHHANDA BERA		
	Practical				
1	**Studies on Socio Economic status a) Visit to selected villages - gathering basic data on socio - economic status.** **b) Visit to urban slum - gathering data on socio - economic status.** **c) Visit to tourist places of Medinipur District and gathering data on socio economic status**		RAJIV DEV GOSWAMI		
2	**Days Observation**		SUCHHANDA BERA		

	NSS Day, Gandhi Jayanti, Ektadiwas, Womens Day, Yoga Day, World Youth Day, World Aids Day, Aranya Saptah and Biographic Inspirational Personalities : Swami Vivekananda, Derozio, Netaji Subhash chandra Bose, Rajnarayan Bose , Mother Teresa.				
3	**Field reports** **i. Students will be asked to submit a Field Reports on any Environment/Health Awareness Programme organized by the Institution.** **ii. Students will submit a field report based on participation in NSS visit of nearby places of tourist/ historical importance and campaign on cleanliness and preservation organized by the institution.**		RAJIV DEV GOSWAMI		
4	**Project Work** **Preparation of a Project Report on topics taught in this paper.**		SUCHHANDA BERA		

	5. Laboratory Note Book: Students will be required to maintain records of all works done in connection with the topics taught in this paper.				
UNITS	**PAPER: SEC-1 :Computer Application**	50	NO FOUND STUDENT		
1	**Introduction to Computer Application** **Components of computer-input and output unit, storage unit, CPU, ALU, control unit. Starting & quitting windows, setting display, time & date, managing files and folders. Meaning, need and importance of information and communication technology (ICT). Application of computer and computer software in for social service programme.**		NO FOUND STUDENT		
2	**Word** **Introduction to word. Creating, saving and opening a document. Formatting & editing features, drawing table and graphs, page setup, paragraph alignment, spelling and grammar**		NO FOUND STUDENT		

	check, bullets and numbering, page number, header and footer, footnote and endnotes, mail merge, printing option and hyperlink. Preparation of word document.				
3	**Excel** **Introduction to Excel. Creating, saving and opening spreadsheet. Format and editing features, adjusting columns width and row height, Creating formulas, short and filter, inserting graph and pictures, printing option. Preparation of Excel worksheet.**		NO FOUND STUDENT		
4	**Power Point** **Introduction to Power Point. Creating, saving and opening a ppt file. Format and editing features, slide show, design, inserting slide number, picture, graph, table, hyperlink and graphics. Preparation of Power Point Presentation.**		NO FOUND STUDENT		

Teaching Plan: Department of NSS: SEMESTER-IV(GENERAL)

UNITS	**PAPER: DSC-1D/2D/3D : Method of Organising Human Service to the Nation through students and youths**	75		15/03/2022 TO 25/06/2022	**4th week of April,2022 &3rd week of June,2022**
1	**Special Camping Program** **Nature, objectives and types. Concept of camp: identification of community problems – importance of group living – team building. Ice breaking and team building activities. Adaptation of village. Selection of camp site and physical arrangement. Identification of specific theme. Planning for camp - pre, during and post campaigning activities. Organizatin of NSS camps through various committees and discipline in the camp. Co-ordination with local planning Government and other agencies. Healthy Programmes and activities to be undertaken in the camp. . Use of mass media in NSS activities. Feedback /Evaluation: post camping activities.**		SUCHHANDA BERA		
2	**Special Program**		SUCHHANDA BERA		

	a. Legal awareness, Health awareness, Environment awareness. b. First aid, Career guidance. c. Leadership training – cum- cultural guidance. d. Globalization and its economic, social, political and cultural impacts.				
3	**Rural work under NSS** **i) Nature of rural society, ii) Problems in rural and tribal areas: Agricultural problems – low productivity tenancy, problems of bonded labours; Rural migration to towns and cities; Rural medical health services – prevention of diseases environmental sanitation through disposal of garbage, construction of soak pits, drains, roads etc. And provision of safe drinking water supply; Need for subsidiary occupation for the poor organization of village industries; Difficulties in organizing the literacy programmes and rural libraries, iii) Rural Youth Programme organization youth club, Young Farmers club, Mahila Mandal, iv) Integrated Rural Development- concept, v) Structure of**		RAJIV DEV GOSWAMI		

	Extension Agencies in rural areas vi) Credit facilities in rural areas, vii) Land reforms and tenancy, viii) Programme for weaker sections of the society in relation to the 20- point Economic Programme, e.g. allotment of house sites to schedule castes/schedule tribes, legal aid to the rural poor etc. ix) Re-cycling of waste and use of gobar gas plants x) NSS and other youth programmes.				
4	**Urban work under NSS** **i) NSS work in urban slums – housing projects, health services, ii) Medical social service work and community health programme, iii) NSS programme in Welfare Institutions, iv) NSS programme in primary schools.**		SUCHHANDA BERA		
5	**Role and Importance of Government Organisations (GO) and Non-Government Organization(NGO)** **Meaning, characteristics and functions of NGO. Characteristics and Functions. Structure of**		RAJIV DEV GOSWAMI		

	Government Organisations and Non – Government Organisations. Co-ordination of National Service Scheme (NSS) with Government Organisations (GO) and Non-Government. Organisations (NGO)). Grants for NSS from GO's for activities- Regular Activities, Camping activities, Other Programme Development Scheme - e.g. HIV-AIDS, Blood Donation. Studies on UNICEF (United Nations Children's Emergency Fund), WHO (World Health Organization).				
Practical					
1	**Campus development program a. Campus development, tree planting maintenance and greening the campus cleaning.** **b. Campus development activities – clean environment campaign, formation of plastic free zones.** **c. Campus improvement activities.**		SUCHHANDA BERA		

2	**Agency visits** **Specified by the respective institution**		SUCHHANDA BERA		
3	**Special camp** **Students will attend one special camp in the selected village and undertake various activities based on the need of that village. Students will submit a report based on the NSS camps.**		SUCHHANDA BERA		
4	**Project Project report will be based on field work assignments in nearby village or urban slums of NSS interests.** **5. Laboratory note book and Viva Voce:** **Students will be required to maintain records of all works done in connection with the topic taught in this paper.**		RAJIV DEV GOSWAMI		

UNITS	**PAPER: SEC-2 : Value System & Gender Sensitivity**	50			
1	Value System a. Meaning of Values, Types of Values. b. Human Values & Social Responsibilities c. Indian Value System – the Concepts and its Features. d. Eleven Vows		NO FOUND STUDENT		
2	Gender Sensitivity and Women Empowerment a. Concept of Gender. b. Causes behind Gender related problems and remedial measures. c. Meaning of Woman Empowerment. d. Various Schemes for Woman Empowerment in India.		NO FOUND STUDENT		

Teaching Plan: Department of NSS: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A : Entrepreneurship Development & Rural Resource Mobilization**	75		**14/09/2021 TO 18/01/2022**	**1st week of November, 2021 &4th week of December,2021**
1	**Entrepreneurship Development a. Definition, role of small scale industries in the nationaleconomy.** **b. Characteristics and types of small scale industries; demand-based and resources-based ancillaries.** **c. Government policy(s) for small scale industries; stages in starting a small scale industry.**		SUCHHANDA BERA		
2	**Project identification, planning and control** **a. Assessment of viability, formulation, evaluation, financing.**		SUCHHANDA BERA		

	b. Field-study, preparation of project report, demand analysis, materialbalance and output methods, benefit cost analysis. **c. The financial functions, cost of capital approach inproject planning and control** **d. Laws concerning entrepreneurship.** **e. Role of various national and state agencieswhich render assistance to small scale** **Industries.**				
3	**Rural resource mobilization** **a. Basic objectives** **b. Case study of eco-village, eco-tourism and agro-tourism.** **c. Micro financing with special reference to self-help groups.**		**RAJIV DEV GOSWAMI**		

	d. Rural entrepreneurship development through traditional technologies.				
4	**Ideal village** **a. Concept and case studies.** **b. Sustainability of model village.** **c. NGOs and SHGs- role in rural development**		**RAJIV DEV GOSWAMI**		
Practical					
1	**Model entrepreneur development project** **a. Project development.** **b. Entrepreneurship model framework**		**SUCHHANDA BERA**		
2	**Visits** **Visit to village-based and community-based entrepreneurship programme(s).**		**SUCHHANDA BERA**		
3	**Training**		**RAJIV DEV GOSWAMI**		

	Training (duration as per the college discretion) at village entrepreneurship/ SHG/NGO engaged in rural development. Students will submit a report on training. **4. Laboratory note book and Viva Voce:Students will be required to maintain records of all works done** **in connection with the topic taught in this paper.**				
UNITS	**PAPER: SEC-3 : Human Rights and Consumer Protection Rights**	50			
1	**Human Rights** **a. Human Rights definition** **b. Universal declaration of Human Rights** **c. Human Rights: voices of youths** **d. History of youth for Human Rights** **e. Importance of Human Rights education**		RAJIV DEV GOSWAMI		

2	**Fundamental rights of Indian Citizens** **a. Fundamental rights of Indian Citizens** **b. Fundamental Duties of the Indian Citizens** **c. Human Rights in India**		RAJIV DEV GOSWAMI		
3	**Consumer Rights** **Consumer Rights** **a. Consumer rights of Indian Citizens** **b. Directive Principle of State Policy**		SUCHHANDA BERA		
4	**Redressal of violation of consumer rights** **a. District Redressal Forum, State Forum** **b. National Council**		SUCHHANDA BERA		
5	**Consumer Safety** **a. Consumer and Food Safety**		SUCHHANDA BERA		

	b. Banking and Insurance problems **c. Misleading Advertisement**				
UNITS	**PAPER: GE-1 : First- Aid for Disasters Management**	75	SUCHHANDA BERA		
1	**Introduction to First –Aid Concept. Aims of first-aid. Significance. Types and Levels. Principles of first-aid.** **Emergency Medical Responder and Roles**		SUCHHANDA BERA		
2	**First –Aid Assessment and Supplies First –Aid Assessment and Supplies** **Recognizing Emergencies. Assessing the situation. Disaster Kit. Home First Aid Kit,** **Travel First Aid Kit. Organizing Shelter. Check-lists. Safety Tools. DRAB and ABCD of first-aid.**		SUCHHANDA BERA		

3	**Disasters specific safety guideline** **Landslides, Earthquakes, Fires, Floods, Hazardous Materials. Epidemics. Others. Life-stock safety and Management during disasters**		RAJIV DEV GOSWAMI		
4	**Emergencies and What to do** **The ABC Bites and Stings. Breathing. Bleeding. Fractures. Burns. Choking. Cold and** **Heat related illnesses. Convulsions and Seizures. Cardiac Problems. Dizziness and** **Fainting. Eye and Ear injuries. Head, neck and spine injuries. Infectious diseases. Poison. Shock. Stroke and Tooth injuries. Drowning, Dizziness and Fainting.**		RAJIV DEV GOSWAMI		
5	**Tools and Techniques for First Aid** **Concept of Basic Life Support. Bandaging, Slings and Binders. Checking**		RAJIV DEV GOSWAMI		

	Pulse. Cardiopulmonary resuscitation (CPR).Clearing Air-way obstruction. Using the Fire extinguisher.				
	Practical				
1	**Breathing and circulation , Life- saving practices**		SUCHHANDA BERA		
2	**Removing clothing , Casualty handling**		SUCHHANDA BERA		
3	**Preparation of First aid Toolbox**		SUCHHANDA BERA		
4	**Dressings , Cold compresses**		RAJIV DEV GOSWAMI		
5	**Principles of bandaging**		RAJIV DEV GOSWAMI		
6	**Roller bandages, Tubular gauze bandages, square knots, hand and foot cover**		RAJIV DEV GOSWAMI		
7	**Arm sling, Elevationsling, improvised slings**		RAJIV DEV GOSWAMI		
Teaching Plan: Department of NSS: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B : Vocational Skill Development**	75		21/02/2022 TO 10/06/2022	**1st week of April,2022 & 1st**

1	**Vocational Skills** **a) Skill: Meaning, need & types.** **b) Soft and Technical Skill Development Training.** **c) Time Management, Team Work.** **d) Mentoring.**		DIPAK BERA		**week of June,2022**
2	**Vocational Training** **a) Vocation and Training programmes.** **b) Apprenticeship, Internship.** **c) Entrepreneurship Development Skills- Government, Self- Employment.** **d) Marketing of cottage products and outlets.** **e) Industrial Safety Measures.**		DIPAK BERA		
3	**Field applicationa) Marketing of cottage products and outlets**		DIPAK BERA		

	b) Role of cottage industry in development process **c) Micro financing with special reference to Self-Help groups** **d) Entrepreneurship Development Skills-Government, Self- Employment**				
	Practical				
1	**Each student will have the option to select two skills –areas out of the list of vocational skills based on the local conditions and opportunities**		SUCHHANDA BERA		
2	**15-20 days training on one such skill**		SUCHHANDA BERA		
3	**Required arrangements for developing these skills to be provided to each volunteer in collaboration with established agencies that possess the necessary in the related vocational skills**		RAJIV DEV GOSWAMI		

4	**Training: Students will attend two vocational training programme in the selected village.**		RAJIV DEV GOSWAMI		
UNITS	**PAPER: SEC-4 : Environment & Energy Conservation**	50			
1	**Environment – The need of sustainability Introduction to environment and the multidisciplinary nature of environment. Environment conservation and management as the key requirements of sustainability. Definitions, scope and importance, need for public awareness.**		SUCHHANDA BERA		
2	**Environmental Pollution Quantification of environmental pollution, various parameters and indexes. Types of environmental pollution and pollutants. Causes, effects and control measures of – Air pollution, Water pollution, Solid and e-waste management, Soil/land pollution, Noise pollution, Radioactive pollution**		SUCHHANDA BERA		

	and Thermal pollution. Role of an individual in prevention of pollution.				
3	**EMS AND EIA** **Introduction and basics of environmental management systems and environmental impact assessment tools. Linkages between technology, environmental quality and economic gain: Carbon trading, Clean Development Mechanism etc.**		RAJIV DEV GOSWAMI		
4	**Social issues and the environment** **Environment ethics, issues and possible solutions. Urban problems related to energy, water conservation, rain water harvesting, water shed management, rehabilitation problems and concerns – case study of Sardar Sarovar dam, environment protection acts.**		RAJIV DEV GOSWAMI		
5	**Energy- Sources, types and important aspects**		RAJIV DEV GOSWAMI		

	Physical understanding of issues and problems involved with the generation, storage, transport, and usage of various forms of energy in technological society. Types of energy resources as Renewable and Non-renewable energy, fossil fuels and hydropower, nuclear, solar, and wind energy, and issues related to energy conservation in everyday life. Effects of waste products associated with energy generation and usage and energy conservation measures.				
UNITS	**PAPER: GE-2 : Introduction to Disaster Management**	75			
1	**Introduction** **a) Disaster, Hazards, Vulnerability, Resilience, Risks.** **b) Factors & significance, causes, nature, types and magnitude of disasters.**		SUCHHANDA BERA		

	c) History of Disaster, Levels of disasters as per national guideline.				
2	**Consequences of disaster** **a) Causes and consequences of hazards- physical, economic, cultural.** **b) Repercussion of disasters and hazards, Economic damage.** **c) Loss of human and animal life. Destruction of Ecosystem.**		SUCHHANDA BERA		
3	**Environment Issues** **a) Environment conservation, enrichment and Sustainability** **b) Climate Change, Global Efforts for environment conservation** **c) Waste management, Solar Energy in India**		RAJIV DEV GOSWAMI		

	d) Natural resource management: Rain water harvesting, Energy Conservation, **e) Waste land development, Soil conservations and Afforestation.**				
4	**Disaster Management** **a) Role of youth in Disaster Management** **b) Role of NSS team in Disaster Management** **c) National Disaster Response Force and Civil Defense-organization and functions.** **d) Quick Response Team and NDRF.**		RAJIV DEV GOSWAMI		

Nutrition

Teaching Plan: Department of Nutrition: SEMESTER-I(HONOURS)

UNITS	PAPER: CC1T	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
1,2,3	Basic Nutrition: 1. Concept and definition of terms Nutrition, Malnutrition and Health: Brief history of nutritional science. Scope of nutrition.	40T+20P+10I+5A	SAINI MANDAL	01.10.2021 to 24.02.2022	1st internal examination on 4th week of

	2. Minimum Nutritional Requirements and RDA : Formulation of RDA and Dietary Guidelines: Reference Man and Reference Woman. 3. Body Composition and Changes through the life cycle.				December, 2022 and 2nd internal examination on 2nd week of March,2022
4,5	4. Energy in Human Nutrition: Idea of energy and its unit, energy balance, Assessment of energy requirements, Deficiency and Excess, Determination of energy in food, B.M.R & influencing factors, S.D.A. 5. Energy and other nutritional requirement of adult male and female engaged in different types of work (Sedentary, moderate, heavy).		DEBNANDA CHAKRABORTY		
6,7	6. Food as source of nutrients, function of food, definition of nutrition, nutrients and energy, adequate, optimum and good nutrition, malnutrition. 7. Nutrition- Fitness, Athletics and sports.		PIU SASMAL		
8,9,10	8. Food Guide- Basic food groups, How to use food guide (according to RDA). 9. Interrelationship between nutrition and health- Visible symptoms of goods health. 10. Function of nutrients- Carbohydrate, dietary fibre, protein, fat, vitamins, minerals, anti-oxidants, water.		KABERI KANDAR		

11,12,13	11. Effect of cooking and heat processing on the nutritive value of foods. 12. Processed supplementary foods 13. Food sanitation in hygiene.		SUTRISHNA DASH		
	PAPER: CC1P				
1,2,3a,3b	1. Use and care of kitchen equipment. 2. Weights and measures standards; household measures of raw and cooked foods. 3. Food preparation and classifying recipes as good, moderate or poor, sources of specific nutrients, Amount of ingredients to be in standard recipe- a) Portion size b) Beverages: tea, coffee, cocoa, fruit juice, milk, milkshakes.		SUTRISHNA DASH		
3c,4	c) Cereals and flour mixtures- basic preparation and there nutritive value- Boiled rice and rice pulao, chapatti, parantha, sandwiches, pastas, pancakes, cookies and cakes. 4. Vegetables and fruits: Simple salad, dry vegetables, curries, fruits preparation		SAINI MANDAL		

	using fresh and dried stewed fruit, fruit salad.				
5	5. Milk and milk products: Porridges, curds, anner and their commonly made preparations, milk based simple desserts and puddings, custard, kheer, ice-cream		KABERI KANDAR		
6	6. Meat- Cut of meats Meat preparations, Fish, poultry, hard and soft cooked, poached, scrambled, fried omelette, eggnogs		PIU SASMAL		
7,8	7. Soups: Basic, clear and cream soups. 8. Snacks: pakoras, cheese toast, upma, poha, peanut, chikki, ti and laddo		DEBNANDA CHAKRABORTY		
UNITS	**PAPER: CC2T : Food Science and food commodity**	40T+20P+10I+5A		01.10.2021 to 24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
1,2,3,4,5,6,7	1. Basic concept on Food, Nutrients, Nutrition. 2. Classification of Food, Classification of Nutrients. 3. Carbohydrates - Definition, Classification, Structure and properties. Monosaccharides - glucose, fructose, galactose. Disaccharides -		DEBNANDA CHAKRABORTY		

	Maltose, lactose, sucrose. Polysaccharides - Dextrin, starch, glycogen, resistance starch. 4. Lipids - Definition, Classification & Properties. Fatty acids - composition, properties, types. 5. Proteins - Definition, Classification, S Amino acids - Classification, types, functions. 6. Carbohydrates - Sources, daily requirements, functions. Effects of too high - too low carbohydrates on health. Digestion & Absorption. Blood glucose and effect of different carbohydrates on blood glucose. Glycemic Index. Functional role of Sugars in food, Fermention of Sugar. 7. Proteins - Sources, daily requirements, functions. Effect of too high - too low proteins on health. Digestion & absorption. Assessment of Protein quality (BV, PER, NPU). Factors affecting protein bio-availability including anti-nutritional factors tructure & properties.			
8-12,27-31	8. Lipids - Sources, daily requirements, functions. Digestion & Absorption. Role & nutritional significances of PUFA, MUFA, SFA, W-3 fatty acid. 9. Dietary Fibre - Classification, sources, composition, properties & nutritional significance. 10. Minerals & Trace Elements, Bio-Chemical and Physiological Role, bio-availability & requirements, sources, deficiency & excess (Calcium, Sodium, Potassium Phosphorus, Iron, Fluoride, Zinc, Selenium, Iodine, Chromium).		SUTRISHNA DASH	

	11. Vitamins - Bio-Chemical and Physiological Role Physiological role, bio-availability and requirements, sources, deficiency & excess. 12. Water - Functions, daily requirements, Water balance. 27. Beverages: Tea; Coffee. Chocolate and Cocoa Powder-Processing, cost and nutritional aspects, other beverages-Aerated beverages, juices. 28. Preserved Products : Jams, Jellies, Pickles, Squashes, Syrups types, composition and manufacture, selection, cost, storage, uses and nutritional aspects. 29. Food Standards : ISI, Agmark, FPO, MPO, PFA. 30. New food: fast food, junk food, GM food, Free food 31. Food, preservation, food processing, food adulteration and food storage.			
13,14,15,16,17,18	13. Sensory characteristics of food 14 Food behaviour, modification of food beha15. Cereals and Millets: Cereal products, breakfast cereals, fast foods. Structure, processing, storage, use in various preparations, variety, selection and cost. 16. Pulses and Legumes: Production (in brief), structures, selection and variety. Storage, processing and use in different preparations. Nutritional aspects and cost.		KABERI KANDAR	

	17. Milk and Milk-products: Composition, classification, selection quality and cost, processing, storage and uses in different preparations. Nutritional aspects, shelf - life and spoilage. 18. Eggs: Production, grade, quality, selection, storage and spoilage, cost, nutritional aspects and use in different preparations.				
19-21	19. Meat, Fish and Poultry: Types, selection, purchase, storage, uses, cost, spoilage of fish poultry and meat, uses and preparations. 20. Vegetables and Fruits: Types, selection, purchase, storage, availability. Cost of use and nutritional aspects of raw & processed products and use in different preparations. 21. Sugar and Sugar products: Types of natural sweeteners, manufacture, selection, storage and use as preserver, stages in sugar cookery.		SAINI MANDAL		
22-26	22. Fats and Oils: Types and sources (animal and vegetable), processing, uses in different preparations, storage, cost and nutritional aspects. 23. Raising and Leavening agents: Types, Constituents, Uses in cookery and bakery, Storage. 24. Food Adjuncts: Spices, Condiments, Herbs, Extracts, Concentrates, Essences, Food Colours.		PIU SASMAL		

	Origin, classification, Description, uses, Specifications, procurements and Storage. 25. Convenience Foods: Role, types, advantages, uses, cost and contribution to diet. 26. Salt: Types and uses.				
	PAPER: CC2P : Nutritional Biochemistry (Practical)				
1a,1c	**1. Carbohydrate** a. Reactions of Mono, Di and Polysaccharides and their identification in unknown mixt c. Estimation of lactose in milk.		SUTRISHNA DASH		
1b	b. Estimation of reducing and total sugars in foods		KABERI KANDAR		
2a,2b	**2. Fats** a. Reactions of fats and oils		SAINI MANDAL		

	b. Determination of Acid value, Saponification of natural fats and oils.				
3a	**3. Proteins** a. Reactions of proteins in foods		DEBNANDA CHAKRABORTY		
3b,3c	b. Reaction of amino acids and their identification in unknown mixtures c. Estimation of total nitrogen of foods by Kjeldhal method.		PIU SASMAL		
UNITS	**PAPER: GE-1BASIC HUMAN NUTRITION**	60T+10I+5A		01.10.2021 to 24.02.2022	
1,2	1. Concept and definition of terms-Nutrition, Malnutrition and Health. Brief history of nutrition science. Scope of Nutrition. 2. Body Composition and Changes through the life cycle.		KABERI KANDAR		1st internal examination on 4th week of December, 2022 and 2nd internal examination on
3,6	3. Minimum Nutritional Requirement and RDA. Reference Man and Reference Woman.		SUTRISHNA DASH		

	6. Effect of cooking and heat processing on the nutritive value of foods.				2nd week of March,2022
4,5	4. Food groups. 5. Function of nutrients- Carbohydrate, dietary fibre, protein, fat, vitamins, minerals, anti-oxidants, water.		PIU SASMAL		

Teaching Plan: Department of Nutrition: SEMESTER-II(HONOURS)

UNITS	**PAPER: CC3** **CC-3 Nutritional Biophysics and biochemistry**	**FULL MARKS** **40T+20P+10I+5A**	**NAME OF THE TEACHER**	**MONTH OF TEACHING** **01.04.2022 to 09.07.2022**	**REMARKS**
1,2,3,4	1. Biochemistry: Definition, objectives, scope and interrelationship between biochemistry and other biological science. 2. Biophysics- general idea of biophysics in nutrition 3. Basic process and nutritional importances of Diffusion,Osmosis, Absorption, Viscosity, Surface tension, Colloids.		KABERI KANDAR		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022

	4. Principles of Thermodynamics and its importance in nutrition.				
5,6	5. Acid, Base, Buffer, pH and Acid-Base balance. 6. Molecular aspects of transport; Passive diffusion, facilitated diffusion, active transport.		DEBNANDA CHAKRABORTY		
7,8a,8b	7. Enzymes: Definition, types and classification of enzymes, definition and types of coenzymes. specificity of enzymes, Isozymes, enzyme Kinetics including factors affecting enzyme action, velocity of enzyme catalyzed reactions, enzyme inhibition. 8. Intermediary metabolism: a) Carbohydrate Metabolism, Glycolysis, TCA cycle & energy generation, gluconeogenesis, glycogenesis, glycogenolysis, blood sugar regulation. b) Lipids : Oxidation and biosynthesis of fatty acids (saturated &mono-unsaturated) : Synthesis and utilization of ketone bodies, Ketosis, fatty livers.		PIU SASMAL		
8c,9	c) Proteins : General reaction of amino acid metabolism, urea cycle.		SUTRISHNA DASH		

	9. Lipoproteins : Types, composition, role and significance in disease (in brief)				
10,11	10. Introduction to Nucleic acids: Structure, replication, transcription, genetic code (in brief) elementary knowledge of biosynthesis of proteins. 11. Fluid, Electrolytes and Acid-Base balance brief.		SAINI MANDAL		
	C3P Nutritional Biophysics and biochemistry(Practicals)				
1	1. To study the general properties of urease amd salivary amylase.		SAINI MANDAL		
2,3,4,5	2. Preparation of buffer of particular PH (Phosphate buffer, tris buffer) 3. Determination of strength of $KMNO_4$ using primary standard (oxalic acid). 4. Electrophoresis 5. Dialysis		SUTRISHNA DASH		
UNITS	**PAPER: CC4** **CC-4: HUMAN PHYSIOLOGY**	40T+20P+10I+5A		**01.04.2022 to 09.07.2022**	

1,2,3,4	1. Cell structure and function **2.** Blood cells: Haemoglobin, Blood groups, Coagulation factors, Anaemia. **3.** Skeletal System: bones, joints and bone deformities in brief. **4.** Cardiovascular System: Cardiac cycle, Cardiac output, Blood pressure, Hypertension, Radial Pulse		DEBNANDA CHAKRABORTY		
5,6,12	5. Lymphatic System: Lymph glands and its function, Splen- Structure and functions. **6.** Respiratory System:- Ventilation, functions, Lungs volume and capacities. **12.** Reproductive System: a. Structure and functions of male and female reproductive organs, Menstrual cycle, Puberty, Menopause, fertilization and development of fertilized ovum, placenta and its function.		KABERI KANDAR		

7,8,9,11	**7.** Gastrointestinal System: a. Structure of various parts of the GI tract b. Digestion and absorption of Carbohydrate, protein and fat. (Digestion and absorption of Carbohydrate, protein and fat repeated in CC2T 6, 7, 8) **8.** Endocrinology: List of endocrine glands, Hormonestheir secretion and function (in brief) **9.** Excretory System: Structure of Nephron, formation of urine. **11.** Skin: Structure and function of skin		SUTRISHNA DASH		
10	**10.** Central Nervous System: Parts, Sliding filament theory, neuromuscular junction, wallerian egeneration, Motor Nervous System- Upper motor Nervous System and lower motor Nervous System. Sensory Nervous System, Sympathetic and Parasympathetic nervous system.		SAINI MANDAL		
13	**13.** Special senses: Structure and function of eye and ear, common diseases in eye and ear (in brief).		PIU SASMAL		
	C4 P: HUMAN PHYSIOLOGY (Practicals)				

1	1. Identification of prepared Slides: (a) Lungs, (b) Supra Renal Gland, (c) Thyroid, (d) Pituitary (e) Testis, (f) Ovary, (g) Kidney, (h) Liver, (i) Pancreas, G) Small Intestine, (k) Large Intestine, (1) Spinal cord, (m) Cerebellum.		PIU SASMAL		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
2	2. Preparation of blood film and identification of white blood cells, Differential count.		SAINI MANDAL		
3,4,5,6	3. Estimation of Haemoglobin. 4. Determination of Bleeding time and clotting time of blood, Blood grouping. 5. Measurement of Blood pressure and Pulse Rate. 6. Elicitation of Reflexes and jerks.		SUTRISHNA DASH		
7	7. Estimation of haemoglobin, RBC, WBC, TLC, DLC and ESR.		KABERI KANDAR		
UNITS	**PAPER: GE-2** **FOOD SCIENCE**			**01.04.2022 to 09.07.2022**	
1,2,3	1. Cereals and Millets: Cereal products, breakfast cereals, fast foods. Structure, processing, storage, use in various preparations, variety, selection and cost. 2. Pulses and Legumes: Production (in brief), structures, selection and variety. Storage,		KABERI KANDAR		1st internal examination on 2nd week of May, 2022 and 2nd internal

	processing and use in different preparations. Nutritional aspects and cost. 3. Milk and Milk-products: Composition, classification, selection quality and cost, processing, storage and uses in different preparations. Nutritional aspects, shelf - life and spoilage.				examination on 2nd week of July,2022
4,5,6	4. Eggs: Production, grade, quality, selection, storage and spoilage, cost, nutritional aspects and use in different preparations. 5. Meat, Fish and Poultry: Types, selection, purchase, storage, uses, cost, spoilage of fish poultry and meat, uses and preparations. 6. Vegetables and Fruits: Types, selection, purchase, storage, availability. Cost of use and nutritional aspects of raw & processed products and use in different preparations.		DEBNANDA CHAKRABORTY		
7,8,9	7. Sugar and Sugar products: Types of natural sweeteners, manufacture, selection, storage and use as preserver, stages in sugar cookery. 8. Fats and Oils: Types and sources (animal and vegetable), processing, uses in different preparations, storage, cost and nutritional aspects. 9. Raising and Leavening agents: Types, Constituents, Uses in cookery and bakery, Storage.		SAINI MANDAL		

10,11,12	10. Food Adjuncts: Spices, Condiments, Herbs, Extracts, Concentrates, Essences, Food Colours. Origin, classification, Description, uses, Specifications, procurements and Storage. 11. Convenience Foods: Role, types, advantages, uses, cost and contribution to diet. 12. Salt : Types and uses.		PIU SASMAL		
13,14,15,16,17	13. Beverages : Tea; Coffee. Chocolate and Cocoa Powder-Processing, cost and nutritional aspects, other beverages- Aerated beverages, juices. 14. Preserved Products : Jams, Jellies, Pickles, Squashes, Syrups types, composition and manufacture, selection, cost, storage, uses and nutritional aspects. 15. Food Standards : ISI, Agmark, FPO, MPO, PFA. 16. New food: fast food, junk food, GM food, Free food 17. Food, preservation, food processing, food adulteration and food storage.		SUTRISHNA DASH		
Teaching Plan: Department of Nutrition: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC5**			01.10.2021 to 05.02.2022	
	CC5T: Family meal management and meal planning	40T+20P+10I+5A			**4th week of November,2021 &1st Week**
1,2	1. Nutrition during Pregnancy: Physiology of pregnancy, factors (nonnutritional) affecting pregnancy outcome, importance of		SAINI MANDAL		

	adequate weight gain during pregnancy, antenatal care and its schedule, Nutritional requirements during pregnancy and modification of existing diet and supplementation, nutritional factors affecting breast feeding. Deficiency of nutrients and impact- energy, iron, folic acid, protein, calcium, iodine. Common problems of pregnancy and their managements- nausea, vomiting, pica, food aversions, pregnancy induced hypertension, obesity, diabetes and Adolescent Pregnancy. 2. Nutrition during Lactation: Physiology of Lactation: Nutritional requirements during lactation, dietary management, food supplements, galactogogues, preparation for lactation. Care and preparation of nipples during breast feeding.				**of January,2022**
3,4,5,6	3. Nutrition during infancy: Infant physiology relevant to feeding and care. Breast feeding - colostrums, its composition and importance in feeding. Initiation of breast-feeding and duration of breast-feeding, Advantages of exclusive breast-feeding, Nutritional and other advantages of breast-feeding. Introduction of complementary foods, initiation of management of weaning, breast feeding etc. Bottlefeeding circumstances under which bottle-feeding is to be given. Careand sterilization of bottles.		SUTRISHNA DASH		

	Preparation of formula. Mixed feeding, breast feeding and artificial feeding. Teething and management of problems. 4. Nutrition to toddlers / preschool/school going children or adolescent. 5. Management of preterm and low birth weight children – their special needs. 6. Growth and development from infancy to adulthood: Importance of nutrition for ensuring adequate development, Preventions of growth faltering. Growth assessment by Height, Weight, BMI, Skin fold thickness, Waist Hip Ratio.			
7	7. Geriatric nutrition – Dietary requirement, Geriatric health problems, Nutritional care.		DEBNANDA CHAKRABORTY	
8,9,10	8. Sports Nutrition- nutritional demand on different sports and dietary recommendations. 9. Space Nutrition- Body composition changes in space, special diet in space persons. 10. Meal planning for the family		PIU SASMAL	
11,12,13	11. Indian meal pattern- vegetarian and non-vegetarian 12. Food faddism and the faulty food habits 13. Nutritive value of common Indian recepies.		KABERI KANDAR	
	C5P: Family meal management and meal planning (practical)			
1-9			DEBNANDA CHAKRABORTY	

	1. Planning and preparation of balanced diet for a pregnant women 2. Diet during complication of pregnancy 3. Planning and preparation of balanced diet for a lactating women 4. Preparation of weaning food 5. Planning and preparation of balanced diet for a pre-school children 6. Planning and preparation of balanced diet for school going child. Preparation of packed lunch 7. Planning and preparation of balanced diet for adolescents 8. Planning and preparation of balanced diet for adult men and women of different Physical activity and economic status. 9. Planning and preparation of balanced diet for senior citizen.			
UNITS	**PAPER: CC6**			01.10.2021 to 05.02.2022
	C6T: Community Nutrition and Nutritional Epidemiology	40T+20P+10I+5A		
1,2,3,4	1. Concept of community, types of community, factors affecting health of Community. 2. Nutritional Anthropometry, Biochemical tests and Biophysical methodology - Merits, Limitations		DEBNANDA CHAKRABORTY	

	3. Diet Survey: Need and importance, methods of dietary survey- Merits and Limitations. Family food security. 4. Clinical Signs: Merits, Limitations, Need and importance, identifying signs of PEM, vitamin A deficiency,Vit.–D deficiency and iodine deficiency, Classify clinical sign according to WHO.			
5,6,7,8	5. Nutritional problem in the community 6. National Nutritional Intervention Programme to combat malnutrition 7. Food availability, factors affective food availability and its consumption. 8. Infection and Immunization:Importance and Schedule of Vaccination of Children, Adult andforeign travelers. Full and partial immunization. Role of community for universal vaccination implementation		KABERI KANDAR	
9,12,13,14	9. Principles of Epidemiology: Concept of disease, rate of a disease in a population (attack rate, morbidity rate, mortality rate, incidence and prevalence rate). 12. Epidemiological methods: descriptive studies, analytical studies and experimental studies. 13. Study of the epidemiologic approach – time, place, person distribution.		SAINI MANDAL	

	Determinants of disease. Vital statistics and their significance. 14. Demography- Demography cycle and its applications. Socio-demographic and psychosocial variables.			
10,11,15,16,17	10. Dietary Exposure-National, Household, Institution and Individual level (NHFS and NNMB) 11. Biomarkers and nutrient intakes. 15. Public health hazards from contaminated foods 16. Comparison with norms, standards, Z-scores. 17. Interpretation of the nutritional assessment data and its significance		PIU SASMAL	
18,19,20	18. Determining Validity and Reliability 19. Sources of errors for different methods of measurement relating to nutritional exposures. 20. Malnutrition and Infection vicious cycle-UNICEF conceptual model of Malnutrition.		SUTRISHNA DASH	
	C6P: Community Nutrition and Nutritional Epidemiology (Practical)			
1a,b,c,2	1. Diet and nutrition surveys a. Identification of vulnerable and risk groups		SAINI MANDAL PIU SASMAL	

	b. Diet survey for breast feeding and weaning practices of specific groups c. Use of anthropometric measurement of children and adolescent girls and boys 2. Preparation of visual aids to highlight community nutrition, nutritional awareness, nutritional surveillance.			
3a,b	3. Field visit to- a. Observe the working of nutrition and health oriented programmes (survey based result). b. Hospitals to observe nutritional deficiencies.		SUTRISHNA DASH SAINI MANDAL PIU SASMAL DEBNANDA CHAKRABORTY KABERI KANDAR

6	6. Nucleic acid and Protein Data Bases, Nutrient data bases.		PIU SASMAL	
7	7. Sequence similarity searching by BLAST, Principle, features and types of BLAST, Significance of Multiple Sequence Alignments, Phylogenetic Tree.		SUTRISHNA DASH	
UNITS	**PAPER: GE-3**			01.10.2021 to 05.02.2022
	GE3T: Community Nutrition and Nutritional Programme	60T+10I+5A		
Part-1:	**Community Nutrition and Nutritional Programme**			
1,2,3,4	1. Concept of community, types of community, factors affecting health of Community. 2. Basic concept of Nutritional Programme Formulation. 3. ICDS Programme – Aims, Objectives, Target group, Services provided, Advantages, Limitation, Suggestion for improvement. 4. MDMP – Aims, Objectives, Target group, Service provided, Advantages, Limitation, Suggestion for improvement.		SAINI MANDAL	
5,6,7,8	5. ANP, SNP, CNP, BFP – Aims and Objectives, Target group, Service provided, Advantages, Limitation. 6. PHC and Public distribution system to combat malnutrition		DEBNANDA CHAKRABORTY	

	7. Identifying signs and symptoms of vitamin A deficiency, Vit.–D deficiency, iodine and iron deficiency, and role of prophylaxis programme to overcome such deficiencies. 8. Nutritional Anthropometry, Biochemical tests and Biophysical methodology - Merits, Limitations			
9,10,11,12	9. Diet Survey: Need and importance, methods of dietary survey- Merits and Limitations. Family food security. 10. Concept of Surveillance Systems: Role of international, national, regionalagencies and organizations. 11. Nutritional problem in the community : Epidemiology, etiology and prevention of Marasmus, Kworshiorkar, Scurvy, Ricket, Osteomalacia, Obesity. 12. Importance of dietitian in community		SUTRISHNA DASH	
Part-2:	**Nutrition in specific pathophysiological conditions:**			
1,2,3,4	1. Hospital diets- liquid, clear fluid, soft & normal diets. 2. Diet therapy in diabetes mellitus and obesity. 3. Dietary management and nutritional factors involved in cardiovascular disease like atherosclerosis,hyperlipidemia, hypertension.		SAINI MANDAL	

	4. Diet therapy in peptic ulcer, gastritis, diarrhea, colitis, constipation, flatulence and jaundice.				
5,6,7,8	5. Diet during febrile condition, infection, surgical condition, nephritis, and nutritional anemia. 6. Therapeutic uses of dietary fibers with special reference to chronic constipation, diverticular disease, irritable bone syndrome, obesity and diabetes, possible adverse effects of dietary fibers. 7. Rehydration therapy- Elementary idea about rehydration, Conditions for rehydration. Different types of rehydration therapy with special emphasis on ORS -its types and importance, Age dependent ORS quantity for rehydration therapy. 8. Nutrition and Infection:Infection, a cause of malnutrition and vice-versa. Nutrition and immunity during childhood and in adult.		PIU SASMAL		
Teaching Plan: Department of Nutrition: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC8**	40T+20P+10I+5A		15.03.2022 to 25.06.2022	
	C8T: Diet and Diseases				**4th week of April,2022**
1,2	**1.** Inborn error of metabolism – Lactose Intolerance, Galactosamia, Phenylketonuria and its dietary management.		DEBNANDA CHAKRABORTY		

	2. Etiology, symptoms, diagnostic tests and dietary management of intestinal diseases: Diarrhea, Steatorrhoea, Diverticular disease, Inflammatorybowel disease, Ulcerative Colitis, Flatulence, Constipation, Irritable Bowel Syndrome, Haemorrhoids.				**&3rd week of June,2022**
3,6	**3.** Etiology, symptoms, diagnostic tests and dietary management of Malabsorption syndrome, Celiacsprue, tropical sprue, Intestinal brushborder deficiencies (Acquired disaccharide intolerance), Protein losingenteropathy. RUTF. **6.** Arthritis and gout: Etiology, symptoms, diagnostic tests and dietary management.		PIU SASMAL		
4	**4.** Disease of the liver, Exocrine Pancreas and Biliary System. Liver function tests, application of diet therapy and nutritional care in liver disease. Dietary care and management in Viral Hepatitis, Cirrhosis of liver, Wilson's diseases. Dietary care and management in diseases of Gall Bladder and Pancreas Cholelithiasis, Cholecystitis, Cholecystectomy,Pancreatitis.		KABERI KANDAR		
5	**5.** Anaemias: Pathogenesis and dietary management - Nutritional Anaemias, Sickle Cell Anaemias, Thalassemia, Anaemia resulting from Acute Haemorrhage.		SUTRISHNA DASH		

	C8P: Diet and Diseases (Practical)			
1---8	1. Planning and preparation of diet for diarrhoea patient. 2. Planning and preparation of diet for Steatorrhoea patient. 3. Planning and preparation of diet for Diverticular disease patient. 4. Planning and preparation of diet for Ulcerative Colitis patient. 5. Planning and preparation of diet for Flatulence patient. 6. Planning and preparation of diet for Constipation patient. 7. Planning and preparation of diet for Irritable Bowel Syndrome patient. 8. Planning and preparation of diet for Haemorrhoids patient.		DEBNANDA CHAKRABORTY	
9--15	9. Planning and preparation of diet for Celiac sprue patient. 10. Planning and preparation of diet forViral Hepatitis patient. 11. Planning and preparation of diet for Cirrhosis ofliver patient. 12. Planning and preparation of diet for Cholelithiasis patient. 13. Planning and preparation of diet for Pancreatitis patient. 14. Planning and preparation of diet for Anaemia patient.		KABERI KANDAR	

	15. Planning and preparation of diet for Thalassemia patient.			
UNITS	**PAPER: CC9**	40T+20P+10I+5A		15.03.2022 to 25.06.2022
	C9T: Food Microbiology			
1,2,11	1. Introduction to microbiology and its relevance to everyday life. General characteristics of bacteria, fungi, virus, protozoa and algae. 2. Cultivation of microorganisms: Nutritional requirements of microorganisms, types of media used, methods of isolation. 11. Fermented Foods- Dietary different fermented products, importance of fermented foods.		PIU SASMAL	
3,4	3. Growth of microorganisms: Growth curve, effect of environmental factors in growth of microorganism – pH, water activity, oxygen availability, temperature and others. 4. Primary sources of microorganisms in foods, physical and chemical methods used in destruction of micro organisms in foods - sterilisation and disinfection		SAINI MANDAL	
5,8	5. Food Spoilage: Contamination of micro organisms in the spoilage of different kinds of foods, such as cereal and cereal products,		KABERI KANDAR	

	vegetable and fruits, fish and other sea foods, meat and meat products, eggs and poultry, milk and milk products, canned foods. 8. Beneficial effect of microorganisms-concept of probiotics and related factors			
6	6. Assessing the microbiological quality of food: indicator organisms, microbiological standards, principles of GMP & HACCP in food processing. Safety management at household and industrial level.		SUTRISHNA DASH	
7,9	7. Foodborne infections: Bacterial food infections-Salmonellosis, Shigellosis and Listeriosis. Food poisoning (Staphylococcal and Botulism) - Symptoms, mode of transmission and methods of prevention, Concept of aflatoxin intoxication. 9. Environmental microbiology: Water and water borne diseases, air and air borne diseases, soil and soil borne diseases, sewage and diseases. 10. Waste product handling: Planning for waste disposal- solid wastes and liquid wastes.			
	C9P: Food Microbiology (Practical)			
1,5	1. Study of equipments in a microbiology lab. 5. Preparation of traditional Indian fermented food and its quality checking e.g. testing of physical, chemical and nutritional properties.		SUTRISHNA DASH	

2	2. Preparation of different culture media.		PIU SASMAL	
3,4	3. Staining of bacteria with gram staining. 4. Microbiological examination of milk (Methylene blue reduction test).		SAINI MANDAL	
UNITS	**PAPER: CC10**	40T+20P+10I+5A		15.03.2022 to 25.06.2022
	C10T: Food processing and Preservation			
1,2,3,4	1. Significance, principles of different methods of food processing: thermal processing- Cooking (moist heat, dry heat, combination method of cooking), blanching, pasteurization, sterilization, canning. 2. Principles of microwave cooking and solar cooking. 3. Principle of freezing, changes occurring during freezing. Types of freezing - slow freezing, quick freezing. Food preservation by drying and dehydration, differences between sun drying and dehydration (i.e. mechanical drying), types of driers used in the food industry. 4. Preservation by Irradiation: Units of radiation, kinds of ionizing radiations used in food irradiation. Mechanism of action, concept of cold sterilization.		SUTRISHNA DASH	

5	5. Principle and methods of making pickles, jam and jellies from different vegetables / fruits.		KABERI KANDAR	
6,7	6. Principle and methods of preparation of food from cereals. 7. Principle and methods of preparation of meat, fish, poultry and egg products.		SAINI MANDAL	
	C10P: Food processing and Preservation (Practical) **Practical:**			
A: 1,2	1. **Milk cookery**: Experimental milk cookery. Preparation of selected common recipes. 2. **Egg cookery:** Experimental cookery on eggs-boiled eggs, poached eggs, Omelettes and custards. Preparation of selected common recipes.		DEBNANDA CHAKRABORTY	
3,4	3. **Vegetables Cookery:** a. Different methods of cooking vegetables – effect of shredding, dicing, acid and alkali, pressure cooking, steaming with and without lid. e.g. Potato, beetroot, carrot and greens. Recipes with Vegetables 4. **Fruits**: Prevention of browning on fruits. Preparation of selected common recipes.		KABERI KANDAR	
5,6	5. Estimation of Sodium, Potassium, Calcium and Iron in different food staffs. 6. Estimation of vitamin C content of food by biochemical method.		SUTRISHNA DASH	

B	**B:** **Visit to a food processing industry.**		DEBNANDA CHAKRABORTY KABERI KANDAR

	SEC2T: Women Health & Nutrition			
1,2	1. Factors (non-nutritional) affecting pregnancy outcome, importance of adequate weight gain during pregnancy, antenatal care and its schedule, Nutritional requirements during pregnancy and modification of existing diet and supplementation, Deficiency of nutrients, specially energy, iron folic acid, protein, calcium, iodine. Common problems of pregnancy and their managements, specially - nausea, vomiting, pica, food aversions, pregnancy induced hypertension, obesity, diabetes. Adolescent pregnancy. 2. Nutritional requirements during lactation, dietary management, food supplements, galactogogues, preparation for lactation. Care and preparation of nipples during breast feeding.		SAINI MANDAL	
UNITS	**PAPER: GE-4**	40T+20P+10I+5A		15.03.2022 to 25.06.2022

	GE4T: Family Meal Management			
1,2,3	**1.** Introduction to meal management - balanced diet, food groups & the planning of balance diet. **2.** Food guides for selecting adequate diet . **3.** Diet therapy		SUTRISHNA DASH	
4,5,6,7	**4.** Diet & stress in current scenario. **5.** Meal planning for the family. **6.** Indian meal patterns - vegetarian & non-vegetarian. **7.** Food faddism & the faulty food habits.		SAINI MANDAL	
8,9,10	**8.** Nutritive value of common Indian recepies. **9.** Nutrition in pregnancy - Physiological stages of pregnancy, nutritional requirements. Food selection, complication of pregnancy. **10.** Nutrition during lactation - Physiology of lactation, nutritional requirements.		KABERI KANDAR	
11,12,13	**11.** Nutrition during infancy - growth & development, nutritional requirements, breast feeding, infant formula, introduction of supplementary foods. **12.** Nutrition during early childhood (Toddler/Preschool)- Growth & nutrient need, nutrition related problems, feeding patterns. **13.** Nutrition of school children- Nutritional requirement, importance of snacks, school lunch.		PIU SASMAL	
14,15,16	**14.** Nutrition during adolescence - Growth & nutrient needs, food choices, eating habits, factor influencing needs.		DEBNANDA CHAKRABORTY	

	15. Nutrition during adulthood - Nutritional requirements, feeding pattern. **16.** Geriatric nutrition: Factors affecting food intake and nutrient use, nutrient needs, nutrition related problems.			
	GE4P: Family Meal Management (Lab) Practical:			
A: 1,2,3	**A:** 1. Planning and preparation of a balanced diet for a pregnant woman. 2. Diet during complication of pregnancy. 3. Planning and preparation of a balanced diet for a lactating woman.		SAINI MANDAL	
4,5,6,7,8,9	4. Preparation of weaning foods. 5. Planning and preparation of a balanced diet for pre-school child. 6. Balanced diet for school going child. Preparation of packed lunch. 7. Planning and preparation of a balanced diet for adolescence. 8. Planning of meals for adult belonging to different income group. 9. Planning meal for senior citizen.		PIU SASMAL	
B	**B: Project work with proper diet plan based on survey.**		SUTRISHNA DASH	

Teaching Plan: Department of Nutrition: SEMESTER-V(HONOURS)

UNITS	**PAPER: CC11**	40T+20P+10I+5A			**1st week of November, 2021 &4th week of December,2021**
	CC11T: Public Health and Hygiene			14.09.2021 to 18.01.2022	
1	1. **Food adulteration**: common, adulterants, and health hazards. Food standards and food laws. National and International; PFA, FSSAI, HACCP, ISO Certification; Consumer guidance society, Consumer rights, Consumer court, Central facilities for assessing food adulteration, Role of food inspectors.		SUTRISHNA DASH		
2,3	2. **Community Water and Waste Management**: Importance of water to the community, etiology and effects of toxic agents, water borne infectious agents, sources of water, safe drinking water/portability and tests for portability, community, waste and waste disposal, sewage disposal and treatment, solid waste and disposal, liquid waste disposal. 3. **Food Borne Disorders**: Food borne infections- Typhoid, Para typhoid, cholera, infective hepatitis, amoebiasis - Food borne intoxications- Disorders caused by; Natural toxins, chemical toxins and Microbiological toxins in food- Lathyrism, staphylococcal intoxication, Botulism, clostridium perfrignens, Mycotoxins.		DEBNANDA CHAKRABORTY		

4,5	4. **Food handling and Public Health**: Preventing food borne illness and the speed of communicable disease; Sanitation of food serving institution; environmental sanitation, hygienic in food handling and personal hygiene of food handler. 5. **Air & health**- Indices of thermal comfort , Pollution a) Sources b) Pollutants c) Monitoring d) Effects e) Prevention & control.		KABERI KANDAR	
6	6. **Mental health**- Health & diseases, Concept of a) Normality b) Mental health, Magnitude of the problem, Prevention of mental diseases, Alcohol related & drug related problems, mental health services in India.		SAINI MANDAL	
7,8	7. **Health care delivery system**: Patterns of health care delivery, History of development of health care delivery system in India, Reports of different committees, Three–tier health care delivery system, Primary health center, Subcentre, CHV, Urban health infrastructure. 8. **Demography & Population Control**: Introduction, Definition, Demographic cycle, Population Pyramid, Fertility, Factors affecting fertility, Indicators of fertility, Population explosion as a public health problem,		PIU SASMAL	

	Approaches for population control, Family planning methods.			
	C11P: Public Health and Hygiene (Lab) Practical			
1----5	Assignment programme on public health, nutrition and disease – covering any one of the following fields 1. Protein under nutrition and its recovery. 2. Vitamin or Mineral under nutrition and its recovery. 3. Dietary management of non-communicable disease. 4. Dietary management of growing child. 5. Impact of nutrition education on awareness development in the field of personal health.		SUTRISHNA DASH SAINI MANDAL PIU SASMAL DEBNANDA CHAKRABORTY KABERI KANDAR	
UNITS	**PAPER: CC12**	40T+20P+10I+5A		14.09.2021 to 18.01.2022
	C12T: Research Methodology			
1,2	**1.** Introduction to Research Methodology: Meaning of Research, Objectives of Research, Motivations in Research, Criteria of Good Research, Types of Research– Fundamental research, Applied Research, Action research, Qualitative Research, Quantitative Research, Historical research. **2.** Defining the Research Problem : Scientific Problem, Formation of scientific Problem, criteria of good research problem		DEBNANDA CHAKRABORTY	

3,4	**3.** The Review of Literature: Meaning of Review of Literature, Need and importances of Review of Literature, Objectives of Review of Literature **4.** The Research Hypotheses: Definitions of Hypothesis, Functions of Hypothesis, types of Hypothesis, Characteristics of a Good Hypothesis		PIU SASMAL	
5,6	**5.** Sampling – Criteria, Design, Characteristics of good sampling, types of sampling method. **6.** Methods of Data Collection: Primary and secondary data, Criteria of good data, Observation Method, Interview method, questionnaire and Schedules, Case Study Method.		KABERI KANDAR	
7,9	**7.** Experimental design – single and multi group experimental design, Quasi experimental Design 9. Ethical issues in research: Code of Ethics in Research – Ethics and Research Process – Importance of Ethics in Research		SUTRISHNA DASH	
	C12P: Research Methodology (Lab)			
1----5	A Project work on public health / nutritional biochemistry / nutritional survey to be submitted. Formulation of the Project: 1. Meaning of scientific research and its methods. Formulation of project design.		SUTRISHNA DASH SAINI MANDAL PIU SASMAL DEBNANDA CHAKRABORTY	

	2. Types of project design- exploratory, descriptive, experimental, cross sectional or longitudinal. 3. Methods: survey, case study, anthropological or experimental 4. Tools and techniques: observation, interviewing, questionnaire schedules or rating scales 5. Tabulation and interpretation: Tabular and graphic representation of data and its interpretation, bar diagram, pie diagram. Statistical procedures - variables, mean, standard deviation, test of hypothesis (t-test), chi-square test, degrees of freedom, null hypothesis, z-score.		KABERI KANDAR	
UNITS	**PAPER: DSE-1**	40T+20P+10I+5A		14.09.2021 to 18.01.2022
	DSE1T: Food Sanitation and Hygiene			
1,2	**1.** The relationship of micro organisms to sanitation. Role of microbiology – Environmental effects of microbial growth. Effects of micro- organisms on food degradation and food borne illnesses- bacteria, virus, molds, yeasts, and parasites. **2.** Other food hazards – chemicals, antibiotics, hormones, metal contamination poisonous		DEBNANDA CHAKRABORTY	

	foods.			
3,4	**3.** Food contamination- sources and transmissions. Water, air, sewage and soil as reservoirs of infection and ways of spread. Other agents of contamination - Humans, domestic animals, vermins, birds. **4.** Importance of personal hygiene of food handler - habits -clothes, illness. Education of food handler in handling and serving food.		PIU SASMAL	
5,6	**5**. Safety in food procurement, storage, handling and preparation – control of spoilage – safety of left over foods. **6.** Cleaning methods – sterilization, and disinfection –products and methods –use of detergents, heat, chemicals, and tests for sanitizer strength.		SAINI MANDAL	
7,8	**7.** Control of infestation: rodent control- rats, mice; vector control- use of pesticides **8.** Food sanitation, control and inspection- planning and implementation of training programme for health personnel.		KABERI KANDAR	
	DSE1P: Food Sanitation and Hygiene (Lab)			
1-2	1. Study of personal and environmental hygiene habits of street food handlers. Intervention and result analysis. Project submission and presentation. 2. Preservation of fruits and vegetables for later use-peas, carrots, cauliflower, chutney, soup, pickle, jam, jelly, marmalade, squash.		SUTRISHNA DASH SAINI MANDAL PIU SASMAL DEBNANDA CHAKRABORTY	

			KABERI KANDAR	
UNITS	**PAPER: DSE-2**	60T+10I+5A		14.09.2021 to 18.01.2022
	DSE2T: Quality Control and Food Standards			
1	1. Principal aspects of sampling of food: Importance of sample collection, sampling tools and containers, sample collection techniques, sampling for microbiological analysis of food, routine versus investigational sampling, quantity of sample to be collected, packaging and sealing of sample, dispatch of sample, documentation and commodity specific sampling procedure.		SAINI MANDAL	
2	**2.** Codex Alimentarius Commission (CODEX): Introduction, standards, codex of practice, guidelines and recommendations, applying codex standards, Codex India, core functions of National Codex Contact Point, National Codex Committee of India		PIU SASMAL	
3	**3.** International Organization of Standardization (ISO): Overview, structure, interpretation and case studies of food safety and Quality management including ISO-22000, ISO-9001:2000, ISO22000:2005, ISO 17025/CODES/GLP, Retailers standards: BRC		SUTRISHNA DASH	

	food and BRC IOP standards, IFS, SQF: 1000, SQF: 2000.				
4	**4.** Hazard Analysis Critical Control Point (HACCP): History, structure, pre- requites and principles, HACCP applications, HACCP based SOPs.		KABERI KANDAR		
5	**5.** Good Manufacturing Practices (GMP), Good Hygienic Practices (GHP), Good Agricultural Practice(GAP), Good Veterinary Practice (GVP),Storage and distribution of food, sanitation and safety in food services.		DEBNANDA CHAKRABORTY		
Teaching Plan: Department of Nutrition: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13**	40T+20P+10I+5A		21.02.2022 to 10.06.2022	**1st week of April,2022 & 1st week of June,2022**
	CT13: Dietetics and Counselling				
1,2	**Unit-I: Introduction to Psychology and counselling** Introduction to psychology – Definition , Nature and Scope. Attention and perception – Types of attention and factors influencing attention , principles of perceptual organization and abnormalities in perception. Learning and memory- Types of learning, Types of memory, Forgetting and its causes. Motivation and emotion- Types of motives, types of emotions,		DEBNANDA CHAKRABORTY		

	emotional expression. Personality- nature and definition , factors influencing personality, Psycho analytic theory of personality. Nature and goals of counselling. Principles of counselling. Characteristics of a good counsellor. Ethical principles of counselling. Special areas of counselling: Educational, family, health, community and counselling of alcoholic, and drug addicts. **Unit-II: Counselling Skills** Approaches to counselling – i. Psycho analytic approach, ii. Behaviouristic, iii. Humanistic approach. Pre – Helping phase: i. Rapport building skills, ii. Attending and listening skills, **Stage I skills:** Empathy, respect, Genuineness and concreteness, **Stage II skills:** Advanced empathy, self disclosure, Immediacy and Confrontation. **Stage III skills:** Goal setting, Action plan Programme and Brainstorming.			
3,4	**Unit-III: Basics of Diet Counceling** Diet Counselling - meaning, significance, process, types. Goals of counselling, individuals, group and family counselling. Basic sequence in counselling. Materials needed for counselling – models, charts, posters, AV aids, Hand outs etc.		SAINI MANDAL	

	Communication process in counselling and linguistics in clinical dietary practices, problems in communication. Role of Counsellor & Counselee. Techniques of obtaining relevant information- 24 Hour Dietary recall, List of food likes and dislikes, Lifestyle. Dietician as a part of medical team and research team. Impact of counselling on health and disease of individuals – discussion of hospital case studies. **Processes involved in dietary counselling** Managing resources of the communicator/counselor. Designing of counseling plans – goals & objectives, evaluation instruments. Implementation: facilitating self-management of disease condition. Evaluation: evaluating adherence to dietary changes. Counseling approaches after evaluation. **Unit-IV: Practical consideration in giving dietary advice and counselling** a) Factors affecting and individual food choice. b) Communication of dietary advice c) Consideration of behaviour modification d) Motivation.			
5,8	**Unit-V: Counselling and educating patient**		KABERI KANDAR	

	a) Introduction to nutrition counselling, b) Determining the role of nutrition counsellor, c) Responsibilities of the nutrition counselor , d) Practitioner v/s client managed care, e) Conceptualizing entrepreneur skills and behavior , f) Communication and negotiation skills. **Unit-VIII: Computer application** a) Execution of software packages. b) Straight line, frequency table, bar diagram, pie chart, Preparation of dietary charts for patients. c) Statistical computation- mean, median, standard deviation, conclusion and regression test.			
6,7	**Unit-VI: Teaching aids used by dietitians** Charts, leaflets, posters etc., preparation of teaching material for patients suffering from Digestive disorders, Hypertension, Diabetes, Atherosclerosis & Hepatitis and cirrhosis. **Unit-VII: Diet Counselling at Hospital and Community level** Role of counselling in hospital. Role of counselling in community. Organizing health camps and patient feedback – at hospital level. Organizing health camps and patient feedback – at community level.		PIU SASMAL	

	Dietary counseling through the life span - Diet counselling plans for obese people, Diabetics, CVD, dyslipidemia, cancer risk prevention, renal diseases, liver disorders mother and child care, Prenatal and pregnant women, Lactating women Childhood nutrition problems like, SAM, weight management, vitamin and mineral deficiencies, School children, adolescents, young adults, fitness, weight management, eating disorders. Geriatric counselling. Patient follow up / home visits,			
9,10	**Unit-IX: Computer application in dietetic management** a) Use of computers by dietician, b) Dietary computations, c) Dietetic management ,d) Education/ training , e) Information storage, f) Administrations , g) Research **Unit -X: Nutritional/medicinal role of traditional foods:** Traditional food beliefs, role of Ayurveda, Naturopathy, Yoga and other traditional medicines in disease management.		SUTRISHNA DASH	
	C13P: Dietetics and Counselling (Practical)			
1----7	**1.** Computer application for collection of data of different diseases. Submitting computed data.		SUTRISHNA DASH SAINI MANDAL	

	2. Preparations of teaching aids in the field of nutrition. **3.** Preparation of case history of a patient and feeding of information in the hard disc. **4.** Understanding the use of conventional and non-conventional methods of counseling **i.** Face to face counseling. **ii.** Use of software for counseling e.g Dietcal. **iii.** Use of any one Diet App for counseling and assessing food intake. **5.** Planning Nutrition counseling sessions and identifying ways to adhere to dietary changes for the following conditions: Lactation counseling, SAM. Eating disorders. Overweight / Obesity in School children, adolescent and adults. Metabolic syndrome. Diabetes- Gestational Diabetes. Renal disease, Liver disorders. **6.** Organizing health camps and patient feedback – both at hospital level and community level. **7.** Project planning for any one disease.		PIU SASMAL DEBNANDA CHAKRABORTY KABERI KANDAR	
UNITS	**PAPER: CC14**	40T+20P+10I+5A		21.02.2022 to 10.06.2022
	C14T: Entrepreneurship development, Enterprise management and Entrepreneurship for small catering units			
1,2	**Unit-I: Entrepreneurship development**		KABERI KANDAR	

	Entrepreneurship - concept, definition, need and significance of entrepreneurship development in India, entrepreneurship growth process, barriers, entrepreneurship education model. Entrepreneur- their characteristics, types, gender issues, role demands and challenges. Entrepreneurial motivation. Challenges faced by Women Entrepreneurs **Unit- II: Enterprise Planning and Launching** Types of enterprises classification based on capital, product, location, ownership pattern and process. Sensing business opportunities and assessing market potential; market research. Appraising of project and feasibility			
3	**Unit-III: Enterprise Management and Networking** a. Organization and Management - Principles of management. Functions of management/ manager. b. Managing Production: Organizing Production; input- output cycle. Ensuring Quality c. Managing marketing: Understanding markets and marketing. Functions of marketing. 4Ps of marketing (same as marketing mix).		SAINI MANDAL	

	d. Financial Management: Meaning of Finance. Types and sources of Finance. Estimation of project cost. Profit Assessment. Networking of Enterprises. Importance of Financial Management. Budgets and Budgeting process. Cost concepts			
4,7	**Unit - IV: Personnel management** Functions of a personnel manager, Factors to consider while planning the kind and number of personnel: Menu, type of operations, Type of service, Job description and job specification **Unit-VII: Development of a business plan**		DEBNANDA CHAKRABORTY	
5	**Unit-V: Food service units, Menu planning, Food production process, Space and equipment** **1. Food service units:** Origin of Food Service units. Kinds of food service units. **2. Menu Planning:** Importance of menu. Factors affecting menu planning, Types of menu. **3. Food Production Process:** Food purchase and receiving, Storage. Quantity food production: Standardization of recipes, Recipe adjustments and portion control, Quantity food production techniques.		PIU SASMAL	

	Food service. Food hygiene and sanitation. **4. Space and Equipment:** Types of kitchen areas, Flow of work and work area relationship. Equipment a) Factors affecting selection of equipment, b) Equipment needs for different situations			
6	**Unit VI: Planning of a small food service unit** **a. Preliminary Planning:** Survey of types of units, identifying clientele, menu, operations and delivery. **b. Planning the set up:** a) Identifying resources, b) Developing Project plan, c) Determining investments		SUTRISHNA DASH	
	CC14P:Entrepreneurship development, Enterprise management and Entrepreneurship for small catering units (Practical)			
1	1. SWOT analysis with respect to entrepreneurial competencies through case profiling of successful entrepreneurs and enterprises.		KABERI KANDAR	
2,3,5	2. Achievement Motivation lab-development of entrepreneurial competencies. 3. Survey of an institution facilitating entrepreneurship development in India. 5. Market survey for food items both raw and processed. Survey of food service units.		SUTRISHNA DASH SAINI MANDAL PIU SASMAL DEBNANDA CHAKRABORTY	

			KABERI KANDAR	
4	4. Preparation of business plan.		DEBNANDA CHAKRABORTY	
6,7,9	6. Standardization of a recipe. 7. Preparing Quick Foods for scaling up for quantity production. 9. Demonstration of a specialized cuisine.		SUTRISHNA DASH	
8	8. Planning menus for the following: a. Packed meals for office employees. b. Nutritious Tiffin for school children. c. School/college canteens.		PIU SASMAL	
10	10. Develop a checklist for good hygiene practices.		SAINI MANDAL	
UNITS	**PAPER: DSE-3**	40T+20P+10I+5A		
	DSE3T: Geriatric Nutrition			
1	**Unit-I: Introduction to ageing** Definition of ageing, senescence, old age or aged people, gerontology, geriatrics, and Geriatric nutrition. Classification of old population. Introduction to geriatric care- concept of gerontology. Ageing - Biology of ageing. Theories of ageing – disengagement theory, activity theory, selective theory and continuity. Microscopic theories, changes in ageing		DEBNANDA CHAKRABORTY	

	scenario. Interaction between biological and psychological in ageing. Interaction between physiological and social processes in ageing. Drug, food, and nutrient reaction. Dietetics of Geriatric care-Nutritional requirement. Food requirement, dietary modification. Implication of ageing population for rehabilitation: Demography, mortality and morbidity.			
2,3	**Unit-II: Issues and challenges of ageing** Issues and challenges of ageing – economic dependence/ poverty, elderly in rural/ urban area. Abuse, neglect, abandonment, physical, health and sensory problems. Crime against elderly, retirement and related issues. Ageing sensory system and issues with falling. Common complaints during ageing. Geriatric guidance and counselling. Depression in old age. Exercise-yoga, meditation . Behavior therapy: rational- emotive behavior therapy (REBT), horticultural therapy. Music therapy, Art therapy, Bibliotherapy **Unit-III: Clinical Geriatric** Physiological and biochemical changes during old age. Nutritional requirements and general dietary guidelines for elderly. Major nutritional and health problems during old age - osteoporosis ,obesity, neurological dysfunction. Anaemia. Malnutrition and constipation. Infection and Immunity. Degenerative disorders in elderly- Dementia, Alzheimer, Parkinson's disease. Disorders of upper GIT. Disorders of		PIU SASMAL DEBNANDA CHAKRABORTY	

	lower GIT. Disorders of Liver. Disorders of Billiary system and pancreas. Infection of Respiratory system. Coronary heart disease. Assessment of nutritional status of older adults.			
4	**Unit – IV: Social Geriatric** Types of family – Joint family System, Role of Elders and Younger generation. Isolation, Loneliness and Dependency – Dependency Ratio – Generational equality. Financial aspects – Sources of income, Old age pension. Role of Govt. and NGOs in Socio – economic status of the elderly. Geriatric service for the elderly in western countries and India. Structure of geriatric service, family as basic unit- models of geriatric service. Day hospital, day care centre, long stay care institution. Home for the aged, function of the day hospital staff and patients of day hospital. Ethical issues in geriatric medicine- age limits on health care. Life sustaining measures.		KABERI KANDAR	
	DSE-3: Geriatric Nutrition (practical)			
1,2	1. Visit to old- age homes- assessment of nutritional status of old people, diet counselling. 2. Preparation of dishes suitable for older person- soft, semisolid, easily digestible, nutritious and calorie dense balanced diet.		SUTRISHNA DASH DEBNANDA CHAKRABORTY	

UNITS	**PAPER: DSE-4**	40T+20P+10I+5A		21.02.2022 to 10.06.2022
	DSE3T: Bakery Technology and Mushroom Culture			
	Bakery Technology			
1	**Unit- I:** Bakery industry: Current status, growth rate, and economic importance of Bakery Industry in India. Product types, nutritional quality and safety of products, pertinent standards & regulations.		SAINI MANDAL	
2	**Unit- II:** Bread, Buns and Pizza base - Ingredients & processes for breads, buns, pizza base, Equipments used, product quality characteristics, faults and corrective measures		KABERI KANDAR	
3	**Unit- III:** Cakes - Ingredients & processes for cakes, Equipments used, product quality characteristics, faults and corrective measures. Different types of icings		DEBNANDA CHAKRABORTY	
4,6	**Unit- IV:** Biscuits, Cookies & Crackers - Ingredients & processes, Equipments used, product quality characteristics, faults and corrective measures. **Unit- VI:** Breakfast Cereals, Macaroni Products and Malt - Production and quality of breakfast cereals, macaroni products and malt.		SUTRISHNA DASH	

5	**Unit- V:** Modified Bakery Products - Modification of bakery products for people with special nutritional requirements e.g. high fibre, low sugar, low fat, and gluten free bakery products.		PIU SASMAL	
	Mushroom Culture:			
1	**1.** Definition and characteristics of mushroom.		SUTRISHNA DASH	
2,3	**2.** Morphology and life cycle of Mushroom**. 3.** Identification and classification of mushroom		SAINI MANDAL	
4,5	**4** Nutritional and medicinal value of edible mushrooms; poisonous mushrooms. **5.** Types of edible mushrooms available in India- Volvariella volvacea, Pleurotus citrinopileatus, Agaricus bisporus.		DEBNANDA CHAKRABORTY	
6,7	**6.** Process of mushroom cultivation. **7.** Storage and nutrition: short term storage (Refrigeration- upto 24 hours), long term storage (canning, pickles, papads), drying, storage in salt solutions.		PIU SASMAL	
	DSEP: Bakery Technology and Mushroom Culture (Practical)			

1,2,3,4,5	1. Preparation of pizza base and assessment of its quality 2. Preparation of bread and assessment of its quality 3. Preparation of buns and assessment of quality 4. Preparation of butter cake and assessment of its quality. 5. Preparation of sponge cake with icing and assessment of its quality.		KABERI KANDAR		
6,7	6. Preparation of cookies and assessment of quality. 7. Preparation of biscuits and assessment of quality.		SUTRISHNA DASH		
8	8. Visit to Mushroom Culture Centres/ Farms for: Process involved in mushroom cultivation Types and varieties of mushroom. Visual Identification of edible and poisonous mushroom Marketing.		SUTRISHNA DASH PIU SASMAL DEBNANDA CHAKRABORTY		
9	9. Different Food preparation from mushroom.		SAINI MANDAL		
Teaching Plan: Department of Nutrition: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A/3A**	40T+20P+10I+5A		01.10.2021 to 24.02.2022	1st internal examination on

	DSC1AT : Nutritional aspect of food items.				4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
1,2,3	**Course Contents:** **1. Concept and definition of terms:** • Food, Food Groups, Food Pyramid, Functions of food. • Nutrient and Nutritive value, Concept of Balanced Diet. **2. Cereals, Pulses and legumes:** • Nutritional aspects of wheat, rice and oat. • Types of pulses and legumes, uses, and nutritional aspects. **3. Milk and milk Products**: • Nutritive value of milk, composition of milk, • Types of processed milk, milk products (butter, curd, paneer and cheese), Pasteurization.		SUTRISHNA DASH		
4,5	**4. Egg, Fish and meat:** • Nutritional aspects and uses. • Nutritional aspects of edible fish and meat, concept of red and white meat. **5. Vegetables and fruits:** • Uses and nutritional aspect of commonly available vegetables. • Fresh fruits and dry fruits– raw and processed product		DEBNANDA CHAKRABORTY		
6,7	**6. Salts, Fats and oils:** • Uses and nutritional aspects of various salts. • Types, sources, use and nutritional aspects of fats and oils. **7. Methods of cooking:**		KABERI KANDAR		

	• Dry, moist, frying and microwave cooking. • Effect of various methods of cooking on foods, nutrient losses in cooking.				
	DSC1AP: Practical				
1-5	Food preparation and nutritive value as per portion size wherever applicable - 1. **Beverages:** Lassi 2. **Cereals:** Fried Rice 3. **Milk and milk products:** Payasam 4. **Eggs:** Egg pudding 5. **Snacks:** Sandwiches		SUTRISHNA DASH		
Teaching Plan: Department of Nutrition: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B/3B** **Nutrients and its physiological role**	40T+20P+10I+5A		**01.04.2022 to 09.07.2022**	
1,2	**1. Concept and definition of terms:** Growth, Development, Nutrition, Malnutrition and Health, Scope of Nutrition. **2. Introduce of protein, carbohydrate and fats** Dietary sources, physiological role and deficiency disorders.		DEBNANDA CHAKRABORTY		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
3	**3. Role of Vitamins and Minerals:** • Fat soluble vitamin-Physiological role, dietary sources and deficiency disorders. • Water soluble vitamin- Physiological role, dietary sources and deficiency disorders.		SUTRISHNA DASH		

	• Minerals-Physiological role, dietary sources and deficiency disorders in special references to calcium, iron, sodium and potassium.				
4,5,6	**4. Principles of meal planning:** • Food exchange list, Factors affecting meal planning and food related behavior. • Dietary guidelines for Indians. **5. Minimum nutritional requirement and RDA:** • Formulation of RDA, dietary guidelines with reference to man and woman. **6. Energy in human nutrition:** • Energy and its unit, Energy assessment and balance, Factors of energy requirement, BMR and its regulation, SDA of food**.**		KABERI KANDAR		
	DSC1BP: Practical				
1-4	1. Growth chart: Plotting and Interpretation using primary or secondary data in accordance with both ICMR and WHO Chart. 2. Clinical assessment and sign of nutrient deficiency disorders: Protein energy malnutrition (PEM), Anemia, Rickets, Goiter (Slide/Photography). 3. Clinical assessment and sign of vitamin deficiency disorders: Vitamin A, Vitamin C and Vitamin B-complex (Slide/Photography). 4. Clinical assessment and sign of obesity and metabolic disorders risk factors.		PIU SASMAL		

Teaching Plan: Department of Nutrition SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C**	40T+20P+10I+5A		01.10.2021 to 05.02.2022	**4th week of November,2021 &1st Week of January,2022**
	DSC1CT : Nutrition: Infancy to old age				
1	**1. Nutrition during infancy:** • Breast feeding, Formula feeding, Weaning, Supplementary foods, Nutritional management of Preterm baby.		KABERI KANDAR		
2	**2. Nutrition for children:** • Diet in early childhood, elementary school age, high school age.		PIU SASMAL		
3	**3. Nutrition during pregnancy and lactation:** • Nutritional demands of Pregnancy, Food selection during Pregnancy, Complications of pregnancy and dietary management, Diet during Lactation		SAINI MANDAL SUTRISHNA DASH		
4	**4. Geriatric nutrition:** • Planning of meals for older people, Nutrition of aged persons, Physiological complications in geriatric group and dietary modifications required.		DEBNANDA CHAKRABORTY		
	DSC1CP: Practical				
1,2,3	1.Preparation of normal diets for infant (Dahl soup). 2. Preparation of normal diets for preschool children (Dalia).		DEBNANDA CHAKRABORTY		

	3. Preparation of normal diets for pregnant lady and lactating mother (Khicheri with mixed vegetables).			
UNITS	**PAPER: SEC-1**	25T+15P+5I +5A		01.10.2021 to 05.02.2022
	SEC1T: Diet Therapy - I			
1,2	**1.** Definition of Dietetics, dietitian, goals of diet therapy. 2. **Basic concepts of Diet therapy:** Therapeutic adaptations of normal diet, Classification of therapeutic diets (Progressive diets – Normal, Soft, Clear fluid diet and Full fluid).		PIU SASMAL	
3	3. **Dietitians and hospital basic diets:** • Types of dietitians and role of dietitian in a hospital. Routin hospital diets. Specially modified therapeutic diet. • Nutritional adequacy of hospital diets, Basic concept and methods of (i) Oral feeding (ii) Tube feeding (iii) Parenteral feeding.		KABERI KANDAR	
4	4. Etiology, symptoms, diagnostic tests and dietary management of Gastro-intestinal tract and liver diseases - Diarrhoea, Constipation, Irritable Bowel Syndrome, Peptic ulcer , Jaundice and Cirrhosis of liver.		SUTRISHNA DASH	

5,6	5. Etiology, Risk factor, Sign and Symptom, Diagnosis and dietary management: Diabetes mellitus, Diabetes insipidus 6. Etiology, symptoms, diagnostic tests and dietary management of Malabsorption syndrome, Lactose intolerance, Food allergy		SAINI MANDAL		
7,8	7. Anemia: definition, causes, classification and dietary management of nutritional anaemia. 8. Fever: Definition, causes, types, symptoms and dietary management.		DEBNANDA CHAKRABORTY		
	SEC1P: Practical				
1	Planning and preparation of therapeutic diets for the following diseases: Diabetes melilitus (case specific), Hepatitis (case specific), gastrointestinal diseases (case specific), anemia (case specific).		PIU SASMAL		
Teaching Plan: Department of Nutrition: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3DT: Nutritional Surveillance and Programme**	40T+20P+10I+5A		15.03.2022 to 25.06.2022	
1	**1. Assessment of Nutritional Status and Surveillance:** • Direct Nutritional status assessment of human groups - Biochemical, Biophysical and anthropometric methods.		SAINI MANDAL		**4th week of April,2022**

	• Indirect assessment: Secondary sources of community health data.				**&3rd week of June,2022**
2	**2. Concept of surveillance systems:** • Role of international and national organizations and agencies (WHO, FAO, UNICEF, CARE, NIN, CFTRI, ICMR).		SUTRISHNA DASH		
3	**3. Communication in Nutrition and Health Education:** • Type, process and media of communication. • Importance and relevance of Information, Education and communication (IEC) in Nutrition and Public Health..		PIU SASMAL		
4	**4. National Nutritional Intervention Programmes:** • Objective, Target group, Scheme details - Integrated Child Development Services (ICDS), Mid Day Meal Programme (MDMP), Vit A prophylaxis Prophylaxis programme, Anemia prophylaxis programme.		DEBNANDA CHAKRABORTY		
5	**5. Immunization Programme:** • Immunization: National Immunization schedule for children and adults, Immunization for foreign travelers.		KABERI KANDAR		

	DSC1DP: Practical			
1-3	1. Anthropometric measurement of Weight for age, height for age, weight for height and its comparison with reference value. 2. Determination of BMI and comments on results. 3. Measurement of circumference of chest, upper arm, waist - hip ratio.		SUTRISHNA DASH	
UNITS	**SEC2T: Diet Therapy –II**	25T+15P+5I +5A		15.03.2022 to 25.06.2022
1	Etiology, clinical features, dietary and general management of Weight Imbalances**:** Underweight, Overweight and Obesity.		DEBNANDA CHAKRABORTY	
2	Etiology, clinical features, dietary and general management of Weight Imbalances**:** Underweight, Overweight and Obesity.		PIU SASMAL	
3	**3.** Etiology, Risk factor, Sign and Symptom, Diagnosis and dietary management of Hypertension, Renal diseases in special reference to Glomereulo -nephritis, Uremia, and Nephrosis.		SUTRISHNA DASH	
4	**4.** Diseases of the cardio vascular system: a. Brief review of lipoproteins (TC, TG, LDL, HDL, VLDL),		SAINI MANDAL	

	b. Atherosclerosis – etiology, risk factor and dietary management				
5	**5.** Etiology, Risk factor, Sign and Symptom, Diagnosis and dietary management of Cancer		KABERI KANDAR		
	SEC2P: Practical				
1-3	1. Planning and preparation of therapeutic diet for obesity (Case Specific), 2. Planning and preparation of therapeutic diet for Hyper tension (Case Specific), 3. Planning and preparation of therapeutic diet for Renal Diseases (Case Specific),		PIU SASMAL		
Teaching Plan: Department of Nutrition: SEMESTER-V(GENERAL)					
UNITS	**DSE1T: Food Standards and Food Safety Guidelines**	40T+20P+10I+5A		14.09.2021 to 18.01.2022	
1	**1. Microorganisms and Sanitation:** • The relationship of microorganisms to sanitation. Effects of microorganisms on food degradation and food – borne illness. • Importance of personal hygiene of food handlers: Habits, cloths, illness, education of food handler		SAINI MANDAL		**1st week of November, 2021 &4th week of December,2021**

	in handling and serving food. Concepts of food contamination.				
2	2. **Food additive and food safety:** • Concept of food safety, definition and factors affecting food safety. • Food additives-various types and their effects on health.		SUTRISHNA DASH		
3,4	3. **Food processing** – Definition, types, enzyme of importance in food processing – Proteases, lipases, oxidoreductase and hydrolase. 4. **Food security:** Concept of food security**,** factors affecting food security		DEBNANDA CHAKRABORTY		
5	5. **Food adjuncts and preserved products:** • Elementary idea on food preservation: principles and different methods – drying, freezing, frying, canning,etc. • Spices (Chilies, Turmeric, Garlic and Ginger), use and nutritional aspect. • Jams, Jellies, Squashes–uses and nutritional aspects.		PIU SASMAL		

6	6. **Food adulteration:** • Definition, Reasons and types. • PFA definition of food adulteration, Common adulterants in food and their effects on health. • Common household methods to detect adulterants in food,		SUTRISHNA DASH	
7	**7. Food laws and Regulatory authority:** • Food Laws, Consumerisms: Definition, consumer protection, Consumer education, Legal mode of protection, Machinery for redresal of consumer grievances. • Prevention of Food Adulteration (PFA) Act. • Regulating authority - Codex Alimentarius, ISI, Agmark, Fruit Products Order (FPO), Meat Products Order (MPO), Bureau of Indian Standards (BIS), Food Standards and Safety Authority of India (FSSAI).		KABERI KANDAR	
	DSE1P: Practical			
1-7	Detection of common adulterants in foods: 1. Detection of vanaspati in ghee/ butter. 2. Detection of khesari flour in besan. 3. Detection of argemone oil in edible oil.		SUTRISHNA DASH	

	4. Detection of metanil yellow in turmeric or colour sweet products. 5. Detection of dried papya seeds in black pepper. 6. Detection of artificially foreign matter in tea (dust/leaves). 7. Visit to food preservation centre/industry and demonstration of preparation and packaging of jam, jelly, chilli sauce, tomato ketchup, squash, pickles, etc.			
UNITS	**SEC3T: Basic Molecular Biology and Immunology**	40T+5I+5A		14.09.2021 to 18.01.2022
	Molecular Biology			
1,2	1. Nucleic acid: Bases, nucleosides and nucleotides. 2. DNA structure: DNA double helix (Watson and Crick Model). Types of DNA and RNA, DNA and RNA as genetic material		SAINI MANDAL	
3	3. DNA replication: Semi-conservative replication, Basic mechanism of replication (Prokaryotes / Eukaryotes).		PIU SASMAL	
4	4. Transcriptional unit and basic concept of transcription (Prokaryotes / Eukaryotes		KABERI KANDAR	
5	5. Genetic code and basic mechanism of translation (Prokaryotes / Eukaryotes).		SUTRISHNA DASH	

6	6. Basic concept of genomics, proteomics and metabolomics.		DEBNANDA CHAKRABORTY		
	Immunology:				
1	1. Introduction: Basic concept of immunity, Types of immunity-innate, acquired, active and passive immunity.		DEBNANDA CHAKRABORTY		
2	2. Humoral immune system: Mechanisms of humoral immunity, Immunoglobulin isotypes -IgG, IgM, IgA, IgD, and IgE.		KABERI KANDAR		
3	3. Cell mediated immune system: Types of effector T cells, mechanisms of cell mediated immunity		SUTRISHNA DASH		
Teaching Plan: Department of Nutrition: SEMESTER-VI(GENERAL)					
UNITS	**DSE-2T: Community Nutrition and Epidemiology**	40T+20P+10I+5A		21.02.2022 to 10.06.2022	
1,2	1. **Concept of population and Community:** Concept and characteristic features of population. Concepts and types of community. Concept of community nutrition. Factors affecting health of community – environmental, social, political, cultural and economical.		KABERI KANDAR		**1st week of April,2022 & 1st week of June,2022**

	2. **Community water and waste management:** Source of water, safe drinking water, etiology and effects of toxic agents. Microbial examination of water, Water-Potability test (MPN Test). Sewage disposal and treatment.				
3	3. **Nutritional problems in community:** a. Nutrition and health in National Development. b. Malnutrition – meaning, factors contributing to malnutrition, over nutrition. c. Nutritional disorders : Epidemiology, clinical features, prevention and dietary treatment for protein energy malnutrition, nutritional anaemias & vitamin deficiency disorders. d. Nutritional and infection relationship : Immunization and its importance, Food borne infection,and intoxication diseases, foods involved, methods of prevention, infestation of food borne diseases, outbreak, Prevention sign and control of infection.		PIU SASMAL		
4,5a	4. **Community nutrition programme planning** – identification of problem, analysis of causes, resources constraints, selection of interventions, setting a strategy, implementations and evaluation of the programme. **5. Nutritional status assessments and Nutritional intervention programmes :**		DEBNANDA CHAKRABORTY		

	a. Nutritional status assessment: Meaning, need, objectives and importance. Methods of assessing nutritional status: i. Sampling techniques, identification of risk groups. ii. Direct assesement – Diet surveys, Nutritional anthropometry – height, weight, BMI, MUAC, head and chest circumference, Diet survey by recall method, Clinical assessment, biochemical assessments. iii. Indirect assesement – Food balance sheet, ecological parameters and vital statistics.			
5b,c,6	**b. National and International agencies in uplifting the nutritional status:** • FAO,WHO, UNICEF, CARE, ICMR, ICDS, ICAR, CSIR, CFTRI ANP,VHAI,NIN. • Role of voluntary health organization in the improvement of community health. **c. Nutritional intervention programmes** :		SUTRISHNA DASH	

	Nutritional intervention programme to combat malnutrition. Concept of food fortification and food enrichment. **6. Nutrition Education :** Definition, objectives of nutrition education. Methods of imparting nutrition education.			
7,8	**7. Concept of Disease**: Endemic, Epidemic and Pandemic, Acute and Chronic. Communicable and Non-communicable diseases, Zoonosis, Epizootic and Enzootic. **8. Principles of Epidemiology**: Epidemiological study-Descriptive and Analytical. Rate of Disease in a Population-Attack rate, Mortality and Morbidity rate, Prevalence and Incidence of a disease, The incubation period, Quarantine period. Factors that Influence the Epidemiology of Disease.		SAINI MANDAL	
	DSE2P: Practical			
1-10	1. Preparation of homemade ORS. 2. Identification of vulnerable and risk groups, 3. Preparation of weaning foods for infants. 4. Preparation of low cost and medium cost school tiffin. 5. Use of anthropometric measurements in children. 6. Diet survey by 24 Hours recall methods.		SUTRISHNA DASH	

	7. Preparation of visual aids. 8. Field visit to : a) Observe the working of nutrition and health oriented programmes (survey based results), b) Hospitals to observe nutritional deficiencies 9. Visit to old age home / ICDS Centre / Nutrition Rehabilitation Centre (NRC) / Slum area / any public place and Prepare a report on nutritional status and health concern (at least 10-15 case studies to be done). 10. Visit to a Rural Technology Centre/Community Welfare Centre and prepare a brief field report on Rural Technology and Community Development				
UNITS	**SEC4T: Women Health & Nutrition**	40T+5I+5A		21.02.2022 to 10.06.2022	
1,2	1. Factors (non-nutritional) affecting pregnancy outcome, importance of adequate weight gain during pregnancy, antenatal care and its schedule, Nutritional requirements during pregnancy and modification of existing diet and supplementation, Deficiency of nutrients, specially energy, iron folic acid, protein, calcium, iodine. Common problems of pregnancy and their managements, specially - nausea, vomiting, pica, food aversions, pregnancy induced hypertension, obesity, diabetes. Adolescent pregnancy.		SAINI MANDAL		

	2. Nutritional requirements during lactation, dietary management, food supplements, galactogogues, preparation for lactation. Care and preparation of nipples during breast feeding.				

Philosophy

Teaching Plan: Department of Philosophy: SEMESTER-I(M.A)

UNITS	PAPER: 101: Indian Logic	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal Examination
	1. Definition and Process of Anumāna: Nyāya, BauddhaandAdvaitaPerspectives 2. Role of Parāmarśainanumana : The Mimāṁsā – Nyāyadebate 4. Definition of Vyāṗti (Siddhāntalakṣaṇa of Siddhānta-Muktāvalī, uptorupatvavyāpyajātimattvānprithivītvāt with reference to AdvāitaVedānta and Bauddha Theories of Vyāpti. 5. Pakṣāta	50	SANKAR PRASAD SING	25/10/2021 t0 20/01/22	3rd week of December,2021
	3. Induction in Indian Logic: Role of Pratyaksa in anumāna, Vyābhicārāgraha, Upādhi4andUpādhinirāśa, tarka, sāmānyalakṣaṇa and Jnanalaksanapratyakṣa in Vyāṗtigrahopāya. 6. Characteristics of Saddhetu and five types of Hetvābhāsa : Nyāya perspective		SITALI JANA		
UNITS	PAPER: 102: Western Logic	50			
	1. The Method of Conditional Proof, Indirect Proof. 2. Multiply General Proportions, Symbolisation, Revised Quantification Rules, Proving Validity and Invalidity, Logical Truth involving quantifiers.		SUJIT MAITY		
	3. Truth tree and its applications		SUCHHANDA BERA		

UNITS	**PAPER: 103:** Indian Epistemology	**50**			
	1. Definition and Types of pramāandapramā: Nyāya , Bauddha andAdvaitaVedānta Theories 2. Nyāya Perception, Definition, Process and Types, Bauddhadefinion of Perception,Advaita Vedanta definition of Perception 3. Svaprakāśatva and Paraprakśāsatvaofknowledge:Mimāṁsā and Nyāya view 4. The debate about the ascertainment (jñapti) of validity:Mimāṁsāand Advaita Perspectives		**MOULI MANDAL**		
	5. Theories about erroneous perception (Khyātivāda) :ātmakhyāti, satkhyāti,asatkhyāti,akhyāti,anyathākhyāti, viparītakhyāti, anirvracanīyakhyāti.		**MANIKA DAS**		
UNITS	**PAPER: 104:** Western Epistemology	**50**			
	1. Nature and definition of Knowledge, Gettier Problem. 2. Possibility of Knowledge – Different sceptical views.		**KISHAN KHAN**		
	3. Justification Knowledge claims – Foundationalism and Coherentism 4. The difference between pure and empirical cognition, the difference between analytic and synthetic judgement, the possibility of synthetic a priori judgement.		**SURAJIT MANNA**		
UNITS	**PAPER: 105:** Indian Classic	**50**			
	Samkhya-tattva-kaumudi (ed. by Narayan ChandraGoswami)		**RATNA PANDA**		
	Samkhya-tattva-kaumudi (ed. by Narayan ChandraGoswami)		**SK. TABARAK ALI**		
Teaching Plan: Department of Philosophy: SEMESTER-II(M.A)					
UNITS	**PAPER: 201:** Indian Metaphysics	**50**			**Internal Examination**
	1. Causation:Ākasmikatāvāda, Svabhāvavāda, Anekāntavāda, Kṣaṇabhaṅgavāda, Asatkaryavāda or Ārambhavāda, Satkāryavāda,Visistadvaitavāda,Vivartavāda		**RATNA PANDA**	**07/02/2022 to 11/07/2022**	**2nd week of June,2022**
	2. The Concept of Isvara (God): Proofs in favour of and against the existence of Isvara		**SUJIT MAITY**		

	4. Concept of Mind (manas): in the Nyāya - Vaiśeṣika, BauddhaandAdvaitaVedānta system.				
	3. Self (Atman): The debate about the theory of self-Cārvāka,Bauddha, Advaita andNyāya Perspectives.		**MANIKA DAS**		
	5. Theory of Space and Time in Indian Tradition. 6. Universal (Sāmānya): The debate between the Nyāya and theBauddha.		**SANKAR PRASAD SING**		
UNITS	**PAPER: 202:** Western Metaphysics	**50**			
	1. Concepts of Metaphysics – its types and possibilities. 2. Substance – The Aristotelian conception, universal and particular, Realism and Nominalism.		**SURAJIT MANNA**		
	3. Theories of Causation / Theories of Mind-Body Problem 4. Persistence of Person: Concept of Personhood, Psychological Continuity approach, Physical continuityapproach		**KISHAN KHAN**		
UNITS	**PAPER: 203:** Modern Indian Philosophy	**50**			
	1. Swami Vivekananda: Practical Vedanta, Universal Religion,Education 3. Mahatma Gandhi: God and Truth - Nature of World - Nature of Man - Non-Violence - Satyāgraha - Philosophy of end and means - Swaraj - Ideal state and Sarvodaya		**SK. TABARAK ALI**		
	2. RabindranathTagore: General Philosophical Standpoint - Reality and God - Doctrine of Nature of Man: Finiteaspect and infinite aspect –Religion of Man - Ways of selfrealization– Humanism, Ideas ofEducation		**SUCHHANDA BERA**		
	4. Sri Aurobindo: Two negations - Reality as Saccidānanda - Nature of Creation :Involution,Maya or Lila,evolution - Nature of Man –Supermind - Nature of Gnostic Being - Gnostic Being AndJīvanmukta - The Divine Life - Integral Yoga. And/orK.C.Bhattacharya: Concept of Philosophy, Subject as freedom, The doctrine of Maya		**SITALI JANA**		
UNITS	**PAPER: 204:** CBCS(philosophical issues)	**50**			
	(Philosophy of Love) 1. RabindranathTagore 2. SwamiVivekananda		**SK. TABARAK ALI**		

	(Philosophy of Peace) 3. Buddha 4. Gandhi		**TAMASA SARANGI**		
UNITS	**PAPER: 205:** Western Classic	**50**			
	Plato:Republic		**MOULI MANDAL**		
Teaching Plan: Department of Philosophy: SEMESTER-III(M.A)					
UNITS	**PAPER: 301:** Indian Philosophy of Language	**50**			
	1. Word - ClassificationofWords 2. Nature ofŚakti-MeanstoŚaktigraha 3. Locus of Śakti -Vyāktiśaktivāda, ākṛtiśaktivāda, jātiśaktivāda, jātyākritiviśityaśaktivāda		**RATNA PANDA**	**15/09/2021 to 20/01/2022**	**3rd week of December,2021**
	4. Grammarian theory ofsphoṭa 5. Conditions for understanding of sentence –akāṅkṣā, yogyatā, āsatti andtātparya		**MANIKA DAS**		
	6. Theories of sentence-meaning- Śaktivāda, abhihitānvayavādaandanvitābhidhānavāda 7. Critical Apprehension of Madhva view of Sabdaas Pramana, Seven types of dosa,		**SITALI JANA**		
UNITS	**PAPER: 302:** Western Philosophy of Language	**50**			
	1. The Linguistic turn, Issues and Problems, Sense and Reference, Proper names, Definite Descriptions, Concepts and Objects.		**SK. TABARAK ALI**		
	2. Wittgenstein: Picture Theory of Meaning (TLP), Philosophy and Language, Language game(PI) 3. Speech Act Theory		**KISHAN KHAN**		
UNITS	**PAPER: 303:** Advanced Logic (optional)	**50**			
	1. The PM System: Primitive Ideas, The Syntactical Rules, Definition, The Postulates, Rules for Deduction of Theorems, Proof of Theorems, Consistency andCompleteness		**SUCHHANDA BERA**		
	2. Basic Modal Notions, System T, S4 and S5. Three grades of ModalInvolvement.		**SUJIT MAITY**		

	PA PER: 303: Advaita Vedanta (optional)	**50**			
	Brahma-Sūtra-Bhāṣya of Śaṅkarācārya 1. Śaṅkarā'sAdhyāsa-Bhāṣya with Bhāmaṭī-uptoadhyāsalakṣaṇa 2. Śāṅkara- Bhāṣyaof Brahma-Sūtra,Adhyaya 1, Padā1, Sutras 1, 2 and3. AdvaitaVedanta (optional)		**SANKAR PRASAD SING**		
UNITS	**PAPER: 304:** CBCS(Socio-Ethical Problems)	**50**			
	1. (Secular Philosophy and Philosophers) 1. from – Six Secular Philosophers – by L.W. Beck (SelectedChapters)		**SK. TABARAK ALI**		
	2. Gender Justice with Special Emphasis on ThirdGender		**TAMASA SARANGI**		
UNITS	**PAPER: 305:** Applied Philosophy (optional)	**50**			
	1. The Meaning and Basis of Equality, Racism and Equality, Affirmative Action 2. Various Forms of Violence against Women		**SURAJIT MANNA**		
	3. The Death Penalty 4. Media Ethics : Definition, Concerns, Freedom and Responsibility, Neutrality and Objectivity 5. Business Ethics		**MOULI MANDAL**		
Teaching Plan: Department of Philosophy: SEMESTER-IV(M.A)					
UNITS	**PAPER: 401:** Indian Ethics	**50**			
	1. Special Features of Indian Ethics:Karmavada, Classification of Dharma- Sādharaṇa dharma and Viśeṣa dharma, VidhiandNisedha 2. Some thical concepts: Ṛta, Ṛṇa, Yama and Niyama, Triratna andPancamahāvrata, Brahmavihara, Lokasaṁgraha **3. Buddhist Ethics: From the Dhammapada, Yamakavagga, Appamadavagga, Papavagga,, andDandavagga**		**SITALI JANA**	**07/02/2022 to 11/07/2022**	**2nd week of June,2022**
	4. Ethics of Niṣkāma karma: From 2nd and 3rd chapters of the Bhagavad Gita **5. Sociocentric Hindu Morality: Duties according to Varṇa and āśrama; Sex-morality and the treatment of Women, Social responsibilities of the Individual**		**MANIKA DAS**		

	6. Epics and Ethics : Moral Dilemma , Different views.				
UNITS	**PAPER: 402: Western Ethics**	**50**			
	1. VirtueEthics 3. Utilitarianism : For and Against		**KISHAN KHAN**		
	2. Metaethics :Cognitivism : Naturalism of Moore ; Noncognitivism: Emotivism Of Stevenson, PrescriptivismofHare. 5. Theory of Justice : Theoryof Rawls.		**SUJIT MAITY**		
	4. Kantian Ethics : ForandAgainst		**RATNA PANDA**		
UNITS	**PAPER: 403:** Advanced Logic (optional)	**50**			
	3. Set Theory: Operations, Relations and Functions from Patrick Suppees, AnIntroduction to Logic. (Chapter 10, and11)		**SUJIT MAITY**		
	4. Problem of Induction, Hypothesis, Evidence, Patterns of Scientific Explanations		**SUCHHANDA BERA**		
	PAPER: 403: Advaita Vedanta (optional)	**50**			
	Vedāntā – Paribhāṣā of Dharmarajādhvarīndra 1. PratyakṣaParicceda- upto the division ofNirvikalpaka andSavikalpakaPratyakṣa 2. Viṣaya- Paricceda - (upto the Theory of World -Creation) 3. Prayojana–Paricceda		**SANKAR PRASAD SING**		
UNITS	**PAPER: 404:** Continental Philosophy	**50**			
	1. Definition of Phenomenology, Development of Husserl's Thought, The Natural World Thesis, Reduction, Intentionality of Consciousness, TheLife-world.		**SURAJIT MANNA**		
	2. Special featuresof Existentialism, The Nature of Being – Sartre, and Heidegger, Freedom, ExistentialHumanism 3. Nature and features of Hermeneutic method of Philosophy.		**SK. TABARAK ALI**		
UNITS	**PAPER: 405:** Applied Philosophy (optional)	**50**			
	1. Euthanasia		**TAMASA SARANGI**		
	2. Genetic Engineering andEthics 3. Organdonation		**SUJIT MAITY**		
	4. Environmental Ethics : Some CentralDebates		**MOULI MANDAL**		

	5. Climateethics 6. Futuregeneration				
Teaching Plan: Department of Philosophy: SEMESTER-I(HONOURS)					
UNITS	**PAPER: CC1:** Indian Philosophy				
	Introduction: Division of Indian Philosophical Schools:Āstika and Nāstika b) Cārvāka School- Epistemology, Metaphysics, Ethics.		SITALI JANA	**01/10/2021 to 24/02/2022**	1st internal examination on 4th week of December, 2022 & 2nd internal examination on 2nd week of March,2022
	c) Jainism- Concept of Dravya, Sat, Guṇa, Paryāya Anekāntavāda, Syādvāda and Saptabhaṅginaya. d) Buddhism- Four noble Truths, Theory of Dependent Origination (Pratītyasamutpādavāda), Definition of Reality(Arthakriyākāritva), Doctrine of Momentariness, (Kṣanabhangavāda), Theory of no-soul (Nairātmyavāda), Four Schools of Buddhism (Basic tenets).	**75**	MANIKA DAS		
	e) Nyāya – Pramā and Pramāṇa, Pratyakṣa (Definition), Sannikarṣa, Classification ofPratyakṣa: Nirvikalpaka, Savikalpaka, Laukika, Alaukika;		SUCHHANDA BERA		
	f) Anumiti, Anumāna (Definition), vyāpti, parāmarśa, Classification of Anumāna: pūrvavat, śesavat, smānyatodṛsta, kevalānvayī, kevalavyātirekī, anvayavyātirekī, svārthānumāna, parārthānumāna, Upamāna (definition), Śabda (definition)		MOULI MANDAL		
	g) Vaiśeṣika—Seven Padārthas, dravya, guṇa, karma, sāmānya, viśeṣa, samavāya, abhāva, h) Different types of causes: samavayi, asamavayi and nimitta. Asatkāryavāda.		SURAJIT MANNA		
UNITS	**PAPER: CC2:** History of Western Philosophy	**75**			
	Pre Socratic Philosophy: A brief outline.		KISHAN KHAN		
	b) Plato: Theory of Knowledge, Theory of Forms c) Aristotle : Critique of Plato's theory of Forms, Doctrine of four causes, Form and Matter		SK. TABARAK ALI		
	d) St. Thomas Aquinas: Faith and Reason, Essence and Existence.		TAMASA SARANGI		
	e) Descartes:Cartesian method of doubt, cogito ergo sum, criterion of truth, types of ideas, Proofs for the existence of God, Mind- body dualism Proofs for the existence of the external world,		SUJIT MAITY		

	f) Spinoza: Doctrine of substance, Attributes and Modes, Existence of God, Pantheism, Three orders of knowing.		SANKAR PRASAD SING		
	g) Leibniz: Monads, Truths of reason, Truths of facts, Innate ideas, Some metaphysical principles: Law of Identity of indiscernibles, Law of sufficient reason, Law of continuity, Doctrine of Pre-established harmony.		RATNA PANDA		
UNITS	**PAPER: GE-1:** Western Logic	**75**			
	a) Introductory topics: Sentence, proposition, argument, truth and validity. b) Aristotelian classification of categorical propositions, distribution of terms. Existential Import, c) Boolean interpretation of categorical propositions. Immediate inference. Immediate inference based on the square of opposition, conversion, obversion and contraposition.		SUCHHANDA BERA		
	d) Categorical syllogism: Figure, mood, rules for validity, Venn Diagram method oftesting validity, fallacies e) Symbolic Logic: Use of symbols, Truth-functions: Negation, Conjunction, disjunction, implication, equivalence.		SK. TABARAK ALI		
	f) Tautology, Contradiction, Contingent statement forms. Construction of truth-table, using truth-tables for testing the validity of arguments and statement forms. g) Mill's methods of experimental inquiry.		TAMASA SARANGI		
Teaching Plan: Department of Philosophy: SEMESTER-II(HONOURS)					
UNITS	**PAPER: CC3:** Indian Philosophy	**75**			1st internal examination on 2nd week of May, 2022 and 2nd internal
	a) Sāmkhya - Satkāryavāda, Nature of Prakṛti, its constituents and proofs for its existence. Nature of Puruṣa and proofs for its existence, Plurality of Puruṣas, theory of evolution.		SK. TABARAK ALI	**01/04/2022 to 09/07/2022**	
	b) Yoga - Citta, Cittavṛtti, Cittabhūmi. Eight fold path of Yoga, God.		SITALI JANA		
	c) Mīmāmsā (Prābhakara and Bhātta) :Anvitābhidhānvāda and avihitānvayavāda, Arthāpatti and Anupalabdhi as sources of knowledge		MOULI MANDAL		

	d) Advaita Vedānta - Sankara's view of Brahman, Saguṇa and Nirguṇa Brahman, Three grades ofSattā: prātibhāsika, vyavahārika and pāramārthika, Jīva, Jagat and Māyā.		MANIKA DAS		examination on 2nd week of July,2022
	e) Viśistādvaita - Rāmānuja's view of Brahman, Jīva, Jagat. Refutation of the doctrine of Māyā.		SURAJIT MANNA		
UNITS	**PAPER: CC4:** History of Western Philosophy	**75**			
	a) Locke : Refutation of innate ideas, the origin and formation of ideas, simple and complex ideas, substance, modes and relations, nature of knowledge and its degrees, limits of knowledge, primary and secondary qualities, representative realism.		TAMASA SARANGI		
	b) Berkeley: Refutation of abstract ideas. Criticism of Locke's distinction between primary and secondary qualities, Immaterialism, esse-est-percipi, role of God.		RATNA PANDA		
	c) Hume:Impression and ideas, association of ideas, distinction between judgements concerning relations of ideas and judgements concerning matters of fact,		KISHAN KHAN		
	HUME: theory of causality, theory of self and personal identity, scepticism.		SUJIT MAITY		
	d) Kant : Conception of critical Philosophy, distinction between a priori and a posteriori judgements, distinction between analytic and synthetic judgements.		SUCHHANDA BERA		
	Synthetic a priori judgements, General problem of the Critique, Copernican Revolution in Philosophy, Transcendental Aesthetic : Space & time - Metaphysical & Transcendental expositions of the ideas of space & time.		SANKAR PRASAD SING		
UNITS	**PAPER: GE-2:** Philosophy of Mind	**75**			
	a) Sensation: What is sensation? Attributes of sensation b) Perception: What is perception? Relation between sensation and perception, Gestalt theory of perception, illusion and hallucination.		SUCHHANDA BERA		
	c) Consciousness: Conscious, Subconscious, Unconscious,Evidence for the existence of the Unconscious, Freud's theory of dream.		TAMASA SARANGI		
	d) Memory: Factors of memory, Laws of association, Forgetfulness. Learnung: The trialand Error theory, Pavlov's Conditioned Response theory, Gestalt theory		RATNA PANDA		

	e) Intelligence: Measurement of Intelligence, I.Q., Testof Intelligence, Binnet-Simon test.		SURAJIT MANNA		
Teaching Plan: Department of Philosophy: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC5:** Philosophy of Mind	**75**		01/10/2021 to	
	a) Psychology: Definition, Nature and Scope b) Methods of Psychology: Introspection, Extrospection, Experimental Methods – variables - dependent &independent, controls in experiment, limitations of experimental method. c) Sensation and Perception: Nature of sensation, nature of perception, relation between sensationand perception, Gestalt theory of perception. Illusion and Hallucination.		SUCHHANDA BERA	05/02/2022	**4th week of November,2021 &1st Week of January,2022**
	d) Learning: Theories of Learning - Trial and error theory, Thorndike's laws of learning, GestaltTheory, Pavlov's theory of conditioned response, B.F. Skinner's theory of Operant Conditioning(reinforcement, extinction, punishment) e) Philosophical Theories of Mind: Interactionism, Double-aspect theory, Philosophical Behaviorism, Materialism mind - brain identity theory, The Person theory (Strawson)		SUJIT MAITY		
	. f) Consciousness: Levels of mind—Conscious, Sub-conscious, Unconscious, proofs for the existence of Unconscious, Freud's theory of Dream. g) Personality: Types, Factors and Traits of Personality.		SURAJIT MANNA		
UNITS	**PAPER: CC6:** Social and Political Philosophy	**75**			
	a) Nature and Scope of i) Social Philosophy ii) Political Philosophy iii) Relation between social and Political Philosophy. b) Primary concepts: Society, community, association, institution, family: nature, different forms of family, role of family in the society.		MANIKA DAS		
	c) Social Class and Caste: Principles of class and caste, Marxist conception of class, Varṇaśrama dharma. d) Theories regarding the relation between individual and society: I. Individualistic theory II. Organic theory III. Idealistic theory e) Secularism—its nature, Secularism in India.		KISHAN KHAN		

	f) Social Change: Nature, Relation to Social progress, Marx-Engles on social change, Gandhi onsocial change . g) Political Ideals: Nature of Democracy and its different forms, direct and indirect democracy, liberal democracy, democracy as a political ideal, Socialism: Utopian and Scientific, Anarchism.		SIYALI JANA		
UNITS	**PAPER: CC7:** Philosophy of Religion	**75**			
	a) Nature and scope of Philosophy of Religion. Doctrine of karma and rebirth, doctrine of liberation, (Hindu, Bauddha and Jaina views). b) The Philosophical teachings of the Holy Quran: God the ultimate Reality, His attributes, Hisrelation to the world and man. c) Some basic tenets of Christianity: The doctrine of Trinity, The theory of Redemption		RATNA PANDA		
	d) Religious Pluralism, Inter-religious dialogue and Possibility of Universal Religion. e) Arguments for the existence of God: Cosmological, Telelogical and Ontological arguments, Nyāya arguments		TAMASA SARANGI		
	f) Grounds for Disbelief in God: Sociological theory (Durkheim), Freudian theory, Cārvāka, Bauddha and Jaina views g) The Peculiarity of Religious Language: The doctrine of analogy, Religious statements as Symbolic, Religious language as Non-Cognitive (Randal's view), the language game theory (D.Z. Phillip).		SANKAR PRASAD SING		
UNITS	**PAPER: SEC-1:** : Philosophy of Human Rights	50			
	a) Definition and Nature of Human Rights b) The Idea of Human Rights: Its Origins and Historical Developments during Ancient period, Modern period and Contemporary period c) The Idea of Natural Law and Natural Rights: Thomas Hobbes and John Locke. d) The Natural Rights Tradition: Some Reactions from Jeremy Bentham, Edmund Burke and Thomas Paine		MOULI MANDAL		
	e) Natural Right, Fundamental Right and Human Right		SK. TABARAK ALI		

	f) Preamble, Fundamental Rights and Duties (Indian Constitution) g) Contemporary Perspectives: Joel Feinberg—Basic Rights				
UNITS	**PAPER: GE-3:** Theory of Inference in Nyāya	**75**			
	a. Definition & classification of Anumiti.		SUCHHANDA BERA		
	b. Importance of Pañcabayabinyāya.		SURAJIT MANNA		
Teaching Plan: Department of Philosophy: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC8:** Western Logic	**75**			
	a) Logic and Arguments, Deductive and Inductive Arguments, Argument forms and arguments, statement forms and statement, Truth and Validity. Categorical propositions and classes: quality, quantity and distribution of terms, Translating categorical propositions into standard form. b) Immediate inferences: Conversion, Obversion and Contrapositon, Traditional square of opposition and Immediate Inferences based there on; Existential Import, symbolism and Diagrams for categorical propositions. c) Categorical Syllogism: Standard Form categorical Syllogism; The Formal nature of Syllogistic Argument, Rules and Fallacies, General Rules; To test Syllogistic Arguments for validity (by applying general rules for syllogism); To solve problems and prove theorems concerning syllogism.		RATNA PANDA	**15/03/2022 to 25/06/2022**	**4th week of April,2022 &3rd week of June,2022**
	d) Boolean Interpretation of categorical propositions; Review of the Traditional Laws of Logic concerning immediate inference and syllogism; Venn Diagram Technique for Testing Syllogisms, Hypothetical and Disjunctive Syllogisms, Enthymeme, The Dilemma.		KISHAN KHAN		
	e) Induction: Argument by Analogy, Appraising Analogical Arguments, Refutation by Logical Analogy. f) Causal Connections: Cause and Effect, the meaning of "Cause"; Induction by Simple Enumeration; Mill's Method of Experimental Inquiry; Mill's Method of Agreement, Method of Difference, Joint Method of Agreement and Difference,		TAMASA SARANGI		

	Method of Residues, Method of Concomitant Variations; Criticism of Mills Methods, Vindication of Mill's Methods g) Science and Hypothesis: Explanations; Scientific and Unscientific, Evaluating Scientific Explanations; The pattern of Scientific Investigation; Crucial Experiments and Ad Hoc Hypotheses.				
	h) Probability: Alternative Conception of Probability; The Probability Calculus; Joint Occurrences; Alternative Occurrences.		SK. TABARAK ALI		
UNITS	**PAPER: CC9:** Western Logic	**75**			
	a) Symbolic Logic: The value of special symbols; Truth-Functions; Symbols for Negation, Conjunction, Disjunction, Conditional Statements and Material Implication; Material Equivalence and Logical Equivalence; Dagger and stroke functions; inter-definability of truth functors. b) Tautologous, Contradictory and Contingent Statement-Forms; The Paradoxes of Material Implication; The three Laws of Thought.		SUCHHANDA BERA		
	c) Testing Argument Form and Argument for validity by i. The Method of Truth-table. ii. The Method of Resolution (Fellswoop & Full Sweep)[dot notation excluded] d) Determining the logical character of statement form and statements by i. The Method of Truth-table. ii. The Method of Resolution [dot notation excluded]		SK. TABARAK ALI		
	e) The Method of Deduction: Formal Proof of Validity: Difference between Implicational Rules and the Rules of Replacement; Construction of Formal Proof of Validity by using nineteen rules; Proof of invalidity by assignment of truth-values. f) Quantification Theory: Need for Quantification Theory, Singular Propositions; Quantification; Translating Traditional subject predicate proposition into the logical notation of propositional function and quantifiers; g) Quantification Rules and Proving Validity; Proving Invalidity for arguments involving quantifiers.		SUJIT MAITY		
UNITS	**PAPER: CC10:** Epistemology and Metaphysics (Western)	**75**			

	a) Concepts, Truth. b) Sources of Knowledge. c) Some Principal uses of the verb "To know", Conditions of Propositional Knowledge, Strong and weak senses of "know".		SURAJIT MANNA		
	d) Analytic truth and logical possibility. e) The apriori. f) The Problem of Induction. g) Cause and Causal Principles		SANKAR PRASAD SING		
	h) Realism, Idealism i) Phenomenalism j) Substance and Universal		MOULI MANDAL		
UNITS	**PAPER: SEC-2:** Man and Environment	50			
	a) **Classical Indian attitude to Environment** a. The Upanisadic world-view, b. Tagore's understanding of nature, c. The post-Upanisadic view of nature. .		MANIKA DAS		
	b) Respect for Nature a. The attitude of respect, b. Bio-centric outlook to nature, c. Ethical standards and rules that follow from the attitude of respect to nature, d. The idea of inherent worth of nature **c) Intrinsic Value of nature** a. Moore's talk of 'intrinsic properties', b. Chilsom's idea of intrinsic value, c. Attfield on the intrinsic value of nature, d. Callicott's idea of intrinsic value of nature, e. Rolston III on intrinsic value of nature, f. intrinsic value and objective value		KISHAN KHAN		
	d) Deep ecology and its third world critique a. Arne Naess on Deep Ecology, b. Ramchandra Guha's critique of Deep Ecology **e) Eco-feminism** a. Understanding nature and the feminine, b. Dualisms in Western tradition, c. Masculinity, humanity and nature		SITALI JANA		
UNITS	**PAPER: GE-4:** : Termination of Life & Ethics	**75**			

	a. Euthanasia.		SURAJIT MANNA		
	b. Abortion.		SUCHHANDA BERA		
Teaching Plan: Department of Philosophy: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC11:** Nyaya Logic and Epistemology-I	**75**		14/09/2021 to	
	a) Definition of buddhi or jñāna (cognition), its two kinds; Definition of smṛti; Two kinds of smṛti (memory);Definition of anubhava, its division into veridical (yathārtha) and non-veridical (ayathārtha);Three kinds of nonveridical anubhava; Definitions clarified in Tarkasaṁgraha Dīpikā.		RATNA PANDA	18/01/2022	**1st week of November, 2021 &4th week of December,2021**
	b) Four-fold division of pramā and pramāṇa. Definition of "Kāraṇa" (special causal condition) and "kāraṇa" (general causal condition). The concept of anyathāsiddhi (irrelevance) and its varieties.The definition of kārya (effect). Kinds of cause: smavāyi, a-samavāyi and nimitta kāraṇa (definitions and analysis).		SK. TABARAK ALI		
	c) Definition of pratyakṣa and its two-fold division: nirvikalpaka and savikalpaka jñāna. Evidence for the actuality of nirvikalpaka. d) Sannikarsa and its six varieties. Problem of transmission of sound; the claim of "anupalabdhi" as a distinctive pramāṇa examined.		SANKAR PRASAD SING		
UNITS	**PAPER: CC12:** Ethics (Indian)	**75**			
	a) Introduction: Concerns and Presuppositions, Concept of Sthitaprañjna, Karmayoga: (Gīta) Puruṣārthas and their inter-relations. b) Meaning of Dharma, Concept of ṛṇa and ṛta. Classification of Dharma: sādhāraṇadharma and Asadharana Dharma,Varnasrama Dharma		SITALI JANA		
	c) Vidhi and Niṣedha d) Buddhist Ethics: Pancaśīla, Brahmavihārabhāvanā (Bauddha) Anubrata, Mahābrata, Ahimsā.		MANIKA DAS		
	e) Jaina Ethics: anubrata, mahā̃brata f) Mimā̃ṁsa Ethics: nitya naimittika karma and kāmya karma, the imperative in kāmya karmas and in kāmya karmas involving hiṁsā.		SUCHHANDA BERA		

UNITS	**PAPER: DSE-1:** Philosophy of language (Indian)	**75**			
	a) Definition and classification of pada b) Introduction of concepts of āsatti, yogyatā, tātparya, ākāṁṣā c) Different types of lakṣaṇā		SUJIT MAITY		
	d) śābdabodha e) anvitābhidhānvāda and abhihitānvayavāda.		TAMASA SARANGI		
UNITS	**PAPER: DSE-2:** Ethics (Applied Ethics)	**75**			
	a. Nature and scope of applied ethics. b. Killing: Suicide, Euthanasia, Animal killing c. Poverty, Affluence and Morality		SURAJIT MANNA		
	d. War and Violence: Terrorism. e. Right: Nature and Value of Human Rights—Discrimination on the basis of race, caste and religion. f. The Ethics of Care.		MOULI MANDAL		
	g. Value beyond sentient beings, Reverence for life, Deep Ecology, Concepts of Kinship Ethics. h. Ecological Concern in Indian thoughts: Jaina and Bauddha views**.**		KISHAN KHAN		
Teaching Plan: Department of Philosophy: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13:** Nayaya Logic and Epistemology-II	**75**			
	a) Definiton of anumāna, anumiti and parāmarśa. Analysis of pakṣatā. Definition of vyāpti, Vyāptigraha. b) Definition of pakṣadharmatā—svārthānumiti and parārthānumiti; Analysis of pañcāvayavī Nyāya. Necessity of parāmarśa. Three kinds of linga or hetu: kevalānvayī, kevalavyᾶtirekī and anvayavyᾶtirekī. Definiton of pakṣa, Sapakṣa and vipakṣa with illustrations. Marks of sadhetu.		SUCHHANDA BERA	21/02/2022 to 10/06/2022	**1st week of April,2022 & 1st week of June,2022**
	c) Hetvābhāsa-two types of definition. Five kinds of hetvābhāsa: (1) "Savyᾶbhicāra'' and its three kinds-defined and illustrated; (2) "Viruddha" defined and illustrated: (3) "Satpratipakṣa" defined and illustrated; (4) Three kinds of "Asiddha" enumerated; (a) āśrayāsiddha (b) svarūpāsiddha and (c) vyāpyatvāsiddha. Vyāpyatvāsiddha defined		TAMASA SARANGI		

	as“sopādhika hetu”. Upādhi and its four kinds (definition and illustration) (5) “Bādhita” (definition and illustration).				
	d) “Upamāna pramāṇa”: Definition and analysis.“Śabda pramāṇa” : Definition and analysis. “Śakti” (the direct signifying power), the padapadārtha- sambandha considered as Īśvara-saṁketa, Controversy between the Mīmāṃsakas and the Naiyāyikas regarding the nature of Śakti as universal or particular. e) “Śaktigraha” (ascertainment of the meaning-relation), lakṣaṇa, varieties of lakṣaṇa, Analysis of “Gauṇī-vṛtti” (the secondary signifying power of a term), “Vyānjanā- vṛtti” (the suggestive power of a term) analysed as a kind of śakti or lakṣaṇā.		SURAJIT MANNA		
	f) The definition of lakṣaṇā, The concept of “yoga-rūḍhi”. The conditions of “śābda- bodha”, ākānkṣā, yogyatā and sannidhi. Two kinds of statements distinguished—Vaidika and Laukika. g) “Arthāpatti” as a distinctive pramāṇa: Controversy between the Mīmāṃsakas and the Naiyāyikas.		SUJIT MAITY		
	h) The theory of prāmāṇya: the issue between svataḥ-prāmāṇyavāda and parataḥ- prāmāṇyavāda regarding utpatti and jñapti; The Prābhākara theory of akhyāti		SITALI JANA		
UNITS	**PAPER: CC14:** Ethics (Western)	**75**			
	a) Nature and Scope of Ethics, Classification of Ethics: a: Prescriptive, b: Meta Ethics, c: Applied Ethics. b) Moral and Non-moral actions, Object of Moral Judgement - Motive and Intention		MANIKA DAS		
	c) Moral Theories: Plato and Aristotle d) Standards of Morality: Hedonism - Ethical, Psychological. Utilitarianism: Act utilitarianism, Ruleutilitarianism. Deontological Theories: Act - Deontological Theories, Rule-Deontological Theories - Kant’s Theory.		MOULI MANDAL		
	e) Theories of Punishment f) Environmental Ethics: Its nature, Concepts of Anthropocentrism and Non anthropocentrism, value beyond sentient beings, reverence for life.		SITALI JANA		
UNITS	**PAPER: DSE-3:** The Problems of Philosophy--Bertrand Russell	**75**			
	a) Chapter 1 - 3 (15) b) Chapter 4 - 6 (15)		SANKAR PRASAD SING		

	c) Chapter 7- 9 (15) d) Chapter 10 - 12(15)		SK. TABARAK ALI		
UNITS	**PAPER: DSE-4:** Rabindranath Tagore	**75**			
	a) Reality and God **b)** Nature of Man		RATNA PANDA		
	c) Surplus in Man d) Nature of Religion e) Tagore's Humanism		KISHAN KHAN		
Teaching Plan: Department of Philosophy: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A:** Indian Philosophy	**75**			
	1. Introduction: (a) General Features of Indian Philosophy 2. Cārvāka: (b) pratyakṣa (perception) as the only Source of Knowledge (c) Refutation of anumāna (inference) and śabda (testimony) as Sources of Knowledge (d) jaḍavāda and dehātmavāda.		SITALI JANA	01/10/2021 to 24/02/2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
	3.Jainism: (a) anekāntavāda (b) syādvāda and nayavāda 4. Buddhism: (a) Four Noble Truths (a) (b) pratītyasamutpāda (b) kṣaṇabhaṅgavāda (c) nairātmyavāda		SUCHHANDA BERA		
	5. Nyāya–Vaiśeṣika: (a) pramāṇa: pratyakṣa (perception), anumāna (inference), upamāna (comparison) and śabda (testimony) (b) Saptapadārtha (Seven Categories)		SURAJIT MANNA		
	6. Sāṁkhya: (a) Satkāryavāda (Theory of Causality) (b) Pariṇāmavāda (Theory of Evolution) 7. Yoga : (a) cittavṛttinirodha (b) aṣṭāṅgayoga		RATNA PANDA		
	8. Mīmāṁsā (a) arthāpatti (b) anupalabdhi 9. Advaita Vedānta: (a) (a)Brahman, jīva and jagat		SK. TABARAK ALI		
Teaching Plan: Department of Philosophy: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B:** Western Philosophy:	**75**		01/04/2022 to 09/07/2022	1st internal examination on 2nd week of May,
	1. Metaphysics: Nature of Metaphysics, Elimination of Metaphysics 2. Realism: Naïve Realism, Scientific Realism, Representative Realism		SURAJIT MANNA		

	3. Idealism: Subjective Idealism, Objective Idealism		SUCHHANDA BERA		2022 and 2nd internal examination on 2nd week of July,2022
	4. Critical Theory of Kant 5. Theories of Causation: Regularity Theory and Entailment Theory		SK. TABARAK ALI		
	6. Substance: Views of Descartes, Spinoza, Locke and Berkeley 7. Relation between Mind and Body: Interactionism and Parallelism		RATNA PANDA		
	8. Theories of Evolution: Mechanistic and Emergent		SITALI JANA		
Teaching Plan: Department of Philosophy: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C**: Logic	**75**		01/10/2021-05/02/2022	**4th week of November,2021 &1st Week of January,2022**
	1. Basic Concept of Logic: (a) Nature and Scope of Logic, (b) Sentence, Proposition and Statement , (c) Inference and Argument, 2. Types of Argument and Inference: (a) Deductive Argument and Inductive Argument, (b) Immediate inference and Mediate inference, (c) Categorical Syllogism, (d) Truth Functional Argument and Quantificational Argument 3. Opposition of Propositions: Rules and Fallacies 4. Immediate Inference: Rules and Fallacies		RATNA PANDA		
	5. Categorical Syllogisms: Rules and Fallacies, Venn diagram 6. Truth functional Argument: Rules and Fallacies 7. Inductive Argument: Rules and Fallacies 8. Analogical Reasoning 9. Science and Hypothesis		TAMASA SARANGI		
UNITS	**PAPER: SEC-1:** Ethics in Practice	50			
	1. Morality and Ethics 2. Motive and Intention 3. Moral action and Moral Judgment 4. Normative Theories: (a) Ethical Egoism & Utilitarianism, (b) Kant's Moral Theory		SURAJIT MANNA		
	5.puruṣārtha (Buddha and āstika views) 6. Vedic Concepts of ṛta, yajña, ṛṇa, vidhi and niṣedha 7. Concept of ahiṁsā in Yoga		SITALI JANA		

	8. Concept of niṣkāmakarma preached in Śrīmadbhagavadgīitā				
	9. Concept of pañcaśīla in Buddhism 10. Jaina Concepts of pañcamahāvrata, triratna, anuvrata and mahāvrata 11. Awareness, Views and Praxis on Basic Moral Concerns of Environment: (a) Environmental awareness and Buddhism (b) Rabindranath Tagore's Environmental Praxis (c) Land Ethics (d) Shallow and Deep Ecology		SANKAR PRASAD SING		
Teaching Plan: Department of Philosophy: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D:** Contemporary Indian Philosophy	**75**			**4th week of April,2022 &3rd week of June,2022**
	1. Rabindranath Tagore (a)Nature of man : The Finite Aspect of Man, the Infinite Aspect of Man ,the FiniteInfinite Aspect of Man, (b) Nature of Religion, (c) Problem of Evil (f) Surplus in man 2. Swami Vivekananda (a)Practical Vedānta, (b) Universal Religion, (c) Yoga		RATNA PANDA	15/03/2022 to 25/06/2022	
	3. Sri Aurobindo (a)Nature of Reality, (b) Human Evolution– its different stages, (c) Integral Yoga 4. S. Radhakrishnan (a)Nature of Man, (b) Nature of Religious Experience, (c) Nature of Intuitive Apprehension		TAMASA SARANGI		
	5. Md. Iqbal (a)Nature of the Self, (b) Nature of the World, (c) Nature of God 6.Mahatma Gandhi (a) God and Truth, (b) Ahimsa, (c) Trusteeship		SITALI JANA		
UNITS	**PAPER: SEC-2:** Man and Environment	50			
	1. Meaning: (a) Word -meaning and Sentence-meaning, (b) Testability and Meaning 2. Definition 3. Concept and Truth		SURAJIT MANNA		
	4. Knowledge: Nature and Source of Knowledge 5. Determinism and Freedom		SANKAR PRASAD SING		

Teaching Plan: Department of Philosophy: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A:** : Philosophy of Religion	**75**		14/09/2021 to 18/01/2022	**1st week of November, 2021 &4th week of December,2021**
	1. Nature and Scope of Philosophy of Religion: (a) Religion, Dharma, Dhamma, (b) Philosophy of Religion, Comparative Religion and Theology 2. Origin and Development of Religion 3. Fundamental Features of Major Religions: Hinduism, Christianity, Islam, Buddhism: Basic Tenets, Prophets (if any), Incarnation, Bondage and Liberation 4. Arguments for the Existence of God (Indian and Western): Sāṁkhya-Yoga Arguments, Nyāya Arguments, Cosmological Arguments, Teleological Arguments, Ontological Arguments		TAMASA SARANGI		
	5. Arguments against the Existence of God: Sociological Arguments, Freudian Arguments, Buddhist Arguments 6. Religious Pluralism & Mysticism 7. Monotheism, Polytheism, Henotheism 8. Immanence and Transcendence of God		MANIKA DAS		
UNITS	**PAPER: SEC-3:** Philosophy in Practice	**75**			
	1. Common and Differentiating Characteristics of Philosophy and darśana 2. Nature of Inquiry in Philosophy and darśana 3. Outlines of the types of Inquiry in Philosophy and darśana: (a) Epistemic Inquiry in Philosophy and darśana, (b) Metaphysical Inquiry in Philosophy and darśana, (c) Axiological Inquiry in Philosophy and darśana		SK. TABARAK ALI		
	4. A few Model World-views and corresponding paths leading to Perfection (a) Plato's view, (b) Kant's view, (c) Sāṁkhya view and (d) Advaita Vedānta View 5. Methods of Philosophical Discourse (a) Reasoned Speculation, (b) Conceptual Analysis, (c) Linguistic Analysis, (d) Logical Argumentation, (e) Critical Reflection 6. Methods of Dārśanika Discourse (kathā) (a) chala, (b) jāti, (c) nigrahasthāna, (d) vāda, (e) jalpa, (f) vitaṇḍā		RATNA PANDA		
UNITS	**PAPER: GE-1:** Indian Philosophy	**75**			
	1. Introduction: General Features of Indian Philosophy		SITALI JANA		

	2. Cārvāka: (a) pratyakṣa (perception) as the only Source of Knowledge (b) Refutation of anumāna (inference) and śabda (testimony) as Sources of Knowledge (c) jaḍavāda and dehātmavāda 3. Jainism: (a) anekāntavāda (b) syādvāda and nayavāda 4. Buddhism: (a) Four Noble Truths (b) pratītyasamutpāda (c) kṣaṇabhaṅgavāda (d) nairātmyavāda				
	5.Nyāya–Vaiśeṣika: (a) pramāṇa: pratyakṣa (perception), anumāna (inference), upamāna (comparison) and śabda (testimony) (b) Saptapadārtha (Seven Categories) 6. Sāṁkhya: (a) Satkāryavāda (Theory of Causality) (b) Pariṇāmavāda (Theory of Evolution) 7. Yoga : (a) cittavṛttinirodha (b) aṣṭāṅgayoga 8. Mīmāṁsā (a) arthāpatti (b) anupalabdhi 9. Advaita Vedānta: Brahman, jīva and jagat		SURAJIT MANNA		
Teaching Plan: Department of Philosophy: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B**	**75**		**21/02/2022 to 10/06/2022**	**1st week of April,2022 & 1st week of June,2022**
	Saptapadārtha		MANIKA DAS		
	Saptapadārtha		TAMASA SARANGI		
UNITS	**PAPER: SEC-4:** Logical Reasoning and Application	50			
	A. The main objective of logical reasoning. B. Definitions: Pakṣa, sādhya, hetu, sapakṣa and Vipakṣa. C.Construction of kevalānvayī, kevalavyātirekī anvayvyātirekī anumiti D. Hetvābhāsa and its different kinds, detection of hetvābhāsa		RATNA PANDA		
	E Reasoning in practice I)Fallacy of relevance, Fallacies of ambiguity, Fallacies of weak induction, Avoiding fallacies ii)Logical applications of the concept of pakṣatā iii)Functional applications of ordinary operative relations between sense-organs and respective objects. F. Inductive reasoning in law I)The method of Inquiry in Law		SK. TABARAK ALI		

	ii)Causation in Legal reasoning iii)Analogical Reasoning in legal argument iv)Probability in legal argument G. Deductive Reasoning in Law I)Determining the correct rule of Law ii)Identifying, formulating, and applying rules of law. Iii)The law of libel iv)Logic is right reasoning				
UNITS	**PAPER: GE-2:** Philosophy of Mind	**75**			
	(a) Sensation: What is sensation? Attributes of sensation. (b) Perception: What is perception? Relation between sensation and perception, Gestalt theory of perception, illusion and hallucination. (c) Consciousness: Conscious, Subconscious, Unconscious,Evidence for the existence of the Unconscious, Freud's theory of dream.		SURAJIT MANNA		
	(d)Memory: Factors of memory, Laws of association, Forgetfulness. Learnung: The trialand Error theory, Pavlov's Conditioned Response theory, Gestalt theory. (e) Intelligence: Measurement of Intelligence, I.Q., Testof Intelligence, Binnet-Simon test.		SITALI JANA		

Physical Education

Teaching Plan: Department of Physical Education: SEMESTER-I(GENERAL)

		FULL MARKS	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**REMARKS**
UNITS	**PAPER: DSC-1A/2A(Foundation and history of physical education)**				

Unit-1	**Introduction** 1.1. Meaning, definition and scope of Physical Education. 1.2. Aims and objectives of Physical Education. 1.3. Misconception and modern concept of Physical Education. 1.4. Needs and importance of Physical Education in modern society	75	Kalpataru Samanta	01.10.2021 to 24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit-2	**Biological and sociological foundations of physical education** 2.1. Biological Foundation- Meaning and definition of growth and development. Factors affecting growth and development. Differences of growth and development. Principles of growth and development. 2.2. Age- Chronological age, anatomical age, physiological age and mental age.		KalpataruSamanta (Chapter-2.1,2.2)		

	2.3. Sociological Foundation- Meaning and definition of Sociology, Society, Socialization in Physical Education and Sports, Sports Ethics. 2.4. Role of games and sports in National and International integration.		Dr.Debabrata Samanta (Chapter-2.3,2.4)		
Unit-3	**History of physical education** 3.1 Historical development of Physical Education and Sports in India- Pre-Independence period and Post-Independence period. 3.2 Olympic Movement- Ancient Olympic Games and Modern Olympic Games. 3.3 Brief historical background of Asian Games and Commonwealth Games. 3.4 National Sports Awards- Arjuna Award, Rajiv Gandhi Khel Ratna Award, Dronacharya Award, Dhyanchand Award		Dr.Debabrata Samanta		
Unit-4	**Yoga education**		Dr.Dilip Biswas		

	4.1 Meaning and definition of the term Yoga, types, aims, objectives and importance of Yoga. 4.2 History of Yoga. 4.3 Astanga Yoga 4.4 Hatha Yoga				
	Paper:DSC1AP/2AP (Field Practical)				
1	**Marching** 1. Marching- fall in attention, Stand at ease, stand easy, Eyes right, Eyes front, Right Turn, Left Turn, About Turn, Mark Time Mark, Forward Mark	20	Dr.Debabrata Samanta	01.10.2021 to 24.02.2022	
2	**Suryanamaskar** 2. Learn and demonstrate the technique of Suryanamaskar.		Dr.Dilip Biswas		
3	**Callisthenics and Aerobic Activities** 3. Development of physical fitness through Callisthenics and Aerobic activities.		Kalpataru Samanta		

Teaching Plan: Department of Physical Education: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B(Management t of physical education and sports)**				
Unit-1	**Introduction** 1.1. Concept and definition of Sports Management. 1.2. Purpose of Sports Management, Importantance of Sports Management, 1.3. Principles of Sports Management. 1.4. Sports Manager and his duties	75	Kalpataru Samanta	01.04.2022 to 09.07.2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
Unit-2	**Tournament** 2.1. Tournaments: Meaning and definition, and types of tournaments (Knock-out, League, Combination, Challenge). 2.2. Procedure of drawing fixture.		Dr.Dilip Biswas		

	2.3. Method of organizing Annual Athletic Meet and Play Day. 2.4. Method of organizing of Intramural and Extramural competition.				
Unit-3	**Facilities and equipments** 3.1 Method of calculation of Standard Athletic Track marking. 3.2 Care and maintenance of play ground and gymnasium. 3.3 Importance, care and maintenance of sports equipment. 3.4 Time Table: Meaning, importance and factors affecting school Physical Education Time Table.		Dr.Debabrata Samanta		
Unit-4	**Leadership** 4.1 Meaning and definition of leadership. 4.2 Qualities of good leader in Physical Education.		Kalpataru Samanta		

	4.3 Types of Leadership. 4.4 Principles of leadership activities.				
	Paper:DSC1BP/2BP (Field Practical)				
1	**Track & field** 1. Lay out knowledge and Officiating ability of Track and field events	20	Kalpataru Samanta	01.04.2022 to 09.07.2022	
2	**Officiating ability of games** 2. Lay out knowledge and Officiating ability of Games: Football, Kabaddi, KhoKho,Volleyball, Hand Ball, Net Ball, Throw Ball,		Dr.Debabrata Samanta		
3	**Gymnastic and yoga** 3. Gymnastic and Yoga Scoring		Dr.Dilip Biswas		
Teaching Plan: Department of Physical Education: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C (Anatomy, Physiology and Exercise Physiology)**				**4th week of November,202**

Unit-1	**Introduction** 1.1. Meaning and definition of Human Anatomy, Physiology and Exercise Physiology. 1.2. Importance of Human Anatomy, Physiology and Exercise Physiology in Physical Education. 1.3. Cell- Structure and function. 1.4. Tissue- Types and functions.	75	Kalpataru Samanta	01.10.2021 to 05.02.2022	**1 &1st Week of January,2022**
Unit-2	**Musculo-skeletal system** 2.1. Skeletal System- Structure of Skeletal System. Classification and locations of bones and joints. Anatomical differences between male and female. 2.2. Muscular System- Type, location, function and structure of muscle. 2.3. Types of muscular contraction. 2.4. Effect of exercise and training on muscular system.		Kalpataru Samanta		

Unit-3	**Circulatory system** 3.1 Blood- Composition and function. 3.2 Heart- Structure and functions. Mechanism of blood circulation through heart. 3.3 Blood Pressure, Athletic Heart and Bradycardia 3.4 Effect of exercise and training on circulatory system.		Dr.Dilip Biswas		
Unit-4	**Respiratory system** 4.1 Structure and function of Respiratory organs. 4.2 Mechanism of Respiration. 4.3 Vital Capacity, O2 Debt and Second Wind. 4.4 Effect of exercise and training on respiratory system.		Dr.Debabrata Samanta		
	PAPER: DSC-1C/2C (Practical)				

1	**Assessment of BMI and WHR** 1. Assessment of BMI, and WHR.	20	Dr.Dilip Biswas	01.10.2021 to 05.02.2022	
2	**Measurement Of BP,VC,RR,PEI** 2. Measurement of Blood Pressure, Vital Capacity, Respiratory rate,		Kalpataru Samanta		
3	**Measurement Of HR,LL,PFR** Heart Rate, Limb length, PEI, and Pick flow Rate		Dr.Debabrata Samanta		
UNITS	**Paper: Sec-1 (Indian Games and Racket Sports/Practical)**	50		01.10.2021 to 05.02.2022	
C & D	**Badminton ,** a. Fundamental skills 1. Basic Knowledge: Various parts of the Racket and Grip. 2. Service: Short service, Long service, Long-high service.		Dr.Dilip Biswas		

	3. Shots: Over head shot, Defensive clear shot, Attacking clear shot, Drop shot, Net shot, Smash. 4. Game practice with application of Rules and Regulations. **Table Tennis** a. Fundamental skills 1. Basic Knowledge: Various parts of the Racket and Grip (Shake Hand & Pen Hold Grip). 2. Stance: Alternate & Parallel. 3. Push and Service: Backhand & Forehand. 4. Chop: Backhand & Forehand. 5. Receive: Push and Chop with both Backhand & Forehand. 6. Game practice with application of Rules and Regulations.				
A	**Kabaddi**		Kalpataru Samanta		

	a. Fundamental skills 1. Skills in Raiding: Touching with hands, Use of leg-toe touch, squat leg thrust, side kick, mule kick, arrow fly kick, crossing of baulk line. Crossing of Bonus line. 2. Skills of holding the raider: Various formations, catching from particular position, different catches, catching formation and techniques. 3. Additional skills in raiding: Escaping from various holds, techniques of escaping from chain formation, offense and defence. 4. Game practice with application of Rules and Regulations.				
B	**Kho-kho** a. Fundamental skills 1. Skills in Chasing: Sit on the box (Parallel & Bullet toe method), Get up from the box (Proximal & Distyal foot method), Give Kho		Dr.Debabrata Samanta		

	(Simple, Early, Late & Judgment), Pole Turn, Pole Dive, Tapping, Hammering, Rectification of foul. 2. Skills in running: Chain Play, Ring play and Chain & Ring mixed play. 3. Game practice with application of Rules and Regulations.				

Teaching Plan: Department of Physical Education: SEMESTER-IV(GENERAL)

UNITS	**PAPER: DSC-1D/2D (Health Education, Physical Fitness and Wellness)**				**4th week of April,2022 &3rd week of June,2022**
Unit-1	1.1. Concept, definition and dimension of Health. 1.2. Definition, aims, objectives and principles of Health Education. 1.3. Activities of Health Agencies- World Health Organization (WHO), United Nations Educational Scientific and Cultural Organization (UNESCO) and United Nations International Children's Emergency Fund (UNICEF)	75	Kalpataru Samanta	15.03.2022 to 25.06.2022	

	1.4. School Health Program- Health Service, Health Instruction, Health Supervision, Health appraisal and Health Record, Personal hygiene				
Unit-2	**Health Problems in India prevention and control** 2.1. Communicable Diseases- Malaria, Dengue and Chicken Pox and Diarrhoea. 2.2. Non-Communicable Diseases- Obesity, Diabetes and Asthma. 2.3. Nutrition- Nutritional requirements for daily living. Preparation and Principles of Balance Diet. Health disorders due to deficiencies of Protein, Vitamins and Minerals. 2.4. Postural deformities- Causes and corrective exercises of Kyphosis, Lordosis, Scoliosis, Knock Knee, Flat Foot and Bow Legs		Dr.Debabrata Samanta		
Unit-3	**Physical fitness and wellness** 3.1 Physical Fitness- Meaning, definition and importance of Physical Fitness.		Kalpataru Samanta		

	3.2 Components of Physical Fitness- Health and performance related Physical Fitness. 3.3 Concept of Wellness. Relationship between physical activities and wellness. 3.4 Ageing- Physical activities and its importance.				
Unit-4	**Health and first aid management** 4.1 First aid- Meaning, definition, importance and golden rules of First-aid. 4.2 Concept of sports injuries- Sprain, Strain, Facture, Dislocation and Wound. 4.3 Management of sports injuries through the application of Hydro-therapy and Thermotherapy. 4.4 Physiotherapy: Basic concept, types & principles. Management of sports injuries through the application of exercise and massage therapy.		Dr.Dilip Biswas		

	Paper:DSE1DP/2DP (Practical)				
1	**First aid** 1. First aid - Triangular Bandage: Slings (Arm Sling, Collar & Cuff Sling), Roller Bandages: Simple Spiral, Reverse Spiral, Figure of Eight, Spica	20	Dr.Dilip Biswas	15.03.2022 to 25.06.2022	
2	**Physiotherapy** 2. Practical Knowledge of Hydro-therapy, Thermo-therapy and Cryo-therapy		Dr.Debabrata Samanta		
UNITS	**PAPER: SEC-2 (Ball Games)**				
A	**Football** a. Fundamental Skills 1. Kicking: Kicking the ball with inside of the foot, Kicking the ball with Full Instep of the foot, Kicking the ball with Inner Instep of the foot, Kicking the ball with Outer Instep of the foot and Lofted Kick. 2. Trapping: Trapping- the Rolling ball,	50	Kalpataru Samanta	15.03.2022 to 25.06.2022	

	and the Bouncing ball with sole of the foot. 3. Dribbling: Dribbling the ball with Instep of the foot, Dribbling the ball with Inner and Outer Instep of the foot. 4. Heading: In standing, running and jumping condition. 5. Throw-in: Standing throw-in and Running throw-in. 6. Feinting: With the lower limb and upper part of the body. 7. Tackling: Simple Tackling, Slide Tackling. 8. Goal Keeping: Collection of Ball, Ball clearance- kicking, throwing and deflecting. 9. Game practice with application of Rules and Regulations. **VOLLEYBALL** a. Fundamental skills				

	1. Service: Under arm service, Side arm service, Tennis service, Floating service. 2. Pass: Under arm pass, Over head pass. 3. Spiking and Blocking. 4. Game practice with application of Rules and Regulations.				
B	**Handball** a. Fundamental Skills 1. Catching, Throwing and Ball control, 2. Goal Throws: Jump shot, Center shot, Dive shot, Reverse shot. 3. Dribbling: High and low. 4. Attack and counter attack, simple counter attack, counter attack from two wings and center. 5. Blocking, GoalKeeping and Defensive skills.		Dr.Debabrata Samanta		

	6. Game practice with application of Rules and Regulations.				
C	**Basketball** a. Fundamental Skills 1. Passing: Two hand Chest Pass, Two hands Bounce Pass, One hand Baseball Pass, Side arm Pass, Overhead Pass, Hook Pass. 2. Receiving: Two hand receiving, One hand receiving, Receiving in stationary position, Receiving while Jumping and Receiving while Running. 3. Dribbling: How to start dribble, drop dribble, High Dribble, Low Dribble, Reverse Dribble, Rolling Dribble. 4. Shooting: Lay-up shot and its variations, One hand set shot, Two hands jump shot, Hook shot, Free Throw.		Dr.Dilip Biswas		

	5. Rebounding: Defensive rebound and Offensive rebound. 6. Individual Defence: Guarding the player with the ball and without the ball, Pivoting. 7. Game practice with application of Rules and Regulations.				
D	**Netball** a. Fundamental skills 1. Catching: one handed, two handed, with feet grounded and in flight. 2. Throwing (Different passes and their uses): One hand passes (shoulder, high shoulder, underarm, bounce, lob), two hand passes (Push, overhead and bounce). 3. Footwork: Landing on one foot, landing on two feet, Pivot, Running pass.		Dr.Debabrata Samanta		

	4. Shooting: One hand, forward step shot, and backward step shot. 5. Techniques of free dodge and sprint, sudden sprint, sprint and stop, sprinting with change at speed. 6. Defending: Marking the player, marking the ball, blocking, inside the circle, outside the circle. Defending the circle edge against the passing. 7. Intercepting: Pass and shot. 8. Game practice with application of Rules and Regulations.				
E	**Throw ball** a. Fundamental skills: Overhand service, Side arm service, two hand catching, one hand overhead return, side arm return. b. Rules and their interpretations and duties of official		Kalpataru Samanta		

Teaching Plan: Department of Physical Education: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A (Test, Measurement and Evaluation in Physical Education)**				**1st week of November, 2021 &4th week of December,2021** 1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
Unit-1	**Introduction** 1.1. Concept of test, measurement & evaluation. 1.2. Criteria of good test. 1.3. Principles of evaluation. 1.4. Importance of Test, Measurement and Evaluation in Physical Education and Sports.	75	Kalpataru Samanta	14.09.2021 to 18.01.2022	
Unit-2	**Measurement of body compositions and somatotype assessment** 2.1 Body Mass Index (BMI) - Concept and method of measurement. 2.2. Body Fat - Concept and method of measurement. 2.3. Lean Body Mass (LBM) - Concept and method of measurement.		Dr.Debabrata Samanta		

	2.4. Somatotype- Concept and method of measurement.				
Unit-3	**Fitness test** 3.1 Kraus-Weber Muscular Strength Test 3.2 AAHPER Youth Fitness Test 3.3 Queens College Step Test 3.4 Harvard Step Test		Kalpataru Samanta		
Unit-4	**Sports skill test** 4.1 Lockhart and McPherson Badminton Skill Test 4.2 Johnson Basketball Test Battery 4.3 McDonald Soccer Test 4.4 Brady Volleyball Test		Dr.Dilip Biswas		
	Paper:DSE1AP/2AP (Practical)			2	
1	**Assessment of somatotype and body fat (%)**	20	Dr.Debabrata Samanta		

	1. Assessment of somatotype and Body fat percentage (%)			14.09.2021 to 18.01.2022	
2	**Assessment of AAHPER, HST** 2. Assessment of AAHPER Youth Fitness Test and Harvard Step Test		Dr.Dilip Biswas		
UNITS	**PAPER: SEC-3 (Gymnastics And Yoga/ Practical)**				
1	**Gymnastic** 1. Compulsory 1.1. Forward Roll 1.2. T-Balance 1.3. Forward Roll with Split leg 1.4. Backward Roll 1.5. Cart-Wheel [Note: Perform the above Gymnastic skills continuously in the same sequence] 2. Optional 2.1. Dive and Forward Roll2.2. Hand Spring 2.3. Head Spring 2.4. Neck Spring 2.5. Hand Stand and Forward Roll 2.6. Summersault	50	Dr.Debabrata Samanta	14.09.2021 to 18.01.2022	
2	**Yoga** 3. YOGA		Dr.Dilip Biswas		

	1 Asanas 3.1.1 Ardhachandrasana 3.1.2. Brikshasana 3.1.3. Padahastasana **3.2. Sitting Position** 3.2.1. Ardhakurmasana 3.2.2. Paschimottanasana 3.2.3. Gomukhasana **3.3. Supine Position** 3.3.1. Setubandhasana 3.3.2. Halasana 3.3.3. Matsyasana **3.4 Prone Position** 3.4.1 Bhujangasana 3.4.2 Salvasana 3.4.3 Dhanurasana **3.5 Inverted Position** 3.5.1 Sarbangasana 3.5.2 Shirsasana 3.5.3 Bhagrasana [Note: One Asana is compulsory from each position]				

	4. Pranayama 4.1. Kapalbhati 4.2. Bhramri 4.3. Anulam Vilom.				
UNITS	**PAPER: GE-1(Foundation and history of physical education)**				
Unit-1	**Introduction** 1.1. Meaning, definition and scope of Physical Education. 1.2. Aim and objectives of Physical Education. 1.3. Misconception and Modern concept of Physical Education. 1.4. Need and Importance of Physical Education in modern society	75	Kalpataru Samanta	14.09.2021 to 18.01.2022	
Unit-2	**Biological and sociological foundations of physical education** 2.1. Biological Foundation- Meaning and definition of growth and development. Factors affecting growth and development. Differences		Kalpataru Samanta (Chapter-2.1,2.2)		

	of growth and development. Principles of growth and development. 2.2. Age- Chronological age, anatomical age, physiological age and mental age.				
	2.3. Sociological Foundation- Meaning and definition of Sociology, Society, Socialization in Physical Education and Sports, Sports Ethic. 2.4. Role of games and sports in National and International integration		Dr.Debabrata Samanta (Chapter-2.3,2.4)		
Unit-3	**History of physical education** 3.1 Historical development of Physical Education and Sports in India- Pre-Independence period and Post-Independence period. 3.2 Olympic Movement- Ancient Olympic Games and Modern Olympic Games.		Dr.Debabrata Samanta		

	3.3 Brief historical background of Asian Games and Commonwealth Games. 3.4 National Sports Awards- Arjuna Award, Rajiv Gandhi Khel Ratna Award, Dronacharya Award, Dhyanchand Award				
Unit-4	**Yoga education** 4.1 Meaning and definition of the term Yoga, types, aim, objectives and important of Yoga. 4.2 History of Yoga. 4.3 Astanga Yoga 4.4 Hatha Yoga		Dr.Dilip Biswas		
	Paper:GE-1P (Field Practical)				
1	**Marching** 1. Marching- fall in attention, Stand at ease, stand easy, Eyes right, Eyes front, Right Turn, Left Turn, About Turn, Mark Time Mark, Forward Mark	20	Dr.Debabrata Samanta	14.09.2021 to 18.01.2022	

2	**Suryanamaskar** 2. Learn and demonstrate the technique of Suryanamaskar.		Dr.Dilip Biswas		
3	**Callisthenics and Aerobic Activities** 3. Development of physical fitness through Callisthenics and Aerobic activities.		Kalpataru Samanta		
Teaching Plan: Department of Physical Education: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B (Sports Training)**				**1st week of April,2022 & 1st week of June,2022**
Unit-1	**Introduction** 1.1. Meaning and definition of Sports Training. 1.2. Aim and characteristics of Sports Training. 1.3. Principles of Sports Training. 1.4. Importance of Sports Training.	75	Dr.Debabrata Samanta	21.02.2022 to 10.06.2022	
Unit-2	**Principal of training and conditioning**		Dr.Debabrata Samanta		

	2.1. Warming up and cooling down- Meaning, types and methods. 2.2. Conditioning - Concept of Conditioning and its principles. 2.3. Training Methods- Circuit Training, Interval Training, Weight Training. 2.4. Periodisation- Meaning, types, aim and contents of different periods.				
Unit-3	**Training load and adaption** 3.1 Training Load - Meaning, definition, types and factors of training load. 3.2 Components of training load. 3.3 Over Load - Meaning, causes, symptoms and tackling of over load. 3.4 Adaptation - Meaning and conditions of adaptation.		Dr.Dilip Biswas		
Unit-4	**Training techniques**		Kalpataru Samanta		

	4.1 Strength - Means, types and methods of strength development. 4.2 Speed - Means, types and methods of speed development. 4.3 Endurance - Means, types and methods of endurance development. 4.4 Flexibility - Means, types and methods of flexibility development				
	Paper:DSE1AP/2AP Practical)	20		21.02.2022 to 10.06.2022	
1	**Weight training and circuit training** 1. Practical Experience of Weight Training and Circuit Training.		Kalpataru Samanta		
2	**Measurement of speed, strength and flexibility** 2. Measurement of Speed, Strength (Grip/Leg), Explosive Strength (Leg) and Flexibility.		Dr.Dilip Biswas		
UNITS	**PAPER: SEC-4 (Track and Field) Practical**				

1	**Track events** 1.1. Starting Techniques: Standing start and Crouch start (its variations) use of Block. 1.2. Acceleration with proper running techniques. 1.3. Finishing technique: Run Through, Forward Lunging and Shoulder Shrug. 1.4. Relay Race: Starting, Baton Holding/Carrying, Baton Exchange in between zone, and Finishing.	20	Kalpataru Samanta	21.02.2022 to 10.06.2022	
2	**Field events** 2.1. Long Jump: Approach Run, Take-off, Flight in the air (Hang Style/Hitch Kick) and Landing. 2.2. High jump: Approach Run, Take-off, Bar Clearance (Straddle) and Landing. 2.3. Shot put: Holding the Shot, Placement, Initial Stance, Glide, Delivery Stance and Recovery (Perry O'Brien Technique).		Dr.Debabrata Samanta		

	Field events 2.4. Discus Throw: Holding the Discus, Initial Stance, Primary Swing, Turn, Release and Recovery (Rotation in the circle). 2.5. Javelin Throw: Grip, Carry, Release and Recovery (3/5 Impulse stride).		Dr.Dilip Biswas		
UNITS	**PAPER: GE-2(Anatomy, Physiology and Exercise Physiology)**	75		21.02.2022 to 10.06.2022	
Unit-1	**Introduction** 1.1. Meaning and definition of Human Anatomy, Physiology and Exercise Physiology. 1.2. Importance of Human Anatomy, Physiology and Exercise Physiology in Physical Education. 1.3. Cell- Structure and function. 1.4. Tissue- Types and functions.		Kalpataru Samanta		
Unit-2	**Musculo-skeletal system**		Kalpataru Samanta		

	2.1. Skeletal System- Structure of Skeletal System. Classification and locations of bones and joints. Anatomical differences between male and female. 2.2. Muscular System- Type, location, function and structure of muscle. 2.3. Types of muscular contraction. 2.4. Effect of exercise and training on muscular system.				
Unit-3	**Circulatory system** 3.1 Blood- Composition and function. 3.2 Heart- Structure and functions. Mechanism of blood circulation through heart. 3.3 Blood Pressure, Athletic Heart and Bradycardia. 3.4 Effect of exercise and training on circulatory system.		Dr.Dilip Biswas		

Unit-4	**Respiratory system** 4.1 Structure and function of Respiratory organs. 4.2 Mechanism of Respiration. 4.3 Vital Capacity, O2 Debt and Second Wind. 4.4 Effect of exercise and training on respiratory system.		Dr.Debabrata Samanta		
	PAPER: GE-2P (Practical)	20		21.02.2022 to 10.06.2022	
1	**Assessment of BMI and WHR** 1. Assessment of BMI, and WHR.		Dr.Dilip Biswas		
2	**Measurement Of BP,VC,RR,PEI** 2. Measurement of Blood Pressure, Vital Capacity, Respiratory rate,		Kalpataru Samanta		
3	**Measurement Of HR,LL,PFR** Heart Rate, Limb length, PEI, and Pick flow		Dr.Debabrata Samanta		

Physics

Teaching Plan: Department of Physics: SEMESTER-I(HONOURS)

UNITS	PAPER: CC1 Mathematical Physics-I Credit-6	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	REMARKS
	1. Calculus	Credit-4 40	Biswanath Dolai	**01/10/2021 to 24/02/2022**	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
	2. Vector Algebra and Vector Calculus				
	3. Orthogonal Curvilinear Coordinates				
	4. Introduction to probability		Subhasis Jana		
	5.Dirac Delta function and its properties				
	Practical	Credit-2 20	Saurav Samanta, Ismail Sk		
UNITS	**PAPER: CC2 Mechanics Credit-6**				
	1. Fundamentals of Dynamics	Credit-4 40	Saurav Samanta		
	2. Work and Energy				
	3.Collisions, Rotational Dynamics				
	4. Elasticity				

	5. Fluid Motion		
	6. Gravitation and Central Force Motion		Ismail Sk
	7.Oscillation		
	8. Non Inertial Systems		
	9.Special theory of relativity		
	Practical	Credit-2 20	Biswanath Dolai ,Saurav Samanta
UNITS	**PAPER: GE-1 Elements of Modern Physics Credit-6**		
	1. Planck's quantum	Credit-4 40	Swarnakamal Jana
	2. Problems with Rutherford model		
	3. Position measurement		
	4. Two slit interference experiment		Debasis Jana
	5. One Dimensional infinitely Rigid Box		
	6. Size and structure of atomic nucleus and its relation with atomic weight		
	7. Radioactivity		

	8. Fission and fusion				
	Practical	Credit-2 20	Swarnakamal Jana, Debasis Jana		

Teaching Plan: Department of Physics: SEMESTER-II(HONOURS)

UNITS	PAPER: CC3 Electricity and Magnetism Credit-6	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal Examination
	1. Electric field and electric potential	Credit-4 40	Ismail Sk	**01/04/2022 to 09/07/2022**	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
	2. Dielectric properties of matter				
	3. Magnetic field		Saurav Samanta		
	4. Magnetic properties of matter				
	5. Electromagnetic induction				
	6. Electrical circuit, Network theorem				
	Practical	Credit-2 20	Biswanath Dolai ,Saurav Samanta		
UNITS	**PAPER: CC4 Waves and Optics Credit-6**				

	1. Superposition of Collinear Harmonic oscillations	Credit-4 40	Subhasis Jana		
	2. Superposition of two perpendicular Harmonic Oscillations				
	3. Wave motion				
	4. Velocity of waves				
	5. Superposition of Two Harmonic Waves				
	6. Wave optics		Rajkumar Mahesh		
	7. Interference				
	8. Interferometer				
	9. Diffraction and holography				
	Practical	Credit-2 20	Saurav Samanta, Subhasis Jana		
UNITS	**PAPER: GE-2 Thermal Physics and Statistical Mechanics Credit-6**	Credit-4 40	Saurav Samanta		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
	1. Laws of Thermodynamics				
	2. Thermodynamical Potentials				
	3. Kinetic Theory of Gases				

	4. Theory of Radiation		Biswanath Dolai		
	5. Statistical Mechanics				
	Practical	Credit-2 20	Saurav Samanta, Biswanath Dolai		
Teaching Plan: Department of Physics: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC5 Mathematical Physics II Credit-6**			01/10/2021 to 05/02/2022	**4th week of November,2021 &1st Week of January,2022**
	1. Fourier Series	Credit-4 40	Ismail Sk		
	2. Frobenius Method and Special Functions				
	3. Some Special Integrals				
	4. Variational calculus in physics		Subhasis Jana		
	5. Partial Differential Equations				
	Practical	Credit-2 20	Saurav Samanta, Ismail Sk		
UNITS	**PAPER: CC6 Thermal Physics** Biswanath Dolai				
	1.Introduction to Thermodynamics	Credit-4	Saurav Samanta		

	2.Thermodynamic Potentials	40	
	3.Maxwell's Thermodynamic Relations		
	4.Kinetic Theory of Gases		Biswanath Dolai
	Practical	Credit-2 20	Biswanath Dolai Subhasis Jana
UNITS	**PAPER: CC7 Digital Systems and Applications Credit-6**		
	Integrated Circuits	Credit-4 40	Debasis Jana
	Digital Circuits		
	Boolean algebra		
	Data processing circuits		
	Circuits		
	Timers		Subhasis Jana
	Shiftregisters		
	Counters (4 bits)		
	Computer Organization		
	Practical	Credit-2 20	Debasis Jana, Subhasis Jana

UNITS	**PAPER: SEC-1 Electrical Circuits and Network Skills Credit-2**				
	1. Basic Electricity Principles	Credit-2 40	Biswanath Dolai		
	2. Understanding Electrical Circuits				
	3. Electrical Drawing and Symbols				
	4. Generators and Transformers				
	5. Electric Motors				
	6. Solid-State Devices				
	7. Electrical Protection				
	8. Electrical Wiring				
UNITS	**PAPER: GE-3 Solid State Physics** Credit-6				
	1. Crystal Structure	Credit-4 40	Ismail Sk		
	2. Elementary Lattice Dynamics				
	3. Magnetic Properties of Matter				
	4. Dielectric Properties of Materials		Swarnakamal Jana		
	5. Elementary band theory				
	6. Superconductivity				
	Practical	Credit-2	Biswanath Dolai, Saurav Samanta		

		20			
Teaching Plan: Department of Physics: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC8 Mathematical Physics III Credit-6**				**4th week of April,2022 &3rd week of June,2022**
	1. Complex analysis	Credit-4 40	Ismail Sk	15/03/2022 to 25/06/2022	
	2. Integrals transforms				
	3. Matrices		Subhasis Jana		
	4. Eigen values and Eigen vectors				
	Practical	Credit-2 20	Ismail Sk, Saurav Samanta		
UNITS	**PAPER: CC9 Elements of Modern Physics Credit-6**				
	Origin of Quantum Mechanics	Credit-4 40	Biswanath Dolai		
	Probability and amplitude, Superposition principle				
	Solution for simple potentials and elementary nuclear physics		Saurav Samanta		
	Radioactivity, Fission, Fusion, LASER				
	Practical	Credit-2 20	Ismail Sk, Biswanath Dolai		

UNITS	**PAPER: CC10 Analog System and Applications Credit-6**		
	Semiconductor Diodes and application	Credit-4 40	Debasis Jana
	Two terminal devices and their applications		
	Bipolar Junction transistors		Subhasis Jana
	Field Effect transistors		
	Amplifiers		
	Practical	Credit-2 20	Debasis Jana, Subhasis Jana
UNITS	**PAPER: SEC-2 Renewable Energy and Energy Harvesting Credit-2**		
	Fossil fuels and Alternate Sources of energy	Credit-2 40	Biswanath Dolai
	Solar energy		
	Wind Energy harvesting		
	Ocean Energy,Geothermal Energy,Hydro Energy		Debasis Jana
	Piezoelectric and Electromagnetic Energy Harvesting		
UNITS	**PAPER: GE-4 Electricity and Magnetism Credit-6**		
	Vector Analysis	Credit-4	Rajkumar Mahesh

		40			
	Electrostatics				
	Magnetism				
	Electromagnetic Induction		Swarnakamal Jana		
	Maxwell`s equations and Electromagnetic wave propagation				
	Practical	Credit-2 20	Swarnakamal Jana, Rajkumar Mahesh		
Teaching Plan: Department of Physics: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC11 Quantum Mechanics and Applications Credit-6**				**1st week of November, 2021 &4th week of December,2021**
	Schrodinger equation:	Credit-4 40	Biswanath Dolai	14/09/2021 to 18/01/2022	
	General discussion of bound states in an arbitrary potential				
	Quantum theory of hydrogen-like atoms:				
	Atoms in Electric & Magnetic Fields:		Saurav Samanta		
	Atoms in External Magnetic Fields				

	Many electron atoms		
	Practical	Credit-2 20	Saurav Samanta, Ismail Sk
UNITS	**PAPER: CC12 Solid State Physics Credit-6**		
	Crystal Structure	Credit-4 40	Swarnakamal Jana
	Elementary Lattice Dynamics		
	MagneticPropertiesofMatter		
	Dielectric Properties of Materials		Ismail Sk
	Ferro electric Properties of Materials		
	Elementary band theory		
	Superconductivity		
	Practical	Credit-2 20	Biswanath Dolai, Subhasis Jana
UNITS	**PAPER: DSE-1 Classical Dynamics Credit-6**		
	Classical Mechanics of Point Particles	Credit-6 60	Saurav Samanta
	Small Amplitude Oscillations		
	Special Theory of Relativity		Ismail Sk

	Fluid Dynamics				
UNITS	**PAPER: DSE-2 Nuclear and Particle physics Credit-6**				
	General Properties of Nuclei	Credit-6 60	Biswanath Dolai		
	Nuclear Models				
	Radioactivity decay				
	Nuclear Reactions				
	Interaction of Nuclear Radiation with matter		Subhasis Jana		
	Detector for Nuclear Radiations				
	Particle Accelerators				
	Particle physics				
Teaching Plan: Department of Physics: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13 Electromagnetic Theory Credit-6**				**1st week of April,2022 & 1st week of June,2022**
	Maxwell Equations	Credit-4 40	Ismail Sk	21/02/2022 to 10/06/2022	
	EM Wave Propagation in Unbounded Media				
	EM Wave in Bounded Media				
	Polarization of Electromagnetic Waves		Saurav Samanta		

	Wave guides		
	Optical Fibres		
	Practical	Credit-2 20	Biswanath Dolai, Saurav Samanta
UNITS	**PAPER: CC14 Statistical Mechanics Credit-6**		
	Classical Statistical Mechanics	Credit-4 40	Biswanath Dolai, Debasis Jana
	Classical Theory of Radiation		
	Quantum Theory of Radiation		
	Bose-Einstein Statistics:		
	Fermi-Dirac Statistics		
	Practical	Credit-2 20	Saurav Samanta, Ismail Sk
UNITS	**PAPER: DSE-3 Communication Electronics Credit-6**		
	Electronic communication	Credit-4 40	Debasis Jana
	Analog Modulation		
	Analog Pulse Modulation		
	Digital Pulse Modulation		Subhasis Jana

	Satellite Communication				
	Mobile Telephony System				
	Practical	Credit-2 20	Debasis Jana, Subhasis Jana		
UNITS	**PAPER: DSE-4 Biological Physics Credit-6**				
	Overview	Credit-6 60	Biswanath Dolai		
	Molecules of life				
	The complexity of life		Saurav Samanta		
	Evolution				
Teaching Plan: Department of Physics: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A/3A Mechanics Credit-6**				
	Vectors	Credit-4 40	Swarnakamal Jana	01/10/2021 to 24/02/2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
	Ordinary Differential Equations				
	Laws of Motion				
	Momentum and Energy				
	Rotational Motion				
	Gravitation		Debasis Jana		
	Oscillations				

	Elasticity				
	Special theory of relativity				
	Practical	Credit-2 20	Swarnakamal Jana, Debasis Jana		
Teaching Plan: Department of Physics: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B/3B Electricity and Magnetism Credit-6**				**2nd week of May,2022 & 2nd week of July, 2022**
	Vector Analysis	Credit-4 40	Rajkumar Mahesh	01/04/2022 to 09/07/2022	
	Electrostatics				
	Magnetism				
	Electromagnetic Induction		Debasis Jana		
	Maxwell`s equations				
	Practical	Credit-2 20	Saurav Samanta, Rajkumar Mahesh		
Teaching Plan: Department of Physics: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C Thermal Physics and Statistical Mechanics Credit-6**				**4th week of November,2021 &1st Week of January,2022**
	Thermodynamic Description of system	Credit-4 40	Debasis Jana	01/10/2021 to 05/02/2022	
	Thermodynamic Potentials				

	Kinetic Theory of Gases		Swarnakamal Jana		
	Theory of Radiation				
	Statistical Mechanics				
	Practical	Credit-2 20	Ismail Sk, Swarnakamal Jana		
UNITS	PAPER: SEC-1 Physics Workshop Skill Credit-2	Credit-2	Biswanath Dolai		
	Introduction	40			
	Mechanical Skill				
	Electrical and Electronic Skill		Rajkumar Mahesh		
	Introduction to prime movers				
Teaching Plan: Department of Physics: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3D Waves and Optics Credit-6**				**4th week of April,2022 &3rd week of June,2022**
	Superposition of Two Collinear Harmonic oscillations	Credit-4 40	Subhasis Jana	15/03/2022 to 25/06/2022	
	Superposition of Two Perpendicular Harmonic Oscillations				
	Waves Motion- General				
	Fluids				

	Sound				
	Wave Optics		Rajkumar Mahesh		
	Interference				
	Michelson's Interferometer				
	Diffraction				
	Polarization				
	Practical	Credit-2 20	Saurav Samanta, Rajkumar Mahesh		
UNITS	**PAPER: SEC-2 Electrical Circuits and Network Skills Credit-2**				
	Basic Electricity Principles	Credit-2 40	Biswanath Dolai		
	Understanding Electrical Circuits				
	Electrical Drawing and Symbols				
	Generators and Transformers				
	Electric Motors		Debasis Jana		
	Solid-State Devices				
	Electrical Protection				
	Electrical Protection				

Teaching Plan: Department of Physics: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A Elements of Modern Physics** Credit-6				**1st week of November, 2021 &4th week of December,2021**
	Planck's quantum	Credit-4 40	Swarnakamal Jana	14/09/2021 to 18/01/2022	
	Problems with Rutherford model				
	Position measurement				
	Two slit interference experiment				
	One Dimensional infinitely Rigid Box		Debasis Jana		
	Size and structure of atomic nucleus and its relation with atomic weight				
	Radioactivity				
	Fission and fusion				
	Practical	Credit-2 20	Swarnakamal Jana, Debasis Jana		

UNITS	**PAPER: SEC-3 Renewable Energy and Energy Harvesting Credit-2**				
	Fossil fuels and Alternate Sources of energy	Credit-1 20	Biswanath Dolai		
	Solar energy				
	Wind Energy harvesting				
	Ocean Energy				
	Geothermal Energy		Debasis Jana		
	Hydro Energy				
	Piezoelectric Energy harvesting				
	Electromagnetic Energy Harvesting				
	Practical	Credit-1 20	Biswanath Dolai, Debasis Jana		
Teaching Plan: Department of Physics: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B Solid State Physics** Credit-6				**1st week of April,2022 & 1st week of June,2022**
	Crystal Structure	Credit-4 40	Ismail Sk	21/02/2022 to 10/06/2022	
	Elementary Lattice Dynamics				

	Magnetic Properties of Matter				
	Dielectric Properties of Materials				
	Elementary band theory		Biswanath Dolai		
	Superconductivity				
	Practical	Credit-2 20	Biswanath Dolai, Ismail Sk		
UNITS	**PAPER: SEC-4 Weather Forecasting** Credit-2	Credit-1 20			
	Introduction to atmosphere		Rajkumar Mahesh		
	Measuring the weather				
	Weather systems				
	Climate and Climate Change				
	Basics of weather forecasting				
	Practical	Credit-1	Rajkumar Mahesh		

Physiology

Teaching Plan: Department of Physiology: SEMESTER-I(HONOURS)

UNITS	PAPER: CC1	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal Examination

	Cell biology and structural unit of human system	Th-40, Pr.-20, IA-10, CA-05		01.10.2021 to 24.02.2022	
1.	**C1T1 : Cell biology and structural unit of human system** Cell type, structure and function of plasma membrane, membrane transport.		Mr. Gourchandra Samanta & Miss. Fuldona Pandit		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
	EM structure and function of nucleous, mitochondriangolgi body, ER, Cell division, different tissue.		Mrs. Munmun Pradhan		
	Development and Organization of different organs and systems of the human body. Basic principle and use of different microscopes.		Mr. Buddhadev Debnath		
1.	**C1P1: Histology** Study and Identification of Stained Sections of different Mammalian Tissue and Organs.		Dr. SaswatiParua(Mondal)		
UNITS	**PAPER: CC2** **Biological Physics and Enzymes**	Th-40, Pr.-20, IA-10, CA-05			1st internal examination on 4th week of December, 2022

1.	**C2T2 : Biological Physics and Enzymes** Units for measuring concentration of solutes. Bonds and Forces in Bio-molecules. Biophysical and Biochemical Principles. Ph, buffers, thermodynamics.		Mr. Monoj Maiti		and 2nd internal examination on 2nd week of March,2022
	Flow and Pressure and Ultracentrifugation. Basic principle and use of light, phase contrast, election microscopy, atomic force microscopy and fluorescence microscopy. Spectrophotometer. Chromatography, electrophoresis. Nanoparticles and its application in Physiology.		Mr. Debabrata Paria		
	Enzyme: Definition, chemical nature, classification and nomenclature. Mechanism of enzyme action – active site, specificity and enzyme-substrate complex formation. Enzyme kinetics. Allosteric enzyme, Regulation of enzyme activity. Enzymes in clinical diagnosis.		Dr. SaswatiParua(Mondal)		

1.	**C2P2: Biological Physics and Enzymes** Demonstration of oncotic pressure of colloidal solutions by Oncometers; Determination of Systolic, Diastolic, Pulse and Mean Blood Pressure by non-invasive methods (Auscultatory Methods).		Dr. SaswatiParua(Mondal) & Mr. Debabrata Paria		
	Determination of enzyme actions (e.g. CAT, Amylase,)		Miss. Fuldona Pandit		
UNITS	**PAPER: GE-1**	Th-40, Pr.-20, IA-10, CA-05			
1.	**GE1T : Blood and Immune System and Cardiovascular System** Blood and Immune System- Blood – Composition and function, blood cell formation and related disorders. Normal and abnormal hemoglobin. Blood groups, Blood transfusion and its hazards.		Mr. DebabrataParia		1st internal examination on 4th week of December, 2022 and 2nd internal examination on

2.	Immunity-innate and acquired, Antigens, antibody-structure, classification and functions. Autoimmune diseases. Cardiovascular system- Structure of heart and blood vessels, Junctional tissues of the heart, Cardiac cycle and heart sounds, Cardiac output. Heart rate, Blood pressure, ECG, artificial pacemaker.		Mr. BuddhadevDebnath & Mr. MonojMaiti		2nd week of March,2022
	GE1P : Blood and Immune System and Cardiovascular System TC of WBC, DC of WBC (with Leishman stain), Haemoglobin estimation by haematometer, Haemin crystal. BT, CT & Blood group. Measurement of HR,PFI, Step Test. BP: systolic, diastolic, mean arterial blood pressure, pulse pressure by Riva- Royce mercury manometer		Mrs. Munmun Pradhan Mr. GourchandraSamanta,		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022

Teaching Plan: Department of Physiology: SEMESTER-II(HONOURS)

UNITS	PAPER: CC3Physiology of Nerve and Muscle cells	FULL MARKS Th-40, Pr.-20, IA-10, CA-05	NAME OF THE TEACHER	MONTH OF TEACHING 01.04.20222 to 09.07.2022	REMARKS
	C3T: Physiology of Nerve and Muscle cells				

1.	**Excitable Tissue**: Nerve: Nerve Cells Excitation & Conduction Measurement of Electrical Events Ionic Basis of Excitation & Conduction Properties of Mixed Nerves Nerve Fiber Types & Function.		Mrs. Munmun Pradhan		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
2.	**Excitable Tissue: Muscle** Skeletal Muscle Cardiac Muscle Smooth Muscle		Mr. MonojMaiti & Mr. BuddhadevDebnath		
3.	**Synaptic & Junctional Transmission** Synaptic Transmission, Functional Anatomy Electrical Events at Synapses. Neuromuscular Transmission Neuromuscular Junction.		Dr.SaswatiParua(Mondal)		
4.	**Initiation of Impulses in Sense Organs** Sense Organs & Receptors The Senses Electrical & Ionic Events in Receptors "Coding" of Sensory Information.		Mr. DebabrataParia		

	C3P: Histological Study, Experiment of Nerve and Muscle Isolation and Staining of nerve fibres with node(s) of Ranvier ($AgNO_3$) and muscle fibres (H and E). Preparation of sciatic nerve innervated gastrocnemius muscle of toad.		Mr. DebabrataParia		
	Kymographic recording of mechanical responses of gastrocnemius muscle to different stimuli and also effect of temperature and load. Calculation of work done by the muscle. Determination of nerve conduction velocity.		Mr. BuddhadevDebnath		
UNITS	**PAPER: CC4**	Th-40, Pr.-20, IA-10, CA-05			
	C4T: Chemistry of Bio-molecules Classification, structure, Properties and Functions of Carbohydrates, Proteins and lipids.		Dr.SaswatiParua(Mondal) & Mr. Gourchandra Samanta,		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
	Structure, types and Function of DNAs and RNAs.		Miss. FuldonaPandit		
	C4T: Biological Chemistry Qualitative tests for the identification of physiologically important substances:		Miss. FuldonaPandit &		

	Hydrochloric acid, lactic Acid, Uric Acid, Glucose, Galactose, Fructose, Sucrose, Lactose, Albumin, Gelatin, Peptone, Starch, Dextrin, Urea, Glycerol, Bile salts.		Mr. DebabrataParia		
UNITS	**PAPER: GE-2**	Th-40, Pr.-20, IA-10, CA-05			
	GE2T: Developmental Biology / Embryology Gametogenesis: Spermatogenesis & Oogenesis. Fertilization: In Sea-urchin and mammals.		Mr. BuddhadevDebnath & Mr. GourchandraSamanta,		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
	Cleavage: Cleavage plane, types, role of yolk in cleavage; cleavage process in mammals. Blastula formation: mammals Morphogenetic movements.		Miss. FuldonaPandit & Mrs. Munmun Pradhan		
	Gastrulation: Mammals Concept of induction, determination, and differentiation. Organogenesis: development of eye as an example of reciprocal and repeated inductive events.		Mr. DebabrataParia		
	GE2P: Developmental Biology / Embryology		Dr.SaswatiParua(Mondal)		

	H & E staining of ovarian tissue sections and identification of Graafian follicle, Corpus Luteum, and demonstration of preserved mammalian embryo.				
Teaching Plan: Department of Physiology: SEMESTER-III(HONOURS)					
UNITS	**PAPER: CC5** **Circulating Body Fluids**	Th-40, Pr.-20, IA-10, CA-05		01.10.2021 to 05.02.2022	**4th week of November,2021 &1st Week of January,2022**
	C5T: Circulating Body Fluids Introduction, Blood ,Bone Marrow,White Blood Cells, Immune Mechanisms, Platelets, Red Blood Cells, Blood Types, Plasma,Hemostasis, Lymph, Clinical implications		Dr.SaswatiParua(Mondal) & Mrs. Munmun Pradhan		
	C5P: Hematological Experiments Preparation and staining of blood film with Leishman's stain, Identification of the blood corpuscles, Differential count of WBC, Total count of RBC and WBC, Bleeding time and clotting time, Hemoglobin estimation,		Dr.SaswatiParua(Mondal)		
	Preparation of haemin crystal, Preparation and staining of bone marrow, Measurement of diameter of megakaryocyte, Reticulocyte staining, Blood group determintation.		Mrs. Munmun Pradhan		

UNITS	PAPER: CC6 Circulation	Th-40, Pr.-20, IA-10, CA-05		
1.	**C6T: Circulation** **Origin of the Heartbeat & the Electrical Activity of the heart** Origin & Spread Of Cardiac Excitation The Electrocardiogram Cardiac Arrhythmias Electrocardiographic Findings in Other Cardiac & Systemic Diseases, hypertrophy and cardiac myopathy		Mr. MonojMaiti	
2.	**The Heart as a Pump** Introduction Mechanical Events of the Cardiac Cycle Cardiac Output.		Mr. MonojMaiti	
3.	**Dynamics of Blood & Lymph Flow** Introduction Anatomic Considerations Biophysical Considerations Arterial & Arteriolar Circulation Capillary Circulation Lymphatic Circulation & Interstitial Fluid Volume		Mr. BuddhadevDebnath	

4.	**Cardiovascular regulatory Mechanisms** Introduction Local Regulatory Mechanisms Substances Secreted by the Endothelium Systemic Regulation by Hormones Systemic Regulation by the Nervous System		Dr.SaswatiParua(Mondal) & Mr. BuddhadevDebnath	
5.	**Circulation Through special Regions** Cerebral Circulation, Anatomic Considerations, Cerebrospinal Fluid The Blood-Brain barrier, Cerebral Blood Flow, Regulation of Cerebral Circulation.		Mr. BuddhadevDebnath	
	Brain Metabolism & Oxygen Requirements, Coronary Circulation Splanchnic Circulation, Circulation of the skin Placental &Fetal Circulation.		Mr. GourchandraSamanta	
6.	**Cardiovascular Homeostasisin Health & Disease** Compensation for Gravitational Effects Exercise Inflammation & Wound Healing Shock Hypertension Heart Failure, stroke.		Dr.SaswatiParua(Mondal)	
	C6P: Cardiovascular Physiology Experimental Preparation of Amphibian Ringer solution. Kymographic recording of the movements of perfused heart of toad.		Mr. BuddhadevDebnath	

	Study of the effects of changes in perfusion fluid pressure, changes in temperature, excess calcium and potassium ion concentration, acetylcholine, adrenaline on the on the movement of heart.		Mr. DebabrataParia	
UNITS	**PAPER: CC7** **Functions of the Nervous System**	Th-40, Pr.-20, IA-10, CA-05		
1.	**C7T: Functions of the Nervous System** **Reflexes-** Monosynaptic Reflexes: The Stretch Reflex, Polysynaptic Reflexes: The Withdrawal Reflex General Properties of Reflexes		Mr. GourchandraSamanta,	
2.	**Cutaneous, Deep & Visceral Sensation** Pathways Touch Proprioception Temperature Pain Other Sensations		Mr. GourchandraSamanta,	
3.	**Arousal Mechanisms, Sleep, & the Electrical Activity of the Brain** The Reticular Formation & the Reticular Activating System, The Thalamus & the Cerebral Cortex Evoked Cortical Potential, The Electroencephalogram Physiological Basis of the EEG, Consciousness, & Sleep Interpretation of abnormal EEG pattern.		Miss. FuldonaPandit	

4.	**Control of Posture & Movement** General Principles Corticospinal & Corticobulbar System, Anatomy & Function Posture and its regulation, Basal Ganglia, Cerebellum, Movement disorders		Miss. FuldonaPandit	
5.	**The Autonomic Nervous System** Anatomic Organization of Autonomic Outflow, Chemical Transmission at autonomic Junctions, Responses of Effector Organs to Autonomic Nerve Impulses, Cholinergic and Adrenergic Discharge.		Mr. Debabrata Paria	
6.	**Central Regulation of Visceral Function** Medulla Oblongata, Hypothalamus, Anatomic Consideration, Hypothalamic Function, Relation to Autonomic Function, Relation to Sleep, Relation to Cyclic Phenomena, Hunger, Thirst Control of Posterior Pituitary Secretion Control of Anterior pituitary Secretion Temperature Regulation, fever.		Dr.SaswatiParua(Mondal)	
7.	**Neural Basis of Instinctual Behavior& Emotions** Anatomic Considerations, Limbic Functions, Sexual Behavior Fear & Rage Motivation.		Mr. MonojMaiti	

8.	**" Higher Functions of the Nervous System": Conditioned Reflexes , Learning, & Related Phenomena** Methods Learning & Memory Functions of the Neocortex Disorders relating learning and memory.		Mr. DebabrataParia	
	C7P: Neurological Experimental Experiments on superficial (plantar) and deep (knee jerk) reflex. Measurement of grip strength. Reaction time by stick drop test Short term memory test (shape, picture word). Two point discrimination test.		Miss. FuldonaPandit & Mr. DebabrataParia	
UNITS	**PAPER: SEC-1** **Clinical Biochemistry**	Th-40, Pr.-20, IA-05, CA-05		
	SEC1T: Clinical Biochemistry Photo -colorimetric estimation of blood constituents. Measurement of blood glucose by NelsonSomogyi method, measurement of blood inorganic phosphate by Fiske - Subbarow method, measurement of serum total protein by Biuret method and determination albumin globulin ratio, determination of serum amylase by iodometric method.		Dr.SaswatiParua(Mondal) & Mr. DebabrataParia	

UNITS	**PAPER: GE-3** **Community and Public Health**	Th-40, Pr.-20, IA-10, CA-05		
	GE3T: Community and Public Health Basic idea about community health and public health issues, Malnutririon in a community, overnutrition, issues of obesity; possible remedial measures. Composition and nutritional value of common Indian foodstuffs. Basic idea on PCM, marasmus, kwashiorkor and their prevention. Iron and iodine deficiency.		Mr. MonojMaiti	
	Sound pollution as a community health issue; definition, concept of noise, source of extraordinary sound, effects of sound pollution on human health, noise index.		Mr. DebabrataParia	
	GE-3P: Community and Public Health Qualitative assessment of noise, survey on the status of dietary intake in the surrounding area through visits, etc.		Mr. MonojMaiti & Mr. DebabrataParia	

Teaching Plan: Department of Physiology: SEMESTER-IV(HONOURS)

UNITS	**PAPER: CC8** **Energy Balance, Metabolism and Nutrition**	Th-40, Pr.-20, IA-10, CA-05		15.03.2022 to 25.06.2022	**4th week of April,2022 &3rd week of June,2022**
	C8T: Energy Balance, Metabolism and Nutrition Energy metabolism, Carbohydrate metabolism, Biological oxidation, Protein metabolism,		Dr.SaswatiParua(Mondal)		
	Fat and cholesterol metabolism, Integration of carbohydrate, fat and protein metabolism, Reactive Oxygen Species,		Mr. MonojMaiti		
	Nutrition – Basic concepts of nutrients, nutraceutical, cosmoceutical, neutrigenomics.		Miss. FuldonaPandit		
	Nutrition – BMR, RQ, RDA, SDA, NPU, Biological value of proteins, vitamins and minerals. Energy in Human nutrition.		Mrs. Munmun Pradhan		
	C8P: Biochemical Estimation		Dr.SaswatiParua(Mondal)		

	a. Quantitative estimation of glucose and sucrose by Benedict's method. b. Quantitative estimation of amino nitrogen [Sorensen's formol titration method (percentage as well as total quantity to be done)]. c. Estimation of percentage quantity of lactose in milk by Benedict's method.			
UNITS	**PAPER: CC9** **Gastrointestinal Function**	Th-40, Pr.-20, IA-10, CA-05		
1.	**C9T: Gastrointestinal Function** Digestion & Absorption- Carbohydrates, Proteins & Nucleic Acids, Lipids, Absorption of Water & Electrolytes Absorption of Vitamins & Minerals.		Mr. GourchandraSamanta	
2.	Regulation of Gastrointestinal Function- General Considerations Gastrointestinal hormones Mouth &Esophagus, Stomach, Exocrine Portion of the Pancreas, Liver & Biliary System, Small Intestine, Colon Mechanism,		Mr. BuddhadevDebnath	

	function and regulation of mastication, deglutition, movements of alimentary canal.			
	C9P: Gastrointestinal Function **Dale's Experimental** 1. Kymographic recording of normal movements of rat's intestine in Dale's apparatus. 2. Effects of hypoxia, acetylcholine and adrenaline on normal intestinal movements.		Mr. BuddhadevDebnath & Mr. DebabrataParia	
UNITS	**PAPER: CC10** **Respiratory Physiology**	Th-40, Pr.-20, IA-10, CA-05		
1.	**CC10T: Respiratory Physiology** **Pulmonary Function** Properties of gases. Anatomy of the lungs. Mechanics of breathing. Gas exchange in the lungs. Pulmonary circulation. Other functions of the Respiratory System.		Mr. DebabrataParia	
2.	**Gas transport between the Lungs & the tissues** Oxygen transport. Carbon Dioxide transport. Respiratory acidosis and alkalosis		Mr. MonojMaiti	

3.	**Regulation of Respiration**. Neural control of Breathing. Chemical Control of Breathing. Nonchemical influences on Respiration		Dr.SaswatiParua(Mondal)	
4.	**Respiratory adjustments in Health & Disease**. Effects of exercise. Other forms of Hypoxia. Oxygen treatment, O2 toxicity. Hypercapnia &Hypocapnia. Other respiratory abnormalities. Sleep and Respiration. Effects of increased Barometric Pressure. Artificial respiration. Respiratory failure. High altitude sickness. Lung Function Tests		Dr.SaswatiParua(Mondal) Miss. FuldonaPandit	
	C10P: Respiratory Physiology Measurement of peak expiratory flow rate, Measurement of oxygen saturation by pulse oxymeter before and after exercise, Measurement of forced expiratory volume (FEV) in first second.		Dr.Saswati Parua(Mondal)	
UNITS	**PAPER: SEC-2** **Physiological Techniques and Public Health Assessments**	Th-40, Pr.-20, IA-05, CA-05		
	SEC2T: Physiological Techniques and Public Health Assessments			
1.	**Physiological Techniques:**		Mr. DebabrataParia	

	Audiometry, Perimetry, Visual Acuity, Colour Blindness, EMG, EEG ,ECG, Nerve Conduction velocity, Autonomic Status assessment(Valsalva maneuver), Deep breathing test, Reaction time (Choice), Stereotactic techniques.			
2.	**Public Health assessment:** Nutritional status of children and adults: Growth curves for detection of stunting, under weight, wasting, thinness, overweight and obesity. Somatotype for adult. Socioeconomic status assessment.		Dr.SaswatiParua(Mondal)	
	SEC2P: Growth charts – plotting growth charts for growth monitoring. Calculation of BMI of an individual and interpretation of results. Prepare growth curves for stunting, under weight, wasting and obese person. Perimetry. Mapping of physiological blind spot and calculation of optic disc size. Determination of visual acuity by Snellen's chart. Determination of colour blindness by Ishihara Charts. Recording of auditory and visual reaction time. Somatotyping of Human subjects. Survey of dietary status of people in the nearby area by students, analysis of survey results and formulation of diet charts. Submit a		Dr.SaswatiParua(Mondal)	

	socioeconomic status assessment report. To study the phenomenon of fatigue by Mosso'sergograph.			
UNITS	**PAPER: GE-4** **Excretory System & Body Temperature Regulation**	Th-40, Pr.-20, IA-10, CA-05		
	GE4T: Excretory System & Body Temperature Regulation **Renal Function & Micturition:**Juxta Glomerular Apparatus, Function of Malpighian corpuscles and renal tubule, counter-current mechanism, Water Excretion, Acidification of the Urine & Bicarbonate Excretion, Regulation of Na+ & Cl- Excretion, Renal Circulation, Disorders of Renal Functions, Filling of the Bladder, Emptying of the Bladder, Non-excretory function of kidney. Diuretics.		Mr. MonojMaiti & Mrs. Munmun Pradhan	
	Skin and Body temperature regulation: Histological structure of skin. Colour of the skin. Organization of sweat gland. Composition and function of the sweat. Regulation of sweat secretion. Insensible and sensible perspiration.		Miss. FuldonaPandit	

	Composition and function of sebum. Triple response. Normal body temperature. Channels of heat loss and heat gain process. Regulation of body temperature: Higher centre and mechanism of regulation. Hypothermia and Hyperthermia. Physiological basis of fever. Cold sress. Insulating effects. Acclimatization to colds.		Mr. BuddhadevDebnath Mr. DebabrataParia		
	GE4P:Excretory System & Body temperature regulation. Identification of normal constituents of urine. Identification of abnormal constituents of urine. Tests for Urinary deposits. Estimation of albumin in urine. Detection of specific gravity of urine. Quantitative estimation of Urea in Urine. Recording of Body Temperature. To study the response of the skin to blunt injury (triple response).		Mr. MonojMaiti		

Teaching Plan: Department of Physiology: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC11** **Sensory Physiology**	Th-40, Pr.-20, IA-10, CA-05		14.09.2021 to 18.01.2022	**1st week of November, 2021 &4th week of December,2021**
	C11T: Sensory Physiology				
	General Sense: Classification, distribution, function and neural pathway of touch, pressure, pain, thermal and kinesthetic sensation.		Mrs. Munmun Pradhan		
	Vision: Anatomic considerations. The structures of lens. Errors of refraction and their corrections. Contact Lens. Pupillary reflexes, light reflex, near response. Argyll Robertson pupil. Histological details of retina. Colour visions and its modem concept. Visual field, Perimetry.		Mr. GourchandraSamanta		
	Hearing & Equilibrium: Sound waves, decibel, Anatomic considerations, structure and functional significance of auditory apparatus – external, middle and internal ears. Structure of Organ of Corti. Hair cells. Auditory pathway and centers. Mechanism of hearing and its modern theories. Deafness & tests of deafness. Audiometry.		Dr.SaswatiParua(Mondal) Mr. DebabrataParia		
	Smell & Taste: Smell- Receptors & Pathways - Structure and function of the receptor organs,		Miss. FuldonaPandit		

	nerve pathways, centers. Physiology of Olfaction. Olfactometer. Taste- Receptor Organs & Pathways- Structure and functions of the receptor organs, nerve pathways, centers. Physiology of Taste. Features of Taste sensation.			
	C11P:Histological and Human Experiments Principles of fixation and staining, staining and identification of fixed nervous tissue. Silver nitrate preparation of corneal cell space. Determination of visual acuity by Snellen's chart.Determination of colour blindness by Ishihara chart. To map the peripheral field of v ision with perimeter(Perimetry).		Dr.SaswatiParua(Mondal)	
	Mapping of physiological blind spot and calculation of optic disc size. Recording of auditory and visual reaction time. Exploration of conductive and perceptive deafness by tuning fork method.		Mr. DebabrataParia & Miss. FuldonaPandit	
UNITS	**PAPER: CC12** **Endocrinology**	Th-40, Pr.-20, IA-10, CA-05		
	C12T: Endocrinology General Consideration: Concept of endocrine systems, glands and hormones. Types of		Mr. MonojMaiti	

	endocrine glands. Experimental and clinical methods of study of endocrine glands. General classification of hormones on chemical basis. Concepts of hormone receptors and cell signalling. Mechanisms and Modern Concept of hormone actions. Hypothalamus as a neuroendocrine organ, Releasing Factors, Tropic hormones of hypothalamus. Vascular and neural connections between the hypothalamus and the pituitary, role of median eminence.			
	The Pituitary Gland: Introduction. Morphology. Histological structures, functions, and regulation of anterior, middle and posterior lobes of pituitary. Posterior pituitary hormones. Growth Hormone: Chemistry, modes of action and functions of growth hormone. TSH, ACTH, FSH, LH, Prolactin, MSH, Vasopressin and Oxytocin and their different diseases condition.		Mr. MonojMaiti	
	Thyroid Gland: Introduction. Anatomical considerations. Electron microscopic structure of thyroid gland. Thyroid hormone: Chemistry, Biosynthesis, Storage and Transport of thyroid hormones. Effects of thyroid hormones. Clinical feature of Cretinism. Myxedema, Grave's disease. Hashimoto's disease, iodine deficiency goiter.		Mr. MonojMaiti	
	Hormonal Control of Calcium Metabolism & the Physiology of Bone : Calcium & Phosphate		Mr. MonojMaiti	

	Metabolism, Bone Physiology, Vitamin D & the Hydroxycholecalciferols. Parathyroid Gland: Histological Structure, Parathyroid hormone: Role in calcium metabolism. Relation of parathyroid hormone with bone formation and bone resorption, fragile bone and aging process, Concept of Vitamin D3 treatment. Calcitonin:			
	Endocrine Functions of the Pancreas & the Regulation of Carbohydrate Metabolism: Pancreas: Histological structure of pancreatic islets Cell. Structure, Biosynthesis & secretion of Insulin. Sources, modes of action and functions of insulin. Insulin Excess. Regulation of Insulin Secretion. Glucagon. Other Islets Cell Hormones. Hypoglycemia& Diabetes Mellitus in Humans.		Mrs. Munmun Pradhan	
	The Adrenal Medulla & Adrenal Cortex: Adrenal Cortex: histological structure. Structure & Biosynthesis of Adrenocortical Hormones. Regulation different types of hormones and functions of adrenal cortex, Effects of Adrenal androgens &estrogens. Physiologic effects of glucocorticoids, Mineralocorticoids, aldosterone. Actions of adrenaline and nor-adrenaline on different organs and their effect.		Mrs. Munmun Pradhan	

	Endocrine Functions of the Kidneys, Heart, & Pineal Gland The Renin- Angiotensin System. Erythropoietin. The Endocrine Function of the Heart: Atrial Natriuretic Peptide. Pineal Gland - Histological structure. Chemical nature, biosynthesis, molecular mechanism of action, functions and regulation of secretion of melatonin.		Dr.SaswatiParua(Mondal)	
	C12P: Endocrinology Fixation, staining and identification of endocrine glands. Study of the effects of oxytocin on uterine contraction of albino rat. Study of the effects of adrenaline on uterine movements of albino rat. Estimation of estrogen by spectrophotometric method. Estimation of plasma level of any hormone using ELISA (Demonstration).		Dr.SaswatiParua(Mondal) & Mr. BuddhadevDebnath	
UNITS	**PAPER: DSE-1** **Biostatistics**	Th-40, Pr.-20, IA-10, CA-05		

	DSE1T: Biostatistics Scope of statistics– utility and misuse. Principles of statistical analysis of biological data. Basic concepts – variable. Population and sampling -- parameter, statistic. Presentation of data, frequency distribution, frequency polygon, histogram, bar diagram and pie diagram.		Mr. DebabrataParia	
	Different classes of statistics - mean, median, mode, mean deviation, variance, standard deviation, standard error of the mean, standard score. Degrees of freedom, probability. Normal distribution. Student's t- distribution. Testing of hypothesis - Null hypothesis, errors of inference, levels of significance, t- test and z score for significance of difference. Distribution-free test - Chi-square test. Linear correlation and linear regression.		Miss. FuldonaPandit	
	DSE1P: Biostatistics Computation of mean, median, mode, standard deviation and standard error of the mean with physiological data, Graphical representation of data in frequency polygon and histogram.		Mr. DebabrataParia	

	Student's t test for significance of difference between means. Demonstration: Statistical analysis and graphical representation of biological data with computer application program one way ANOVA .		Miss. FuldonaPandit	
UNITS	**PAPER: DSE-2** **Sports Physiology, Work Physiology and Ergonomics**	Th-40, Pr.-20, IA-10, CA-05		
	DSE -2T: Sports Physiology, Work Physiology and Ergonomics **Sports & work Physiology:** Concepts of physical work and physiological work. Physical work. Cardiovascular and respiratory changes during graded exercise. Aerobic and anaerobic capacity. Maximum aerobic power. Exercise Physiology. Exercise & Performance.		Dr.SaswatiParua(Mondal)	
	Maximal oxygen consumption and post exercise oxygen consumption. Tests for Physical work capacity – measurement with different instrument. Physical Training: General principles and different methods. Nutrition in sports. Sports injury and its management. Sports Biochemistry.		Mr. BuddhadevDebnath	

	Ergogenic aids. Ergogenic aids & Dietary supplement.				
	Ergonomics – Basic concepts and its application in industry to improve efficiency. Ergonomicsimportance of ergonomics in occupational health and well beings. Physical work environment. Occupational hazards- Physical, biochemical hazards. Occupational diseases – Silicosis, Asbestosis, Farmer's Lung. Industrial safety.		Mr. BuddhadevDebnath		
	Anthropometry : Anthropometry and its implication in general. Different body dimension measures in anthropometry and their significances. Sports Anthropometry.		Mr. BuddhadevDebnath		
	DSE2P: Measurements of resting and working heart rate using thirty beats and ten beats methods respectively. Measurement of blood pressure before and after different graded exercise. Determination of Physical Fitness Index (PFI) of an individual and recording of recovery heart rate after standard exercise. Determination of cardiac cost of specific work. Determination of VO2 max		Dr.SaswatiParua(Mondal) & Mr. BuddhadevDebnath		

	by Queens College step test. Determination of endurance time by hand gripdynamometer. Six minutes walk tests. Measurement of some common anthropometric parameters.				
Teaching Plan: Department of Physiology: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13** **Reproductive Physiology, Embryology and Chronobiology**	Th-40, Pr.-20, IA-10, CA-05		21.02.2022 to 10.06.2022	**1st week of April,2022 & 1st week of June,2022**
	C13T: Reproductive Physiology, Embryology and Chronobiology **Reproductive Physiology:** Sex Differentiation &Developmen, The Male Reproductive System, The Female Reproductive system, Pregnancy, Lactation and Mammary gland, Reproductive Health, Assisted Reproductive Technology (ART): sex selection, sperm banks, frozen embryos, in vitro fertilization.		Mr. GourchandraSamanta		
	Exfoliative cytology on gynaecological. Reproductive Genetics, Human Genetics and Human Reproductive Disorders: Reproductive Genetics, Human Genetics: Principle of molecular		Mr. MonojMaiti		

	genetics: Gene expression, Gene Structures. Medical genetics. Human reproductive disorders: Abnormalities of male and female sexual differentiation and development. Puberty.			
	Embryology: Cleavage: cleavage plane, types, role of yolk in cleavage; cleavage process in mammals. Embryogenesis, morula, blastula, gastrula and blastocyst. Formation of trilaminar germ disc. Gastrulation, organogenesis. Development of alimentary system, heart and urogenital system. Development of eye as an example of reciprocal and repeated inductive events. Foetal circulation and its changes after birth.		Mr. BuddhadevDebnath	
	Chronobiology: Historical developments in chronobiology; Biological oscillation: the concept of average, amplitude, phase and period. Biological Rhythm – Definition, terminology of biorhythm, significance. Types and characteristics of biological rhythms: Short- and Long- term rhythms; Circadian rhythms. Concept of synchronization and masking. Biorhythms of different hormone. Biological clock, physiological clock.		Dr.SaswatiParua(Mondal)	

	C13P: Reproductive Physiology, Embryology and Chronobiology Study of estrous cycle. Tissue fixation, embedding in paraffin, microtomy, slide preparation and identification of uterus, testis, ovary. Examination of histological sections of permanent slides of rat/human: testis, epididymis and accessory glands of male reproductive system; Sections of ovary, fallopian tube, uterus (proliferative and secretory stages), cervix and vagina.		Dr.SaswatiParua(Mondal)	
	Pregnancy test from human urine by kit method. Sperm count, sperm motility test in rat. Sperm viability test by using eosin - Y. Determination of diurnal and /or circalunar rhythm of body temperature of college going students. Study of circadian functions in humans. Project work on assessment of individual differences in human circadian rhythms (chronotype in human population) by questionnaire method among school children and college students.		Mr. DebabrataParia	

UNITS	**PAPER: CC14** **Renal Physiology, Skin and Body Temperature Regulation, Biomedical Instrumentation**	Th-40, Pr.-20, IA-10, CA-05		
	C14T: Renal Physiology, Skin and Body Temperature Regulation, Biomedical Instrumentation **Renal Physiology**. Gross structure of kidney. Microanatomy (including electron microscopy) of a nephron and structural differences between cortical and juxtamedullary nephrons. Juxtaglomerular apparatus. Function of Malpighian corpuscle and renal tubule. Renal circulation peculiarities and autoregulation. Mechanism of urine formation. Constituents of urine.		Mrs. Munmun Pradhan	
	Skin and Body Temperature Regulation. Histological structure of skin. Colour of the skin. Organization of sweat gland. Composition and functions of sweat. Regulation of sweat secretion. Regulation of body temperature in homeotherms. roles of neural and hormonal processes, higher centers and mechanism of regulation.		Dr.SaswatiParua(Mondal)	
	Biomedical Instrumentation and Techniques:		Mr. DebabrataParia	

	Biomedical basis of Diseases: Basic concepts, pathogenesis to symptoms and diagnosis of infectious diseases, inherited/genetic diseases; immunological diseases, cancer. Basics of Biomedical Instrumentation: Development of biomedical instrumentation, components of man-instrument system. Principles of microscopy. Medical diagnostic techniques related equipment. Electrophoresis, Karyotyping, Centrifugation, Chromatography. Biomedical instruments – Biomedical instruments and cardiovascular monitoring systems: Basic concepts, instrumentation of Cardiac monitor, ECG, Blood flow meters, Oximeter, equipments for blood pressure, cardiac output and heart sounds. Methods of monitoring fatal heart rate. Cardiac pacemakers, Mammography, X-ray, Optics, Fiber Optics, Diathermy equipment, Audiometer, Application of computer in Biomedical field, Biotelemetry, Physiological modelling.			

	C14P: Renal Physiology, Skin and Body Temperature Regulation, Biomedical Instrumentation Tissue fixation, embedding in paraffin, microtomy, slide preparation and identification of kidney and ureter. Identification for normal constituents of urine. Identification for abnormal or pathological constituents of urine. Tests for urinary deposits. Detection of specific gravity of urine. Estimation of albumin in urine. Estimation of urea in urine. Estimation of total phosphates in urine. Routine clinical tests of urine. Recording of body temperature. Study the skin to blunt injury (triple response). Measurement of heart sound using electronic stethoscope.		Dr.SaswatiParua(Mondal)	
	SDS – PAGE electrophoresis for protein (Demonstration), Physiological data acquisition by ECG, EEG (Demonstration). Study of X ray/CT machine (through demonstration). Study of mammograms and CT scan images (Demonstration). Estimation of sodium and potassium in blood serum or urine sample by using auto analyzer (Demonstration). Determination pulmonary function using spirometer (using mechanical system) (Demonstration).		Mr. DebabrataParia	

UNITS	**PAPER: DSE-3** **Microbiology and Biotechnology**	Th-40, Pr.-20, IA-10, CA-05		
	DSE3T: Microbiology and Biotechnology **Microbiology:** Viruses: structure, types. Lytic and lysogenic cycle. DNA & RNA Viruses. Viroids and Prions. Bacteriophages – structure & morphological classification. Bacteria: structure, classification. Staining, Basic idea about medical bacteriology, virology and mycology.Food microbiology, Industrial Microbiology: Elementary knowledge for production of fermented products. Environmental Microbiology.		Mr. DebabrataParia	
	Biotechnology: History and importance. DNA and RNA. Recombinant DNA technology. DNA manipulation. Cloning. DNA sequencing. Hybridoma techniques, blot techniques, DNA technology and gene therapy. Fermentation technology. Genomics and Proteomics. Bio-safety and ethical issues in biotechnology.		Miss. FuldonaPandit	
	DSE3P: Microbiology and Biotechnology Study of disinfection and sterilization techniques. Culture procedure and isolation of bacteria. Biochemical characterization of microorganisms,		Mr. DebabrataParia & Miss. FuldonaPandit	

	different Biochemical tests. Negative staining. Gram staining techniques of bacteria. Acid-fast staining of bacteria. Bacterial spore staining. Isolation of DNA from blood and microbial culture. Separation of DNA by agarose gel electrophoresis. Extraction of DNA from agarose gel. Quantification of DNA. Prepare SDS-PAGE for protein. Gel electrophoresis of protein. Quantification of protein. Perform immunodiffusion by Ouchterlonymethods (Demonstration). Analysis of DNA sequences (Demonstration). Application of PCR (Demonstration). Prepare ELISA (Demonstration). Perform Immunoprecipitation (Demonstration).			
UNITS	**PAPER: DSE-4** **Patho-physiological Basis of Diseases**	Th-40, Pr.-20, IA-10, CA-05		
1.	**DSE4T: Patho-physiological Basis of Diseases** History of pathology, Basic definitions and common terms used in pathology, Survival mechanism and disease, microscopic and cellular pathology, scope and techniques used.		Mr. Monoj Maiti	
	Cell Injury and responses of cells: Cellular Adaptations and Cell Death - An overview of		Mr. Monoj Maiti	

2.	cellular adaptation: Hyperplasia, Hypertrophy, Atrophy, Metaplasia; Causes and mechanisms of cell injury, reversible and irreversible injury, Necrosis, Apoptosis, Types of apoptosis, Intracellular accumulations, Cellular ageing.			
3.	Role of inflammation in disease (with suitable examples) - Basic concepts with suitable examples of general features of acute and chronic inflammation: vascular changes, cellular events, important chemical mediators of inflammation, Morphological effects inflammation response, granulomatus inflammation.		Mrs. Munmun Pradhan	
4.	Role of tissue repair healing and fibrosis (with suitable examples) - Basic mechanism of tissue regeneration, and repair by healing, scar formation and fibrosis.		Mrs. Munmun Pradhan	
5.	Common Hemodynamic Disorders in diseases (with suitable examples) - An overview of edema, hyperemia, congestion, hemorrhage, hemostasis and thrombosis, Embolism, Infarction and shock with suitable examples.		Dr.SaswatiParua(Mondal)	
6.	Nutritional diseases - Protein energy malnutrition, deficiency diseases of vitamins,		Dr.SaswatiParua(Mondal)	

	minerals, nutritional excess and imbalances. Roles and effects of metals.				
7.	Cancer - Definitions, Nomenclature, characteristics of benign and malignant neoplasms, grading and staging of cancer, biology of tumor growth, invasion and metastasis, carcinogens and cancer, concept of oncogenes, tumor suppressor genes, DNA repair genes and cancer stem cells.		Mr. BuddhadevDebnath		
8.	Infectious diseases epidemiology- Modes of infections with suitable examples. Overview of cause, extent, prevention, treatment and control of the diseases: Respiratory infections, Intestinal infections, Arthropod-borne infections, Zoonosis and Surface infections.		Mr. BuddhadevDebnath		
	DSE4P: Patho-physiological Basis of Diseases Urine analysis: Gross examination of urine for colour, odour, etc. Abnormal constituents like protein, ketone bodies, glucose, blood, and urea. Measuring Erythrocyte Sedimentation Rate (ESR). Tissue Processing, embedding and sectioning. Staining and preparation of permanent histological slide. Study of histological slides showing hypertrophy, hyperplasia, dysplasia, leukemia, cirrhosis and any common cancer. Diagnostic tests for detection of various diseases		Dr.SaswatiParua(Mondal) & Mr. MonojMaiti		

	– CRP, VDRL, RA, Pregnancy, Dengue (any three), PCR based diagnostics . Physiological data acquisition like temperature, EEG, ECG.				
Teaching Plan: Department of Physiology: SEMESTER-I(GENERAL)					
UNITS	**PAPER: DSC-1A/2A/3A** **Cellular Physiology, Biophysical Principles, Biochemistry, Digestive system & Metabolism**	**Th-40, Pr.-20, IA-10, CA-05**		01.10.2021 to 24.02.2022	Internal examination
	C1T : Cellular Physiology, Biophysical Principles, Biochemistry, Digestive system & Metabolism **Cellular Physiology and Biophysical Principles:** Membrane physiology: structure and functions of cell. Physicocemical principles and Physiological importance of: Diffusion, Osmosis, Dialysis, Ultrafiltration, Surface tension, Adsorption, Absorption, pH and buffers, Colloids.		Mr. Monoj Maiti		1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
	Enzymes - classification, coenzymes, factors affecting enzyme action, regulation of enzymes-feedback, covalent and allosteric. Isozymes and non-protein enzymes		Mr. Debabrata Paria		

	Biochemistry and Metabolism: classification , structure and properties of Carbohydrates, Lipids, Proteins, Nucleic acid – structure of DNA and RNA. Vitamins, Metabolism – Glycolysis, TCA cycle,		Miss. FuldonaPandit		
	Glycogenesis, Glycogenolysis. Gluconeogenesis, Beta oxidation of saturated fatty acid, Ketone bodies – formation and significance. Deamination, Transamination. Amino acid pool, Urea cycle, vitamins in metabolism.		Mrs. Munmun Pradhan		
	Digestive System Alimentary cana1 and digestive glands – Structure in relation to functions. Composition, functions and regulation of secretion of digestive juices including bile. Digestion and absorption of carbohydrate, protein and lipid. Movements of the stomach and small intestine.		Mr. MonojMaiti & Mr. Buddhadev Debnath		
	C1P : Fresh tissue experiments & Identification of permanent slides **Fresh tissue experiments**: Examination & staining of fresh tissue: squamous, ciliated & columnar epithelium, skeletal muscle fibre (Rat/ Goat) by Methylene blue stain. Transitional epithelium, mesentery (Rat/ Goat) (counter stain by		Mr. Buddhadev Debnath		

	Methylene blue). Staining of adipose tissue by Sudan III or IV. **Identification of permanent slides:** Bone, cartilage, lung, trachea, spleen, lymph gland, liver, salivary glands, pancreas, esophagus, stomach, small intestine, large intestine, ovary, adrenal, testis, thyroid, spinal cord, cerebellum, cerebral cortex, kidney, skin, tongue.				
Teaching Plan: Department of Physiology: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B/3B** **Blood, body fluid and immune System, Cardiovascular System and Respiratory System**	**Th-40, Pr.-20, IA-10, CA-05**		01.04.2022 to 09.07.2022	
1.	**DSC-1B: Blood, body fluid and immune System, Cardiovascular System and Respiratory System** **Blood:** Properties of blood, Composition, character, properties and function of blood. Plasma proteins: origin, separation and functions. Plasmapheresis. Bone marrow. Formed elements of blood. Erythrocytes :Morphology, fate and functions. Fragility of RBC. Erythropoiesis: Definition, steps of erythropoesis, role of different factors on erythropoesis. Haemoglobin. Anaemia: different types, Clinical significances. Bleeding		Mrs. Munmun Pradhan		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022

	disorders. Blood groups. Determination of blood volume. Blood transfusion. Body fluids: Intracellular and extra cellular compartment of body fluids. Lymph and tissue fluids.				
2.	**Immune system:** Overview, properties of immune system, types of immunity : innate immunity, acquired immunity, active and passive immunity. First and second line defence. Humoral and Cell mediated immunity. Complement system. Antigen and Antibody : Properties of immunogen, antigens and haptens. Histocompatibility Complex.. Brief idea of auto immunity. Vaccination.		Miss. Fuldona Pandit		
3.	**Cardiovascular system:** Anatomy and histology of the heart. Properties of cardiac muscle. Origin and propagation of cardiac impulse. Heart sounds. Cardiac cycle. Structure of arteries, arterioles, capillaries. Venules and veins.Blood pressure and its regulation and factors controlling.Peculiarities of regional circulations.		Mr. Monoj Maiti		
	Respiratory System: Anatomy and histology of the respiratory passage and organs.Lung surfactant. Exchange of respiratory gases. Transport of oxygen and carbon dioxide in blood. Regulation of		Mr. Debabrata Paria		

	respiration. Role of respiratory centre and different diseases.			
	DSC1BP: **Haematology:** Study of the compound microscope. Preparation of blood film of your own blood. Staining of the blood film with Leishman's stain. Identification of different types of blood corpuscles.		Mr. Monoj Maiti	
	Determination of TC of RBC and WBC by haemocytometer. 4. Differential count of WBC. Determination of ESR of human blood. Estimation of haemoglobin by haemoglobinometer.		Mr. BuddhadevDebnath	
	Preparation of haemin crystals. Determination of Blood groups. 9. Determination of clotting time, bleeding time, prothrombin time. Determination of osmotic fragility of Red Blood Corpuscle. Preparation and staining of bone marrow. Measurement of diameter of megakaryocyte. Reticulocyte staining. **Human Experiment:** Measurement of arterial blood pressure by Sphygmomanometer at rest		Mr. Debabrata Paria	

	and after exercise, Calculate the mean arterial blood pressure (MABP), Measurement of heart rate and pulse rate (30 beats methods) during rest and exercise and graphical plotting. Modified Harvard step test and determination of physical fitness.Pneumographic recording of respiratory movements along with the effect of drinking of water, talking, laughing, coughing, exercise, hyperventilation and breathe holding. **Demonstration:** Measurement of oxygen saturation by pulse oxymeter before and after exercise. Measurement of Peak Expiratory Flow Rate. Measurement of forced expiratory volume (FEV) in first second.		Miss. Fuldona Pandit		
			Mrs. Munmun Pradhan		
Teaching Plan: Department of Physiology: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C** **DSC1CT: Nerve –Muscle Physiology, Nervous system, Skin and Body Temperature Regulation**	**Th-40, Pr.-20, IA-10, CA-05**		01.10.2021 to 05.02.2022	**4th week of November,2021 &1st Week of January,2022**
1.	**DSC1CT: Nerve –Muscle Physiology, Nervous system, Skin and Body Temperature Regulation** **Nerve-muscle Physiology:** Different types of muscle and their structures. Sarcotubular system. Red and white muscles. Properties of muscle.		Mr. Monoj Maiti		

	Smooth Muscle, Cardiac Muscle, skeletal muscle. Mechanism of muscular contraction. Structural, chemical and mechanical changes in skeletal muscle during contraction and relaxation.Structure and classification of nerves. Nerve cells. Excitation & Conduction. Measurment of electrical events.Synapse: structure , functional anatomy, classification, mechanism of synaptic transmission. Electrical Events at Synapses, Inhibition & Facilitation at Synapses. Motor unit, motor point. EPSP,IPSP.Neuromuscular junction: structure, mechanism of impulse transmission.			
2.	**Nervous System:** A brief outline of organization and basic functions of the nervous system - central and peripheral nervous system.		Mr. Gourchandra Samanta	
	Structural organization of the different parts of the brain and spinal cord.Ascending and Descending tracts. Arousal Mechanisms, Sleep, & the Electrical Activity of the Brain. ECG.		Mr. Buddhadev Debnath	
	Control of Posture & Movement. The Autonomic Nervous System. Central Regulation of Visceral Function. Neural Basis of instinctual Behavior& Emotions. CSF.		Miss. Fuldona Pandit & Mrs. Munmun Pradhan	

3.	**Skin and Body temperature regulation:** Histological structure of skin, Regulation of sweat secretion. Insensible and sensible perspiration. Composition and function of sebum.Higher centre and mechanism of regulation.Physiological basis of fever.		Mr. Debabrata Paria	
	DSC1CP: Isolation and Staining of nerve fibers with node(s) of Ranvier ($AgNO_3$). Staining of skeletal and cardiac muscles by Methylene Blue stain. Measurement of grip strength. Recording of body temperature. To study the response of the skin to blunt injury (triple response) (Demonstration). Experiments on superficial (plantar) and deep (knee jerk) reflex. Reaction time by stick drop test. Short term memory test (shape, picture word). Two point discrimination test. Study of Kymograph, Induction coil, Key and other instruments used to study mechanical responses of skeletal muscle. Kymographic recording of mechanical responses of gastrocnemius muscle to a single stimulus and two successive stimuli. Kymographic recording of the effects of variations of temperature and load (afterload) on single muscle twitch. Calculation		Mr. Debabrata Paria	

	of work done by the muscle. Determination of nerve conduction velocity.			
UNITS	**PAPER: SEC-1** **Environmental Epidemiology**	**Th-40, IA-05, CA-05**		
1.	**SEC1T: Environmental Epidemiology** Man - environment relation, terms, Historical Background- brief history of social reforms. Branches – Descriptive, research, bio- statistical, economic, Methodological and Administrative.		Mr. Buddhadev Debnath	
2.	Principles- an epidemic and ingredients - and types of studies – Descriptive, analytical- cohort, case- control and cross sectional an biological studies		Mr. Debabrata Paria	
3.	Causes – Koch postulates. Immunological proof-cancers and slow viruses- Hills criteriaemergence of new diseases-and effect modifications. Diseases of plants and animals - extinct and endangered animals. Mortality rate- Mean and standard error–risk ratio, attributable ratio - simple problems.		Mr. Buddhadev Debnath	
4.	Types of sampling - simple random sampling; stratified sampling; systematic sampling; multi stage sampling; cluster sampling. Methods in		Miss. Fuldona Pandit	

	Field study – questionnaire preparation; Data analysis; Report writing.				
5.	Environmental hazards and Public health management: Sources of Environmental hazards, hazard identification. Pollution: Air, water, noise pollution sources and effects. Waste management and hazards: Types and characteristics of wastes, biomedical waste handling and disposal, nuclear waste handling and disposal, Waste from thermal power plants.Diseases: Social and economic factors of disease including role of health services and other organizations: Infectious (Bacterial-Tuberculosis, Typhoid; Viral - AIDS, Poliomyelitis, Hepatitis; Protozoan- Leishmaniasis, Malaria); Lifestyle and Inherited/genetic diseases, Immunological diseases; Cancer.		Mr. Buddhadev Debnath		
Teaching Plan: Department of Physiology: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3D** **Sensory Physiology, Endocrine and Reproductive System, Renal Physiology**	**Th-40, Pr.-20, IA-10, CA-05**		15.03.2022 to 25.06.2022	**4th week of April,2022 &3rd week of June,2022**
1.	**DSC1DT: Sensory Physiology, Endocrine and Reproductive System, Renal Physiology**		Mr. Debabrata Paria & Mr. Gourchandra Samanta		

	Sensory Physiology: Classification of general and special senses and their receptors. Olfaction and Gustation, Audition & Equilibrium, Vision.			
2.	**Endocrinology:** Anatomy of endocrine system. Hormones - classification.Hypothalamo - Hypophysial axis, Pituitary gland, Thyroid gland, Parathyroid gland, Adrenal Cortex, Adrenal Medulla, Pancreas. Brief idea of the origin and functions of renin- angiotensin, prostaglandins. Erythropoietin and melatonin. Gastrointestinal hormones.		Miss. Fuldona Pandit & Mrs. Munmun Pradhan	
3.	**Reproductive Physiology:**Primary and secondary sex organs: Anatomy and Physiology. Brief idea about Testis and ovary. Oestrus and menstrual cycles and their hormonal control. Fertilization, implantation and structure and functions of placenta. Placental hormone. Pregnancy.		Mr. Monoj Maiti	
4.	**Renal Physiology:** Structure and functions of kidney. Juxtaglomerular apparatous.Mechanism of formation of urine. Counter current system. Physiology of urine storage and micturation.Non excretory function of kidney. Disorders of Renal Functions. Renal stone formation. Renal function tests. Dialysis and Artificial kidney.		Mr. Buddhadev Debnath	

	DSC1DP: Staining and identification of kidney and ureters. Silver nitrate preparation of corneal cell space. Study of estrous cycle. Identification of normal and abnormal constituents of urine. Tests for Urinary deposits.		Mr. Monoj Maiti & Mr. Buddhadev Debnath	
	Estimation of albumin in urine. Detection of specific gravity of urine. Determination of visual acuity by Snellen's chart. Determination of colour blindness by Ishihara chart. Exploration of conductive and perceptive deafness by tuning fork method.		Mr. Debabrata Paria Miss. Fuldona Pandit	
	Sperm count and sperm motility in rat. Study of the effects of oxytocin on uterine contraction. Study of the effects of adrenaline on intestinal / uterine movements.		Mrs. Munmun Pradhan	
	Estimation of estrogen by Spectrophotometric method. Pregnancy test from human urine by kit method. Quantitative estimation of Urea in Urine.		Mr. Gourchandra Samanta	

UNITS	**PAPER: SEC-2** **SEC2: Medical Diagnostics**	**Th-40, IA-05, CA-05**			
1.	**SEC2T: Medical Diagnostics:** **Biomedical basis of Diseases:** Infectious diseases, nherited/genetic diseases (Diabetes, Hypertension); Immunological diseases, Cancer.		Mr. Debabrata Paria		
2.	**Analytical Technology**: Brief and relevant description of the following Wet techniques: UV Chromatography MethodsLC, HPLC and GC-MS Nuclear Magnetic Resonance Spectroscopy (NMR) Atomic Force and Scanning Electron Microscopy (AFM and SEM) Electrochemistry Molecular Modeling and Chemical Databases		Mr. Buddhadev Debnath		
3.	**Diagnostic Methods**: Outline methods used in hospital histopathology, biochemistry, hematology and microbiology laboratories. Theoretical knowledge - ECG, Echo, X-ray, CT, MRI, PET, Ultrasonography.		Miss. Fuldona Pandit		
Teaching Plan: Department of Physiology: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A** **Sports Physiology, Work Physiology and Ergonomics**	**Th-40, Pr.-20, IA-10, CA-05**		14.09.2021 to 18.01.2022	**1st week of November, 2021 &4th**

	DSE1AT: Sports Physiology, Work Physiology and Ergonomics **Sports & work Physiology**: Concepts of physical work and physiological work. Physical work. Cardiovascular and respiratory changes during graded exercise. Aerobic and anaerobic capacity. Maximum aerobic power. Exercise Physiology. Exercise & Performance. Maximal oxygen consumption and post exercise oxygen consumption.		Mr. Buddhadev Debnath		**week of December,2021**
	Tests for Physical work capacity – measurement with different instrument. Physical Training: General principles and different methods. Nutrition in sports. Sports injury and its management. Sports Biochemistry. Ergogenic aids. Ergogenic aids & Dietary supplement. **Ergonomics** – Basic concepts and its application in industry to improve efficiency. Ergonomicsimportance of ergonomics in occupational health and well beings. Physicalwork environment. Occupational hazards- Physical, biochemical hazards. Occupational diseases – Silicosis, Asbestosis, Farmer's Lung. Industrial safety.		Miss. Fuldona Pandit		

	Anthropometry : Anthropometry and its implication in general. Different body dimension measures in anthropometry and their			
	significances. Sports Anthropometry.			
	DSE1AP: Sports Physiology, Work Physiology and Ergonomics: Measurements of resting and working heart rate using thirty beats and ten beats methods respectively. Measurement of blood pressure before and after different graded exercise. Determination of Physical Fitness Index (PFI) of an individual and recording of recovery heart rate after standard exercise. Determination of cardiac cost of specific work.		Mr. Buddhadev Debnath	

	Determination of VO2 max by Queens College step test. Determination of endurance time by hand gripdynamometer. Six minutes walk tests. Measurement of some common anthropometric parameters.Determination of body surface area (using a nomogram) and Body Mass Index (BMI) for an anthropometric measurement. Measurement of body fat percentage.		Mr. Debabrata Paria	
UNITS	**PAPER: SEC-3** **Maternal and Child Nutrition**	**Th-40, IA-05, CA-05**		
1.	**SEC3T: Maternal and Child Nutrition** Nutritional needs during pregnancy, common disorders of pregnancy, relationship between maternal diet and birth outcome. Maternal health and nutritional status, maternal mortality and issues relating to maternal health.		Mr. Monoj Maiti	
2.	Infant and young child feeding and care - Current feeding practices and nutritional concerns, guidelines for infant and young child feeding. Child health and morbidity, neonatal, infant and		Mr. Debabrata Paria	

	child mortality, IMR, U5MR and MMR; link between mortality and malnutrition.				
3.	Overview of maternal and child nutrition policies and programmes.		Mr. Buddhadev Debnath		
Teaching Plan: Department of Physiology: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B/3B** **Clinical Hematology**	**Th-40, Pr.-20, IA-10, CA-05**		21.02.2022 to 10.06.2022	**1st week of April,2022 & 1st week of June,2022**
	DSE1BT: Clinical Hematology Anemia and its classification, management of anemia. Reticulocytes. Aplastic anemia-laboratory diagnosis. Bone marrow examination. Aspiration techniques.Hemoglobin-abnormal hemoglobin.Sickle cell anemia , Thalassemia.		Mr. Debabrata Paria		
	Blast cell. Causes and significances of leucocytosis,leucopenia,neutrophilia,eosinophilia ,basophilia,monocytosis, lymphocytosis, neutropenia, lymphopenia, HIV. Leukemia and its classification. Hemostasis and Coagulation. Bleeding and coagulation disorders. Blood groups: Immunological basis of identification of ABO and RH blood groups.Definition determination and significance of TC, DC ,ESR, Arnth count, PCV,		Miss. Fuldona Pandit & Mr. Monoj Maiti		

	MCV, MHC, MCHC. bleeding time, clotting time, prothrombin time.			
	DSE1BP: Clinical Hematology . General blood picture. Differential Leucocute Count. Absolute leucocyte count, Determination of haemoglobin by various methods. Determination of total RBC count and WBC count. Determination of PCV, Determination of red cell indices, Determination of ESR.		Mr. Debabrata Paria & Miss. Fuldona Pandit	
	Determination of reticulocyte count. Staining of bone marrow. Determination of blood groups.Determination of toxic granulation of neutrophil. Determination of total platelet. Demonstration of thrombin time, Demonstrate malarial slide.		Mr. Monoj Maiti & Mrs. Munmun Pradhan	
UNITS	**PAPER: SEC-4** **Health Psychology, Physiology of stress and Stress Management.**	**Th-40, IA-05, CA-05**		
	SEC4T: Health Psychology, Physiology of stress and Stress Management. **Health Psychology:** Introduction: Definition, Mind-body relationship, Bio-psychosocial model		Miss. Fuldona Pandit	

1.	of Health, Life styles and disease patterns. Behaviour and Health: Characteristics of health behaviour; Barriers to health behaviour; Theories of health behaviour and their implications. Health Enhancing Behaviour: Exercise, nutrition, accident prevention, pain and stress management.			
2.	**Physiology of Stress:** Stress, Nature of stress, symptoms of stress. Physical and Emotional Stressors. General Adaptation Syndrome. Role of Hypothalamic - Pituitary- Adrenal Axis and Sympatho-adrenal Medullary Axis in coping stress. Effects of chronic stress: Immunological, Cardiovascular, Emotional problem.		Miss. Fuldona Pandit	
3.	**Stress Management** Various sources of stress: environmental, social, physiological and psychological. Stress and health: effects of stress on health, eustress, distress. Managing stress: Methods - yoga, meditation.		Mr. Buddhadev Debnath	

Political Science

Teaching Plan: Department of Political Science: SEMESTER-I(HONOURS)

UNITS	PAPER: CC1 (Understanding Political Theory)	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal Examination
I	**Introducing Political Theory:**	CA- 15 ESE- 60 TOTAL- 75	Dr. Sujit Ghosh	01.10.2021 TO 24.02.2022	1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
	1. What is Politics: Theorizing the 'Political' 2. Traditions of Political Theory: Liberal, Marxist, Anarchist and Conservative				
	3. Approaches to Political Theory: Normative, Historical and Empirical 4. Critical and Contemporary Perspectives in Political Theory: Feminist and Postmodern		Subhra Debnath		
II	**Political Theory and Practice:**				
	1. Democracy: The history of an idea 2. Procedural Democracy and its critique				
	3. Deliberative Democracy 4. Participation and Representation		Dr. Sujit Ghosh		
		FULL MARKS	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	

UNITS	PAPER: CC2 (Constitutional Govt. and Democracy in India)				
I	**The Constituent Assembly and the Constitution**	**CA- 15** **ESE- 60** **TOTAL- 75**	Sunam Thapa	**01.10.2021 TO 24.02.2022**	
	a. Philosophy of the Constitution, the Preamble, and Features of the Constitution b. Fundamental Rights and Directive Principles				
II	**Organs of Government**		Nilmony Sasmal		
	a. The Legislature: Parliament b. The Executive: President and Prime Minister				

	c. The Judiciary: Supreme Court				
III	**Federalism and Decentralization**				
	a. Federalism: Division of Powers, Emergency Provisions, Fifth and Sixth Schedules b. Panchayati Raj and Municipalities		Sunam Thapa		
UNITS	**PAPER: GE-1 (Nationalism in India)**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
I	**Approaches to the Study of Nationalism in India:**	**CA- 15** **ESE- 60**	Sonam Maiti	**01.10.2021 TO 24.02.2022**	
	Nationalist, Imperialist, Marxist, and Subaltern Interpretations				
II	**Reformism and Anti-Reformism in the Nineteenth Century:**				
	Major Social and Religious Movements in 19th century				
III	**Nationalist Politics and Expansion of its Social Base:**				

	a. Phases of Nationalist Movement: Liberal Constitutionalists, Swadeshi and the Radicals; Beginning of Constitutionalism in India b. Gandhi and Mass Mobilisation: Non-Cooperation Movement, Civil Disobedience Movement, and Quit India Movement c. Socialist Alternatives: Congress Socialists, Communists	**TOTAL- 75**	Nilmony Sasmal		
IV	**Social Movements:**		Sonam Maiti		
	a. The Women's Question: Participation in the National Movement and its Impact b. The Caste Question: Anti-Brahminical Politics				
	c. Peasant, Tribals and Workers Movements				
V	**Partition and Independence:**		Nilmony Sasmal		
	a. Communalism in Indian Politics b. The Two-Nation Theory, Negotiations over Partition				

Teaching Plan: Department of Political Science: SEMESTER-II(HONOURS)					
UNITS	**PAPER: CC3 -Political Theory-Concepts and Debates**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**REMARKS**
I	**Importance of Freedom:**	**CA- 15** **ESE- 60** **TOTAL- 75**	Subhra Debnath	**01.04.2022 TO 09.07.2022**	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
	a. Negative Freedom: Liberty b. Positive Freedom: Freedom as Emancipation and Development				
II	**Significance of Equality:**				
	a. Formal Equality: Equality of opportunity b. Political equality c. Egalitarianism: Background inequalities and differential treatment				
III	**Indispensability of Justice:**				

	a. Procedural Justice b. Distributive Justice c. Global Justice		Dr. Sujit Ghosh		
IV	**The Universality of Rights:**				
	a. Natural Rights b. Moral and Legal Rights c. Three Generations of Rights d. Rights and Obligations				
UNITS	**PAPER: CC4- Political Process in India**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	**REMARKS**
I	**Political Parties and the Party System:**		Nilmony Sasmal		1st internal examination on 2nd week of May, 2022 and 2nd internal examination on
	Trends in the Party System; From the Congress System to Multi-Party Coalitions				
II	**Determinants of Voting Behaviour:**		Sunam Thapa		

	Caste, Class, Gender and Religion				2nd week of July,2022
III	**Regional Aspirations:**	**CA- 15**	Nilmony Sasmal		
	The Politics of Secession and Accommodation	**ESE- 60**			
IV	**Religion and Politics:** Debates on Secularism; Minority and Majority Communalism	**TOTAL- 75**	Sunam Thapa	**01.04.2022 TO 09.07.2022**	
V	**Caste and Politics:**		Nilmony Sasmal		
	Caste in Politics and the Politicization of Caste				
VI	**Affirmative Action Policies:**		Sunam Thapa		
	Women, Caste and Class				
VII	**The Changing Nature of the Indian State:**		Nilmony Sasmal		
	Developmental, Welfare and Coercive Dimensions				

UNITS	PAPER: GE-2 - Governance: Issues and Challenges	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Intenal examination
I	**Government and Governance: Concepts**				
	Role of State in the Era of Globalisation State, Market and Civil Society		Subhra Debnath		
II	**Governance and Development:**				
	Changing Dimensions of Development Strengthening Democracy through Good Governance		Nilmony Sasmal		
III	**Environmental Governance:**	**CA- 15** **ESE- 60** **TOTAL- 75**		**01.04.2022 TO 09.07.2022**	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
	Human-Environment Interaction Green Governance: Sustainable Human Development		Sunam Thapa		
IV	**Local Governance:**				
	Democratic decentralisation People's Participation in Governance				
V	**Good Governance Initiatives in India: Best Practices:**				

	▪ Public Service Guarantee Acts ▪ Electronic Governance ▪ Citizens Charter & Right to Information ▪ Corporate Social Responsibility		Dr. Sujit Ghosh		

Teaching Plan: Department of Political Science: SEMESTER-III(HONOURS)

UNITS	PAPER: CC5 - Introduction to Comparative Government and Politics	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal examination
I	**Understanding Comparative Politics:**	CA- 15 ESE- 60 TOTAL- 75	Sunam Thapa		4th week of November,2021 &1st Week of January,2022
	a. Nature and scope b. Going beyond Eurocentrism				
II	**Historical context of modern government:**				
	a. Capitalism: meaning and development: globalization b. Socialism: meaning, growth and development				REMARKS REMARKS

	c. Colonialism and decolonization: meaning, context, forms of colonialism; anti- colonialism struggles and process of decolonization.		Nilmony Sasmal	**01.10.2021 TO 05.02.2022**	**REMARKS**
III	**Themes for comparative analysis:**				**REMARKS**
	A comparative study of constitutional developments and political economy in the following countries: a. Britain. b. Nigeria.		Sunam Thapa		
	c. Brazil. d. China.		Nilmony Sasmal		
UNITS	**PAPER: CC6- Perspectives on Public Administration**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
I	**Public administration as a discipline:**				

I	✓ Meaning, Dimensions and Significance of the Discipline ✓ Public and Private Administration ✓ Evolution of Public Administration				
II	**Theoretical perspectives:**				
	Classical theories: ✓ Scientific management (F.W.Taylor) ✓ Administrative Management (Gullick, Urwick and Fayol) ✓ Ideal-type bureaucracy (Max Weber)	**CA- 15** **ESE- 60** **TOTAL- 75**	Dr. Sujit Ghosh	**01.10.2021 TO 05.02.2022**	
	Neo-classical theories: ✓ Human relations theory (Elton Mayo) ✓ Rational decision-making (Herbert Simon)				
	Contemporary theories ✓ Ecological approach (Fred Riggs) ✓ Innovation and Entrepreneurship (Peter Drucker)				
III	**Public policy:**				
	✓ Concept, relevance and approaches ✓ Formulation, implementation and evaluation				
IV	**Major approaches in public administration:**				

	✓ New Public Administration ✓ New Public Management ✓ New Public Service Approach ✓ Good Governance ✓ Feminist Perspectives				
UNITS	**PAPER: CC7- Perspectives on International Relations and World History**	**FULL MARKS**	**NAME OF THE TEACHER**	**MONTH OF TEACHING**	
A	**Studying International Relations:**				
	i. How do you understand International Relations: Levels of Analysis ii. History and IR: Emergence of the International State System iii. Pre-Westphalia and Westphalia iv. Post-Westphalia				
B	**Theoretical Perspectives:**				
	i. Classical Realism & Neo-Realism ii. Liberalism & Neoliberalism iii. Marxist Approaches iv. Feminist Perspectives v. Eurocentricism and Perspectives from the Global South	**CA- 15** **ESE- 60** **TOTAL- 75**			
C	**An Overview of Twentieth Century IR History:**				

	i. World War I: Causes and Consequences ii. Significance of the Bolshevik Revolution iii. Rise of Fascism / Nazism iv. World War II: Causes and Consequences v. Cold War: Different Phases vi. Emergence of the Third World vii. Collapse of the USSR and the End of the Cold War viii. Sanskrit

Teaching Plan: Department of Sanskrit: SEMESTER-I(M.A)

UNITS	PAPER: SAN 101 : Vedic Hymns	FULL MARKS	NAME OF THE TEACHER	MONTH OF TEACHING	Internal Examination
I	Ṛgveda -1.1-2, Visvāmitranadī-Saṃvāda 111.33, Puruṣasūkta 10.90, Nāsadīya -10.129.	50	Satyanarayan Sau Debasri Giri	25.10.2021 to 20.01.2022	3rd week of December,2021
II	Yajurveda - śivasaṃkalpa -1.6		Sushil Jana		
III	Atharvaveda - pṛthvīsūkta – 12.1.1-10, Kālasūkta - 19.53		Sudipta Kumar Karan		
UNITS	PAPER: **SAN 102 : Brāhmanas &Upanisadas**	50			
I	Śatapatha – Pancamahāyajňa		Sushil Jana		
II	Aitareya- śunahśepa Ākhyāna		Sourav Goswami		
III	Kathopaniṣada - Chapter –I (Valli –I& II) : Kenopaniṣada - Chapter –I & II		Satyanarayan Sau Sushil Jana Debasri Giri		
UNITS	**PAPER: SAN 103 : Grammar –I**	50			
I	Siddhāntakoumudī (Samjňā)		Sourav Goswami		

II	Siddhāntakoumudī (Paribhāṣā)		Dipankar Mishra		
UNITS	**PAPER: SAN 104 : Drama & Dramaturgy**	**50**			
I	Uttararāmacarita		Dipankar Mishra		
II	Nāṭyaśastra - Chapter –I & II		Supti Bhattacharya		
UNITS	PAPER: **SAN 105 : Linguistics & Manuscriptology**	**50**			
I	Theoretical basis of historical linguistics, Historical development of OIA		Satyanarayan Sau		
II	Elementary knowledge of Manuscriptology Manuscript, Manuscriptology, Archetype, Colophon, Critical Apparatus, Recession, Catalogus Catalogorum, New Catalogus Catalogorum, Descriptive Catalogue, Gilgit Manuscript, Bower Manuscript, Causes of Variant readings.		Ritabrata Sau		
Teaching Plan: Department of Sanskrit: SEMESTER-II(M.A)					
UNITS	**PAPER: SAN 201 : Vedic Studies**	**50**		07.02.2022 to 11.07.2022	**2nd week of June,2022**
I	Ṛgvedabhāṣyabhūmikā by Sāyaṇa		Sourav Goswami		

II	Nirukta - Chapter –I & II		Satyanarayan Sau		
UNITS	**PAPER: SAN 202 : Grammar-II**	**50**			
I	Siddhāntakoumudī -Ac Sandhi with prakṛtibhāva		Debasri Giri		
II	Siddhāntakoumudī- Ajantapunlinga		Sudipta Kumar Karan		
UNITS	**PAPER: SAN 203 : Poetry-I**	**50**			
I	Naiṣadacarita – Canto –I		Rathin Biswas		
II	Meghadūta 25		Supti Bhattacharya		
UNITS	**PAPER: SAN 204: History of Sanskrit literature. & General Grammar (CBCS)**	**50**			
I	History of Sanskrit literature. , · Vedic history · Classical history · Scientific & Technical history				
II	General Grammar · Construction of Sentence · Application				
UNITS	**PAPER: SAN 205: Philosophy – I**	**50**			

I	Vedāntasāra		Sourav Goswami		
II	Mahābhāṣya (Paspaśāhnika)		Satyanarayan Sau		
Teaching Plan: Department of Sanskrit: SEMESTER-III(M.A)					
UNITS	**PAPER: SAN-301 : Grammar -III**	**50**		15.09.2021 to 20.01.2022	**3rd week of December,2021**
I	Siddhāntakoumudī - Tiṃanta (Bhū & Edh)		Sourav Goswami		
II	Siddhāntakoumudī – Stripratyaya		Sudipta Kumar Karan		
UNITS	**PAPER: SAN 302 : Poetics – I**	50			
I	kāvyaprakāśa – Chapter-I & II Chapter- IX &X		Sushil Jana. Amal Samanta		
UNITS	**PAPER: SAN 303 : Poetics – II**	50			
I	Daśarūpaka –I & III		Amal Samanta		
II	Dhvanyaloka –I		Rathin Biswas		
UNITS	**PAPER: C-SAN 304: Drama & Modern Sanskrit short stories. (CBCS)**	50			
I	Abhijñānaśakuntala 1-4				
II	Aparājitā by Vīṇāpaṇipāṭanī				

UNITS	**PAPER: SAN 305 : Philosophy-II**	50			
I	Tarkabhāṣa		Satyanarayan Sau		
II	Bhāṣāpariccheda (Vyāpti)		Sourav Goswami		
Teaching Plan: Department of Sanskrit: SEMESTER-IV (LITERATURE) (M.A)					
UNITS	**PAPER: SAN-401A : Poetics-III**	**50**		07.02.2022 to 11.07.2022	**2nd week of June,2022**
I	Kāvyaprakāśa (IV & V)		Dipankar Mishra		
II	Rasagangādhara (1st Ānana upto Rasanirupana)		Rathin Biswas		
UNITS	**PAPER: SAN 402A : Poetics-IV**	50			
I	Vakroktijivitam -Chapter -I		Dipankar Mishra		
II	Kāvyamīmāṃsā –Chapter-4-6		Rathin Biswas		
UNITS	**PAPER: SAN 403A : Poetry-II**	50			
I	Harṣacarita –V		Sudipta Kumar Karan		
II	Buddhacarita- III		Supti Bhattacharya		

UNITS	**PAPER: SAN 404A : Drama**	50			
I	Mudrārākṣasa		Supti Bhattacharya		
II	Mṛcchakatika		Amal Samanta		
UNITS	**PAPER: SAN 405A : Modern Sanskrit literature**	50			
I	Amaramaṃgala by Paňcananatarkaratna		Amal Samanta		
II	Rukminiharana by Haridāsasiddhantavāgīśa		Sudipta Kumar Karan		
Teaching Plan: Department of Sanskrit: SEMESTER-IV (PHILOSOPHY) (M.A)					
UNITS	**PAPER: SAN 401B : Sarvadarśanasaṃgraha**	**50**		07.02.2022 to 11.07.2022	**2nd week of June,2022**
I	Cārvāka		**Sushil Jana**		
II	Bouddha		**Rathin Biswas**		
III	Arhat 15		Ritabrata Sau		
UNITS	**PAPER: SAN 402B : Sāṃkhya-yogadarśana**	50			
I	Sāṃkhyakārikā with Sāṃkhyatattvakoumudī		Debasri Giri		
II	Yogasūtra with vyāsabhāṣya (Samādhipāda)		Ritabrata Sau		

UNITS	**PAPER: SAN 403B : Nyāyavaiśeṣikadarśana**	50			
I	Nyāyasūtra with Vātsyanabhāṣya (upto Apavargasūtra 1.1.22)		Satyanarayan Sau		
II	Praśastapādabhāṣya (Dravya section and Nyāyakandalī on uddeśaprakaraṇa only)		Sourav Goswami		
UNITS	**PAPER: SAN 404B : Purvottarmīmāṃsādarśana**	50			
I	Arthasaṃgraha		Sourav Goswami		
II	Brahmasūtra with śāṃkarbhāṣya –Catussūtrī (1.1.4)		Debasri Giri		
UNITS	**PAPER: SAN 405B : Vyākaraṇadarśana**	50			
I	Vākyapadīya (Brahmakāṇḍa)		Dipankar Mishra		
II	Paramalaghumaňjūsa (Kāraka)		Satyanarayan Sau		
Teaching Plan: Department of Sanskrit: SEMESTER-I (HONOURS)					
UNITS	**PAPER: CC-1 : Classical Sanskrit Literature (Poetry)**	**75**		01.10.2021 to 24.02.2022	
	Section 'A' Raghuvaṁśam: Canto-I (Verse: 1-25)				1st internal examination on 4th

I	Raghuvaṁśam: Introduction (Author and Text), Appropriateness of title, Canto I, 1-10 Grammatical analysis, Meaning/translation, Explanation, content analysis, Characteristics of Raghu Clan.		**Debasri Giri**		week of December, 2022 and 2nd internal examination on 2nd week of March,2022
II	Raghuvaṁśam: Canto I (Verses 11-25) grammatical analysis, Meaning/translation, Explanation, Role of Dilīpa in the welfare of subjects		**Sudipta Kumar Karan**		
	Section 'B' Kumārasambhavam: Canto-V (Verse: 1-30)				
I	Kumārasambhavam: Introduction (Author and Text), Appropriateness of title, Background of given contents. Text Reading Canto I Verses 1-15, (Grammatical analysis, Translation, and Explanation), Poetic excellence and Plot.		**Rathin Biswas**		
II	Kumārasambhavam : Text Reading Canto I Verses 16-30 (Grammatical analysis, Translation, Explanation), Penance of Pārvati, Poetic excellence, Plot.		**Rathin Biswas**		
	Section 'C' Kirātārjunīyam - Canto I (1-25 Verses)				

I	Kirātārjunīyam: Introduction (Author and Text), Appropriateness of title, Background of given contents, Canto I Verses 1-16, Grammatical analysis, Translation, Explanation, Poetic excellence, thematic analysis		**Sushil Jana**		
II	Kirātārjunīyam: Verses 17-25, Grammatical analysis, Translation, Explanation, Poetic excellence, thematic analysis.		**Sushil Jana**		
	Section 'D' Nītiśatakam (1-20 Verses, 1st two Paddhatis)-M. R. Kale Edition.				
I	Nītiśatakam: Verses (1-10) Grammatical analysis Translation, explanation.		**Amal Samanta**		
II	Nītiśatakam: Verses (11-20) Grammatical analysis Translation, explanation, thematic analysis bhartṛhari's comments on society.		**Amal Samanta**		
	Section 'E' Origin and Development of Mahākāvya and Gītikāvya				
I	Origin and development of different types of Māhākavya with special reference to Aśvaghoṣa, Kālidāsa, Bhāravi, Māgha,Bhatti, Śṛiharṣa		**Sourav Goswami**		
II	Origin & Development of Sanskrit gītikāvayas with special reference to Kālidāsa, Bilhaṇa, Jayadeva, Amarūk, Bhartṛhari and their works.		**Sourav Goswami**		

UNITS	PAPER: CC-2 : Classical Sanskrit Literature (Prose)	75			
	Section 'A' Śukanāsopadeśa (Ed. Prahlad Kumar)				
I	Introduction- Author/Text, Text up to page 116 of Prahlad Kumar Up to the end of the Text		Ritabrata Sau		
II	Society, Āyurveda and political thoughts depicted in Śukanāsopadeśa, logical meaning and application of sayings like , □□□□ □□□□ □□□□, □□□ etc.		Ritabrata Sau		
	Section 'B' Viśrutacaritam Upto 15th Para				
I	Para 1 to 10 - Introduction- Author, Text, Text reading (Grammar, Translation, and Explanation), Poetic excellence, plot, Timing of Action		**Supti Bhattacharya**		
II	Para 11 to 15 - Text reading (Grammar, Translation, and Explanation), Poetic excellence, plot, Timing of Action. Society, language and style of Daṇḍin. Exposition of Saying , □ □□□ ।		**Supti Bhattacharya**		
	Section 'C' Origin and development of prose, Important prose romances and fables				
I	Origin and development of prose, important prose romances and fables		**Sudipta Kumar Karan**		

II	(i) Subandhu, Daṇḍin, Bāṇa, Ambikādatta Vyāsa. (ii) Paṅcatantra, Hitopadeśa, Vetālapaṅcaviṁśatikā, Siṁhāsanadvātriṁśikā,		**Sudipta Kumar Karan**		
UNITS	**PAPER: GE-1 : Basic Sanskrit**	75			
	Section 'A' Grammar and composition Part I				
I	Nominative forms of pronouns- asmad, yuṣmad, etat and tat in masculine, feminine and neuter. Nominative forms of 'a' ending masculine and neuter gender nouns with paṭh, khād, likh and similar simple verbs in present, past and future. 	Section D: Cardinal Theories and Thinkers of Indian Polity				

I	Cardinal Theories of Indian Polity: 'Saptāṅga' Theory of State: 1.Svāmi, 2. Amātya, 3. Janapada 4. Pura, 5. Kośa, 6. Daṇḍa and 7. Mitra (Arthaśāstra, 6.1. Mahābhārata, Śāntiparva, 56.5, Śukranīti, 1.61- 62). 'Maṇḍala 'Theory of Inter-State Relations: 1.Ari, 2. Mitra, 3. Ari-mitra,4.Mitra- mitra, 5.Ari-mitramitra; 'Śāḍgunya' Policy of War and Peace : 1. Sandhi, 2. Vigraha, 3. Yāna, 4. Āsana, 5. Saṁśraya 6. Dvaidhibhāva. 'CaturvidhaUpāya'for Balancing the power of State : 1.Sāma 2.Dāma,3.Daṇḍa.4.Bheda; Three Types of State Power 'Śakti': 1.Prabhu- śakti, 2. Mantra-śakti, 3. Utsāha-śakti.		Rathin Biswas. Sourav Goswami.		
II	Important Thinkers on Indian Polity: Manu, Kautilya, Kāmandaka, Śukrācārya, SomadevaSuri, Mahatma Gandhi.		Sudipta Kumar Karan. Debasri Giri		
UNITS	**PAPER: SEC-1: Acting and Script Writing**	50			
	Section A: Acting (Abhinaya				

I	a. Persons competent for presentation (acting) : kuśala (skilful), vidagdha (learned), pragalbha (bold in speech), jitaśramī (inured to hard-work) . b. Lokadharmī and Nātyadharmī Abhinaya c. Nāṭya-prayoktā-gaṇa (members of theatrical group) : sūtradhāra (director), nāṭyakāra (playwrighter), naṭa (actor) kuśīlava(musician), bharata, nartaka (dancer), vidūṣaka (jester) etc.		Supti Bhattacharya. Ritabrata Sau		
II	(i.) Assignment of role: a. General principles of distribution b. Role of minor characters c. Role of women characters d. Special cases of assigning of role (ii.) Kinds of roles: anurūpa (natural), virūpa (unnatural), rūpānusariṇī (imitative)		Supti Bhattacharya Ritabrata Sau		
III	Definition of abhinaya and its types: a. Āṅgika (gestures): aṅga, upāṅga and pratyaṅga b. Vācika(oral): svara, sthāna, varṇa, kāku, bhāṣā . c. Sāttvika (representation of the Involuntary gestures) d. Āhārya: pusta, alaṅkāra, aṇgaracanā, sañjiva (dresses and make-up)		Rathin Biswas Dipankar Mishra		
	Section B: Script Writing (Paṭakathālekhana)				
I	Types of dramatic production: sukumāra (delicate), āviddha (energetic). Nature of plot (vastu): Ādhikārika (principal), Prāsaṅgika (subsidiary), Dṛsya (presentable), Sūchya (restricted scenes).		Sushil Jana		

II	Division of Plot a. Source of plot: Prakhyāta (legendary), Utpādya (invented), Miśra (mixed); b. Objectives of plot- Kārya (dharma, artha, kāma); c. Elements of plot- Five kinds of Arthaprakṛtis (caustations), Kāryāvasthā (stages of the action of actor); Sandhis (junctures) and their sub-divisions (segments) d. Five kinds of Arthopakṣepaka (interludes);		Sushil Jana		
III	Dialogue writing: kinds of saṁvāda (dialogue) a. Sarvaśrāvya or Prakāśa (aloud) b. Aśrāvya or Svagata (aside) c. Niyataśrāvya : Janāntika (personal address), Apavārita (confidential) d. Ākāśabhāṣita (conversation with imaginary person).		Sudipta Kumar Karan		
IV	a. Duration of play b. Three Unities: Time, Actions and place. c. Starting of a play: Pūrvaraṅga – Raṅgadvāra, Nāndī, Prastāvanā, Prarocanā. d. Analysis of acting, plot and dialogue in the context of Abhijñānaśākuntalam.		Amal Samanta		
UNITS	**PAPER: GE-3: Fundamentals of Indian Philosophy**	75			
	Section A: General Introduction				
I	Darśana - concept and aims, Classification of Indian Philosophical schools,		Sushil Jana		

	Salient features of Indian Philosophy		Sourav Goswami		
	Section B: Schools of Indian Philosophy				
I	Heterodox Schools • Cārvāka – General introduction with emphasis on Chanllenge to Veda, Rejection of Transcendental Entities, Ethics (Based on Sarvadarshansamgrah) • Jainism – General introduction with emphasis on Anekāntavāda, Syādvāda, Saptabhaṅginaya, triratna • Buddhism- General Introduction with emphasis on Four Noble Truths		Debasri Giri		
II	Orthodox Schools of Philosophy • Sāṁkhya – General Introduction with emphasis on prakṛti, guṇatraya & puruṣa Entities (Based on Sāṃkhyakārikā) • Yoga - Eight fold path of Yoga (Based on Yogasūtra Sādhanapāda and their on Yogabhāṣya thereon)		Satyanarayan Sau		
III	Nyāya –General introduction with emphasis on Vaiśesika : Seven Padārthas (Based on Tarksamgrah)		Satyanarayan Sau		
IV	Advaita Vedānta – General introduction with emphasis a Brahman, Māyā, Jīva and Jagat (Based on Vedāntasāra)		Satyanarayan Sau		
V	Mīmāṃsā - Svataḥ Prāmāṇyavāda		Sourav Goswami		

VI	Bhakti Schools of Vedānta – General introduction with emphasis on God, Īśvara & nature of bhakti		Ritabrata Sau		
	Section C: Problems in Indian Philosophy				
I	Epistemology: six pramāṇas		Ritabrata Sau		
II	Metaphysics: realism, idealism, Causation - Satkāryavāda. Asatkāryavāda, Pariṇāmavāda, Vivartavāda, svabhāvavāda, consciousness and matter, theories of self		Sourav Goswami		
III	Ethics: Karma & Punarjanma theory, Liberation		Sourav Goswami		
Teaching Plan: Department of Sanskrit: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC-8: Indian Epigraphy, Paleography ,pd Chronology**	**75**		15.03.2022 to 25.06.2022	**4th week of April,2022 &3rd week of June,2022**
	Section 'A' :Epigraphy				
I	Introduction to Epigraphy and Types of Inscriptions		**Ritabrata Sau**		

II	Importance of Indian Inscriptions in the reconstruction of Ancient Indian History and Culture		**Supti Bhattacharya**		
III	History of Epigraphical Studies in India		**Sourav Goswami**		
IV	History of Decipherment of Ancient Indian Scripts (Contribution of Scholars in the field of epigraphy): Fleet, Cunninghum, Princep, Buhler, Ojha, D.C.Sircar.		**Satyanarayan Sau**		
	Section 'B':Paleography,				
I	Antiquity of the Art of Writing		**Amal Samanta**		
II	Writing Materials, Inscribers and Library		**Amal Samanta**		
III	Introduction to Ancient Indian Scripts.		**Amal Samanta**		
	Section 'C': Study of selected inscriptions,				
I	Asoka's Giranara Rock Edict-I Asoka's Saranatha Pillar Edict		**Sudipta Kumar Karan**		
II	Gimara Inscription ofRudradaman		**Sudipta Kumar Karan**		
III	Eran Pillar Inscription of Samudragupta Mehrauli Iron Pillar Inscription of Candra		**Dipankar Mishra**		

IV	Delhi Topra Edict ofBTsaladeva		**Dipankar Mishra**		
	Section 'D': Chronology				
I	General Introduction to Ancient Indian Chronology		**Satyanarayan Sau**		
II	System of Dating the Inscriptions (Chronograms)		**Satyanarayan Sau**		
III	Main Eras used in Inscriptions - Vikrama Era, Saka Era and Gupta Era		**Amal Samanta**		
UNITS	**PAPER: CC-9: Modern Sanskrit Literature**	75			
	Section'A': Mahakavya and Charitakavya,				
I	SvatantryaSam bhavam (RevaprasadaDwi vedi) Canto 2, verses 1-45 Bhimayanam (Prabha Shankar Joshi) Canto X. verses 20-29; Canto - XI. Verses 13-20 & 40-46.		Amal Samanta		
	Section 'B':GadyaKavya and Rupaka,				
I	Sataparvika (Abhiraja Rajendra Mishra)		Sudipta Kumar Karan		
II	SardulaSakatam (Virendra Kumar Bhattacharya)		Sudipta Kumar Karan		
	Section 'C':GitiKavya and Other genres,				

I	Bhatta Mathuma Nath Shastri (Kundaliyan, BacchuLal Avasthi Jnaana (Kaete, Kva Yataste), SrinivasaRath (Katama Kavita) etc		Dipankar Mishra		
II	Hariram Acharya (Sankalpa Gitih) Dikshit (Bruhi kosminYuge ..) Pushpa Radha Vallabh Tripathi (Naukamihasaramsaram ...); DhivaraGitih		Dipankar Mishra		
III	Harshdev Madhava Haiku- Snanagrihe, vedana, mrityuh I, mrtyuh 2; khanih; shatavadhani R. Ganesh (kavi-vi~adah, var~avibhutih		Dipankar Mishra		
	Section 'D': General Survey of Modern Sanskrit Literature				
I	Pandita Kshama Rao, P.K. Narayana Pillai, S. B. Varnekar, ParmanandShastri, Reva Prasad Dwivedi		Sudipta Kumar Karan		
	Janaki VallabhShastri, Ram Karan Sharma, Jagannath Pathak, S. Sunderrajan, Shankar Dev Avatare		Sudipta Kumar Karan		
II	Haridas SiddhantaVagish, Mula Shankar M. Yajnika, Mahalinga Shastri, Leela Rao Dayal, Y atindra Vimal Chowdhury, Virendra Kumar Bhattacharya		Debasri Giri		
UNITS	**PAPER: CC-10: Sanskrit and World Literature**	75			

	Section 'A':Survey of Sanskrit Literature in the World,				
I	Vedic cultural elements in ancient Eastern and Western societies.		Sudipta Kumar Karan		
II	Presence of Sanskrit words in the World languages.		Dipankar Mishra		
III	General survey of the Classical Sanskrit Literature in the Eastern and Western literature.		Sushil Jana		
	Section 'B': Upani~ads and Gita in World Literature,				
I	Dara Shikoh's Persian Translation of Upanisads and their Influence on Sufism, Latin translation and its influence on Western thought		Ritabrata Sau		
II	Translation of the Gita in European languages and religio-philosopliical thought of the west.		Ritabrata Sau		
	Section'C': Sanskrit Fables in World Literature,				
I	Translation of Pancatantra in Eastern and Western Languages. Translation of Vetalapancavirhsatika, Sirhhasanadva.rrirpsika and Sukasaptati in Eastern		Sudipta Kumar Karan		
II	Languages and Art.		Amal Samanta		

	Section'D': Ramayarya and Mahabharata in South East Asian Countries,				
I	Rama Katha in south eastern countries		Ritabrata Sau		
II	Mahabharata stories as depicted in folk cultures of SE Asia		Supti Bhattacharya		
	Section'E':Kalidasa's Literature in World Literature		Sudipta Kumar Karan		
I	English and Gennan translation of Kalidasa 's writings and their influence on western literature and theatre.		Ritabrata Sau		
	Section'F': Sanskrit Studies across the World				
I	i. Sanskrit Study Centers in Asia ii. Sanskrit Study Centers in Europe iii. Sanskrit Study Centers in America		Rathin Biswas		
UNITS	**PAPER: SEC-2: Sanskrit Meter and Music**	50			
	Section 'A': Brief Introduction to Chhanda}.lsastra				
I	Brief Introduction to Chhandal)sastra		Ritabrata Sau		
	Section 'B': Classification and Elements of Sanskrit Meter,				

II	Syllabic verse (ak~aravrtta): Syllabo-quantitative verse (van:iavrtta) Quantitative verse (matravrtta) Syllables: laghu and guru		Ritabrata Sau		
III	Ga1;1a Feet		Ritabrata Sau		
	Section 'C': Analysis of Selected Vedic Meters and their musical rendering,				
I	Definition, Example, Analysis and Lyrical Methods of following Meters: gayatrf, uniika, anu~fupa, brhatf, pwnkti, .tri~Jup andjagatf		Sudipta Kumar Karan		
	Section 'D': Analysis of Selected Classical Meters and their musical rendering				
I	Definition, Example, Analysis and Lyrical Methods of following Meters: bhujaligaprayata, sragvb;zf, vidyunmala, anunupa, arya, vasantatilaka, mandakranta, fardulvikrftjita Suggested Books/Readings: tofaka, harigftika, malinf, sikharil;f, sragdhara and,		Sushil Jana		
UNITS	**PAPER: GE-4: Basic Principles of Indian Medicine System (Ayurveda)**	75			
	Section 'A' Introduction to Indian Medicine System: Ayurveda				

I	Definition of Ayurveda, Ayuh (Life), Sarira (Body), Health, Aim of Ayurveda, Subject Matter Credits 06 of Ayurveda, Salient Features of Ayurveda, Concept of Health according to Ayurveda, Unique features of .Ayurveda.		Sudipta Kumar Karan		
II	History of Ayurveda, Atharvaveda as an early source for medicinal speculations, Introduction to Major Texts (Susrut Samhita and Caraka Samhita) and Authors (Susruta and Caraka) and A~tanga Hrdayam, A~tanga Sali.graha of Vagbhata.		Sudipta Kumar Karan		
III	Eight Components of .Ayurveda (a~tangaAyurveda): 1. Kaycikitsa (General Medicine) 2. Kaumarabhftya(Pediatrics) 3. SalyaTantra (Surgery) 4. Salakya-Tantra (Ent. and Ophthalmology) 5. Bhuta Vidya (Psychiatry Medicine). 6. Vi~a Vijfiana (Toxicology). 7. Rasayana (Rejuvenates). 8. VajikaraI).a (Aphrodisiac).		Sudipta Kumar Karan		
	Section 'B' Basic Principles of Ayurveda Dietetics,				

I	1. The Trigu1.1as: Sattva,Rajas and Tamas. 2. The Paficamahabhiitas:Akasa (Space), Vayu (Air),Teja or Agni(Fire),Jala(Water) ~nd PrthvI (Earth). 3. The Trido~as: Vata,Pitta and Kapha. 4. The Saptadhatus: Rasa (fluid), Rakta(blood), Marhsa, Meda (fat),Asthi, Majja and Sukra. 5. The Trayodosagni: Jatharagni (gastric fire), Saptadhatvagni and Paficabhiitagni. 6. The Trimalas:PurI~a (faeces),Miitra (urine) and Sveda (sweat).		Supti Bhattacharya		
II	Ayurvedic understanding of lifestyle and concepts of preventive medicine. Seasonal regimen & social conduct and its effect on health, Concepts of Prakfti, Agni, and Kosta. SvasthaVrtta (Preventive Medicine) Understanding Health and Disease in Ayurveda		Supti Bhattacharya		
III	Diagnosis of illness: eight ways to diagnose illness, called Nac;II (pulse), Miitra (urine), Mala (stool), Jihva (tongue), Sabda (speech), Sparsa (touch), Drk (vision), and A.kfti (appearance).		Supti Bhattacharya		
	Section 'C' Nutrition and Treatments in Ayurveda .				
I	Ayurvedic understanding of nutrition and metabolism, Classification of A.hara according to Ayurveda and Viruddhahara (incompatible diet) & role of diet		Sushil Jana		

II	Commonly used substances and their therapeutic properties and Pharmacology: Intro to basic principles of Ayurvedic pharmacology, Art and science of Ayurvedic Pharmacy and Understanding Ayurvedic Herbs and common formulations		Sushil Jana		
III	Paficakarma and Other Ayurvedic Specialty Treatments: Method and classification of treatments in Ayurveda, Pretreatment, Therapeutic vomiting (Yamana), Purgation Therapy, Enema (Basti), Nasal Administration - Nasya, Blood Letting (RaktaMok~a), Introduction and importance of Paficakarma/Detoxification, Science and art of rejuvenation (Rasayana and VajikaraQa). Ayurvedic prenatal and postpartum care for healthy mothers and babies, Sarhskara, care of infants and children.		Sourav Goswami		
	Section 'D' Important Medicinal Plants and their based on Ayuyveda.				
I	19 Medicinal Plants in Susruta Sarhhita: Tuls1, Haridra, Sarpagandha, Gh:rta Kuman, Guggulu, Brahm1, Amala, Aswagandha, Arjun Tree, Turmeric, Ceylon Hydrolea, Neema Plant, Lady Fems, Blackberries, Pot Marigold, Camomile, Peppermint, Fenugreek and Aloe Vera.		Sudipta Kumar Karan		

Teaching Plan: Department of Sanskrit: SEMESTER-V(HONOURS)

UNITS	**PAPER: CC-11: Vedic Literature**	**75**		14.09.2021 to 18.01.2022	**1st week of November, 2021 &4th week of December,2021**
	Section'A' Sanhita and Brahmana,				
I	*Rgveda-* Agni- 1.1, Usas- 3.61, Aksa Siikia 10.34, Hiranyagarbha- 10.121		**Satyanarayan Sau**		
II	*Yajurveda- k* ivasamkalpa Sñkta- 34.1-6		**Sushil Jana**		
III	*Athorvaveda-* Sammanasyam- 3.30, Bhiimi- 12.1-12		**Sudipta Kumar Karan**		
	Section'B' Vedic Grammar,				
I	Declensions *{s'abdarupo),* Subjunctive Mood *(let),* Gerunds *{ktvârthaka, Tumarthaka),* Vedic Accent and Padapatha		**Sourav Goswami**		
	Section'C' Mundakopanisad.				
I	Mundakopanisad – 1.1 to 2.1		**Sushil Jana**		
II	Mundakopanisad – 2.2 to 3.2		**Sushil Jana**		
UNITS	**PAPER: CC-12: Sanskrit Grammar**	75			
	Section'A' Laghusiddhanta Kaumudi- Samjna Prkarana,				

I	*Sanjn‹i Prakarana*		Dipankar Mishra		
	Section'B' Laghusiddhanta Kaumudi- Sandhi Prkarana,				
I	ac sandhi: *yen, giiyn, di°rgha, ayâdi, vrddhi* and yiirvor‹i/›o.		Rathin Biswas		
II	halsandhi. .it-on n, *ititva, aiitinusikatvn,* cli/iofvn and jastava		Rathin Biswas		
III	visarga sandhi: *uwn, lapa, saiva* and *rutva*		Rathin Biswas		
	Section'C' Laghusiddhanta Kaumudi- Vibhakti Prkarana				
I	Vibhaktyartha Prakarana		Sushil Jana		
UNITS	**PAPER: DSE-1B: Art of Balanced Living**	75			
	Section'A' Self Presentation,				

I	Method of Self-presentation : Hearing *(:sravana),* Reflection *(manana)* &meditation *(niâidhyâsano)* (Brhadñranyakopanisad, 2.4.5)		Ritabrata Sau		
	Section'B' Concentration,				
I	Concept of Yoga : *(Yogasutra,* 1.2) Restriction of fluctuations by practice *(obhyâsa)* and passionlessness *(vairâgya) :(Yogasñlra,* 1.12- 16) Eight aids to Yoga *(a:stâñgayogo)* . (Xognstifra, 2.29, 30,32, 46, 49, 50; 3.1-4). Yoga of action *(kriyâyoga) : yogasñtra,* 2.1) Four distinct means of mental purity *{cittaprasâdana j* leading to oneness : *(Yogas5tra,* 1.33)		Debasri Giri		
	Section'C' Refinement of behaviour				

I	Methods of Improving Behavior : jñâna-yoga,'dhyâna-yoga, karma-yoga and bhakti-yoga (especially karma-yoga) Karma : A natural impulse, essentials for like , journey, co-ordination of the world, an ideal duty and a metaphysical dictate (Ciik, 3.5, 8, 10-16, 20 &21)		Sourav Goswami		
UNITS	**PAPER: DSE-2A: Theatre and Dramaturgy in Sanskrit**	50			
	Section'A' Theatre: Types and Constructions				
I	Types of theatre: *vikrsla* (oblong), *catwasra* (square), *tryazra* (tnangular), *jyestha* (big), *madhyamo* (medium), *avara* (small). *bh5mi- s'odhana* (Examining the land) and *mâpa* (measurement of the site), *matlavârayi* (raising of pillars), *raiigap!tpa and rangaéir;a* (stage), *dârukarma* (wood—work), *nepalhya -grha* (green- house), *preks.Lopaves'a* (audience-hall), Doors for entrance &exit		Sushil Jana		
	Section'B' Drama: Vastu, Neta and Rasa,				

I	Definition of drama and its various names - *drs'ya, rñpa,rñpaka , abhineya,'* abhinaya and its types: *âkgika*(gestures), vficiR(oral), *sâttvika* (representaion of the sattva), *âhârya* (dresses and make-up). *Kastu•* (subject-matter) : *âdhik0rika* (principal), *prâsangika* (subsidiary), Five kinds of *arlhaprakr.ti, L0ryâvasthâ* (stages of the action of actor) and *Gandhi* (segments), *orlhopaks.epaka* (interludes), kinds of dialogue:1. *Barvaérâvya* or *prakâs'a* (aloud) " *râvya*or *Eva Sta* (aside) 3. *niyoias'rdvya :janântiLa* (persoqal address), *apavârita*(confidence) 4. *â.Us"abhâ:sita*(conversation with imaginary person).		Supti Bhattacharya		
II	*Neta:* Four kinds of heroes, Three kinds of heroines,sñ1radfiñrn(stage manager), *pâripârFika* (assistant of siitradhñra), *vidusaka* (jester), koñcukl (chamberlain), *pratinâyaka* (villain).		Supti Bhattacharya		

III	*Rasa:* definition and constituents, ingredients of *rasa-ni;patti: - bhâva* (emotions), *vibhâva* (determinant),*anubhâva* (consequent), *sâttvikabhâva* (involuntary state), *sthâyibhâva* (permanent states),*vyabhicâribhâva*		Rathin Biswas		
	Section'C' Tradition and History of Indian Theatre				
I	Origin and development of stage in different ages: pre-historic, Vedic age, epic-puranic age, court theatre, temple theatre, open theatre, modern theatre: folk theatre, commercial theatre, national and state level theatre		Sudipta Kumar Karan		
Teaching Plan: Department of Sanskrit: SEMESTER-VI (HONOURS)					
UNITS	**PAPER: CC-13: Ontology and Epistemology**	**75**		21.02.2022 to 10.06.2022	**1st week of April,2022 & 1st week of June,2022**
	Section 'A' Essentials of Indian Philosophy,				
I	Meaning and purpose of darsana, general cl,assification of philosophical schools in classical lnbian philosophy		**Rathin Biswas**		
II	Realism ***athârthavâda*** or *vastuvâda)* and Idealism *@rotyayavâda),* Monism *(ekoiwavâdo),* Dualism *(dvairavnvfida)* &Pluralism *(bahuttvavâda) ;* dharma (property)-dharmi (substratum)		**Sushil Jana**		

III	Causation {k0ryaLârayavâda) naturalism ‹svabhâvavâda), doctrine of pre-existence of effect {saik0ryavâda j, doctrine of real transformation Unit: THtparinâmavâda), doctrine of illusory transformation {vivartavâda), doctrine of non-prexistence of effect in cause (asatk0ryavâda and ârambhavâda)		**Satyanarayan Sau**		
	Section 'B' Ontology (Based on Tarkasamgraha)				
I	Concept of padartha, three dharmas of padirthas, definition of Dravya,		**Debasri Giri**		
II	Samanya, Vis'esa, Samavaya, Abhava.		**Debasri Giri**		
III	Definitions of first sevendravyas and their examination; Atma and its qualities,manas.		**Satyanarayan Sau**		
IV	Qualities (other than the qualities oftheiitman) Five types of Karma.		**Satyanarayan Sau**		
	Section 'C' Epistemology (Based on Tarkasamgraha				
I	Buddhi(jdana) — nature ofjfiâna in Nyaya vai4esika; smriti-anubhava; yathsnha and ayalhartha ,		**Debasri Giri**		

II	Kara9a and kirana, definitions and types of prams, kartñ-karana-vyapara-phala, model Pratyaksa		**Debasri Giri**		
III	Anumana including hetvabhñsa		**Satyanarayan Sau**		
IV	Upamina and sabda pramina		**Satyanarayan Sau**		
V	Types of ayaihñrtha anubhava		**Satyanarayan Sau**		
UNITS	**PAPER: CC-14: Sanskrit Composition and Communication**	75			
	Section 'A' Vibhaktyartha, Voice and Krt,				
I	Yibhaktyartha Prakarana LaghusiddhântakaumuM Voice (katfi. karma and bhâva)		Dipankar Mishra		
II	Selections from *Krt Prokarana*- from *Laghusiddhântakaumudi* Major Sutras for the formation *ot krdonta* words *ttavyat, tavya, anyar, yat, nyal, nvul, tric, an,kia,* *katavatu, éat5i, éânac, tumun, ktvâ-lyap,lyut* *,ghan, Min)*		Rathin Biswas		
	Section 'B' Translation and Communication,				

I	Translation and Communication Translation from Hindi/English to Sanskriton the basis of cases, Compounds and kbitsuffixes. Translation from Sanskrit andHindi		Rathin Biswas		
II	Communicative Sanskrit: SpokenSanskrit.		Rathin Biswas		
	Section 'C' Essay				
I	Essay (traditional subjects) e.g. veda, upnisad, ans it Language, skrit Mahâbhâra fa, purâna, g?tâ, principal Sanskrit poets.		Sudipta Kumar Karan		
II	Essay based on issues and topic related to modernsubjects like entertainment, sports, national and international affairs and social problcms.		Satyanarayan Sau		
UNITS	**PAPER: DSE- 4A: Fundamentals of Ayurveda**	75			
	Section 'A' Introduction of Ayrveda,				
I	Introduction of Ayurveda, History of Indian Medicine in the pre-caraka period, The two schools of Ayurveda: Dhanvantari andPunarvasu.		Sudipta Kumar Karan		
II	Main Aciiryas of Ayurveda — Caraka, Sus"ruta, Viigbbatta, Miidhava, Siirñgadhara and Bhavamis'ra		Sudipta Kumar Karan		
	Section 'B' Carakasarhita (Sutra-sihanam),				

I	Carakasamhitñ—(Siitra-sthanam):DivisionofTime and condition of nature and body in sixseasons. Regmen of Fall Winter (Hemanta), Winter (Sis'ira) &Spring (Vasanta) seasons.(Varsa) and		Supti Bhattacharya		
	Section 'C' Taittiriyopanisad.				
I	Taittiriyopanishad—Bguvalli,anuvak1-3		Sushil Jana		
II	Taittiriyopanisha Bh(guéal1i, anuvak 1-3		Sushil Jana		
Teaching Plan: Department of Sanskrit: SEMESTER-I (GENERAL)					
UNITS	**PAPER: CC-1:: Sanskrit Poetry**	**75**		01.10.2021 to 24.02.2022	
	Section 'A' Raghuva_śam				1st internal examination on 4th week of December, 2022 and 2nd internal examination on 2nd week of March,2022
I	Introduction (Author and Text) Canto-I (Verses 1-10) Meaning/translation, Explanation, Story, Characteristics of Raghu Clan, Characteristics of Dilīpa.		Sudipta Kumar Karan		
II	Canto-I (Verses: 11-25) Meaning/translation, Explanation, Role of Dilīpa for the welfare of the subjects. Appropriateness of title, Background of given contents		Sudipta Kumar Karan		

	Section ‘B’ Śiśupālavadham				
I	Introduction (Author and Text), Appropriateness of title, Background of given contents. Canto II, Verses 26-37, Grammar, Translation, Explanation, Poetic excellence, thematic analysis		Sushil Jana		
II	Verses 42-56, Grammar, Translation, Explanation, Poetic excellence, thematic analysis.		Sushil Jana		
	Section ‘C’ Nītiśatakam				
I	Verses (1-10) Translation, explanation		Amal Samanta		
II	Verses (11-20) Translation, explanation, Social experiences of Bhartṛhari, Types of Fool		Amal Samanta		
	Section ‘D’ History of Sanskrit Poetry				
I	Aśvaghoṣa, Kālidāsa, Bhāravi, Māgha, Śriharṣa, Jayadeva, Bhart_hari and their works		Sourav Goswami		
II	Origin and Development of Different types of Mahakavya and Gītikāvya with special reference to the following Poets and their works.		Sourav Goswami		

Teaching Plan: Department of Sanskrit: SEMESTER-II (GENERAL)

UNITS	PAPER: CC3 [DSC-1B] Sanskrit Prose	75		01.04.2022 to 09.07.2022	
	Section'A' Suknasopadesa,				1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
I	Introduction- Author/Text, Text up to page 116 of Prahlad Kumar upto □□□ □□□ □□□□ □□□□ □□□□□□□ried (up to the end of the text.)		Ritabrata Sau		
II	Society and political thought depicted in Sukanasopadeśa. logical meaning and application of savings.		Ritabrata Sau		
	Section 'B' Sivarajavijayam, Nihswasa-1,				
I	Para 1 to 20 Introduction- Author/Text, Text reading (Grammar. Translation, and Explanation), poetic excellence, plot. Timing of Action.		Sudipta Kumar Karan		
II	From para 21 to the end of the text. Text reading (Grammar, Translation, and Explanation), Poetic excellence, plot. Timing of Action.		Sudipta Kumar Karan		
	Section 'C' Survey of Sanskrit Literature-Prose				
I	Origin and development of prose and important prose romances		Debasri Giri		

II	Subandhu, Bäṇa, Dandin, Ambikadatta Vyāsa. Pañcatantra, Hitopadeśa, Vetālapañcavsattikā, Simhasanadvätrimsika and Puruṣaparīksā.		Rathin Biswas		
Teaching Plan: Department of Sanskrit: SEMESTER-III (GENERAL)					
UNITS	**PAPER: DSC-lC (CC-3): Sanskrit Drama**	75		1.10.2021 to 05.02.2022	**4th week of November,2021 &1st Week of January,2022**
	Section 'A' Pratimanatakam: Act I&III - Bhasa				
I	First Act Introduction, Text Reading (Grammar, Translation, and Explanation), Poetic excellence, Plot.		Dipankar Mishra		
II	Third Act Introduction, Text Reading (Grammar, Translation, and Explanation), Poetic excellence, Plot.		Dipankar Mishra		
	Section 'B' Abhijiianasakuntalam Act IV- Kalidasa				
I	Fourth Act (a) Introduction, Explanation of terms like nfindf, prastfivanii, sfitradhiira, naff, vi$kambhaka, vidii$aka and kmicukz. (b) Text Reading (Grammar, Translation, Explanation), Poetic excellence, Plot, Timing of Action. Personification of nature		Sudipta Kumar Karan		

II	kiivye$U nfitakarrt ramyam, upamfi, Language of Kalidasa, dhvani in Kalidasa, Pllrpo~e a_i:id dcf:Sign		Sudipta Kumar Karan		
	Section 'C' Technical Terms from Sanskrit Dramaturgy		Sudipta Kumar Karan		
I	Nataka, Nayaka, Nayika, Nandi, Sutradhara, Pratabana, Bidushaka.		Sudipta Kumar Karan		
II	Anka, Prakasha, Apabarita, Akashbhasita, Prabeshaka.		Sushil Jana		
	Section 'D' History of Sanskrit Drama and an Introduction to Principle of Sanskrit Dramas		Sushil Jana		
I	Origin and Development		Sourav Goswami		
II	Some important dramatists and dramas: Bhasa, Kalidasa, Sudraka, Visiikhadatta, Harg Bhavabhuti, and their works.		Sourav Goswami		
UNITS	**PAPER: SEC-1: Computer awareness for Sanskrit**		50		
	Section A: Basic Computer Awareness		Debasri Giri		
I	Design, Architecture: Operating System		Ritabrata Sau		
II	MS Office Tools (Word, Power points, Excel etc.)		Rathin Biswas		

III	Using Internet, Web Search (Searching E-text/ e-book for Sanskrit in Roman and Devanagari Scripts), Email etc		Sushil Jana		
	Section B: Typing in Unicode for Preservation and Digitalization of Sanskrit Text				
I	Character encoding, Unicode, ASCII, UTF-8, UTF-16		Sudipta Kumar Karan		
II	Typing in Unicode through various Softwares		Sourav Goswami		
III	Sanskrit Text Digitalization/Preservation/Storage		Satyanarayan Sau		
	Section C: Web Publishing		Satyanarayan Sau		
I	Basics HTML, Java Scripts and CSS		Supti Bhattacharya		
II	Basics of Databases		Sudipta Kumar Karan		
Teaching Plan: Department of Sanskrit: SEMESTER-IV (GENERAL)					
UNITS	**PAPER: DSC-1D(CC-4): Sanskrit Grammer**	75		15.03.2022 to 25.06.2022	**4th week of April,2022 &3rd week of June,2022**
	Section 'A' Laghusiddhantakaumudi: Samjna Prakarana,				
I	Samiñâ Prakarana		Amal Samanta		

	Section 'B' Laghusiddhantakaumudi: Sandhi Prakarana,				
I	ac sandhi: yen, giiyn, di°rgha, ayâdi, vrddhi and yiirvor‹i/›o.		Rathin Biswas		
II	Hal sandhi. .it-on n, ititva, aiitinusikatvn, cli/iofvn and jastava		Rathin Biswas		
III	visarga sandhi: uwn, lapa, saiva and rutva		Debasri Giri		
	Section 'C' Laghusiddhantakaumudi: Vibhakti		Sushil Jana		
I	***Vibhaktyartha Prakaiana***				
UNITS	**PAPER: SEC-2: Yogsasutra of Patanjali**	50			
	Section 'A' Yogsasutra of Patanjali: Samadhi Pada,				

I	Yogasiiria of' Patanjali: Samadhi Pada (Suiras: I - 15)		Satyanarayan Sau		
II	ogiisiirla ofPatanjali:Sair‹dhiPâd‹i(Sutras:16-		Satyanarayan Sau		
	Section 'B' Yogsasutra of Patanjali: Sadhana Pada ,				
I	Yogasfirta of Patanjali : S3dhana Pada (Sutra: 29-45)		Debasri Giri		
II	Yogasiirta of Patanjal i: S.adhiina P3da (Sutras: 46-55)		Sourav Goswami		
	Section 'C' Yogsasutra of Patanjali: Vibhuti Pada				
I	Y ogaxurta of' Patanjali: Vibhiiti Piida (Sutra.s: I-3)		Ritabrata Sau		
Teaching Plan: Department of Sanskrit: SEMESTER-V (GENERAL)					
UNITS	**PAPER: DSE1AT: Philosophy, Religion and Culture in Sanskrit Tradition**	75		14.09.2021 to 18.01.2022	**1st week of November, 2021**
	Section-A-Dharma,				

I	Form of God, Mode of worship, Bhakta as a morally evolved person - Gita Chapter XII		Ritabrata Sau		**&4th week of December,2021**
II	dharma ten fold dharma and its versions, definitions of satya, ahimsā, asteya, aparigraha, pañcha mahā yajña; theory of three debts.		Ritabrata Sau		
III	Man's initiative and God's design; God's līla and Krpā, Daiva versus puruṣakāra, adṛsta, three types of karma - saṁchita, kriyamāṇa and prārabdha, karma.		Debasri Giri		
	SectinB-Samskara and Purusartha,				
I	Process of acculturation - importance of Saṁskāra.		Sushil Jana		
II	Aim of human life - theory of Puruṣārtha.		Sushil Jana		
	Section c- Swadharma				
I	An amoral' person - svadharma and karmayoga, sthita prajna in the Gita (Chapter II).		Sourav Goswami		

II	Prakriti- three gunas and their impact on personality.		Sourav Goswami		
UNITS	**PAPER: SEC-3: Basic Elements of Jyotisha**	50			
	SecA- Origine, Development and Branches of Jyotisa				
I	Origin and Development of Jyotisa		Sudipta Kumar Karan		
II	General introduction to following branches of Astrology: Siddhanta, Samhita, Horā, Tājika, Praśna, Vastuśāstra and Muhurtaśāstra.		Sudipta Kumar Karan		
	SecB- Jyotischandrika: sanjna Prakaranam,				
I	Jyotiṣachandrikā- Sañjñā- Prakaraṇam, Verses: 1-29		Sudipta Kumar Karan		
II	Jyotiṣachandrikā- Sañjñā- Prakaraṇam, Verses: 30-65		Amal Samanta		
	Sec C: Jyotischandrika: sanjna Prakaranam				
I	Jyotisachandrikā- Sañjñā- Prakaraṇam, Verses: 66- 90.		Sushil Jana		

II	Jyotiṣachandrikā- Sañjñā- Prakaraṇam, Verses: 91- 115.		Supti Bhattacharya		
UNITS	**PAPER: GE 1T: Political Thoughts in Sanskrit**	75			
	SecA- Basic features of Ancient Indian Political Thought				
I	Name, Scope and Sources of Ancient Indian Political Thought: Name of the Science: 'Dandanīti', 'Dharmaśāstra', 'Nītiśāstra'. Scope of Indian Political Thought: relation with Dharma, Artha and Nīti; Sources of Ancient Indian Political Thought :Vedic Literature, Purāṇa, Rāmāyaṇa, Mahābhārata, Dharmaśāstra, Nītiśāstra Kautilya's Arthaśāstra and Rajaśāsana (Inscriptions).		Sudipta Kumar Karan		
II	Nature, Types and Theories of the State: Nature of the State in Arthaśāstra (6.1) and Manusmrti (9.294) with Special reference to Saptanga-Theory: Svāmi, Amatya, Janapada, Pura, Kośa, Danda and Mitra. 2.1	Sacred, Myth, Ritual		Saswati Mondal		
2.2	Time-Space		Saswati Mondal		

2.3	Rationality		Sanghamitra Nath		
3.1	Prayer		Suvendu Kumar Maity		
3.2	Craft		Suvendu Kumar Maity		
3.3	Body		Suvendu Kumar Maity		
UNITS	**PAPER: CC7: Sociology of Gender**	75		01.10.2021-05.02.2022	
1	Gendering Sociology		Arun Kumar Maity		
2.1	Gender, Sex, Sexuality		Saswati Mondal		
2.2	Production of Masculinity and Femininity		Arun Kumar Maity		
3.1	Class, Caste		Debjani Khanra		
3.2	Family, Work		Debjani Khanra		
4.1	Power and Subordination		Suvendu Kumar Maity		
4.2	Resistance and Movements		Sanghamitra Nath		

UNITS	**PAPER: SEC-1: Framing Questionnaire and Conducting Interview**	50		01.10.2021-05.02.2022	
1	Questionnaire and Interview Method: application; preparations before using these methods		Debjani Khanra		
2	Types of Questionnaire, framing a questionnaire		Debjani Khanra		
3	Types of Interviews, preparing interview schedule		Sanghamitra Nath		
4	Data Recording, Processing and interpretation		Sanghamitra Nath		
5	Limitations of Questionnaire and Interview Methods		Sanghamitra Nath		
UNITS	**PAPER: GE-3: Sociology of Social Movements**	75		01.10.2021-05.02.2022	
1	Contextualizing Social Movements		Sanghamitra Nath		
2	Theories of Social Movements		Arun Kumar Maity, Saswati Mondal		
3	Ideology, Participation and Mobilization: Case Studies		Sanghamitra Nath, Suvendu Kumar Maity		

Teaching Plan: Department of Sociology: SEMESTER-IV(HONOURS)					
UNITS	**PAPER: CC8: Economic Sociology**	75		15.03.2022-25.06.2022	**4th week of April,2022 &3rd week of June,2022**
1.1	Formalism and Substantivism		Saswati Mondal		
1.2	New Economic Sociology		Sanghamitra Nath		
2.1	Reciprocity and Gift		Arun Kumar Maity		
2.2	Exchange and Money		Arun Kumar Maity		
3.1	Hunting and Gathering		Suvendu Kumar Maity		
3.2	Domestic Mode of Production		Suvendu Kumar Maity		
3.3	Peasant		Debjani Khanra		
3.4	Capitalism		Debjani Khanra		
3.5	Socialism		Suvendu Kumar Maity		
4.1	Development		Sanghamitra Nath		
4.2	Globalisation		Saswati Mondal		

UNITS	**PAPER: CC9: Sociology of Kinship**	75		15.03.2022-25.06.2022	
1	Key terms and approaches		Sanghamitra Nath		
2	Family, Household and Marriage		Saswati Mondal		
3.1	Relatedness		Arun Kumar Maity		
3.2	Kinship and Gender		Arun Kumar Maity		
3.3	Re-imagining Families		Suvendu Kumar Maity		
3.4	New Reproductive Technologies		Suvendu Kumar Maity		
UNITS	**PAPER: CC10: Social Stratification**	75		15.03.2022-25.06.2022	
1	Introducing Stratification		Arun Kumar Maity		
2.1	Marx, Weber and Class		Debjani Khanra		
2.2	Functionalism		Suvendu Kumar Maity		
3.1	Caste (Debjani Khanra), Race and Ethnicity (Sanghamitra Nath)		Debjani Khanra, Sanghamitra Nath		

3.2	Feminism and Gendered Stratification		Sanghamitra Nath		
4	Mobility and Reproduction		Saswati Mondal		
UNITS	**PAPER: SEC-2: Statistical Reasoning for Sociology**	50		15.03.2022-25.06.2022	
1	Use of statistics in Social Research		Arun Kumar Maity		
2.	Basic Concepts		Saswati Mondal		
3	Sampling		Debjani Khanra		
4	Frequency Distribution and Graphical Techniques		Sanghamitra Nath		
5	Coding and Tabulation		Sanghamitra Nath		
6	Central tendency		Suvendu Kumar Maity		
7	Dispersion		Suvendu Kumar Maity		
UNITS	**PAPER: GE-4: Population and Society**	75		15.03.2022-25.06.2022	
1	Introducing Population Studies		Saswati Mondal		

2.	Population, Social Structure and Processes		Suvendu Kumar Maity		
3	Population, Gender and Migration		Saswati Mondal		
4	Population Dynamics and Development		Sanghamitra Nath		
Teaching Plan: Department of Sociology: SEMESTER-V(HONOURS)					
UNITS	**PAPER: CC11: Sociological Thinkers–I**	75		14.09.2021-18.01.2022	**1st week of November, 2021 &4th week of December,2021**
1	Karl Marx		Debjani Khanra, Sanghamitra Nath		
2	Max Weber		Saswati Mondal, Debjani Khanra		
3	Emile Durkheim		Arun Kumar Maity, Debjani Khanra		
UNITS	**PAPER: CC12: Sociological Research Methods – I**	75		14.09.2021-18.01.2022	
1	The Logic of Social Research		Debjani Khanra, Arun Kumar Maity		

2	Methodological Perspectives		Sanghamitra Nath		
3	Modes of Enquiry		Suvendu Kumar Maity, Saswati Mondal		
UNITS	**PAPER: DSE-1: Urban Sociology**	75		14.09.2021-18.01.2022	
1	Introducing Urban Sociology		Arun Kumar Maity		
2	Perspectives in Urban Sociology		Arun Kumar Maity, Suvendu Kumar Maity, Sanghamitra Nath		
3	Movements and Settlements		Saswati Mondal		
4	Politics of Urban Space		Arun Kumar Maity, Suvendu Kumar Maity, Debjani Khanra		
UNITS	**PAPER: DSE-2: Environmental Sociology**	75		14.09.2021-18.01.2022	
1	Envisioning Environmental Sociology		Arun Kumar Maity, Sanghamitra Nath		

2	Approaches		Arun Kumar Maity, Suvendu Kumar Maity, Sanghamitra Nath, Saswati Mondal		
3	Environmental Movements in India		Debjani Khanra, Suvendu Kumar Maity		
Teaching Plan: Department of Sociology: SEMESTER-VI(HONOURS)					
UNITS	**PAPER: CC13: Sociological Thinkers II**	75		21.02.2022-10.06.2022	**1st week of April,2022 & 1st week of June,2022**
1.	Talcott Parsons		Debjani Khanra		
2.	Claude Levi-Strauss		Suvendu Kumar Maity		
3.	G. H. Mead and Erving Goffman		Sanghamitra Nath		
4.	Peter L. Berger and Thomas Luckmann		Suvendu Kumar Maity		
5.	Max Horkheimer, T.W. Adorno and Herbert Marcuse		Saswati Mondal		

UNITS	**PAPER: CC14: Research Methods – II**	75		21.02.2022-10.06.2022	
1.	Doing Social Research		Suvendu Kumar Maity		
2.	Methods of Data Collection		Debjani Khanra		
3.1	Graphical and Diagrammatic Presentation of Data		Saswati Mondal		
3.2	Measures of Central Tendency		Arun Kumar Maity		
3.3	Measures of Dispersion		Arun Kumar Maity		
4.	Research Projects		Sanghamitra Nath		
UNITS	**PAPER: DSE-3: Indian Sociological Traditions**	75		21.02.2022-10.06.2022	
1	G S Ghurye		Saswati Mondal		
2.	Radhakamal Mukerjee		Suvendu Kumar Maity		
3.	D P Mukerji		Debjani Khanra		
4.	Verrier Elwin		Sanghamitra Nath		
5.	M.N. Srinivas		Debjani Khanra		

6.	Irawati Karve		Arun Kumar Maity		
7.	Leela Dube		Sanghamitra Nath		
UNITS	**PAPER: DSE-4: Project : Fieldwork And Dissertation**	75		21.02.2022-10.06.2022	
	PROJECT WORK TO BE EQUALLY DISTRIBUTED AMONG Sanghamitra Nath, Debjani Khanra, Saswati Mondal, Arun Kumar Maity, & Suvendu Kumar Maity				

Teaching Plan: Department of Sociology: SEMESTER-I(GENERAL)

UNITS	**PAPER: DSC-1A/2A: Introduction to Sociology**	75		01.10.2021-24.02.2022	Internal Examination
1	Nature and Scope of Sociology		Debjani Khanra		1st internal examination on 4th week of December, 2022 and 2nd internal
2	Sociological Concepts		Debjani Khanra & Arun Kumar Maity		

					examination on 2nd week of March,2022
Teaching Plan: Department of Sociology: SEMESTER-II(GENERAL)					
UNITS	**PAPER: DSC-1B/2B**	75		01.04.2022-09.07.2022	1st internal examination on 2nd week of May, 2022 and 2nd internal examination on 2nd week of July,2022
1.	India as a Plural Society		Arun Kumar Maity		
2.1	Caste		Debjani Khanra		
2.2	Tribe		Debjani Khanra		
2.3	Class		Debjani Khanra		
2.4	Village		Debjani Khanra		
2.5	Family and Kinship		Debjani Khanra		
3	Identities and Change		Arun Kumar Maity		
3.1	Dalits' Movement		Arun Kumar Maity		
3.2	Women's Movement		Arun Kumar Maity		
4.1	Communalism		Debjani Khanra		

4.2	Secularism		Debjani Khanra		
Teaching Plan: Department of Sociology: SEMESTER-III(GENERAL)					
UNITS	**PAPER: DSC-1C/2C: Sociological Theories**	75		01.10.2021-05.02.2022	**4th week of November,2021 &1st Week of January,2022**
1	Karl Marx		Arun Kumar Maity		
2.	Emile Durkheim		Arun Kumar Maity, Debjani Khanra		
3	Max Weber		Debjani Khanra		
UNITS	**PAPER: SEC-1: Framing Questionnaire and Conducting Interview**	50		01.10.2021-05.02.2022	
1	Questionnaire and Interview Method: application; preparations before using these methods		Arun Kumar Maity		
2	Types of Questionnaire, framing a questionnaire		Arun Kumar Maity		
3	Types of Interviews, preparing interview schedule		Sanghamitra Nath		

4	Data Recording, Processing and interpretation		Sanghamitra Nath		
5	Limitations of Questionnaire and Interview Methods		Sanghamitra Nath		
Teaching Plan: Department of Sociology: SEMESTER-IV(GENERAL)					
UNITS	**PAPER: DSC-1D/2D: Methods of Sociological Enquiry**	75		15.03.2022-25.06.2022	**4th week of April,2022 &3rd week of June,2022**
1.1	What is Sociological Research		Debjani Khanra		
1.2	Objectivity in the Social Sciences		Debjani Khanra		
1.3	Reflexivity		Sanghamitra Nath		
2.1	The Comparative Method		Arun Kumar Maity		
2.2	The Ethnographic Method		Arun Kumar Maity		
3.1	Theory and Research		Suvendu Kumar Maity		
3.2	Analyzing Data: Quantitative and Qualitative		Saswati Mondal		

UNITS	**PAPER: SEC-2: Counseling**	50		15.03.2022-25.06.2022	
1	Aims, Goal and Scope of Counseling		Arun Kumar Maity		
2	Characteristics/Frameworks		Arun Kumar Maity		
3	Types/Areas		Sanghamitra Nath		
4	Counsellor-Client Communication		Sanghamitra Nath		
5	Processes and Outcome		Sanghamitra Nath		
Teaching Plan: Department of Sociology: SEMESTER-V(GENERAL)					
UNITS	**PAPER: DSE-1A/2A: Social Stratification**	75		14.09.2021-18.01.2022	**1st week of November, 2021 &4th week of December,2021**
1	Social Stratification: Concepts and Approaches		Arun Kumar Maity		
2	Forms of Social Stratification		Arun Kumar Maity, Suvendu Kumar Maity, Sanghamitra Nath		
3	Social Mobility		Debjani Khanra		

UNITS	**PAPER: SEC-3: Gender Sensitization**	50		14.09.2021-18.01.2022	
1	Sex, Gender and Sexuality		Arun Kumar Maity, Saswati Mondal, Sanghamitra Nath		
2	Gender, Family, Community and the State		Saswati Mondal		
3	Gender Rights and the Law		Debjani Khanra		
4	Understanding Intersections of Gender, Caste, Class, Region, Religion and Disability		Suvendu Kumar Maity		
UNITS	**PAPER: GE-1: Invitation to Sociology I**	75		14.09.2021-18.01.2022	
1	Sociology as a Discipline		Arun Kumar Maity		
2	Some Basic Concepts		Arun Kumar Maity		
3	Culture, Society and Socialization		Debjani Khanra		
4	Social Change and Social Mobility		Arun Kumar Maity		
5	Social Stratification		Suvendu Kumar Maity		

Teaching Plan: Department of Sociology: SEMESTER-VI(GENERAL)					
UNITS	**PAPER: DSE-1B/2B**	75		21.02.2022-10.06.2022	**1st week of April,2022 & 1st week of June,2022**
1	Gendering Sociology		Debjani Khanra		
2	Gender as a Social Construct		Arun Kumar Maity		
3	Differences and Inequalities		Suvendu Kumar Maity, Arun Kumar Maity		
4	Politics of Gender		Sanghamitra Nath		
UNITS	**PAPER: SEC-4: Project Report Writing**	50		21.02.2022-10.06.2022	
1.	Report Writing		Arun Kumar Maity		
2.	Stages in Planning and Writing Process		Debjani Khanra		
3.	Structure and Components of Research		Suvendu Kumar Maity		
4.	Interpretation of Tables, Graphical Representation of Data, Use of Photographs, Case History		Sanghamitra Nath		

5.	Ethical Issues; Referencing the Works of Others		Arun Kumar Maity		
UNITS	**PAPER: GE-2: Sociology of India**	75		21.02.2022-10.06.2022	
1	India as a Plural Society		Arun Kumar Maity		
2.1-2.3	Caste, Tribe, Class		Suvendu Kumar Maity		
2.4-2.5	Village, Family and Kinship		Saswati Mondal		
3.	Identities and Change		Arun Kumar Maity		
4.	Challenges to State and Society		Debjani Khanra		

Geography

Teaching Plan: Department of Geography: PG. SEMESTER-I(M.SC)

UNITS	PAPER: 101: GEO 101.1: Geotectonics	FULL MARKS	NAME OF THE TEACHERS	MONTHS OF TEACHING	Internal Examination
GEO 101.1	**1.** Origin and evolution of solar system with special reference to the Earth/Moon.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Rabin Das**	**25.10.2021-20.01.2022**	**3rd week of December 2021**
	2. Relative and absolute dating: principles and techniques.		**Rabin Das**		
	3. Origin of earth's magnetic field, paleomagnetism, geomagnetic polarity reversal and paleomagnetic timescale, paleomagnetic polar wandering curves and reconstruction of plate tectonic motions.		**Rabin Das**		

	4. Mechanism of plate dynamics. Application of plate tectonic theory in explaining orogenesis, volcanism, earthquake.		**Rabin Das**
	5. Neo-tectonics and its worldwide evidences.		**Rabin Das**
UNITS	**PAPER: 101: GEO 101.2: Geomorphology**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 101.2	1. Concepts in geomorphology: historical and functional approaches, uniformitarianism and catastrophism, base level, grade and profile of equilibrium.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Susanta Ban**
	2. Weathering: factors, processes and landforms. Mass wasting: resultant landforms and safety factor.		**Susanta Ban**
	3. Slope Evolution: process-form relationship on slope elements, theories of Wood, Davis, Penck, King, Young and Savigear. Dynamic metastability in slope evolution.		**Bikash Bhunia**
	4. Fluvial processes and forms: threshold energy for entrainment and transport, channel form and patterns, flood plains, alluvial fan, terraces and delta.		**Bikash Bhunia**
	5. Applied geomorphology in planning, hydrology and economic geology. Geomorphology in hazard Management (flood, landslide and subsidence).		**Bikash Bhunia**
UNITS	**PAPER: 102: GEO 102.1: Oceanography**	**FULL MARKS**	**NAME OF THE TEACHERS**
	1. Marine Environment and Processes: Major subdivisions of the marine environment, winds and ocean	**Total (T) =25**	**Sumitra Rani Jana**

GEO 102.1	circulation, waves in the ocean, origin of the tides and tidal characteristics.	**Theory=20 Internal Assessment (IA) =05**	
	2. Physical and chemical structure of oceans: Water masses and their properties. Sediment in the sea.		**Sumitra Rani Jana**
	3. Coastal Habitats: Estuaries, lagoons, salt marshes, mangrove swamps, coral reefs-origin, circulation, sedimentation and ecology.		**Suman Pahari**
	4. The Dynamic Shoreline: Coastal water movement, circulation in surf zone, beaches, beach profiles, sediment budgets, coastal dunes, barrier islands, tidal inlets, cliffed coasts, deltas, effects of storms. Human impacts on the coastline.		**Suman Pahari**
	5. The Ocean's Resources: Law of the sea, law of the sea treaty, exclusive economic zones/coastal regulation zones, mineral resource- oil and natural gas, gas hydrates, sand and gravel, manganese nodules, cobalt-rich oceanic crusts, phosphate deposits, biotic resources.		**Suman Pahari & Sumitra Rani Jana**
UNITS	**PAPER: GEO 102: GEO 102.2: Hydrology**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 102.2	1. Hydrological systems, estimating water potential, water budgeting at watershed level. Hydrologic frequency analysis (Gumbel's equation and log probability law).	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Taniya Roy**
	2. Precipitation estimates: point rainfall analysis, area-depth curve, theissen network and isohyetal method for estimating rainfall volumes.		**Taniya Roy**

	3. Infiltration and evapotranspiration: soil-vegetation complex and infiltration estimates. Methods of estimating evapotranspiration.		**Taniya Roy**
	4. Runoff estimates using curve number, stream discharge estimates by area-velocity method. Ground water: storage structure, flow, recharge and discharge.		**Taniya Roy**
	5. Hydrographs and Rating curve: Time dimensions of hydrographs: concept of unit hydrograph and rating curves and their significance. flood & drought as hydrological hazards.		**Taniya Roy**
UNITS	**PAPER: 103: GEO 103.1: Climatology**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 103.1	1. Nature and Scope of Climatology and its relationship with Meteorology, climatological systems operating in different space and timescale: thunderstorm, tropical cyclone and associated hazards, jet Stream, planetary wind systems.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Mintu Jana**
	2. The General Circulation: GCM, Tropical circulation- mechanism of Indian monsoon, Walker circulation and ENSO phenomena, Temperate Circulation.		**Mintu Jana**
	3. The Climatic Zones of the world with special reference to tropical climates: wet, wet and dry, savanna, desert and highland.		**Mintu Jana**
	4. Sea surface temperature and it's climatic significance; Maritime influence on coastal weather: seasonal changes and storm events.		**Mintu Jana**

	5. Climatic changes through geological periods- evidences and possible causes; Global Warming- Natural and anthropogenic causes and probable consequences.		**Mintu Jana**
UNITS	**PAPER: 103: GEO 103.2: Soil and Agriculture**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 103.2	1. Variation in physico-chemical properties of soil with climate and dominance of local factors: organic matter content, pH clay content, clay mineralogy, soil colour, calcium carbonate and soluble salt content.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Susanta Ban**
	2. Soil Geomorphology: soil landscape analysis in relation to geomorphic surfaces and surface morphometry, catena concept- catena and soil hydrology, slope description and catena, soil catena under different environment, soil morphology and chrono-sequence.		**Susanta Ban**
	3. Approaches in agricultural geography: agricultural systems (ecological or nearecological systems). Approaches to study agricultural geography, Jonnason's theory on agricultural landuse.		**Susanta Ban**
	4. Determinants of agricultural pattern: physical and institutional, precision farming, use of modern technology.		**Dr. Debashis Manna**
	5. Issues and policies in modern Agriculture: Impact of green revolution, GM Crops and agricultural hazards, food security, agricultural policies and their implication.		**Dr. Debashis Manna**
UNITS	**PAPER: 104: GEO 104.1: Basics of Environment and Ecology**	**FULL MARKS**	**NAME OF THE TEACHERS**

GEO 104.1	1. Concept of Environment, major elements of environment, functioning of environmental systems, role of biotic and abiotic elements.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Bikash Bhunia**
	2. Ecosystem: structure, function and processes, patterns of energy flow.		**Bikash Bhunia**
	3. Biogeochemical cycles (Nitrogen, Carbon, Phosphorus), ecosystem metabolism, ecosystem process (photosynthesis and respiration), trophic levels (food web and chain) decomposition, ecosystem stability.		**Dr. Baikuntha Behari Josh**
	4. Terrestrial ecosystems: Forest, Grassland, Desert and Agriculture.		**Dr. Baikuntha Behari Josh**
	5. Biodiversity: Genetic, species, community and ecosystem diversity; biodiversity uses, threats to biodiversity, biodiversity conservation.		**Dr. Baikuntha Behari Josh**
UNITS	**PAPER: 104: GEO 104.2: Landscape ecology and Planning**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 104.2	**1.** Landscape: Definition, concept, nature and role, ecological description of landscape.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Mintu Jana**
	2. Structure of Landscape: Patches (shape, size, nature and boundary), corridors (type, network, matrix) and mosaics, habitat arrangement measuring metrices (Shanon Diversity Index and Simpson Diversity Index).		**Mintu Jana**
	3. Landscape Dynamics: Energy flow, species movement, nutrient movement.		**Mintu Jana**
	4. Anthropogenic Modification: Agricultural intensification, deforestation and development.		**Mintu Jana**

	5. Landscape management and planning: Role of keystone species, conservation of fragmented habitats, sustainable landscape, and role of Traditional Ecological Knowledge (TEK) in conserving landscape. Role of GIS in landscape planning.		**Mintu Jana**
UNITS	**PAPER: 195: GEO 195.1: Hydrological Techniques**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 195.1	1. Point rainfall analysis, area-depth curves, Thiessen network and Isohyetal methods to determine rainfall volumes.	**Total (T) =25**	**Taniya Roy**
	2. Estimating infiltration using infiltrometre and other field techniques. Drawing infiltration curve.		**Taniya Roy**
	3. Evaporation estimation: Use of evaporation pan and empirical equations using climatic data.		**Taniya Roy**
	4. Runoff and discharge estimation: Curve Number methods for estimating runoff: area-velocity method for discharge estimate.		**Taniya Roy**
	5. Construction of hydrograph, unit-hydrograph and rating curves.		**Taniya Roy**
UNITS	**PAPER: 195: GEO 195.2 Sedimentological Analysis**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 195.2	1. Phi-scale of grain size distribution, texture analysis of sediment samples using standard techniques, statistical representation.	**Total (T) =25**	**Taniya Roy**
	2. Form and shape analysis of pebble grade sediments.		**Taniya Roy**

	3. Megascopic and microscopic examination of sediments.		**Taniya Roy**
	4. Identification of sedimentary and bioturbation structures.		**Taniya Roy**
	5. Sedimentary environmental facies analysis.		**Taniya Roy**
UNITS	**PAPER: 196: GEO 196.1: Environmental Mapping**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 196.1	1. Estimation and mapping of soil properties: texture, structure, moisture, colour, pH, organic matter, NPK, soil profile mapping.	**Total (T) =25**	**Bikash Bhunia**
	2. Estimation of Water Properties: BOD, COD, Dissolved Oxygen, pH, suspended solid, turbidity and electric conductivity.		**Bikash Bhunia**
	3. Ecological Micro- zonation Mapping.		**Bikash Bhunia**
	4. Vegetation density mapping		**Bikash Bhunia**
	5. Association between soil parameters, vegetation types and density.		**Bikash Bhunia**
UNITS	**PAPER: 196: GEO 196.2: Physical and Social Thematic Mapping**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 196.2	**1.** Morphometry and Drainage Network Analysis of watershed.	**Total (T) =25**	**Rabin Das**
	2. Mapping of farming practices: Crop-combination, diversification and cropping intensity.		**Rabin Das**
	3. Mapping of social vulnerability and social disparities, ethnic mapping.		**Rabin Das**
	4. Estimation and Mapping of Social Well-being, HDI, GDI, GEM.		**Rabin Das**

	5. Estimation of Human Poverty Index – (HPI-I and II) for developed and developing countries.		**Rabin Das**		
Teaching Plan: Department of Geography: PG. SEMESTER-II (M.SC)					
UNITS	**PAPER: 201 GEO 201.1: Environmental Ethics and Regulation**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**Internal Examination**
GEO 201.1	1. Environmental ethics and education; Concept, development of environmental philosophy, Ecocentrism and Anthropocentrism, the land ethic (Aldo Leopold), Gaia concept, Ecofeminism. Formal and non-formal environmental education, Tbilisi conference, environmental awareness.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Susanta Ban**	**07.02.2022-11.07.2022**	**2nd Week of June, 2022**
	2. Approaches to conservation of environment: Landscape ecology and ethno-ecology, environmental stewardship.		**Susanta Ban**		
	3. Environmental Impact Assessment (EIA), Environmental Management Planning (EMP), Environmental Performance Assessment (EPA).		**Susanta Ban**		
	4. Global Environmental Issues: Stockholm Conference, the Earth Summits, Inter-Governmental Panel for Climate Change (IPCC).		**Susanta Ban**		
	5. Environmental Laws in India: Wild life Act, Forest Acts, Environmental Protection Act, National Environmental Tribunal Act.		**Susanta Ban**		
UNITS	**PAPER: 201: GEO 201.2: Environmental Engineering**	**FULL MARKS**	**NAME OF THE TEACHERS**		

GEO 201.2	1. Definition and domain of Environmental Engineering, Waste water treatment: Primary, Secondary and Tertiary treatment; Disposal.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Bikash Bhunia**
	2. Sludge treatment; Solid (Municipal) waste management, Hazardous waste management.		**Bikash Bhunia**
	3. Air pollution; Indoor pollution, Air sampling and measurement, Air pollution control technologies.		**Bikash Bhunia**
	4. Noise Pollution; Measurement of noise		**Bikash Bhunia**
	5. Arsenic and Fluoride Pollution; Spatial distribution		**Bikash Bhunia**
UNITS	**PAPER: 202 GEO 202.1: Population Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 202.1	1. Scope, development and recent trends of population geography and its interdisciplinary nature.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Sumitra Rani Jana**
	2. Population composition and structure: Types, spatial and temporal variation and determinants of age, sex, literacy and rural-urban ratio.		**Taniya Roy**
	3. Demographic Transition: Facts, theories, different waves. Its social, political and economic impacts.		**Dr. Debashis Manna**
	4. Population projection: Concept, types and methods.		**Sumitra Rani Jana**
	5. Population- resource relationship: Critical analysis of over, under and optimum population, population resource regions, carrying capacity and change in carrying capacity over time. Population policy issues, population equilibrium.		**Dr. Debashis Manna**

UNITS	GEO 202.2: GEO 202.2: Population and Development	FULL MARKS	NAME OF THE TEACHERS
GEO 202.2	1. The fate of Millennium development goals, Human development and gender issues: HDI, GDI, GEM-concept, measures and criticism, disparities	Total (T) =25 Theory=20 Internal Assessment (IA) =05	Dr. Pijush Kanti Dandapath
	2. Population growth: Link to economic development, resource scarcity, food security and sustainable development. Concept of logistic and exponential growth		Mintu Jana
	3. Population and development integration with special reference to India		Mintu Jana
	4. Theories and approaches of population growth and regulation: Malthus, Marx and Neo- Malthusiasm		Dr. Debashis Manna
	5. Migration: Concept of social mobility, concept, types, patterns, theories (Ravenstein, Lee, Louis and Zelinsky), consequences.		Dr. Debashis Manna
UNITS	**PAPER: 203: GEO 203.1: Regional Geomorphology of India and WB**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 203.1	1. Geomorphology of Darjeeling Himalaya and Terai Region with special reference to landslides and alluvial fans.	Total (T) =25 Theory=20 Internal Assessment (IA) =05	Rabin Das
	2. Tectonics, drainage and geomorphology of Western Ghats with special reference to Deccan Trap.		Rabin Das
	3. Geomorphology and soil-landform assemblages of Chhotanagpur Plateau and its adjacent areas of West Bengal, Geomorphology of Rajasthan desert with special reference to Marusthali.		Rabin Das
	4. Form, process and evolution of Ganga, Subarnarekha and Godavari delta.		Taniya Roy

	5. Tectonics and Geomorphology of the Islands of Bay of Andaman and Nicobar, Rameswaram and Laksha-Minikoi and Amindivi.		**Taniya Roy**
UNITS	**GEO 203.2: Land,Water,Forest: Conflict and Coservation**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 203.2	**1.** Land class systems, land use capability classes.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Mintu Jana**
	2. Land degradation, land conservation and land improvement.		**Mintu Jana**
	3. Water assessment: water quality, water availability and scarcity of water, saline ground water in coastal areas, functions of wetlands.		**Suman Pahari**
	4. Characterization diversity of rainforests and mangrove forests		**Dr. Baikuntha Behari Josh**
	5. Characterization diversity of rainforests and mangrove forests		**Dr. Baikuntha Behari Josh**
UNITS	**PAPER: 204: GEO 204.1: Resource and Its Management**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 204.1	1. Geography as a science of synthesis; social relevance of geography	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Susmita Maiti**
	2. Resource assessments, management and mapping		**Sikha Kar**
	3. Human resource development in backward region.		**Sumitra Rani Jana**
	4. Indicators of livelihood security.		**Suman Pahari**
	5. Microlevel resource planning in watershed scale.		**Pranati Manna**
UNITS	**GEO 204.2: GEO 204.2: Earth System Science**	**FULL MARKS**	**NAME OF THE TEACHERS**
	1. Earth surface processes and Geo-tectonics.		**Susanta Ban**

GEO 204.2	2. Composition of atmosphere and atmospheric processes.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Dr. Baikuntha Behari Josh**
	3. Bottom relief of major oceans; temperature and salinity distribution.		**Bikash Bhunia**
	4. Principles of mapping and applications.		**Bikash Bhunia**
	5. Regional geomorphology of West Bengal.		**Dr. Debashis Manna**
UNITS	**PAPER: 295: GEO 295.1: Basic Statistics in Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 295.1	**1.** Measurement in Geography: Nominal, ordinal, interval and ratio measurement.	**Total (T) =25**	**Rabin Das**
	2. Concept of covariance, correlation and regression: Bi-variate analysis - linear, exponential, Product moment correlation, Spearman's Rank correlation, correlation matrix, partial correlation, residuals - mapping of residuals.		**Taniya Roy**
	3. Probability distribution: addition and Law of multiplication, concept of probability distributions (binomial distributions, normal probability distribution), properties of normal curve.		**Bikash Bhunia**
	4. Hypothesis testing: Formulation, Rejection rule, one and two tailed tests, significance level, degrees of freedom type I and type II errors, Standard Error. Different types of significance test for various purposes. Chi- square test, student's t- test.		**Mintu Jana**
	5. Sampling techniques for geographical analysis.		**Rabin Das**

UNITS	PAPER: 295: GEO 295.2: Advance Quantitative Method	FULL MARKS	NAME OF THE TEACHERS
GEO 295.2	**1.** Analysis of Variance: Objectives; One-way and Two-way ANOVA.	Total (T) =25	**Rabin Das**
	2. Fitting Second Degree Polynomial curves to bivariate geographical data and testing by ANOVA.		**Rabin Das**
	3. Multiple Regression: Linear multiple regression equation, Multiple and partial correlation coefficient.		**Rabin Das**
	4. Elementary multiple regression modeling techniques: Stepwise variable entry method, Path Analysis.		**Goutam Kumar Das**
	5. Model building techniques		**Goutam Kumar Das**
UNITS	**PAPER: 296: GEO 296.1: Principles of Remote Sensing and Aerial Photograph**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 296.1	1. Physics of Remote Sensing: Electro Magnetic Radiation (EMR), Radiation laws (wavelengthfrequency- energy relationship of EMR numerical problems).	Total (T) =25	**Goutam Kumar Das**
	2. Satellite System: Keplers's Laws, Major-Semi-major axis, eccentricity, velocity (Numerical problems).		**Goutam Kumar Das**
	3. Satellite Sensors: Concept of IFOV, resolution and determination of pixel size, referencing scheme of satellite system (path/row calculation).		**Goutam Kumar Das**
	4. Basics of Aerial Photograph: Basics geometry of aerial photograph, determination of scale and height, Distortions, Image parallax, Relief displacement.		**Goutam Kumar Das**
	5. Stereoscopy and Aerial Photo Interpretation: Stereoscopy,		**Goutam Kumar Das**

	Pseudoscopy, Mirror Stereoscope, mosaic, edge information, mapping of Physical and Cultural features with the Air photo interpretation keys: shape, size, pattern, tone, texture, shadow,site and associations.				
UNITS	**GEO 296.2: GEO 296.2: Computer Basics and Application**	**FULL MARKS**	**NAME OF THE TEACHERS**		
GEO 296.2	1. Computer components: Hardware and software: CPU, Input and Output devices; Common computer languages, System Software, Application Software and Operating Systems.	**Total (T) =25**	**Goutam Kumar Das**		
	2. Representation of data; Numbering Systems; Binary Arithmetic; Basic Logic Gates; Boolean Logic and Reduction Techniques.		**Rabin Das**		
	3. Computation, Storing and Formatting Spreadsheets: Computation of Rank, Mean, Median, Mode, Standard Deviation, Moving Averages, Sample Variation; Derivation of Correlation, Covariance and regression; Selection of technique and interpretation using MS-Excel and SPSS Environment.		**Rabin Das**		
	4. Regression, correlation, curve fitting, multivariate analysis.		**Mintu Jana**		
	5. Internet Surfing- generations of data and extraction of information for power-point presentation, Manipulation and editing of graphic files.		**Mintu Jana**		

Teaching Plan: Department of Geography: PG. SEMESTER-III (M.SC)					
UNITS	**PAPER: 301: GEO 301.1: Regional Approach in Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**Internal Examination**

GEO 301.1	1. Regional concept in geography: concept, typology, hierarchy, methods of regional delineation and regional system.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Mintu Jana**	**15.09.2021-20.01.2022**	**3rd Week of December, 2021**
	2. Contribution of Ratzel, Hartshorne, Hettner and Vidal de la Blache to the development of regional concept. The character of regional geography, Space: the fundamental stuff of geography.		**Susanta Ban**		
	3. Formal regions: Natural, Agro-climatic, socio-cultural regions with special reference to India.		**Susanta Ban**		
	4. Functional region: City region, industrial region with special reference to India.		**Mintu Jana**		
	5. Planning regions in India: Conceptual framework, Purpose, types and methods of delineating planning region.		**Mintu Jana**		
UNITS	**GEO 301.2: GEO 301.2: Rural Development**	**FULL MARKS**	**NAME OF THE TEACHERS**		
GEO 301.2	1. Concept and approach to rural development, Indicators of Development & Rural Development and their measurements.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Dr. Baikuntha Behari Josh**		
	2. Rural Economics: Agriculture Development and Land Reforms in India.		**Dr. Baikuntha Behari Josh**		
	3. Rural Micro-finance, self-help group and women empowerment.		**Dr. Baikuntha Behari Josh**		
	4. Rural Industries and entrepreneurship: Definition and meaning of rural industries. Relevance of rural industries in solving socio-economic problems with special reference to Food Processing and Tourism.		**Sumitra Rani Jana**		
	5. Rural Development Programmes: poverty alleviation schemes- National Rural Employment Guarantee Act, Jawahar Rozgar Yojana, Sampoorna Grameen Rozgar Yojana, Provisions of Urban Amenities in Rural Area (PURA); Infrastructural development programmes-		**Sumitra Rani Jana**		

	Indira Avas Yojana; Transport Development: Pradhan Mantri Gram Sadak Yojana.		
UNITS	**PAPER: 302: GEO 302.1: Settlement Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 302.1	**1.** Concept of shelter; Dwelling places as cultural expression.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Dr. Pijush Kanti Dandapath**
	2. Census categories of settlements; Types, building materials and architectural design of houses- dependence on climate.		**Dr. Debashis Manna**
	3. Site, situation and spacing of settlements- dependence on terrain characteristics and water availability.		**Dr. Debashis Manna**
	4. Concepts and components of rural and urban morphology.		**Suman Pahari**
	5. Socio-economic segregation of rural settlements. Cities as melting pot of culture.		**Suman Pahari**
UNITS	**PAPER: 302: GEO 302.2: Transport Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 302.2	1. Concept of distance, Transportation and space, space-time relation through transportation, Transport network analysis, Centrality, Accessibility, Connectivity and Rationality. Transport Models (Gravity Models, Allocation Model, Linear Programming Model, Traffic Congestion Model).	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Bikash Bhunia**
	2. Transport cost, Principles of transport cost fixation, comparative cost advantage.		**Bikash Bhunia**
	3. Planning for public transport, desired characteristics, modes and optimal pricing, services, ownership and regulation.		**Taniya Roy**
	4. Transport Policy: Problem oriented planning, and objective-led approach; Infrastructure, Management, Information, Pricing and landuse components;		**Taniya Roy**

	National transport policy (national highways, railways and waterways).		
	5. Communication Technology- roles in reducing transport demand.		**Taniya Roy**
UNITS	**PAPER: 303B : GEO 303B.1:Coastal Processes**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 303B.1	1. Definition of coastal zone, relevance of coastal study, classification of coast - Beach stage model.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Taniya Roy**
	2. Wave hydrodynamics; wave modification near coast with special reference to attenuation, breaker types, energy dissipation during breaking wave.		**Suman Pahari**
	3. Tide; diurnal and semi-diurnal, rotating and progressive tide, concept of live storage, tidal environment with special reference to estuary.		**Suman Pahari**
	4. Coastal current; intensity of long shore component and its implications, cell circulation.		**Taniya Roy**
	5. Macro land forms with special reference to beaches and dunes; micro and biogenic forms.		**Taniya Roy**
UNITS	**PAPER: 303B : GEO 303B.2: Coastal Environments: Focus on Indian Regions**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 303B.2	1. Tide dominated coastal environment: (Estuaries of India, estuary morphology, estuary hydrolodynamics); wave dominated coastal environments: (The shore face, beaches, barriers and human activity)- Indian experiences.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Taniya Roy**
	2. Morphodynamic behavior of coastal systems (Modification of coastal features in temporal and spatial scales with feedback mechanisms).		**Taniya Roy**
	3. Carbonate platforms and beach rocks (Andaman and Nicobar Islands).		**Suman Pahari**
	4. Coastal erosion problems (West Bengal, Orissa coasts), land reclamations and associated problems (Sundarban coastal tract).		**Suman Pahari**

	5. Techniques for assessing coastal hazards areas (Hazard zonation along the coasts).		**Suman Pahari**
UNITS	**PAPER: 303C: GEO 303C.1: Foundation of Urban Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 303C.1	1. Development of urban geography: Definition of Towns, cities and metropolitan area. Trends of Urbanisation in the World and India.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Mintu Jana**
	2. Concept and definitions of urban system: Urban, urbanization, urbanism and urban ecology, National urban system, National urbanisation policy.		**Mintu Jana**
	3. Today's cities and suburbs: suburban sprawl, smart growth, exurbs, the new cities and gated communities, gentrification, green city, Urban Livability Index.		**Mintu Jana**
	4. Origin and growth of urban living: bases and processes, Historical perspectives on world urbanization		**Mintu Jana**
	5. Urban planning, policies and regeneration: Architectural vision, European, Anglo American tradition and planning the social city, the new towns movement, toward planning for sustainable urban development.		**Mintu Jana**
UNITS	**PAPER: 303C: GEO 303C.2: Contemporary Urban Issues**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 303C.2	**1.** Changing spatial and temporal scenario of metropolitan development in India.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Rabin Das**
	2. The economy of urban areas: structure of urban economy-basic and non-basic activities.		**Rabin Das**
	3. Social environment of the city: Social stratification, social class diversity, suburban social class, poverty, strangers, crowding, crime and homelessness.		**Rabin Das**
	4. Urban environment problems: Heat island, drainage, sewerage, sanitation, solid waste, transport, pollution and health, the city's ecological footprint.		**Sumitra Rani Jana**

	5. Urban renewal and Urban redevelopment in India: Role of JNNURM, Smart city, AMRUT and Housing for All by 2022.		**Sumitra Rani Jana**
UNITS	**PAPER: 303D : GEO 303D.1: Physical Basis of Remote Sensing**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 303D.1	1. Physics of Remote Sensing: Source of Energy, Electro Magnetic Radiation (EMR), Radiation laws (wavelength-frequency-energy relationship of EMR), influence of atmosphere on Remote Sensing operation.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Bikash Bhunia**
	2. Fundamental of Thermal Remote Sensing: Radiant temperature, Kinetic temperature, Black body and real body radiation.		**Susanta Ban**
	3. Satellite orbits and Trajectories: Principles of satellite movements, orbits and trajectory, orbiting satellites-basic principles, orbital parameters, types of satellites.		**Goutam Kumar Das**
	4. Satellite Platforms and Sensors: Types of platform for civilian applications, advantages, disadvantages and characteristics of various satellite platforms. Physical principles and characteristics of various satellites sensor, sensor selection parameters, resolution.		**Bikash Bhunia**
	5. Remote Sensing Data: Data acquisition and reception, Data products, storage and Dissemination.		**Susanta Ban**
UNITS	**PAPER: 303D : GEO 303D.2: Photogrammetry, Aerial Photo and Satellite System**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 303D.2	1. Basics of Aerial Photograph: Types of aerial photographs, Geometry of single Aerial Photograph, Photographic overlap, flight planning, Scale, Lens Distortions, Relief distortions and Tilt distortions. Image displacement and parallax.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Goutam Kumar Das**
	2. Aerial Photographic Film: Film density and Characteristics Curve, Colour Infrared Films, Film resolution, Filters.		**Bikash Bhunia**

	3. Photogrammetry: Development of Photogrammetry, Classification, processes and Limitations of photogrammetry.		**Susanta Ban**
	4. Stereo photogrammetry: Conditions for Stereo vision, stereoscopic measurements, Sterescopic 3D viewing, Image parallax, Rectification, Orthorectification.		**Goutam Kumar Das**
	5. Satellite Systems: Whiskbroom system, Pushbroom system, Microwave system, coarse resolution, fine resolution and very fine resolution system.		**Goutam Kumar Das**
UNITS	**PAPER: 304: C-GEO 304.1: Emerging Issues and Policies on Environment**	**FULL MARKS**	**NAME OF THE TEACHERS**
C-GEO 304.1	1. Global climate change, water scarcity and politics of water.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Sumitra Rani Jana**
	2. Environmental degradation and pollution.		**Pranati Manna**
	3. Environment and development: Debate and Issues.		**Susmita Maiti**
	4. Social and Cultural Hazards.		**Sikha Kar**
	5. Globalization and Environment.		**Dr. Debashis Manna**
C-GEO 304.2	**PAPER: 304: C-GEO 304.2: Environmental Hazards and Disaster Management**	**FULL MARKS**	**NAME OF THE TEACHERS**
	1. Concepts and techniques for analysis of risk, hazard, disaster, vulnerabilities and resilience.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Susanta Ban**
	2. Cyclone and storm surges, thunderstorms and lighting, earthquake, tsunami wave and landslide hazards.		**Bikash Bhunia**
	3. Natural hazard and disaster management in India, Agricultural drought hazard and the national experience.		**Mintu Jana**
	4. International Disaster Response Laws Rules (IDRL).		**Taniya Roy**
	5. National policy and appraisal of hazard		**Goutam Kumar Das**
UNITS	**PAPER: 395: Geo 395. 1: Applications of Remote Sensing &Geographic**	**FULL MARKS**	**NAME OF THE TEACHERS**

	Information System		
GEO 395. 1	1. Geo-referencing of maps and satellite images.	**Total (T) =25**	**Goutam Kumar Das**
	2. Preparation of different types of FCC. Image enhancement, Band rationing, Density slicing..		**Goutam Kumar Das**
	3. Supervised and Unsupervised Classification Techniques, generation of signature statistics and 4. signature reparability reports. Generation of NDVI.		**Goutam Kumar Das**
	5. GIS: RS		**Goutam Kumar Das**
	6. Map layers: Overlay analysis		**Goutam Kumar Das**
UNITS	**PAPER: 395: Geo 395.2: Research Methodology**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 395.2	**1.** Research ethics and paradigm shift of research methodology in Geography.	**Total (T) =25**	**Rabin Das**
	2. Need for research, basic research types.		**Rabin Das**
	3. Identification of research problems, development of theoretical background- literature review, research gap and research question and specification of the objectives of study; hypothesis building, Framework of research writing.		**Rabin Das**
	4. Methods of data collection- primary and secondary; Preparation of questionnaire and survey schedule and their differences, research ethics.		**Rabin Das**
	5. Methods of writing notes, style of referencing, bibliography and appendices, abstract and synopsis writing.		**Rabin Das**

UNITS	PAPER: 396B : GEO 396B.1: Field Work (Coastal Management)	FULL MARKS	NAME OF THE TEACHERS
GEO 396B.1	1. Studies on the shore profile forms and channel cross sections using echo-sounder and current meter. Littoral environment observation with special reference hydrological parameters: Waves, tides, winds and currents.	Total (T) =25	Taniya Roy
	2. Coastal sediment budget analysis.		Taniya Roy
	3. Analysis of population pressure on the coastal zones.		Suman Pahari
	4. Analysis of coastal ecosystem diversity using remote sensing.		Suman Pahari
	5. Hazard mapping and community vulnerability mapping Mapping CRZ violation areas using GPS handset, Nearshore geomorphological mapping with conventional surveying equipments or with Total Station. Mapping of the forms of coastline changes		Suman Pahari
UNITS	**PAPER: 396B : GEO 396B.2: Field Report (Coastal Management)**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 396B.2	1. Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47.		Taniya Roy & Suman Pahari
UNITS	**PAPER: 396C : GEO 396C.1: Field Work (Urban Geography)**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 396C.1	1. Wardwise landuse/land cover survey using high resolution Remote Sensing data. Wardwise distribution of population and its change over time.	Total (T) =25	Rabin Das
	2. Survey of spatial distribution of urban facilities (Bank, School, College, Offices, Hospitals etc.), urban transport: Nodes, Network and flow: Collection of database (Primary and Secondary), Water supply system: waste collection and disposal system.		Rabin Das

	3. Study of Urban sprawling, renewal, economics, environmental problems etc.: Collection of database (Primary and Secondary).		**Rabin Das**
	4. Income/Social grouping, Ethnic groups Education; Occupation; Age-sex Composition etc.		**Rabin Das**
	5. Enquiries on future prospects and planning strategies		**Rabin Das**
UNITS	**PAPER: 396C: GEO 396C.2: Field Report (Urban Geography)**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 396C.2	1. Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47	**Total (T) =25**	**Rabin Das & Mintu Jana**
UNITS	**PAPER: 396D: GEO 396D.1: Field Work (Remote Sensing)**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 396D.1	1. Remote Sensing in Earth Sciences: Geomorphic Mapping; Visual interpretation of landforms; Basic Concepts, Recognition elements, interpretation of drainage pattern, erosion and deposition landforms.	**Total (T) =25**	**Susanta Ban**
	2. Remote Sensing in Agricultural Applications: Soil Mapping, Crop Mapping/ Crop stress determination. Forest Management-Forest density mapping, Forest type mapping.		**Goutam Kumar Das**
	3. Remote Sensing in Land and Water Management: Landuse/ Land cover Planning, Land resource management; Water Resources: Surface water-ground water, water deciphering, quality inventory and monitoring, quality assessment; Watershed Management: Morphometric Analysis, Hydro-morphogeologic interpretation techniques for targeting ground water potential zones in alluvial, sedimentary and hard rock areas; flood assessment and watershed management.		**Bikash Bhunia**
	4. Remote Sensing in Urban and Rural Development: Mapping of human habitation and type.		**Goutam Kumar Das**

	5. Remote Sensing in Coastal Management: Coastal Landuse, Spatial and temporal changes, SST, Phytoplankton assessment, Sediment assessment.		**Bikash Bhunia**		
UNITS	**PAPER: 396D : GEO 396D.2: Field Report(Remote Sensing)**	**FULL MARKS**	**NAME OF THE TEACHERS**		
GEO 396D.2	1. Generation of report (within about 100 A4 size pages including 30-40 maps/diagrams/field photographs) on the basis of field works carried out under Unit-47.	**Total (T) =25**	**Bikash Bhunia, Goutam Kumar Das & Susanta Ban**		

Teaching Plan: Department of Geography: PG. Semester-IV (M.Sc.)

UNITS	**PAPER: 401: GEO 401.1: Schools in Geographical Thought**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**Internal Examination**
GEO 401.1	1. The Field of Geography, Place of Geography in classification of knowledge and other disciplines, Geography as a social science, Physical and Human Geography. Linkages among the sub-disciplines of physical and human geography.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Bikash Bhunia**	**07.02.2022-11.07.2022**	**2nd Week of June, 2021**
	2. Development of Geography in 19th Century: Contribution of German, French, British and American schools of thought.		**Bikash Bhunia**		
	3. Conceptual and methodological development in 20th Century: changing paradigms, evolution of man-nature relation.		**Bikash Bhunia**		
	4. Typology of models and uses: structure component and characters.		**Susanta Ban**		
	5. Dualism and dichotomies in Geography: Determinism and Possibilism, Systematic and Regional, Aerial differentiation and Spatial organization.		**Susanta Ban**		
UNITS	**PAPER: 401: GEO 401.2: Contemporary Discourses in Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**		
	1. Pragmatism, Positivism and Quantitative revolution in geography	**Total (T) =25**	**Taniya Roy**		

GEO 401.2	2. Development of critical social theories: Humanistic geography, Behaviouralism, Radicalism, Welfare geography, Feminist geography	**Theory=20 Internal Assessment (IA) =05**	**Sumitra Rani Jana**
	3. Structuralism and Post-structuralism, Modernism and Postmodernism.		**Taniya Roy**
	4. Concept of space: absolute, relative, material and social space, concept of 3rd space in geography, temporal geography, time-space prism		**Sumitra Rani Jana**
	5. Recent trends in geography.		**Taniya Roy**
UNITS	**PAPER: 402: GEO 402.1: Political Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 402.1	1. Politics and Geography: Politics of Space, Scope of electoral geography, Global strategic views- Heartland and Rimland theories and their significance in present international politics.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Mintu Jana**
	2. Geopolitical significance of core-periphery theory; Nationalism and Regionalism.		**Mintu Jana**
	3. Geography and federalism; Reorganization of Indian states since independence, Partition of India and its consequences		**Mintu Jana**
	4. International and interstate water disputes in India.		**Mintu Jana**
	5. Political and economic blocs; Geopolitics in the context of globalization, colonialism and post colonialism.		**Mintu Jana**
UNITS	**PAPER: 402: GEO 402.2: Geography of Globalization**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 402.2	1. Transformed Geography: Concept of Liberalization, Privatization and Globalization (LPG), beginning of the globalization, globalization to glocalilisation.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Dr. Debashis Manna**
	2. Globalization and Economic Geography: Impact of globalization on agriculture, industry and trade.		**Dr. Baikunta Behari Josh**
	3. World economic order: Economic booms and crisis.		**Dr. Debashis Manna**

	4. Globalization and cultural changes: Globalization and cultural transformations.		**Dr. Baikunta Behari Josh**
	5. Future of globalization and global challenges: Issues and recent trends.		**Dr. Baikunta Behari Josh**
UNITS	**PAPER: 403: GEO 403.1: Social and Cultural Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 403.1	1. Nature, scope and content of social Geography; Ethnicity, tribe, dialect, language, caste and religion.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Pijush Kanti Dandapath**
	2. Social structure and processes, social exclusion, geographies of social well-being with special reference to India.		**Susanta Ban**
	3. Cultural Geography: Definition, scope and nature. Race, religion, language as cultural attributes with special reference to India, North-South, social -cultural divide.		**Pijush Kanti Dandapath**
	4. World cultural Realms, Morphology of cultural landscape (Carl O Sauer) and cultural diversity. Cities as melting pot of culture. Traditional folk culture-crisis and transformation		**Susanta Ban**
	5. Cultural processes: Diffusion, acculturation, assimilation and cultural pluralism		**Susanta Ban**
UNITS	**PAPER: 403: GEO 403.2: Regional Planning**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 403.2	1. Concept of planning: Levels of planning: Types of planning	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Rabin Das**
	2. Basic principles and methodology of regional planning		**Rabin Das**
	3. Regional planning strategies: Centralized, decentralized and multilevel planning for rural and urban areas, people's participation in planning-Panchayati Raj Institution.		**Suman Pahari**

	4. Regional disparities: Concept, Types; Demographic, social and economic disparities in India.		**Suman Pahari**
	5. Planning of problem regions: Tribal, coastal, drought prone area, flood prone area.		**Rabin Das**
UNITS	**PAPER: 404B : GEO 404B.1: Coastal Ecology and Hazards**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 404B.1	**1.** Study and management of- Sea weeds; seaweed ecosystem, artificial seaweeds.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Taniya Roy**
	2. Dune vegetation: Dune initiating and dune building types, adaptation and reproduction, plantanimal interaction in sand dune. Mangroves: physical environment and ecology.		**Taniya Roy**
	3. Coastal hazards and their management: Sea level change- long and short term changes, regional and global effects on shore; Coastal erosion- causes and effects; Storm hazard- role in sediment transfer, effects on open and estuarine coast, management of storm hazard.		**Taniya Roy**
	4. Techniques of monitoring coastal processes and land forms.		**Suman Pahari**
	5. Coastal studies in India: Monitoring and research.		**Suman Pahari**
UNITS	**PAPER: 404B: GEO 404B.2: Coastal Issues and Management**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 404B.2	1. Coral bleaching: Impact of Global warming, coastal eutrophication and habitat conservation (Coastal lagoons, other coastal wetlands)	**Total (T) =25 Theory=20**	**Taniya Roy**
	2. Coastal tourism and environment conflicts (Beaches and barrier coasts, mangrove dominated coasts, coral coasts, environmental regulations).		**Taniya Roy**

	3. Application of remote sensing and GIS techniques in coastal management (Geomorphological mapping, coastal cell circulation systems, environmental zoning approach, identification and diversity of coastal habitats)	**Internal Assessment (IA) =05**	**Taniya Roy**
	4. Managing coastal change: Assessment of coastal vulnerability, ecosystem valuation of coast, integrated coastal zone management, coastal regulations); Coastal engineering: Developments in hard structure designs, developments in soft structure designs, new dredging techniques and procedures.		**Suman Pahari**
	5. Coastal urbanization and population pressures, Coastal resource management.		**Suman Pahari**
UNITS	**PAPER: 404C: GEO 404C.1: Theoretical Bases of Regional Planning**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 404C.1	1. History of regional planning in India, theories of regional planning. Concept of balanced and unbalanced growth	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Rabin Das**
	2. Regional development perspectives: Colonial period (Dependency theories- Friedman, Andre Gander Frank, David Slater)		**Rabin Das**
	3. Growth Pole theories and the developing world by Perroux, Myrdal, Hirschman, and Boudiville.		**Rabin Das**
	4. Agropolitan Development, Basic need approach (E.A.J Johnson, Dennis Rondinelli-USAID)		**Rabin Das**
	5. Regional Environmental issues in Purba and Paschim Medinipur Districts- Flood, Drought, coastal erosion, Salinization, Deprivation and related social conflicts, conflict in forest society interface.		**Rabin Das**
UNITS	**PAPER: 404C: GEO 404C.2: Planning for Urban Development**	**FULL MARKS**	**NAME OF THE TEACHERS**
	1. Concept of developed and underdeveloped economy, Intra- and Inter-regional planning. Policies of Urban planning and development.	**Total (T) =25 Theory=20**	**Mintu Jana**

GEO 404C.2	2. Urban infrastructure planning: Sanitation and Water supply systems, Waste Water disposal systems, Solid waste collection and disposal.	**Internal Assessment (IA) =05**	**Mintu Jana**
	3. Urban traffic and transportation planning.		**Mintu Jana**
	4. Planning for Urban housing: concepts of land use and land valuation, Needs and types of housing; Housing Policy and programmes in India; Real estate development.		**Mintu Jana**
	5. Application of Remote Sensing and GIS in urban planning and management.		**Mintu Jana**
UNITS	**PAPER: 404D: GEO 404D.1: Advanced Remote Sensing**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 404D.1	**1.** Thermal Remote Sensing: Concept, Sensors and Utility.	**Total (T) =25 Theory=20 Internal Assessment (IA) =05**	**Susanta Ban**
	2. Microwave Remote Sensing:Concept, Comparison with optical system, advantages and disadvantages, spatial resolution, Real and Synthetic Aperture Radar, Passive Microwave Remote Sensing, Lidar.		**Susanta Ban**
	3. Hyperspectral Remote Sensing: Concept, Sensors and utility.		**Goutam Kumar Das**
	4. Visual Image Processing& Digital image interpretation: Elements of Visual image interpretation, generation of thematic maps, information extraction.		**Bikash Bhunia**
	5. Digital Image Processing: Pre-processing, Image Registration, Image geometric operations, Enhancement, Spatial filtering, Transformation, classification, data compression, spectral pattern recognition, output generation.		**Goutam Kumar Das**
UNITS	**PAPER: 404D: GEO 404D.2: Advanced GIS and Applications of Remote Sensing**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 404D.2	1. Advanced GIS: Spatial data model, Data entry, data analysis, Data models. Data sources, Data captures, attribute data management and Meta data concept.	**Total (T) =25 Theory=20**	**Goutam Kumar Das**

	2. Data Infrastructure: Spatial Data Infrastructure: NSDI.	**Internal Assessment (IA) =05**	**Goutam Kumar Das**
	3. Modern trend in GIS: Local to Global concept in GIS, Integration of GIS and Multimedia, 3D GIS and Web GIS, Real time GIS, Mobile GIS, Collaborative GIS, concept and application of GPS and GNSS.		**Goutam Kumar Das**
	4. Integration of Remote sensing and GIS: Concept and importance of Remote Sensing and GIS integration in Geographical studies.		**Goutam Kumar Das**
	5. Applications of Remote Sensing and GIS: Landuse/land covers mapping, soil and agricultural mapping, geomorphological mapping, watershed mapping.		**Goutam Kumar Das**
UNITS	**PAPER: 495: GEO 495.1: Spatial Analysis in Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 495.1	1. Transport network analysis: Centrality Indices, Shortest path analysis(Transport and allocation problems), Detour and spread.	**Total (T) =25**	**Taniya Roy**
	2. Distance Matrix (Aggregate Travel Distance).		**Taniya Roy**
	3. Point spatial distribution analysis: Uniformity, randomness and compactness.		**Taniya Roy**
	4. Analysis of Directional Data; Rose diagram, Dominant Direction, Mean direction.		**Taniya Roy**
	5. Analysis of Shape: Measures based on axial ratios, perimeters to areas, areas to axial length.		**Taniya Roy**
UNITS	**PAPER: 495: GEO 495.2: Research Exercise in Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 495.2	1. Field work on a specific environmental issue and generation of report (within about 50 A4 size pages including 15-20 maps/diagrams/field photographs).	**Total (T) =25**	**All Teachers**

UNITS	PAPER: 496: GEO 496.1: Map Transformation and Geodesy	FULL MARKS	NAME OF THE TEACHERS
GEO 496.1	1. Map transformation: Scale factor; distortion types; systems of map projections; principles of choosing map projection; importance of map projection in GIS.	Total (T) =25	**Goutam Kumar Das**
	2. Principle, construction, properties and uses of following map projections: a) Conformal Projections- Mercator's Projection; Transverse Mercator Projection and Lambert's Conformal Conic (LCC) Projection.		**Goutam Kumar Das**
	3. Principle, construction, properties and uses of following map projections b) Equal Area Projection- Mollweide's Projection. c) Conical Projection- Simple Conical Projection with Two Standard Parallels.		**Bikash Bhunia**
	4. Geodesy: Scope and application; concept of Geoid, reference ellipsoid and spheroid- WGS84, Everest Spheroid.		**Bikash Bhunia**
	5. Coordinate Systems: Cartesian, Rectangular, Spherical, Curvilinear, Spherical, UTM Grid System.		**Bikash Bhunia**
UNITS	**PAPER: 496: GEO 496.2: Geographical Information System(GIS)**	**FULL MARKS**	**NAME OF THE TEACHERS**
GEO 496.2	1. Basic Concepts and components in GIS: An overview of the development of the GIS fields, Data Sources; Data acquisition methods	Total (T) =25	**Goutam Kumar Das**
	2. Data structure: Vector and Raster data structures, data storage.		**Goutam Kumar Das**
	3. Modern trends in GIS: 3D GIS and Web GIS, Real time GIS, Mobile GIS and application of GIS		**Goutam Kumar Das**
	4. Basics of GPS Surveying: Conceptual Framework, Space Segment, Ground Segment, Control Segment, Satellite Triangulation, Pseudo Random Code. DGPS and GNSS		**Goutam Kumar Das**

	5. GPS-aided traversing; Manual and Computer plotting for preparation of maps.		**Goutam Kumar Das**		

Teaching Plan: Department of Geography: UG. SEMESTER-I(HONOURS)

UNITS	PAPER: CC1: C1T: Unit-I: Geotectonics	FULL MARKS	NAME OF THE TEACHERS	MONTHS OF TEACHING	REMARKS
I	1. Earth's tectonic and structural evolution with reference to geological time scale	Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05	Suman Pahari	01.10.2021-24.02.2022	1st Internal Assessment: 4th Week of December,2022
	2. Earth's interior with special reference to seismology. Isostasy: Models of Airy and Pratt		Suman Pahari		
	3. Plate Tectonics: Processes at constructive, conservative, destructive margins and hotspots; resulting landforms		Rabin Das		
	4. Folds and Faults—origin and types		Dr. Debashis Manna		
UNITS	**PAPER: CC1: C1T: Unit-II: Geomorphology**		**NAME OF THE TEACHERS**		2nd Internal Assessment: 2nd Week of March,2022
II	1. Degradational processes: Weathering, mass wasting and resultant landforms		Susmita Maiti		
	2. Processes of entrainment, transportation and deposition by different geomorphic agents. Role of humans in landform development.		Taniya Roy		
	3. Development of river network and landforms on uniclinal and folded structures		Susanta Ban		
	4. Landforms on igneous rocks with special reference to Granite and Basalt		Dr. Baikuntha Behari Josh		

	5. Karst landforms: Surface and sub-surface. Coastal processes and landforms		**Pranati Manna**
	6. Glacial and fluvio-glacial processes and landforms; fluvio-glacial landforms		**Mintu Jana**
	7. Aeolian and fluvio-aeolian processes and landforms; fluvio-aeolian processes		**Sikha Kar**
	8. Models on landscape evolution: Views of Davis, Penck, King and Hack		**Susanta Ban**
UNITS	**PAPER: CC2: C2T: Cartographic Techniques**	**FULL MARKS**	**NAME OF THE TEACHERS**
C2T	**1.** Maps: Classification and types. Components of a map	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10 Class Attendance (CA)=05**	**Goutam Kumar Das**
	2. Concept and application of scales: Plain, comparative, diagonal and vernier		**Rabin Das**
	3. Coordinate systems: Polar and rectangular. Concept of geoid and spheroid		**Bikash Bhunia**
	4. Concept of generating globe. Grids: angular and linear systems of measurement		**Bikash Bhunia**
	5. Bearing: Magnetic and true, whole-circle and reduced		**Suman Pahari**
	6. Map projections: Classification, properties and uses. Concept and significance of UTM projection		**Bikash Bhunia**
	7. Basic concepts of surveying and survey equipment: Prismatic compass, dumpy level, theodolite, Abney level, clinometer		**Taniya Roy**

	8. Survey of India topographical maps: Reference scheme of old and open series. Information on the margin of maps		**Dr. Pijush Kanti Dandapath**
UNITS	**PAPER: CC2: C2P: Cartographic Techniques-Lab.**		**NAME OF THE TEACHERS**
C2P	1. Graphical construction of scales: Plain, comparative, diagonal and vernier		**Rabin Das**
	2. Construction of projections: Polar Zenithal Stereographic, Simple conic with two standard parallels, Bonne's, Cylindrical Equal Area, and Mercator's.		**Bikash Bhunia**
	3. Delineation of drainage basin from Survey of India topographical map. Construction and interpretation of relief profiles (superimposed, projected and composite), relative relief map, slope map (Wentworth), and stream ordering (Strahler) on a drainage basin.		**Dr. Pijush Kanti Dandapath**
	4. Correlation between physical and cultural features from Survey of India topographical maps. using transect chart		**Sumitra Rani Jana**
UNITS	**PAPER: GE-1: GE-1T Disaster Management**	**FULL MARKS**	**NAME OF THE TEACHERS**
GE-1T	1. Definition and Concepts of Hazards and Disasters; Risk and Vulnerability; Classification of hazards	**Total (T) =75 Theory=60 Internal Assessment (IA) =10**	**Sumitra Rani Jana**
	2. Causes and consequences of hazards: Physical, economic and cultural		**Dr. Baikuntha Behari Josh**
	3. Role of National and International organizations in disaster management.		**Suman Pahari**

	4. Causes, Impact, Distribution and Mapping of: Earthquake and Tsunami, Landslides	**Claaa Attendance (CA)=05**	**Susmita Maiti**		
	5. Causes, Impact, Distribution and Mapping of: Flood and drought		**Pranati Manna**		
	6. Causes, Impact, Distribution and Mapping: Soil erosion, accidental release of toxic chemicals		**Sikha Kar**		
	7. Response and Mitigation to Disasters: Institutional set up, NDMA and NIDM		**Mintu Jana**		
	8. Indigenous Knowledge and Community-Based Disaster Management; Do's and Don'ts During and Post Disasters		**Mintu Jana**		
	9. Emerging approaches to Disaster management: (a) Pre-disaster stage Preparedness- hazard zonation maps-predictability and forecasting warning, land use zoning, Information, Education & Communication (IEC) Disaster resistance house construction, Population reduction in vulnerable area and awareness. (b) Emergency Stage- Rescue training for search and operation at national and regional level, ground management plan preparation, immediate relief, Assessment surveys. (c) Post disaster stage rehabilitation – Political administrative aspects, social aspect, economic aspect, cultural aspect and environmental aspects.		**Susanta Ban & Bikash Bhunia**		
	10. Regional perspectives of hazards in India with reference to dimension, causes, consequences and remedial measures: (a) Hills/ coasts, (b) Terrorism		**Taniya Roy**		
	11. National and international policies for disaster management.		**Suman Pahari**		
	12. Role of geospatial technology (RS, GNSS and GIS) in disaster management		**Goutam Kumar Das**		

Teaching Plan: Department of Geography: UG. SEMESTER-II(HONOURS)					
UNITS	**PAPER: CC3: Human Geography: C3T-I: Nature and Principles**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**

I	1. Nature and scope and recent trends. Elements of Human Geography		**Dr. Debashis Manna**		
	2. Approaches to the study of Human Geography; Resource, Locational, Landscape,Environmental		**Mintu Jana**		
	3. Evolution of humans. Concept of race and ethnicity		**Susanta Ban**		
	4. Space, society and cultural regions (language and religion)		**Susanta Ban**		
UNITS	**PAPER: CC3: Human Geography : C3T-II: Society, Demography & Ekistics**		**NAME OF THE TEACHERS**		
II	1. Evolution of human societies: Hunting and food gathering, pastoral nomadism,subsistence farming, industrial and urban societies	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Taniya Roy**	**01.04.2022-09.07.2022**	**1st Internal Assessment: 2nd Week of May, 2022**
	2. Human adaptation to environment: Eskimo, Masai, Jarwa, Gaddi, Santhals.		**Pranati Manna**		
	3. Population growth anddistribution, population composition; demographic transition model		**Susmita Maiti**		
	4. Population–Resource regions (Ackerman)		**Dr. Baikuntha Behari Josh**		**2nd Internal Assessment: 2nd Week of July,2022**
	5. Human population and environment with special reference to development–environment conflict		**Dr. Baikuntha Behari Josh**		
	6. Social morphology and rural house types in India		**Sikha Kar**		
	7. Types and patterns of rural settlements		**Sikha Kar**		
	8. Types and patterns of urban settlements		**Dr. Debashis Manna**		
UNITS	**PAPER: CC-4: Cartograms & Thematic Mapping: C4T: Cartograms & Thematic Mapping**	**FULL MARKS**	**NAME OF THE TEACHERS**		
I	1. Concepts of rounding, scientific notation, logarithm and anti-logarithm, natural andlog scales	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10**	**Rabin Das**		
	2. Diagrammatic representation of data: Line, Bar, and Circle		**Suman Pahari**		
	3. Representation of point data: Isopleths.		**Sumitra Rani Jana**		
	4. Representation of area data: Dots, proportional circles and choropleth		**Bikash Bhunia**		

	5. Preparation and interpretation of large scale thematic maps: Geomorphological maps	**Claaa Attendance (CA)=05**	**Dr. Pijush Kanti Dandapath**
	6. Preparation and interpretation of large scale thematic maps: Climatological maps		**Suman Pahari**
	7. Preparation and interpretation of large scale thematic maps: Landuse landcovermaps		**Goutam Kumar Das**
	8. Preparation and interpretation of large scale thematic maps: Socio-economic maps		**Goutam Kumar Das**
UNITS	**C4P: Cartography Lab.**		**NAME OF THE TEACHERS**
II	1. Traverse survey using Prismatic Compass		**Rabin Das**
	2. Levelling by Dumpy Level and Prismatic Compass		**Mintu Jana**
	3. Thematic maps: Proportional squares, pie diagrams with proportional circles, dotsand spheres		**Suman Pahari & Bikash Bhunia**
	4. Thematic maps: Choropleth, isoline map, chorochromatic map		**Sumitra Rani Jana & Bikash Bhunia**
UNITS	**PAPER: GE-2: Geospatial Technology: GE2T: Geospatial Technology**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Components, scope and historical development of geospatial technology	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Goutam Kumar Das**
	2. Concepts of spheroid, ellipsoid and projection systems. Significance of WGS 84and UTM		**Bikash Bhunia**
	3. Data types and structures in spatial technology.		**Goutam Kumar Das**
	4. Principles of land-based surveying with reference to auto level and total station		**Goutam Kumar Das**
	5. Classification of Remote Sensing platforms, sensors and resolution. IRS(Resourcesat and Cartosat) and Landsat systems.		**Bikash Bhunia**
	6. Principles of georeferencing of maps and images		**Bikash Bhunia**

	7. Image enhancement, band combination and rationing. Vegetation indices.		**Goutam Kumar Das**		
	8. Image classification and preparation of thematic maps. Raster to vector conversion.		**Bikash Bhunia**		
	9. Sources, preparation and manipulation of GIS data. Spatial modelling and overlayanalysis.		**Susanta Ban**		
	10. GNSS: Principles of satellite positioning and navigation. Collection of waypointsand exporting to GIS		**Susanta Ban**		
	11. Principles of preparing DEMs from optical and RADAR sensors with reference toCartoDEM and SRTM data		**Susanta Ban**		
	12. Integration of different components of spatial technology. Development of web-based spatial platforms with reference to Bhuvan and Google Earth / Google Map		**Susanta Ban**		
Teaching Plan: Department of Geography: UG. SEMESTER-III (HONOURS)					
UNITS	**PAPER: CC-5: Climatology: CC5T-I: Elements of the Atmosphere**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**
I	**1.** Nature, composition and layering of the atmosphere	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Susmita Maiti**	**01.10.2021-05.02.2022**	**1st Internal Assessment: 4th Week of November, 2021**
	2. Isolation: controlling factors. Heat budget of the atmosphere		**Goutam Kumar Das**		
	3. Temperature: horizontal and vertical distribution. Inversion of temperature: types, causes and consequences		**Susanta Ban**		
	4. Greenhouse effect and importance of ozone layer		**Susmita Maiti**		
UNITS	**PAPER: CC-5: Climatology : CC5T-II: Atmospheric Phenomena & Climatic Classification**		**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**2nd Internal Assessment: 1st Week of January, 2022**
II	**1.** Condensation: Process and forms. Mechanism of precipitation: Bergeron-Findeisen theory, collision and coalescence. Forms of precipitation		**Sumitra Rani Jana**	**01.10.2021-05.02.2022**	
	2. Air mass: Typology, origin, characteristics and modification		**Mintu Jana**		

	3. Fronts: warm and cold; frontogenesis and frontolysis		**Mintu Jana**
	4. Weather: stability and instability; barotropic and baroclinic conditions		**Mintu Jana**
	5. Circulation in the atmosphere: Planetary winds, jet stream, index cycle		**Mintu Jana**
	6. Tropical and mid-latitude cyclones		**Pranati Manna**
	7. Monsoon circulation and mechanism with reference to India		**Bikash Bhunia**
	8. Climatic classification after Köppen, Thornthwaite and Oliver		**Sumitra Rani Jana**
UNITS	**PAPER: CC-6: Statistical Methods in Geography: C6T-I: Data Collection, Sampling, Tabulation, Frequency Distribution & Probability**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Importance and significance of Statistics in Geography. Discrete and continuous data, population and samples, scales of measurement (nominal, ordinal, interval and ratio), sources of data	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Bikash Bhunia**
	2. Collection of data and formation of statistical tables		**Rabin Das**
	3. Sampling: Need, types, and significance and methods of random sampling		**Rabin Das**
	4. Theoretical distribution: frequency, cumulative frequency, normal and probability		**Bikash Bhunia**

UNITS	PAPER: CC-6: Statistical Methods in Geography : C6T-II: Central Tendency, Measures of Dispersion, Correlation, Regression & Time Series Analysis		NAME OF THE TEACHERS
II	1. Central tendency: Mean, median, mode, partition values		**Bikash Bhunia**
	2. Measures of dispersion range, mean deviation, standard deviation, coefficient of variation		**Rabin Das**
	3. Association and correlation: Rank correlation, product moment correlation		**Rabin Das**
	4. Regression (linear and non-linear) and time series analysis (moving average)		**Bikash Bhunia**
UNITS	**PAPER: CC-6: Statistical Methods in Geography: C6P: Statistical Methods in Geography Lab.**		**NAME OF THE TEACHERS**
	1. Construction of data matrix with each row representing an aerial unit (districts / blocks / *mouzas* / towns) and corresponding columns of relevant attributes.		**Rabin Das**
	2. Based on the above, a frequency table, measures of central tendency and dispersion would be computed and interpreted		**Rabin Das**
	3. Histograms and frequency curve would be prepared on the dataset.		**Rabin Das**
	4. From the data matrix a sample set (20%) would be drawn using, random, systematic and stratified		**Rabin Das**

	methods of sampling and locate the samples on a map with a short note on methods used.		
	5. Based on of the sample set and using two relevant attributes, a scatter diagram and regression line would be plotted and residual from regression would be mapped with a short interpretation.		**Rabin Das**
UNITS	**PAPER: CC-7: Geography of India: C7T-I: Geography of India**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Tectonic and stratigraphic provinces, physiographic divisions	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Bikash Bhunia**
	2. Climate, soil and vegetation: Characteristics and classification		**Susmita Maiti**
	3. Population: Distribution, growth, structure and policy		**Dr. Debashis Manna**
	4. Distribution of population by race, caste, religion, language, tribes and their correlates		**Sikha Kar**
	5. Agricultural regions. Green revolution and its consequences		**Sikha Kar**
	6. Mineral and power resources distribution and utilization of iron ore, coal, petroleum, gas;		**Sikha Kar**
	7. Industrial development: Automobile and information technology		**Mintu Jana**

	8. Regionalization of India: Physiographic (R. L. Singh), Socio-cultural (Sopher) and Economic (Sengupta)		**Dr. Baikuntha Behari Josh**		
UNITS	**PAPER: CC-7: Geography of India : C7T-II: Geography of West Bengal**		**NAME OF THE TEACHERS**		
II	1. Physical perspectives: Physiographic divisions, forest and water resources		**Bikash Bhunia**		
	2. Population: Growth, distribution and human development		**Dr. Pijush Kanti Dandapath**		
	3. Resources: Mining, agriculture and industries		**Pranati Manna**		
	4. Regional Problem: Darjeeling Hills, Jangalmahal and Sundarban **5.**		**Pranati Manna**		
UNITS	**PAPER: SEC-1: Coastal Management: SEC1T: Coastal Management**	**FULL MARKS**	**NAME OF THE TEACHERS**		
I	1. Components of a coastal zone. Coastal morphodynamic variables and their role in evolution of coastal forms.	**Total (T) =50 Theory=40 Internal Assessment (IA) =05 Claaa Attendance (CA)=05**	**Taniya Roy**		
	2. Environmental impacts and management of mining, oil exploration, salt manufacturing, land reclamation and tourism.		**Suman Pahari**		
	3. Coastal hazards and their management using structural and non-structural measures: Erosion, flood, sand encroachment, dune degeneration, estuarine sedimentation and pollution		**Taniya Roy**		
	4. Principles of Coastal Zone Management. Exclusive Economic Zone and Coastal Regulation Zones with reference to India.		**Suman Pahari**		

UNITS	PAPER: GE-3: Rural Development: GE3T: Rural Development	FULL MARKS	NAME OF THE TEACHERS	MONTHS OF TEACHING	REMARKS
	1. Defining Development: Inter-Dependence of Urban and Rural Sectors of the Economy	Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05	**Susmita Maiti**	**01.10.2021-05.02.2022**	**1st Internal Assessment: 4th Week of November, 2021** **2nd Internal Assessment: 1st Week of January, 2022**
	2. Paradigms of Rural Development: Lewis Model of Economic Development, 'Big Push' theory of Development, Myrdal's thesis of 'Spread and Backwash Effects'		**Mintu Jana**		
	3. 3.Need for Rural Development, Gandhian Approach to Rural Development		**Dr. Debashis Manna**		
	4. 4.Rural Economic Base: Agriculture and Allied Sectors, Seasonality and Need for expanding Non-Farm Activities,		**Sikha Kar**		
	5. Rural Co-operatives and agricultural marketing		**Bikash Bhunia**		
	6. Area Based Approach to Rural Development: Drought Prone Area Programmes, PMGSY		**Goutam Kumar Das**		
	7. Target Group Approach to Rural Development: SJSY, MNREGA, Jan DhanYojana		**Sumitra Rani Jana**		
	8. Provision of Services – Physical and Socio-Economic Access to Elementary Education and Primary Health Care and Micro credit; Concept of PURA		**Dr. Baikuntha Behari Josh**		
	9. Rural Governance: Panchayati Raj System		**Pranati Manna**		
	10. Rural Development Policies and Programmes in India		**Pranati Manna**		
	11. Rural Infrastructural Development programmes relating to: Rural Electrification, Transport, Housing, and Connectivity		**Susanta Ban**		
	12. Rural Development Programmes for Women and children: Janani Suraksha Yojana , National Nutrition Mission, Drinking water and sanitation programmes, NRHM, Sarva Sikha Mission		**Sikha Kar**		
Teaching Plan: Department of Geography: UG. SEMESTER-IV (HONOURS)					
UNITS	**PAPER: CC-8: Regional Planning & Development: C8T-I: Regional Planning**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**

I	1. Concept of regions: Types of regions and their delineation.	Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05	**Susanta Ban**	15.03.2022-25.06.2022	**1st Internal Assessment: 4th Week of April , 2022** **2nd Internal Assessment: 3rd Week of Jun, 2022**
	2. Types of planning, principles and objectives of regional planning, multi- levelplanning in India		**Suman Pahari**		
	3. Tools and techniques of regional planning, need for regional planning in India		**Susanta Ban**		
	4. Metropolitan concept: metropolitan areas, and urban agglomerations		**Suman Pahari**		
UNITS	**PAPER: CC-8: Regional Planning & Development: C8T-II: Regional Development**		**NAME OF THE TEACHERS**		
II	1. Development: Meaning, growth versus development		**Sumitra Rani Jana**		
	2. Concept and strategies of regional development with reference to India		**Mintu Jana**		
	3. Theories and models for regional development : Growth pole model of perroux;growth centre model in Indian context		**Mintu Jana**		
	4. Theories and models for regional development: Cumulative causation (Myrdal)and core periphery (Hirschman, Rostov and Friedman)		**Sumitra Rani Jana**		
	5. Changing concept of development, concept of underdevelopment; efficiency-equity debate		**Mintu Jana**		
	6. Indicators of development: Economic, social and environmental.Human development.		**Sumitra Rani Jana**		
	7. Regional development in India, regional inequality, disparity and diversity		**Mintu Jana**		
	8. Need and measures for balanced development in India		**Dr. Pijush Kanti Dandapath**		
UNITS	**PAPER: CC-9: Economic Geography: C9T-I: Economic Concepts**	**FULL MARKS**	**NAME OF THE TEACHERS**		
I	1. Meaning and approaches to Economic Geography, new Economic Geography	**Total (T) =75 Theory=60**	**Dr. Baikuntha Behari Josh**		

	2. Concepts in Economic Geography: Goods and services, production, exchange and consumption	**Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Baikuntha Behari Josh**
	3. Concept of economic man, theories of choices		**Dr. Debashis Manna**
	4. Economic distance and transport costs		**Dr. Debashis Manna**
UNITS	**PAPER: CC-9: Economic Geography: C9T-II: Economic Activities**		**NAME OF THE TEACHERS**
II	1. Concept and classification of economic activities		**Sikha Kar**
	2. Factors affecting location of economic activity with special reference to agriculture(Von Thunen), and industry (Weber).		**Sikha Kar**
	3. Primary activities: Subsistence and commercial agriculture, forestry, fishing andmining		**Susmita Maiti**
	4. Secondary activities: Manufacturing (cotton textile, iron and steel), concept ofmanufacturing regions, special economic zones and technology parks		**Susmita Maiti**
	5. Tertiary activities: transport, trade and services		**Taniya Roy**
	6. Agricultural systems: Case studies of tea plantation in India and mixed farming inEurope		**Sikha Kar**
	7. Transnational sea-routes, railways and highways with reference to India		**Pranati Manna**
	8. International agreements and trade blocs: GATT and OPEC		**Pranati Manna**
UNITS	**PAPER: CC-10: Environmental Geography: C10T: Environmental Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Geographers' approach to environmental studies	**Total (T) =75 Theory=40 Practical=20**	**Taniya Roy**
	2. Perception of environment in different stages of civilization		**Taniya Roy**

	3. Concept of holistic environment and system approach	**Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Taniya Roy**
	4. Ecosystem: Concept, structure and functions		**Dr. Baikuntha Behari Josh**
	5. Environmental pollution and degradation: Land, water and air		**Dr. Baikuntha Behari Josh**
	6. Space–time hierarchy of environmental problems: Local, regional and global		**Bikash Bhunia**
	7. Urban environmental issues with special reference to waste management		**Bikash Bhunia**
	8. Environmental programmes and policies – Global, national and local levels		**Bikash Bhunia**
UNITS	**PAPER: CC-10: Environmental Geography : C10T: Environmental Geography Lab.**		**NAME OF THE TEACHERS**
II	1. Preparation of questionnaire for perception survey on environmental problems		**Bikash Bhunia**
	2. Preparation of check-list for Environmental Impact Assessment of an urban /industrial project		**Rabin Das**
	3. Quality assessment of soil using field kit: pH and NPK		**Sumitra Rani Jana & Taniya Roy**
	4. Interpretation of air quality using CPCB / WBPCB data		**Rabin Das**
UNITS	**PAPER: SEC-2: Research Methods : SEC2T: Research Methods**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Geographic Enquiry: Definition and Ethics; Literature Review; Framing Research Questions, Objectives and Hypothesis; Preparing Sample Questionnaires and inventories	**Total (T) =50 Theory=40 Internal Assessment (IA) =05**	**Rabin Das**
	2. Data Collection: Type and Sources of Data; Methods of data Collection; DataInput and Editing		**Rabin Das**

	3. Data Analysis: Qualitative and Quantitative Analysis; Techniques Data Representation	**Claaa Attendance (CA)=05**	**Rabin Das**
	4. Structure of a Research Report: Preliminaries; Text; Citation, Notes, References, Bibliography and Abstract and Key words.		**Rabin Das**
UNITS	**PAPER: GE-4: Regional Development: GE4T: Regional Development**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Definition of Region; Types and need of regional planning	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Pranati Manna**
	2. Choice of a region for planning; Characteristics of an Ideal Planning Region;Delineation of Planning Region		**Pranati Manna**
	3. Regionalization of India for Planning (Agro-ecological zones)		**Sikha Kar**
	4. Strategies/Models for Regional Planning: Growth Pole Model of Perroux		**Sumitra Rani Jana**
	5. Growth Centre Model in Indian Context; Concept of Village Cluster		**Sumitra Rani Jana**
	6. Problem Regions and Regional Planning; Backward Regions and Regional Plans: Special Area Development Plans in India. DVC- The Success Story and its Failures.		**Mintu Jana**
	7. Changing concept of development and underdevelopment; Efficiency-equity debate		**Mintu Jana**
	8. Indicators of development: Economic, social and environmental. Concept of Human development		**Mintu Jana**
	9. Regional development in India, regional inequality, disparity and diversity		**Susmita Maiti**
	10. Development and Regional Disparities in India since Independence: Disparities inAgricultural Development		**Dr. Baikuntha Behari Josh**
	11. Development and Regional Disparities in India since Independence: Disparities inIndustrial Development		**Dr. Baikuntha Behari Josh**

	12. Development and Regional Disparities in India since Independence: Disparities inHuman Resource Development in terms of education and health..		**Bikash Bhunia**		
Teaching Plan: Department of Geography: UG. SEMESTER-V (HONOURS)					
UNITS	**PAPER: CC-11: Field Work & Research Methodology: C11T-I: Research Methodology**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**
I	1. Research in Geography: Meaning, types and significance	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Pijush Kanti Dandapath**	**14.09.2021-18.01.2022**	**1st Internal Assessment: 1st Week of April , 2022**
	2. Literature review and formulation of research design		**Rabin Das**		
	3. Defining research problem, objectives and hypothesis. Research materials and methods		**Rabin Das**		
	4. Techniques of writing scientific reports: Preparing notes, references, bibliography, abstract and keywords		**Rabin Das**		
	C11T-II: Field Work		**NAME OF THE TEACHERS**		**2nd Internal Assessment: 1st Week of June, 2022**
II	1. Fieldwork in Geographical studies – Role and significance. Selection of study area and objectives. Pre-field preparations. Ethics of fieldwork		**Dr. Pijush Kanti Dandapath**		
	2. Field techniques and tools: Observation (participant, non participant), questionnaires (open, closed, structured, non-structured). Interview with special reverence to focused group discussions.		**Rabin Das**		

	3. Field techniques and tools: Landscape survey using transects and quadrants, constructing a sketch, photo and video recording.		**Rabin Das**
	4. Positioning and collection of samples. Preparation of inventory from field data. Post-field tasks.		**Rabin Das**
I	1. Each student will prepare an individual report based on primary data collected from field survey and secondary data collected from different sources for either a rural area (*mouza*) or an urban area (municipal ward) based on cadastral or municipal maps to study specific problems.		**All Teachers**
UNITS	**PAPER: CC-12: Remote Sensing & GIS: C12T-I: Remote Sensing**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Principles of Remote Sensing (RS): Types of RS satellites and sensors	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Bikash Bhunia**
	2. Sensor resolutions and their applications with reference to IRS and Landsat missions, image referencing schemes and data acquisition.		**Bikash Bhunia**
	3. Preparation of False Colour Composites from IRS LISS-3 and Landsat TM and OLI data.		**Susanta Ban**
	4. Principles of image interpretation. Preparation of inventories of landuse land cover (LULC) features from satellite images.		**Susanta Ban**

UNITS	PAPER: CC-12: Remote Sensing & GIA: C12T-II: GIS		NAME OF THE TEACHERS
II	**1.** GIS data structures: types (spatial and non-spatial), raster and vector		**Goutam Kumar Das**
	2. Principles of preparing attribute tables, data manipulation and overlay analysis		**Bikash Bhunia**
	3. Principles of GNSS positioning and waypoint collection		**Susanta Ban**
	4. Transferring of waypoints to GIS. Area and length calculations from GNSS data.		**Goutam Kumar Das**
UNITS	**PAPER: CC-12: Remote Sensing & GIA: C12P: Remote Sensing & GIS Lab.**		**NAME OF THE TEACHERS**
I	1. Georeferencing of maps and images		**Goutam Kumar Das**
	2. Image enhancement. Preparation of reflectance libraries of LULC features across different image bands of IRS L3 or Landsat OLI data		**Goutam Kumar Das**
	3. Image classification, post-classification analysis and class editing		**Goutam Kumar Das**
	4. Digitization of features. Data attachment, overlay and preparation of thematic map		**Goutam Kumar Das**
UNITS	**DSE-1: Hydrology & Oceanography: DSE 1T-I: Hydrology**	**FULL MARKS**	**NAME OF THE TEACHERS**

I	1. Systems approach in hydrology. Global hydrological cycle: Its physical and biological role	Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05	**Taniya Roy**
	2. Run off: controlling factors. Infiltration and evapotranspiration. Run off cycle		**Taniya Roy**
	3. Drainage basin as a hydrological unit. Principles of water harvesting and watershed management		**Taniya Roy**
	4. Groundwater: Occurrence and storage. Factors controlling recharge, discharge and movement		**Taniya Roy**
UNITS	**DSE-1: Hydrology & Oceanography: DSE 1T-II: Oceanography**		**NAME OF THE TEACHERS**
II	**1.** Major relief features of the ocean floor: characteristics and origin according to plate tectonics		**Sumitra Rani Jana**
	2. Physical and chemical properties of ocean water		**Sumitra Rani Jana**
	3. Water mass, T–S diagram		**Sumitra Rani Jana**
	4. Air-Sea interactions, ocean circulation, wave and tide		**Suman Pahari**
	5. Ocean temperature and salinity : Distribution and determinants		**Sumitra Rani Jana**
	6. Coral reefs: Formation, classification and threats		**Suman Pahari**
	7. Marine resources: Classification and sustainable utilisation		**Suman Pahari**
	8. Sea level change: Types and causes		**Suman Pahari**
UNITS	**DSE-1: Cultural & Settlement Geography: DSE1T-Cultural Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**

I	1. Definition, scope and content of Cultural Geography	Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05	**Pranati Manna**
	2. Development of cultural geography in relation to allied disciplines		**Pranati Manna**
	3. Cultural Hearth and Realm; Cultural diffusion, diffusion of major world religions and languages		**Pranati Manna**
	4. Cultural segregation and cultural diversity, Culture, technology and development		**Pranati Manna**
	5. Races and racial groups of the world		**Susmita Maiti**
	6. Cultural regions of India		**Susmita Maiti**
UNITS	**DSE-1: Cultural & Settlement Geography: DSE1T-II Settlement Geography**		**NAME OF THE TEACHERS**
II	1. Rural Settlement: Definition, nature and characteristics of rural settlements		**Dr. Debashis Manna**
	2. Morphology of rural settlements: site and situation, layout-internal and external		**Dr. Debashis Manna**
	3. Rural house types with reference to India, Social segregation in rural areas; Census categories of rural settlements.		**Dr. Debashis Manna**
	4. Urban Settlements :Census definition (Temporal) and categories in India		**Dr. Debashis Manna**
	5. Urban morphology: Classical models-Burgess, Homer Hoyt, Harris and Ullman Metropolitan concept		**Sikha Kar**

	6. City-region and Conurbation , Functional classification of cities: Harris, Nelson and McKenzie		**Sikha Kar**
UNITS	**PAPER: DSE-2: Resource Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Natural Resources: Concept and classification	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Baikuntha Behari Josh**
	2. Approaches to Resource Utilization: Utilitarian, Conservational, Community based adaptive		**Dr. Baikuntha Behari Josh**
	3. Significance of Resources: Backbone of Economic growth and development		**Dr. Baikuntha Behari Josh**
	4. Pressure on resources. Appraisal and Conservation of Natural Resources		**Susanta Ban**
	5. Problems of resource depletion—global scenario (forest, water, fossil fuels).		**Susanta Ban**
	6. Sustainable Resource Development		**Goutam Kumar Das**
II	1. Distribution, Utilisation, Problems and Management of Metallic Mineral Resources: Iron ore, Bauxite, copper		**Sikha Kar**
	2. Distribution, Utilisation, Problems and Management of Non-Metallic Mineral Resources: Limestone, Mica, Gypsum		**Sikha Kar**

	3. Distribution, Utilisation, Problems and Management of Energy Resources: Conventional and Non-Conventional		**Susmita Maiti**
	4. Contemporary Energy Crisis and Future Scenario		**Susmita Maiti**
	5. Politics of Power resources		**Mintu Jana**
	6. Limits to Growth and Sustainable Use of Resources; Concept of Resource sharing		**Mintu Jana**
UNITS	**DSE1T-I:: Social Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Social Geography: Concept, Origin, Nature and Scope	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Debashis Manna**
	2. Concept of Space, Social differentiation and stratification; social processes		**Dr. Debashis Manna**
	3. Social Categories: Caste, Class, Religion, Race and Gender and their Spatial distribution		**Goutam Kumar Das**
	4. Basis of Social region formation; Evolution of social-cultural regions of India		**Goutam Kumar Das**
	5. Peopling Process of India: Technology and Occupational Change; Migration		**Susanta Ban**
	6. Social groups, social behaviour and contemporary social environmental issues with special reference to India		**Susanta Ban**
II	1. Concept of Social Well-being, Quality of Life, Gender and Social Well-being		**Pranati Manna**

	2. Measures of Social Well-being: Healthcare, Education, Housing, Gender Disparity		**Pranati Manna**		
	3. Social Geographies of Inclusion and Exclusion, Slums, Gated Communities, Communal Conflicts and Crime.		**Mintu Jana**		
	4. Social Planning during the Five Year Plans in India		**Mintu Jana**		
	5. Social Policies in India: Education and Health		**Suman Pahari**		
	6. Social Impact Assessment (SIA): Concept and importance		**Suman Pahari**		
Teaching Plan: Department of Geography: UG. SEMESTER-VI (HONOURS)					
UNITS	**PAPER: CC-13: Evolution of Geographical Thought: C13T-I: Nature of Pre Modern Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**
I	1. Development of Geography and contributions of Greek, Chinese, and Indian geographers.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Sikha Kar**	**21.02.2022-10.06.2022**	**1st Internal Assessment: 1st Week of April , 2022**
	2. Impact of 'Dark Age' on Geography and Arab contributions		**Sikha Kar**		
	3. Geography during the Age of 'Discovery' and 'Exploration' (Contributions of Portuguese Voyages, Columbus, Vasco da Gama, Magellan, Thomas Cook)		**Sikha Kar**		
	4. Transition from Cosmography to Scientific Geography (Contributions of Bernard Varenius and Immanuel Kant); Dualism and Dichotomies (General vs. Particular, Physical vs. Human, Regional vs. Systematic, Determinism vs. Possibilism, Ideographic vs. Nomeothetic)		**Taniya Roy**		**2nd Internal Assessment: 1st Week of June, 2022**
	PAPER: CC-13: Evolution of Geographical Thought: C13T-II: Foundations of Modern Geography & Recent Trends		**NAME OF THE TEACHERS**		

II	1. Evolution of Geographical thoughts in Germany, France, Britain and United Statesof America.		**Pranati Manna**
	2. Contributions of Humboldt and Ritter		**Pranati Manna**
	3. Contributions of Richthofen, Hettner and Ratzel		**Pranati Manna**
	4. Schools of geographical thought: French, British and American;		**Pranati Manna**
	5. Trends of Geography in the post World War-II period		**Pranati Manna**
	6. Evolution of Geography in India: formative periods, establishments and emergingtrends		**Dr. Pijush Kanti Dandapath**
	7. Quantitative Revolution and its impact, behaviouralism, systems approach,radicalism, feminism		**Sumitra Rani Jana**
	8. Towards Post Modernism: Changing concept of space in geography. Geography inthe 21st Century		**Sumitra Rani Jana**
UNITS	**PAPER: CC-14: Disaster Management: C14T-I: Concepts**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Classification of hazards and disasters.	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Bikash Bhunia**
	2. Approaches to hazard study: Risk perception and vulnerability assessment. Hazardparadigms		**Bikash Bhunia**
	3. Responses to hazards: Preparedness, trauma and aftermath. Resilience and capacitybuilding.		**Rabin Das**
	4. Hazards mapping: Data and techniques.		**Rabin Das**
	PAPER: CC-14: Disaster Management: C14T-II: Disaster Case Studies		**NAME OF THE TEACHERS**
II	1. Earthquake: Factors, vulnerability, consequences and management		**Susmita Maiti**
	2. Landslide: Factors, vulnerability, consequences and management		**Susmita Maiti**
	3. Cyclone: Factors, vulnerability, consequences and management		**Susanta Ban**

	4. Fire: Factors, vulnerability, consequences and management		**Susanta Ban**
I	*1. An individual Project Report based on any one case study among the following disasters incorporating a preparedness plan in the vicinity of the candidate's institution or residence:* Thunderstorm/ Landslide/ Flood/ Coastal / riverbank erosion/ Fire/ Industrial accident/ Structural collapse		**All Teachers**
UNITS	**DSE-3: Population Geography: DSE3T-I:**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Development of Population Geography as a field of specialization. Relation between population geography and demography. Sources of population data, their level of reliability and problems of mapping.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Debashis Manna**
	2. Population distribution: density and growth. Classical and modern theories in population distribution and growth, Demographic transition model.		**Mintu Jana**
	3. World patterns determinants of population distribution and growth. Concept of optimum population.		**Pranati Manna**
	4. Population distribution, density and growth profile in India.		**Pranati Manna**
	DSE-3: Population Geography: DSE3T-II:		**NAME OF THE TEACHERS**
II	1. Population Composition and Characteristics– Age-Sex Composition; Rural andUrban Composition; Literacy.		**Susmita Maiti**
	2. Measurements of fertility and mortality. Concept of cohort and life table		**Susmita Maiti**

	3. Population composition of India. Urbanisation, Occupational structure.		**Susmita Maiti**
	4. Migration: Causes and types		**Susmita Maiti**
	5. National and international patterns of migration with reference to India.		**Dr.Debashis Manna**
	6. Population and development: population-resource regions. Concept of humandevelopment index and its components.		**Dr. Baikuntha Behari Josh**
	7. Population policies in developed and less development countries. India'spopulation policies, population and environment, implication for the future.		**Mintu Jana**
	8. Contemporary Issues – Ageing of Population; Declining Sex Ratio; Population andenvironment dichotomy, HIV/AIDS.		**Dr. Debashis Manna**
	DSE-3: Soil & Biogeography: DSE3T-I:	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Factors or soil formation. Man as an active agent of soil transformation.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Rabin Das**
	2. Soil profile. Origin and profile characteristics of Lateritic, Podzol and Chernozemsoils		**Rabin Das**
	3. Definition and significance of soil properties: Texture, structure and moisture,		**Suman Pahari**
	4. Definition and significance of soil properties: p^H, organic matter and NPK		**Suman Pahari**
	5. Soil erosion and degradation: Factors, processes and mitigation measures		**Taniya Roy**
	6. Principles of soil classification: Genetic and USDA. Concept of land capability andits classification.		**Bikash Bhunia**
	7. Concepts of biosphere, ecosystem, biome, ecotone, community and ecology		**Dr. Baikuntha Behari Josh**

	8. Concepts of trophic structure, food chain and food web. Energy flow in ecosystems		**Suman Pahari**
	9. Geographical extent and characteristic features of: Tropical rain forest, Taiga and Grassland biomes		**Sikha Kar**
	10. Bio-geochemical cycles with special reference to carbon dioxide and nitrogen		**Sikha Kar**
	11. Deforestation: Causes, consequences and management		**Sikha Kar**
	12. Bio-diversity: Definition, types, threats and conservation measures		**Sikha Kar**
UNITS	**DSE-4: Agricultural Geography: DSE4T-I:**	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Progress of Agricultural Geography with reference to allied disciplines.Approaches to study of Agricultural Geography.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Debashis Manna**
	2. Origin and dispersal of agriculture; Role of agriculture on human society.		**Dr. Debashis Manna**
	3. Factors affecting agriculture. Classification of world agricultural systems.		**Sikha Kar**
	4. Location and characteristics of major agricultural types: Intensive subsistence,extensive commercial and plantation agriculture.		**Sikha Kar**
	DSE-4: Agricultural Geography: DSE4T-II:		**NAME OF THE TEACHERS**
II	1. Concept of cropping pattern, crop combination, gross and net cropped area, croprotation.		**Dr. Debashis Manna**
	2. A critical review and contemporary perspective of Von Thunen' model		**Pranati Manna**

	3. Definition and factors affecting yield. Measures of agricultural productivity		**Dr. Debashis Manna**
	4. Role of irrigation in Indian agriculture		**Dr. Baikuntha Behari Josh**
	5. Problems of agriculture with special reference to South Asian countries.		**Dr. Debashis Manna**
	6. World patterns of agricultural production and food security		**Susanta Ban**
	7. Land use survey and land classification (USDA)		**Taniya Roy**
	8. Globalization and agriculture with special reference to India		**Susmita Maiti**
	DSE-4: Urban Geography: DSE4T-I:	**FULL MARKS**	**NAME OF THE TEACHERS**
I	1. Urban Geography: nature and scope, different approaches and recent trends inurban geography	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Mintu Jana**
	2. Origin of urban places in Ancient, Medieval, Modern and Post-Modern periods-factors, stages, and characteristics.		**Mintu Jana**
	3. Theories of Urban Evolution and Growth: Hydraulic Theory, Economic Theory		**Rabin Das**
	4. Aspects of urban places: Location, site and situation, Size and Spacing of Cities:The Rank Size Rule, The Law of the Primate City		**Sumitra Rani Jana**
	5. Urban Hierarchies : Central Place Theory; August Loch's theory of Market Centres		**Sumitra Rani Jana**
	6. Patterns of urbanisation in developed and developing countries		**Rabin Das**
	DSE-4: Urban Geography: DSE4T-II:		**NAME OF THE TEACHERS**
II	1. Ecological processes of urban growth; Urban fringe; City- Region		**Sumitra Rani Jana**

	2. Theories of city structure-concentric zone theory, sector theory, multiple nucleitheory		**Sikha Kar**		
	3. Urban Issues: problems of housing, slums, civic amenities (water and transport)		**Mintu Jana**		
	4. Policies on urbanization. Urban change/landscape in post-liberalized period inIndia		**Mintu Jana**		
	5. Patterns and trends of urbanization in India		**Rabin Das**		
	6. Case studies of Delhi, Kolkata, and Chandigarh with reference to land use		**Mintu Jana**		

Teaching Plan: Department of Geography: UG. SEMESTER-I (GENERAL)

UNITS	PAPER: DSC-1A/2A/3A: Physical Geography: DSC1AT: Physical Geography	FULL MARKS	NAME OF THE TEACHERS	MONTHS OF TEACHING	REMARKS
	1. Physical Geography – Definition and Scope, Components of Earth System.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Dr. Debashis Manna**	**01.10.2021-24.02.2022**	**1st Internal Assessment: 4th Week of December,2022 2nd Internal Assessment: 2nd Week of March,2022**
	2. Atmosphere – Heat Balance, Global Circulation Pattern, Tropical Cyclones, Monsoon, Climatic Classification (Koppen).		**Goutam Kumar Das**		
	3. Lithosphere – Internal Structure of Earth based on Seismic Evidence, Plate Tectonics and its Associated Features.		**Suman Pahari**		
	4. Fluvial Cycle of Erosion – Davis and Penck.		**Dr.Baikuntha Behari Josh**		
	5. Hydrosphere – Hydrological Cycle, Ocean Bottom Relief Features, Tides and Currents.		**Susmita Maiti & Sikha Kar**		

Teaching Plan: Department of Geography: UG. SEMESTER-II (GENERAL)

UNITS	PAPER: DSC-1B/2B/3B: Human Geography: DSC1BT: Human Geography	FULL MARKS	NAME OF THE TEACHERS	MONTHS OF TEACHING	REMARKS

	1. Definition, Nature, Major Subfields, Contemporary Relevance.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Class Attendance (CA)=05**	**Dr. Debashis Manna**	**01.04.2022-09.07.2022**	**1st Internal Assessment: 2nd Week of May , 2022 2nd Internal Assessment: 2nd Week of July, 2022**
	2. Space and Society: Cultural Regions; Race; Religion and Language		**Pranati Manna**		
	3. Population: Population Growth and Demographic Transition Theory.		**Susmita Maiti**		
	4. World Population Distribution and Composition (Age, Gender and Literacy).		**Pranati Manna**		
	5. Settlements: Types and Patterns of Rural Settlements; Classification of UrbanSettlements; Trends and Patterns of World Urbanization		**Sikha Kar**		
Teaching Plan: Department of Geography: UG. SEMESTER-III (GENERAL)					
UNITS	**PAPER: DSC-1C/2C/3C: Cartographic Techniques: DSC1CT: Maps & Diagrams: Scale & Cartograms**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**
I	1. Maps – Types, Elements and Uses	**Total (T) =75 Theory=40 Practical=20 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Goutam Kumar Das**	**01.10.2021-05.02.2022**	**1st Internal Assessment: 4th Week of November , 2021 2nd Internal Assessment: 1st Week of January, 2022**
	2. Map Scale – Types and Application, Reading Distances on a Map.		**Suman Pahari**		
	3. Construction of Linear and Comparative (Unit)		**Suman Pahari**		
	4. Cartograms: Circle, Square and Pie graph		**Suman Pahari**		
	5. Age-Sex Pyramid, Dependency Ratio		**Pranati Manna**		
	6. Population Maps and Diagrams: Population Density by Choropleth, Distribution by Dot and Sphere.		**Susmita Maiti**		

	7. Representation of Data – Symbols, Dots, Choropleth, Isopleth and Flow Diagrams, Interpretation of Thematic Maps.	**Sikha Kar/ Sumitra Rani Jana**
II	1. Map Projections: Nature and Classification	**Bikash Bhunia**
	2. Principles, Theories, Criteria for Choice of Projections; Construction and Properties of select Map Projections: Conical projection with two standard parallel, Cylindrical Equal Area, Polar Zenithal Stereographic, Zenithal Gnomonic Polar Case, Mercator's Projection, Bonne's Projection	**Bikash Bhunia**
III	1. Concepts and Principles: Angles, Bearing and Azimuths, Traversing, Radiation, Intersection	**Suman Pahari**
	2. Prismatic Compass: Preparation of landuse maps by open and closed traverse; computations of compass traverse- Included Angle, Area of traverse	**Suman Pahari**
	3. Levelling by Dumpy Level: Profile	**Goutam Kumar Das**
	A. Project File	**NAME OF THE TEACHERS**
I	1. Graphical construction of scales: Plain, comparative	**Suman Pahari**
	2. Construction of projections: Polar Zenithal Stereographic, Simple conic with one standard parallel and Cylindrical Equal Area	**Bikash Bhunia**

	3. Preparation of land use maps by open and closed traverse; computations of compass traverse- Included Angle, Area of traverse		**Rabin Das & Suman Pahari**		
	4. Leveling by Dumpy Level: Profile		**Goutam Kumar Das**		
II	Report should be written with the following Tentative Chapter Schemes: ❖ Preface & Acknowledgement ❖ Introduction: Objective, Extent and Space Relations, Data sources and Methodology ❖ Physical Environment: Lithology, Drainage, Slope, Climate, Soil, Vegetation etc. Socio Economic Environment: Population Characteristics, Occupational Structure, Ethnic and Religions Composition, Per- Capita income, any other aspects. ❖ Problems and Prospects, Bibliography if any ❖ Appendix: Survey Questionnaire(s), Additional Tables, if any Word Limit: 3000 (Excluding Tables and Appendix). ❖ A copy of the bound report, duly signed by the concerned teacher, should be submitted.		**Susanta Ban & Goutam Kumar Das**		
Teaching Plan: Department of Geography: UG. SEMESTER-IV (GENERAL)					
UNITS	**PAPER: DSC-1D/2D/3D (CC-4): Environmental Geography: DSCIDT4: Environmental Geography**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**
I	1. Environmental Geography: Concepts and Approaches; Ecosystem – Concept andStructure; Ecosystem Functions.	**Total (T) =75 Theory=60**	**Susmita Maiti**	**15.03.2022-25.06.2022**	**1st Internal Assessment:**

	2. Human-Environment Relationship in Equatorial, Desert, Mountain and CoastalRegions.	**Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Sikha Kar**		**4th Week of April , 2022**
	3. Environmental Problems and Management: Air Pollution; Biodiversity Loss; Solidand Liquid Waste.		**Sikha Kar**		
	4. Environmental Programmes and Policies: Developed Countries; DevelopingCountries.		**Dr. Baikuntha Behari Josh**		**2nd Internal Assessment: 3rd Week of June, 2022**
	5. New Environmental Policy of India; Government Initiatives.		**Dr. Baikuntha Behari Josh**		**REMARKS**
UNITS	**PAPER: SEC-2: Regional Planning & Development: SEC2T: Regional Planning & Development**	**FULL MARKS**	**NAME OF THE TEACHERS**		
I	1. Concept, Need and Types of regional Planning.	**Total (T) =50 Theory=40 Internal Assessment (IA) =05 Claaa Attendance (CA)=05**	**Suman Pahari**		
	2. Characteristics and Delineation of Planning Region.		**Susanta Ban**		
	3. Regionalization of India for Planning (Agro Ecological Zones).		**Sikha Kar**		
	4. Models for Regional Planning: Growth Pole Theory; Core Periphery Model andGrowth Foci Concept in Indian Context.		**Sumitra Rani Jana**		
	5. Backward Regions and Regional Plans- Special Area Development Plans in India;DVC-The Success Story and the Failures; NITI Aayog.		**Taniya Roy**		
Teaching Plan: Department of Geography: UG. SEMESTER-V (GENERAL)					
UNITS	**PAPER: DSE-1A/2A/3A: Soil & Biogeography: DSE1T: Soil & Biogeography**	**FULL MARKS**	**NAME OF THE TEACHERS**	**MONTHS OF TEACHING**	**REMARKS**
I	1. Factors or soil formation. Man as an active agent of soil transformation.	**Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05**	**Sikha Kar**	**14.09.2021-18.01.2022**	**1st Internal Assessment: 1st Week of April , 2022**
	2. Soil profile. Origin and profile characteristics of Laterite and Podzol soils		**Susmita Maiti**		
	3. Definition and significance of soil properties: Texture and structure		**Dr. Debashis Manna**		

	4. Definition and significance of soil properties: pH and organic matter		**Dr. Debashis Manna**		**2nd Internal Assessment: 1st Week of June, 2022**
	5. Soil erosion and degradation: Factors, processes and mitigation measures		**Dr. Baikuntha Behari Josh**		
	6. Concepts of biosphere, ecosystem, biome, Eco tone, community and ecology		**Dr. Baikuntha Behari Josh**		
	7. Concepts of trophic structure, food chain and food web. Energy flow in ecosystems		**Mintu Jana**		
	8. Geographical extent and characteristic features of: Tropical rain forest, Taiga andGrassland biomes		**Mintu Jana**		
	9. Bio-geochemical cycles with special reference to carbon dioxide and nitrogen		**Pranati Manna**		
	10. Deforestation: Causes, consequences and management		**Pranati Manna**		
UNITS	**PAPER: SEC-3: Remote Sensing & GPS Based Project Work: SEC3T: Content Course**	**FULL MARKS**	**NAME OF THE TEACHERS**		
I	1. Remote Sensing: Definition, Development, Platforms and Types.	**Total (T) =50 Theory=40 Internal Assessment (IA) =05 Claaa Attendance (CA)=05**	**Bikash Bhunia**		
	2. Aerial Photography: Principles, Types and Geometry.		**Susanta Ban**		
	3. Satellite Remote Sensing: Principles, EMR Interaction with Atmosphere and EarthSurface; Satellites (Landsat and IRS) and Sensors.		**Goutam Kumar Das**		
	PAPER: SEC-3: Remote Sensing & GPS Based Project Work:: SEC3P: Practical		**NAME OF THE TEACHERS**		
II	1. Interpretation and Application of Remote Sensing: Land use/ Land Cover.		**Bikash Bhunia, Susanta Ban &**		
	2. Global Positioning System (GPS) – Principles and Uses		**Goutam Kumar Das**		
Teaching Plan: Department of Geography: UG. SEMESTER-VI (GENERAL)					

UNITS	PAPER: DSE-1B/2B/3B: Economic Geography: DSE2T: Economic Geography	FULL MARKS	NAME OF THE TEACHERS	MONTHS OF TEACHING	REMARKS
I	1. Definition, Approaches and Fundamental Concepts of Economic Geography;Patterns of Development.	Total (T) =75 Theory=60 Internal Assessment (IA) =10 Claaa Attendance (CA)=05	**Dr. Baikuntha Behari Josh**	21.02.2022-10.06.2022	1st Internal Assessment: 1st Week of April , 2022 2nd Internal Assessment: 1st Week of June, 2022
	2. Locational Theories – Agriculture (Von Thunen) and Industrial (Weber).		**Pranati Manna**		
	3. Primary Activities – Intensive Subsistence Farming, Commercial Grain Farming, Plantation, Commercial Dairy Farming, Commercial Fishing, and Mining (ironore, coal and petroleum).		**Susmita Maiti**		
	4. Secondary Activities – Cotton Textile Industry, Petro-Chemical Industry, Major Manufacturing Regions.		**Sikha Kar**		
	5. Tertiary and Quaternary Activities – Modes of Transportation, Patterns of International Trade, and Information and Communication Technology Industry.		**Taniya Roy**		
UNITS	**PAPER: SEC-4: Field Technique and Survey Based Project Report: SEC4T: Field Technique and Survey Based Project Report**	**FULL MARKS**	**NAME OF THE TEACHERS**		
I	1. Field Work in Geographical Studies – Role, Value and Ethics of Field-Work.	Total (T) =50 Theory=40 Practical=10	**Suman Pahari**		
	2. Defining the Field and Identifying the Case Study – Rural / Urban / Physical / Human / Environmental.		**Taniya Roy**		
	3. Field Techniques – Merits, Demerits and Selection of the Appropriate Technique; Observation (Participant / Non Participant).		**Mintu Jana**		

	4. Questionnaires (Open/ Closed / Structured / Non-Structured); Interview with Special Focus on Focused Group Discussions; Space Survey (Transects and Quadrants, Constructing a sketch).		**Rabin Das**		
UNITS	**PAPER: SEC-4: Field Technique and Survey Based Project Report: SEC4P: Practical**		**NAME OF THE TEACHERS**		
II	1. Designing the Field Report – Aims and Objectives, Methodology, Analysis,Interpretation and Writing the Report.		**Mintu Jana**		
	1. Each student will prepare an individual report based on primary and secondarydata collected during field work.		**Rabin Das**		

Zoology

1st Semester (Hons.)

Unit	Topics	FULL MARKS	Teachers	Month of Teaching	Remarks
	C1T1 (Nonchordates):				
Unit 1:	**Basics of Animal Classification** Definitions: Classification, Systematics and Taxonomy; Taxonomic Hierarchy, Taxonomic types. Codes of Zoological Nomenclature; Principle of priority; Synonymy and Homonymy; Six kingdoms. concept of classification (Card Woese)	40 Credits 4	Dipanjan Ray	01.10.2021to 24.02.2022	1st internal 4th week of December, 2021
Unit 2:	**Protista and Metazoa** **Protozoa:** General characteristics and Classification up to phylum (according to Levine et. al., 1981) Locomotion. in *Euglena*, *Paramoecium* and *Amoeba*; Conjugation in *Paramoecium*. Life cycle and pathogenicity of *Plasmodium vivax* and *Entamoeba histolytica*. **Metazoa** Evolution of symmetry and segmentation of Metazoa		Habibullah Mallick		2nd Internal 2nd week of March, 2022
Unit 3:	**Porifera** General characteristics and Classification up to classes Canal system and spicules in sponges		Bapan Santra		
Unit 4:	**Cnidaria** General characteristics and Classification up to classes Metagenesis in *Obelia* and *Aurelia* Polymorphism in Cnidaria Corals and coral reefs		Urmita Chandra Chowdhury		
Unit 5:	**Ctenophora** General characteristics and Evolutionary significance		Nabanita Das		
Unit 6:	**Platyhelminthes** General characteristics and Classification up to classes Life cycle and pathogenicity and control measure of *Fasciola hepatica* and *Taenia solium*		Sandip Jana		
Unit 7:	**Nemathelminthes**		Nabanita Das		

	General characteristics and Classification up to classes Life cycle, and pathogenicity and control measure of *Ascaris lumbricoides* and *Wuchereria bancrofti* Parasitic adaptations in helminthes				
C1P: NON-CHORDATES I: PRACTICALS:					
	1. Study of whole mount of *Euglena, Amoeba* and *Paramecium*. **2.** Identification of *Amoeba, Euglena, Entamoeba, Opalina, Paramoecium, Plasmodium vivax* and *Plasmodium falciparum* (from the prepare slides). ***3.*** Identification of *Sycon*, Neptune's Cup, *Obelia, Physalia, Millepora, Aurelia, Tubipora, Corallium, Alcyonium, Gorgonia, Metridium, Pennatula, Fungia, Meandrina, Madrepora.* ***4.*** Identification and significance of adult *Fasciola hepatica, Taenia solium* and *Ascaris lumbricoides.* **5.** Staining/mounting of any protozoa/helminth from the gut cockroach.	20 Credits 2	Dipanjan Ray & Urmita Chandra Chowdhury	01.10.2021to 24.02.2022	
	C2T2 (Principle of Ecology)				
Unit 1:	**Introduction to Ecology** History of ecology, Autecology and synecology, Levels of organization, Laws of limiting factors, Study of Physical factors, The Biosphere.	40 Credits 4	Habibullah Mallick	01.10.2021 to 24.02.2022	
Unit 2:	**Population** Unitary and Modular populations Unique and group attributes of population: Density, natality, mortality, life tables, fecundity tables, survivorship curves, dispersal and dispersion. Exponential and logistic growth, equation and patterns, r and K strategiesPopulation regulation - density-dependent and independent factors Population interactions, Gause's Principle with laboratory and field examples, Lotka-Volterra equation for competition and Predation.		Sudipta Bera		
Unit 3:	**Community** Community characteristics: species richness, dominance, diversity, abundance, vertical stratification, Ecotone and edge effect; Ecological succession with one		Atanu Das		

		example. Theories pertaining to climax community				
	Unit 4:	**Ecosystem** Types of ecosystems with one example in detail, Food chain: Detritus and grazing food chains, Linear and Y-shaped food chains, Food web, Energy flow through the ecosystem, Ecological pyramids and Ecological efficiencies Nutrient and biogeochemical cycle with one example of Nitrogen cycle Human modified ecosystem		Sandip Jana		
	Unit 5:	**Applied Ecology** Ecology in Wildlife Conservation (in-situ and ex-situ conservation) and Management strategies for tiger conservation; Wild life protection act (1972)		Dipanjan Ray		
		CIIP: ECOLOGY: PRACTICALS				
		1. Study of life tables and plotting of survivorship curves of different types from the hypothetical/real data provided. 2. Determination of population density in a natural/hypothetical community by quadrate method and calculation of Shannon-Weiner diversity index for the same community. 3. Study of an aquatic ecosystem: Phytoplankton and zooplankton, Measurement of area, temperature, turbidity/penetration of light, determination of pH, and Dissolved Oxygen content (Winkler's method), Chemical Oxygen Demand and free CO2. 4. Report on a visit to National Park/Biodiversity Park/Wild life sanctuary.	20 Credits 2	Bapan Santra & Habibullah Mallick	01.10.2021to 24.02.2022	

	Generic Elective (GE 1): Animal Cell biotechnology				
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Remarks**
UNIT 1:	**Introduction** Concept and Scope of Biotechnology	40	Bapan Santra		
UNIT2:	**Techniques in Gene manipulation** Outline process of genetic engineering and recombinant DNA technology, Isolation of genes, Concept of restriction and modification: Restriction endonucleases, DNA modifying enzymes		Bapan Santra		

	Cloning Vectors: Plasmids, Phage vectors, Cosmids, Phagemids, BAC, YAC, HAC. Shuttle and Expression Vectors. Construction of Genomic libraries and cDNA libraries Transformation techniques: microbial, plants and animals: Cloning in mammalian cells, Integration of DNA into mammalian genome-Electroporation and Calcium Phosphate Precipitation method.	Credits 4		01.10.2021 to 24.02.2022	
UNIT 3:	**Animal cell Culture** Basic techniques in animal cell culture and organ culture, Primary Culture and Cell lines, Culture media- Natural and Synthetic, Stem cells, Cryopreservation of cultures. Agarose and Polyacrylamide Gel Electrophoresis, Southern, Northern and Western blotting, DNA sequencing: Sanger method, Polymerase chain reaction, DNA Fingerprinting and DNA microarrays.		Sandip Jana		
UNIT 4:	**Fermentation** Different types of Fermentation: Submerged & Solid state; batch, Fed batch &Continuous; Stirred tank, Air Lift, Fixed Bed and Fluidized. Downstream Processing: Filtration, centrifugation, extraction, chromatography, spray drying and lyophilization.		Sudipta Bera		
UNIT 5:	**Transgenic Animal Technology** Production of transgenic animals: nuclear transplantation, Retroviral method, DNA microinjection method, Dolly and Polly.		Sandip Jana		
UNIT 6:	**Application in Health** Development of recombinant Vaccines, Hybridoma technology, Gene Therapy. Production of recombinant Proteins: Insulin and growth hormones.		Bapan Santra		
UNIT 7:	**Bio safety Physical and Biological containment.** Bio safety Physical and Biological containment.		Sandip Jana		

GE 1 PRACTICAL					
	1. Packing and sterilization of glass and plastic wares for cell culture. 2. Preparation of culture media. 3. Preparation of genomic DNA from E. coli/animals/ human. 4. Plasmid DNA isolation (pUC 18/19) and DNA quantitation using agarose gel electrophoresis (by using lambda DNA as standard). 5. Restriction digestion of lambda (λ) DNA using EcoR1 and Hind III. 6. Preparation of competent cells and Transformation of E. coli with plasmid DNA using CaCl2, Selection of transformants on X-gal and IPTG (Optional). 7. Techniques: Western Blot, Southern Hybridization, DNA Fingerprinting, PCR, DNA Microarrays.	20 Credits 2	Habibullah Mallick	01.10.2021 to 24.02.2022	

1st Semester General

DSC-1A (CC-1): Animal diversity
DSC1AT: Animal diversity

		FULL MARKS			
Unit	**Topics**		**Teachers**	**Month of Teaching**	**Internal Assesment**
Unit 1:	Kingdom Protista General characters and classification up to classes; Locomotory Organelles and locomotion in Protozoa	**40** **CREDITS 4**	Urmita Chandra Chowdhury		1st internal 4th week of December, 2021 2nd Internal
Unit 2:	Phylum Porifera General characters and classification up to classes; Canal System in Sycon		Urmita Chandra Chowdhury		
Unit 3:	Phylum Cnidaria General characters and classification up to classes; Polymorphism in Hydrozoa		Urmita Chandra Chowdhury		
Unit 4:	Phylum Platyhelminthes General characters and classification up to classes; Life history of Taenia solium		Nabanita Das		

Unit 5:	Phylum Nemathelminthes General characters and classification up to classes; Life history of Ascaris lumbricoides and its parasitic adaptation			Nabanita Das		2nd week of March, 2022
Unit 6:	Phylum Annelida General characters and classification up to classes; Metamerism in Annelida			Nabanita Das	01.10.2021 to 24.02.2022	
Unit 7:	Phylum Arthropoda General characters and classification up to classes; Vision in Arthropoda, Metamorphosis in Insects			Urmita Chandra Chowdhury		
Unit 8:	Phylum Mollusca General characters and classification up to classes; Torsion in gastropods			Urmita Chandra Chowdhury		
Unit 9:	Phylum Echinodermata General characters and classification up to classes; Water-vascular system in Asteroidea			Urmita Chandra Chowdhury		
Unit 10:	Protochordates General features and Phylogeny of Protochordata			Nabanita Das		
Unit 11:	Agnatha General features of Agnatha and classification of cyclostomes up to classe			Nabanita Das		
Unit 12:	Pisces General features and Classification up to orders; Osmoregulation in Fishes			Nabanita Das		
Unit 13:	Amphibia General features and Classification up to orders; Parental care			Urmita Chandra Chowdhury		
Unit 14:	Reptiles General features and Classification up to orders; Poisonous and non-poisonous snakes, Biting mechanism in snakes			Urmita Chandra Chowdhury		
Unit 15:	Aves General features and Classification up to orders; Flight adaptations in birds			Nabanita Das		
Unit 16:	Mammals Classification up to orders; Origin of mammals			Nabanita Das		
	DSC1AP: Animal diversity Practical					
Unit	**Topics**		**FULL MARKS**	**Teachers**		**Remarks**

Unit 1	1. Study of the following specimens: Amoeba, Euglena, Plasmodium, Paramecium, Sycon, Hyalonema, and Euplectella, Obelia, Physalia, Aurelia, Tubipora, Metridium, Taenia solium, Male and female Ascaris lumbricoides, Aphrodite, Nereis, Pheretima, Hirudinaria, Palaemon, Cancer, Limulus, Palamnaeus, Scolopendra, Julus, Periplaneta, Apis, Chiton, Dentalium, Pila, Unio, Loligo, Sepia, Octopus, Pentaceros, Ophiura, Echinus, Cucumaria and Antedon, Balanoglossus, Herdmania, Branchiostoma, Petromyzon, Sphyrna, Pristis, Torpedo, Labeo, Exocoetus, Anguilla, Ichthyophis/Ureotyphlus, Salamandra, Bufo, Hyla, Chelone, Hemidactylus, Chamaeleon, Draco, Vipera, Naja, Crocodylus, Gavialis, Any six common birds from different orders, Sorex, Bat, Funambulus, Loris	20 CREDITS 2	Atanu Das		
Unit 2	Study of the following permanent slides: 1. T.S. and L.S. of Sycon, 2. Study of life history stages of Taenia, 3. T.S. of male and female Ascaris		Atanu Das		
Unit 3	Key for identification of poisonous and non-poisonous snakes An "animal album" containing photographs, cut outs, with appropriate write up about the above mentioned taxa. Different taxa/ topics may be given to different sets of students for this purpose.		Atanu Das		

Semester-II (Hons.)

	CIII T(Non-Chordate II)				
Sl. No.	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Remarks**
Unit 1:	**Unit 1: Introduction to Coelomates** Evolution of coelom and metamerism	40 CREDITS 4	Atanu Das	01.04.2022 to 09.07.2022	1st internal 2nd week of May, 2022 2nd Internal 2nd week of July, 2022
Unit 2:	**Unit 2: Annelida** General characteristics and Classification up to classes Excretion in Annelida through nephridia. Metamerism in Annelida.		Sudipta Bera		
Unit 3:	**Arthropoda** General characteristics and Classification up to classes Vision and Respiration (Gills in prawn and trachea in cockroach) in Arthropoda. Metamorphosis in Lepidopteran Insects Social life in termites		Dipanjan Ray		

Unit 4:	**Onychophora** General characteristics and Evolutionary significance		Atanu Das		
Unit 5:	**Mollusca** General characteristics and Classification up to classes Respiration in Mollusca Torsion in Gastropoda Feeding and respiration in *Pila* sp		Urmita Chandra Chowdhury		
Unit 6:	**Echinodermata** General characteristics and Classification up to classes Water-vascular system in Asteroidea Larval forms in Echinodermata Affinities with Chordates		Atanu Das		
Unit 7:	**Hemichordata** General characteristics of phylum Hemichordata. Relationship with non-chordates and chordates.		Sudipta Bera		
Practical C3 T		**FULL MARKS**			
	4. Protochordata Balanoglossus, Herdmania, Branchiostoma, 2. Agnatha Petromyzon, Myxine 3. Fishes Scoliodon, Sphyrna, Pristis, Torpedo, Chimaera, Mystus, Heteropneustes, Labeo, Exocoetus, Echeneis, Anguilla, Hippocampus, Tetrodon/ Diodon, Anabas, Flat fish 4. Amphibia Ichthyophis/Ureotyphlus, Necturus, Bufo, Hyla, Alytes, Salamandra 4. Reptilia Chelone, Trionyx, Hemidactylus, Varanus, Uromastix, Chamaeleon, Ophiosaurus, Draco, Bungarus, Vipera, Naja, Hydrophis, Zamenis, Crocodylus Key for Identification of poisonous and non-poisonous snakes 4. Aves	20 CREDITS 2	Dipanjan Ray Bapan Santra	01.04.2022 to 09.07.2022	

	Study of six common birds from different orders. Types of beaks and claws 4. Mammalia Bat (Insectivorous and Frugivorous), Funambulus, Loris, Herpestes, pecten from Fowl head. Dissections of brain and pituitary of Tilapia. Dissection of Fowl head (Dissections and mounts subject to permission) Power point presentation on study of any two animals from two different classes by students (may be included if dissections not given permission)				
	C4T (Cell Biology)	FULL MARKS			
Unit 1:	**Overview of Cells** Prokaryotic and Eukaryotic cells, Virus, Viroids, Mycoplasma, Prions	40 CREDITS 4	Atanu Das	01.04.2022 to 09.07.2022	
Unit 2:	**Plasma Membrane** Various models of plasma membrane structure Transport across membranes: Active and Passive transport, Facilitated transport Cell junctions: Tight junctions, Desmosomes, Gap junctions		Sandip Jana		
Unit 3:	**Cytoplasmic organelles I** Structure and Functions: Endoplasmic Reticulum, Golgi Apparatus, Lysosome. Protein sorting and mechanisms of vesicular transport		Sudipta Bera		
Unit 4:	**Cytoplasmic organelles II** Mitochondria: Structure, Semi-autonomous nature, Endosymbiotic hypothesis Mitochondrial Respiratory Chain, Chemi-osmotic hypothesis. Peroxisomes: Structure and Functions Centrosome: Structure and Functions		Habibullah Mallick		
Unit 5:	**Cytoskeleton** Type, structure and functions of cytoskeleton. Accessory proteins of microfilament & microtubule A brief idea about molecular motors		Sandip Jana		
Unit 6:	**Nucleus**		Soumen Patra		

	Structure of Nucleus: Nuclear envelope, Nuclear pore complex, Nucleolus. Chromatin: Euchromatin and Hetrochromatin and packaging (nucleosome)				
Unit 7:	**Cell Division** Cell cycle and its regulation, Cancer (Concept of oncogenes and tumor suppressor genes with special reference to p53, Retinoblastoma and Ras and APC. Mitosis and Meiosis: Basic process and their significance		Dipanjan Ray		
Unit 8:	**Cell Signaling** Cell signalling transduction pathways; Types of signaling molecules and receptors GPCR and Role of second messenger (cAMP) Extracellular matrix-Cell interactions Apoptosis and Necrosis		Soumen Patra		
	CELL BIOLOGY PRACTICAL				
	1. Preparation of temporary stained squash of onion root tip to study various stages of mitosis 2. Study of various stages of meiosis. 3. Preparation of permanent slide to show the presence of Barr body in human female blood cells/cheek cells. 4. Preparation of permanent slide to demonstrate: a) DNA by Feulgen reaction. b) Cell viability study by Trypan blue staining. c) Mitochondria identification through vital stain.	20 CREDITS 2	Atanu Das / Dipanjan Ray	01.04.2022 to 09.07.2022	

Generic Elective (GE 2)

GE 2 T (Animal Diversity)					
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal Assesment**
Unit 1.	Protista General characters of Protozoa; Life cycle of Plasmodium	40	Sudipta Bera		1st internal 2nd week of May, 2022
Unit 2.	Porifera General characters and canal system in Porifera		Sudipta Bera		
Unit 3.	Radiata General characters of Cnidarians and polymorphism		Atanu Das		

Unit 4.	Unit 4. Aceolomates General characters of Helminthes; Life cycle of *Taenia solium*	CREDITS 4	Sudipta Bera	01.04.2022 to 09.07.2022	2nd Internal 2nd week of July, 2022
Unit 5.	Pseudocoelomates General characters of Nemeto-helminthes; Parasitic adaptations		Bapan Santra		
Unit 6.	Coelomate Protostomes General characters of Annelida ; Metamerism.		Nabanita Das		
Unit 7.	Arthropoda General characters. Social life in insects.		Atanu Das		
Unit 8.	Mollusca General characters of 849ollusca; Pearl Formation		Nabanita Das		
Unit 9	Coelomate Deuterostomes General characters of Echinodermata, Water Vascular system in Starfish		Urmita Chandra Chowdhury		
Unit 10.	Protochordata Salient features		Atanu Das		
Unit 11.	Pisces Osmoregulation, Migration of Fishes		Urmita Chandra Chowdhury		
Unit 12.	Amphibia General characters, Adaptations for terrestrial life, Parental care in Amphibia.		Atanu Das		
Unit 13.	Amniotes; Origin of reptiles. Terrestrial adaptations in reptiles.		Urmita Chandra Chowdhury		
Unit 14.	Aves: The origin of birds; Flight adaptations		Atanu Das		
Unit 15.	Mammalia Early evolution of mammals; Primates; Dentition in mammals.		Nabanita Das		
Generic Elective (GE 2) PRACTICAL		**FULL MARKS**			
	4. Study of following specimens: **Non Chordates:** *Euglena, Noctiluca, Paramecium, Sycon, , Physalia, Tubipora, Metridium, Taenia, Ascaris, Nereis, Aphrodite, Leech, Peripatus, Limulus, ,* Hermitcrab*, Daphnia,* Millipede, Centipede, Beetle*, Chiton, Dentalium, Octopus, Asterias, and* *Antedon.*	20 CREDITS 2	Urmita Chandra Chowdhury	01.04.2022 to 09.07.2022	
	Chordates*: Balanoglossus, Amphioxus, Petromyzon, Pristis, Hippocampus, Labeo, Icthyophis/Uraeotyphlus, Salamander, Rhacophorus Draco, Uromastix, Naja,*		Bapan Santra		

	Viper, model of Archaeopteryx, any three common birds-*(Crow, duck, Owl),* Squirrel and Bat. 2. Study of following Permanent Slides: BS Cross section of Sycon, Sea anemone and *Ascaris(*male and female*)*. T. S. of Earthworm passing through pharynx, gizzard, and typhlosolar intestine. Bipinnaria and Pluteus larva. 3. Temporary mounts of Septal & pharyngeal nephridia of earthworm. Unstained mounts of Placoid, cycloid and ctenoid scales. 4. Dissections of Digestive and nervous system of Cockroach. Urinogenital system of Rat.		& Nabanita Das		

2nd Semester General

DSC1BT: Comparative Anatomy and Developmental Biology of Vertebrates					
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assesment**
Unit 1:	Integumentary System Derivatives of integument w.r.t. glands and digital tips	40 CREDITS 4	Nabanita Das	01.04.2022 to 09.07.2022	1st internal 2nd week of May, 2022 2nd Internal 2nd week of July, 2022
Unit 2:	Skeletal System Evolution of visceral arches		Nabanita Das		
Unit 3:	Digestive System Brief account of alimentary canal and digestive glands		Atanu Das		
Unit 4:	Respiratory System Brief account of gills, lungs, air sacs and swim bladder		Bapan Santra		
Unit 5:	Circulatory System Evolution of heart and aortic arches		Bapan Santra		
Unit 6:	Urinogenital System Succession of kidney, Evolution of urinogenital ducts		Sandip Jana		
Unit 7:	Nervous System Comparative account of brain		Sandip Jana		
Unit 8:	Sense Organs Receptors and its types.		Sudipta Bera		
Unit 9:	Early Embryonic Development Gametogenesis: Spermatogenesis and oogenesis w.r.t. mammals, vitellogenesis in birds; Fertilization: external (amphibians), internal (mammals), blocks to polyspermy; Early development of frog and humans (structure of mature egg and its membranes, patterns of cleavage, fate map, up to formation of gastrula);types of morphogenetic movements; Fate of germ layers; Neurulation in frog embryo.		Sudipta Bera		

Unit 10:	Late Embryonic Development Implantation of embryo in humans, Formation of human placenta and functions, other types of placenta on the basis of histology; Metamorphic events in frog life cycle and its hormonal regulation.		Urmita Chandra Chowdhury		
Unit 11:	Control of Development Fundamental processes in development (brief idea) – Gene activation, determination, induction, Differentiation, morphogenesis, intercellular communication, cell movements and cell death		Urmita Chandra Chowdhury		

DSC1BP: Comparative Anatomy and Developmental Biology of Vertebrates (Practical)

Unit	Topics	FULL MARKS	Teachers	Month of Teaching	Internal assesment
1	Osteology: a) Disarticulated skeleton of fowl and rabbit b) Carapace and plastron of turtle /tortoise c) Mammalian skulls: One herbivorous and one carnivorous animal.	20 CREDITS 2	Atanu Das	01.04.2022 to 09.07.2022	
2	Frog - Study of developmental stages - whole mounts and sections through permanent slides – cleavage stages, blastula, gastrula neurula, tail bud stage, tadpole external and internal gill stages.		Atanu Das		
3	Study of the different types of placenta- histological sections through permanent slides or photomicrographs.		Sudipta Bera		
4	Study of placental development in humans by ultrasound scans.		Sudipta Bera		
5	Examination of gametes - frog/rat - sperm and ova through permanent slides or photomicrographs.		Sudipta Bera		

Semester-III (Hons.)

CC V T (DIVERSITY OF CHORDATA)

Unit	Topics	FULL MARKS	Teachers	Month of Teaching	Internal assesment
Unit 1:	**Introduction to Chordates** General characteristics and outline classification		Atanu Das		1st Internal

Unit 2:	**Protochordata** General characteristics and classification of sub-phylum Urochordata and Cephalochordata up to Classes. Retrogressive metamorphosis in Ascidia. Chordate Features and Feeding in Branchiostoma	40 CREDITS 4	Atanu Das	01.10.2021 – to-05.02.2022	4th week of November, 2021 2nd Internal: 1st week of January, 2022.
Unit 3:	**Origin of Chordata** Dipleurula concept and the Echinoderm theory of origin of chordates Advanced features of vertebrates over Protochordata		Urmita Chandra Chowdhury		
Unit 4:	**Agnatha** General characteristics and classification of cyclostomes up to order		Bapan Santra		
Unit 5:	**Pisces** General characteristics and classification of Chondrichthyes and Osteichthyes up to Subclasses Accessory respiratory organ, migration and parental care in fishes Swim bladder in fishes. Classification up to Sub-Classes		Nabanita Das		
Unit 6:	**Amphibia** General characteristics and classification up to living Orders. Metamorphosis and parental care in Amphibia		Dipanjan Ray		
Unit 7:	**Reptilia** General characteristics and classification up to living Orders. Poison apparatus and Biting mechanism in Snake		Dipanjan Ray		
Unit 8:	**Aves** General characteristics and classification up to Sub-Classes Exoskeleton and migration in Birds Principles and aerodynamics of flight		Sudipta Bera		
Unit 9:	**Mammals** General characters and classification up to living orders Affinities of Prototheria Exoskeleton derivatives of mammals Adaptive radiation in mammals with reference to locomotory appendages Echolocation in Micro chiropterans and Cetaceans		Habibullah Mallick		

Unit 10:	**Zoogeography** Zoogeographical realms, Plate tectonic and Continental drift theory, distribution of birds and mammals in different realms		Sandip Jana		
C5: PRACTICAL					
	1. Protochordata Balanoglossus, Herdmania, Branchiostoma, 2. Agnatha Petromyzon, Myxine 3. Fishes Scoliodon, Sphyrna, Pristis, Torpedo, Chimaera, Mystus, Heteropneustes, Labeo, Exocoetus, Echeneis, Anguilla, Hippocampus, Tetrodon/ Diodon, Anabas, Flat fish 4. Amphibia Ichthyophis/Ureotyphlus, Necturus, Bufo, Hyla, Alytes, Salamandra 5. Reptilia Chelone, Trionyx, Hemidactylus, Varanus, Uromastix, Chamaeleon, Ophiosaurus, Draco, Bungarus, Vipera, Naja, Hydrophis, Zamenis, Crocodylus Key for Identification of poisonous and non-poisonous snakes 6. Aves Study of six common birds from different orders. Types of beaks and claws 7. Mammalia Bat (Insectivorous and Frugivorous), Funambulus, Loris, Herpestes, pecten from Fowl head. Dissections of brain and pituitary of Tilapia. Dissection of Fowl head (Dissections and mounts subject to permission) Power point presentation on study of any two animals from two different classes by students (may be included if dissections not given permission)	20 CREDITS 2	Dipanjan Ray /Bapan Santra/Nabanita Das	01.10.2021 – to-05.02.2022	

	Classification from Young, J. Z. (2004) to be followed				
C6T Animal Physiology: Controlling & Coordinating Systems					
Unit 1:	**Tissues** Structure, location, classification and functions of epithelial tissue, connective tissue, muscular tissue and nervous tissue and, fixation and staining of tissues.	40 CREDITS 4	Sandip Jana	01.10.2021 – to-05.02.2022	
Unit 2:	**Bone and Cartilage** Structure and types of bones and cartilages, Ossification		Urmita Chandra Chowdhury		
Unit 3:	**Nervous System** Structure of neuron, resting membrane potential, Origin of action potential and its propagation across the myelinated and unmyelinated nerve fibers; Types of synapse, Synaptic transmission and Neuromuscular junction; Reflex action and its types		Dipanjan Ray		
Unit 4:	**Muscle** Histology of different types of muscle; Ultra structure of skeletal muscle; Molecular and chemical basis of muscle contraction; Characteristics of muscle fibre		Soumen Patra		
Unit 5:	**Reproductive System** Histology of testis and ovary Physiology of Reproduction		Bapan Santra		
Unit 6:	**Endocrine System** Histology and function of pituitary, thyroid, pancreas and adrenal Classification of hormones; Mechanism of Hormone action Signal transduction pathways for Steroidal and Non steroidal hormones Hypothalamus (neuroendocrine gland) - principal nuclei involved in neuroendocrine control of anterior pituitary and endocrine system Placental hormones		Soumen Patra		
C6P	**PRACTICALS**				
	1. Recording of simple muscle twitch with electrical stimulation (or Virtual) 2. Demonstration of the unconditioned reflex action (Deep tendon reflex such as	20	Sandip Jana/ Dipanjan Ray	01.10.2021 – to-05.02.2022	

	knee jerk reflex) 3. Preparation of temporary mounts: Squamous epithelium, Striated muscle fibers and nerve cells 4. Study of permanent slides of Mammalian skin, Cartilage, Bone, Spinal cord, Nerve cell, Pituitary, Pancreas, Testis, Ovary, Adrenal, Thyroid and Parathyroid 5. Microtomy: Preparation of permanent slide of any five mammalian (Goat/white rat) tissues.	CREDITS 2			
CC7T	**Fundamentals of Biochemistry**				
Unit 1:	**Carbohydrates** Structure and Biological importance: Monosaccharides, Disaccharides, Polysaccharides; Derivatives of Monosachharides. Carbohydrate metabolism: Glycolysis, Citric acid cycle, Pentose phosphate pathway, Gluconeogenesis	40	Soumen Patra	01.10.2021 – to-05.02.2022	
Unit 2:	**Lipids** Structure and Significance: Physiologically important saturated and unsaturated fatty acids, Tri-acylglycerols, Phospholipids, Sphingolipid, Glycolipids, Steroids, Eicosanoids and terpinoids. Lipid metabolism: β-oxidation of fatty acids; Fatty acid biosynthesis	CREDITS 4	Dipanjan Ray		
Unit 3:	**Proteins** Amino acids. Structure, Classification, General and Electro chemical properties of α-amino acids; Physiological importance of essential and non-essential amino acids Proteins. Bonds stabilizing protein structure; Levels of organization. Protein metabolism: Transamination, Deamination, Urea cycle, Fate of C-skeleton of Glucogenic and Ketogenic amino acids		Sandip Jana		
Unit 4:	**Nucleic Acids** Structure: Purines and pyrimidines, Nucleosides, Nucleotides, Nucleic acids		Sandip Jana		

	Types of DNA and RNA, Complementarity of DNA, Hpyo- Hyperchromaticity of DNA Basic concept of nucleotide metabolism				
Unit 5:	**Enzymes** Nomenclature and classification; Cofactors; Specificity of enzyme action; Isozymes; Mechanism of enzyme action; Enzyme kinetics; Derivation of Michaelis-Menten equation, Lineweaver-Burk plot; Factors affecting rate of enzyme-catalyzed reactions; Enzyme inhibition; Allosteric enzymes and their kinetics; Strategy of enzyme action- Catalytic and Regulatory (Basic concept with one example each)		Dipanjan Ray		
Unit 6:	**Oxidative Phosphorylation** Redox systems; Review of mitochondrial respiratory chain, Inhibitors and un-couplers of Electron Transport System		Soumen Patra		
C7P	**PRACTICAL**				
	1. Qualitative tests of functional groups in carbohydrates, proteins and lipids. 2. Paper chromatography of amino acids. 3. Quantitative estimation of Lowry Method. 4. Study of enzyme activity of Trypsin and Lypase.. 5. Demonstration of proteins separation by SDS-PAGE.	20 CREDITS 2	Sudipta Bera/ Dipanjan Ray	01.10.2021 – to-05.02.2022	

Skill Enhancement Course (SEC)

SEC1T: Apiculture					
Unit	**Topics:**	**FULL MARKS**	**Teacher**	**Month of Teaching**	**Internal assesment**
Unit 1:	**Biology of Bees** History, Classification and Biology of Honey Bees Social Organization of Bee Colony	40	Nabanita Das		1st Internal 4th week of November, 2021
Unit 2:	**Rearing of Bees** Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth Bee Pasturage	CREDITS 2	Nabanita Das		2nd Internal:

	Selection of Bee Species for Apiculture Bee Keeping Equipment Methods of Extraction of Honey (Indigenous and Modern)			01.10.2021 – to-05.02.2022	1st week of January, 2022.
Unit 3:	**Diseases and Enemies** Bee Diseases and Enemies Control and Preventive measures		Urmita Chandra Chowdhury		
Unit 4:	**Bee Economy** Products of Apiculture Industry and its Uses (Honey, Bees Wax, Propolis), Pollen etc		Urmita Chandra Chowdhury		
Unit 5:	**Entrepreneurship in Apiculture** Bee Keeping Industry – Recent Efforts, Modern Methods in employing artificial Beehives for cross pollination in horticultural gardens		Nabanita Das		

General elective : GE 3

AQUATIC BIOLOGY					
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assesment**
UNIT 1:	Aquatic Biomes Brief introduction of the aquatic biomes: Freshwater ecosystem (lakes, wetlands, streams and rivers), estuaries, intertidal zones, oceanic pelagic zone, marine benthic zone and coral reefs.	40 CREDITS 4	Dipanjan Ray	01.10.2021 – to-05.02.2022	1st Internal 4th week of November, 2021
UNIT 2:	Freshwater Biology Lakes: Origin and classification, Lake as an Ecosystem, Lake morphometry, Physico–chemical Characteristics: Light, Temperature, Thermal stratification, Dissolved Solids, Carbonate, Bicarbonates, Phosphates and Nitrates, Turbidity; dissolved gases (Oxygen, Carbon dioxide). Nutrient Cycles in Lakes-Nitrogen, Sulphur and Phosphorous. Streams: Different stages of stream development, Physico-chemical		Soumen Patra		2nd Internal: 1st week of January, 2022.

	environment, Adaptation of hill-stream fishes.				
UNIT 3:	Marine Biology Salinity and density of Sea water, Continental shelf, Adaptations of deep sea organisms, Coral reefs, Sea weeds.		Dipanjan Ray		
UNIT 4:	Management of Aquatic Resources Causes of pollution: Agricultural, Industrial, Sewage, Thermal and Oil spills, Eutrophication, Management and conservation (legislations), Sewage treatment Water quality assessment- BOD and COD.		Soumen Patra		
PRACTICAL GE3					
	1. Determine the area of a lake using graphimetric and gravimetric method. 2. Identify the important macrophytes, phytoplanktons and zooplanktons present in a lake ecosystem. 3. Determine the amount of Turbidity/transparency, Dissolved Oxygen, Free Carbon dioxide, Alkalinity (carbonates & bicarbonates) in water collected from a nearby lake/ water body. 4. Instruments used in limnology (Secchi disc, Van Dorn Bottle, Conductivity meter, Turbidity meter, PONAR grab sampler) and their significance. 5. A Project Report on a visit to a Sewage treatment plant/Marine bioreserve/ Fisheries Institutes	20 CREDITS 2	Soumen Patra/ Urmita Chandra Chowdhury	01.10.2021 – to-05.02.2022	

3rd Semester General
DSC-1C (CC-3)

DSC1CT: Physiology and Biochemistry					
Unit	**Topic**	**FULL MARKS**	**TEACHER**	**MONTH OF TEACHING**	**Internal assesment**

Unit 1:	**Nerve and muscle** Structure of a neuron, Resting membrane potential, Graded potential, Origin of Action potential and its propagation in myelinated and non-myelinated nerve fibres, Ultrastructure of skeletal muscle, Molecular and chemical basis of muscle contraction	40 CREDITS 4	Bapan Santra	01.10.2021 – to-05.02.2022	1st Internal 4th week of November, 2021 2nd Internal: 1st week of January, 2022.
Unit 2:	**Digestion** Physiology of digestion in the alimentary canal; Absorption of carbohydrates, proteins, lipids		Soumen Patra		
Unit 3:	**Respiration** Pulmonary ventilation, Respiratory volumes and capacities, Transport of oxygen and carbon dioxide in blood		Urmita Chandra Chowdhury		
Unit 4:	**Excretion** Structure of nephron, Mechanism of Urine formation, Counter-current Mechanism		Habibullah Mallick		
Unit 5:	**Cardiovascular system** Composition of blood, Hemostasis, Structure of Heart, Origin and conduction of the cardiac impulse,Cardiac cycle		Sudipta Bera		
Unit 6:	**Reproduction and Endocrine Glands** Physiology of male reproduction: Hormonal control of spermatogenesis; Physiology of female reproduction: hormonal control of menstrual cycle Structure and function of pituitary, thyroid, parathyroid, pancreas and adrenal		Nabanita Das		
Unit 7:	**Carbohydrate Metabolism** Glycolysis, Krebs Cycle, Pentose phosphate pathway, Gluconeogenesis, Glycogen metabolism, Review of electron transport chain		Urmita Chandra Chowdhury		
Unit 8:	**Lipid Metabolism** Biosynthesis and β oxidation of palmitic acid		Sandip Jana		

Unit 9:	**Protein metabolism** Transamination, Deamination and Urea cycle		Soumen Patra		
Unit 10:	**Enzymes** Introduction, Mechanism of action, Enzyme kinetics, inhibition and regulation		Urmita Chandra Chowdhury		

DSC1CP (Practical) : Physiology and Biochemistry

DSC1CP: Physiology and Biochemistry					
Unit	TOPIC	**FULL MARKS**	**TEACHER**	**MONTH OF TEACHING**	**Remarks**
1	Preparation of hemin and hemochromogen crystals.	20 CREDEITS 2	Sandip Jana	01.10.2021 – to-05.02.2022	
2	Study of permanent histological sections of mammalian pituitary, thyroid, pancreas, adrenal gland.		Nabanita Das		
3	Study of permanent slides of spinal cord, duodenum, liver, lung, kidney, bone, cartilage.		Bapan Santra		
4	Qualitative tests to identify functional groups of carbohydrates in given solutions (Glucose, Fructose, Sucrose, Lactose).		Sandip Jana		
5	Estimation of total protein in given solutions by Lowry's method		Habibullah Mallick		
6	Study of activity of salivary amylase under optimum conditions		Habibullah Mallick		

Semester: IV (Hons.)

C6T: Comparative anatomy of Vertebrates					
Unit	**Topics**	**FULL MARKS**	**Teacher**	**Month of Teaching**	**Internal assessment**
Unit 1:	**Integumentary System -** Structure, functions and derivatives of integument in amphibian, birds and mammals	40 CREDITS 4	Urmita Chandra Chowdhury		1st Internal: 4th week of April, 2022
Unit 2:	**Skeletal System -** Overview of axial and appendicular skeleton, Jaw suspensorium, Visceral arches.		Nabanita Das		
Unit 3:	**Digestive System** - Comparative anatomy of stomach; dentition in mammals		Dipanjan Ray		2nd Internal:

Unit 4:	**Respiratory System** - Respiratory organs in fish, amphibian, birds and mammals		Urmita Chandra Chowdhury	15.03.2022 -25.06.2022	3rd week of July, 2022
Unit 5:	**Circulatory System** General plan of circulation, Comparative account of heart and aortic arches.		Dipanjan Ray		
Unit 6:	**Urinogenital System** - Succession of kidney, Evolution of urinogenital ducts, Types of mammalian uteri		Sudipta Bera		
Unit 7:	**Nervous System** - Comparative account of brain, Cranial nerves in mammals		Bapan Santra		
Unit 8:	**Sense Organs** - Classification of receptors, Brief account of olfactory and auditory receptors in vertebrate.		Soumen Patra		
C6P	**Practical**				
	1) Study of Placoid, Cycloid and Ctenoid scales through permanent slides/photographs. 2) Study of Disarticulated skeleton of toad, Pigeon and Guineapig. 3) Demonstrations of Carapace and Plastron of turtle. 4) Identification of Mammalian skulls: one herbivores (Guineapig) and one carnivores (Dog) animals. 5) Dissection of Tilapia: Circulatory system, Brain, Pituitary, Urinogenital system.	20 CREDITS 2	Bapan Santra / Sudipta Bera	15.03.2022 -25.06.2022	

C9T: Animal Physiology: Life sustaining system					
Unit	**Topics**	**FULL MARKS**	**Teacher**	**Month of Teaching**	**Internal assessment**
Unit 1:	**Physiology of Digestion Structural** organisation and functions of Gastrointestinal tract and Associated glands; Mechanical and chemical digestion of food, absorption of Carbohydrates, Lipids, Proteins and Nucleic Acids; Digestive enzymes	40 CREDITS 4	Urmita Chandra Chowdhury		1st Internal: 4th week of April, 2022
Unit 2:	**Physiology of Respiration -** Mechanism of Respiration, Respiratory volumes and capacities, transport of Oxygen and Carbon dioxide in		Sandip Jana		2nd Internal:

	blood, Dissociation curves and the factors influencing it, respiratory pigments; Carbon monoxide poisoning			15.03.2022 -25.06.2022	3rd week of July, 2022
Unit 4:	**Physiology of circulation-** Components of Blood and their functions; Structure and functions of haemoglobin Haemostasis; Blood clotting system, Fibrinolytic system Haemopoiesis; Basic steps and its regulation Blood groups; ABO and Rh factor		Soumen Patra		
Unit 5:	**Physiology of Heart** Structure of mammalian heart, Coronary Circulation, Structure and working of conducting myocardial fibres, Origin and conduction of cardiac impulses Cardiac Cycle and cardiac output Blood pressure and its regulation		Bapan Santra		
Unit 5:	**Thermoregulation & Osmoregulation-** Physiological classification based on thermal biology. Thermal biology of endotherms Osmoregulation in aquatic vertebrates. Extrarenal osmoregulatory organs in vertebrates		Dipanjan Ray		
Unit 3:	**Renal Physiology-** Structure of Kidney and its functional unit, Mechanism of urine formation, Regulation of acid-base balance		Sudipta Bera		
C9P: (Practical) Animal Physiology: Life sustaining system					
Unit	Topics	FULL MARKS	Teacher	15.03.2022 -25.06.2022	
1	Determination of ABO Blood group.	20	Sandip Jana		
2	Enumeration of red blood cells and white blood cells using haemocytometer.	CREDITS 2	Sandip Jana		
3	Estimation of haemoglobin using Sahli's haemoglobinometer.		Soumen Patra		
4	Preparation of haemin and haemochromogen crystals.		Soumen Patra		
5	Recording of blood pressure using a sphygmomanometer.		Soumen Patra		

C10 T: Immunology					
Sl. No.	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assesment**

Unit 1	**Overview of immune system:** Basic concepts of health and diseases, Historical perspective of Immunology, Cells and organs of the Immune system	40 CREDITS 4	Soumen Patra	15.03.2022 -25.06.2022	1st Internal: 4th week of April, 2022 2nd Internal: 3rd week of July, 2022
Unit 2	**Innate and adaptive immunity:** Anatomical barriers, Inflammation, Cell and molecules involved in innate immunity, Adaptive immunity (Cell mediated and humoral).		Soumen Patra		
Unit 3	**Antigens:** Antigenicity and immunogenicity, Immunogens, Adjuvants and haptens, Factors influencing immunogenicity, B and T-Cell epitopes		Dipanjan Ray		
Unit 4	**Immunoglobulins:** Structure and functions of different classes of immunoglobulins, Antigen- antibody interactions, Immunoassays (ELISA and RIA), Hybridoma technology, Monoclonal antibody production		Sandip Jana		
Unit 5	**Major Histocompatibility Complex:** Structure and functions of MHC molecules. Structure of T cell Receptor and its signalling, T cell development & selection		Sandip Jana		
Unit 6	**Cytokines:** Types, properties and functions of cytokines.		Urmita Chandra Chowdhury		
Unit 7	**Complement system:** Components and pathways of complement activation.		Dipanjan Ray		
Unit 8	**Hypersensitivity:** Gell and Coombs' classification and brief description of various types of hypersensitivities.		Dipanjan Ray		
Unit 9	**Immunology of diseases:** Malaria, Filariasis, Dengue and Tuberculosis		Bapan Santra		
U10	**Vaccines**: Various types of vaccines. Active & passive immunization (Artificial and natural).		Soumen Patra		
C10P: Immunology					
Sl. No.	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Remarks**
	1 Demonstration of lymphoid organs. 2 Histological study of spleen, thymus and lymph nodes through slides/ photographs. 3 Preparation of stained blood film to study various types of blood cells. 4 ABO blood group determination.	20 CREDITS 2	Soumen Patra /Sandip Jana	15.03.2022 -25.06.2022	

	5 Demonstration of : ELISA				

Skill Enhancement Course-2 (SEC-2): Sericulture

SEC-2					
Unit	**Topics: Sericulture**	FULL MARKS	Teachers	**Month of Teaching**	**Internal assesment**
Unit 1:	**Introduction** Sericulture: Definition, history and present status; Silk route Types of silkworms, Distribution and Races Exotic and indigenous races Mulberry and non-mulberry Sericulture	40 CREDITS 2	Urmita Chandra Chowdhury	15.03.2022 -25.06.2022	1st Internal: 4th week of April, 2022
Unit 2:	**Biology of Silkworm** Life cycle of Bombyx mori Structure of silk gland and secretion of silk		Atanu Das		2nd Internal: 3rd week of July, 2022
Unit 3:	**Rearing of Silkworms** Selection of mulberry variety and establishment of mulberry garden Rearing house and rearing appliances. Disinfectants: Formalin, bleaching powder, RKO Silkworm rearing technology: Early age and Late age rearing Types of mountages Spinning, harvesting and storage of cocoons		Urmita Chandra Chowdhury		
Unit 4:	**Pests and Diseases** Pests of silkworm: Uzi fly, dermestid beetles and vertebrates Pathogenesis of silkworm diseases: Protozoan, viral, fungal and bacterial Control and prevention of pests and diseases		Atanu Das		
Unit 5:	**Entrepreneurship in Sericulture** Prospectus of Sericulture in India: Sericulture industry in different states, employment, potential in mulberry and non-mulberry sericulture Visit to various sericulture centres.		Urmita Chandra Chowdhury		

GE-4T: General elective 4: Environment and Public Health					
Unit	**Topics**	**FULL MARKS**	**Teacher**	**Month of Teaching**	**Internal assessment**
UNIT I:	Introduction : Sources of Environmental hazards, hazard identification and accounting, fate of toxic and persistent substances in the environment, dose Response Evaluation, exposure Assessment	40 CREDITS 4	Sudipta Bera	15.03.2022 -25.06.2022	1st Internal: 4th week of April, 2022
Unit III	Climate Change : Greenhouse gases and global warming, Acid rain, Ozone layer destruction, Effect of climate change on public health		Sandip Jana		2nd Internal: 3rd week of July, 2022
Unit 3	Pollution Air, water, noise pollution sources and effects, Pollution control		Sudipta Bera		
Unit 4	Waste Management Technologies: Sources of waste, types and characteristics, Sewage disposal and its management, Solid waste disposal, Biomedical waste handling and disposal, Nuclear waste handling and disposal, Waste from thermal power plants.		Sandip Jana		
Unit 5	Diseases : Causes, symptoms and control of tuberculosis, Asthma, Cholera, Minamata disease, typhoid, Filariasis.		Sudipta Bera		
GE 4P: Practical :Environment and Public Health Lab		**FULL MARKS**			
	To determine P^H, Cl, SO_4, NO_3 in the soil and water sample from different locations.	20 CREDITS 2	Sandip Jana	15.03.2022 -25.06.2022	

4th SEMESTER GENERAL

DSC1DT					
Sl. No.	**Topics**	**FULL MARKS**	**Teacher**	**Month of Teaching**	**Internal assessment**
Unit 1:	**Introduction to Genetics**	40	Sandip Jana		1st Internal:

	Mendel's work on transmission of traits, Genetic Variation, Molecular basis of genetic information	CREDITS 4			4th week of April, 2022
Unit 2:	**Mendelian Genetics and its Extension** Principles of Inheritance, Chromosome theory of inheritance, Incomplete dominance and codominance, Multiple alleles, Lethal alleles, Epistasis, Pleiotropy, sex linked inheritance, extra-chromosomal inheritance		Soumen Patra		2nd Internal: 3rd week of July, 2022
Unit 3:	**Linkage, Crossing Over and Chromosomal Mapping** Linkage and crossing over, Recombination frequency as a measure of linkage intensity, two factor and three factor crosses, Interference and coincidence, Somatic cell genetics – an alternative approach to gene mapping		Urmita Chandra Chowdhury	15.03.2022 -25.06.2022	
Unit 4:	**Mutations** Chromosomal Mutations: Deletion; Duplication; Inversion; Translocation; Aneuploidy and Polyploidy; Gene mutations: Induced versus Spontaneous mutations, Back versus Suppressor mutations,		Soumen Patra		
Unit 5:	**Sex Determination** Chromosomal mechanisms, dosage compensation		Nabanita Das		
Unit 6:	**History of Life** Major Events in History of Life		Sandip Jana		
Unit 7:	**Introduction to Evolutionary Theories** Lamarckism, Darwinism, Neo-Darwinism		Nabanita Das		
Unit 8:	**Direct Evidences of Evolution** Types of fossils, Incompleteness of fossil record, Dating of fossils, Phylogeny of horse		Sandip Jana		
Unit 9:	**Processes of Evolutionary Change** Organic variations; Isolating Mechanisms; Natural selection (Example: Industrial melanism); Types of natural selection (Directional, Stabilizing, Disruptive), Artificial selection		Soumen Patra		

Unit 10:	**Species Concept** Biological species concept (Advantages and Limitations); Modes of speciation (Allopatric, Sympatric)		Sudipta Bera		
Unit 11:	**Macro-evolution** Macro-evolutionary Principles (example: Darwin's Finches)		Urmita Chandra Chowdhury		
Unit 12:	**Extinction** Mass extinction (Causes, Names of five major extinctions, K-T extinction in detail), Role of extinction in evolution		Urmita Chandra Chowdhury		
DSC1DP: Genetics and Evolutionary Biology (Practical)					
	1. Study of Mendelian inheritance and gene interactions (Non- Mendelian inheritance) using suitable examples. Verify the results using Chi-square test. 2. Study of Linkage, recombination, gene mapping using the data. 3. Study of Human Karyotypes (normal and abnormal). 4. Study of fossil evidences from plaster cast models and pictures 5. Study of homology and analogy from suitable specimens/ pictures 6. Charts: a. Phylogeny of horse with diagrams/ cut outs of limbs and teeth of horse ancestors b. Darwin's Finches with diagrams/ cut outs of beaks of different species 7. Visit to Natural History Museum and submission of report	20 CREDITS 2	Sandip Jana/ Bapan Santra	15.03.2022 -25.06.2022	

SEC2T: Aquarium Fish Keeping					
Unit	**Topics**	**FULL MARKS**	**Teacher**	**Month of Teaching**	**Internal assesment**
Unit1:	**Introduction to Aquarium Fish Keeping** The potential scope of Aquarium Fish Industry as a Cottage Industry, Exotic and Endemic species of Aquarium Fishes	40 CREDITS 2	Bapan Santra	15.03.2022 -25.06.2022	1st Internal: 4th week of April, 2022 2nd Internal: 3rd week of July, 2022
Unit 2:	**Biology of Aquarium Fishes** Common characters and sexual dimorphism of Fresh water and Marine Aquarium fishes such as Guppy, Molly, Sword tail, Gold fish, Angel fish, Blue morph, Anemone fish and Butterfly fish		Nabanita Das		
Unit 3:	**Food and feeding of Aquarium fishes** Use of live fish feed organisms. Preparation and composition of formulated fish feeds		Bapan Santra		
Unit 4:	**Fish Transportation** Live fish transport - Fish handling, packing and forwarding techniques		Soumen Patra		
Unit 5:	**Maintenance of Aquarium** General Aquarium maintenance – budget for setting up an Aquarium Fish Farm as a Cottage Industry		Atanu Das		

Semester: V (Hons.)

CXI					
Unit	**Topics: Molecular Biology**	FULL MARKS	Teachers	**Month of Teaching**	**Internal assessment**
Unit 1	**Unit 1: Nucleic Acids** Salient features of DNA and RNA. Watson and Crick Model of DNA	40	Sandip Jana		1st Internal: 1st week of November, 2021 2nd Internal: 2nd week of December, 2021
Unit 2	**Unit 2: DNA Replication** Mechanism of DNA Replication in Prokaryotes, Semi-conservative, bidirectional and discontinuous Replication, RNA priming, Replication of telomeres.		Sandip Jana		
Unit 3	**Unit 3: Transcription**		Dipanjan Ray		

	Mechanism of Transcription in prokaryotes and eukaryotes, Transcription factors, Difference between prokaryotic and eukaryotic transcription.	CREDITS 4		14.09.2021 – 18.01.2022	
Unit 4	**Unit 4: Translation** Mechanism of protein synthesis in prokaryotes, Ribosome structure and assembly in prokaryotes, fidelity of protein synthesis, aminoacyl tRNA synthetases and charging of tRNA; Proteins involved in initiation, elongation and termination of polypeptide chain; Genetic code, Degeneracy of the genetic code and Wobble Hypothesis; Inhibitors of protein synthesis; Difference between prokaryotic and eukaryotic translation		Habibullah Mallick		
Unit 5	**Unit 5: Post Transcriptional Modifications and Processing of Eukaryotic RNA** Capping and Poly A tail formation in mRNA; Split genes: concept of introns and exons, splicing mechanism, alternative splicing, exon shuffling, and RNA editing, Processing of tRNA		Dipanjan Ray		
Unit 6	**Unit 6: Gene Regulation** Regulation of Transcription in prokaryotes: lac operon and trp operon; Regulation of Transcription in eukaryotes: Activators, enhancers, silencer, repressors, miRNA mediated gene silencing, Genetic imprinting		Sandip Jana		
Unit 7	**Unit 7: DNA Repair Mechanisms** Types of DNA repair mechanisms, RecBCD model in prokaryotes, nucleotide and base excision repair, SOS repair		Soumen Patra		
Unit 8	**Molecular Techniques** PCR, Western and Southern blot, Northern Blot, Sanger DNA sequencing		Sudipta Bera		
List of Practical		FULL MARKS			
	1. Demonstration of polytene and lampbrush chromosome from photograph. 2. Isolation and quantification of genomic DNA using spectrophotometer (A260 measurement). 3. Agarose gel electrophoresis for DNA.	20 CREDITS 2	Atanu Das / Habibullah Mallick	14.09.2021 – 18.01.2022	

Semester: V: CXII

Unit	Topics: Genetics	FULL MARKS	Teachers	Month of Teaching	Internal assessment
Unit 1	**Mendelian Genetics and its Extension** Principles of inheritance, Incomplete dominance and co-dominance, Epistasis Multiple alleles, Lethal alleles, Pleiotropy, Sex-linked, sex- influenced and sex-limited inheritance, Polygenic Inheritance.	40 CREDITS 4	Urmita Chandra Chowdhury	14.09.2021 – 18.01.2022	1st Internal: 1st week of November, 2021 2nd Internal: 2nd week of December, 2021
Unit 2	**Linkage, Crossing Over and Chromosomal Mapping** Linkage and Crossing Over, molecular basis of crossing over, Measuring Recombination frequency and linkage intensity using three factor crosses, Interference and coincidence		Atanu Das		
Unit 3	**Mutations** Types of gene mutations (Classification), Types of chromosomal aberrations (Classification with one suitable example of each), Non-disjunction and variation in chromosome number; Molecular basis of mutations in relation to UV light and chemical mutagens		Bapan Santra		
Unit 4	**Sex Determination** Mechanisms of sex determination in Drosophila Sex determination in mammals Dosage compensation in Drosophila & Human		Dipanjan Ray		
Unit 5	**Extra-chromosomal Inheritance** Criteria for extra chromosomal inheritance, Antibiotic resistance in Chlamyadomonas, Kappa particle in Paramoecium Shell spiralling in snail		Soumen Patra		
Unit 6	**Recombination in Bacteria and Viruses** Conjugation, Transformation, Transduction, Complementation test in Bacteriophage		Habibullah Mallick		
Unit 7	**Transposable Genetic Elements** Transposons in bacteria, Ac-Ds elements in maize and P elements in Drosophila, LINE, SINE, Alu elements in humans		Sudipta era		
Practical					

	1. Chi-square analyses 2. Linkage maps based on conjugation 3. Identification of chromosomal aberration in Drosophila and man from photograph 4. Pedigree analysis of some human inherited traits	20 CREDITS 2	Sandip Kr. Jana /Atanu Das	14.09.2021 – 18.01.2022	

DSE1					
Unit	**Topics: DSE1T: Fish and Fisheries**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assessment**
Unit 1	**Introduction and Classification** General description of fish Feeding habit, habitat and manner of reproduction Classification of fish (up to Subclasses)	40 CREDITS 4	Nabanita Das	14.09.2021 – 18.01.2022	1st Internal: 1st week of November, 2021 2nd Internal: 2nd week of December, 2021
Unit 2	**Morphology and Physiology** Types of fins and their modifications; Locomotion in fish; Hydrodynamics; Types of Scales, Use of scales in Classification and determination of age of fish; Gills and gas exchange; Swim Bladder: Types and role in Respiration, buoyancy; Osmoregulation in Elasmobranchs; Reproductive strategies (special reference to Indian fish); Electric organ, Bioluminescence		Dipanjan Ray		
Unit 3	**Fisheries** Inland Fisheries; Marine Fisheries; Environmental factors influencing the seasonal variations in fish catches in the Arabian Sea and the Bay of Bengal; Fishing crafts and Gears; Depletion of fisheries resources; Application of remote sensing and GIS in fisheries; Fisheries law and regulations		Nabanita Das		
Unit 4	**Aquaculture** Sustainable Aquaculture; Extensive, semi-intensive and intensive culture of fish; Pen and cage culture; Polyculture; Composite fish culture; Brood stock management; Induced breeding of fish; Management of finfish hatcheries; Preparation and maintenance of fish aquarium; Preparation of compound diets for fish; Role of water quality in aquaculture; Fish diseases:		Urmita Chandra Chowdhury		

	Bacterial, viral and parasitic; Preservation and processing of harvested fish, Fishery by-products				
Unit 5	**Fish in research** Transgenic fish Zebrafish as a model organism in research		Sudipta Bera		
Practical		FULL MARKS			
	1. Morphometric and meristic characters of fishes 2. Study of *Petromyzon*, *Myxine*, *Pristis*, *Chimaera*, *Exocoetus*, *Hippocampus*, *Gambusia*, *Labeo*, *Heteropneustes*, *Anabas* 3. Study of different types of scales (through permanent slides/ photographs). 4. Study of crafts and gears used in Fisheries 5. Water quality criteria for Aquaculture: Assessment of pH, conductivity, Total solids, Total dissolved solids . 6. Study of air breathing organs in *Channa*, *Heteropneustes*, *Anabas* and *Clarias* 7. Project Report on a visit to any fish farm/ pisciculture unit/Zebrafish rearing Lab.	20 CREDITS 2	Dipanjan Ray / Sudipta Bera	14.09.2021 – 18.01.2022	

DSE2					
Unit	**Topics: DSE2T: Animal Biotechnology**	FULL MARKS	Teachers	**Month of Teaching**	**Internal assessment**
Unit 1	**Introduction** Organization of prokaryotic and eukaryotic genome, Concept of genomics	40 CREDITS 4	Atanu Das		1st Internal: 1st week of November, 2021
Unit 2	**Molecular Techniques in Gene manipulation** Cloning vectors: Plasmids, Cosmids, Phagemids, Lambda Bacteriophage, M13, BAC, YAC, MAC and Expression vectors (characteristics).Restriction enzymes: Nomenclature, detailed study of Type II. Transformation techniques: Calcium chloride method and electroporation. Construction of genomic and cDNA libraries and screening by colony and plaque hybridization		Bapan Santra & Dipanjan Ray	14.09.2021 – 18.01.2022	2nd Internal: 2nd week of December, 2021

	Southern, Northern and Western blotting DNA sequencing: Sanger method Polymerase Chain Reaction, DNA Finger Printing and DNA micro array.				
Unit 3	**Genetically Modified Organisms** Production of cloned and transgenic animals: Nuclear Transplantation, Retroviral Method, DNA microinjection. Applications of transgenic animals: Production of pharmaceuticals, production of donor organs, knock out mice		Soumen Patra		
Unit 4	**Culture Techniques and Applications** Animal cell culture, expressing cloned genes in mammalian cells, Molecular diagnosis of genetic diseases (Cystic fibrosis, Sickle cell anemia)		Atanu Das		
	Practical				
	1. Genomic DNA isolation from E. coli 2. Plasmid DNA isolation (pUC 18/19) from E. coli 3. Restriction digestion of plasmid DNA. 4. Construction of circular and linear restriction map from the data provided. 5. Calculation of transformation efficiency from the data provided. 6. To study following techniques through photographs a. Southern Blotting b. Northern Blotting c. Western Blotting d. DNA Sequencing (Sanger's Method) e. PCR f. DNA fingerprinting 7. Project report on animal cell culture	20 CREDITS 2	Dipanjan Ray & Habibullah Mallick & Atanu Das	14.09.2021 – 18.01.2022	

5th SEMESTER GENERAL

	5TH SEM DSE-1T Immunology				
Unit	TOPIC	FULL MARKS	TEACHER	MONTH OF TEACHING	**Internal assessment**
Unit 1.	**Overview of the Immune System**	40	Sudipta Bera		1st Internal:

	Introduction to basic concepts in immunology, components of immune system, principles of innate and adaptive immune system	CREDITS 4		14.09.2021 – 18.01.2022	1st week of November, 2021 2nd Internal: 2nd week of December, 2021
Unit 2	**Cells and Organs of the Immune System** Haematopoeisis, Cells of immune system and organs (primary and secondary lymphoid organs) of the immune system		Urmita Chandra Chowdhury		
Unit 3	**Antigens** Basic properties of antigens, B and T cell epitopes, haptens and adjuvants		Soumen Patra		
Unit 4	**Antibodies** Structure, classes and function of antibodies, monoclonal antibodies, antigen antibody interactions as tools for research and diagnosis		Sandip Jana		
Unit 5	**Working of the immune system** Structure and functions of MHC, exogenous and endogenous pathways of antigen presentation and processing, Basic properties and functions of cytokines, Complement system: Components and pathways.		Bapan Santra		
Unit 6	**Immune system in health and disease** Gell and Coombs' classification and brief description of various types of hypersensitivities, Introduction to concepts of autoimmunity and immunodeficiency		Urmita Chandra Chowdhury		
Unit 7	**Vaccines** General introduction to vaccines, Various types of vaccines		Nabanita Das		
PRACTICAL					
	Demonstration of lymphoid organs	20 CREDITS 2	Urmita Chandra Chowdhury	14.09.2021 – 18.01.2022	
	Histological study of spleen, thymus and lymph nodes through slides/ photographs		Urmita Chandra Chowdhury		
	Preparation of stained blood film to study various types of blood cells		Urmita Chandra Chowdhury		

	Ouchterlony's double immuno-diffusion method		Habibullah Mallick		
	ABO blood group determination		Urmita Chandra Chowdhury		
	Cell counting and viability test from splenocytes of farm bred animals/cell lines		Habibullah Mallick		
	Demonstration of • ELISA • Immunoelectrophoresis		Habibullah Mallick		

	SEC-3: Medical Diagnostics				
Unit	TOPICS	FULL MARKS	TEACHER	MONTH OF TEACHING	**Internal assessment**
Unit 1	Introduction to Medical Diagnostics and its Importance	40 CREDITS 2	Urmita Chandra Chowdhury	14.09.2021 – 18.01.2022	1st Internal: 1st week of November, 2021 2nd Internal: 2nd week of December, 2021
Unit 2	Diagnostics Methods Used for Analysis of Blood Blood composition, Preparation of blood smear and Differential Count (D.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentary Rate (E.S.R), Packed Cell Volume (P.C.V.)		Nabanita Das		
Unit 3	Diagnostic Methods Used for Urine Analysis Urine Analysis: Physical characteristics; Abnormal constituents		Soumen Patra		
Unit 4	Non-infectious Diseases Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type I and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/KiT		Urmita Chandra Chowdhury		
Unit 5	Infectious Diseases Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis		Nabanita Das		
Unit 6	Tumours Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bone		Soumen Patra		

	fracture, PET, MRI and CT Scan (using photographs).				

Semester-VI (Hons.)

C13T: Developmental Biology					
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assessment**
Unit 1	**Introduction** Basic concepts: Phases of Development, Cell cell interaction, Differentiation and growth, Differential gene expression.	40 CREDITS 4	Soumen Patra	21.02.2022 – 10.06.2022	1st Internal: 1st week of April, 2022 2nd Internal: 2nd week of June, 2022.
Unit 2	**Early Embryonic Development** Gametogenesis, Spermatogenesis, Oogenesis; Types of eggs, Egg membranes; Fertilization (External and Internal): Changes in gametes, Blocks to polyspermy; Planes and patterns of cleavage; Types of Blastula; Fate		Dipanjan Ray		

	maps (including Techniques); Early development of frog and chick up to gastrulation; Embryonic induction and organizers.				
Unit 3	**Late Embryonic Development** Fate of Germ Layers; Extra-embryonic membranes in birds; Implantation of embryo in humans, Placenta (Structure, types and functions of placenta).		Habibullah Mallick		
Unit 4	**Post Embryonic Development** Development of brain and Eye in Vertebrate. Regeneration: Modes of regeneration, epimorphosis, morphallaxis and compensatory regeneration (with one example each).		Sandip Jana		
Unit 5	**Implications of Developmental Biology** Teratogenesis: Teratogenic agents and their effects on embryonic development; In vitro fertilization, Stem cell (ESC), Amniocentesis.		Atanu Das		
	Practical				
	1. Study of whole mounts of developmental stages of chick through permanent slides: Primitive streak (13 and 18 hours), 21, 24, 28, 33, 36, 48, 72, and 96 hours of incubation (Hamilton and Hamburger stages). 2. Study of the developmental stages and life cycle of Drosophila from stock culture. 3. Study of different sections of placenta (photomicropgraph/ slides). 4. Project report on Drosophila culture/chick embryo development.	20 CREDITS 2	Sudipta Bera **&** Habibullah Mallick	21.02.2022 – 10.06.2022	

C14T: Evolutionary Biology					
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assessment**
Unit 1	Life's Beginnings: Chemogeny, RNA world, Biogeny, Origin of photosynthesis, Evolution of eukaryotes.	40 CREDITS 4	Sandip Jana	21.02.2022 – 10.06.2022	1st Internal: 1st week of April, 2022 2nd Internal: 2nd week of June, 2022.
Unit 2	Historical review of Evolutionary concepts, Lamarkism, Darwinism and Neo Darwinism.		Nabanita Das		
Unit 3	Geological time scale, Fossil records of Hominids (from *Australopithacus* to *Homo sapiens*), evolution of horse. Neutral theory of molecular evolution, Molecular clock.		Urmita Chandra Chowdhury		
Unit 4	Sources of variations: Heritable variations and their role in evolution.		Bapan Santra		
Unit 5	Population genetics: Hardy-Weinberg Law (statement and derivation of equation, application Of law to biallelic Population); Evolutionary forces upsetting H-W equilibrium; Natural selection (concept of fitness, types of selection, selection coefficient, mode of selection heterozygous superiority).Genetic Drift mechanism (founder's effect, bottleneck phenomenon)**.** Role of Migration and Mutation in changing allele frequencies.		Habibullah Mallick		
Unit 6	Species concept, Isolating mechanisms, modes of speciation. Adaptive radiation /macroevolution (exemplified by Galapagos finches).		Dipanjan Ray		
Unit 7	Extinctions, Back ground and mass extinctions (causes and effects), detailed example of K-T extinction.		Atanu Das		

Unit 8	Origin and Evolution of Man, Unique Hominin characteristics contrasted with primate characteristic Molecular analysis of human origin.		Sudipta Bera		
Unit 9	Phylogenetic trees, Construction & interpretation of Phylogenetic tree using parsimony, Convergent & Divergent evolution.		Soumen Patra		
PRACTICAL		**FULL MARKS**			
	1. Study of fossils from models/ pictures 2. Study of homology and analogy from suitable specimens 3. Study and verification of Hardy-Weinberg Law by chi square analysis 4. Graphical representation and interpretation of data of height/ weight of a sample of 100 humans in relation to their age and sex.	20 CREDITS 2	Atanu Das / Habibullah Mallick	21.02.2022 – 10.06.2022	

DSE3T: Endocrinology

Unit	Topics	FULL MARKS	Teachers	Month of Teaching	Internal assessment
Unit 1	**Introduction to Endocrinology** General idea of Endocrine systems, Classification, Characteristic and Transport of Hormones, Neurosecretions and Neurohormones	40 CREDITS 4	Nabanita Das	21.02.2022 – 10.06.2022	1st Internal: 1st week of April, 2022 2nd Internal: 2nd week of June, 2022.
Unit 2	**Epiphysis, Hypothalamo-hypophysial Axis** Structure of pineal gland, Secretions and their functions in biological rhythms and reproduction. Structure and functions of hypothalamus and Hypothalamic nuclei, Regulation of neuroendocrine glands, Feedback mechanisms Structure of pituitary gland, Hormones and their functions, Hypothalamo-		Bapan Santra		

	hypophysial portal system, Disorders of pituitary gland.				
Unit 3	**Peripheral Endocrine Glands** Structure, Hormones, Functions and Regulation of Thyroid gland, Parathyroid, Thymus, Adrenal, Pancreas, Ovary and Testis. Hormones in homeostasis, Disorders of endocrine glands		Urmita Chandra Chowdhury		
Unit 4	**Regulation of Hormone Action** Mechanism of action of steroidal, non-steroidal hormones with receptors. Bioassays of hormones using RIA & ELISA. Estrous cycle in rat and menstrual cycle in human. Multifaceted role of Vasopressin & Oxytocin. Hormonal regulation of parturition.		Soumen Patra		
Practical		**FULL MARKS**			
	1. Dissect and display of Endocrine glands in laboratory bred rat. 2. Study of the permanent slides of all the endocrine glands 3. Tissue fixation, embedding in paraffin, microtomy and slide preparation of any endocrine gland 4. Estimation of plasma level of any hormone using ELISA. 5. Designing of primers of any hormone.	20 CREDITS 2	Dipanjan Ray & Soumen Patra	21.02.2022 – 10.06.2022	

DSE4T: Wild Life Conservation and Management

Unit	Topics	FULL MARKS	Teachers	Month of Teaching	Internal assessment
Unit 1	**Introduction to Wild Life**	40	Nabanita Das		1st Internal:

	Values of wild life - positive and negative; Conservation ethics; Importance of conservation; Causes of depletion; World conservation strategies.	CREDITS 4			1st week of April, 2022 2nd Internal: 2nd week of June, 2022.
Unit 2	**Evaluation and management of wild life** Habitat analysis, Physical parameters: Topography, Geology, Soil and water Biological Parameters: food, cover, forage, browse and cover estimation. Standard evaluation procedures: remote sensing and GIS.		Atanu Das		
Unit 3	**Management of habitats** Setting back succession; Grazing logging; Mechanical treatment; Advancing the successional process; Cover construction; Preservation of general genetic diversity Restoration of degraded habitats.		Habibullah Mallick	21.02.2022 – 10.06.2022	
Unit 4	**Population estimation** Population density, Natality, Birth rate, Mortality, fertility schedules and sex ratio computation; Faecal analysis of ungulates and carnivores; Pug marks and census method.		Dipanjan Ray		
Unit 5	**Aims and objectives of wildlife conservation** Wildlife conservation in India – through ages; different approaches of wildlife conservation; modes of conservation; in-situ conservation and ex-situ conservation: necessity for wildlife conservation.		Nabanita Das		
Unit 6	**Management planning of wild life in protected areas**		Dipanjan Ray		

	Estimation of carrying capacity; Eco tourism / wild life tourism in forests; Concept of climax persistence; Ecology of perturbence.				
Unit 7	**Man and Wildlife** Causes and consequences of human-wildlife conflicts; mitigation of conflict – an overview; Management of excess population.		Sandip Jana		
Unit 8	**Protected areas** National parks & sanctuaries, Community reserve; Important features of protected areas in India; Tiger conservation - Tiger reserves in India; Management challenges in Tiger reserve.		Urmita Chandra Chowdhury		
Practical					
	1. Identification of flora, mammalian fauna, avian fauna, herpeto-fauna. 2. Demonstration of basic equipment needed in wildlife studies use, care and maintenance (Compass, Binoculars, Spotting scope, Range Finders, Global Positioning System, Various types of Cameras and lenses). 3. Familiarization and study of animal evidences in the field; Identification of animals through pug marks, hoof marks, scats, pellet groups, nest, antlers, etc. 4. Demonstration of different field techniques for flora and fauna. 5. PCQ, ten tree method, Circular, Square & rectangular plots, Parker's 2 Step and other methods for ground cover	20 CREDITS 2	Dipanjan Ray		

	assessment, Tree canopy cover assessment, Shrub cover assessment. 6. Trail / transect monitoring for abundance and diversity estimation of mammals and bird (direct and indirect evidences).				

Unit	Topics	FULL MARKS	Teachers	Month of Teaching	Internal assessment
Unit 1	**Introduction** Concept and scope of biotechnology	40 CREDITS 4	Nabanita Das		1st Internal: 1st week of April, 2022 2nd Internal: 2nd week of June, 2022.
Unit 2	**Molecular Techniques in Gene manipulation** Cloning vectors: Plasmids, Cosmids, Phagemids, Lambda Bacteriophage, M13, BAC, YAC, MAC and Expression vectors (characteristics) Restriction enzymes: nomenclature, detailed study of Type II. Transformation techniques: Calcium chloride method and electroporation. Construction of genomic and cDNA libraries and screening by colony and plaque hybridization Southern, Northern and Western blotting; DNA sequencing: Sanger method; Polymerase Chain Reaction, DNA Finger Printing and DNA micro array		Bapan Santra Atanu Das	21.02.2022 – 10.06.2022	
Unit 3	**Genetically Modified Organisms** Production of cloned and transgenic animals: Nuclear Transplantation, Retroviral Method, DNA microinjection, Applications of transgenic animals: Production of pharmaceuticals, production of donor organs, knockout mice. Production of transgenic plants: *Agrobacterium* mediated transformation. Applications of transgenic plants: insect and herbicide resistant plants.		Urmita Chandra Chowdhury		
Unit 4	**Culture Techniques and Applications** Animal cell culture, Expressing cloned genes in mammalian cells, Molecular diagnosis of genetic diseases (Cystic fibrosis, Sickle cell anemia);		Soumen Patra		

	Recombinant DNA in medicines: Recombinant insulin and human growth hormone, Gene therapy				
DSE2P: Animal Biotechnology (Practical)		**FULL MARKS**			
	1. Genomic DNA isolation from *E. coli* 2. Plasmid DNA isolation (pUC 18/19) from *E. coli* 3. Restriction digestion of plasmid DNA. 4. Construction of circular and linear restriction map from the data provided. 5. Calculation of transformation efficiency from the data provided. 6. To study following techniques through photographs a) Southern Blotting b) Northern Blotting c) Western Blotting d) DNA Sequencing (Sanger's Method) e) PCR f) DNA fingerprinting **7.** Project report on animal cell culture	20 CREDITS 2	Sandip Kr. Jana /Sudipta Bera	21.02.2022 – 10.06.2022	

SEC4T: Sericulture					
Unit	**Topics**	**FULL MARKS**	**Teachers**	**Month of Teaching**	**Internal assessment**
Unit 1	**Introduction** Sericulture: Definition, history and present status; Silk route, Types of silkworms, Distribution and Races, Exotic and indigenous races, Mulberry and non-mulberry Sericulture	40 CREDITS 2	Bapan Santra	21.02.2022 – 10.06.2022	1st Internal: 1st week of April, 2022 2nd Internal: 2nd week of June, 2022.
Unit 2	**Biology of Silkworm** Life cycle of *Bombyx mori,* Structure of silk gland and secretion of silk		Urmita Chandra Chowdhury		
Unit 3	**Rearing of Silkworms** Selection of mulberry variety and establishment of mulberry garden, Rearing house and rearing appliances, Disinfectants: Formalin, bleaching powder, RKO, Silkworm rearing technology: Early age and Late age rearing, Types of mountages, Spinning, harvesting and storage of cocoons		Urmita Chandra Chowdhury		
Unit 4	**Pests and Diseases** Pests of silkworm: Uzi fly, dermestid beetles and vertebrates, Pathogenesis of silkworm diseases: Protozoan, viral, fungal and bacterial. Control and prevention of pests and diseases		Nabanita Das		
Unit 5	**Entrepreneurship in Sericulture** Prospectus of Sericulture in India: Sericulture industry in different states, employment, potential in mulberry and non-mulberry sericulture. Visit to various, sericulture centres.		Atanu Das
